M. Crouzier (Ind Republican), who described the situation in Algeria as "extremely grave." declared that during his recent visit to that country the local population had clamoured for French protection against the rebels He spoke of a "psychosis of fear" in Algiers, and asserted that the population were beginning to lose their confidence in France because of the "impotence of the administration and the injustices sometimes committed" Denouncing most of the reforms envisaged by the Government as "premature and inopportune," he demanded that the first priority should be the speedy restoration of order. **M. Quilici** (Ind Republican deputy for Oran) maintained that, before the advent of the Mendès-France Government, Algeria had "slowly moved along the path of integration in the French community" and had found "political balance and harmony." In Tunisia, he alleged, a French army of 35,000 had "capitulated before 3,000 cut-throats," and the present Tunisian Government, "placed in office by M Mendès-France," had "taken a hand" in Algerian terrorism He demanded that there should be no reforms in Algeria until order had been restored **M. de Saivre** (Independent *Paysan*), another Oran deputy, and **M. Godin** (Dissident Gaullist) also strongly attacked M. Mendès-France and M Mitterrand.

General de Monsabert (Gaullist) asserted that the events in Algeria were the result of the "psychological error" which the Government had committed when offering an amnesty to the Tunisian *fellaghas*, and that France was now paying the price for the Government's dealings in Tunisia with "a totalitarian party determined to eliminate France." He advocated that Morocco and Tunisia should become fully integrated with France in the place of their present protectorate status. **M. Valle** (*Paysan*), another Algerian deputy, similarly attributed the Algerian rebellion to the Government's policy in Tunisia, which, he declared, had been regarded throughout North Africa as a complete "capitulation" **M. Sid-Cara** (Radical), also an Algerian deputy, declared himself in favour of the reforms contemplated by the Government, but called for the reconstitution of the French African Army to afford effective protection to the whole population against terrorism and banditry **M. Guyot** (Communist) accused the Government of "playing a double game" in the Franco-Tunisian negotiations, of wishing only "to gain time" in Morocco, and of "acts of oppression" in Algeria

M. Bendjelloul (an Algerian Moslem deputy for the Constantine *departement*) questioned whether Moslems really had the same rights as Frenchmen in Algeria, and said that the measures of repression taken against the Moslem population made him fear that the answer was in the negative There was a real danger, he declared, that this state of affairs would "sow the seeds of separatism," though there was still time to redress the situation by ending "terror," unjustified arrests, tortures, and such actions as the "bombing of Native villages with napalm"

M. René Mayer (Radical deputy for the Constantine *departement* of Algeria) referred critically to the Franco-Tunisian negotiations; pointed out that the Néo-Destour congress held in December had practically rejected the French offer of internal autonomy and demanded complete independence, and recalled that he had urged, during a previous debate on Dec 11, that it was important to bring the negotiations with Tunisia to a rapid conclusion lest the prolongation of differences should have a "contagious effect" on morale in Algeria In fact, he declared, the "climate" in Algeria had gravely deteriorated during the past six weeks, a general feeling of insecurity was prevalent, especially in the rural areas, and for the first time in eight years Europeans and Moslems were beginning to become separated.

After criticizing the appointment of M. Jacques Soustelle as Governor-General of Algeria, M Mayer declared that two things were essential in Algeria First, the Moslem population—the overwhelming majority of whom were faithful to France—must be adequately protected against the threats and terrorism to which they were subjected, in this connexion he read out a list of Moslems who, he said, had suffered through terrorist activities during the past few weeks because of their pro-French attitude. Secondly, they must recognize the urgency of economic and social reforms He added, however, that whilst France must certainly adapt herself to the modern world, he did not want to see the sort of "adaptation" that had occurred in Vietnam, or in the French Settlements in India, or in the Fezzan.

"It is not a matter of always saying 'no'," he concluded, "nor of wishing to settle everything by force. But we must convince everyone that, whilst we are animated by a desire for constructive progress in association with each other, we will offer determined opposition to everything which might lead to secession or to an exodus of Frenchmen of European origin. In view of . . the psychological errors which I am afraid it has committed, can the Government still engender in our fellow-citizens in Algeria the feeling that it has these two aims? My answer is in the negative . . ." Addressing M Mendès-France directly, M René Mayer declared: "If you demand a vote of confidence, I shall be unable to give you mine for reasons which refer not only to the subject under discussion but which affect the whole of your policy, especially in the international sphere. I do not know where you are going. A policy of action should be able to find some half-way position between *immobilisme* and adventure."

M. Benbhamed, an Algerian Moslem deputy, complained about the police methods used in Algeria to suppress the rebels. After citing instances in which, he alleged, torture had been used by the police against Moslem suspects, including people against whom there was no other evidence than a denunciation by unknown persons, he declared "France has nothing to gain from this sort of thing—just the opposite." The Government, he admitted, had certainly given orders that such practices should not be permitted, but a section of the Algerian police had not obeyed them. [Here **M. Mitterrand** intervened to say that whilst "regrettable incidents" had occurred, it was noteworthy that the Government's proposal to integrate the Algerian and Metropolitan police forces, which would have put an effective stop to any such malpractices, had met with the strongest opposition from Algerian leaders themselves.] **M. Benbhamed,** continuing, pointed out that a recent protest by the Bishop of Algiers against brutality by the police had been printed only in the Communist paper. After attacking a minority of Europeans in Algeria—who, he said "hold in their hands all the powers of the administration, finance, and the Press," and who merely wanted "to continue to rule the country for their personal benefit"—M. Benbhamed appealed to the Assembly to "forget its grudge" against the Government, and gave a warning that an adverse vote would be regarded by the Moslem population of Algeria as a clear condemnation of the Government's policy of reforms.

M. Christian Fouchet (the Minister for Tunisian and Moroccan Affairs) emphasized that the Franco-Tunisian negotiations were based on M Mendès-France's declaration of July 31, 1954; that responsibility for Tunisian foreign affairs and defence would remain exclusively in French hands; and that the Tunisian negotiators, who had at one stage demanded the right for Tunisia to have a small army and its own diplomatic service, had subsequently acknowledged the French point of view Therefore the question about the aims of the negotiations, which was so often asked, could be answered: "Autonomy—yes; independence—no."

In implementation of this principle, M. Fouchet stressed, all police powers connected with the security of the territory must continue to be exercised without limitation by the French authorities, though obviously some part of the police activities must belong to

the Tunisian State. The French delegation had accordingly suggested that for a certain period all police powers should depend on the French authorities, and that for a still longer period the highest functions in the police force should remain a French responsibility Another proposed limitation was that the judicial police should be French in the case of investigations against Frenchmen or in cases in which Frenchmen had been the victim of a crime. French rights in matters concerning the law courts would be equally protected, and the Tunisians had also declared their willingness to preserve the position of France in matters of currency, finance, and Customs.

In conclusion, M Fouchet stressed that the success of the Government's Tunisian policy would lie not so much in the conventions themselves but in the spirit of their application. "It is not in the interest of France," he added, "to make the Bey's Government a mere façade cut off from its public opinion and drawing its authority solely from the French."

M. Mendès-France, replying to the earlier speakers, said that the debate was, in reality, on the Government's general policy and not only on North Africa. For eight months there had been no change in the Government's policy, which had been approved by the Assembly again and again. If M René Mayer now attacked them for their "errors" and the "catastrophic consequences" flowing from them, the Government's responsibilities were shared by all those who had supported them hitherto, including M. Mayer himself—who, M. Mendès-France added, had discovered "six months late" that the Government had "committed treason, liquidated French North Africa, and was unworthy of the country's confidence."

Dealing with the Fezzan question, he blamed previous Governments for not having come to an agreement with Libya at an earlier date, when the French position was much stronger. He declared that the French forces would not be evacuated from the Fezzan until French interests had been met and the necessary guarantees had been obtained.

As regards the situation in Algeria, M. Mendès-France deprecated as "exaggerated" the accounts, such as those given by M. Crozier, which spoke of a "psychosis of fear" He pointed out that since Nov. 1, 1954, not a single Frenchman had been murdered in the whole of Algeria, apart from soldiers and *gendarmes* who had been killed in the execution of their duty. Nevertheless, the Government had done everything to protect the population, and they now had 175,000 soldiers in North Africa as a result of the ending of the war in Indo-China Rejecting the thesis that no economic and social reforms should be carried out in Algeria until order was restored, M. Mendès-France stressed that military measures alone would never be sufficient if at the same time they did not fight hunger, unemployment, and misery. In pursuance of this policy, the Government had increased its economic development aid to Algeria from 20,000,000,000 francs to the record figure of 40,000,000,000 francs in the 1955 Budget

As regards Tunisia, the Prime Minister reiterated his adherence to his proclamation of July 31. He maintained that if the conventions had not yet been signed, it was only because the Government had not given in on certain essential points Work on the conventions was, however, so far advanced that they could "look into the future with optimism," and none of the technical problems still left open was insoluble. All the conventions would form an integrated whole and would be of "undetermined and thus indefinite duration," except in certain specific cases where periods of 5, 10, or 20 years were provided With those exceptions, no amendment could be made to the conventions without express French agreement The purpose of the conventions, however, must be not only the protection of French interests but also the creation of a basis for the association between France and a democratic Tunisia, and the proposed system would permit "the greatest hopes" in this respect The Franco-Tunisian Customs union and currency co-operation would create between the two countries solid economic links conforming to their mutual interests, whilst the guarantees accorded to French companies, agricultural property-owners, and those entering into contracts would allow a fresh development of French private economic activity.

"In fact," M. Mendès-France summed up, "there are only two possible policies in North Africa one of *detente* and reform, or one of repression and force. The Government has chosen the former; part of the Opposition the latter . . . I cannot allow the policy which I think both salutary and necessary to be condemned, and I will defend it to the end . . . My only aim is to preserve and enrich the spiritual and material patrimony of France in that part of Africa in which her destiny unfolds itself"

During the subsequent *explications de vote,* **M. Viollette** (Radical), a former Governor-General of Algeria, pointed out that the situation which had arisen there was principally due to the general poverty of the people, and that the really important thing was to extend social security benefits and family allowances to Algeria, to improve housing and water supplies, and to ameliorate the lot of the 300,000 Algerian workers living in France. Still more tragic than the general poverty in Algeria, however, was "the lack of understanding by the European community for the Moslems." There was no comradeship and true friendship between Moslems and Europeans, and unless the antagonism created by the attitude of the Europeans towards Moslems was removed, mere political reforms would be useless, and it was doubtful whether Algeria could be saved.

Although **M. Verdier** expressed the Socialists' support for M. Mendès-France, **M. Ballanger** (Communist) declared that the fall of the Government would be "greeted with joy by all patriots." He accused M Mendès-France of having gone back on his initial policy, of having "tried to win the confidence of the colonialists" in North Africa, and "above all" of being "the man of German rearmament." **M. Coste-Floret** (M R.P.) said that his party agreed on the need for a policy of progress and reforms in North Africa, though they were critical of the means which the Government had applied to the situation. He expressed support for the Government's negotiations with the Tunisian nationalists, but added: "If your policy in North Africa has our consent to a certain extent, it calls for most serious reservations on other fundamental questions." In this connexion he asserted that the Government had "lost the battle for Germany," and that its policy entailed "the risk that the Germans might turn away from the West and look towards the East"

M. Mitterrand, replying to some of the criticisms made during the debate, repudiated allegations by a number of deputies that the Government had "filled the prisons" in North Africa, he pointed out that they had, on the contrary, released large numbers of people detained under previous Governments He also said that there had been no criticism previously of the speed with which the Government had sent reinforcements to Algeria, whilst since December the forces in action there had been increased still further. It was possible to draw up lists of victims of terrorists, but no list would ever be drawn up of the farms and villages which had been protected by the French troops from attack.

Political reforms, he declared, had always aroused opposition on principle from certain Algerian settlers What the Government was proposing, however, only meant the application of the statute which had been voted by the National Assembly in 1947; the implementation of this statute compelled the Government to bring into operation those municipal reforms which it had pledged itself to carry out.

After recalling the increased investment proposed by the Government in Algeria's economic and social development, M. Mitterrand rejected the criticism of the Government's alleged failure to impose its authority and to conquer the so-called "psychosis of fear" in Algeria. Describing the existence of such a psychosis as "greatly exaggerated," he alleged that fears had been deliberately fostered, at least in part, by the "insensate Press" of Algiers, which had tried to make the inhabitants of that city believe that they were abandoned by the French Government and hated by their Moslem fellow-citizens. M Mitterrand also emphatically denied the allegations made by M Bendjelloul that napalm bombardments had been carried out against Native villages in the "mopping-up" operations.

In conclusion, he reiterated that whilst he thought that Morocco and Tunisia should be integrated in the French Union, Algeria must remain an integral part of Metropolitan France, for which it constituted "the central pivot in Africa"

After another vigorous speech by M. Mendès-France, in which he maintained that none of his opponents had defined any alternative constructive policy, that the fall of the Government would be interpreted abroad as the abandonment of a policy which had yielded "resounding benefits" to France in the United Nations, and that the opposition consisted of "three incongruous parts" unable to agree on any coherent policy, the Government's motion of confidence was rejected by 319 votes to 273, with 22 abstentions.

The opposition to the Government consisted of the 94 Communists and 4 *progressistes,* 73 M.R P. deputies, 40 Independent Republicans (including MM. Laniel Pinay, and Paul Reynaud), 27 Dissident Gaullists (A.R.S.), 37 *Paysans* and *Indépendants Paysans,* 17 Gaullists (Socialist Republicans), 4 U.D.S R. (including M Pleven), and 3 *non-inscrits* (including MM. Lecoeur and Marty, both ex-Communists), as well as 20 Radicals headed by MM René Mayer, Martinaud-Déplat, and Médicin. Those voting for the Government comprised the 105 Socialists, 52 (out of 76) Radicals, 45 Gaullists (including MM Gaston Palewski and Pierre de Gaulle), 18 U.D.S.R., 16 Overseas Independents, 12 Independent Republicans, 10 *non-inscrits,* 5 M R.P. members, 5 Dissident Gaullists, and 5 *Paysans* and *Indépendants Paysans.* The 22 abstentions included 8 Gaullists, 4 M.R P., 3 Independent Republicans, and 2 Radicals (MM. Maurice Faure and Viollette).

It was pointed out in the French Press that the Government's defeat was due to the fact that the opposition against M. Mendès-France (the Communists, Moderates and M.R P.) had been reinforced by the 20 Radicals and by about 10 Gaullists who had abstained from voting in earlier North African debates.

After the vote, which was taken in the early hours of Feb. 5, M. Mendès-France was constantly interrupted while addressing the Assembly; he eventually left the Chamber amidst scenes of uproar and handed his resignation and that of his Government to President Coty at 5.30 a.m. on the same morning.

Following the resignation of M. Mendès-France, President Coty had consultations at the Elysée with the leaders of the political parties, and on Feb. 6 requested M. Antoine Pinay—a leader of the Independent Republican (Conservative) party, and Prime Minister in 1952—to attempt to form a new administration. M. Pinay accepted this task, announced his intention of forming a government on as broad a basis as possible, and began consultations with the various political parties. On Feb. 10, however, he informed President Coty that he had had to abandon the attempt as he had been unable to secure the support of the Socialists and the M.R.P. The Social Republicans (Gaullists) had also adopted a non-committal attitude and had made a number of reservations to his proposed programme.

President Coty thereupon requested M. Pierre Pflimlin (M.R.P.), a specialist in agricultural policy and a member of

many post-war governments, to form a new administration. After four days of consultations, however, M. Pflimlin relinquished the task after he had failed to enlist the support of the Socialists and Gaullists, and after the Radical Ministers in M. Mendès-France's Government had intimated that they were not prepared to take office under him. M. Pflimlin accordingly informed President Coty—at dawn on Feb. 14—that he had been unable to form an administration.

The President then entrusted the task of forming a government to M. Christian Pineau (Socialist), who accepted the commission and began further consultations with the party leaders. Although he failed to obtain support from the right-wing parties—the Gaullists, Dissident Gaullists (A.R.S.), Independent Republicans, and *Paysans*—or from the Overseas Independents, he nevertheless succeeded in enlisting the support of the Radicals, the M.R.P., and the U.D.S.R. group, in addition to that of his own party. On Feb. 17, accordingly, M. Pineau formed a Cabinet based on a coalition of the Socialists, Radicals, M.R.P., and U.D.S.R., and including also three Gaullist Ministers who, it was announced, had accepted "technical" portfolios in a personal capacity and not as members of their party.

The Cabinet formed by M. Pineau was as follows. M. Christian Pineau (Socialist), Prime Minister and Foreign Affairs; M. Yvon Delbos (Radical) and M. Robert Schuman (M.R.P.), Deputy Premiers; M. Edouard Bonnefous (U.D.S.R.), Minister of State in charge of Relations with NATO and the Council of Europe; M. Bourgès-Maunoury (Radical), Interior; M. Robert Lecourt (M.R.P.), National Defence; M. Robert Lacoste (Socialist), Finance and Economic Affairs; M. Albert Gazier (Socialist), Social Affairs (Labour, Health, and Civil Service); Senator Jean Berthoin (Radical), Education; M. André Morice (Radical), Public Works and Transport; M. Maurice Lemaire (Gaullist), Reconstruction; M. Jean-Marie Louvel (M.R.P.), Industry and Commerce; M. René Charpentier (M.R.P.), Agriculture; M. Gaston Defferre (Socialist), Overseas Territories; M. Jean Legaret (U.D.S.R.), War Veterans; M. Joseph Dumas (M.R.P.), Posts and Telegraphs. No appointment was made to the portfolio of Justice. Only two of the new Ministers—M. Charpentier and M. Legaret—had not held office in any previous government.

It was disclosed that General Corniglion-Molinier and M. Pierre Ferri (both Gaullists) had declined the portfolios of National Defence and of Posts and Telegraphs respectively.

M. Pineau presented his Cabinet to the National Assembly on Feb. 18 for a *vote d'investiture*, and outlined the policy which his Government intended to pursue. In the early hours of Feb. 19, however, he failed (by 312 votes to 268) to obtain a vote of confidence, and consequently handed his resignation to President Coty.

In the course of his speech M. Pineau undertook to secure the ratification of the London and Paris agreements (still pending in the Council of the Republic) with "the least possible delay." He also emphasized that his Government would lose no opportunity of promoting negotiations between the Western Powers and the Soviet Union for an international *détente* leading to a general reduction in armaments; that they would seek to supplement the Paris and London agreements by an "arms pool" between the signatory countries, in which British participation was "essential"; and that, without renouncing "European" ideas, they would not try to establish "over-ambitious" political organizations but would seek to make progress by necessary stages, such as the creation of specialized transport or power communities.

M. Pineau outlined his North African policy as follows: (1) In Tunisia, the Government would implement the "Carthage agreement" concluded between M. Mendès-France and the Beylical Government on July 31, 1954 [i.e. the agreement conferring home rule on Tunisia]. (2) In Morocco, the Government would try to create an association with France "based on inter-dependence and reciprocal understanding." (3) In Algeria, social and economic reforms would be accompanied by a policy whereby "native populations would be admitted to the rights that flow from French citizenship."

As regards internal policy, M. Pineau said that his Government's programme would include, *inter alia*, increased investment in agriculture; continued progress in the re-equipment and modernization of French industry generally; the raising of the statutory minimum wage (*salaire minimum*); and action to suppress tax evasions. He announced that he would seek a three-month extension of the special economic powers that had been conferred on M. Mendès-France's Government.

As stated above, M. Pineau failed to obtain a vote of confidence from the Assembly. The 312 adverse votes comprised 98 Communists and *progressistes*, 54 Gaullists, 46 *Paysans* and *Indépendants Paysans*, 44 Independent Republicans, 30 Dissident Gaullists (A.R.S.), 16 Overseas Independents, 12 Radicals, 9 U.D.S.R. deputies, and 3 *non-inscrits*, whilst the 268 votes cast for M. Pineau comprised 105 Socialists, 80 M.R.P., 57 Radicals, 12 U.D.S.R., 7 Gaullists, 1 *Paysan*, 1 Dissident Gaullist and 5 *non-inscrits*. There were 38 abstentions, including 10 Independent Republicans and 9 Gaullists.

Following M. Pineau's defeat in the National Assembly, President Coty called upon M. Edgar Faure (Radical), Foreign Minister during the last fortnight of M. Mendès-France's Government, and formerly Minister of Finance, to form an administration. During the next three days (Feb. 20-23) M. Faure obtained assurances of support from all the political parties except the Socialists, Communists, and Overseas Independents, and, in consequence, formed a Government on Feb. 23 drawn from the Radical, Gaullist, M.R.P., Independent Republican, *Paysan*, U.D.S.R. and Dissident Gaullist parties. [The Socialists informed M. Faure that they could not support any government whose economic policy fell short of the programme that had been outlined to the Assembly by M. Pineau.] The membership of the new Cabinet—the 20th since the liberation—was as follows:

M. Edgar Faure (Radical)	Prime Minister.
M. Gaston Palewski (Gaullist)	Minister attached to the *Présidence du Conseil.*
M. Antoine Pinay (Ind. Republican)	Foreign Affairs
M. Robert Schuman (M.R.P.)	Justice.
General Joseph Koenig (Gaullist)	National Defence and Armed Forces.
M. Maurice Bourgès-Maunoury (Radical)	Interior.
M. Pierre Pflimlin (M.R.P.)	Finance and Economic Affairs.
Senator Jean Berthoin (Radical)	Education.
M. Pierre-Henri Teitgen (M.R.P.)	Overseas Territories (*France d'outre-mer*)
M. Paul Bacon (M.R.P.)	Labour & Social Security.
General Edouard Corniglion-Molinier (Gaullist)	Public Works and Transport.
M. André Morice (Radical)	Industry and Commerce.
M. Jean Sourbet (Ind. *Paysan*)	Agriculture.
Senator Roger Duchet (Ind. Republican)	Reconstruction and Housing.
M. Bernard Lafay (Radical)	Public Health and Population.
M. Raymond Triboulet (Gaullist)	War Veterans.
M. Edouard Bonnefous (U.D.S.R.)	Posts and Telegraphs.
M. Paul Antier (*Paysan*)	Merchant Marine.
M. Pierre July (Dissident Gaullist)	Moroccan and Tunisian Affairs.

M. Faure presented his Cabinet to the National Assembly on the same day (Feb. 23) and was given a *vote d'investiture* by 369 votes to 210, a majority of 159. He outlined his Government's policy in a short speech which is summarized below.

As regards internal policy, M. Faure said that the Government would set itself the following "technical" objectives before June 30, 1956: (1) the raising of the industrial production index from its present level of 153 points (1938 = 100) to 180 points; (2) the raising of the standard of living by at least seven per cent, either through increases in wages or reductions in prices and taxation; (3) a seven per cent rise in the total revenue of agriculture, calculated on the basis of the size of the harvest, prices of agricultural products, and costs of production; (4) equilibrium in the balance of payments without any external aid of a "non-economic" character. In addition, he proposed to prepare before April, 1955, a plan of social reforms which would provide, *inter alia*, for wage increases linked with the rise in the national income. He also pledged his Government to the maintenance of full employment, intensification of the house-construction programme, continued efforts to combat excessive alcoholism, and measures to check tax evasions, in which connexion he announced his intention of presenting a tax reform Bill before the summer.

In the sphere of foreign policy, M. Faure said that the Government would complete the ratification of the London and Paris agreements in the shortest possible space of time. He pointed out that although the agreements involved the limited rearmament of Western Germany, they also brought the German Federal Republic into the community of Western nations—a result which was "worth the sacrifices we make for it." Whilst proceeding with the ratification of the London and Paris agreements, the Government would at the same time seek every opportunity for East-West peace by negotiation. "As soon as the agreements are ratified," M. Faure declared, "I shall propose that a study be undertaken, together with our allies, of the conditions for negotiations both in Europe and Asia." The two bases of the Government's foreign policy—an "assiduous search for peace through every opportunity for negotiation," and the organization of Western security in "irrevocable fidelity" to the Atlantic alliance—could, it was hoped, lead to a general and controlled reduction of armaments.

As regards North Africa, M. Faure said that his Government would strive for the implementation of the "Carthage agreement," and expressed his conviction that Franco-Tunisian agreement could be reached if both sides respected the "fundamental principles" already accepted. In Algeria—which, with Metropolitan France, comprised "a unity which nothing will be able to compromise"—the Government would carry out political, economic and social reforms, whilst maintaining the existing status.

The 369 votes cast for M. Faure on the *vote d'investiture* comprised 76 M.R.P., 67 Radicals, 59 Gaullists, 53 Independent Republicans, 48 *Paysans* and *Indépendants Paysans*, 29 Dissident Gaullists, 17 U.D.S.R., 16 Overseas Independents, and 4 *non-inscrits*. The 210

opposing votes comprised 105 Socialists, 98 Communists and *progressistes*, six *non-inscrits*, and one U.D.S.R. deputy There were 37 abstentions, including 9 Gaullists, 8 Radicals (among them M Mendes-France, a member of the same party as M. Faure), 6 M.R P. and 5 U D.S R. deputies.

M. Edgar Faure (46), a financial and economic expert, had previously held the Premiership for a short period from Jan. 18 to Feb. 28, 1952. In June, 1953, he became Minister of Finance under M. Laniel (for whom he prepared an 18-month plan of French economic expansion—the "Faure plan"), and continued to hold that office under M. Mendès-France until his appointment as Foreign Minister a fortnight before the fall of the late Government. A deputy for the Jura *département*, he is one of the youngest men to hold the office of Prime Minister. [A biography of M. Faure is given on page 12014, col. one.]

With the exception of M. Gaston Palewski, M. Triboulet, M. July, M. Sourbet and M. Lafay, all the other Ministers had previously held Cabinet office. M Schuman (architect of the "Schuman Plan," and formerly Foreign Minister), M. Pinay, and M. Pflimlin, however, had not been members of any Government since 1952, and M. Antier since 1951. Short biographies of Ministers entering the Cabinet for the first time are given below:

M. Gaston Palewski (54), a founder-member of the Gaullist Party (R.P.F.) and one of the closest associates of General de Gaulle, commanded a night-bomber squadron during the 1939-40 campaign, escaped to London and joined General de Gaulle after the Bordeaux armistice, and subsequently commanded the Free French Forces in East Africa (1941-42). Thereafter he served as *Directeur du Cabinet* to General de Gaulle in London, Algiers, and (after the liberation) Paris, until January 1946. He is a deputy for the Seine *département* and a Vice-President of the National Assembly. It was reported in the French Press that his duties as Minister attached to the *Présidence du Conseil* would include responsibility for matters relating to atomic energy.

M. Raymond Triboulet (48), a farmer, and Editor-in-Chief of *La Presse Paysanne*, spent ten months as a prisoner-of-war in Germany, took an active part in the Resistance movement after his release, and was secretary of the *comite de libération* in the Calvados *département*. He served as a regional inspector in the Rhineland-Palatinate (French Zone of Germany) before entering the National Assembly in 1946 as a deputy for Calvados.

M. Pierre July (48), a lawyer, served with distinction in the French Forces of the Interior (F.F I.) during the German occupation He was captured by the Gestapo, tortured, and deported to the Buchenwald concentration camp, but managed to escape before his arrival there. Entering the National Assembly after the war, he has been a member successively of the P.R.L. (right-wing conservative) party, the R P.F., and the Dissident Gaullists (A.R.S.). He is president of the Assembly's Commission for Overseas Territories, and served as a State Secretary in the Laniel Cabinet.

M Jean Sourbet (54), a wine-grower, is a deputy for Gironde, president of the *Indépendants Paysans* group in the Assembly, and chairman of the Assembly's *Commission des Boissons* (Drinks Commission). He was a State Secretary in the Faure Cabinet of 1952

M. Bernard Lafay (49), a doctor of medicine, is president of the Paris Municipal Council (Mayor of Paris). He played a distinguished part in the Resistance movement, particularly in the organization of medical services, and had been a member of the Council of the Republic since 1946 before his election to the National Assembly in 1951. He has done notable work for child health and welfare, particularly in the care of children suffering from infantile paralysis and tuberculosis. He held State Secretaryships in the first Faure Cabinet and also under M. Laniel

Of the 19 Ministers in the new Government, eight voted for the ratification of the London and Paris agreements during the National Assembly's debate (MM. Faure, Bourgès-Maunoury, Pflimlin, Morice, Lafay, Triboulet, Bonnefous, and General Corniglion-Molinier); four voted against the agreements (MM. Palewski, Teitgen, Bacon, and Antier); and five abstained (MM. Pinay, Schuman, Sourbet, July, and General Koenig). Senators Berthoin and Duchet, as members of the Council of the Republic, had not yet had an opportunity of voting on the agreements.

M. Faure appointed seven Secretaries of State in his new Government—M. Jean Médicin (Radical) and M. Léopold Senghor (Overseas Independent), State Secretaries to the *Présidence du Conseil*; M. Henri Laforest (Radical), Relations with the Associated States; M. Jean Crouzier (Ind. Republican), National Defence and Armed Forces; M. Gilbert Jules (Radical), Finance and Budget; M. Pierre Abelin (M.R.P.), Economic Affairs; M. Maurice Bayrou (Gaullist), *France d'outre-mer*. M. Médicin (Mayor of Nice) was placed in charge of relations between the *Présidence du Conseil* and Parliament, whilst M. Senghor (a Senegalese) was given responsibility for questions relating to economic research. The former Ministry for Relations with the Associated States of Indo-China was replaced by a State Secretaryship under M. Laforest, a lawyer with a distinguished war record.

M. Faure's Government, with 19 Ministers and seven State Secretaries, was the smallest since 1947. At the time of its fall the Mendès-France Government had 20 Ministers and 17 State Secretaries.—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 14008 A.)**

A. UNITED KINGDOM - NEW ZEALAND.—Wairakei Heavy Water Project. - Formation of Joint U.K.-N.Z. Company (Geothermal Development Ltd.).

The U.K. Atomic Energy Authority announced on Feb. 21 that a new company—Geothermal Development Ltd.—had been incorporated to undertake the construction of a factory and the subsequent production of heavy water and electric power from geothermal steam in the Wairakei district of New Zealand. The company would have a capital of £30,000, of which the N.Z. Government and the Authority (who would be the sole shareholders) would pay £20,000 and £10,000 respectively. The remainder of the company's capital requirements would be met by loans; those for the heavy water plant (estimated at £2,000,000) would come from the Authority and those for the electric power equipment (estimated at £4,000,000) from the N.Z. Government.

It was stated that the company's board of directors would comprise three representatives of the N.Z. Government and two from the U.K. Atomic Energy Authority. The first directors would be . For the Authority . Sir Donald Perrott (member for finance and administration) and Mr. A. S. White (head of the chemical engineering division at the Atomic Energy Research Establishment, Harwell) For the N.Z Government: Mr. B. C. Ashwin (Secretary of the Treasury) (chairman), Mr. A. E Davenport (general manager, State Hydro-Electric Department), and Mr. C. W. C. Turner (Engineer-in-Chief, Ministry of Works) The announcement added that Dr E. Marsden, a former head of the N.Z. Department of Scientific and Industrial Research, would be associated with the Board

The announcement said that it was envisaged that production of heavy water would begin late in 1957, and of electric power a few months later. The initial plant would produce electric power at a rate of about 40,000 kw. and a "useful" tonnage of heavy water for nuclear power reactors.—(Times - Financial Times - Directorate of Information, Wellington) **(13724 B.)**

Note. The Scientific Correspondent of the *Financial Times* explained on Feb. 22 that heavy water was an important "moderator" material which could be used in place of graphite in atomic reactors, and recalled that an experimental heavy water reactor, "Dimple," had been working at Harwell since August 1954 (see 13729 D) Although heavy water reactors could be smaller than graphite-moderated ones, were cheaper to build, and were in many ways more efficient, the high cost of heavy water (about £75,000 a ton) had hitherto been a drawback to their use However, as the Wairakei plant would produce heavy water at about £48,000 a ton, it was thought that it might be able to produce atomic power more cheaply. (Financial Times)

B. UNITED NATIONS. — New Soviet Representative on Security Council.

It was announced in Moscow on March 3 that M. Arkady Sobolev had been appointed Soviet permanent representative on the U.N. Security Council in place of the late M. Vyshinsky. M. Sobolev had held the posts of secretary-general in the Soviet Foreign Ministry, political adviser to the Soviet C.-in-C. in Germany, and Ambassador in Warsaw, and had been Assistant Secretary-General for Security Council Affairs at the United Nations from 1946-49. He had been acting Soviet representative on the Security Council since M. Vyshinsky's death in November. (United Nations Review, New York) **(Prev. rep. 13963 A.)**

C. NORTH KOREA. — Proposed Resumption of Relations with Japan.

Pyongyang radio announced on Feb. 25 that General Nam Il, the Premier and Foreign Minister of North Korea, had proposed to the new Japanese Prime Minister (Mr. Hatoyama) that negotiations should be opened with a view to establishing friendly relations between their two countries. The North Korean offer followed the recent statements by Mr. Hatoyama and M. Molotov expressing the desire for normal relations between Japan and the Soviet Union.—(Le Monde, Paris) **(Prev. rep. 14005 A.)**

D. UNITED STATES. — Steel Production.

U.S. steel production in 1954 totalled 88,311,652 tons, compared with the record figure of 111,609,719 tons in 1953. The country's steel capacity was estimated at 124,330,410 tons at the beginning of 1954, and over the year as a whole steel plants operated at 71 per cent of theoretical capacity. (New York Times) **(Prev. rep. 13444 D.)**

E. UNITED KINGDOM. — Civil Service.

A White Paper published on Feb. 25 showed that the number of non-industrial Civil Servants at Dec. 31, 1954, totalled 633,380, as compared with 668,536 on Jan. 1, 1953—a decline of over 35,000 in the past two years.—(Times) **(12935 B.)**

A. FINLAND. — Political Developments, 1951-54. - Cabinet Crises. - General Elections.

Political developments in Finland during the past four years, summarized below under cross-headings, were characterized by a series of recurrent Cabinet crises, due primarily to differences between the political parties on questions of economic policy and, in particular, on measures to check the continual rise in the cost of living. Two general elections were held during this period (in 1951 and 1954) and a succession of Cabinets formed by Dr. Kekkonen, Dr. Tuomioja, M. Torngren, and again by Dr. Kekkonen in October, 1954, as described below:

The General Elections of 1951. The three-party Cabinet formed in March 1950 by Dr Urho Kekkonen (see 10790 C) encountered serious difficulties towards the end of that year as a result of widespread dissatisfaction with the continued rise in the cost of living Drastic increases in the cost of food, clothing, and fuel led to demands for higher wages by many industrial unions, to a series of widespread strikes in the metallurgical and timber industries during the autumn of 1950, and to a threat of a general strike, which was only averted after the Government had agreed to wage increases in the two industries mentioned. In November, 1950, Dr. Kekkonen invited all parties to join a national coalition and, after prolonged negotiations, the Social Democrats agreed to enter his Cabinet (hitherto a coalition of the Agrarian Party, the Swedish People's Party, and the Liberals) On Jan. 17, 1951, the Kekkonen Government was accordingly remodelled to include seven Agrarians, seven Social Democrats, two Swedish People's Party representatives, and one Liberal, but on March 20 the Social Democratic Party withdrew from the Cabinet in protest against a proposed 43 per cent increase in the rents of certain types of houses President Paasikivi subsequently dissolved the Finnish Diet and ordered general elections for July 2-3, 1951 The results of these elections were as follows, comparison being given with the former (1948) elections:

	Votes	Percentage		Seats	
	1951	1951	1948	1951	1948
Social Democrats	479,998	26.4	26.3	53	54
Agrarians	425,747	23.4	24.2	51	56
Popular Democrats (Communists)	390,647	21 4	20 0	43	38
Conservatives	265,188	14.5	17.1	28	33
Swedish People's Party	137,151	7 5	7.7	15	14
Finnish People's Party (Liberals)	102,894	5.6	3.9	10	5

The principal features of the elections, as compared with those of 1948, were (*a*) the replacement of the Agrarians by the Social Democrats as the largest party in the Diet (a unicameral chamber of 200 members); (*b*) the gains made by the Popular Democrats (Communists and pro-Communists) and the Finnish People's Party, the latter being a new organization based on the amalgamation of the Liberal Party and certain Right-wing groups; and (*c*) the setback to the Agrarian and Conservative parties, both of which lost votes to the Social Democrats, the Popular Democrats, and the Finnish People's Party

The Kekkonen Cabinet of 1951. Following the elections, Dr Kekkonen formed a new Cabinet on Sept. 20, 1951, based on a coalition between the Agrarians, the Social Democrats, and the Swedish People's Party, and including one non-party member Its membership was Dr. Urho Kekkonen (Agrarian), Prime Minister, Dr. Sakari Tuomioja (non-party), Foreign Affairs, Professor Vaino Sukselainen (Agrarian), Interior, M Sven Högstrom (Swedish People's Party), Justice; M Emil Skog (Social Democrat), Defence, M. Penna Tervo (Social Democrat), Trade and Industry; M. Vilio Rantala (Social Democrat), Finance, M. Miikki (Agrarian), Deputy Minister of Finance, M Reino Oittinen (Social Democrat), Education; M Ralf Torngren (Swedish People's Party), Social Welfare, M. Emil Huunonen (Social Democrat) and M Lauri Murtomaa (Agrarian), Deputy Ministers of Social Welfare, M Martti Miettunen (Agrarian), Agriculture; M. Martti Lepisto (Social Democrat) and M Emil Luukka (Agrarian), Deputy Ministers of Agriculture; M Onni Peltonen (Social Democrat), Transport and Public Works; M Kleemola (Agrarian), Deputy Minister of Transport and Public Works The three parties represented in the Cabinet had 119 members in the new Diet, out of a total of 200

Cabinet Crises in 1952. Following differences with his own party (the Agrarians) on questions relating to economic stabilization—and, in particular, on the Cabinet's decision to reduce the price of butter, which was opposed by the Agrarians—Dr Kekkonen tendered his resignation to President Paasikivi on March 21, 1952, but subsequently agreed to withdraw it and to remain in office On Oct. 16 Dr. Kekkonen again announced his resignation after differences between the Agrarians and the Social Democrats, but was once more persuaded to withdraw it and to continue in office. [The dispute in the Cabinet had arisen after the Social Democrats had announced that they would only agree to a general increase in rents on condition that the Agrarians co-operated in measures to stabilize agricultural prices. An agreement to this effect was reached after Dr Kekkonen had withdrawn his intended resignation.]

Two Social Democratic members of the Cabinet—M Peltonen (Minister of Transport and Public Works) and M. Lepisto (Deputy Minister of Agriculture)—resigned on Nov. 28, 1952, after allegations by the Attorney-General that they had misappropriated public funds for the benefit of a private concern. They were succeeded respectively by M Karjalainen and M. Tiainen, both Social Democrats.

Social Democrats leave Government Coalition. - Resignation of Dr. Kekkonen after Cabinet Reshuffle. Growing differences between the Agrarians and the Social Democrats on economic policy led on June 27, 1953, to the resignation of Dr. Kekkonen A fortnight earlier Dr. Kekkonen had told the Social Democrats that the economic situation was so serious that it could be solved "not by political compromises but only by recognition of economic facts, however unpleasant." Among the measures he proposed to take was an all-round 10 per cent reduction in wage-rates, which, however, was strongly opposed by the Social Democrats on the ground that prices should be cut before wages Differences were also reported on the question of possible devaluation of the currency, which had been recommended in certain circles but on which no action was taken. [It was pointed out by foreign press correspondents in Helsinki that, after a period of exceptionally favourable trade terms for timber and wood-pulp products (commodities which dominate Finnish exports), both prices and demand from abroad had fallen to an extent which threatened Finland with serious unemployment and with inability to pay for her exports]

After M August Fagerholm (the Social Democratic leader, and Prime Minister before Dr Kekkonen took office in 1950) had declined an invitation by President Paasikivi to form a new Government, Dr. Kekkonen succeeded on July 9 in forming an administration (his fourth since 1950) based on the Agrarian and Swedish People's parties, together with three non-party members As compared with the former Cabinet, Hr. Ralf Torngren (leader of the Swedish People's Party) took over the Foreign Ministry from Dr Tuomioja; M. Kleemola (formerly Deputy Minister of Transport) became Minister of Defence, M. Teuvo Aura (a non-party expert) became Minister of Trade; M Juho Niukkanen (Agrarian) became Minister of Finance, with Dr Nils Meinander (Swedish People's Party) as Deputy Minister, M Johannes Virolainen became Minister of Education, M Lauri Hietanen (head of the *Sok* co-operative movement, and a non-party member) succeeded M. Torngren as Minister for Social Welfare; Mme. Vieno Simonen (Agrarian), the only woman member of the Cabinet, became Deputy Minister for Social Welfare, and M Eero Makinen (a non-party expert and industrialist) became Minister of Transport and Public Works, with M Kosti Eskola as Deputy Minister The other non-Socialist members of the former Government retained their existing portfolios

The new Cabinet—a minority administration dependent for support upon the Opposition parties—fell on Nov. 4, 1953, on which date Dr. Kekkonen tendered his resignation after the Opposition had moved a motion of no-confidence in the Government's housing policy

The Tuomioja Cabinet of 1953. At the request of President Paasikivi, Dr. Sakari Tuomioja (Governor of the Bank of Finland, and non-party Foreign Minister in Dr. Kekkonen's earlier Cabinets) agreed to try and form a coalition government on as broad a basis as possible. After inter-party negotiations, he succeeded on Nov 16, 1953, in forming a Ministry representing all the parties except the Social Democrats and Popular Democrats. It was agreed, however, that the new administration would be merely of a "caretaker" character, and that its members would serve in an individual capacity and not as representatives of the political parties to which they belonged

The membership of the new Cabinet was Dr Sakari Tuomioja (non-party), Prime Minister, M Ralf Torngren (Swedish People's Party), Foreign Affairs, M. Heikki Kannisto (Finnish People's Party), Interior, M Reino Kuuskoski (Finnish People's Party), Justice; M Olli Hetemäki (Conservative), Defence, Dr Tuure Junnila (Agrarian), Finance, Pastor Arvo Salminen (Conservative), Education; Dr Kalle Jutila (Swedish People's Party), Agriculture, M Henrik Kullberg (Swedish People's Party), Deputy Minister of Agriculture Hr Erik Serlachius (Swedish People's Party), Communications; Hr. Aulis Juuttila (non-party), Deputy Minister of Communications, M. Teuvo Aura (non-party), Trade and Industry, Professor Esa Kaitila (Conservative), Social Affairs; Mme Irma Helena Karvikko (Finnish People's Party), Deputy Minister of Social Affairs.

The General Elections of 1954. The new Government, however, failed to resolve the differences between the parties on matters of economic policy, with the result that President Paasikivi dissolved the Diet on Dec. 8, 1953, in preparation for new general elections. These took place on March 7-8, 1954, with the following result

	Votes	Seats
Social Democrats	511,043	54
Agrarians	470,063	53
Popular Democrats	417,276	43
Conservatives	239,412	24
Finnish People's Party	148,438	13
Swedish People's Party	132,088	13

As compared with the 1951 elections, the biggest gains were made by the Finnish People's Party (which won three additional seats and increased its poll by 53,000) and the Agrarians (two seats gained, 44,000 more votes) The Social Democrats gained a seat and polled 30,000 more votes than in 1951, whilst the representation of the Popular Democrats (who increased their poll by 29,000) remained unchanged The Conservatives suffered a further setback by losing four seats and dropping 25,000 votes, whilst the Swedish People's Party lost two seats and polled 5,000 votes fewer than in 1951. Out of some 2,500,000 registered voters, 1,993,128 went to the polls (77 per cent, compared with 75 per cent in 1951).

The Torngren Cabinet of 1954. After the Social Democrats had declined President Paasikivi's invitation to form a new Government, and had refused to enter into a coalition under Dr. Kekkonen, the leader of the Swedish People's Party (Hr. Torngren) succeeded on

May 5, 1954, after a five-week political crisis, in forming an administration representing all parties except the Finnish People's Party and the Popular Democrats. Its membership was: Hr Ralf Törngren (Swedish People's Party), Prime Minister; Dr. Urho Kekkonen (Agrarian), Foreign Minister; M. Vaino Leskinen (Social Democrat), Interior; M. Yrjo Pukakka (Conservative), Justice; M. Johannes Sukselainen (Agrarian), Finance; M. Emil Skog (Social Democrat) Defence; M. Martti Miettunen (Agrarian), Communications; M. Toimi Suniu (Social Democrat), Deputy Minister of Communications; M. Viljani Kalliokoski (Agrarian), Agriculture; M. Hannes Tiainen (Social Democrat), Deputy Minister of Agriculture; M. Penna Tervo (Social Democrat), Trade and Industry; M. Johannes Virolainen (Agrarian), Education; Mme. Tynne Leivo-Larson (Social Democrat), Social Affairs; Mme. Vieno Simonen (Agrarian), Deputy Minister of Social Affairs.

The Kekkonen Cabinet of 1954. The Törngren Cabinet resigned on Oct. 14, 1954, after the Agrarian and Social Democratic Ministers had split over the Government's proposals to reduce the cost of living, which had risen by 4 per cent since 1951. Whereas M. Torngren had proposed cheaper food by State subsidies, together with purchase tax reductions on a number of consumer goods, the Agrarians wanted higher prices for farm products than the subsidies would cover, whilst the Social Democrats insisted on lower food prices and the complete removal of purchase tax on a number of goods. On Oct. 17 the Finnish Trade Union Federation warned the Government that it would call a general strike for Nov. 1 unless the cost of living was brought down to the level of 1951, when stabilization of wages and prices had started. The Federation emphasized that prices had risen by four per cent during the three-year period whilst wages had remained unaltered, and that its claim for a general increase in wage-rates was therefore fully justified.

On Oct. 19, however, the Agrarian and Social Democratic parties reached agreement on a joint plan to reduce the cost of living, the principal features of which were: (1) a reduction in the prices of milk, butter, sugar, cereals, and sausage products by State subsidies; (2) reductions in the purchase tax on food, clothing and textiles, (3) an increase in subsidies to farmers (equivalent to £4,500,000); (4) the adoption of a new system for linking wages with the cost-of-living index, as recommended by the Finnish T.U Federation; (5) a reduction in the bank rate from 6 to 5 per cent, together with a 1½ per cent reduction in interest rates for housing loans. It was estimated that these measures would reduce the cost of living from 104 points to 98, in terms of 1951 = 100.

Following this agreement, Dr. Kekkonen formed a new Cabinet on Oct. 20 based on a coalition of the Agrarians and Social Democrats, the two largest parties. Its members were: Dr Urho Kekkonen, (Agrarian), Prime Minister; M Johannes Virolainen (Agrarian), Foreign Affairs: M. Vaino Leskinen (Social Democrat), Interior; M. Penna Tervo (Social Democrat). Finance; M. Veikko Vennamo (Agrarian), Deputy Minister of Finance; M. Emil Skog (Social Democrat), Defence; Mme. Kaerttu Saalasti (Agrarian), Education; M. Viljani Kalliokoski (Agrarian), Agriculture; M. Martti Miettunen (Agrarian), Communications; M. Hannes Tiainen (Social Democrat), Deputy Minister of Communications: M Aare Simonen (Social Democrat), Trade and *ad interim* Justice; M. Onni Peltonen (Social Democrat), Social Affairs: Mme. Tynne Leivo-Larson (Social Democrat), Deputy Minister of Social Affairs.

Dr. Kekkonen announced his resignation on Dec. 17, 1954, after the Finnish Diet had refused to approve a Bill conferring special powers on the Government to prolong State control. [The Government had received 140 votes out of 191, but needed a five-sixths majority for the adoption of such legislation.] After Dr. Tuomioja had declined an invitation from President Paasikivi to form a new administration, Dr. Kekkonen agreed on Dec. 19 to withdraw his resignation, and announced that the Government would draw up a modified Special Powers Bill which would be submitted to the Opposition parties before it was presented in the Diet.

Dr. Sakari Tuomioja, the former Prime Minister, was appointed Ambassador to the United Kingdom in November, and arrived in London on Feb. 28, 1955, to take up his post. His predecessor, M. Ossian Soravuo, had been appointed Ambassador in Warsaw. Dr. Tuomioja is Finnish representative on the International Monetary Fund and, as stated above, had been Governor of the Bank of Finland for several years. (Berlingske Tidende, Copenhagen - Politiken, Copenhagen - Svenska Dagbladet, Stockholm - Times - Manchester Guardian - New York Times - Le Monde, Paris) **(Prev. rep. 10790 C.)**

A. UNITED STATES. — Senator Wayne Morse joins Democratic Party.

Senator Wayne Morse (Oregon), who resigned from the Republican party in October, 1952, and had since then sat as an Independent, officially registered as a Democrat on Feb. 18. As an Independent he had voted with the Democrats on all major issues; as the Democrats had only one more seat in the Senate than the Republicans after the 1954 mid-term elections, his vote had been decisive in giving the Democrats a majority and enabling them to take over the chairmanships of the Senate committees. As a result of Senator Morse's formal adherence to the Democrats, party representation in the Senate will be: Democrats 49, Republicans, 47.
(New York Times) **(Prev. rep. 13797 A, p. 13982; 12526 B.)**

B. ANTHROPOLOGY. — The "Piltdown Hoax."

It was established during 1953 and 1954 that the "Piltdown skull," hitherto believed to be one of the most important anthropological specimen in existence, was in fact a forgery. The skull, originally discovered in a gravel pit at Piltdown (Sussex), had for the past 40 years been in the Natural History Museum in London.

The "Piltdown skull" was discovered in 1912 by Mr. Charles Dawson, a Hastings solicitor and an amateur antiquarian. Mr. Dawson had expressed the belief that the gravel pits in the Piltdown area (about seven miles from Lewes) were likely sites for fossil remains dating from the Pleistocene period, and had asked workmen engaged on the site to keep a look-out for such fossils during their excavations. In February, 1912, the workmen dug up fragments of a very thick human skull (as it was then thought to be) and handed them to Mr. Dawson who in turn, took them to Sir Arthur Smith Woodward, then Keeper of Geology at the Natural History Museum, and an authority of international reputation. Sir Arthur Woodward, who was greatly interested in the discovery, joined Mr. Dawson in a further examination of the Piltdown site, during which Mr Dawson dug up a fragment of a (presumed) human jawbone. In 1913 a distinguished French scholar, Father Teilhard de Chardin, also examined the Piltdown site and found a canine tooth (eye-tooth) which was thought to belong to the jawbone. Various other fragments, among them a bone implement, were also found on the site and in its immediate neighbourhood. The skull, jawbone and teeth were believed by eminent anthropologists to belong to a single individual, and were estimated at about 500,000 years old—i.e., dating from the Lower Pleistocene period. For many years the Piltdown fragments had been regarded as among the most important finds ever made in the field of anthropological research, since they were supposed to belong to one of the earliest types of primitive man—a being to which the name of "Piltdown Man" or *Eoanthropus* was given. Mr. Dawson, the discoverer of the so-called "Piltdown Man," died in 1916.

The announcement that the Piltdown remains were a forgery was first made on Nov. 20, 1953, by Professor W. E. Le Gros Clark (Professor of Anatomy at Oxford), Dr. K. P. Oakley (of the Natural History Museum) and Dr. J. S. Weiner (of Oxford University), writing in the *Bulletin* of the British Museum (Natural History).

The scientists explained that the various fragments of the Piltdown skull had been submitted in 1949 to fluorine tests to ascertain their age, with the following results: (1) whereas the skull itself was about 50,000 years old (not 500,000 years, as had originally been supposed), the fragments of teeth which were thought to belong to it—a large piece of mandible and the canine tooth—were "actually those of a modern ape (chimpanzee or orang-utan) deliberately faked to simulate fossil specimens"; (2) it had been established that the jawbone had been stained with bichromate of potash and iron, a fact explicable only by "the deliberate matching of the jaw of a modern ape with the mineralized cranial fragments"; (3) the molar teeth of the mandible, and also the isolated canine tooth, were found to have been artificially pared down. It was therefore evident that the jawbone and teeth—which, as stated, belonged to a modern ape, and therefore to an animal not represented in contemporary England—could only have been brought to Piltdown through some recent agency. In addition to the fluorine test, entirely independent tests of nitrogenous content had been made on the fragments, with identical results.

The writers added: "From the evidence which we have obtained it is clear that the distinguished palaeontologists and archaeologists who took part in the excavations at Piltdown were victims of a most elaborate and carefully prepared hoax. Let it be said, however, in exoneration of those who assumed the Piltdown fragments to belong to a single individual . . . that the faking of the mandible and canine is so extraordinarily skilful, and the perpetration of the hoax appears to have been so entirely unscrupulous and inexplicable, as to find no parallel in the history of palaeontological discovery."

On June 30, 1954, it was announced that the finds made at Piltdown in 1912 were even more fraudulent than had been believed at the time of the previous announcement in November, 1953. This announcement was made by the Director of the Natural History Museum—Professor G. R. (now Sir Gavin) de Beer—and other eminent scientists at a meeting of the Geological Society.

It was stated at this meeting that the main points resulting from investigations by a number of scientists were as follows: (1) the Piltdown jaw was almost certainly that of an immature orang-utan, as shown by anatomical evidence produced by Professor Le Gros Clark and Dr. Weiner; (2) the cranium had been artificially stained to match the surrounding gravel, as shown by X-ray analysis carried out by Dr. G F. Claringbull and Dr. M. H. Hey, of the Natural History Museum; (3) the canine or eye-tooth had been coloured with oil paint, as established by experts on the staff of the National Gallery: (4) the bone implement found at the Piltdown site was found to have been cut with a steel knife, as established by Dr. Oakley. The inference, therefore, was that the whole of the remains at Piltdown had been "planted."

The above-mentioned findings were set out by Sir Gavin de Beer and Dr. Weiner in the *Bulletin* of the British Museum (Natural History) published in January 1955. Dr. Weiner wrote that "exhaustive re-examination of all the Piltdown finds has completely confirmed the hypothesis of a hoax," whilst Sir Gavin de Beer said that it had been established that "not one of the Piltdown finds genuinely came from Piltdown."
(Times - Manchester Guardian)

A. UNITED KINGDOM. — Four-Year Roads Programme. - New Motor Roads. - Proposed Road Tunnel under Firth of Forth.

The Minister of Transport and Civil Aviation (Mr. Boyd-Carpenter) announced in the House of Commons on Feb. 2 that, "as a first instalment of an expanded road programme," the Government proposed to authorize an ultimate Exchequer expenditure of £147,000,000 on the roads during the next four years. In addition, they intended to begin work during the same period on "certain major projects of formidable cost," including motor roads from London to Yorkshire and from Preston through Lancashire to Birmingham, and a crossing of the Firth of Forth either by a road bridge or by a new method involving the laying of a tube tunnel on the bed of the Forth. To enable these projects to be proceeded with rapidly, the Government were considering charging tolls in suitable instances.

Mr. Boyd-Carpenter explained that it was intended to continue with "a substantial programme of road construction and improvement until the roads of this country are adequate for the traffic they have to bear." As there had been few major improvements and little new construction in the road system since 1939, the problem was now "immense" and the Government's plans would take many years to complete, but they were determined to provide an up-to-date road system. The plans included (*a*) entirely new motor roads of the most modern construction; (*b*) an ordered series of major and minor works on existing roads intended to convert them into modern all-purpose highways. Owing to statutory requirements, however, a considerable period must elapse before the line of the new roads could be determined and the necessary land acquired For this reason the work to be done in the early years of the programme must be mainly on the improvement of existing routes, and priority would be given to items which the Government considered to be of the greatest urgency for relieving congestion of traffic—particularly industrial traffic—and for promoting road safety In selecting these, regard had necessarily been paid to such essential preliminary considerations as the state of preparedness of schemes and the availability of the land.

Points from the Minister's statement are summarized under cross-headings below.

Financial Expenditure.

The work to be authorized in the financial year 1955-56 would represent an ultimate expenditure from the Exchequer of about £27,000,000, and the total to be authorized in the following three years would involve an ultimate expenditure of about £120,000,000 This amount, however, would not include "expenditure on the very large projects of national importance," and there would also be substantial complementary expenditure by local highway authorities on classified road schemes.

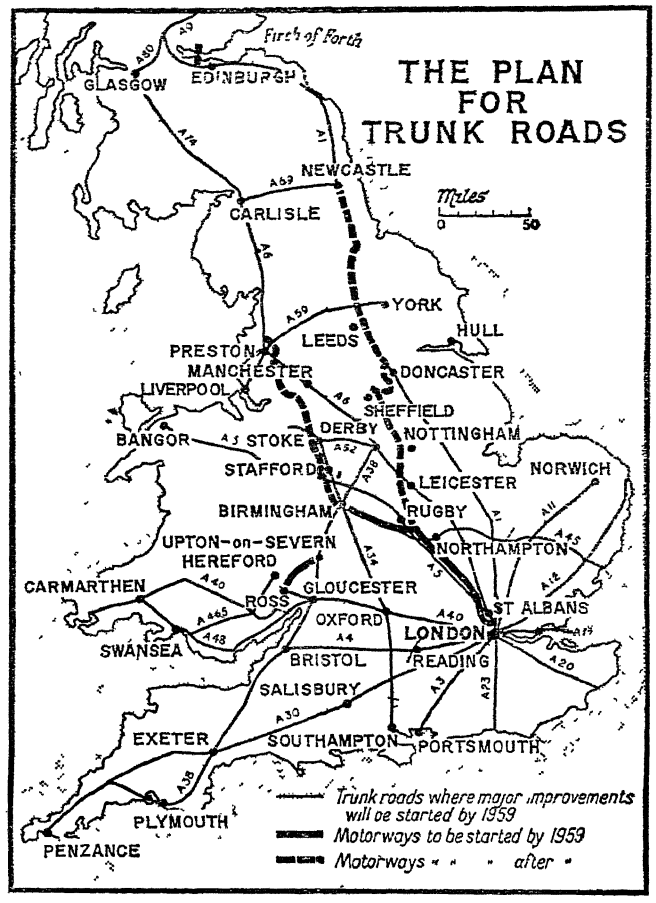
Mr. Boyd-Carpenter explained that it was not possible to forecast the precise scale of the programme after 1958-59, because this was dependent on the resources available and the financial conditions of the time.

Major Projects.

(1) **London - Yorkshire Motor Road.** The first major project, intended to be begun between 1956 and 1958, would be the initial section of this road which would be confined to motor traffic under the powers contained in the Special Roads Act It would have two carriageways, access to which would be severely restricted, and fly-overs or under-passes at all important junctions. This section, 70 miles long, would extend from St. Albans to a point near Rugby, with a connecting spur to the existing A 45 trunk-road to Birmingham (which would itself be given dual carriageways and by-passes), thus linking London with the Birmingham industrial area Later it would be extended to a point near Doncaster, and when completed would be about 150 miles long and take much of the heavy traffic now using the A 5 and A 45 trunkroads between London and Birmingham and the Great North Road (A 1). The scheme also involved the construction of by-passes at Doncaster and St. Albans The cost of the first section of this road was put at £15,000,000, and the total cost at £45,000,000.

(2) **Preston - Birmingham Motor Road.** This road, about 80 miles in length and estimated to cost about £20,000,000, would be put in hand after the first section of the London - Yorkshire motor road had been begun. It would cross Lancashire in a roughly north-south direction and pass to the west of Stoke and Stafford (avoiding the latter by a by-pass). Since the road would pass through a heavily industrialized area, connexions with the existing highway system would be more frequent than on the London - Yorkshire motor road

(3) **Firth of Forth Crossing.** With regard to this project, the Minister explained that "a scheme for the construction of a tube on the bed of the Firth of Forth as a less expensive alternative to a bridge" had recently been submitted to the Secretary for Scotland by "consultants of the highest standing," acting on their own initiative. The scheme, if decided upon, would be the first of its kind, and had been referred to the local authorities concerned; the Government would be prepared to discuss with them methods of assessing the relative merits of the proposed subway and of a conventional bridge. If the subway plan were adopted, the tunnel could be made available for traffic about three years after the start of construction, the cost being put at £5,500,000 (compared with £15,000,000 for a bridge). It was estimated that the subway would require 40,000 tons less steel than a high-level bridge, and it was also claimed that it would preserve the "beauty and dignity of the existing Forth railway bridge" by avoiding the need for a road bridge alongside. Moreover, it would be available for traffic at times when heavy gales might make it necessary to prohibit the passage of vehicles across a high-level road bridge.



(*Economist*)

Mr. Boyd-Carpenter added that if the subway alternative were adopted it would be constructed beneath the Forth between North and South Queensferry, on a line just upstream of the Forth railway bridge. The subway would comprise, within the body of a single structure, two roadways each 22 ft. wide, thus providing two lanes of traffic in each direction It would extend under water for a little over two-thirds of a mile, with its roof 50 ft below lowest tide level, thus permitting the largest ships to pass overhead at all states of the tide.

(4) **The Ross Spur Road.** Another major project under the programme was a 21-mile spur road to be built from Ross-on-Wye (Herefordshire) to a junction with the A 38 trunk road near Upton-on-Severn, in order to improve communications between the Midlands and South Wales.

Other Schemes.

The programme for the first four years would include many other by-passes, bridges, and road improvements, several of them costing over £500,000 each The most important schemes announced were:

(1) Schemes (each costing over £100,000) to be authorized in 1955-56, as follows.

Great North Road (A 1)—Second carriageways for certain stretches, a by-pass at Allerton Station, and the widening of the Stamford - Kesteven section.

Elephant and Castle (London)—Construction of a roundabout.

Albert Bridge, Chelsea (London)—This bridge, now in poor condition and restricted to loads of five tons, would be widened to provide a four-lane carriageway

Western Avenue (London)—A second carriageway between Park Royal Station and Greenford Halt.

Dartford - Purfleet Tunnel—This tunnel under the Thames—linking Kent and Essex—would be completed so as to provide two traffic lanes, with the necessary approach roads. The cost would be over £500,000 and passage through the tunnel would be subject to a toll.

Oxford Boundary - Islip Turn—This road, which had one of the worst accident-rates in Oxfordshire and was carrying 70 per cent more traffic than in 1938, would be reconstructed with a dual 22 ft. carriageway along a two-mile length.

Handcross By-pass, East Sussex—The pre-war scheme to by-pass the village of Handcross (where the London - Brighton road meets three other roads), suspended during the war, would now be completed.

(2) Schemes (each costing over £500,000) to be authorized between 1956-57 and 1958-59. Such schemes in England and Wales would include:

Great North Road (A 1)—Construction of by-passes at Grantham and Doncaster.

Kingston By-pass (Surrey)—Provision of a second carriageway from Robin Hood Gate to Burlington Road, with cycle tracks

Maidenhead By-pass—This by-pass (five to six miles long) would be built to motor-road standards, with dual 22 ft carriageways.

Maidstone (Kent) By-pass—This road, about 10 miles long, would by-pass Ditton and Maidstone to the north, and would also be constructed to motor-road standards with 22 ft carriageways.

Preston (Lancs.)—An 8-mile road with dual carriageways would be built, and would eventually become part of a motor road from Birmingham to Shap, Westmorland

(3) Other London Area schemes intended to be authorized within the four-year period would include the following:

Angel Road, Edmonton (part of the London North Circular Road)—A new railway bridge 84 ft wide with dual carriageways

Tilbury Docks Approach Road—A new road, 2½ miles long, necessitated by the development of Tilbury Docks.

Notting Hill Gate—The road between Kensington Palace Gardens and Ladbroke Terrace would be enlarged to a four-lane carriageway.

Staines By-pass (Middlesex)—To be built for about two miles north of Staines, with a new bridge over the Thames.

City of London—A roundabout at Ludgate Circus, and a new road (the first portion of Route 11) from Giltspur Street to Whitechapel High Street.

Holborn - Kingsway—A large roundabout system with a widening of existing roads.

Strand—To be widened between the Tivoli Cinema and Charing Cross Station.

St. Giles' Circus—A gyratory traffic system at the junction of Oxford Street, Tottenham Court Road, and Charing Cross Road.

(4) Schemes to be carried out in Scotland would include improvements to the A 9 trunk road at Bridge of Allan and Linlithgow Bridge (to be authorized in 1955-56); a number of schemes on the Glasgow - Carlisle road (A 74), which it was hoped to convert progressively into a first-class highway with dual carriageways throughout; and a second tunnel under the Clyde at Whiteinch, Glasgow.

Mr. Boyd-Carpenter explained that the Secretary for Scotland had been consulted about road schemes north of the Border, and would take over responsibility for Scottish roads in April, 1956. The Government intended to complete the Highlands road programme announced in 1953 and, in addition, to make a substantial increase in the work being done on the crofter counties' programme, beginning with a commitment of £350,000 in 1955-56 and aiming at annual commitments of about £750,000 in each of the next three years. Additional Highlands schemes would include a bridge over the River Ness at Inverness, which it was hoped to begin in 1956-57.

On Feb. 4 Mr. Boyd-Carpenter inaugurated the construction of the new Conway road bridge, to replace the existing suspension bridge built by Thomas Telford in 1826 and carrying the Chester - Bangor trunk road (A 55) over the River Conway. The new bridge, situated about 60 yards to the north of the existing bridge, will have a single span of 310 ft. and a width of 31 ft. 6 in. (allowing for a single 22 ft. carriageway and a footpath 7½ ft. wide). It will be built by Sir William Arrol and Co., Glasgow, at a cost of £430,000, the whole of which will be met by the Ministry of Transport and Civil Aviation.

A. LITERATURE. — Book Selections for February.

Selected books of the month published in Great Britain, the United States and France are given below:

Great Britain. Cecil, Henry—"Brothers in Law." (Michael Joseph, 10s. 6d.)

Graves, Robert—"Homer's Daughter." (Cassell, 10s. 6d)

Graef, Hilda C.—"The Scholar and the Cross: The Life and Work of Edith Stein." (Longmans, 18s.)

Lawrence, T. E.—"The Mint." A Day-Book of the R A F. Depot between August and December 1922, by 352087 A/C Ross. (Jonathan Cape, 17s. 6d.) Published posthumously.

Miller, J. D. B.—"Australian Government and Politics." (Duckworth, 15s.)

Moore, Patrick—"Guide to the Planets." (Eyre & Spottiswoode, 21s.)

Morton, H. V.—"A Stranger in Spain." (Methuen, 18s.)

Sandburg, Carl—"Abraham Lincoln. The Prairie Years and the War Years." (Jonathan Cape, 45s.)

Weiner, J S.—"The Piltdown Forgery." (Oxford University Press, 12s. 6d.)

Wertham, Fredric—"Seduction of the Innocent." A Study of the Effects of 'Horror Comics' on Juveniles. (Museum Press, 21s.)

United States. Allen, Gay Wilson—"The Solitary Singer A Critical Biography of Walt Whitman." (Macmillan, New York, $8.00.)

Salisbury, Harrison E.—"American in Russia" (Harper & Bros., New York, $4.00)

France. Morand, Paul—"L'eau sous les ponts." (Grasset, Paris, 570 francs.)

Yonnet, Jacques—"Enchantements sur Paris." (Denoël, Paris.)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14023 D.)**

B. VATICAN. — Papal Encyclical on Position of Roman Catholic Church in China.

An Encyclical Letter was issued on Dec. 22, 1954, by Pope Pius XII calling upon the Roman Catholics of China, both clergy and laity, to resist the Communist Government's efforts to establish a "national" Roman Catholic church in China separated from the Holy See

The Encyclical began by praising the fortitude of the Chinese Catholics against the accusations and calumnies which were being directed against them, and against the Holy See, by the Communist Government. The Encyclical continued, however. "We cannot conceal the sadness and distress of our spirit on learning that although the overwhelming majority of [Chinese] Catholics remain steadfast in the Faith, there have not been lacking among you those who, either tricked in their good faith or because of fear, or misled by new and false doctrines, have given their support to dangerous 'movements' sponsored by the enemies of religion . . . As in olden times, the persecutors of the Christians falsely accuse them of not loving their country and not being good citizens . . But we wish again to proclaim that the Chinese Catholics are second to none in their love and fidelity to their most noble country"

After referring to the fact that his predecessor, Pope Pius XI, had personally consecrated the first six Chinese Bishops of the Roman Catholic Church, and that he himself had "for the first time in history conferred the dignity of the Roman Purple on one of your citizens" (i e Cardinal Tien, the first Chinese to be elevated to the Sacred College—see 7625 A), the Pope continued: "We desire that the day may come as soon as possible when you will have Bishops and priests, all of your nation and in sufficient numbers, to govern the Catholic Church in your immense country. Then there will no longer be any need for the assistance of foreign missionaries in the sphere of your apostolate Nevertheless, truth and conscience require it to be said that the missionaries are not inspired by earthly motives, and seek nothing but the illumination of the Chinese people with the light of the Gospel . .

"There are some among you who would wish that your Church be completely independent. They presume to make the claim of 'autonomy' for the teaching of Christian doctrine and in sacred preaching. We do not deny that the manner of preaching and teaching must differ in different places and must therefore conform as far as possible with the particular nature and character of the Chinese people, as well as with its ancient traditional customs . . What, however, is absurd even to imagine is by what right men, of their own choice, can interpret differently the Gospel of Christ according to the different nations . The sponsors of such movements, with the greatest cunning, seek to deceive the simple or the fearful, or to mislead them from the right path. To this end they falsely assert that the only true patriots are those who support the church of their design . . . In reality they are seeking to constitute eventually among you a 'national' church which could not be Catholic because it would be the denial of that universality by which the Society founded by Christ is above all nations and embraces them all . .

". . . It is impossible to please Christ and men alternately. If at times it happens that a man who wishes to remain faithful to the Divine Redeemer until death must suffer serious harm and loss, he must accept this with a calm and strong spirit We wish, however, to congratulate those who, under great difficulties, have distinguished themselves in their loyalty to God and the Catholic Church and thus have been deemed 'worthy to suffer reproach for the name of Jesus.' We encourage them to continue strong and intrepid along the path they have begun, keeping ever before their minds the words of Christ: 'Fear not them that kill the body and are not able to kill the soul, but rather fear him that can destroy both soul and body . . .'"

On the same day the Vatican issued a "balance-sheet" of losses suffered by the Roman Catholic Church in China as a result of Communist persecution, in which the following facts were given: 49 archbishops, bishops and prefects apostolic had been expelled, as well as the Papal Internuncio (Mgr. Riberi); 17 bishops and prefects apostolic were in prison; six archbishops and bishops had died in captivity; expelled priests numbered 2,645, of whom 98 were in prison; over 200 Chinese priests and laymen had died through persecution, and about 300 had been detained; most of the foreign nuns had been expelled, and the few still in China were in prison; the Chinese nuns were in prison or had been dispersed.

The Roman Catholic Bishop of Yihsien (Mgr. Tarcisio Martina), who had been sentenced to life imprisonment in 1951 on a charge of having taken part in an alleged plot to assassinate Mao Tse-tung, arrived in Hong Kong on Dec. 28 after having been allowed to leave China. He stated that he had been handcuffed and kept in shackles during the first four months of his imprisonment, but that he had subsequently been transferred to another prison where treatment was much better.
(Catholic Herald) **(Prev. rep. 12152 A; 12117 A.)**

Note. The estimated number of Roman Catholics in China is about 3,500,000. The Vatican statistics mentioned above stated that the Chinese Communist Government had confiscated three Roman Catholic universities, 216 hospitals, 781 dispensaries, and 254 orphanages, and had suppressed 25 religious periodicals.
(Manchester Guardian)

A. SOUTH AFRICA. — The Bantu Education Act. - Withdrawal or Reduction of Subsidies to Mission Schools. - Protests by Anglican, Roman Catholic, and Free Churches. - Closing of Mission Schools in Diocese of Johannesburg. - Dutch Reformed Church's Support for Government. - Inter-racial Conference of Protestant Churches. - South African Government Statements.

A serious crisis in the relations between the South African Government and the Churches developed during 1954 as a result of the implementation of the Bantu Education Act (see 13350 A). Under the Act (which is due to come into full operation on April 1, 1955) all grants-in-aid to mission schools which did not accept Government control were withdrawn, whilst subsidies to those which agreed to follow the Government curriculum were reduced by 25 per cent. Strong opposition to the Act was expressed by all the South African Churches, with the exception of the Dutch Reformed Church, although Church leaders differed on the policy to be adopted. Whilst the Roman Catholic Church refused all co-operation with the Government, the majority of the Anglican bishops decided in favour of leasing mission school buildings to the Government as a "lesser evil" than closing them; the Bishop of Johannesburg, however, ordered all mission schools in his diocese to be closed.

Feeling was further intensified by an official circular dated Sept. 3, 1954, which laid down that no sites in Native locations might be leased for mission purposes without the approval of the Minister of Native Affairs; that all such leases must be on a yearly basis; and that leases might be cancelled if, in the Minister's opinion, the activities of the occupier or any of his representatives were "such as to encourage or tend to encourage deterioration in the relations between Natives and the Government."

The reactions of the South African Churches to the Government's policy, and a number of related developments, are summarized below.

The Anglican Church.

The episcopal synod of the Church of the Province of South Africa, meeting at Umtata, adopted a statement on Nov. 10 condemning the Bantu Education Act, whilst at the same time announcing its decision to lease school buildings to the State.

The statement declared: "We have repeatedly affirmed our belief that it is morally wrong to follow a policy which has for its object the keeping of a particular racial group in a permanent position of inferiority. Because we are convinced of that, we cannot but deplore the Bantu Education Act.

"The policy underlying this Act has been officially interpreted by the Minister of Native Affairs. It condemns the existing educational system because it produces a class which 'feels that its spiritual, economic and political home is among the civilized community of South Africa—that is, the Europeans' Is civilization, then, for Europeans only?

"Large numbers of Africans must, as the Minister says, earn their living in the service of Europeans. For these large numbers there is to be no further education than is necessary to fit them for this. In the reserves there is a need for educated Africans, but the education system envisaged . . . is not calculated to produce these educated Africans, and even if it were, it is only the comparatively few that are to be developed to the fullest extent according to their aptitude and ability. The rest are to be educated as servants to the Europeans, who constitute 'the civilized community of South Africa.' We believe that the object of educational policy should be to produce an educated community, and to make the best of every child according to his aptitude and ability. A policy which does not aim at this stands self-condemned . .

"It is true that the Churches are allowed to make application for permission to retain control of schools for the time being with a reduced subsidy, but, to quote the Minister, this can only be a provisional arrangement which may be terminated when the Department is convinced that the transfer of control to the Bantu community is desirable or should be begun Training schools for teachers are excluded from this arrangement

"Both as to religious and secular teaching, it is our conviction that the Bantu Education Act will retard the future education of the African, and the majority of us are of the opinion that the Church should not make itself responsible for taking part in such an educational system. All we are prepared to do is to lease certain of our buildings to the State

"The majority of us think that in many cases it would be wrong to refuse to lease our buildings. Such a refusal would throw many teachers out of employment and leave many children without the opportunity of any kind of instruction. It is incompatible with our duty to the African people to take action which might lead to such results.

"We are faced with a grievous choice of evils, and we must choose the lesser. This does not imply that we approve in any sense of an Act which will retard the progress of African education and weaken the connexion of such education with the teaching of the Christian faith."

A second statement was issued by the synod on Nov. 11 condemning the circular of Sept. 3 as "a clear denial of the right of freedom of speech, an attempt to silence the Church, and a threat to our work." It continued:

"If it could be proved that any representative of the Church uses language that is subversive or incites persons to break the law, we should not deny the right of the State to take action against that person. But it seems to us unjust that the Church or any other body to which he belongs should be held responsible for his actions, and the terms of the circular go much further even than this They identify the State with certain Governmental persons, and appear to be an attempt to silence any criticism of the Government of the day Against such a threat we make the strongest protest. No Church can admit that a particular Minister of State has the right to be sole judge of the scope of the work it should undertake, either among Natives or any other part of the community . . "

The synod's proposal to lease school buildings to the Government, though not binding on the individual bishops, was accepted by all of them except Dr. Ambrose Reeves, the Bishop of Johannesburg, who on Nov. 21 ordered the 23 Anglican mission schools in his diocese, teaching over 10,000 African children, to be closed as from April 1, 1955.

Dr Reeves said in a press statement. "The policy of the Bantu Education Act is morally indefensible. In conscience I am bound to oppose it, and therefore cannot assist the Government, however remotely or indirectly, in implementing a policy which violates Christian standards It means a loss to the Church of buildings and contents valued at £45,000 It means depriving African children of benefits we would gladly continue to give. But there is no other way . . The Church could rent or sell the schools We refuse to consider either of these alternatives, because we want it to be clearly understood that we will have no part in a system of education whose objects are contrary to the principles which we believe ought to be the foundation of all education"

The Minister of Native Affairs (Dr. Verwoerd) declared on Nov. 24 that the Government would not be "intimidated" by Dr. Reeves's "threats." He asserted that the attacks made on the Government were not based upon moral considerations but upon disappointment that a sphere of influence, together with big financial grants, would disappear. He also accused the English-speaking Churches of using the State subsidies to Bantu education for the purpose of financing their mission work. The allegations that fewer children would receive education, he added, and that the education itself would be poorer under the new system, were "patently false."

In reply to Dr. Verwoerd, Dr. Reeves described the allegation that the Churches had used State subsidies for purposes other than education as "an accusation of misappropriation"; in this connexion he pointed out that since 1950 the Anglican Church in his diocese alone had spent more than £8,000 of its own money, over and above all Government grants, on the erection and maintenance of schools. "The Church has never alleged that less children will be educated," he added, "but it asserts boldly that the education will be poorer." Dr. Reeves emphasized that the Church's fundamental objection, to which Dr. Verwoerd had made no reference, was not only to an inferior kind of education, but to "a type of education which in our view will assign to the vast mass of Africans a place of permanent inferiority."

Dr Reeves announced on Dec 12 that the school buildings in his diocese would be used as family centres for biblical study, recreational activities, plays, and handicrafts, and that children and youths would be catered for during the day and adults during the evening He subsequently left for England on Dec 15 to raise funds for the scheme. The cost was estimated at £10,000, to which the Society for the Propagation of the Gospel agreed to make an immediate grant of £6,000 a year.

At a press conference in London on Jan 13, 1955, Dr. Reeves stated that all the 35 African clergy in his diocese, meeting without his knowledge, had signed a document approving his decision to close the schools Whilst agreeing that under the Bantu Education Act far more African children would be receiving something in the way of education than at present, he reiterated that the fundamental objection to the Act was that it was designed to train Africans for a predetermined status He quoted in this connexion a statement by Dr Verwoerd that "there is no place for him [the Native] in the European community above the level of certain forms of labour."

The Roman Catholic Church.

The Southern African Roman Catholic bishops' conference, which ended on Sept. 30, 1954, decided not to co-operate in implementing the Bantu Education Act. After a deputation of bishops which called upon Dr. Verwoerd had failed to obtain a compromise, a pastoral letter was issued on Dec. 12 announcing that a special fund would be established to make up the deficit when the Government's subsidies were reduced.

Replying to Dr. Verwoerd's statement of Nov. 24, which had attacked him by name, Dr Hurley (Roman Catholic Archbishop of Durban) stated on Nov. 29: "We are asked to stand aside from the field of education while the future of South Africa is hewn out with massive *apartheid* measures that fall like hammer-blows on the soul of the black man and the conscience of the white. The African can put up with a lot patiently and cheerfully—poverty, undernourishment, disease, low wages, separation from wife and family—but there is one thing he cannot abide for ever. It is the insult he

sees in every law and regulation of *apartheid*. The black man refuses to admit that these restrictions are good for him, simply because there is in him, as in every other man, the instinct of freedom, justice, human desire, and self-respect . . . "

The Free Churches.

A statement was issued by the Methodist Church of South Africa on Oct. 26, 1954, expressing its emphatic opposition to Dr. Verwoerd's educational policy, which, it declared, was in effect aimed at conditioning the African people to a predetermined position of subordination, and which was incompatible with Christian principles. "To provide for the immediate educational needs of the African people," the statement continued, "the Church feels compelled to relinquish control of its schools to the State, and to continue to exercise a Christian influence on education where possible."

Strong opposition to the Government's policy was also expressed by leaders of the Presbyterian and Congregational Churches in South Africa.

The Dutch Reformed Church.

The Synodal Commission of the Dutch Reformed Church (the only Church in South Africa supporting the Government on the *apartheid* question) issued a statement on Nov. 6, 1954, pointing out that it had tried for many years "to get the Government to accept responsibility for the control of Native education," which it described as "a natural development" similar to that which had occurred in European countries.

The statement welcomed "the opportunity which has been created by the new Act for the Natives themselves to accept responsibility for the education and rearing of their children"; "the opportunity which the Church still has of retaining some of its institutions on certain conditions"; and "the prospect created thereby of some education for tens of thousands of children who would otherwise not have gone to school, and the assurance that the education of Native children will now be carried out on a definite basis according to a Union-wide policy" It urged the Government, however, "to create more facilities for academic education for non-Europeans," and to make more provision in lower and secondary schools for Native pupils who could benefit from such education.

Inter-racial Church Conference.

On the proposal of the Dutch Reformed Church, an inter-racial Church conference, attended by representatives of 42 Protestant Churches, missions, and societies, met in Johannesburg from Dec. 7-10, 1954. The 172 delegates included 56 non-Europeans, who were seated apart from the European delegates. Although agreement was reached on a number of points, the conference made clear the wide difference of opinion dividing the Dutch Reformed Church from the other Churches on the *apartheid* question.

The view of the Dutch Reformed Church was put by the **Rev. C. B. Brink** (chairman of its Federal Council), who declared that the idea of the equality of all men "is not only the denial of the doctrine of creation but also of the true nature of the Kingdom of God"; and by the **Rev. A. G. J. Oosthuizen,** who maintained that "Christ . . does not deliver from social economic, and political slavery, but from the slavery of sin." The Anglican Bishop of Bloemfontein (the **Rt. Rev. C. W. Alderson**), on the other hand, denounced the colour bar as "the cruellest of human ills," and continued: "The cruelty is that a man knows that even if he breaks down all other bars, however much he may qualify himself for human fellowship and friendship, his colour is ineradicable. When that position is extended to the relationship of Christian men, cruelty has become, in my own judgment, sin." An African Congregational minister, the **Rev. S. W. T. Luzipho,** pointed out that if an African clergyman visited a White colleague "he is asked to go round to the kitchen because the 'policy of the country' must be followed," and observed that "because of the colour of his skin a man is denied human dignity."

The conference set up a committee, including representatives of the Anglican, Methodist, Presbyterian, and Dutch Reformed Churches, to promote co-operation between the Churches and to organize similar conferences at least once every three years. Resolutions were adopted stating that "the transfer of Bantu education to the State places a greater responsibility on the Church to concentrate on religious education"; calling upon all Christians to regard and treat every human being with "honour and respect"; and appealing to the Government to contribute an additional £10,000,000 a year for the social, economic, and industrial development of non-Europeans.

Reactions in Britain.

Strong condemnation of the South African Government's *apartheid* policy was expressed during this period by many Church leaders in Britain.

The Archbishop of Canterbury (Dr. Fisher) denounced it on Oct. 19 as "un-Christian in principle and bound in the long run to be catastrophic in its effects," and declared that "each detailed application of the principle of *apartheid* seems to us a fresh violation of Christian principle and common justice" **The Archbishop of York** (Dr. Garbett) stated on Nov. 4 that "we as Christians must make it clear that we regard the [South African] Government's policy and acts in the matter as un-Christian, tyrannical, and dangerous," and "must voice our protest as clearly and uncompromisingly as we did against Hitler's treatment, not of majorities, but of minorities in Germany." **The President of the Methodist Conference** (the Rev. W. Russell Shearer) described the new regulations on the leasehold of land occupied by missions as "a travesty of justice and an affront to the Gospel."

The British Council of Churches adopted a resolution on Oct. 27, 1954, declaring that the South African Government's policy, as expressed in the Natives Resettlement Act (see 13887 A) and the Bantu Education Act, was an offence "not only against human rights but also against the divine law," and calling upon the Archbishop of Canterbury, in consultation with the leaders of other Churches, to appoint a special group to advise on action which would strengthen the Churches in South Africa **The Society for the Propagation of the Gospel** issued a special appeal on Nov. 28 for funds to assist the Anglican Church in South Africa to initiate new educational work in place of that which was no longer possible; the S.P.G. subsequently announced on Jan 13, 1955, that it had guaranteed up to £25,000, which would be used to provide salaries for educational workers.

South African Government Statements.

Addressing a gathering of Transvaal Native chiefs and headmen on Nov. 13, 1954, Dr. Verwoerd denied that education for the Bantu would be in any way inferior to that for Europeans.

"The purpose of education," he stated, "is to teach the child, not only to earn money, but also to serve his family and people. When a Bantu child is taught, he will be taught to serve his own people. This does not mean that his education will be inferior. People who are going to be parsons, doctors, or teachers must have the education proper to parsons, doctors, and teachers." Dr. Verwoerd declared that the Bantu Education Act implied no intrinsic change, but merely meant that the money available for education would be spent by the source which provided it and not by other agencies, such as Provinces and Churches.

A statement issued on Oct. 25, 1954, by the Department of Native Affairs said that a four-year course would be offered to all Bantu children whose parents desired it, and that children who could benefit by further instruction would have not fewer but far greater facilities than hitherto. Academic education would still be available, and the number of secondary schools (at present about 200) would tend to increase *pari passu* with the demand for the services of the educated Bantu in the service of his own people. Technical instruction would also be made available for Bantu students who could not benefit by an academic course.

Draft syllabuses for lower primary schools, based on those previously used by the four Provincial administrations, were issued by the Department of Native Affairs on Nov. 26. They provided that the basic medium of instruction should be the mother tongue, and that an equal amount of time should be devoted to instruction in English and in Afrikaans. (Previously Afrikaans had not been taught in Native schools in the Cape and Natal) Nearly three hours a week were to be devoted to religious instruction, and provision would also be made for the teaching of arithmetic, writing, singing, handicrafts, and "environment studies" (history, geography, and civics). The aims of the curricula were defined as "the development of a healthy body, sound standards of conduct, understanding of the community and the individual's place in it, training in mental skills, some knowledge of the world beyond immediate surroundings, and training in the principles and practice of Christianity"

The Exchequer and Audit Amendment Bill.

The Exchequer and Audit Amendment Bill, which provided for the financing of Native education, passed its second reading in the House of Assembly on Jan. 31, 1955, and its third reading (by 77 votes to 49) on Feb. 4. Under the Bill, the Bantu education account will be credited with four-fifths of the revenue derived from the Native general tax, and an additional contribution of £6,500,000 every financial year. Money not spent in one year will be available for expenditure in the following year.

Dr. Verwoerd, in moving the second reading, said that the basic principles of the Bill were that the Natives themselves would share responsibility for the education of their children, and that the State would contribute a sum twice as large as the Natives' contribution. The aim of the Bill was that all Native children should receive at least elementary education as soon as possible.

In the ensuing debate the Bill was strongly criticized by the United and Labour parties, and by the Natives' representatives. **Mr. Lovell** (Labour) contended that the amount received for educational purposes from Native taxation would be inadequate to cope with even a gradual increase in Native educational requirements, and pointed out that in 1954 six out of 10 Natives never went to school at all, seven out of 10 were illiterate, 50 per cent of those attending Native schools were in the sub-standards, and only 0.05 per cent of those attending schools ever reached matriculation standard.

The African National Congress unanimously adopted a resolution on Dec. 19, 1954, expressing uncompromising opposition to "the moral and spiritual enslavement of our children" involved in "Dr. Verwoerd's evil Act," and calling upon African parents to withdraw their children from school indefinitely as from April 1, 1955.—(Cape Times - Die Burger, Cape Town - Times - Daily Telegraph - Church Times)

(Prev. rep. 13350 A.)

A. ISRAEL - JORDAN - SYRIA. — Border Incidents. - Security Council Debates. - Israel resumes Participation in Israeli-Jordanian Mixed Armistice Commission. - General Burns appointed Head of U.N. Truce Supervisory Commission. - Jordanian Appeal for Arab Military Aid. - Israeli Proposals for Peace Settlement with Arab States.

Frequent incidents occurred along the frontier between Israel and Jordan during the period from April to September, 1954, culminating in a series of raids across the border from both countries in August and September. The situation, however, improved during the autumn and winter as a result of measures adopted by the Jordanian authorities to stop Arab incursions into Israel. The most serious incidents during this period were a clash in Jerusalem extending over five days (June 30 to July 4) and a frontier engagement near the Jordanian village of Beit Liqya on Sept. 1-2. Some clashes also occurred on the Israel-Syrian border during the period under review.

The Jerusalem incident, the origins of which were obscure, led to the deaths of four Israelis and five Jordanians, and the wounding of about 25 persons on either side during exchanges of fire spread over several days. A cease-fire was arranged by Major-General Bennike (Chief of Staff of the U.N. Truce Supervisory Commission) on July 4, and the Israel-Jordan Mixed Armistice Commission held four sessions from July 11-15, with General Bennike in the chair, to investigate the incident. (This was the first occasion on which Israel had participated in the Mixed Commission since her earlier withdrawal.) The Israeli and Jordanian delegations each accused the forces of the other side of firing first, but General Bennike ruled that, in view of the conflicting evidence, it was impossible to determine the precise responsibility for the incident. He found that there was no evidence that the attack had been planned by either side, and expressed the opinion that the shooting might have begun spontaneously.

In apparent retaliation for a Jordanian raid on an Israeli village in the Jerusalem area, in which an Israeli was killed and another wounded on Aug. 28, an Israeli force crossed the frontier on the night of Sept. 1-2 and attacked the Jordanian village of Beit Liqya (11 miles N.W. of Jerusalem). An Arab Legion car carrying reinforcements to the village was wrecked by a land mine, after which Israeli troops opened fire from ambush, two Jordanians being killed and one wounded in the ensuing engagement. Another encounter between Arab Legion and Israeli forces took place farther to the north, three Jordanians being wounded.

Border clashes occurred in the Jenin, Tulkarm, Bethelehem and Hebron areas on various occasions during the period from April to December, 1954, with some loss of life—both military and civilian—on both sides. In some cases the responsibility was attributed by the Mixed Armistice Commission to Israel and in others to Jordan. There were also some incidents on the Syrian frontier, of which the most serious occurred on June 30, 1954, when Syrian forces opened fire on a patrol-boat on Lake Tiberias and killed two Israeli policemen. The Israeli-Syrian Mixed Armistice Commission censured both sides for the incident—Syria for having fired on the patrol-boat, and Israel for maintaining such craft on Lake Tiberias and for having fired on Syrian positions.

It was announced on Aug. 3 that General Bennike, whose term of office had already expired, would be succeeded by Major-General Burns, of the Canadian Army. Relations between General Bennike and the Israeli authorities had been strained for some months as a result, firstly, of Israeli resentment at his decision to order a cessation of work on the Jordan River hydro-electric project, and secondly, the refusal of the Mixed Armistice Commission to censure Jordan for the Scorpion's Pass massacre (see 13498 A). On April 1 the Israeli Government had submitted a resolution to the U.N. Secretary-General alleging that General Bennike's report of Feb. 24, 1954, had shown bias in Jordan's favour by omitting reference to incidents for which Jordan had been responsible, and that he had minimized Israel's attempts to reduce tension on the border. General Burns (57), who officially assumed his new post on Sept. 2, served with distinction in both World Wars, and commanded Canadian forces in Italy and Western Europe during 1943-45.

In his first report, submitted to the U.N. Security Council on Sept. 7, General Burns gave warning that recent incidents on the Jordanian border could develop into hostilities which might spread "like brushfire." The raid on Beit Liqya, which had alarmed Jordan, appeared to be "the culmination of a series of operations of lesser magnitude," some of which were said by Israel to have been reprisals for thefts or murders by infiltrators from Jordan. "Retaliation against marauding by means of armed raids," General Burns commented, "is contrary to the General Armistice Agreement and is a dangerous remedy," whilst "the non-co-operation of Israel in the work of the Mixed Armistice Commission precludes any investigation that could either prove or disprove these Israeli allegations of theft and murder."

An official Israeli reply to General Burns's report, dated Sept. 23, described it as incomplete in fact, since it was based solely on Jordanian evidence. The Beit Liqya incident, the reply maintained, had to be seen as the culmination of a situation which had become intolerable because of repeated acts of violence from the Jordanian side of the border. The Israeli Government therefore suggested that General Burns should undertake a general survey of border conditions, and should try to obtain Jordan's consent to a definite demarcation line.

Israel resumed participation in the work of the Israeli-Jordanian Mixed Armistice Commission on Oct. 20, when Commander Hutchison—whose ruling on the Scorpion's Pass massacre had led to Israel's withdrawal—was succeeded as chairman by Colonel Brewster, of the U.S. Army.

Other recent developments in the Palestinian situation are summarized below under cross-headings.

Security Council Debates on Jordanian and Israeli Complaints. The Jordanian Government submitted to the Security Council on April 1, 1954, as a matter of urgency, a complaint concerning the Israeli raid on the village of Nahalin (see 13498 A), which, together with a subsequent Israeli complaint against violations of the armistice by Jordan, was discussed by the Council during April and May.

The two complaints gave rise to a prolonged dispute on procedure, as the majority of the delegates advocated a general debate on the frontier situation, whilst Dr. Malik (Lebanon) and M. Vyshinsky (Soviet Union) maintained that the complaints should be considered separately in the order in which they had been submitted. On May 4 a motion in favour of a general debate, proposed by Brazil and Colombia, was adopted by eight votes (Britain, France, the U.S.A., Denmark, Turkey, New Zealand, Brazil, and Colombia) to two (Lebanon and the Soviet Union), with Nationalist China abstaining. Dr. Malik then introduced a resolution censuring Israel for the Nahalin raid, demanding the punishment of those responsible and the payment of compensation for the loss of life and damage to property caused; and calling upon all U.N. members to apply such measures against Israel as were necessary to prevent a repetition, including "complete or partial interruption of economic relations and of rail, sea, air postal, telegraphic, radio, and other means of communication, and severance of diplomatic relations." Mr. Eban (Israel), in reply, demanded that Jordan [which is not a member of the U.N.] should accept the provisions of the U.N. Charter for the pacific settlement of disputes. The debate was adjourned on May 12, and private talks were held on this point, the Jordanian representative (Mr. Rifai), however, announced on May 31 that he was no longer empowered by his Government to take part in the discussions. The Jordanian House of Deputies had previously (April 20) unanimously adopted a resolution thanking M. Vyshinsky for his "support of the Arab cause."

British and U.S. Proposals for Prevention of Incidents. The British and U.S. Governments submitted to Israel on June 20, 1954, a number of proposals for strengthening the U.N. Truce Supervisory Organization along the Israeli-Jordanian frontier, and for extending its authority. Although no details of the plan were officially published, its provisions were reported to be as follows: (1) precise demarcation of the border, (2) erection of physical barriers at suitable points on the frontier; (3) discussions on arrangements to allow the transit through Israel from Gaza of Arabs wishing to settle in Jordan; (4) freedom for U.N. observers to move about without escort or previous permission, (5) improved transportation for observers investigating incidents, including the use of helicopters; (6) permission for observers to use interpreters who were not nationals of the countries concerned, (7) resumption of meetings between local military and police officers at stated points along the border; (8) renewed participation by Israel in the Israel-Jordan Mixed Armistice Commission; (9) publication of details of penalties imposed on persons violating the armistice; (10) the chairmen of the Mixed Armistice Commissions (*a*) to have authority to propose resolutions, and (*b*) to take the initiative in proposing solutions to border problems.

The Israeli Government's reply, presented on Aug. 1, 1954, accepted in principle the first three proposals, as they were preventive in character, on condition that the demarcation of the border should be carried out by the two parties and not by U.N. observers, and that existing pockets of "no-man's-land" should be eliminated. The Note expressed disappointment, however, that most of the other proposals were concerned with procedure after the event rather than with the prevention of incidents, or would involve a departure from the terms of the armistice agreements, which could be brought about only by direct negotiations between Israel and Jordan.

Jordanian Appeal to Arab States for Military Aid. Following the fighting in Jerusalem from June 30 - July 4, 1954, King Hussein of Jordan appealed to all the Arab States for "immediate moral and financial aid" to enable Jordan to strengthen her defences. In response, General Neguib (then President of Egypt) assured the Jordanian Ambassador on July 6 that Egypt would take steps to fulfil King Hussein's request. The Saudi Arabian Ambassador in Cairo stated that King Saud was prepared to give all possible aid to Jordan, whilst King Faisal of Iraq announced on July 7 that he would grant £100,000 to the Jordanian National Guard.

International Reactions to Beit Liqya Incident. On Sept. 2, 1954, immediately after the raid on Beit Liqya, King Hussein informed the British and U.S. Ambassadors in Amman that unless Israel ended her "repeated aggressions," Jordan would be obliged to reconsider her attitude towards the armistice agreement, which, he claimed, she had always been careful to observe. The Jordanian Ambassador in London (Dr. Haikal) called at the Foreign Office on Sept. 4 and subsequently issued a statement declaring that "some kind of action by the great Powers and the Security Council has become imperative," as Israel was "encouraged in continuous acts of violence by the inaction of the great Powers and the United Nations."

The U.S. State Department informed the Israeli Minister in Washington (Mr Shiloah) on Sept. 4 that the U S A. viewed the attack on Beit Liqya with "great concern" Although the U S. Government recognized that infiltration from Jordan constituted a serious problem, Israel's apparent policy of armed retaliation—which had been condemned in the past—had increased rather than diminished tension along the armistice line.

Causes of Friction in Israeli-Syrian Demilitarized Zone. A report by General Burns to the Security Council on causes of friction in the demilitarized zone between Israel and Syria was issued on Jan. 14, 1955

The report declared that a lasting settlement might only be possible by negotiated revision of the terms of the Armistice Agreement, and suggested as a provisional arrangement that the zone should be divided into areas within which either Israel or Syria would have administrative responsibility, whilst the inhabitants would trade and traffic with contiguous portions of the State having such responsibility over them.

The report recalled that in spite of frequent incidents in the area over the past three years, the Mixed Armistice Commission had been unable to function because of (*a*) Israel's claim to sovereignty over the whole demilitarized zone, (*b*) the existence of Israeli police control over much of the area, and (*c*) the conflicting interpretations by both sides of the armistice terms relating to the zone. Because of this dispute Arabs living in the area had been subjected to serious hardships, which in certain instances Israel had unsuccessfully tried to lessen because of the Arabs' refusal to co-operate with the Israeli authorities, whilst in other instances the Israeli authorities had been "unhelpful."

Under the present arrangements the zone was theoretically subject to civil administration "on a local basis under the authority of the chairman of the Mixed Armistice Commission," but owing to lack of suitable personnel it had been almost impossible to establish this system in practice, with the result that administration had been exercised in the main by the central Israeli authorities As Israeli control was disputed by Syria and by most of the Arabs living in the area, many incidents had occurred.

General Burns's report followed the transmission to him of Syrian complaints, including one against Israel's denial of watering and fishing rights to the Syrian population in the area bordering the shores of Lake Tiberias.

The Israeli Government rejected General Burns's proposal for the division of the demilitarized zone in a letter published on Jan 18, on the grounds that the proposal "might lend itself to the interpretation that Syria's illegal encroachment upon the zone is accepted by the U.N. Truce Supervisory Commission as a fact to be recognized rather than rectified."

Israeli Detention of Syrian Aircraft. A Syrian passenger plane *en route* from Damascus to Cairo was intercepted by the Israeli Air Force on Dec. 12 while over Israeli territory (as alleged by the Israeli authorities) and was forced to land at Lydda airport. The pilot, crew of four, and five passengers (all Syrians except an American) were subsequently released by the Israeli authorities after investigations, whilst the aircraft itself was released on Dec. 14.

Although the Israeli Foreign Ministry stated that the pilot had admitted to being over Israeli territory, the Syrian Government sent a complaint to the Israeli-Syrian Mixed Armistice Commission in which it denied the Israeli allegations, claimed that the aircraft had been intercepted "at a great distance from the Palestine coast" over the high seas, and alleged that the Israeli action was "premeditated." No further action was taken by the Security Council because of the unconditional release of the aircraft, its crew, and its passengers.

Israeli Appeal to Arab States for Peace Settlement. In an Arabic broadcast on Sept 25, 1954, Mr. Gideon Raphael (head of the Middle Eastern section of the Israeli Foreign Ministry) appealed for a peaceful settlement of disputes between Israel and the Arab States. He announced that Israel was prepared (1) to grant Jordan facilities in Haifa harbour and transit rights for goods through Israeli territory, (2) to permit land communication by the Arab States across the Negev, provided that Israeli sovereignty was not infringed, (3) to set on foot a scheme for the payment of compensation to the Palestinian Arab refugees. As a further conciliatory gesture towards the Arab States, Israel announced at the same time that she was prepared to release all blocked Arab bank accounts, an agreement to this effect being subsequently concluded (see 13886 B).

The Ambassadors of the Arab States in Washington protested to Mr. Dulles on Nov. 3 against the U.S. Government's decision that the new U.S. Ambassador should present his credentials to the Israeli Government in Jerusalem. The State Department explained, however, that the decision "implies no change in our attitude regarding Jerusalem, nor does it imply any change in the location of the U.S. Embassy in Israel, which is at Tel Aviv." In reply to a similar protest presented by the Arab Ambassadors in London, Mr. Nutting (Minister of State for Foreign Affairs) said on Nov. 4 that the British Government had decided that the new British Ambassador should present his credentials in Jerusalem after consultation with the U.S.A. and France, and that this was purely a courtesy gesture with no political implications.—(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune)

A. EASTERN EUROPE. — Priority for Heavy Industry in Czechoslovakia, Hungary and Bulgaria.

Following the recent Soviet declarations that primary emphasis would be placed on the development of heavy industry (see 14033 A), a similar policy was adopted in a number of Eastern European countries, as described below:

Bulgaria. M. Chervenkov, the Bulgarian Prime Minister, announced on Feb 18 that the central committee of the Bulgarian Communist Party and the Bulgarian Government had agreed to ensure the country's agricultural development "on the basis of its industrialization."

Dealing with agricultural progress, he mentioned, *inter alia*, that co-operative farms had more than doubled in the last five years, that mechanization had been greatly developed, and that the acreages under sugar-beet, vegetables, fodder, etc., as well as the yields of cotton, tobacco, and maize, had all shown increases Nevertheless, the production plan for 1954 had not been fulfilled as regards wheat, rye, barley, and oats, and there were "serious weaknesses" in the organization of agriculture generally.

Czechoslovakia. M. Siroky, the Czechoslovak Prime Minister, announced in a broadcast on Feb. 14 that heavy industry would be the basis of Czechoslovak industry in future; that this policy had been approved by the central committee of the Czechoslovak Workers' (Communist) Party, and that the expansion of Czechoslovakia's industrial potential was the only way to increase her agricultural production He added that the central committee had also decided that an additional 500,000 acres should be brought under cultivation by 1957.

M. Siroky strongly criticized the Ministry of Agriculture for "weakness in controlling State tractor stations," for neglecting measures to aid "medium and small private landholders," and for failing to take the necessary steps to bring 360,000 acres of new land under cultivation during the present year in accordance with previous plans. To overcome the rural labour shortage, he urged the mass recruitment of women for agricultural work.

Hungary. The official Communist Party organ *Szabad Nep* aligned itself with the change in Soviet policy in a leading article published on Feb. 10 The article declared *inter alia*. "We must strengthen both heavy industry and the military potential of the country, so that we can support the camp of peace with all our resources." It gave a warning, however, that this could not be done "without restrictions and privations which the people must be prepared to undergo."

M. Hidas, one of the Hungarian Deputy Premiers, stressed on Feb. 14 the need to develop Hungary's heavy industry.
(Le Monde, Paris - Neue Zurcher Zeitung - Times - Daily Telegraph) **(Prev. rep. Bulgaria, 13578 A; Czechoslovakia, 13156 A; Hungary, 13296 A; 13014 A.)**

B. UNITED STATES. — Offshore Radar Chains.

A fleet of "flying radar stations," consisting of 30 Lockheed Super-Constellations, went into operation off the Atlantic coast of the United States on March 1. The machines, each of which carries 5½ tons of electronic equipment, will keep a round-the-clock watch against any "sneak" attack by an enemy, and will extend the present land-based radar network hundreds of miles out to sea. It was explained that this extension of the radar network would provide warnings of enemy attack much earlier than would otherwise have been the case; that it would enable jet interceptors to go into action much earlier; and that it would also permit civil defence measures to be put in hand earlier than would otherwise be possible. The 30 planes were grouped into a formation designated the 551st Early Warning and Control Wing, operating from the Otis Air Force Base at Falmouth, Massachusetts. The offshore extension of the radar network had been ordered by the Continental Air Defence Command.

A similar fleet of offshore radar planes, based on the McClellan Air Force Base at Sacramento, California, had been operating off the Pacific coast since the spring of 1954.
(New York Times) **(Prev. rep. 13896 A.)**

C. CHINA. — Currency Revaluation.

The yuan (the Chinese currency unit) was revalued on the basis of 10,000 old yuan for one new yuan under a currency reform which went into effect on March 1. The New China News Agency, announcing the impending revaluation on Feb. 20, said that it was designed "to improve China's currency system so as to facilitate transactions and accounting." All cash payments, contracts, claims, debts, Government securities, and bank accounts were calculated in the new currency as from March 1, from which date the official exchange rates for sterling and dollars were changed from 68,930 yuan = £1 to 6.893 yuan, and from 24,600 yuan = $1 to 2.46 yuan.
(Times - New York Times) **(Prev. rep. 10463 G.)**

MARCH 5—12, 1955

A. SOUTH-EAST ASIA (MANILA) DEFENCE TREATY. — First Council Meeting in Bangkok. - Setting up of Treaty Machinery. - Mr. Dulles's Statement on U.S. Strength in the Pacific. - Sir Anthony Eden's Visits to Cairo, Karachi, Singapore, Bangkok, Delhi, and Baghdad. - Mr. Dulles's Visits to Philippines, Burma, Indo-China, and Formosa. - U.S. Defence Treaty with Nationalist China in Force.

The first meeting of the Council established by the South-East Asia Collective Defence Treaty (the Manila Treaty) was held in the Siamese Parliament building in Bangkok from Feb. 23-25, under the chairmanship of Prince Wan Waithayakon, the Siamese Foreign Minister. The meeting was attended by the Foreign Ministers of Australia (Mr. Richard Casey); New Zealand (Mr. Thomas Macdonald); Pakistan (Mr. Mohammed Ali, Prime Minister and Foreign Minister); the Philippines (Señor Carlos P. Garcia, Vice-President and Foreign Secretary); Siam (Prince Wan Waithayakon); the United Kingdom (Sir Anthony Eden); and the United States (Mr. John Foster Dulles). In view of the French Cabinet crisis following the resignation of the Mendès-France Government, France was represented by M. Henri Bonnet, the former French Ambassador in Washington.

The military representatives accompanying the Ministers included Field-Marshal Sir John Harding, Chief of the Imperial General Staff (U.K.); Admiral Felix Stump, C.-in-C., Pacific Fleet (U.S.A.); Lieut.-General Wells (Chief of the Australian General Staff); Major-General Gentry (Chief of the New Zealand General Staff); Rear-Admiral Choudhry (C.-in-C., Royal Pakistan Navy); the Chiefs of Staff of the Philippine and Siamese armed forces; and Admiral Ortoli (French C.-in-C., Indian Ocean area).

Other members of the delegations included Sir Harold Caccia (Deputy Under-Secretary, Foreign Office) and Mr. Malcolm MacDonald (Commissioner-General for South-East Asia)—United Kingdom; Mr. Walter Robertson (Assistant Secretary of State for Far Eastern Affairs) and Mr. Harold Stassen (Director of the Foreign Operations Administration)—United States; and MM. Guillaume Georges-Picot and Raymond Offroy (Ambassadors in Mexico and Bangkok respectively)—France.

In their opening speeches the Foreign Ministers stressed the peaceful and purely defensive character of the treaty.

Mr. Casey declared that "this is not a sabre rattling conference," and continued: "We are not here to place ourselves in war-like postures, individually or collectively. We are here to make defensive arrangements designed to ensure the security of a threatened area, not only against the force of arms, but immediately against more subtle and insidious underground subversion, a subversion which is actually in progress now and which makes a mockery of the so-called principle of non-interference in the affairs of other States."

Mr. Dulles outlined the bases of American foreign policy in defence of liberty as, first, the Monroe Doctrine, which had now grown into the Rio pact and the Organization of American States; second, the long-standing U.S. concern for the political and territorial independence of China; thirdly, the U.S. concern for Europe which, after America's participation in the two world wars, was now expressed by her membership of NATO. If the U.S.A. now came to South-East Asia, he declared, that was "geographically something new to us," but, he added, "we come under the compulsion of our historic principles and to fulfil them."

Sir Anthony Eden said that a free and prosperous people was Communism's most formidable foe, and that, whilst it was necessary to strengthen defences, which threatened no one, there were many other ways of strengthening peace. British policy would always strive to extend the area of peaceful co-operation, and the main task of the meeting must be to build up effective machinery of co-operation for the South-East Asia area.

Mr. Mohammed Ali said: "The treaty establishes a regional defence alliance between Asian and Western countries, between great Powers and small nations, on the basis of equality and partnership, in pursuit of common ends and ideals. The peoples of S.E. Asia may note the fact that the Western nations which are parties to the treaty are pledged to respect the principle of equal rights and self-determination of peoples. Pakistan believes the treaty is not directed against any nation or people. It is a treaty purely for defence against aggression. . . It is a travesty of truth to charge that the treaty creates a sphere of influence in Asia. It respects the rule of international law to refrain from interfering in the internal affairs of other States."

The other Ministers spoke on similar lines.

The Council decided on its mode of operation and created the following machinery: (1) a permanent body of Representatives of ambassadorial rank with headquarters in Bangkok and with its own Secretariat; (2) a group of military advisers; (3) a body of experts on subversion; and (4) an economic working group. It was, however, decided that the groups under (3) and (4) would not have the character of permanent committees and that they, as well as the group of military advisers, would not be stationed at Bangkok but could meet anywhere within the treaty area.

The Council's decisions were summed up in the following communiqué issued on Feb. 25 (cross-headings inserted):

"The Council met in circumstances which give increasing urgency to the objectives of the United Nations and, in particular, asserted their hatred of war and their determination to take all possible measures to preserve and strengthen peace. They reiterated that such military arrangements as they may make will be purely defensive, in accordance with their international obligations, and will never be used for purposes of aggression."

Purposes of the Treaty. "The Council affirmed the aim of their Governments, as set forth in the Pacific Charter—to uphold the principle of equal rights and self-determination of peoples; to promote self-government and to secure the independence of all countries whose peoples desire it and are able to undertake its responsibilities, to continue to co-operate in the economic, social, and cultural fields in order to promote higher living standards, economic progress, and social well-being in this region; and to prevent or counter by appropriate means any attempt in the treaty area to subvert their freedom or to destroy their sovereignty or territorial integrity.

Upholding the principle of non-interference in the internal affairs of other States, the Council stressed the paramount need for the maintenance in peace of the integrity and authority of freely constituted governments in the area and of the right of peoples to determine their own destiny without external interference. They therefore condemned not only warlike action but also those subtle forms of aggression by which freedom and self-government are undermined and men's minds subverted.

This meeting has provided the members of the Council with an opportunity of bringing about closer co-operation among their Governments in achieving the purposes under the treaty. They believe that the treaty is already exerting a positive influence for the maintenance of peace in South-East Asia and the South-West Pacific, and that the solidarity of the member-nations, shown at the present meeting, will serve as an increasingly powerful deterrent against aggression. The Council recognized the continuing dangers to peace and security in the treaty area and agreed that these threats make it imperative that the member-Governments take steps to strengthen the common defence."

Defence against Subversion and Infiltration. "It was recognized that subversion and infiltration constitute a serious threat to the peace and security of the area, and that this demands special efforts in all aspects of the national life. The Council discussed specific attempts by elements directed from outside to subvert free institutions and governments in the treaty area. The Council viewed these subversive activities with grave concern and was determined to help the peoples of the area to resist them. There was agreement on the need for co-operation among the member-Governments to assist one another in combating the subversive activities of international Communism.

The Council decided to arrange for continuing consultation and mutual assistance and to make it possible for each member-Government to draw upon the experience of the others in dealing with this danger. In this connexion the Council received a valuable report on the Philippines' experience in combating internal dissidence and noted the statement of the U.K. delegation on the improved situation in Malaya."

Economic Questions. "The Council agreed upon the importance of implementing the article of the treaty which provides 'The parties undertake to strengthen their free institutions and to operate with one another in the further development of economic measures, including technical assistance designed both to promote economic progress and social well-being and to further the individual and collective efforts of governments towards these.' Arrangements were made for economic experts designated by member-Governments to meet periodically wherever appropriate and convenient on matters within the scope of this article.

The members of the Council recognized that while certain economic matters such as trade, international payments, development investment, and sound economic progress involved a wider geographic area and desirably included co-operation with many friendly States as well as with member-States, nevertheless special economic questions arise out of the treaty commitments of the member-Governments and may involve individual and co-operative steps which member-States could take to solve these questions. The economic experts designated will advise Council representatives on these measures. The first meeting of the economic experts will take place at an early date.

The Council noted with interest the statement by the U.S. delegation about the peaceful uses of atomic energy. The Council is deeply conscious of the potential contributions of atomic energy to the health and standards of living of the peoples of the member-nations and welcomed the proposed discussions relating to further co-operation and assistance in the atomic energy programmes directed towards achieving these benefits."

Indo-China. "Realizing the importance to the security of South-East Asia and the South-West Pacific of Cambodia, Laos, and the free territory under the jurisdiction of the State of Vietnam, the Council reaffirmed the determination of the member-Governments to support these three States in maintaining their freedom and independence as set forth in the protocol of the treaty. The Council was informed of assistance which had been extended to the three States and expressed the hope that member-Governments would offer further assistance."

Treaty Machinery.

"Having thus exchanged views, the members of the Council made the following arrangements to help carry out the provisions of the treaty.

Operation of the Council. The Governments will be represented on the Council by their Foreign Ministers or their designated representatives; the Council will meet at least once each year and more often when deemed necessary; it will usually meet in the treaty area; decisions of the Council will be taken by unanimous agreement.

Designation of Council Representatives. In order to assure close and continuing co-operation when the Council is not in session the Council has agreed to designate the Council representatives who will have their seat in Bangkok. The Council representatives will maintain continuing consultation on matters relating to the treaty, and will perform such special tasks as the Council may, from time to time, direct.

They may make agreed recommendations to the Council or, when it is not in session, to the member-Governments with respect to implementation of the treaty. Through the Council representatives the member-Governments may raise matters relating to the treaty and agree on the steps to be taken in carrying out its provisions.

The Council representatives may request the member-Governments to designate specially qualified personnel to assist them in specific tasks. Working groups composed of such personnel may meet here if appropriate and convenient The Council representatives will ensure appropriate exchange of information and close co-ordination of planning among such groups . . .

They will also make arrangements for a Secretariat to assist them, the personnel of the Secretariat being made available by the representatives on a contributed basis.

The Council directed that the Council representatives begin operations as soon as possible and that one of their first tasks should be to arrange meetings of specially qualified personnel designated by member-Governments to assist the Council representatives in considering means of strengthening co-operation in combating subversion and infiltration

The Council also requested the Council representatives to explore the opportunities for increasing cultural and technical co-operation among the member-Governments and to submit recommendations to the next meeting of the Council

Military Advisers. Each of the Governments agreed to designate a military adviser to its members of the Council The military advisers will make recommendations to the Council on military co-operation under the treaty. They will meet periodically as required, will formulate their own rules of procedure, and will make any necessary organizational arrangements.

The military advisers at the Council meeting met on Feb. 24-25. They exchanged views concerning the military aspects of the defence treaty and as a result of these discussions their staff planners will meet in Manila in April, 1955, to initiate plans for the implementation of certain military aspects of the treaty. Shortly thereafter the military advisers will again convene in Bangkok."

Peace and Security of the Area.

"Although they represent diverse nations and peoples, the members of the Council were unanimous in the belief that this meeting has enabled them to understand and appreciate the problems facing the Governments of the countries covered by the treaty in the common effort to ensure peace and security under the treaty. The progress achieved at this first Council meeting provides a solid basis for closer co-operation among the member-Governments for the good of the region as a whole. The members of the Council are united in their conviction that the common efforts of their Governments are contributing positively to the peace and security of the area, both for the member-Governments and for other free nations in the region. The Council expressed the hope that these free nations will associate themselves in the near future with the work to be undertaken under the treaty."

During the Ministers' discussions Mr. Dulles on Feb. 23 gave details of U.S. military strength in the Pacific, and also outlined the U.S. view of the various "fronts" in the defence of South-East Asia against Communism.

Mr. Dulles stated that, if new weapons were taken into account, the U.S.A. had now a greater potential strength in the Pacific than at the height of the war against Japan. In support of this statement he pointed out that there were now in the Far East 400 U.S. naval vessels, including the largest aircraft-carriers, with 350,000 men, including Marines; five U.S. Army divisions totalling 300,000 men, equipped with the latest weapons; and 30 U.S squadrons of jet fighters, bombers, and interceptors. with strategic air units in the U.S.A. capable of swift deployment.

Mr. Dulles also referred to the U.S. contributions to various countries in South-East Asia, mentioning the U.S. financing of 20 South Korean divisions at a cost of $500,000,000 - $600,000,000 a year, and of 300,000 Chinese troops on Formosa at an annual cost of $300,000,000, as well as expenditures of hundreds of millions of dollars per annum in support of Laos, Cambodia, and South Vietnam. In the latter connexion he stressed that all fronts against the Communist danger were "a part of the whole," that the anti-Communist forces in South Korea and Formosa formed part of South-East Asia's defences, and that not enough attention was paid to meeting the Communist menace "on a broad basis." "We must recognize," he was reported to have declared, "that the areas most vitally affecting the security of the Manila Pact Powers are not their own, but other areas—the Republic of Korea, Japan, the Republic of China (i.e., Formosa), Cambodia, Laos, and Free Vietnam."

Referring to the links between what he called the three Asian fronts against possible Communist aggression—the Korea-Japan front, the Formosa front, and the South-East Asia front—Mr. Dulles said that some Governments were critical of the regimes in South Korea and on Formosa, but, he pointed out, "we must recognize that these regimes are a further deterrent to Communist aggression." "Asia is three fronts," he added. "It is unlikely that any war started by Communist China would be confined only to Formosa or South Korea The forces on these two fronts exist as a common part of the forces deterring possible Communist aggression in South-East Asia" He also stressed that the Chinese in South-East Asian countries, with their great economic importance, would be much more likely to engage in internal subversion if they had no other focus for their Chinese loyalty than Communist China.

In connexion with suggestions made by the Philippine and Siamese Governments to the effect that U.S. troops should be stationed in their countries, Mr Dulles emphasized that the defence of the Western Pacific had to be viewed as a whole. He therefore deprecated the idea that U.S. forces in Asia should be "parcelled out" and said that it was better to keep mobile power available at focal points so as to be able to strike where attack would have the most effect.

Prior to the opening of the conference the Siamese Prime Minister, Marshal Pibul Songgram, had given a warning about the dangers threatening his country from Communist attack.

Addressing a Press conference on Feb. 22, Marshal Pibul Songgram said that 20,000 Communist "Free Thai" troops were massed in China close to Siam. The Thai rebels, who had set up a "Government" in Yunnan Province, might invade Siam through the Northern Laotian Provinces of Phongsaly and Samneua, which were controlled by the Communist-led *Pathet Lao*, the distance between the border of Yunnan and Siam being only 100 miles. "If we do not do anything about it," the Marshal went on, "Communism will move across the Mekong River, take over Siam, and dominate the whole of South-East Asia" He added that whilst Siamese troops could cope with the "Free Thai" forces, help would be needed if Communist China herself intervened. Siam therefore favoured the establishment of a permanent SEATO Army and would welcome SEATO armed forces on bases in Siamese territory.

During their stay in Bangkok Sir Anthony Eden and Mr. Dulles had a number of private conversations on the Formosa question. No statement was issued, but American sources suggested that the existing differences between the British and U.S. views had not been resolved.

Sir Anthony Eden's Visits.

On his way to Bankgok Sir Anthony paid brief visits to Cairo (Feb. 19-20) and Karachi (Feb. 21-22). Whilst in Cairo he had a long conversation at the British Embassy with Colonel Nasser, the Egyptian Prime Minister, and also saw Dr. Fawzi, the Foreign Minister, and Major-General Amer, the Minister of War. During his overnight stay in Karachi he had talks with Mr. Mohammed Ali, the Pakistan Prime Minister, and Mr. Ghulam Mohammad, the Governor-General.

After the conclusion of the Bangkok conference Sir Anthony Eden flew to Singapore, where on Feb. 27 he opened the annual conference of British Ambassadors, Ministers, High Commissioners, and Governors of Colonial territories in South and South-East Asia, the Far East, and the Pacific. On Feb. 28 he left Singapore for Kuala Lumpur, the capital of the Malayan Federation, and later the same day made a tour by helicopter of military establishments and units engaged in anti-terrorist operations; on his return to Kuala Lumpur he met members of the Executive Council of the Federation, as well as other Malayan political leaders.

After a brief stop at Rangoon, where he was welcomed by the Burmese Prime Minister, U Nu, and other members of the Burmese Government, Sir Anthony Eden arrived at New Delhi in the evening of March 2, and on the following day saw the Indian Vice-President, Dr. Radhakrishnan (in the absence of President Prasad), addressed members of both Houses of the Indian Parliament in a private session, and had a long conversation with Mr. Nehru, the Indian Prime Minister.

Speaking at a press conference on the Formosa situation, the Foreign Secretary said that "if some indications were given of a willingness to renounce the use of force on all sides," it would help "to establish conditions under which a settlement may be brought about by discussion and conciliation" Asked how soon a Formosa conference could be convened, Sir Anthony said that a good deal of groundwork had to be done to secure agreement on the objectives of such a conference and on the countries which should participate, and that India could play an important role in preparing the groundwork.

Asked whether it would be a violation of the Geneva agreement if Cambodia and Laos joined SEATO, the Foreign Secretary said it would be for the legal experts to express an opinion, but added that these countries had not been asked to join. Referring to the situation in Laos, he said that there was anxiety about the two Northern Provinces but that certain steps had recently been taken by the International Control Commission which might improve the situation.

During a State banquet on March 3 Mr. Nehru, after referring to the "symbolic character" of Sir Anthony Eden's visit, spoke on the new type of relationship between India and Britain.

"Our Vice-President this afternoon referred to the long history of contacts of India with England, a long history in which much had happened which was not agreeable to many people, which had even created bitterness And yet we meet here today, as we have met in the course of the last six or seven years here or elsewhere, in a spirit of friendship and co-operation. I have always thought that a rather remarkable thing and not easy to find a parallel in history. The Vice-President in his own way put his finger on the spot and said that we should have the capacity to forget what ought to be forgotten, and to remember what ought to be remembered. That is a very wise saying, because all of us have much to forget and have much to remember. If unfortunately we remember what we ought to forget, then there is difficulty; and if we forget what we ought to remember, that is bad And so this remarkable thing happened that, after a lengthy period of both good and ill, we came to an agreement, to a settlement, and forged a new type of relationship, which type in itself is a good example for others—that is, a relationship of being completely independent and yet representing an attempt to be friendly with each other, to co-operate with each other, and not to push each other against their will."

After referring to the Gandhian teaching that the means were more important than the end, Mr. Nehru said that in the present period of transition when there was ferment in the minds of men, the manner of approach to all problems was exemplified by the happy relationship that now existed between the U.K. and India. "We can meet," he continued. "We do meet often We discuss many problems. We agree often. We disagree sometimes, but that does not make any difference to our mutual regard for each other and our mutual respect for each other's *bona fides*, which is the main thing. And so, in effect, we agree far more than we might disagree and each has perfect freedom to continue along the lines of his own choice and find some kind of fulfilment."

In his reply, Sir Anthony Eden also spoke of the "historic occasion" of his visit, saying that it was the first time that the Foreign Secretary of the United Kingdom had been a guest of the Government of India in the Indian capital.

On March 4 Sir Anthony Eden arrived from Delhi in Baghdad, where he was received by King Feisal and had discussions with the Prime Minister, Nuri es-Said. [The joint statement issued after the talks will be recorded in a later article on Middle Eastern defence agreements.]

After a brief stay in Rome, where he saw Signor Scelba, the Italian Prime Minister, and Professor Martino, the Foreign Minister, Sir Anthony Eden returned to London on March 7.

Mr. Dulles's Visits.

Mr. Dulles, who on his way to Bangkok had paid a brief visit to Manila, where he saw President Magsaysay on Feb. 21, made a rapid tour of Burma and Indo-China after the Bangkok conference, and also visited Formosa.

Arriving on Feb. 26 at Rangoon, Mr. Dulles had a discussion with U Nu, the Burmese Prime Minister; he also visited the President of Burma, Dr. Ba U, and met other Burmese Ministers. Replying to journalists, who asked whether he had come to "woo U Nu," Mr. Dulles said that he had come to Rangoon "neither to woo nor to be wooed."

From Rangoon Mr. Dulles arrived on Feb. 27 at Vientiane, the administrative capital of Laos, where he saw Crown Prince Savang of Laos, the Laotian Prime Minister (M. Katay), and the Defence Minister (M. Souvanna Phouma). During his talks Mr. Dulles was reported to have said that in the American view there was no immediate danger of outright aggression against Laos, either from the Chinese or the Vietminh Communists, thanks to the Manila Treaty, but to have expressed concern about the internal progress of Communism in the *Lao Pathet*-held Provinces of Phongsaly and Samneua.

On Feb. 28 Mr. Dulles arrived in Saigon, having made a brief stop at Pnom Penh, the capital of Cambodia, where he visited King Norodom Sihanouk; he was reported to have told the King that the U.S. Government were ready to send officers to train the Cambodian Army, provided that they would have full responsibility and not be hampered by the French.

At Saigon Mr. Dulles had discussions with the South Vietnamese Prime Minister, M. Ngo Dinh Diem, to whom he promised the full support of the U.S.A. He also saw General Ely, the French High Commissioner (accompanied by M. Henri Bonnet), whom he assured that there was no desire on the part of the U.S.A. to supplant French economic interests in Indo-China, although the fact that the Indo-Chinese States were no longer tied to the French franc, were now receiving direct dollar aid from the U.S.A., and could therefore buy in the world markets (e.g., Japanese textiles), would inevitably lead to a weakening in the French economic position.

From Saigon Mr. Dulles flew to Manila, where on March 2 he opened a conference of U.S. Ambassadors in the Far East, and on March 3 he arrived at Taipeh, the capital of Formosa.

During his stay at Taipeh Mr. Dulles had a long discussion with General Chiang Kai-shek, Vice-President Chen Cheng, Mr. Yui, the Chinese Nationalist Prime Minister, and Dr. Yeh, the Foreign Minister. He also attended the ceremonial exchange of the ratification instruments of the mutual defence treaty between Nationalist China and the U.S.A.

In a Press statement before his departure later the same day, Mr. Dulles said that it was not possible now to state explicitly how the defence of the area covered by the mutual defence treaty would be conducted, but added: "I have made it clear that the U.S.A. will not enter into any negotiations dealing with the territories or rights of the Republic of China (i.e., Nationalist China) except in co-operation with the Republic of China." It could not be assumed, he went on, that the defence would be static, and confined to Formosa itself, or that an aggressor would enjoy immunity in respect of those areas from which an offensive was staged A decision on the use of U.S. armed forces would be made by the President of the United States himself, in the light of circumstances at the time and his appraisal of Communist intentions. The consultations, Mr Dulles emphasized, had also covered Quemoy and Matsu, "since these islands, now in friendly hands, have a relationship to the defence of Taiwan (Formosa) such that the President may judge their protection to be appropriate in assuring the defence of Taiwan and the Pescadores" Mr. Dulles concluded by saying that it was the "ardent hope" of the U.S.A. that the Chinese Communists would not insist on war as an instrument of their policy The Chinese Communists constantly professed a love of peace, he added. They now had a chance to practise what they preached The U.S.A. and the Republic of China had no alternative but to stand firm.

Prior to Mr. Dulles's visit to Formosa, Admiral Carney (U.S. Chief of Naval Operations), Admiral Stump (C.-in-C., U.S. Pacific Fleet), and Admiral Pride (Commander of the U.S. 7th Fleet) had arrived in Taipeh on March 2 for a conference on the military situation. It was reported afterwards that the chief decision taken had been to increase U.S. military aid to the Chinese Nationalists on a short-term basis, with accelerated deliveries of aircraft and long-range artillery. Admiral Carney himself stated after the talks that the defence of Formosa was no longer an academic question and had entered a more urgent phase.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris) **(Prev. rep. SEATO, 14062 F; U.S.-Chinese Treaty, 14007 C; Formosa, 14017 A.)**

A. INDIA. — Forward Bloc to rejoin Congress Party.

The central secretariat and the politburo of the All-India Forward Bloc decided at a joint meeting held on March 8 under the chairmanship of Sardar Mohan Singh, the party's chairman, to rejoin the Indian National Congress.

The reasons given for the decision were the recent adoption by the Congress Party of the aim of establishing a Socialistic pattern of society (see 13044 A); its "progressive and dynamic foreign policy" under Mr Nehru's leadership; and the need to do away with "the division of progressive elements into many small Socialist parties."

Active membership of the All-India Forward Bloc is said to exceed 40,000, and the number of general members 300,000. It has a strength of two in the House of the People. Its total strength in the State Legislatures is about 21, the biggest number being in West Bengal.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 14062 B.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves in February. - Deficit of $82,000,000.

The sterling area had a gold and dollar deficit in February of $82,000,000 after taking account of (*a*) $15,000,000 received in U.S. defence aid; (*b*) $6,000,000 received from the E.P.U. in respect of the January surplus; and (*c*) $2,000,000 paid to E.P.U. creditors in bilateral settlements. As a result, the gold and dollar reserves fell to $2,681,000,000 on Feb. 28.

Provisional figures for the E.P.U. February settlement showed that the U.K. had a surplus of $5,600,000 (£2,000,000) which would be settled in March.—(Treasury Press Office) **(Prev. rep. 14021 A.)**

C. ALBANIA. — Rejection of U.S. Food Offer.

It was announced in Tirana on March 7 that the Albanian Government had rejected an offer made by President Eisenhower on March 4 to send U.S. food supplies to Albania in order to help alleviate the "current food shortage" in that country. The offer had been transmitted through the League of Red Cross Societies. The Albanian News Agency said that "the alleged American aid is unacceptable to the Albanian people, who reject with contempt this foreign interference in their own affairs."—(New York Times - New York Herald Tribune) **(Prev. rep. U.S. Aid to Iron Curtain Countries, 13884 A.)**

A. UNESCO. — Eighth General Conference. - Admission of New Members. - Amendments to Staff Regulations. - Suspension of U.S. Employees. - M. Maheu appointed Deputy Director-General. - Formation of International Scientific Research Council. - International Travel Coupons Scheme for Students. - Convention on Protection of Art Treasures in Wartime.

The eighth general conference of the U.N. Educational, Scientific, and Cultural Organization (UNESCO), attended by delegations from 69 of the 72 member-countries, was held at Montevideo from Nov. 12 to Dec. 10, 1954, under the chairmanship of Dr. Radhakrishnan, the Vice-President of India and leader of the Indian delegation. The Soviet Union, the Ukraine, and Byelorussia were represented for the first time, and Czechoslovakia, Poland, and Hungary for the first time since 1951. The main decisions adopted by the conference are summarized below.

Membership. A decision on membership applications by Rumania and Bulgaria, which had been approved by the U N. Economic and Social Council and the Executive Board of UNESCO, was postponed on Nov. 13 until the next general conference in 1956, the voting in favour of deferment being 28 to 12 in the case of Rumania and 29 to 11 in the case of Bulgaria. Rumania's admission was opposed by the U.S delegation, which accused that country of "flagrant violations of human rights and fundamental freedoms" (see 13729 A), and by Israel, on the ground of alleged persecution of Zionists (see 13820 A), as well as by Belgium, Brazil, Canada, Colombia, Italy, and Lebanon; the Soviet Union, Czechoslovakia, Poland, Denmark, and Yugoslavia supported Rumania's application, whilst several Latin American and Middle Eastern countries abstained from voting. The debate on Bulgaria followed similar lines. Albania's application for admission was rejected by the Economic and Social Council on Nov. 22 by 10 votes to eight.

The conference unanimously approved the admission as UNESCO's first associate members of a number of British Colonial territories, viz., the Gold Coast, Sierra Leone, the Federation of Malaya, the British Borneo group (Sarawak, North Borneo, and Brunei), and the British West Indies group (Jamaica, Trinidad, Grenada, Dominica, and Barbados). A Soviet proposal for the exclusion of Nationalist China and the admission of Communist China in its place was rejected.

Paraguay announced its adherence on Nov. 22, bringing the number of member-countries to 73.

Official Languages. It was decided to make Russian one of the languages of the conference as well as of the Executive Board, on which the Soviet Union obtained a seat for the first time (see below).

Finance. The conference approved an expenditure of $21,617,830 for the two years 1955-56 by 47 votes to 14, despite a plea by the British delegation for economy; this was the largest budget yet voted, comparing with $18,712,964 for 1953-54.

The U S. contribution was reduced from 33⅓ per cent to 30 per cent by 34 votes to 15 with two abstentions, Britain being among the countries voting against. The British contribution was also reduced, from $2,000,000 to $1,600,000 (about 7½ per cent). The Soviet Union's contribution was fixed at 13½ per cent, the Soviet delegation's proposal that it should be only 10 per cent, in view of the Soviet Government's difficulty in obtaining foreign currency, being rejected by 37 votes to three, with five abstentions.

Programme. Mr. Adiseshiah, Assistant Director-General of UNESCO, reported that about 300 requests had been received since 1951 for expert advice in developing the educational or scientific facilities of 48 countries; that about 350 experts had been sent to member-countries during this period; that 57 educational and scientific projects were in progress in 36 countries; and that 140 experts were in the field on technical assistance projects, 60 per cent of whom had been on location for over a year and 25 per cent for over four years. In addition, 329 fellowships had been granted to nationals of member-States, so that they could be trained to take over the duties of UNESCO specialists as quickly as possible; as a result the Governments concerned would continue the work begun by UNESCO through 28 projects which were due for completion by the end of 1954 or early in 1955.

The conference decided on a considerable reduction in the number of projects sponsored, 72 per cent of the total budget being appropriated for the continuation of projects already in progress. In the programme as approved the main emphasis was laid on fundamental, technical, and scientific education, scientific research (including projects for research into the problems of arid zones and into the peaceful uses of atomic energy), and scientific documentation centres.

Executive Board. The conference approved by a large majority a proposal put forward by the U.S.A., Britain, Australia, and Brazil, whereby the 22 members of the Executive Board, who had hitherto been elected by the general conference solely for their personal qualifications and not as representatives of their respective countries, would in future be nominated by their Governments and act as their spokesmen In support of this proposal (which had first been made by Britain in 1950) it was argued that it would give the Organization's decisions more weight and was desirable in the interests of responsible administration; strong opposition was expressed, however, by the French delegation, which maintained that it would deprive UNESCO of its neutral and non-political character, and would result in its being subjected to political pressure.

Dr. A. L. Mudaliar (India), Vice-Chancellor of Madras University, was selected by lot as chairman of the new Executive Board, after he had received the same number of votes as Dr. Vittorio Veronese (Italy) at a second ballot. Dr Veronese and Prof. Secco Ellauri (Uruguay) were elected vice-chairmen.

The other elected members of the Executive Board were: Dr. Awad (Egypt), Dr. Bender (Netherlands), Professor Carneiro (Brazil), Dr Estelrich y Artigues (Spain), Dr. Ferrara Marino (Cuba), Mr. Toru Haguiwara (Japan), Professor Johannes (Indonesia), Professor Henri Laugier (France), M Luan Pin Malakul (Siam), Mgr. Maroun (Lebanon), Dr Martinez Cobo (Ecuador), Professor Massaquoi (Liberia), Professor Jakob Nielsen (Denmark), Dr. Raadi (Persia), Dr Maria Schluter-Hermkes (Germany), Mr Sharif (Pakistan), Dr. Solodovnikov (Russia), Dr. Spilhaus (U S A.), and Sir Ben Bowen Thomas (U.K.)

Resolution on Peaceful Co-operation. The conference adopted by acclamation a resolution submitted by the U.S.A , Czechoslovakia, and India, which recalled the objectives of UNESCO; recognized that international tensions were impeding their realization; and declared its faith in the possibility of resolving all such tensions by peaceful means, through the exercise of restraint, tolerance, and goodwill.

Resolution on Freedom of News. A resolution calling on all member-countries "to assure freedom of expression and to remove barriers to the free flow of undistorted information" was adopted unanimously on Dec. 8. The resolution had been sponsored by Britain, France, the U.S.A., and the Soviet Union, as well as by Canada, Colombia, Czechoslovakia, Ecuador, India, Lebanon, Liberia, and Mexico, but during the debate the U S., delegate (Representative Hugh Scott) expressed concern over its wording because it referred to the free flow of "undistorted" information rather than to the free flow of information. This expression, he pointed out, "might be used as a pretext to impede rather than encourage the free flow of information" and "conjured up the spectre of censorship, Government control, and artificial restrictions upon the Press, radio, and films," which was "repugnant" to the American people. Nevertheless, Mr. Scott stressed that with this "important reservation" the U S.A. firmly supported the resolution. The Soviet delegation had previously presented a draft resolution calling for "measures to prevent the use of means of mass communication for war propaganda," but withdrew this in favour of the above resolution.

Next Conference. As UNESCO's permanent headquarters in Paris would not be ready in time for the next general conference in 1956, it was decided to accept the Indian Government's invitation to hold the conference in Delhi.

The most controversial issue raised at the conference was a proposal put forward by Dr. Luther Evans, Director-General of UNESCO, that the staff regulations should be so amended as to enable him to dismiss any employee in whom he had lost confidence.

Dr. Evans's proposals were the result of a prolonged controversy arising from investigations by the U.S. authorities into UNESCO employees of American nationality suspected of subversive activities. Mr. David Leff, a U.S. citizen employed by UNESCO in Paris, whose passport had been confiscated by the U.S authorities in 1951, refused in 1953 to obey a subpoena to appear before a Grand Jury in New York, on the ground that he might not be allowed to return to his family and his work, though he offered to give his testimony at the U.S. Embassy in Paris. In December of that year Dr. Evans ordered Mr. Leff to obey the subpoena, but subsequently agreed to suspend the order as a result of protests from the staff association, and on March 8, 1954, the UNESCO appeals board ruled that it was invalid. On March 11 proceedings against Mr. Leff for contempt of court were instituted in New York, and Dr Evans accordingly ordered him on March 22 to answer the charge Mr. Leff then appealed to the administrative tribunal of the International Labour Organization to rescind the order, maintaining that it was in substance the same as that previously issued by Dr. Evans and was therefore invalid. The tribunal, however, while upholding the appeals board's judgment on Dr. Evans's order of December 1953, ruled that, for procedural reasons, it was not competent to deal with the order of March 22 and referred the matter to the UNESCO appeals board

The dispute was further complicated by the refusal of seven out of the 15 U.S. employees of UNESCO in Paris to appear before a U.S. loyalty board in July, 1954 (see 13766 A). Dr Evans subsequently announced on Aug. 23 that four of these, including Mr. Leff, would not have their contracts renewed when they expired at the end of the year, and that he would raise the question of the other three, whose contracts were of indefinite duration, at the general conference. This decision was strongly criticized in October by Mr. Henry Cabot Lodge, head of the U.S. delegation to the U.N , who declared that Dr. Evans should have dismissed all the employees concerned, and accused him of hindering the Government's loyalty investigations. The UNESCO appeals board on Nov. 5, however, upheld an appeal by Mr. Leff and his three colleagues against their dismissal, on the ground that the Director-General had exceeded his powers.

The amendments to the staff regulations proposed by Dr. Evans empowered the Director-General to dismiss UNESCO employees if their conduct did not meet the highest standards of integrity, efficiency, and competence, or "if facts anterior to the appointment of a staff member and relevant to his present suitability and which reflect on his present integrity come to light, which if they had been known at the time of appointment should have precluded his appointment." They also restricted the exercise of political activities by employees

to the right to vote in elections. The conference approved the amendments on Dec. 1 by 34 votes to 10, with five abstentions, France, Belgium, the Netherlands, Switzerland, the Soviet Union, Byelorussia, the Ukraine, Poland, Czechoslovakia, and Hungary voting against.

Under the new regulations, which came into effect on Dec. 8, Dr. Evans, on Dec. 10, placed Mr. Leff and his colleagues on leave with pay until the expiry of their contracts, and suspended the three employees with long-term contracts pending hearings by a special advisory board.

Other recent UNESCO activities are summarized below under cross-headings.

International Scientific Research Council. The Executive Board approved on Dec 3, 1953, the formation of an international consultative council for scientific research, which among other activities would concern itself with cancer research, in co-operation with the World Health Organization.

Agreement on Duty-free Exchange of Books, etc. The British Government, on March 11, 1954, ratified the agreement of Nov. 22, 1950 (see 11239 E), providing for the exemption from Customs duties of books, newspapers, periodicals, works of art, musical scores, newsreels, educational films, scientific equipment consigned to approved institutions, and articles for the blind The French Government had previously put the agreement into effect on Nov. 2, 1953.

International Travel Coupons for Students. A system of international travel coupons sponsored by UNESCO, intended to enable students, teachers, and cultural and research workers from soft currency countries to study in hard currency areas, came into operation on March 24, 1954. Under this system intellectual workers whose applications were approved would be able to exchange their currency at the official rate for international travellers' cheques, issued by UNESCO and valid in hard currency countries participating in the scheme.

Conference on Protection of Art Treasures in Wartime. An intergovernmental conference on the protection of art treasures in wartime was held at The Hague, under the auspices of UNESCO, from April 21 to May 13, 1954, being attended by representatives of 46 countries, including the Soviet Union, the Ukraine, Byelorussia, Czechoslovakia, Poland, Hungary, and Rumania.

A convention adopted by the conference (to replace an earlier convention of 1907) provided that each of the contracting parties should respect cultural property situated within the territory of another contracting party, except in the case of imperative military necessity, and that cultural goods might be removed in wartime, at the request of the country concerned, under UNESCO's protection, such goods being marked by a solid blue equilateral triangle on a white circle A protocol which was also adopted laid down rules for the recovery and restitution of cultural goods removed by an enemy during an occupation.

The Soviet delegation proposed that the convention should forbid the use of atomic and other weapons of mass destruction, and also objected to the reference to "imperative military necessity" as a justification for the destruction of cultural property. This objection, however, was overruled by 20 votes to seven, with 14 abstentions, after the British delegation had argued that the convention must be "realistic."

The convention, which was signed by 44 of the 46 delegations, including those of Britain, France, the U.S.A., and the Soviet Union, will come into force upon ratification by five of the signatory countries.

Universal Copyright Convention. The U.S. Government ratified the Universal Copyright Convention (see 12639 B) on Nov. 7, 1954. The convention, which will enter into force after ratification by 12 countries, had previously been ratified only by Pakistan, Laos, Cambodia, Haiti, and Andorra.

M. René Maheu, who had acted as head of the Director-General's office since 1948, with special responsibility for the planning and organization of the various bodies dependent on UNESCO, was appointed to the new post of Deputy Director-General by the Executive Board on July 23, 1954. M. Maheu (49), a former lecturer on philosophy at Cologne University, the *Institut Français* in London, and the Franco-Moslem Moulay-Ydriss College in Morocco, had entered the service of UNESCO in 1946 as head of the Information Department.
(United Nations Review, New York - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune) **(Prev. rep. General Conference, 12680 A; Membership, 13783 B; Employees, 13766 A.)**

A. UNITED STATES. — Employment and Unemployment Figures.

The number of employed persons in the United States in December 1954 (over 14 years of age, but excluding the armed forces) was 60,688,000 (compared with 62,098,000 in June), of whom 5,325,000 were employed in agriculture. Unemployed persons numbered 2,838,000 at the end of the year, compared with 3,347,000 in June. An indication of the size of the armed forces was given by the difference between the total labour force and the civilian labour force, which amounted in December to 3,285,000.—(Federal Reserve Bulletin, Washington) **(Prev. rep. 13748 A.)**

B. SOVIET UNION. — Further Government Changes.

Further changes in the Soviet Government were announced in Moscow on Feb. 28, three weeks after the replacement of M. Malenkov as Prime Minister by Marshal Bulganin. Three Deputy Premiers—M. Mikhail Pervukhin, M. Anastas Mikoyan, and M. Maxim Saburov—were promoted to First Deputy Premiers, and four new Deputy Premiers—Colonel-General A. P. Zavenyagin, M. V. A. Kucherenko, M. Pavel Lobanov, and Lieut.-General Mikhail Khrunichev—were appointed. It was also announced that M. Malyshev (already a Deputy Premier) had been given charge of a group of Ministries dealing with machine building and had been replaced as Minister of Medium Machine Building by Colonel-General Zavenyagin.

Of the promoted and newly appointed Ministers, **M. Mikoyan** had been Minister of Trade until his resignation in January (see 14026 B) **M. Pervukhin** was Minister of Electric Power Stations and the Electrical Industry, and **M. Saburov** chairman of the State Planning Commission, at the time of their reappointment as Deputy Premiers in M Malenkov's Cabinet in December 1953 (see 13342 B). **General Zavenyagin,** a candidate member of the Central Committee, was director of the Magnitogorsk metallurgical plant until 1937, when he was appointed First Deputy Commissar of Heavy Industries, after the war he was for a time Deputy Minister of Internal Affairs in Marshal Stalin's Government **General Khrunichev,** a member of the party's Central Committee, became Minister of the Aircraft Industry in 1946 (see 7797 A) and since 1953 had been Deputy Minister of Defence Industry. **M. Lobanov** was appointed a First Deputy Premier and Minister of Agriculture in the Russian Federated Republic in 1954, having previously been Soviet Deputy Minister of Agriculture. **M. Kucherenko** was formerly a Deputy Minister concerned with the construction of engineering plants.

It was pointed out in the British and U.S. Press that the changes had the effect of making membership of the higher governmental offices more nearly identical with higher party offices, since all the three newly appointed First Deputy Premiers were also members of the Presidium of the Central Committee of the Communist Party (the old Politburo). The Communist Party leadership and principal members of the Soviet Government following the recent changes are as follows.

Communist Party. The leadership consists of the First Secretary (M Khruschev), the Presidium of the Central Committee, and the Central Committee of 125 members The Presidium of the Central Committee has the following nine members · M Khruschev, Marshal Bulganin (the Premier), Marshal Voroshilov (President of the Soviet Union), M. Molotov, M. Kaganovich, M. Pervukhin, M. Saburov, M Mikoyan, M Malenkov

Council of Ministers. This comprises the Premier, five First Deputy Premiers (M. Molotov, M Kaganovich, M Mikoyan, M Saburov, M Pervukhin), eight Deputy Premiers (M. Malyshev, M Kosygin, M. Tevosyan, M. Malenkov, General Zavenyagin, M. Kucherenko, M Lobanov, General Khrunichev), and 49 Ministers. The Premier and the five First Deputy Premiers constitute the Presidium of the Council of Ministers, a kind of inner Cabinet.

The First Deputy Premiers and the Deputy Premiers are normally put in charge of a major Government department or of a group of related Ministries, and the *New York Times*, in an analysis of the changes, suggested that on the basis of what was already known and the past experience of the members of the Government the allocation of responsibilities in the new Cabinet was as follows Foreign Affairs —M Molotov; Transport—M. Kaganovich, Trade—M. Mikoyan, Economic Planning—M. Saburov; Fuel Industries—M Pervukhin, Machinery Industries—M Malyshev, Consumer Goods—M. Kosygin, Metallurgy—M. Tevosyan, Electric Power—M. Malenkov; Medium Machine Building—General Zavenyagin; Factory Construction—M Kucherenko; Agriculture—M Lobanov; Conventional Weapons —General Khrunichev. It was also reported in the Western Press that the Ministry of Medium Machine Building was in fact the Soviet agency responsible for the development of atomic energy.

The dismissal of two Soviet Ministers—M. Zasyadko (Coal Industry) and M. Kozlov (State Farms)—was announced by Moscow Radio on March 2. M. Zasyadko, who was dismissed for "unsatisfactory work," was succeeded by M. A. S. Zademidko, Deputy Minister of the Coal Industry for the past two years, whilst M. Kozlov, dismissed because he "failed to cope with his work," was replaced by M. Ivan Benediktov, the Minister of Agriculture (see 13167 A, 7797 A) and for some months in 1953 Ambassador to India; M. Benediktov, the announcement stated, had been released from his duties as Minister of Agriculture on assuming his new post.—(Soviet Weekly - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. 14059 A.)**

C. BRITISH WEST INDIES. — New Governors of Trinidad and the Windward Islands.

Sir Edward Beetham, Governor of the Windward Islands, was appointed Governor of Trinidad and Tobago on Feb. 10 in succession to Major-General Sir Hubert Rance, retiring. On March 3 it was announced that Mr. Colville Montgomery Deverell, Colonial Secretary in the Jamaican Government, would succeed Sir Edward Beetham as Governor of the Windward Islands.—(Times) **(Prev. rep. 13055 D; 10480 C.)**

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Decisions of January Council Meeting. - Repayment of French E.P.U. Debt. - Reports on U.S. Overseas Investment and European Recovery. - Yugoslav Observer. - Resignation of M. Marjolin.

The Ministerial Council of the O.E.E.C. met in Paris on Jan. 13-14 under the chairmanship of Mr. R. A. Butler, the British Chancellor of the Exchequer. As at its meeting in May, 1954, its deliberations were largely concerned with (1) the movement towards the reintroduction of convertibility of sterling and the other main European currencies (including the associated question of setting up a European Fund), and (2) the extension of trade liberalization. The discussions and decisions on these two matters are summarized below.

Convertibility.

The Ministerial Group set up in May, 1954, to study the problems connected with the reintroduction of convertibility by member-countries, approved a report on its conclusions on Jan. 12, and presented it to the full Council on the following day.

Mr. Butler announced on Jan. 14, in connexion with the eventual reintroduction of convertibility, that the Council had decided to set up a European Fund of between $500,000,000 and $600,000,000 to provide short-term credits for any member-country adversely affected by the convertibility of the currency of one or more of its neighbours. The Fund would be financed partly by contributions from members of the E.P.U. and partly from the residual funds of the Union itself, and the Managing Board of the E.P.U. had been instructed to submit a report by April 16 outlining the conditions for the formation of the Fund and the arrangements to be made for the eventual transition from the E.P.U. system to that of the European Fund. The Council had also decided that the E.P.U. itself should be continued beyond June 30, 1955, for a further year, and had instructed the E.P.U. Managing Board to report by April 16 on the conditions on which the E.P.U. agreement should be renewed.

Mr. Butler said that all the members of the Council were of the opinion that the essentials for convertibility were a general absence of inflationary pressures and a "code of behaviour" in trade and payments. In this connexion it was reported in the Press that the Council had also agreed that the Ministerial Group's study of the trade measures which should accompany convertibility should remain uncompleted until the ninth session of the General Agreement on Tariffs and Trade (GATT)—then meeting in Geneva—had ended.

Trade Liberalization.

During the Council's discussions M. Edgar Faure (then French Minister of Finance and Economic Affairs) announced that, in view of France's economic progress, she would liberalize, as from April 1, 75 per cent of her total imports and at least 60 per cent in each of the three main categories (i.e. raw materials, agricultural products, and manufactured goods). He explained that in fact France had already tentatively freed about 75 per cent of her imports from quantitative restrictions, but that this percentage would not become formally operative until April 1.

The Council subsequently agreed on the introduction of further liberalization measures and on the abolition of artificial export aids by member-countries.

Trade with Other Member-Countries. The Council decided :

(*a*) that within six months of April 1 (the date by which France had undertaken to reach the obligatory proportion of 75 per cent), O.E.E.C member-countries should free at least 90 per cent of their total imports from other members, and at least 75 per cent of imports in each of the three main categories ;

(*b*) that within three months of April 1, member-countries should in any event abolish quantitative restrictions on 10 per cent of those imports not free of such restrictions on June 30, 1954. (This meant that a country which had liberalized 92 per cent of its imports would be required to liberalize a further 0.8 per cent.)

Both decisions would be experimental, and member-countries unable to adopt the whole of these liberalization measures would be required to notify the O.E.E.C. of the reason within six months of April 1. Moreover, at the end of 18 months the Council would consider whether any amendments should be made, and any member-country which considered itself unable to continue to abide by the requirements would be able to retract.

Trade with the Dollar Area. It was decided that member-countries should inform the O.E.E.C. of any new measures which they took regarding restrictions on imports from, and invisible transactions with, the U.S.A. and Canada. In addition, periodic examinations of the policies followed in this respect both by member-countries and by the U.S A. and Canada would be undertaken, and the first report would be submitted to the Council before June 30, 1955.

Artificial Aids to Exporters. The Council approved a list of artificial aids to exporters which were to be discontinued by member-countries by Dec. 31, 1955. In the meantime, member-countries were forbidden to introduce new measures of a similar nature or to extend existing measures. The list enumerated the following artificial aids .

(*a*) currency retention schemes or similar practices which involved a bonus on exports or re-exports ;

(*b*) direct government subsidies to exporters ;

(*c*) the remission, calculated in relation to exports, of direct taxes or social welfare charges ;

(*d*) the remission or repayment, in respect of exported goods, of indirect taxes, to an amount exceeding that paid on the same products if sold for internal consumption ;

(*e*) the charging of insurance premiums for government export credit guarantees otherwise than in accordance with sound insurance principles ;

(*f*) charges below world prices in respect of deliveries by Governments or government agencies of imported raw materials for export business on terms different from those for domestic business.

Greece and Turkey were exempted from both decisions and France from the decision to abolish existing artificial aids by Dec. 31, but the French Government was asked to submit a report on France's economic position by Sept 30. In the light of this report, and of another by the Steering Board for Trade to be presented before Dec. 1, the Council would then decide when the decision was to apply to France.

Other Decisions.

The "Green Pool." The Council accepted the recommendation of the governmental representatives who met in July, 1954 (see 13778 A) to the effect that the "Green Pool" plan should be entrusted to the O E.E.C., and decided to set up a Ministerial Committee for Agriculture and Food. This Committee—the first O.E.E.C. committee to be set up at full Ministerial level—would periodically examine the problems of member-countries in the spheres of food and agriculture, and decide on measures to be taken by the responsible Ministers within the limits of their national competence.

An agreement with the Spanish Government, permitting Spain to take part in the work of the O.E E.C. in so far as it related to agriculture, was approved by the Council Spain will be able to send a full member to meetings of the Ministerial Committee, or of its committee of deputies, and an observer to Council meetings discussing agricultural matters.

Italian Economic Development. The Italian Minister of the Budget (Signor Vanoni) outlined his Government's 10-year Economic Development Programme—the "Vanoni Plan"—which aims to provide 4,000,000 new jobs in Italy by 1965, to balance the Italian economy, and to raise the standard of living in southern Italy Recognizing that it was "of importance for all member-countries that a satisfactory solution should be found for the problems to which the programme is directed," the Council set up a working committee to study the plan and to report as soon as possible both on the plan itself and on measures which might be taken by member-countries and by the O.E.E.C. to further its implementation.

French E.P.U. Debt. M. Faure announced that the French Government would immediately repay $80,000,000, i.e that part of its debt to the E.P U. which was not covered by the bilateral and amortization agreements of June, 1954. Repayment would be made on the settlement date for the January, 1955, operations, and would be apportioned between France's creditors as follows .

(million units of account)

Austria . .	3.241	Portugal ..	0 482
Belgium-Luxemburg	10.928	Sweden	2 967
Germany . ..	36.683	Switzerland .. .	12 350
Netherlands .. .	13.349		

It was pointed out by the O.E E.C. that, as a result of this settlement, the margin available to France within the Union for settling any deficit on the basis of 50 per cent gold and 50 per cent credit would be increased by double the amount of the repayment (i.e. $160,000,000) At the same time, each creditor country's claim on the E P.U. would be reduced by the amount of repayment it received, and its cumulative accounting surplus would be reduced by double that amount. On each side, therefore, the margins available within the E.P.U. for the settlement of new surpluses of deficits would be increased.

Other developments relating to the O.E.E.C. in recent months are described below :

U.S. Private Investment. A report on the role of U.S. private investment in the world economy, and in particular in the economies of O.E.E C. member-countries and their overseas territories, was published on Jan. 3, 1955.

The report—prepared after a meeting between members of the O.E E.C. Economic Committee and U.S. businessmen—said that "the most striking fact" emerging from the study was that the growth of U.S. private investment abroad since 1930 "has not kept pace with the growth of the U.S. economy, or even with that of the world economy." Whereas throughout the 1920s private American investors were investing in foreign countries at an average annual rate of $800,000,000 ("equivalent to about $1,600,000,000 in terms of present prices"), their net investment in the years 1947-53 had reached an annual average of only $859,000,000—"a figure hardly greater than that of the years 1926-30 in current dollars, and much lower in terms of dollars with constant purchasing power." Accordingly, private American long-term capital invested abroad, which in 1927-28 accounted for about 20 per cent of the total dollar receipts (excluding grants) of the rest of the world, had accounted for only about 6 per cent since the war.

The geographic distribution of the capital invested (said the report) had also changed. In 1929, nearly 20 per cent of direct U S. investment abroad had been in Europe, but by the end of 1952 this proportion had fallen to about 14 per cent; the relative importance of O E.E.C. countries as recipients of such capital had therefore "strikingly declined" Two-thirds of U S. private investment since the war had been in Canada and Latin America, against only 10 per cent in O.E.E.C. countries, and less than 3 per cent in their overseas territories.

The total net outflow of U.S private long-term capital to member-countries in 1947-53 had been about $668,000,000, or an annual average of $98,000,000. On the other hand, during the same period, U.S. income from past investments in member-countries had amounted to $1,914,000,000, of which $904,000,000 had been reinvested and $1,010,000,000 (or an annual average of $144,000,000) had been repatriated. In overseas territories of O.E.E.C. countries new private long-term capital from the United States had been about $32,000,000 a year and reinvested earnings about $28,000,000 a year, whilst earnings repatriated had amounted to about $82,000,000 a year.

In the world as a whole, 48 per cent of U S. direct investment abroad since the war had taken place in the petroleum industry. In a reference to the large volume of investment in Canada and Latin America, the report said that much of this had been due to "the strong appeal of petroleum which has attracted vast sums of American capital in areas not normally famous for the pleasantness of their investment climate" In the O.E.E C. member-countries, the petroleum industry had absorbed only about 25 per cent of total U.S. investment in the area, whilst manufacturing industry had attracted nearly 60 per cent.

The report stated that the counter-attraction of investing in the U.S.A. and Canada was the most powerful deterrent element to U.S. investment in Europe and overseas territories; other deterrents included the possibilities of war or revolution, blocked funds, depreciating currencies, the fear of expropriation, and the "widespread belief that business operations are impeded by all sorts of governmental controls and cartel-like arrangements" After declaring that "the American capital market is not interested in European issues," the report drew the conclusion that, "if the United States investor is to cross the Atlantic, he will have to be wooed aggressively."

Current Power Problems. It was announced on Dec. 23, 1954, that the O.E.E.C. was becoming increasingly concerned about the continued rise in current power production costs and the effect which this would have on the evolution of the European economy and the financial stability and living standards of member-countries. The Organization had therefore appointed M. Louis Armand, director-general of the *Société Nationale des Chemins de Fer Français* and a member of French organizations dealing with energy policy, to study these problems in detail, to decide how they should be dealt with both on the national and the inter-governmental level, and to submit a report to the O.E.E.C. Council.

European Productivity Agency. The second annual "programme of action" of the European Productivity Agency was published on Sept. 29, 1954. The programme, which was divided into three parts dealing respectively with problems relating to industry and commerce, to agriculture, and to factors affecting both, placed great emphasis on the need for wider dissemination of information in these spheres. Among the subjects selected for study in connexion with the Agency's practical research into the economic and social factors of productivity were statistics and productivity measurement, banking and credit, fiscal legislation and market structure, and the effect of systems of remuneration and marketing on the mobility of labour.

Building Efficiency. One of the projects from which significant results were expected by the European Productivity Agency was that concerned with research into the improvement of building efficiency, in connexion with which a meeting, organized by the Agency, was held in London on Oct 11-15. Attended by delegates from 12 countries—Austria, Belgium, Denmark, France, Western Germany, Greece, Italy, the Netherlands, Norway, Sweden, the U.K., and the U.S A.—the meeting was chiefly concerned with "modular co-ordination," a system under which the sizes of all building materials, components, and equipment are co-ordinated in terms of a fixed basic dimension known as the "module." [The architect works on a grid plan drawn to the scale of the "module," and the building worker on the site merely assembles components which—though they may come from different sources—are all designed to fit each other.] Results of further research into this system will be discussed at a meeting to be held in Paris in 1955

Post-war Economic Achievements. A survey showed that production per head had expanded twice as much in Western Europe during 1947-52 as it had done in the U S A , although, owing to the progress made during the Second World War, the U S.A was still more than 50 per cent ahead of Western Europe in terms of total expansion since 1938 These facts were set forth in *Statistics of National Product and Expenditure, 1938, 1947 to 1952*, published by the O E.E.C. on Sept. 14, 1954 By 1952, output per head in the U.S.A was 70 per cent higher than in 1938, while in Western Europe it was only 10 per cent higher.

The survey showed also that as early as 1948 Western Europe, with an 8 per cent higher population than pre-war, had largely regained the 1938 volume of total gross national product, consumption, and investment, whilst on a *per capita* basis the 1938 volume of gross national product had been reached by 1949 and that of personal consumption by 1950. Consumption had continued to rise by 1 per cent a year in 1951 and 1952, despite the sharp increase of 50 per cent in defence expenditure between 1950 and 1952

As regards progress in individual countries, Britain and the Scandinavian countries had reached or surpassed the pre-war level of output per head by 1947, whereas the member-countries of the European Coal and Steel Community (France, Western Germany, Italy, and the Benelux nations) were then still over 25 per cent short of such an achievement. In the years 1947-52, on the other hand, output per head had risen by 40 per cent in the E.C.S C area, whereas few other O E.E.C. countries had achieved as much as a 20 per cent increase in this period. As regards consumption per head, Britain had achieved the pre-war level by 1947 and remained at that level until 1952 , Italy did not reach the 1938 level until 1951; and Western Germany did not surpass the 1936 level until 1952. No figures were available to compare consumption per head in the Netherlands with a pre-war level.

Gross domestic capital formation in Western Europe, which in 1938 amounted to 15 per cent of total output, had by 1952 increased its proportion to 18 per cent—the same as in the U S A , whose pre-war percentage, however, was only 11 per cent

Yugoslav Representation in O.E.E.C. It was announced in Paris on March 3, 1955, that Yugoslavia would be represented by an observer at meetings of the O E E.C Council, and also on technical committees and sub-committees of the Organization.

It was announced on Nov. 10 that M. Robert Marjolin, who had been Secretary-General of the O.E.E.C. since its inception in 1948, had expressed the desire to retire in 1955 for personal reasons.—(O.E.E.C. Information Division, Paris - Times - Financial Times - Le Monde, Paris - Neue Zurcher Zeitung) **(Prev. rep. O.E.E.C. Council, 13778 A; E.P.U. etc., 14014 A; Reports, 13934 A.)**

Note. The following table was prepared by the O.E.E.C. Statistical Division to show the progress made in certain important sectors of the European economy since the inception of the O E.E.C. in 1948.

	Industrial Production Indices: 1950 = 100		Agricultural Production (total output for human consumption) Indices: (pre-war = 100)		Prices and Wages Indices (1950 = 100) Wholesale prices		Consumer prices		Wages		Trade Average value indices (1950 = 100) (a) Imports		(b) Exports		Terms of trade (b : a)

* July-Dec. † 1949.

(New York Herald Tribune)

A. UNITED STATES. — The 1955-56 Budget. - Expenditure of $62,408,000,000. - Estimated Deficit of $2,408,000,000. - President Eisenhower's Budget Message.

President Eisenhower submitted to Congress on Jan. 17 his Budget proposals for the fiscal year 1956 (July 1955 to June 1956). Total expenditure was estimated at $62,408,000,000 (of which $40,458,000,000, or 65 per cent, was for national security) and revenue at $60,000,000,000, leaving a budgetary deficit of $2,408,000,000. Detailed estimates of expenditure and revenue are shown in the following table:

	Actual 1954	Estimate 1955	Estimate 1956
		($ million)	
Estimated Expenditure:			
National Security	46,522	40,644	40,458
International Affairs and Finance	1,720	1,420	1,332
Veterans' Services and Benefits	4,256	4,431	4,640
Welfare, Health, and Education	2,248	2,316	2,312
Agriculture and Agricultural Resources	2,557	3,130	2,259
Natural Resources	1,213	1,133	953
Commerce and Manpower	1,577	2,550	2,186
General Government	1,209	1,222	1,566
Interest	6,470	6,558	6,378
Reserves*	—	110	325
Total	67,772	63,504	62,408
Estimated Receipts:			
Individual Income Taxes	32,383	30,700	32,500
Corporation Income and Excess Profits Taxes	21,523	18,466	17,034
Excise Taxes	10,014	9,073	9,350
Employment Taxes	5,425	6,080	7,095
Estate and Gift Taxes	945	930	970
Customs	562	570	570
Miscellaneous Receipts	2,320	2,302	2,486
Deduct.			
Appropriations to Federal old-age and survivors insurance trust fund	4,537	5,190	6,175
Appropriation to Railroad Retirement account, excluding military service credits	600	600	625
Refunds of receipts (excluding interest)	3,377	3,331	3,205
Total	64,655	59,000	60,000
Budget Deficit	3,117	4,504	2,408

* For contingencies and to cover the cost of proposed legislation.

Extracts from the President's Budget message are given below.

National Security. The principal items were: Air Force, $15,600,000,000; Navy, $9,700,000,000; Army, $8,850,000,000; foreign military assistance programme, $3,675,000,000; atomic energy programme, $1,910,000,000; strategic and critical materials, $783,000,000. The overall strength of the armed forces, under present plans, was to be reduced from about 3,200,000 to 3,000,000 by June 30, 1955, and to something over 2,800,000 by June 30, 1956; within this figure, however, the strength of the Air Force would be somewhat increased.

The Army was continuing to study the changes in its organization and doctrine required to meet atomic warfare, and it appeared probable that the Army of the future would be organized into smaller, but more mobile and self-contained, units with greater fire-power.

The Navy would operate approximately 1,000 active ships, including 400 warships; the number of carrier air groups was to be increased from 16 to 17, and an additional "attack carrier" equipped with modern aircraft would be added to the fleet. The Navy would continue to maintain 15 anti-submarine warfare squadrons

The Marine Corps would maintain three combat-ready divisions and three air wings, and the current level of approximately 10,000 Naval and Marine operating aircraft would also be maintained.

The Air Force was continuing its build-up towards the target of 137 wings, and was expected to have 130 wings in being by June 30, 1956—119 of which would be combat wings

About two-thirds of the projected defence expenditure in 1955-56 would be devoted to air power and related services, expenditure on which would be the largest in peace-time history. The total number of aircraft in the Air Force, the Navy, and the Marine Corps would be raised from over 34,000 on June 30, 1954, to 36,000 on June 30, 1956, compared with the ultimate objective of nearly 40,000 In addition, the Army would maintain 3,600 active aircraft, and the number of its helicopters would be increased by over 20 per cent during the next two years. "The growth in our effective air power," the President emphasized, "is far greater than these numbers indicate, for our aircraft continue to increase in size, speed, range, and striking power."

Expenditure on major items of equipment (i e., aircraft, tanks, guns, ships, etc.) would continue at about the same level, except for expenditure on ships; this would be increased in order to deal with the problem of "block obsolescence" of ships built largely during the Second World War. The proposed shipbuilding programme for 1955-56 included the start of a fifth aircraft-carrier of the 60,000-ton *Forrestal* class.

The Atomic Energy Commission's budget for 1955-56 provided for a record expenditure on projects to develop peaceful applications of atomic energy. The President said that whilst the U.S.A. would "continue unabated" her efforts to ensure that atomic energy was exclusively used for peaceful rather than warlike purposes, they had "no alternative but to strengthen further our most effective deterrent to armed aggression—the power of our nuclear weapons stockpile"—until the principle of the peaceful use of atomic energy had been universally accepted. Although the estimates of expenditure assumed a continued reduction in cost per unit, total operating costs would nevertheless rise because of increased production as new facilities were brought into operation Capital expenditure, on the other hand, would drop considerably in 1955-56 as new production plants authorized in former years neared completion.

The second atomic-powered submarine—the *Sea Wolf*—would be launched in 1955, two atomic-powered attack-type submarines had been financed in the 1954-55 fiscal year, and it was recommended that further submarines of this type should be started in 1955-56. Development work in 1955-56 would continue on improved types of submarine reactors and on a reactor to power larger naval vessels; research on atomic-powered aircraft would be expanded and accelerated; and work on a small transportable power reactor for military use would be continued.

International Affairs and Finance. Estimated expenditure under this head was reduced to the net figure of $1,332,000,000 after taking account of receipts of $425,000,000 from the Export-Import Bank, $79,000,000 from the Commodity Credit Corporation, and $4,000,000 from investment guarantees The principal expenditure items were $1,025,000,000 for non-military assistance under the Mutual Security Programme; $335,000,000 for loans by the Export-Import Bank; and $177,000,000 for emergency commodity assistance by the Department of Agriculture. A further $35,000,000 was included as the U.S share of the $100,000,000 capital of the proposed International Finance Corporation (see 14010 A).

Agriculture. The principal item was $968,000,000 for the price support, supply, and purchase programmes of the Commodity Credit Corporation, representing the difference between gross expenditure of about $4,200,000,000 and gross receipts of some $3,200,000,000.

Commerce and Manpower. The principal item was $725,000,000 for road development under proposals which would be submitted to Congress. Other important items included $116,000,000 for the promotion of defence production and $70,000,000 for civil defence and disaster relief.

The postal services were expected to incur a deficit in 1955-56 of $294,000,000. If, however, the postage rate increases which the President had submitted to Congress were approved, this would add $400,000,000 to receipts, which would be sufficient to cover the recommended pay increases of postal employees (totalling $130,000,000) and would reduce net expenditures to $24,000,000 The President proposed, as a long-term solution, that an independent commission should review further postage rate changes proposed by the Postmaster General in accordance with a basic formula laid down by Congress.

Expenditure on slum clearance was estimated at $94,000,000; 22 slum clearance projects would be completed and 364 other projects would be under way during the year.

The President proposed that the present Defence Production Act, due to expire on June 30, 1955, should be extended for a further two years He also proposed an extension beyond June 30, 1955, of the authority to grant loans to small businesses.

The total "new obligational authority" (i.e. authority to enter into commitments for which payment might not be made until future years) recommended in the Budget was $58,642,000,000.—(New York Times - New York Herald Tribune) **(Prev. rep. 13716 C; 13417 A.)**

B. UNITED KINGDOM. — Relative Increases in Wages, Prices, and Profits.

Mr. Maudling, Economic Secretary to the Treasury, stated in the House of Commons on Feb. 3, in reply to Mr. Ronald Bell (C.), that between 1938 and 1951 total earnings of wage-earners had risen by 166 per cent, retail prices of all consumer goods and services by 110 per cent, and total interest and dividends, before the deduction of tax, paid by companies and public corporations by 22 per cent.

Between 1951 and 1954, provisional estimates suggested that total earnings of wage-earners had risen by about 20 per cent, retail prices of all consumer goods and services by 10 per cent, and total interest and dividends, before deduction of tax, paid by companies and public corporations by about 30 per cent. Comparable figures for dividends paid by companies alone were not available because of changes in the company sector due to nationalization.

Between 1938 and 1954, therefore, earnings had risen by about 220 per cent, retail prices of all consumer goods and services by 131 per cent, and total interest and dividends, before deduction of tax, paid by companies and public corporations by about 60 per cent.—(Times) **(14065 B; 14064 A.)**

C. SOUTH AFRICA. — Gold Production in 1954.

Gold production in South Africa in 1954 totalled 13,227,847 oz., valued at £164,563,621, compared with 11,936,307 oz. valued at £147,511,747 in 1953.—(Cape Times) **(13470 A; 12015 C.)**

A. UNITED KINGDOM. — The Defence Estimates, 1955-56. - Britain to develop Hydrogen Bomb. - Plans for Home Defence against Nuclear Weapons.

The Government's Defence Estimates for 1955-56, providing for a total gross expenditure of £1,537,200,000, or £102,700,000 less than the amount planned for 1954-55, were published as a White Paper (Cmd. 9391) on Feb. 17. The 1955-56 total included expenditure of £43,000,000 to be covered by U.S. aid; allowing for this, the net expenditure was £1,494,200,000.

The U.S. aid was allotted as follows: Defence Support Aid, £8,000,000 (Navy £3,000,000, Army £5,000,000), Agricultural Commodity Aid, £8,500,000 (Navy £3,500,000, Army £5,000,000); Special Aircraft Purchase (Air Force) £16,500,000, Additional R A F Programme £10,000,000.

Detailed estimates of expenditure were as follows (1954-55 Estimates shown for comparison):

	Excluding receipts from U.S. Aid £ million		Including receipts from U.S. Aid £ million	
	1955-56	1954-55	1955-56	1954-55
Admiralty	347 00	367.00	340 50	353.00
War Office	484 00	561.00	474.00	535.00
Air Ministry	540 40	537 00	513.90	491 64
Ministry of Supply	147.50	151.00	147 50	151.00
Ministry of Defence	18.30	23.90	18.30	23 90
	1,537.20	1,639.90	1,494.20	1,554.54

The White Paper announced that, after full consideration of all the implications, the Government had decided that Britain must begin the development and production of the hydrogen bomb as a deterrent to war. It also announced that stocks of nuclear weapons were steadily growing; that a start would be made in 1955-56 on building a new class of guided-weapon ship to replace older cruisers; that the R.A.F. "V" bomber force would be built up to the highest possible state of preparedness; that reduced commitments overseas had made it possible to rebuild a strategic reserve of land forces at home; and that a Mobile Defence Corps, trained in fire-fighting and rescue work, would be formed as part of the Army and R.A.F. to defend the home base and to act as a vital link between the civil defence services and the armed forces. Principal points from the White Paper are summarized under cross-headings below:

Principles of Defence Policy. After declaring that "the emergence of the thermo-nuclear bomb" had overshadowed "all else in the year 1954" and that this development would have "far-reaching effects" on U.K. defence policy, the White Paper continued: "New and revolutionary problems are posed requiring courage and imagination for their solution. Nevertheless our problem is still fundamentally a dual one We have to prepare against the risk of a world war and so prevent it, it is on the nature of these preparations that the existence of thermo-nuclear weapons has its main effect. At the same time we must continue to play our part in the defence of the interests of the free world as a whole, and particularly of the Commonwealth and Empire, in the 'cold war', and we must meet the many other peace-time commitments overseas arising from our position as a great Power with world-wide responsibilities."

Thermo-nuclear Weapons. After pointing out that the U.S. Government had announced that they were proceeding with full-scale production of thermo-nuclear weapons, and that "the Soviet Government are clearly following the same policy, though we cannot tell when they will have thermo-nuclear weapons ready for use," the White Paper went on: "The United Kingdom also has the ability to produce such weapons. After fully considering all the implications of this step, the Government have thought it their duty to proceed with their development and production The power of these weapons is such that accuracy of aim assumes less importance, thus attacks can be delivered by aircraft flying at great speed and at great heights. This greatly increases the difficulty of defence. Moreover other means of delivery can be foreseen which will, in time, present even greater problems.

"If such weapons were used in war, they would cause destruction, both human and material, on an unprecedented scale. If exploded in the air, a hydrogen bomb would devastate a wide area by blast and thermal radiation If exploded on the ground, the damage by blast and thermal radiation would be somewhat less; but there would be additional extremely serious indirect effects. A great mass of atomised particles would be sucked into the air. Much of it would descend round the point of the explosion, but the rest would be carried away and descend as radio-active 'fall-out'. The effect on those immediately exposed to it without shelter would certainly be fatal within the areas of greatest concentration of the 'fall-out'; it would become progressively less serious towards the outer parts of the affected region. Large tracts would be devastated and many more rendered uninhabitable. Essential services and communications would suffer widespread interruption. In the target areas, central and local government would be put out of action partially or wholly Industrial production, even where the plant and buildings remained, would be gravely affected by the disruption of power and water supplies and by the interruption of the normal complex inter-flow of materials and components. There would be serious problems of control, feeding, and shelter. Public morale would be most severely tested. It would be a struggle for survival of the grimmest kind.

"It is essential that these facts should be known not only to our people but to all the world All should realize the magnitude of the disaster war would bring. Such understanding may bring home to people in all lands the consequences of war and generate a compelling will to peace, strong enough to enforce itself on the most arbitrary of rulers. That is the first implication of the nuclear weapon. It is one not of despair but of hope. In the hands of the free world, which at present has a marked superiority both in the weapon itself and in the means of delivering it, and which has no thought of aggression, it is a most powerful deterrent. In the Government's considered view this deterrent has significantly reduced the risk of war on a major scale.

"In these circumstances our immediate duty and our policy are clear To build up our own forces, in conjunction with those of our allies, into the most powerful deterrent we can achieve. By this means to work for peace through strength. Thus we shall hope to obtain real disarmament and relaxation of tension. But we must also so equip and train our forces and so organize the country as to enable us to survive and to defeat the enemy if all our efforts for peace should fail Nevertheless our long-term policy remains unchanged."

Disarmament. The White Paper stressed that the Government would continue to strive for a practical disarmament scheme and for "the abolition of the use, possession, and manufacture" of nuclear weapons and other weapons of mass destruction, together with "simultaneous major reductions of conventional armaments and armed forces to agreed levels which would reduce the present Communist superiority" This programme, however, would have to be carried out to an agreed time-table, with machinery to supervise and enforce agreed prohibitions and reductions. Although in September, 1954, the Soviet Government had announced that they were prepared to accept certain proposals put forward by the British and French Governments in the previous June, recent debates in the U.N. General Assembly had shown that they were still not prepared to agree to the essential safeguards contained in the proposals. "If the free world were to disarm without such safeguards," the White Paper declared, "it would incur a double risk. It would be threatened with conventional forces which it could not hope to match, and it would have no guarantee that such forces would not be reinforced by nuclear weapons over the clandestine production of which there would be no adequate control . . . Disarmament must be real and comprehensive, with secure and workable safeguards. Until the Communist world is prepared to accept such a system, our 'Grand Alliance' must build and maintain its strength."

Defences against "Cold War" Methods. - Commitments in Overseas Territories. After speaking of the significance of the London and Paris agreements, and of the close liaison being maintained at Service level with other British Commonwealth countries, the White Paper emphasized the importance of maintaining and consolidating political progress in the less developed countries which might otherwise be undermined by Communist infiltration. Although the existence of nuclear weapons might discourage overt intervention by the Communist Powers through fear that this might develop into general war, there was an equal possibility that it might "encourage the indirect approach through infiltration and subversion." It was therefore necessary, "in parallel with our effort to develop the deterrent and to prepare against a major war," to strengthen by all means, including the maintenance of adequate conventional forces, Britain's defences against this method of attack and, together with the other Commonwealth and Allied countries, to resist the spread of Communism throughout the world

As a result, U.K. overseas dependencies must if necessary be defended not only against external attack but also against internal disruption, especially as the rapid transition through which many Colonial societies were now passing in their progress towards self-government created conditions which were in some cases capable of being exploited by international Communist techniques. This need must increase—though it was hoped only temporarily—the actual and potential commitments for British forces in support of Colonial Governments and Administrations. On the other hand, reduced commitments in Trieste, Korea, and the Middle East had now made it possible to rebuild a strategic reserve of land forces in the U.K., and this, coupled with the mobility of the Navy and increasing use of air transport, would greatly increase Britain's ability to exercise her world-wide responsibilities effectively and economically.

Strategic Air Power and Use of Nuclear Weapons. "The deterrent against war," said the White Paper, "must rest primarily on strategic air power, armed with nuclear weapons, for the knowledge that aggression would be met by overwhelming nuclear retaliation is the surest guarantee that it will not take place. This counter-offensive strength is also the most effective defence against aggression, should it ever occur." In this connexion, the White Paper pointed out that because of the enormous power of nuclear weapons the outcome of the first few exchanges would be of major importance, and great advantages would probably flow from surprise and the first assault. "In these circumstances," it went on, "the enemy might well initiate the use of nuclear weapons at the outset of hostilities A prompt and overwhelming counter-offensive with the most powerful weapons available offers at present the surest means of limiting the scale of such attacks."

After saying that Britain could not rely on strategic air power alone, and that her defence policy must aim at impressing on a potential enemy that a sudden attack, even with nuclear weapons, would not be conclusive, the White Paper stressed the need to maintain naval forces which could seek out and destroy the enemy's naval forces and preserve effective sea communications. Turning to "the great preponderance of conventional land forces" maintained by the Communist world, it estimated that the Soviet Union and her

Eastern European satellites had about 6,000,000 men under arms, that on the German front the Soviet Army could be increased to over 100 divisions within 30 days; and that over the whole field of deployment, East and West, the Soviet and "satellite" land forces could be raised to the level of 400 divisions. "Even allowing for the essential German contribution," it went on, "the free world cannot put into the front line anything comparable to this strength in conventional forces. The use of nuclear weapons is the only means by which this massive preponderance can be countered. But with their aid and with the German contribution we can adopt a forward strategy on the ground in Europe and so defend the Continent."

After referring to the North Atlantic Council's decision of December 1954 on the use of nuclear weapons in a major war (see 13988 A), the White Paper declared: "Until the Soviet Union agrees to participate in a secure system of disarmament, the free nations must base their plans and preparations on the assumption that if a major war were precipitated by an attack upon them they would have to use all the weapons at their disposal in their defence. The consciences of civilized nations must naturally recoil from the prospect of using nuclear weapons. Nevertheless, in the last resort, most of us must feel that determination to face the threat of physical devastation, even on the immense scale which must now be foreseen, is manifestly preferable to an attitude of subservience to militant Communism, with the national and individual humiliation that this would inevitably bring. Moreover, such a show of weakness or hesitation to use all the means of defence at our disposal would not reduce the risk. All history proves the contrary."

Role of the Conventional Forces. The development of nuclear weapons did not mean, however, that the use of naval and land forces in a major war was obsolete or outmoded. "The Navy is still required to contain and destroy enemy forces at sea so as to allow free movement of supplies and troops and to give both our land and air forces support in their operations. We still need troops on the ground to hold the enemy well to the East in Europe in the vital initial stages of a war. This would give time for the effects of our strategic air offensive to be felt. It would also hold back from the U.K. the threat of shorter-range aircraft and ground-to-ground missiles. The presence of a firm shield of troops and tactical aircraft similarly reduces the danger that the Communists might be tempted to try to over-run Europe with conventional forces in the hope that the West would refrain from using nuclear weapons in its defence, or that it could be used as a pawn in a shameful negotiation. It is from this point of view that a German defence contribution is militarily so important."

At the same time, Britain must make all possible provision for the defence of the home base, thus demonstrating that she had no intention of surrendering even if it should come to nuclear warfare. "Home defence," continued the White Paper, "is no less vital than before . . . The whole country is involved and must be organized accordingly. For this work the Services must be trained, local civilian organizations developed, and a link provided between the two. The Government have therefore decided to form a Mobile Defence Corps as part of the Army and R.A.F. reserve force. We also need defensive strength to take toll of the enemy if he attacks. To this end the Reserve Army . . . will continue to play a vital role."

The Programmes of the Services. Reviewing the functions and programmes of the three Services, the White Paper stressed that in the "cold war" the main burden would continue to fall on the Army; the strategic reserve to be built up would be used to restore promptly "situations which might otherwise grow into serious or lasting commitments," and also to reduce the present high proportion of overseas service in the Army. The Navy's task in peace-time would, as in the past, be to sustain British foreign and colonial policy, but the Navy was also essential to the support of the strategic reserve, whilst in limited conflicts of the Korean type its mobility would enable it to provide powerful assistance to the land battle. The value of the R.A.F. in the "cold war" was exemplified by the squadrons now engaged in active operations in Kenya and the Far East. In this connexion, the White Paper said that the overseas Commands of the R.A.F. were being given new equipment and would continue to maintain close liaison with other British Commonwealth air forces. Special attention was also being paid to the re-equipment of Transport Command so as to provide increased mobility for the strategic reserves of land and air forces, as well as greater capacity for co-operation with the Army in tactical airborne operations.

In the event of a global or "hot" war, the threat of nuclear attack presented grave problems to the air defence forces, and the control and reporting system at home would therefore be further improved. The expansion of R.A.F. Fighter Command had been completed and its re-equipment was proceeding, with a further increase in the proportion of all-weather radar-equipped fighters. High priority would be given to the development of guided missiles and orders had been placed for air-to-air guided weapons, whilst progress was being made in the development of other types. The 2nd Tactical Air Force in Europe would be maintained at the highest possible efficiency, and Coastal Command would be strengthened by the addition of *Seamew* aircraft for short-range anti-submarine reconnaissance.

The Army in Europe was being maintained at a strength of four divisions equipped with a wide variety of up-to-date weapons. However, in view of the need to prepare for eventualities which might arise in the Far East or Middle East, experimental organizations (including transport) and a revised scale of weapons and equipment were being worked out to increase flexibility.

With regard to the Navy, a radical reorganization of the Reserve Fleet was being carried out in order to give immediate readiness in the event of war, and the further dispersal of the Reserve Fleet both within and outside the U.K. was being considered.

Summing up, the White Paper said: "Within the limit of our resources, we are planning for a better equipped and maintained Active Fleet and a reduced but much more highly prepared Reserve Fleet; a smaller, better disposed, more mobile Army; and a more powerful Air Force including, in particular, an effective strategic bomber force. All these forces must be armed with the most modern weapons."

Further points from the White Paper are summarized below:

Manpower. The estimated total strength of the Forces at April 1, 1955, and April 1, 1956, compared with the actual strength at April 1, 1954, was shown as follows:

	April 1, 1955 (Estimated)	April 1, 1956 (Estimated)	April 1, 1954 (Actual)
Regulars	518,700	483,300	524,400
National Servicemen	283,400	285,500	298,300
Women	21,200	19,200	23,100
Total	823,300	788,000	845,800

The apportionment of the male Regular strength (officers and men) between the three Services was as follows:

	April 1, 1955 (Estimated)	April 1, 1956 (Estimated)	April 1, 1954 (Actual)
Royal Navy ..	114,700	108,400	121,000
Army .	222,900	203,000	216,900
R.A.F .	181,100	171,900	186,500
Total	518,700	483,300	524,400

Regular Recruitment. Actual recruitment to the three Services in 1953-54, and estimated figures for 1954-55 and 1955-56 (excluding Women's Services), are shown in the following table:

	1953-54 (Actual)	1954-55 (Estimated)	1955-56 (Estimated)
Navy	9,100	8,100	8,100
Army	41,300	39,000	39,000
R.A.F ..	30,700	27,000	26,100
Total ..	81,100	74,100	73,200

The White Paper stated that the inducements to serving men to prolong their service had been "disappointing" as regards the Navy, but "definitely encouraging" in the R.A.F. In the Army, prolongations by men serving on the older (five year and longer) engagements had shown "a welcome increase," but it was still too early to assess the effect on men serving on the new short (three-year) engagements.

National Service. Requirements in 1955-56 were put at about 198,000 men (Navy 7,400, Army 130,500, R.A.F. 60,000).

Reserve and Auxiliary Forces. The strength of these forces rose during 1954 from 571,000 to 647,000, and the number of volunteers from 114,000 to 117,000.

Colonial Forces. The present strength of the armed forces raised by Colonial territories was about 63,000, but was expected to fall to 43,000 by March, 1956, as pioneer units hitherto employed in the Middle East were disbanded. In addition, in certain Colonial territories about 14,000 local personnel were enlisted in the U.K. forces, whilst about 5,000 U.K. officers and N.C.O.s were serving in Colonial forces to provide the necessary leadership.

Research and Development. After referring to the satisfactory development of manned bombers—at present the primary means of delivering nuclear weapons—and to the development work being carried out on ballistic rockets, the White Paper continued:

"The main effort in the development of guided weapons is devoted to providing defence against bombers flying at high speeds and at great altitudes. Against this threat heavy and medium A.A. guns will in the future be of little value. The future air defence system of the U.K. will have as its main components the manned fighter and the ground-to-air guided weapon. The balance between these weapons will vary with new developments, but it is clear that for a long time to come both will be needed to combat the bomber threat. The effectiveness of our manned fighters will be increased by fitting air-to-air guided weapons capable of engaging enemy aircraft at longer ranges and with a much greater certainty of success than is possible with aircraft armed only with cannon. Development of these air-to-air guided weapons, incorporating a variety of techniques, has reached an advanced stage. The surface-to-air guided weapons which are under development for use from the land and from ships are of greater complexity than air-to-air missiles, and the time required to develop an effective operational weapon system is necessarily longer. Nevertheless, good progress has been made and numerous trial firings are taking place both in this country and in Australia.

"There is close collaboration with the U.S.A. in the guided weapon field . . The nature of the potential threat from the air to the two countries differs in many significant aspects, and the weapons required by each country must often have different characteristics. Nevertheless, we derive great advantage from the larger development effort and the more extensive resources that the U.S.A. have been able to devote to the subject, and at the same time we make a valuable contribution of our own."

The White Paper also referred to the "considerable progress" made in improving high-speed submarines of great underwater endurance, in developing aircraft and weapons for use against fast heavily-armed cruisers; and in developing shipborne guided weapons. It added that the success of recent developments in aircraft-carriers would make it possible to use at sea heavier and faster fighters and attacking aircraft, the latter capable of carrying atomic bombs.

Production Programmes. Estimating the total amount to be provided for defence production in 1955-56 at about £600,000,000, the White Paper gave the following summary of the production programmes of the three Services.

Royal Navy—A new system of power-operated armament had now been tested sufficiently to make it possible to resume work on the three *Tiger* class destroyers, which would have exceptionally high fire-power. The submarine construction programme would continue and a high-speed experimental submarine would probably be completed in 1955-56. An experimental guided-weapon ship, converted from a maintenance ship, was nearing completion, with trials scheduled to begin in 1956; in the meantime an early start would be made on the construction of guided-weapon ships to replace older cruisers. Increased effort would be devoted to refitting ships of the Active and Reserve Fleets to improve their efficiency.

Army.—The long-term re-equipment plan would continue, and during the year there would be issued the first of a new range of wireless sets, new L.A.A. guns, new radar for the field forces, and new sub-machine guns. Large-scale trials of the (Belgian) F.N. rifle would be carried out at home and overseas.

R.A.F.—Re-equipment with more modern and advanced types of aircraft and equipment would be accelerated in 1955-56. The first stage of the expansion and modernization of the radar network in overseas theatres would be completed, and a start would be made on the next stage.

Offshore Procurement. The White Paper stated that U.S. contracts valued at about $200,000,000 had been placed in Britain during 1954 under the offshore procurement programme for the purchase of military equipment for NATO countries (bringing the total value of these contracts to $650,000,000), including aircraft (*Hunters, Javelins, Sea Hawks*), ammunition, Centurion tanks, and electronic equipment.

U.S. and Canadian Military Aid. Britain had continued to receive equipment under the U.S. Mutual Security Act, including some produced in this country under the offshore procurement programme. The U.S.A. had also helped to expand British capacity for the manufacture of propellants and explosives by providing plant under offshore contracts. Items received from Canada included anti-aircraft radar, ammunition, propellants and explosives.

Home Defence. The White Paper declared that "if war should come despite our efforts to prevent it, there is still much that can and must be done to mitigate the effects of a thermo-nuclear attack." It explained, however, that the Government had not been able finally to assess the implications of the latest weapon developments, particularly as regards "the extensive radio-active contamination which may be caused by the 'fall-out' from a hydrogen bomb burst at ground level." Until more was known, therefore, it would be unwise to embark on measures which might later prove to have been misdirected. The White Paper continued:

"We are not, nor shall we ever be, able to forecast the precise effect or the extent of any nuclear attack against this country. Some areas would be destroyed, some would be on the fringe of devastation, others would escape direct damage by blast and heat. Still less can we forecast the pattern of radio-active contamination which might result from the attack. It would be quite wrong for people to assume that their neighbourhood would be sure to receive a direct hit and that they would therefore be unable to help themselves or others. It would be equally mistaken to assume that any part of the country would escape the effects of the attack and have no need of help. We are all in it, and we must all learn to help ourselves and to help each other.

"Obviously the need for rescue, fire-fighting, and welfare operations would be as great as ever. The presence of radio-activity would have to be detected and measured, and the necessary warning given to the public. The first call would have to be met by the civilian services on the spot organized by the local authorities, with the help of the Civil Defence Corps, the Industrial Civil Defence Service, the Auxiliary Fire Service, and the Women's Voluntary Services, and by the National Hospital Services (including the National Hospital Service Reserve) supported by the voluntary aid societies. Every individual citizen would be needed."

These local services, however, would need to be supported by "all the formed and disciplined bodies of the armed forces available in Britain," and the Government had decided that all members of such forces, including the Home Guard, should in future receive training in elementary civil defence duties as part of their normal military training. As regards the Mobile Defence Corps, the aim was to build up over the next three to four years a force of 48 reserve battalions, each at least 600 strong; some battalions would be trained and equipped for fire-fighting duties, others for rescue and ambulance work. In an emergency, these battalions (which would be distributed throughout Britain) would be mobilized like other units of the reserve forces. Men would be selected from the Army and R.A.F., and would receive one month's wholetime training during their active service. Special training depots would be opened up in various parts of Britain to train about 10,000 men annually, and enough accommodation would be ready to receive the first intake of wholetime trainees towards the end of 1955. On completing their active service these men would be posted to battalions as near as possible to their homes, and would carry out their 15 days' annual reserve training with their battalions. The White Paper added that, as the scheme developed, the Government would consider the practicability of expanding the number of reserve battalions; that general responsibility for the Mobile Defence Corps would rest with the War Office, though a proportion of training depots and reserve battalions would be manned by the R.A.F.; and that the permanent instructional and administrative staffs at training depots would be found mainly within the active Army and the R.A.F.

The White Paper went on to point out that the distinction between evacuation, neutral, and reception areas would be far less easy to make than in the past, since the effects of "fall-out" might be felt over wide areas of the countryside and the relative safety of rural areas correspondingly reduced. Nevertheless, areas with the greatest concentration of population would still be more vulnerable than others, and there would therefore be some advantage in spreading the risk by a measure of dispersal so long as this enabled the community to continue to function effectively.

Within a few miles of the point of burst it would be quite impracticable to provide protection against the violent explosive power of a hydrogen bomb. Beyond this area of devastation by blast and heat a considerable degree of protection against the effects of "fall-out" could be secured by shelters of fairly simple construction, e.g. by trenches with overhead earth cover.

Planning of the casualty services would have to take account of the fact that a single hydrogen bomb explosion would "take very heavy toll" of life and leave large numbers injured or homeless, whilst very many others would be affected by radio-activity. Plans prepared in advance to deal with the situation would have to be supplemented by large-scale improvization.

In view of the vital importance of communications, the Post Office were building up a special cable and wireless network for use in the event of attack.

A large part of the country's imports entered through the major ports, which were vulnerable to thermo-nuclear attack. Plans had therefore been drawn up for the use of alternative facilities, including the use of smaller ports and harbours.

Stockpiling. It was stressed that after the initial attack there would probably be a period during which the importation of food and raw materials would be very seriously disrupted, and that it would therefore be necessary to have available stocks of essential commodities (mainly food and oil) widely distributed so that they might so far as possible escape destruction or contamination. During 1955-56 reserves of these essential supplies would be built up.

In conclusion, the White Paper stated that in the financial year 1955-56—an interim year while policy was being reshaped—£70,000,000 had been provided for defence by the Civil Departments, including loan expenditure by the Post Office. A. UNITED STATES. — General Taylor appointed U.S. and U.N. C.-in-C. in the Far East. - New C.-in-C., U.S. Army in Europe.

It was announced in Washington on March 7 that General Maxwell D. Taylor, Commander of the U.S. 8th Army, had been appointed U.S. and U.N. Commander-in-Chief in the Far East, in succession to General Hull, who would retire on April 30. At the same time the Defence Department announced that General Lyman L. Lemnitzer, Deputy Chief of Staff of the U.S. Army for plans and research, would succeed General Taylor as 8th Army Commander.

Lieut.-General Anthony C. McAuliffe assumed command of the U.S. Army in Europe on Feb. 1 in succession to General Hoge, retiring.—(New York Times) **(Prev. rep. 13148 B.)**

B. UNITED KINGDOM. — Order of Merit conferred on Dr. Albert Schweitzer.

It was announced on Feb. 26 that H.M. the Queen had appointed Dr. Albert Schweitzer, the famous French medical missionary, philosopher and musician, as an honorary member of the Order of Merit. Dr. Schweitzer, recipient of the Nobel Peace Prize for 1954, had celebrated his 80th birthday on Jan. 14. The Order of Merit is confined to 24 members, together with such honorary foreign members as the Sovereign may wish to honour. The only living honorary foreign members of the Order are Dr. Schweitzer and President Eisenhower. (Times-Daily Telegraph) **(Prev. rep. Dr. Schweitzer, 13912 A.)**

C. BULGARIA - POLAND - RUMANIA. — State of War with Germany ended.

The Bulgarian National Assembly unanimously adopted a resolution on March 1 ending the state of war with Germany and Rumania announced the same step on March 8. The Polish Council of State had taken a similar decision on Feb. 18 in accordance with the Polish Government's recommendation of Feb. 1.—(Le Monde, Paris - Times - Polish Embassy Press Office, London) **(Prev. rep. 14056 A.)**

D. BURMA - CAMBODIA. — Diplomatic Relations.

Following Burma's *de jure* recognition of the Cambodian Government, it was announced in Rangoon on Jan. 10 that both Governments had agreed to establish diplomatic relations at Embassy level.—(Burmese Government Information Dept., Rangoon) **(Prev. rep. 14037 A; 13781 C.)**

A. YUGOSLAVIA. — Trial of M. Djilas and M. Dedijer for Propaganda against the State.

M. Milovan Djilas, the former Vice-President of the Yugoslav Federal Executive Council, and M. Vladimir Dedijer, a member of the Central Committee of the League of Communists (the Yugoslav Communist Party) and professor of modern history at Belgrade University, who had defended M. Djilas at the time of his expulsion from the Committee in January, 1954 (see 13409 A), both published statements in the foreign Press in December, 1954, criticizing the League of Communists and demanding greater freedom of discussion. M. Djilas also called for the establishment of an Opposition party of democratic Socialists, and personally attacked President Tito for opposing tendencies towards democratization.

M. Dedijer, who had been summoned on Dec. 15 to appear before the Control Commission of the League in order to answer charges of "slandering the League of Communists Yugoslav Socialist democracy, the Central Committee of the League, and certain of its members," refused to do so, on the ground that under the party statute his case could be discussed only at a plenary meeting of the Central Committee. On Dec. 21 he gave an interview to the Belgrade correspondent of *The Times* (London), in which he said that although he disagreed with many of M. Djilas's views, he had refused to obey party instructions to "boycott" him. He complained that certain "pressures" had in consequence been exerted on him; thus his name had been omitted from any reference in the Press to his biography of President Tito, and he had not been invited to attend a recent meeting of the Central Committee which had discussed the normalization of relations with the Soviet Union. After M. Djilas's expulsion, M. Dedijer added, he had expressed a wish to give up politics, because he believed that "there can be no development of Socialism without struggle of opinions."

M. Djilas, in an interview with a *New York Times* correspondent on Dec. 24, described the measures taken against M. Dedijer as "an attempt to frighten the democratic elements of the party," adding that "such elements exist, but they are unorganized, whereas the party itself is in the hands of undemocratic forces." The democratic trend inside the party, he asserted, had culminated in the Zagreb conference of November, 1952 (see 12813 A), but at a meeting of the Central Committee at Brioni in September, 1953, it had been decided, on the initiative of President Tito, to "strengthen the discipline of the party in the old anti-democratic Stalinist style." Although "a new atmosphere of freedom" had developed during 1950-51, this had been confined to certain fields, such as art and literature, and did not apply to "basic ideological and political questions," with the result that "political stagnation" had been reached. Denying that he intended to lead an Opposition movement against the Government, he continued: "I thought that the Communist Party must permit freedom of discussion. Now I see that this is impossible. Another political formation should be constructed. This could only be democratic and Socialist and must not entail the return of the old discredited Yugoslav parties, which were never entirely democratic and compromised themselves during the war." The situation was ripe for political democracy, he declared, but the regime, which (he alleged) was dominated by "the most reactionary elements," was preventing its development. The League of Communists was "depressed and without an ideology," and unless Yugoslavia continued to emphasize her ideological differences the normalization of relations with the Soviet Union would lead to a strengthening of Soviet influence. M. Djilas in conclusion described himself as "a democratic Socialist" and said: "The name Communism is good, but it has been compromised. It is a synonym for totalitarianism, in this country as well as in Russia."

Vice-President Kardelj, who was acting as head of the Government during President Tito's visit to India and Burma, strongly condemned MM. Djilas and Dedijer in a speech at Sarajevo on Dec. 27, in which he accused them of "placing themselves at the disposal of anyone who needed their services," in the belief that certain people had no sympathy with Yugoslavia's foreign policy, and especially with President Tito's journey to India. Describing them as "bankrupt politicians who have lost all feeling of responsibility towards their own people," he said that they hoped in vain to become a political factor in Yugoslavia with the help of *The Times* or the *New York Times*. A press conference called by M. Dedijer on the following day, at which he proposed to reply to this attack, and to which both foreign correspondents and the Yugoslav Press had been invited, was banned by the police.

Proceedings under Art. 118 of the criminal code, which provides that "propaganda against the State and the social order" shall be punishable with imprisonment for up to 20 years, were opened by the Belgrade district court on Dec. 30 against MM. Djilas and Dedijer; both however, were allowed to remain at liberty on condition that they made no further public statements. Earlier, on Dec. 28, the National Assembly had lifted M. Dedijer's parliamentary immunity and deprived him of his seat, whilst he was also suspended from all offices in the League of Communists. M. Djilas was expelled on Dec. 31 from the Socialist Union, the national political organization.

M. Stefanovich, the Minister of the Interior, described M. Djilas in the National Assembly on Dec 29 as "the rallying-point of class enemies and foreign agents," who, while maintaining that political freedom did not exist in Yugoslavia, made use of the country's democratic conditions to conduct hostile propaganda The security services, he stated, had discoverd 173 agents of "some Western intelligence services" during 1954, "which speaks for the seriousness of their actions."

The trial of MM. Djilas and Dedijer took place on Jan. 24, 1955, the case being heard *in camera* at the request of the Public Prosecutor, who stated that it involved discussion of Yugoslavia's relations with other countries which it would be contrary to the national interest to deal with in public.

The indictment alleged that the accused had made statements to the foreign Press calculated to damage Yugoslavia's reputation and to create difficulties in her international situation, in the hope of bringing about foreign interference in her internal affairs. These statements, which had been timed to divert attention from the success of the policy pursued by President Tito during his visit to India and Burma, had been intended to provoke pressure from abroad with a view to influencing Yugoslavia's internal and foreign policy, and to disturb the friendly relations between Yugoslavia and the West.

Both the accused, who admitted having made the incriminating statements, were represented by counsel, M Dedijer being defended by Dr. Politeo, a well-known lawyer who defended President Tito at his trial in 1928 and Cardinal Stepinac in 1946.

The court found both defendants guilty of having conducted propaganda hostile to Yugoslavia, and sentenced M. Djilas to 18 months' and M. Dedijer to six months' imprisonment; the sentence on M. Djilas, however, was suspended for three years and that on M. Dedijer for two, on condition that they did not commit an offence of equal or greater seriousness during that period. Notice of appeal was subsequently given by both defendants.—(Tanjug Agency, Belgrade - Times - New York Times) **(Prev. rep. 13409 A; 13592 B.)**

B. SOUTH AFRICA. — Statements by Mr. Strydom on Republic Issue and by Dr. Verwoerd on Application of "Apartheid" to the Western Province of the Cape.

During the course of a no-confidence debate in the House of Assembly on Jan. 25-28, initiated by the Leader of the Opposition, Mr. Strauss, important statements were made by the Prime Minister, Mr. Strydom, on the Government's policy with regard to South Africa becoming a republic, and by the Minister of Native Affairs, Dr. Verwoerd, on the application of *apartheid* to the Western Province of the Cape.

Mr. Strydom, speaking on Jan. 25, said that the constitution of the National Party laid down that a republic could be erected in South Africa only on the broad will of the people—"that is to say on the basis of an adequate and safe majority." In the light of what had happened in the Commonwealth when India had become a republic and had still retained her membership, the National Party had reviewed the whole situation and had decided that the questions of becoming a republic and of remaining a member of the Commonwealth were two entirely separate matters In answer to Mr. Strauss, who had asked why the National Party wanted a republic, Mr. Strydom said that there were two main language groups in South Africa and that his party were convinced that these two groups could work together in unity only under a republic.

Dr. Verwoerd, who made his statement on Jan. 28, said that the Western Province of the Cape was one of the easiest places for the first phase of *apartheid* to be applied, and that certain steps would be taken there, "and taken quickly." In the Western Province the "Black stream" was at its most dangerous and there was the greatest danger of the European population being swallowed up by the influx of Natives—an influx which was still quite new and much of which was migratory. Dr. Verwoerd emphasized that in this area the non-European element was not only strong but was growing rapidly, and mentioned that the number of Coloured people would grow from 1,250,000 to 3,500,000 in the next few years. In a place like Worcester there would be about 100,000 Natives in 10 years' time, whilst in the whole area of the Boland there would be about 1,250,000. It was therefore necessary for the people to know that the Native was not going to be a permanent inhabitant of the Western Province.

The Minister stressed, however, that although future policy must aim at rationalizing industry so that it could get along with as few Natives as possible, there was at present a need for Native labour and no one intended suddenly to remove it. For a while, in fact, the number of Native workers might increase, but the influx should not be regarded as permanent and the arrival of entire families would be severely discouraged. Hostels were to be built for the migratory workers, and when the Native labour was eventually withdrawn they could be converted into permanent homes for coloured families. *Apartheid,* Dr. Verwoerd said, was "a direction," and it would be followed in such a way as to cause the least possible economic damage.

Mr. Strydom also referred during the debate to the question of the sovereignty of Parliament, controversy about which had arisen over the Separate Representation of Voters Act (see 13672 A). "I can say that the sovereignty of this Parliament will be restored," he declared. "We shall not rest until we have restored the position. At the right time the matter will be put right."—(Cape Times) **(Prev. rep. 13941 A.)**

MARCH 12—19, 1955

A. UNITED KINGDOM. — House of Commons Debate on Defence White Paper. - Opposition Motion rejected. - Sir Winston Churchill's Statements on Thermo-Nuclear Warfare, Prospects of Peace, and High-Level Talks with Soviet Leaders. - Labour Split over Use of Hydrogen Bomb. - Mr. Attlee's and Mr. Bevan's Statements.

The House of Commons debated the Government's defence policy on March 1-2 on a motion moved by the Prime Minister expressing approval of the White Paper on defence of Feb. 17. The debate was opened by Sir Winston Churchill, who spoke as follows:

"We live in a period happily unique in human history, when the whole world is divided intellectually, and to a large extent geographically, between Communist discipline and individual freedom, and when at the same time that mental and psychological division is accompanied by the possession by both sides of the obliterating weapons of the nuclear age. We have antagonisms now as deep as those of the Reformation and its reactions which led to the Thirty Years War, but now they are spread over the whole world instead of only a small part of Europe. We have to some extent the geographical division of the Mongol invasion of the 13th century, only more ruthless and more thorough. We have forces of science, hitherto the servant of man, now threatening to become his master!

I am not pretending to have a solution for a permanent peace between nations which could be unfolded this afternoon. We pray for it. Nor will I try to discuss the cold war which we all detest. I can only venture to offer the House some observations, mainly of a general character, on which I have pondered long. I do not pretend to be an expert or to have technical knowledge of that prodigious sphere of science, but in my long friendship with Lord Cherwell I have tried to follow and even to predict the evolution of events." After quoting from an article he [Sir W. Churchill] had written 25 years ago, in which he had predicted the possibility of nuclear fission and the hydrogen bomb, the Prime Minister continued.

"Only three countries possess, in varying degrees, the knowledge and the power to make nuclear weapons. Of these the United States is the overwhelming chief. Owing to the breakdown in the exchange of information between us and the U.S.A. since 1946, we have had to start again on our own. Fortunately, executive action was taken immediately by Mr. Attlee to reduce so far as possible the delay in our nuclear development and production. By his initiative we have made our own atomic bombs. Confronted by the hydrogen bomb I have tried to live up to his standard, and we have started making that one, too. It is this grave decision which forms the core of the Defence Paper we are discussing.

Although the Soviet stockpile of atomic bombs may be greater than that of Britain, British discovery may well place us above them in fundamental science. . . There is an immense gulf between the atomic and hydrogen bombs. The atomic bomb, with all its terrors, has not carried us outside the scope of human control, or manageable events, in thought or action, in peace or war. But when Mr. Sterling Cole, the chairman of the U.S. Congressional Committee [on atomic energy] gave out, a year ago, the first comprehensive review of the hydrogen bomb, the entire foundation of human affairs was revolutionized and mankind placed in a situation both measureless and laden with doom."

Beating both hands on the despatch box in front of him, Sir Winston declared: "It is now a fact that a quantity of plutonium, perhaps less than would fill the box here on this table—and it is quite a safe thing to store—would suffice to produce weapons which would give indisputable world domination to any great Power which was the only one to have it. There is no defence, no absolute defence, against the hydrogen bomb, nor is any method in sight by which any country could be completely guaranteed against the devastating injury which even a score of them might inflict on wide regions.

What are we to do? Which way shall we turn to save our lives and the future of the world? It does not matter so much to old people. They are going soon anyway. But I find it poignant to look at youth in all its activity and ardour, and most of all to look at little children playing their merry games, and I wonder what would lie before them if God wearied of mankind.

The best defence would, of course, be *bona fide* disarmament all round. That is in everybody's heart, but sentiment must not cloud our vision. Facts are stubborn things. A renewed session of a sub-committee of the Disarmament Commission is now sitting in London, and is rightly attempting to conduct its debates in private. But we must not conceal from ourselves the gulf between the Soviet Government and the NATO Powers, which has hitherto for so long prevented agreement. The whole history and tradition of Russia make it repugnant to the Soviet Government to accept any practical system of international inspection. The second difficulty is that just as the U.S.A. on the one hand has, we believe, an overwhelming mastery in nuclear weapons, so the Soviets and the other Communist satellites have an immense superiority of what are called conventional weapons—those with which we fought the last war, but much improved.

The problem, therefore, is to devise a balanced and phased system of disarmament which would at no period enable any one of the participants to enjoy an advantage which might endanger the security of the others. A scheme on those lines was submitted last year by H.M. Government and the French Government, and was accepted by the late Mr. Vyshinsky as a basis for discussion. That is now being examined in London.

If the Soviet Government has not at any time since the war shown much nervousness about the American possession of nuclear superiority, that is perhaps because they are sure that it will not be used against them aggressively, even in spite of the many forms of provocation. On the other hand, the NATO Powers have been combined together by the continued aggression and advance of the Communists in Asia and Europe. That that should have eclipsed in a few years, and largely effaced, the fearful antagonism and memories that Hitler created for the German people is an event without parallel, but it has happened, or happened to a large extent. There is a widespread feeling throughout the free world that but for American nuclear superiority Europe would already have been reduced to satellite status; that the Iron Curtain would have reached the Atlantic and the Channel.

Unless a trustworthy and universal agreement upon disarmament, conventional and nuclear alike, can be reached, and an effective system of inspection is established and is actually working, there is only one sane policy for the free world in the next four years. That is what is called defence through deterrents. We have already adopted and proclaimed this. But deterrents may at any time become the parents of disarmament, provided they deter. To make the utmost contribution to the deterrent we must ourselves possess up-to-date weapons and the means of delivering them.

That is the position the Government occupies. It is not only a matter of principle. There are many practical reasons which could be given. Should war come, which God forbid, there are a large number of targets which we and the Americans must be able to strike at once. There are scores of airfields from which the Soviets could launch attacks with hydrogen bombs as soon as they have the bombers to carry them. It is essential to our deterrent policy, and to our survival, to have with our American allies the strength and numbers to be able to paralyse these potential Communist assaults in the first few hours of the war, should it come.

The House will note that I avoid using the word 'Russian' as much as possible. I have a strong admiration for the Russian people, for their bravery, their many gifts, and their kindly nature. It is the Communist Party, and the declared ambitions of the Communist Party and their proselytising activities that we are bound to resist, and that is what makes this great world cleavage.

There are also big administrative and industrial targets behind the Iron Curtain, and any effective deterrent policy must have the power to paralyse them at the outset or shortly after. There are also Soviet submarine bases and other naval installations which would need early attention.

Unless we make a contribution of our own we cannot be sure that in an emergency the resources of other Powers would be planned exactly as we would wish, or that targets which would threaten us most would be given what we consider the necessary or deserved priority in the first few hours. Those targets might be of such cardinal importance that it would really be a matter of life and death to us. All this must be borne in mind in deciding our policy about conventional forces, the existing Services.

Meanwhile, the U.S.A. has many times the nuclear power of Soviet Russia. I avoid any attempt to give exact figures. They have far more effective means of delivery. Our moral and military support of the U.S.A., our possession of nuclear weapons of the highest quality and on an appreciable scale, with the means of delivery, will greatly reinforce the deterrent power of the free world and will strengthen our influence within the free world. That, at any rate, is the policy we have decided to pursue, and that is what we are now doing. I am thankful it is endorsed by a mass of responsible opinion on both sides of the House and, I believe, the great majority of the nation.

A vast quantity of information—some true, some exaggerated, much out of proportion—has been published about the hydrogen bomb. The truth has inevitably been intermingled with fiction. I am glad to say that panic has not occurred. Panic would not necessarily make for peace. That is one reason why I have been anxious that irresponsible discussion on this matter should not take place on the B.B.C. or television, and I think I was justified in submitting that view of the Government to the authorities, which they at once willingly accepted. Panic would not necessarily make for peace, even in this country. There are many countries in which a certain wave of opinion might arise and swing so furiously into action that decisive steps might be taken from which there is no recall. As it is, the world population goes on its daily journey in spite of its sombre impression and earnest longing for relief. That is the way we are going on now.

I will content myself with saying about the power of this new weapon, the hydrogen bomb, that apart from all the statements about blast and heat effects over an increasingly wide area there are now to be considered the consequences of 'fall-out' of wind-borne radio-active particles. There is both an immediate direct effect on human beings in the path of such a cloud, and the indirect effect through animals, grass, and vegetables, which pass on the contagion to human beings through food. This would confront many who escaped the direct effects of the explosion with poisoning or starvation, or both.

Imagination stands appalled. There are, of course, the palliatives and precautions of a courageous civil defence, but our best protection lies—as I am sure the House will be convinced—in successful deterrents operated from a foundation of sober, calm, and tireless vigilance. Moreover, a curious paradox has emerged. Let me put it simply. After a certain point has been passed it may be said that the worse

things get the better. The broad effect of the latest developments is to spread almost indefinitely—or at least to a vast extent—the area of mortal danger. This would certainly increase the deterrent on Soviet Russia by putting her enormous spaces and scattered population on a basis of equality or near equality with our small densely populated island and with Western Europe. I cannot regard this development as adding to our danger: we have reached the maximum already. On the contrary, to this form of attack continents are as vulnerable as islands. Hitherto crowded countries like the United States and Western Europe have had this outstanding vulnerability to carry, but the hydrogen bomb with its vast range of distribution, and even wider area of contamination, would also be effective against nations whose populations have hitherto been so widely dispersed over a wide land area as to make them feel they are not in any danger at all. They, too, become highly vulnerable—not yet equally, but still highly and increasingly vulnerable.

Here again we see the value of deterrent against surprise, well understood by all persons on both sides who have the power to control events. That is why I have hoped for a long time for a top-level conference where these matters can be put plainly and bluntly, from one friendly visitor to the conference to another. Then it might well be that, by a process of sublime irony, we shall have reached a stage in this story where safety will be the sturdy child of terror and survival the twin brother of annihilation

Although the Americans have developed weapons capable of producing all the effects I have mentioned, we believe that the Soviets have so far tested by explosion only a type of bomb of intermediate power. There is no reason why they should not develop within the next four, three, or even two years more advanced weapons, and full means to deliver them on North American targets. Indeed, there is every reason to believe that within that period they will.

In trying to look ahead we must be careful to avoid the error of comparing the present state of our preparations with the stage the Soviets may have reached in three or four years' time. It is a major error of thought to contrast the Soviet position three or four years hence with our own position today. It is a mistake to do this either in the comparatively precise details of aircraft development or in the measureless sphere of nuclear weapons. The threat of the hydrogen bomb on this island lies in the future It is not with us now. According to the information I have been able to obtain—and I have taken every opportunity to consult all the highest authorities at our disposal—the only country able to deliver today a full-scale nuclear attack with hydrogen bombs at a few hours' notice is the United States. That surely is an important fact, and from some points of view for some of us not entirely without comfort.

It is, of course, conceivable that Soviet Russia, fearing a nuclear attack before she has caught up with the U.S.A. and created deterrents of her own, might attempt to bridge the gulf by a surprise attack with such nuclear weapons as she has already. American superiority in nuclear weapons, reinforced by Britain, must be so organized as to make it clear that no such surprise attack would prevent immediate retaliation on a far larger scale. That is an essential of the deterrent policy. For this purpose not only must the nuclear superiority of the Western Powers be stimulated in every possible way but the means of delivery of bombs must be expanded, improved, and varied.

It is probable—although we have not been told about it outside the NATO sphere—that a great deal of this has already been done by the United States. We should aid them in every possible way. I will not attempt to go into details, but it is known that bases have been and are being established in as many parts of the world as possible and that over all rests the U.S. Strategic Air Force, which in itself is a deterrent of the highest order and is in a constant state of readiness.

The Soviet Government probably knows in general the terms of the policy being pursued, and of the present U.S. strength, and of our own growing addition to it. Thus they should know that a surprise attack cannot exclude immediate retaliation. One might say: 'Although you might kill millions of our people and cause widespread havoc by surprise attack, we can within a few hours certainly deliver several, indeed many, times the weight of the nuclear material that you have used, and continue retaliation on that scale. We have already hundreds of bases for attacks from all angles, and made an intricate study of suitable targets.' Thus, it seems to me with some experience of wartime talks—and it is not wartime—you might go into dinner and have a friendly evening. I should not be afraid to talk things over as far as they can be. This, and the hard facts, might make the deterrent effective.

I must make one admission—and any admission is formidable. The deterrent does not cover the case of lunatics or dictators in the mood of Hitler when he found himself in his final dug-out. Happily we might find methods of protecting ourselves against that.

All these considerations lead me to believe that, on a broad view, the Soviets would be ill-advised to embark on major aggression within the next three or four years. One must always consider the interests of other people when one is placed in particular situations with them. Their interests might be the only guide available. We may calculate, therefore, that world war will not break out within that time, but if at the end of that time there should be a supreme conflict, the weapons I have described would be available on both sides, and it would be folly to suppose that they would not be used. Our precautionary dispositions and preparations must therefore be based on the assumption that, if war should come, these weapons would be used.

I repeat therefore that during the next three or four years the free world should and will retain an overwhelming superiority in hydrogen weapons. During that period it is most unlikely that the Russians will deliberately embark on major war or attempt a surprise attack, both of which would bring down on them at once a crushing weight of nuclear retaliation. In three or four years' time—it may be even less—the scene will be changed. The Soviets will probably stand possessed of hydrogen bombs and the means of delivering them, not only on the U.K. but also on North American targets.

They may even have reached a stage, not of parity with the U.S.A. and Britain, but of what is called saturation I must explain this term of art. Saturation in that connexion means the point where, although one power is stronger than the other—perhaps much stronger—both are capable of inflicting crippling or quasi-mortal injury on the other with what they have got. It does not follow that the risk of war would then be greater Indeed, it is arguable that it would even be less, for both sides would then realize that global war would result in mutual annihilation.

Major war of the future may therefore differ from anything we have known in the past in one significant respect; that each side at the outset will suffer what it dreads most—in fact, the loss of everything that we have ever known. The deterrents will grow continually in value. In the past any aggressor has been tempted by the hope of scoring an early advantage. In future he might be deterred by the knowledge that the other side has the certain power to inflict swift, inescapable, and crushing retaliation.

All will agree that a world-wide international agreement on disarmament is the goal at which we should aim. It is easy for the Communists to say: 'Ban all nuclear weapons.' The Communists' ascendancy in conventional weapons would then become overwhelming. That might bring peace, but only peace in the form of the subjugation of the free world to the Communist system.

The hydrogen bomb has made an astounding incursion into the structure of our lives and thoughts. Its impact is prodigious and profound, but I do not agree with those who say: 'Let us sweep away forthwith all our existing defence services and concentrate our energy and resources on nuclear weapons and their immediate ancillaries.' The policy of the deterrent cannot rest on nuclear weapons alone. We must, together with our NATO allies, maintain the defensive shield in Western Europe.

Unless we are prepared also to unleash a full-scale nuclear war as soon as some local incident occurs in some distant country, we must have conventional forces in readiness to deal with such situations as they arise. In war this defensive shield would be of vital importance as we must do our utmost to hold the Soviet and satellite forces at arm's length in order to prevent short-range air and rocket attack on these islands.

Thus, substantial strength in conventional forces has still a vital part to play in the policy of the deterrent It is, perhaps, of even greater importance in the 'cold war.' Though world war might be prevented by the deterrent power of nuclear weapons, the Communists might well resort to military action in furtherance of their policy of infiltration and encroachment in many parts of the world. There might well be limited wars on the Korean model, with limited objectives. We must be able to play our part in these, if called on by the U.N. Organization. In the conditions of today this is also an aspect of Commonwealth responsibility. We shall need substantial strength in conventional forces to fulfil our world-wide obligations in these days of uneasy peace and extreme bad temper.

To sum up this part of the argument. The development of nuclear weapons will affect the shape and organization of the armed forces and of civil defence. We have entered a period of transition in which the past and the future will overlap, but it is an error to suppose that because of these changes our traditional forces can be cast away or superseded The tasks of the Army, Navy, and Air Force in this transition period are set forth with clarity in the Defence White Paper. The means by which these duties will be met are explained in more detail in the departmental papers which have been laid before the House by the three Service Ministers.

No doubt nothing is perfect. Certainly nothing is complete, but considering that those arrangements have been made in the first year after the apparition of the hydrogen bomb, the far-seeing and progressive adaptability which is being displayed by all three Services is remarkable. I understand there is to be a vote of censure. Certainly nothing could be more worthy of censure than to try to use the inevitable administrative difficulties of the transitional stage as a utensil of party politics and would-be electioneering. I am not saying that anyone is doing it. We shall see when it comes to the vote.

The future aspect of Civil Defence is also indicated in broad lines in the Defence White Paper. Its outline will be filled in as the preparation of the new plans proceeds, but the need for an effective system of civil defence is surely beyond dispute. It presents itself today in its noblest shape—namely, the Christian duty of helping fellow mortals in distress. Rescue, salvage, and ambulance work has always been the core of Civil Defence, and no city, no family, or any honourable man or woman can repudiate this duty and accept from others help which they are not prepared to fit themselves to render in return. If war comes, great numbers may be relieved of their duty by death, but none must deny it as long as they live. If they do they might perhaps be put in what is called 'Coventry.'

The argument which I have been endeavouring to unfold and consolidate gives us in this island an interlude. We must not waste it. Let us hope we shall use it to augment or at least to prolong our security and that of mankind. But how? There are those who believe, or at any rate say: 'If we have the overwhelmingly powerful protection of the United States, we need not make the hydrogen bomb for ourselves or build a fleet of bombers for its delivery. We can leave that to our friends across the ocean. Our contribution should be criticism of any unwise policy into which they may drift or plunge. We should throw our hearts and consciences into that.'

Personally, I cannot feel we should have much influence over their policy or acts, wise or unwise, while we are largely dependent, as we are today, on their protection We, too, must possess substantial deterrent power of our own We must also never allow, above all, the growing sense of unity and brotherhood between the U K and the U.S.A., and throughout the English-speaking world, to be injured or retarded Its maintenance, its stimulation, and its fortifying is one of the first duties of every person who wishes to see peace in the world and who wishes to see the survival of this country.

Mercifully to conclude, there is time and hope if we combine patience and courage. All deterrents will improve and gain authority throughout the next 10 years By that time the deterrent may well reach its acme and reap its final reward. The day may dawn when fair play, love for one's fellow men, and a respect for justice and freedom will enable tormented generations to march forth, serene and triumphant, from the hideous epoch in which we have to dwell. Meanwhile, never flinch, never weary, never despair "

Mr. Shinwell (Minister of Defence under the Labour Government) moved the following amendment on behalf of the Opposition ·

" That this House regrets that the Statement on Defence, 1955, while recognizing that thermo-nuclear weapons have effected a revolution in the character of warfare, and that until effective world disarmament has been achieved it is necessary as a deterrent to aggression to rely on the threat of using thermo-nuclear weapons, fails to make proposals for the reorganization of H M Forces and of Civil Defence, to indicate what future defence expenditure may be called for, or to explain the grave and admitted deficiencies in the weapons with which H M Forces are at present furnished, in spite of the expenditure of some £4,000,000,000 for defence purposes over the past three years "

The decision to move the amendment had been taken the previous night at a special meeting of the Parliamentary Labour Party, presided over by Mr. Attlee; according to press reports it had been opposed by only a small minority of Labour members who were either pacifists or opposed to the decision to produce the hydrogen bomb in Britain.

Mr. Shinwell said that the Prime Minister's impressive speech would undoubtedly make its impact on millions throughout the world The Opposition agreed with many of his sentiments, and that Britain should make peace through disarmament her prime objective had long been the policy of the Labour Party. This policy, on which the Government had embarked with qualifications, should be pursued with the utmost expedition and deep-seated prejudices or ideological differences should not be permitted to impede progress

There was, however, nothing original in what the Prime Minister had said, and there was nothing particularly original in the proposal to provide a deterrent because the provision of an effective deterrent had been precisely the purpose behind the creation of NATO

It now seemed clear that NATO had decided that, in the event of a conventional attack of any sort, the intention was to retaliate with nuclear weapons. According to a statement by Field-Marshal Lord Montgomery, should a conventional attack be mounted we would, without hesitation or reservation, use nuclear weapons. It might be that in the circumstances this would be the right course to take because if one were aware of impending defeat one would retaliate with all one had got

The Opposition therefore agreed that a deterrent of some kind was necessary, and it might be this was the most effective, but if there was to be a deterrent it should be really effective to avoid the possibility of a dreadful clash Where the Opposition parted company was that they wanted to know why the Prime Minister clung to all the paraphernalia of an organization which might have served the country's purposes in bygone wars, but which was not relevant to the situation which the Prime Minister had described

If it was found that the deterrent was ineffective, the civil population would expect to have the assurance of some protection, Mr Shinwell went on From what the Prime Minister had said, the difficulties were grave, and nothing could obscure the fact that there was no adequate defence of the civil population against nuclear attack He [Mr Shinwell] was not sure whether the Government's assumption that in the event of nuclear war Britain would be attacked from the air, or that she should attack from the air, was correct If the evidence in the Opposition's possession was correct—and it must be in the Government's possession—the Russians, before long, if not now, would be capable of launching from sites in East Germany rockets with atomic war-heads of the nuclear variety, capable of reaching London, 450 miles away, or Paris, 400 miles, and capable of as much destruction—though not so much as an H-bomb—as anything that occurred in months during the last war.

If the censure motion was justified it was because of the tone of the Prime Minister's speech. Many of the sentiments he had expressed were acceptable to the Opposition, but the Government had lamentably failed and should be indicted for their lack of achievement in planning for the future, for their decision to use nuclear weapons in the event of a conventional attack, and for the absence of adequate or partial protection of the civilian population. " There is a terrible prospect before the nation," Mr. Shinwell concluded " The remedy does not lie with the Minister of Defence but with the Foreign Secretary. If he fails there is nothing the Minister of Defence can do to save the people of Britain."

Major Lloyd-George (the Home Secretary) then gave a survey of the civil defence position.

Saying that the problems of civil defence were " so formidable and the ramifications so complicated," that he could present only an interim report, **Major Lloyd-George** stated that it had been decided that the life-saving forces must be organized in three separate but related formations First, in every locality there must be an organization which, if the locality escaped danger, would help with the movement, feeding, and general care of those made homeless by enemy attack elsewhere; and if the locality were damaged would collate information about damage and casualties on which the control of life-saving operations would depend, and would at least make a start with life-saving operations, fighting fires, rescuing the trapped, helping the injured, and directing the homeless

Secondly, it was contemplated that in support of the local service, there should be reinforcements of trained mobile forces, strategically disposed and ready to be sent to help in the places hardest hit The advent of the hydrogen bomb enormously increased the scale of the reinforcement that would be required, and proposals to form 48 battalions, all with a strength of some 600, had been made in the White Paper, this force was as large as could be effectively handled administratively now.

Thirdly, the Government felt that in view of the appalling possibilities more was needed, and they had therefore decided that in future all members of the armed forces, including the Home Guard, would receive training in elementary civil defence duties as part of their normal military training This would ensure that all men in the active forces and the reserves would have a knowledge of the theory and practice of the kind of work It also meant that behind the mobile defence force would be the whole resources of the armed services not actively engaged in repelling the enemy. The armed forces were already equipped and trained to perform many of the duties with which Civil Defence was concerned, and their help would be of particular value in fighting fires and rescue operations.

For both those aspects of Civil Defence it was essential that there should be a nucleus, well trained and highly organized. For fire-fighting there were experienced brigades on which to build, but for rescue work there was no corresponding professional service. It had therefore been decided that the R A F " H " reservists were to be called up for a fortnight's training in each of the second and third years of their period on reserve Training would be given in Home Office establishments by instructors, seconded from regular fire brigades, although the men would be under the control of their own officers for discipline, they would be trained, commanded, and controlled by the Service departments, but would be at the disposal of the civil authorities in wartime It might be suggested that this was inadequate and should be extended, or even that there should be a whole-time professional body of rescue brigades for civil defence. However, experience with the Home Office experimental mobile column showed that in two months or so it would be possible to carry through a training syllabus of real value.

Continuing, Major Lloyd-George pointed out that the new problems, and especially those that would arise from the extensive radio-active contamination caused by a hydrogen bomb explosion, were so complex and had confronted the Government so recently that their plans for dealing with them had not yet reached the stage when they could be made public, these problems were, however, receiving the " most urgent " attention.

In protective measures for the civil population it was of no avail to provide deep shelters that would be proof against a hit or a near miss from a hydrogen bomb, although fairly simple shelters farther from the point of burst would give good protection against blast, heat, or " fall-out " It was equally important to decide how protection could best be given to the vast numbers who might be exposed to the hazard of radio-active " fall-out " far from the target. The Government were considering how best this protection could be given, but before reaching a decision they must be reasonably certain that measures taken were on the right lines

One obvious lead was an organization properly equipped with the necessary instruments to give warning and to make surveys of radio-activity in all parts of the country after an attack by thermo-nuclear weapons The Government fully recognized the necessity of encouraging the production of the specialized instruments required in sufficient numbers for equipping the warning organizations that would have to be set up Tentative plans for a wide variety of civil defence measures were being tested in careful operational studies at the Civil Defence Staff College, and the Service experts involved took part.

Emphasizing that the volunteer forces would remain the foundation of civil defence and that it would be necessary to rely on all civilian volunteer organizations, the Home Secretary announced that the Government had decided to extend throughout the country the encouragement so far given only in the likely target areas to the larger commercial and industrial concerns to form units of the Industrial Civil Defence Service. In conclusion he claimed that, though the problem of nuclear attack was not yet solved, they had at least advanced towards a solution. The view that there was no defence against thermo-nuclear attack, he said, was that of only a minority in the country, and in any event it was a view that no Government could take. It was purely defeatist, and he was certain that to do all that was possible to mitigate the effect of such an attack must be a right and proper part of the defence programme, as the country's best chance of avoiding such an attack was to make clear to the aggressor that they had made every possible preparation to meet it

During the further debate **Mr. Pargiter** (Lab.) and **Mr. Edelman** (Lab) announced that they would not only vote against the Government but would record their disapproval of the Opposition amendment by abstaining, as they were totally opposed to the manufacture of the hydrogen bomb in Britain. **Mr. Fienburgh** (Lab.), on the other hand, expressed the hope that the very manufacture of nuclear weapons would provide the deterrent which would prevent a nuclear war from ever happening, whilst **Mr. Denis Healey** (Lab.) criticized

the "ambiguity" of the White Paper as regards the possible use of nuclear weapons and said that the right line to take was that Britain should use whatever weapons were necessary to halt aggression including nuclear weapons **Mr. Woodrow Wyatt** (Lab.), who also supported the Opposition amendment, described as "ridiculous and dangerously misleading" the Government's claim that the U.K possessed an effective air defence and that it had a better defence against night attack than anyone else in the world.

Vice-Admiral Hughes-Hallett (C.) suggested that the Royal Navy and the R.A.F. should be merged, whilst both **Mr. Dudley Williams** (C.) and **Mr. Shackleton** (Lab.) protested against any alleged attempts on the part of the Navy to get the R.A.F. Coastal Command under Admiralty control. **Sir Leonard Ropner** (C.) criticized the White Paper's failure to mention anything about the Merchant Navy except by implication.

In the continued debate on March 3 statements were made by Mr. Strachey (Secretary for War in the Labour Government), representing the official Opposition view; Mr. Selwyn Lloyd (the Minister of Supply); Mr. Aneurin Bevan, as the chief spokesman of a dissenting Labour group; Mr. Clement Davies, for the Liberals; and Mr. Attlee (Leader of the Opposition). During Mr. Bevan's speech Sir Winston Churchill intervened with a statement on the reasons why it had not been possible to arrange for a top-level conference between Britain, the U.S.A., and the Soviet Union.

Mr. Strachey said that the development by Britain of her own thermo-nuclear weapon would put her into the position of a bee "The bee has a sting," he declared, "but if it uses that sting it dies. Therefore the bee will never use its sting except in the most ultimate necessity. On the other hand, it is true that the possession of a sting by the bee deters people from maltreating it in any way. That, no more and no less, is what the development of a thermo-nuclear weapon will do for us or for any other country."

Having accepted this, however, he criticized the White Paper as "profoundly unsatisfactory," contending that it failed to face the military consequences. In a thermo-nuclear war there would be nothing but mass destruction, mass suicide, and mass murder, and the claim that the new weapon did not radically alter the role of the three Services was "almost incredible" Though everyone must know that it revolutionized the role of the fighting Services, the "agonizing reappraisal" of their role had not been carried out by the Government, which adhered to a conventional arms programme and were "trying to get something of everything and succeeding in getting enough of nothing." Mr Strachey asserted that "the thermo-nuclear revolution" enormously strengthened the argument for a review and a progressive reduction of the two-year period of National Service, and for the return to a smaller, highly trained, and highly equipped long-service professional Army.

In conclusion, Mr. Strachey said that disarmament could only be brought about "as part of a general pacification, negotiation, and improvement in the relationships of the Great Powers." He believed that there was "an ever growing aspiration and impulse in the whole living generation of mankind to escape somehow from the nuclear death trap in which we find ourselves," and that if Britain persisted in pacification by all means at all times as a supreme object of national policy the apparently unsurmountable obstacles might be surmounted. The time to begin negotiation was now, he added. The West could not say that they had met with a stony refusal by the Russians to negotiate. Whatever their motives, the Russians had made offer after offer to negotiate, but the West had so far written off those offers as propaganda Saying that if the Western Powers did not take these offers up they would find that they were "terribly good propaganda" against them, he urged the Government "to take up each offer that is made, test and develop it, and make counter-offers at the present disarmament conference and at every level." "The Prime Minister would have done so," he declared, "but they stopped him."

Mr. Selwyn Lloyd took up Mr Strachey's references to disarmament and recalled having negotiated with the Russians on this subject for three years. "Again and again H.M. Government," he said, "have taken the initiative in putting forward new proposals. If there is any sincerity in this talk of disarmament at present, the Soviet Union has only to make the discussions going on at Lancaster House a success. Mr. Vyshinsky has said that they would accept the Anglo-French proposals as a basis. If the Soviet Government would only discuss those proposals in a reasonable manner and be patient, progress could be made quickly on a practical scheme for disarmament. It is not enough just to say 'peace, peace, peace' [a reference to Mr. Strachey's closing words]."

Dealing with the supply of military aircraft, Mr. Lloyd said that whereas it had taken 50 years to reach the speed of sound in flight, it looked as if it would take only 7-10 years to develop fighting machines which would go two or 2½ times the speed of sound. It was one thing to make flying machines which would travel at this tremendous speed, and another to produce a fighting machine. To illustrate the increasing complexity of the modern military aircraft, he mentioned that the pre-war bomber carried less than 150 lb. of radio and electrical equipment, whilst the latest carried 9 000 lb., and the number of radio valves had risen from 50 in a wartime bomber to 1,000 today. The approach to and progress beyond the sound barrier would lead in due course to the "heat barrier," one of the most serious problems facing those designing aircraft.

One of the major matters constantly agitating everyone was how to reduce the time taken to develop a new and modern breed of aircraft, said Mr. Lloyd. It was always possible to achieve greater speed of development at the expense of quality. It was true that the Russians appeared to have produced the *MIG 15* remarkably quickly—after British *Nene* engines reached them in 1947—but it was not known for what period of time the aircraft had been designed and developed before that The Government had been considering ways of reducing this development time, without sacrificing quality. The broad conclusion he had formed was that it was impossible to avoid having to plan six, seven or eight years ahead This involved difficult, long-range assessments of the nature and quality of the potential threat, and equally difficult judgments of what might be technically possible within such a space of time

An "astonishing" number of aircraft had been on order when the present Government took office in November, 1951. Many of the orders had been placed after the outbreak of the Korean war, and no one could complain about action taken in an emergency, but looking back one wondered how it was thought financially or physically possible for such a programme to be achieved A certain amount of sorting out and tidying up had to be done by the Government, and in the light of the international situation and the country's resources progress had to be reviewed and changes made. As a result, of 1,000 *Venoms* ordered in the first months of 1951, 750 had been cancelled, and of the *Canberras* ordered before November, 1951, about one-third had been cancelled.

Dealing with the production record since the Government's assumption of office, the Minister stated that between November, 1951, and the end of January, 1955, the total number of aircraft delivered for service had been 5,500 If one included the estimated total for delivery in February and March, 1955, the number was nearly 6,000, including over 200 *Hunters*

It had been said that all the aircraft delivered were obsolete, but if that were true one wondered they were ever ordered. For example, if the *Venom* night fighter was as ineffective as some Opposition members appeared to represent, why were 400 ordered by the late Administration in 1951? Over 200 had been ordered in September and October, 1951, at a time when delivery dates were well known to extend up to the middle of 1954. The previous Government, Mr. Lloyd said, thought presumably that those aircraft would be of value at least up to the middle of 1958—and he thought they were quite right. In fact they were not obsolete aircraft; the majority were useful interim types, and some, like the *Hunter* and the *Canberra*, were much better.

The *Valiant*, now entering squadron service with the R.A.F., although less advanced in design and performance than the other "V" bombers, would add greatly to the nation's deterrent strength Its performance as a medium bomber was superior to that of any other comparable aircraft in service The *Victor* and *Vulcan* bombers were progressing well in both development and production, and would further reinforce the nation's deterrent strength

The *Hunter* fighter was over its main development troubles. Some R.A.F. squadrons were equipped, and others were being equipped, with these aircraft. If war began tomorrow it could go into action as an extremely effective day fighter, comparing favourably with aircraft of any other country and capable of dealing adequately with anything an enemy could send against Britain within the next few years. Further *Hunters* would be ordered to replace the cancelled *Swifts*.

It might be said that the extent of the disappointment over the *Swift* should have been realized earlier and action taken in the early stages. Action had been taken, follow-on orders had not been placed, the manufacturers had themselves not begun production of the total number ordered, and during the last few months had, in close consultation with the Ministry, reduced the industrial effort on the *Swift* to save public money in case later cancellations should be necessary. Only last month had those responsible for giving the best technical advice been able to say that it was no longer likely that within a reasonable time the *Swift* could be made to match the *Hunter* in its performance as an interceptor fighter. When he became Minister last October the *Hunter*, as well as the *Swift*, had been in difficulties, and the decisive factor in the Government's present decision not to proceed with the *Swift* had been the success of the *Hunter*, which was not fully assured until the end of last year. "Of course," Mr Lloyd added, "it has been an unsatisfactory story. Any comparative failure is deeply to be regretted, but it is foolish to believe that every development plan will succeed. It is impossible to embark on a programme of the magnitude which the Labour Government started, and which the present Government has carried on, without there being comparative failures of this kind."

Dealing with night defence he admitted that the *Venom* and the *Meteor* were interim types, but stressed that there were many things which had to be considered about night fighters, such as the crew carried, equipment, and the serviceability. Taking all those matters into consideration, he would repeat categorically that it was the Government's view, based on the best advice obtainable, that the statement in the White Paper about the superiority of Britain's defences against night attacks was a truthful and accurate account of the present situation.

Speaking of the "unqualified success" of British aero-engines, Mr. Lloyd mentioned that since Nov. 1, 1951, over 12,300 engines would have been delivered for use in military aircraft in the U.K., and that this had been achieved at the same time as extensive development of engines for civil aircraft and the sale overseas of many engines. The pre-eminence of British aero-engines was shown by the fact that 120 manufacturing licences had been negotiated for them in nine countries for nine different engines, and that several British-designed turbine engines had been adapted for service with the U.S. forces. "When we are blamed for 'mess and muddles' in the production field," he added, "those facts should be known."

Turning to guided weapons, the Minister said they had no guided weapons in operational use at the present time, which was "a grave

and admitted deficiency." However, he did not wish to praise or blame the decisions of the late Government in this field. It might have been right to do practically nothing until 1947, and to decide then that only research should be undertaken and this almost entirely in Government establishments; it might have been right not to place any development contracts until 1949, and then of only two weapons, and to leave office in 1951 without placing production contracts; and it might have been right to lag three or four years behind the United States. But what was wrong was for those responsible for all that to come along and blame the present Government because they had not got the weapons in service Reasonable progress was now being made, the pace of which had been governed by decisions of six or seven years ago There was exchange of information with the U.S.A., and in spite of the U S lead in this field that lead was not being increased Representatives of major firms concerned were satisfied with their capacity to carry on in spite of the other great demands made on them.

After expressing gratitude for the Australian Government's co-operation in the extensive trials and tests of guided missiles at the Woomera range, Mr. Selwyn Lloyd stated that there was "a real sense of urgency," that production orders had been placed for one weapon, and that other orders were expected to be placed this year In the years 1955-56 10 times more would be spent on the guided weapons programme than in 1951, and 100 times more than in 1949 In electronics five times more had been spent in the year ending March 31, 1954, than in the year ending March, 1950, and had been accompanied by larger exports of the electronics industry—£29,300,000 in 1954, compared with £18,200,000 in 1950

Turning to other aspects of defence production, Mr Lloyd said that the U.K 's control and reporting system was the best in the world; that a new navigational and bombing system of very high performance had been developed since 1948 and that production had begun; and that a new aircraft navigational system based on entirely new principles had also been developed The Army had been re-equipped with *Centurion* tanks, and more than £100,000,000 of these tanks had been sold overseas. The *Conqueror* tank was now being issued to the Army. Ammunition production was five times that of 1950, and $50,000,000 worth had been supplied under the U S. offshore programme Design of the new anti-tank gun was proceeding fast, and more than £200,000,000 of work had been done on wheeled vehicles since 1951.

Whilst the process of development was certainly capable of improvement, he went on, it was essential to maintain a research programme ahead of current development, and never again would the mistake of ordering inadequate numbers of prototypes be made Thus it had been found possible to make modifications to the three "V" bombers without delaying production. It was clear that the space of 10 years between an aircraft and its successor was too long, as had been proved by the swept-wing fighter. Some 11 supersonic projects were now being worked on. Development of the *Javelin*, which he believed would be the most advanced all-weather fighter, was making good progress.

Although undoubtedly mistakes had been made, Mr. Lloyd concluded, the criticisms of what had been achieved had been "unfair and unbalanced" The Government were well aware of the urgency of the need to avoid over-straining the country's resources of scientific knowledge, skill, manpower, and materials, and they were determined to ensure a real spirit of co-operation between the manufacturer, the Service Ministries, and the Ministry of Supply Without being complacent he believed that a worthy effort was being made to achieve the deterrent power and defensive capacity appropriate to Britain's standing as a world Power.

Mr. Aneurin Bevan asserted that the Government's record had caused "great alarm" among the Government's supporters, and in newspapers which were "normally 101 per cent their supporters." *The Times* had talked of "trying to take too many steps," and the *Daily Telegraph* had suggested an examination of the capacity of the aircraft industry to find out whether too much was being attempted. It was not enough, however, to blame the difficulties on decisions taken or not taken by the Labour Government. "The country is tired of it," he said, 'and is getting tired of this Government who are showing an increasing incapacity to preserve the peace and a failure to provide the weapons to fight a war. It is exactly what happened before the last war, and is a grim picture."

Mr. Bevan went on to say that the assumption on which the programme was based was "as inaccurate as the assumptions underlying the Prime Minister's speech yesterday" "In 1950-51 they said we had three years. It has turned out to be more. Yesterday the Prime Minister said we had three or four years, but this might be wrong. They are merely wild guesses. The difficulty of the Prime Minister in making a speech in the House arises out of his extraordinary capacity for presentation. The mediocrity of his thinking is concealed by the majesty of his language." Sir Winston Churchill had told the nation and the world that the hydrogen bomb and the atom bomb between them had produced circumstances in which negotiation might be more fruitful What they wanted to know was when would the negotiations start? The Prime Minister's speech "fundamentally had no sense at all in it, though it was well garbed."

"I would warn members," he continued, "—and this applies not only to the Socialist Party but to Conservatives and the nation as a whole—that the ordinary man and woman is beginning spiritually to contract out of the quarrel. We are displaying a posture of little minds before big events, and the ordinary man in the street is beginning to sense it. He is beginning to realize that we have not got the stature of the occasion, as was revealed yesterday and today If it be true, and I think it is, what the Prime Minister said yesterday, will he tell the House why he does not insist upon meetings with the Russian leaders? It may be that they are not sincere in what they say, but there is only one way of finding out, and that is to meet them. It may be that the Prime Minister would like to do it but that the United States won't permit him. That is a sombre thing to say, it is a wicked thing to believe, but we have now reached a situation in Britain where we can in a few short years, run the risk of the extinction of British civilization and we cannot reach the potential enemy in time to arrive at an accommodation because we are now at the mercy of the United States"

Here **Sir Winston Churchill** intervened, making the following statement "It is absolutely wrong to suggest that the course which we have followed has been at the dictation of the United States It is quite true that I would have liked to have seen a top-level conference of the three Powers I would have liked to have seen it shortly after Mr. Malenkov took power, to see, as I said 'Is there a new look?' I wanted to do that, and my colleagues agreed. I had charge of the Foreign Office owing to the Foreign Secretary's illness I prepared to go over to see the President and hoped to arrange with him to invite a three-Power conference. However, I was struck down by a very sudden illness which paralysed me completely physically. I had to put it all off, and it was not found possible to persuade President Eisenhower to join in that process.

"I have also considered the possibility of a dual meeting at some neutral place like Stockholm While I was thinking about these matters—because I really have not been a ditherer on the subject—I have tried my very utmost. I would not retain the headship of our Government on a subject of this kind if they were not acting in what I thought was a sincere and honourable mood. I had hoped that after my last visit to America something like a dual meeting might take place at Stockholm, or somewhere, and that it might be a sort of go-between prelude to a meeting of the three, because we cannot settle anything alone that would be decisive But then the Soviet Government began a very elaborate process of trying to stop the ratification of E D C. which I thought had been more or less accepted. It was certainly a very harmless form of protection

"Therefore all this other matter has come up now and has stood in the way of further general talks. But when the ratification is complete any Government who are responsible at that time will be perfectly free to take up these negotiations and to hold either on the Foreign Office level or on the heads of Government level a perfectly open and free discussion."

Mr. Bevan welcomed the Prime Minister's statement but maintained that it was a complete confirmation of what he [Mr Bevan] had said The Prime Minister had wanted to visit President Eisenhower in the hope of converting him to the project, but failed to do so All regretted his illness, but for many months he had been in his usual robust health and there had been plenty of opportunity. The nation would read what he had said with considerable apprehension because "trivial reasons" seemed to be standing in the way of such an important project.

Since the Opposition amendment to the Government's motion had been put down, continued Mr. Bevan, a change had taken place in the interpretation of the White Paper, and they were now given to understand that when reference was made to hydrogen nuclear weapons as deterrents it was meant that they would be used at once in the beginning of any sort of hostilities "Do the leaders of the Opposition," he asked, turning to Mr. Attlee, "mean in their amendment what the Government meant in the White Paper? Do they mean that nuclear weapons will be used with the support of the British Labour movement against any sort of aggression? If the Leader of the Opposition says that is the interpretation of the amendment, then I do not propose to vote for it this evening, because we have never said, indeed it would be plain insanity for us to say it, that wherever aggression occurs in Europe, no matter of what sort, we answer it by the use of nuclear weapons, which the Prime Minister told us yesterday would involve the destruction of the British nation."

"We are told," he went on, "that here in atom war whatever happens we die The C.-in-C of the Allied Forces (Gen Gruenther) has said that whether or not the enemy uses the weapon at all we will use it at once. So that we immediately use the weapon which when used against us results in our extinction Does the Prime Minister think that if the people of this country understood that he would be in office for a week?"

All that the Prime Minister had said was that he was postponing discussion with the Soviet Union to get a German army that everyone knew would be of no use All the generals were saying that armies would be of no use It was true to say that if such a war broke out the armies would be farther away at the end than at the beginning because they would have to march away from the radio-active areas they created. "So if you want to be safe join the Army," he added.

"The Prime Minister said yesterday," Mr. Bevan concluded, "that he would meet the Soviet leaders, talk tough, and then have supper. The last supper, I presume? The world has reached a point where international difficulties have to be negotiated or man dies . . . The issue is simple. Is Britain to talk peace or to talk war? I beg the Government to measure up to the magnitude of the problem. Let the Prime Minister do deeds that match his great words, not attempt to delude the country by the majesty of his language but inspire it by the dedication of his behaviour. That is what we want from him. We also want an assurance from the leaders of the Opposition that the language they have used does not align this movement [i.e. the Labour Party] behind that recklessness. If we cannot have a lead from them let us give a lead ourselves"

Following Mr. Bevan's speech, both **Mr. Driberg** (Lab.) and **Mr. Yates** (Lab.) announced that they would not support the Labour amendment. **Mr. Daines** (Lab.), on the other hand, attacked Mr.

Bevan's attitude, saying that whilst Mr Bevan had criticized the Prime Minister's phrases and rhetoric, he [Mr. Bevan] was also "a master of phrasing." "The difference is," he added, "that the Prime Minister's phrases are premeditated and stand the test of time, while Mr Bevan's are not and do not stand the test of time." It was also important to recall that Mr. Bevan had been a member of the Government which decided to make the atom bomb, and that on moral grounds there was no difference between the atom bomb and the hydrogen bomb.

Mr. Clement Davies (L) said that the Prime Minister's massive speech on the previous day would probably rank as one of his greatest orations, but that his later intervention would be far more important In that intervention he had brought out that there was a distinct division of opinion in the free world—a matter which concerned the House more than anything else. Why had there been no top-level meeting, he asked, and how was it that Britain and the U S A could not agree on a common policy?

Mr. Attlee said that the Prime Minister had set out with great power the position in the world today. It was a pretty grim picture no less than the danger of the destruction of civilization if war should break out. "It is as well that everyone should know that," he added. "I have lived with this sombre topic for some time and it is present in my mind every day."

All recognized that there was no defence of Britain in the ordinary accepted sense of the word. Another war would mean not only a catastrophe to ourselves but to civilization. There would be no victor. We were, therefore, driven to rely on deterrence—the knowledge on the part of any would-be aggressor that retaliation would be devastating and certain. It was important to stress that word "certain," because in the past wars had broken out partly through uncertainty.

The rulers of Soviet Russia were not moved by sentiment or humanitarianism They had massacred hundreds of thousands of their own people But they were moved by self-interest, and somehow there had to be a meeting of the leaders of the great Powers to persuade the Soviet rulers that in their own interests peace must be preserved. They must also realize that the free peoples were resolved to preserve their freedom, that they had the means for instant retaliation, and that they would use those means in the event of open aggression. That might lead to the acceptance by the Soviet rulers of co-existence as the only alternative to co-annihilation, and might lead to an all-round reduction of arms

"I think the recognition that another war would mean a suicide of civilization really gives us a gleam of hope," Mr. Attlee declared. "That is why I cannot take such a gloomy view as was taken by some of my friends who think that this is the most terrible White Paper they have ever seen It is frightening perhaps, but there is a hope there. It is more hopeful than White Papers that contemplated wars with conventional weapons"

Continuing, he said that as the country's only defence was the power of counter-attack the whole defence organization must be viewed in the light of that entirely new condition In the White Paper there was, however, evidence of a divided mind, for the acceptance of the main thesis had not been carried to its logical conclusion, although there was an advance over the last White Paper with its "illusory" conception of broken-backed warfare.

Dealing with the civil defence proposals, he said that a hydrogen weapon, as it was now developed, could make an area the size of Wales unsafe for human beings. A comparatively small number of bombs could make this small island practically uninhabitable, and one had to take a realistic view of it. The Home Secretary talked of getting the people out of the towns, but where were they to be taken? Where was the safe area? It depended which way the wind was blowing and where they were dropping the bombs, and no one knew He knew nowhere where people could go in advance to escape, and he thought the prospects of evacuation, once the trouble had started, were small. It was necessary to have the Civil Defence Organization, but it had to be something very different from the Civil Defence of the last war, and he did not think it had been properly worked out to that extent.

Mr. Attlee thought that there was also no real acceptance of the changed conditions regarding the role of the armed forces. He could not conceive that in the event of a modern war they would be able to send large masses of people and ammunition across the Channel. It was difficult to see how big massed armies were going to operate at all if nuclear weapons could now be discharged from artillery, and there would have to be a far greater amount of dispersal. He agreed that there was a need for "a screen of some kind" on the Continent, but this could be "nothing like the mass to equal the 400 Soviet divisions" and should be "the minimum necessary." The time had come when what was wanted was something like Combined Operations—small, highly trained and highly skilled forces of all arms and all Services, which could be put in where they were needed. It also seemed doubtful whether capital ships could operate in narrow seas, and here again what was needed would be small units and dispersal.

Mr. Attlee therefore called for "an unprejudiced review" because Britain could not afford to have "an immense mass of so-called conventional arms and on top of it all the expense of the atomic or hydrogen weapon." He also demanded "a strong attitude" on the part of the Minister of Defence in withholding manpower which was not required, because "the more is put into armaments the less there is for the constructive work that is to be done all over the world of trying to prevent the spread of Communism in the least-developed parts of the world, which are the most favourable ground for the sowing of the seeds of Communism."

Referring to the disarmament conference now in progress he said that surely this was the time to make a big effort to rid the world of the menace of another war. He could not think there was anything so important as that, and he was sure the Prime Minister shared his wishes. "It means," he concluded, "that we should renounce any suggestion that we should try to enforce our views on others. The rulers of Russia must also give up their dream of enforcing Communism throughout the world, and they must accept co-existence. Britain, with her tradition and her position, is particularly well placed to make the greatest possible efforts for peace. We have influence in the world, which does not depend solely on the possession of weapons, though the fact that we do possess weapons has its effect on the rulers of other lands."

When **Mr. Bevan** asked if the Opposition amendment associated them with the statement that thermo-nuclear weapons would be used in hostilities although they were not used by the other side, **Mr. Attlee** replied "I am using [in the amendment] the most general terms, not referring to anything in the White Paper, on the general thesis —with which I think Mr. Bevan agrees—that deterrence, by the possession of the thermo-nuclear weapon, is the best way of preventing another war."

The debate was wound up for the Government by Mr. Macmillan, the Minister of Defence.

Describing the debate as a "rather queer" one, **Mr. Macmillan** said that at times it had not been clear "who was censuring whom," but that Mr. Attlee's speech had contained hardly one word with which anyone on the Government side would disagree There was one dangerous fallacy which the debate had done much to expose —that of partial disarmament. There was no halfway house in disarmament; indeed, it would leave the country in mortal danger. It was easy to start the cry "Ban the bomb!" It was no doubt started for humane reasons by the most humane people, but it was really an illusory conception Would war cease to be a black-guardly affair and become a gentlemanly affair again, Mr. Macmillan asked. Were those experiences of two great wars so tolerable that they could be looked at, even in retrospect, without horror? "If 'Ban the bomb' means going on with war without nuclear war, then I am against it," he added.

Ruling out nuclear warfare would involve a complete system of inspection and control of almost every detail of industrial production and scientific research If agreement could be reached on that, surely such a degree of understanding would have been reached that it ought not to be difficult to go on and reach agreement on the rest. "If we could go some of the way," Mr. Macmillan said, "we ought to be able to go the whole way What we cannot afford to do is to go half way and leave ourselves exposed."

As regards high-level talks, the Foreign Secretary had had 2½ months of discussion with Mr. Molotov, first in Berlin and then at Geneva, and more had been done to create the proper conditions for disarmament than ever before. When free Europe was consolidated and was no longer vulnerable to disruptive propaganda, the next stage could begin Meanwhile, the British representatives would go on working hard at the talks now going on in London with the hope of framing at least the first picture, the groundwork, for a system of disarmament, to which—and this was an important point—a rearmed Germany would have to conform

On the whole question of disarmament, continued Mr Macmillan, the Government's purpose was simple and their record clear. Any genuine disarmament must be based on two simple, vital principles: it must be comprehensive, including all weapons conventional and non-conventional; and control must provide for an effective international, or supranational, authority invested with real power

The argument that because the main deterrent force was American there ought not to be a British contribution was a dangerous doctrine. Politically it surrendered British power to influence American policy, and strategically and tactically it deprived Britain of any influence over the selection of targets and the use of her vital striking force. Possession of the deterrent would also give what democracies always needed—time. Democracies could never be mobilized to the hilt, but the tyrant's finger was always on the trigger. There might be no complete defence against thermo-nuclear attack, but there might be mitigation. That there was nothing they could do except lie down was an assumption they had no right to make.

Mr. Macmillan said he had been asked what would constitute a major war. Would some incident in one place or some minor attack in another count as a major war? That was a question easy to pose, but dangerous to answer. If he said "No," it would be an encouragement and an incitement to the Soviet to attack some Scandinavian country. It would be cold comfort to those small countries for him to say "No."

It was important that the aggressor should know what he might not do, but it was equally important that he should not be told too invitingly what he might do. Surely the decisions would depend upon what kind of attack. Some small incident would be dealt with by conventional weapons or diplomatic means, and one would hope that it would be stopped and never allowed to develop A massive attack upon a wide front could not be launched without some preparation that could be detected, a clash on such a scale would amount to total war Those decisions would not lie with generals, or even field-marshals, however distinguished. They lay with the Governments of the free countries.

The need to dispose of the "more normal incidents" by conventional weapons seemed to dispose of the argument that the Government should abandon such weapons altogether; indeed, they might prove the only means to prevent an incident from developing into a real war. It had been argued by Mr. Bevan that conventional

aggression should not be met with nuclear weapons, but presumably he intended to meet that sort of attack with something With what?" Mr Macmillan asked "Surely with conventional weapons Then what becomes of the talk about the useless army and the millions of pounds that have been wasted?"

Another argument underlining the continued importance of conventional forces and weapons was the fact that the more terrible the deterrent, and the more rapidly the rival forces reached a kind of stalemate, the more the Communist Powers might be encouraged to attempt infiltration and subversion, which could not be done by open warfare. In other words, the same forces which made a hot war less likely would, by a strange paradox, serve to increase the temper and fever of the cold war "The quiet, steady sense of support and security provided by a well-planned distribution of the armed resources of the U.K. and the Commonwealth is an essential element in fighting the cold war," Mr. Macmillan concluded. "For these dual functions, the preparation and prevention of the hot war and the guarding of freedom in the cold war, all three fighting Services have to be always ready, their roles are not competitive, but complementary."

On a division the Opposition amendment was rejected by 303 votes to 196—a Government majority of 107—and the Government motion adopted by 303 votes to 253.

Altogether 62 Labour members abstained from voting on the official Labour amendment. These were

Sir Richard Acland, Mr. Baird, Mr Bence, Mr. Beswick, Mr Bevan, Mr. F. G. Bowles, Mr. A. F. Brockway, Mr. T Brown, Mr. Carmichael, Mrs Barbara Castle, Mr. J Clunie, Mr Craddock, Mrs. Cullen, Mr Hadyn Davies, Mr S. O. Davies, Mr. Driberg, Mr Edelman, Mr. John Edwards, Mr. Fernyhough, Mr. Michael Foot, Mr Forman, Mr. W. J. Greenwood, Mr. D. R Grenfell, Mr William Griffiths, Mr. James Harrison, Mr. Hubbard, Mr James Hudson, Mr Emrys Hughes, Mrs. Jeger, Mr. F. E Jones, Mr T W Jones, Miss Jennie Lee, Mr. Arthur Lewis, Mr J. P. Mallalieu, Mr. Manuel, Mr Monslow, Mr. Orbach, Mr. W Owen, Mr. Wilfred Paling, Mr. William Paling, Mr. Pargiter, Mr. Parkin, Sir Leslie Plummer, Mr Rankin, Mr Reeves, Mr. William Reid, Mr. Hervey Rhodes, Mr. G O. Roberts, Mr. Kenneth Robinson, Mr Charles Royle, Mr Shurmer, Mr. Julius Silverman, Mr. S. S. Silverman, Mrs. Slater, Mr. Snow, Mr Sorensen, Mr. H. B. Taylor, Mr. Usborne, Mr. Warbey, Mr. Weitzman, Mr. L Williams, and Mr. Yates.

The difference between the number of Labour members voting in the first and second divisions was, however, only 57 (i.e., 196 and 253); this was accounted for by the fact that five Labour members who voted for the official Opposition amendment did not stay for the vote on the Government motion.

It was noted in the Press that some Labour members generally held to be in sympathy with Mr. Bevan's ideas—e.g., Mr. Harold Wilson, Mr. Wigg, Mr. R. H. S. Crossman, Miss Herbison, and Mr. Leslie Hale—did not follow his example, but supported the official Opposition attitude.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14089 A.)**

Note. Sir Winston Churchill's remark about the nature of his illness in 1953 was the first public indication of the full reasons which caused the postponement in June 1953 of the proposed Bermuda conference between Sir Winston, President Eisenhower, and the French Prime Minister (then M. Laniel). At that time it had only been announced that the Prime Minister was in need of a complete rest (see 13004 A) After a prolonged stay at his home at Chartwell and a holiday in the South of France Sir Winston resumed his full duties at the end of September 1953 It was stated, however, that during his absence he had "not ceased at any time to hold and exercise the responsibility belonging to his office" and had been "consulted on every decision of policy" (see 13168 B) (Ed K.C.A.)

A. ANTARCTICA. — New Chilean Bases in Falkland Islands Dependencies. - British Protest.

A new Chilean naval base on Deception Island in the Falkland Islands Dependencies was officially inaugurated on Feb. 18 by the Chilean Defence Minister, Señor Tobias Barros. A British protest against the establishment of the base on British territory was rejected on March 8 by the Chilean Government, which claimed that the base was on Chilean soil. This was the fourth Chilean base to be established in British Antarctica since the war, the others being at Greenwich Island, South Shetlands (established in 1947); Discovery Bay, Grahamland (1948); and a further post in Grahamland (1948). (Times - Manchester Guardian - New York Times)

B. SOUTH AFRICA. — Parliamentary By-elections.

Mr. Jan de Klerk, Minister of Labour and of Public Works, was elected a Senator for the Transvaal on Feb. 18, 1955, in succession to Senator W. H. Scheepers, who had resigned on Dec. 8. The Speaker of the House of Assembly, Mr. J. H. Conradie, announced on Feb. 8 that Mr. H. A. Rust (National) had been returned unopposed to fill the vacancy in the Piketberg constituency caused by the resignation of the former Prime Minister, Dr. Malan.—(Cape Times)

C. SOVIET UNION. — Dr. Pontecorvo discloses his Presence in Russia. - Adoption of Soviet Nationality. - U.K. Proceedings for Withdrawal of British Nationality.

Dr. Bruno Pontecorvo, the British atomic scientist who disappeared in 1950 while on holiday from Harwell (the British atomic energy research establishment), disclosed in an article in the Moscow newspapers *Pravda* and *Izvestia* on March 1 that he had since been working in the Soviet Union. Although it had long been suspected that Dr. Pontecorvo had gone to the Soviet Union from Helsinki, his last known whereabouts in the Western world, this had never been confirmed.

In the article Dr Pontecorvo denied that he had been "kidnapped" by Soviet agents, stated that he had sought political asylum in the Soviet Union for his wife and family; and said that he was working with the Institute of Physical Problems of the Soviet Academy of Science, "carrying on, together with other scientists, scientific research work in the sphere of using atomic energy for peaceful purposes" Explaining his reasons for leaving Britain, Dr. Pontecorvo said that the situation for him in that country had become "intolerable" by 1950, he had been subjected to "direct questioning and systematic blackmail on the part of the police authorities," and this had convinced him that he could "no longer preserve my dignity where I was."

Most of the article was devoted to a plea for the prohibition of atomic and nuclear weapons, in which connexion Dr. Pontecorvo declared: "As a result of following world events with attention, I have become convinced that the imperialists of such countries as the U.S A. and Britain have . entirely subordinated the discovery of atomic energy to the interests of preparing for another war with the use of atomic and thermo-nuclear weapons to achieve world domination. The decisions adopted by the NATO in December 1954 once again confirmed it.

"The peace-loving proposals of the Soviet Government meet with no response on the part of the Governments of a number of capitalist countries; they are not being presented to the broad public opinion. Moreover, these proposals are being distorted by the bourgeois Press in order to confuse these countries and to foment a war psychosis and increase international tension. Having stayed in the Soviet Union for a long time, I am already sufficiently acquainted with the peace-loving policy of the country and have all grounds for speaking of the deep, misleading state of mind in which honest people, including my physicist acquaintances, find themselves in the capitalist countries . . .

"The seriousness of the situation created by the threat of a revival of German militarism and the intention of warmongers to prepare atomic war oblige every honest man, especially the scientist, to do everything in his power to ward off the creation of a new war. It is necessary to fight incessantly for the prohibition of the application of atomic and nuclear weapons, and to use atomic energy solely for peaceful means."

After denouncing the dropping of the first atomic bomb on Hiroshima, Dr. Pontecorvo urged his former colleagues in Italy, France, Britain, the U.S.A., and Canada to protest against the use of atomic energy for military purposes He said that he had become convinced that in the Soviet Union the main attention of scientific thought was directed at using atomic knowledge "for the well-being of humanity, in the interests of peace, progress, and bettering the material well-being of the people," and added "The conditions under which I work are splendid. The technical equipment is most excellent and the research work is being carried on on a large scale and at a high level All this has permitted me, together with a group of scientists, to carry on a number of researches, the results of which we are preparing for publication"

The article was signed "Bruno Pontecorvo, professor and Stalin prizewinner," this being the first indication that Dr Pontecorvo had been awarded a Stalin Prize

On March 4 Dr. Pontecorvo gave a press conference in Moscow to foreign correspondents, during which he disclosed that he had given up his British nationality and become a Soviet citizen in 1952.

Asked about the nature of the work he was doing, Dr Pontecorvo denied that he had ever worked on the military applications of atomic energy, and explained that, being interested in the physics of high energy, he was working at present on the "problems of the production of mesons in collision with particles of high energy and the diffusion of mesons" Asked how he would rate his own contribution to the development of Soviet atomic technique, he replied "My contribution to the development of the first atomic power station is equal to zero I can honestly say that my experience in this is less than that of Soviet scientists"

Dr. Pontecorvo again referred to the "aggressive character" of "the Atlantic bloc" and to the peaceful intentions of the Soviet Union, and accused "the reactionary Press in the capitalist countries" of "befuddling the minds of many people."

The British Home Secretary (Major Lloyd-George) announced in the House of Commons on March 10 that immediate steps were being taken under Section 20 of the British Nationality Act, 1948, to deprive Dr. Pontecorvo of his United Kingdom citizenship.—(Times - Manchester Guardian - New York Times)

(Prev. rep. 11421 C.)

A. UNITED KINGDOM - UNITED STATES. — Sir Anthony Eden's and Mr. Dulles's Statements on Return from Bangkok Conference.

A report on the Bangkok Conference of South-East Asia Defence Treaty Powers, his visits to various Asian countries, Middle Eastern defence, and the Formosa question, was given by Sir Anthony Eden, the British Foreign Secretary, in the House of Commons on March 8. In the course of his speech he stated that he had reluctantly come to the conclusion that the conditions did not yet exist for a conference on Far Eastern problems at which both the Chinese Communists and Nationalists could be present. He nevertheless pointed to various factors which indicated a relaxation of tension in the Far East, and suggested a number of objectives which, if realized, might lead to international consideration of Chinese representation in the United Nations and of the future status of Formosa. Sir Anthony's statement was as follows (cross-headings inserted):

Middle East. "... I found in the Middle East a general acceptance of the need to organize a safe shield of defence to protect the area from aggression from without. There is also a recognition that the security and prosperity of the area cannot be fully realized so long as the present disruptive relations persist between the Arab States and Israel, now unhappily aggravated by further recent incidents Thirdly, all the States I visited—Egypt, Pakistan, Iraq, and the Lebanon—were anxious to be able to pursue the plans for economic development on which they have embarked. The Government are in sympathy with all these aims and are ready to help in so far as they can to realize them.

While in Baghdad I discussed with the Prime Minister of Iraq the questions which would arise if H.M. Government were to accede to the Turco-Iraqi pact (see 14057 A) ... Our aim is to forge a new association with Iraq which will bring our relations into line with those which already exist with Turkey and our other partners in NATO. New weapons and changed political conditions should be reflected in a fresh approach to our joint arrangements for resisting external aggression in this area. Our common needs can now best be provided for in different and more up-to-date ways than those which were embodied in the Anglo-Iraqi Treaty more than 20 years ago."

South-East Asia. "The Bangkok Conference, while mainly organizational, has been none the less important ... [It] worked out an acceptable programme for defence policies and economic problems between the countries who are member-States; it also did nothing to hinder the subsequent association of other countries in this area. However this may develop, I have confidence that we shall see steadily improving relations between all the free countries in this part of the world whether members of SEATO or not. And that is the result we want to see.

But we recognize that this work of regional co-operation represents only one means of strengthening peace and stability in South-East Asia Another essential contribution to the same end was the agreement concluded at Geneva last summer which ended the fighting in Indo-China and established the independence of the three Associated States. The Governments represented at the Bangkok Conference reaffirmed their determination to support these States in maintaining their freedom and independence. When I went on to Singapore after the Bangkok meeting I discussed the situation in Vietnam, Laos, and Cambodia with our representatives in these States. This formed part of a wider meeting with the Commissioner-General in South-East Asia and our civil and military representatives throughout that region. This discussion was most valuable to me.

My visit to South-East Asia has brought home to me how closely the countries of the area cherish their independence. Each country wants to develop in its own way, and their own ways may differ widely. They want to shape their own destinies with the minimum of outside interference and pressure Democracy in those countries will grow stronger as they gain confidence from its practice and example.

From Singapore I flew to Malaya and spent a memorable day, with the help of helicopters, in seeing the work of our Commonwealth forces. The spirit in which these men are facing their daily ordeal of foul discomfort and danger is beyond praise, and the success they have won is a splendid tribute to their leadership and to them."

Formosa. "While I was in Bangkok I had separate and helpful discussions with Mr. Dulles about the situation in Formosa and the coastal islands. I also maintained during my journey the contacts which had been established with Moscow and Peking, and which are still continuing. In the light of these exchanges I again considered, on the subject of Formosa, whether any further progress could be made through a conference or other discussions. I had valuable conversations about this on my way home with the Prime Minister of Burma and with Mr. Nehru, who received me with the utmost kindness as the first British Foreign Secretary to visit the Indian capital. After these talks, and on the basis of the information about the attitude of the Chinese Government which reached me from Peking, I came reluctantly to the conclusion that the necessary conditions for progress do not yet exist. We are, however, going on working to try to bring them about and meanwhile to prevent incidents and further fighting.

We cannot, of course, impose our views upon the parties more directly concerned nor decide for them where their own true interests lie. Nor can the many different aspects of this tangled problem be settled all at once. But the House will wish to know ... what is the position of H.M. Government in this situation and what, in their view, are the lines along which progress is to be sought. Its main elements seem to me to be these:

(1) The U S. Government has already given positive proofs of its desire to relax tension and reduce the risks of war I am convinced —I say this with all the conviction in my power—that it wishes to see conditions created which would put an end to active military hostilities in the area and reduce the dangers of a wider conflict. In its treaty with Chiang Kai-shek it has explicitly limited its own formal commitments to the defence of Formosa and the Pescadores It has effectively restrained the Chinese Nationalists in recent weeks from initiating attacks against the Chinese mainland It has persuaded the Nationalists to evacuate the Tachen and Nanchi islands.

(2) The Chinese People's Government for its part has refrained from attacking Quemoy and the Matsu H.M. Government trust that it will continue to exercise this restraint and that it will make it apparent that, while maintaining intact in all respects its position in regard to Formosa and the Pescadores, it will not prosecute its claims by forceful means.

(3) It is equally desirable that the Chinese Nationalists for their part should also do two things. We would like to see them withdraw their armed forces from the other coastal islands We would also hope that they would let it be known that they too, while maintaining their claims, will not prosecute them by forceful means and will abstain from all offensive military action.

I suggest that, if these objectives could be realized, consideration could then be given internationally at an appropriate moment to the problem of Chinese representation in the U.N. and to the future status of Formosa Any attempt ... to make progress along these lines clearly raises grave problems of timing, of presentation, and of policy. But there is no problem, however intractable, which with time and patience cannot be made less so And if the attempt is not made in the case of Formosa and the coastal islands, the consequences may be grave indeed ..."

In reply to Mr. Herbert Morrison, Deputy Leader of the Opposition, who asked whether the U.S A. had accepted in principle the views which the Foreign Secretary had expressed, Sir Anthony Eden declared that what he had said on Formosa committed nobody except the British Government. He added that the position was difficult for the United States as any form of withdrawal was regarded as a stepping stone for further attack.

Mr. Dulles, the U.S. Secretary of State, returned to Washington from the Far East on March 6 and on March 8 made a nation-wide broadcast on the Far Eastern situation. In the course of his speech he declared that the U.S.A. must, if occasion offered, make it clear "that we are prepared to stand firm and, if necessary, meet hostile force with the greater force that we possess." Extracts from Mr. Dulles's broadcast are given below.

Bangkok Conference. "The Manila pact," Mr. Dulles said, "has three main purposes: defence against open armed aggression; defence against subversion; and the improvement of economic and social conditions.

"For military defence we shall rely largely upon mobile allied power which can strike an aggressor wherever the occasion may demand. That capacity will, we believe, deter aggression. We shall not need to build up large static forces at all points, and the U.S contribution will be primarily in terms of sea and air power I pointed out at Bangkok that, for military purposes, the Chinese Communist front should be regarded as an entirety, because if the Chinese Communists engage in open, armed aggression this would probably mean that they have decided on general war in Asia. They would then have to take into account the mutual defence treaties of the U.S.A. with the Republic of Korea and the Republic of China, and the forces maintained under them Thus general war would confront the Chinese Communists with tasks at the South, Centre and North, tasks which would strain their inadequate means of transportation.

"The Allied nations possess, together, plenty of power in the area The U.S.A. in particular has sea and air forces now equipped with new and powerful weapons of precision, which can utterly destroy military targets without endangering unrelated civilian centres. Our Treaty Council, after appraising the military factors, concluded that the available military power offered solid hope of deterring open armed aggression against the treaty area."

Turning to the problem of subversion, Mr. Dulles said that this was at present "perhaps the greatest danger to the area," though the danger would be diminished as it became better understood that the treaty nations had the power, and the will, to strike down an open, armed aggressor. It was primarily the responsibility of each Government concerned to deal with active subversion promoted from without, but countries could help each other by exchanging information, for example, about the movements and activities of international Communist agitators. Also, those who had dealt successfully with this problem could give advice which would help others of lesser experience. It had consequently been agreed at Bangkok that there should be meetings of experts to facilitate exchanges of views about these problems of subversion.

With regard to the question of improving economic and social conditions in the area, Mr. Dulles said that the first problem involved was that of meeting the cost of more effective security forces. The Council was not trying to build up vast new military establishments, but modest national forces were needed, which were well equipped and loyal, which could support the authority of each Government throughout its territory, and which could fight initial defence actions if there should be attack from without. Even these limited forces, however, involved an economic burden which some of the countries could not carry without help, and the strong countries would therefore have to help the weak ones by providing some military equipment and financial support.

Secondly, there was the need for a general improvement of economic conditions in the area, which entailed capital development in the form of increased industrialization, better roads, more irrigation works, and improved port facilities. There was particular need for a larger exchange of goods and services between the countries of South and South-East Asia and the Western Pacific, and Japan with her large capacity for industrial production and her need for food and raw materials, was an important element in this situation

This problem of economic improvement went beyond the immediate treaty area—which was not and never could be a self-contained economic unit. The great bulk of its trade was with outside areas and there was therefore a need for programmes to develop broadly the economic possibilities of all the free Asian countries. The treaty nations, said Mr Dulles, would study their problems from this viewpoint.

Mr. Dulles stated that he had reaffirmed President Eisenhower's declaration on the peaceful uses of atomic energy and had extended an invitation to the Manila pact nations to send representatives to the U.S.A. to study the good uses to which atomic energy might be put.

Burma. "Burma," Mr. Dulles continued, 'is one of the countries which has newly won its independence, and the Government and people are determined to maintain it. They feel that they can best do so by avoiding regional security groupings . . . Burma's evolution to independence had the strong moral support of our nation, and we want to see that independence preserved I talked fully and freely with the President, with the Prime Minister (U Nu), and with other members of the Government In this way we each came to a better understanding of the policies of the other. . ."

Indo-China. "After Burma I went to Laos, Cambodia and free Vietnam. These three nations are not themselves members of the Manila pact but their territories are covered by the pact In each of these countries I found leaders of great ability and of patriotic dedication to the independence of their country Also, they well realize the danger to their independence that comes from subversion inspired by international Communism . .

"The greatest problems confront the free Government of Vietnam It has the task of developing an efficient Government of its own in substitution for French rule. This task . . is now complicated by three abnormal problems:

(1) The problem of absorbing and resettling the refugees from the North. . . . So far, about 600,000 persons have fled from Northern Vietnam, and before the exodus is over the number of refugees will probably approach 1,000,000. . . . They need help. One dramatic response is Operation Brotherhood, privately sponsored by the Philippine Junior Chamber of Commerce. It provides Philippine doctors and nurses who work on a 24-hour-a-day basis at the refugee centres.

(2) The fact that various religious groups, known as the 'sects' have heretofore had virtual autonomy, maintaining their own police forces, collecting their own taxes, and acting largely independently of a central Government If Vietnam is to maintain its independence and the religious freedom desired by all, including the sects, there needs to be increasing allegiance to the central Government. . . .

(3) The greatest problem is that presented by the Communists in the North. Under the armistice they should have removed their forces from the South Instead, many of their soldiers there merely put on civilian clothes and faded into the local community as a source of future trouble Communist propaganda is rife, and in addition the free people of the South are subjected to the terrorizing threat of armed aggression from the North. As against this, local forces are being trained. But the principal reliance is the Manila pact and its deterrent power."

With regard to the forthcoming elections in Vietnam in 1956, Mr. Dulles said that there could be "little doubt" but that most of the people of Vietnam would want to unite under a genuinely independent and democratic Government. However, he thought that it would be hard to create in the North conditions which would allow genuine freedom of choice. Mr. Dulles also said that he had been "much impressed" by the Prime Minister of South Vietnam (Ngo Dinh Diem) and expressed the conviction that his Government deserved the support which the U.S.A. was giving to help to create an efficient, loyal military force and sounder economic conditions.

Philippines. "I stopped at Manila on both my outgoing and homecoming trips," Mr. Dulles continued. "Both times I talked with President Magsaysay . . . I am deeply impressed by his grasp of the Communist problem. He has given his full moral support to the anti-Communist position of the U S.A. in Asia The Philippine Republic is proving itself to be a staunch and effective ally"

Formosa. After referring to his conversations with the Chinese Nationalist leaders, to the coming into force of the U.S.-Chinese mutual defence treaty, and to the first meeting of U S. and Chinese Service chiefs under the terms of the treaty, Mr. Dulles went on "Let me make it clear that we have here to deal with two distinct matters—first, the political decision of what to defend, and then the decision as to how to defend it. The decision of what to defend has been taken. It is expressed in the treaty and also in the law whereby Congress has authorized the President to use the U.S. armed forces in the Formosa area. That decision is to defend Formosa and the Pescadores. However, the law permits a defence which will be flexible and not necessarily confined to a static defence of Formosa and the Pescadores themselves. How to implement this flexible defence President Eisenhower will decide, in the light of his judgment as to the over-all value of certain coastal positions to the defence of Formosa, and the cost of holding these positions. And his judgment would take account of consultations provided for by the mutual defence treaty.

"We hope that the present military activities of the Chinese Communists are not in fact the first stage of an attack against Formosa and the Pescadores. We hope that a cease-fire may be attainable We know that friendly nations, on their own responsibility, are seeking to find substance for these hopes Also, the U.N. is studying the matter in a search for peace. So far these efforts have not been rewarded by any success The Chinese Communists seem to be determined to try to conquer Formosa. The response of the United States will have importance both to Formosa itself and to all the South-East Asian and Pacific countries

'I come back from Asia greatly impressed by the spirit and the purpose of the Governments and the peoples with whom I had contact They want to preserve their freedom and independence. However, patriotism alone is not enough. Small nations cannot easily be self-confident when they are next door to Communist China. Its almost unlimited manpower would easily dominate, and could quickly engulf, the entire area were it not restrained by the mutual security structure which has been erected. But that structure will not hold if it be words alone Essential ingredients are the deterrent power of the United States and our willingness to use that power in response to a military challenge The Chinese Communists seem determined to make such a challenge.

"At the same time they are persistently trying to belittle our power and throw doubt on our resolution. They boast that in 1950, in Korea, they drove U.S forces back from the Yalu and gained a great victory They boast of their victory over the French Union forces in Indo-China at Dien Bien Phu and they misrepresent our non-participation as due to our weakness of will. When we recently helped the Chinese Nationalists to evacuate the Tachens and other coastal islands, the Chinese Communists claimed that this represented great 'victories' for them. They continue wrongfully to hold our fliers and citizens. In such ways Chinese Communist propaganda portrays the U S A as being merely a 'paper tiger.' It suggests to the small peoples whom they threaten that the U S A will always find reasons to fall back when faced by brutal and uncompromising force, and that Communist China is sure to win.

"The United States, in the interests of peace, has made great sacrifices and has shown great self-restraint That is nothing for which we should feel ashamed. Indeed, it is something in which we can take pride But we must always remember that the free nations of the Western Pacific and South-East Asia will quickly lose their freedom if they think that our love of peace means peace at any price We must, if occasion offers, make it clear that we are prepared to stand firm and, if necessary, meet hostile force with the greater force that we possess

"A big step in the right direction was taken by the Congress when, at the President's request, it passed the joint resolution which authorized the President actually to use the U.S. armed forces for the defence of Formosa and, to the extent that the President judges appropriate for that defence, to protect related positions in friendly hands. That non-partisan action, taken with virtual unanimity, did more than any other recent act to inspire our Asian friends with confidence in us. I believe that their confidence is not misplaced. . . ."

Before making his broadcast, Mr. Dulles had reported to President Eisenhower on the conference and on his tour and had also reported to the Senate Foreign Relations Committee and the House Foreign Affairs Committee.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. 14081 A.)**

A. BELGIUM. — Chamber ratifies Paris Agreements.

The Belgian Chamber of Representatives passed a Bill on Jan. 20 ratifying the Paris Agreements as far as they affected Belgium, the voting being 181 to 9, with two abstentions.

Winding up the debate, which had lasted from Jan 11-13, M Spaak, the Foreign Minister, declared: "If you reject rearmament of Western Germany you will send the Germans into the arms of Russia. A German-Russian agreement would mean the end of European and Western democracy." M Spaak maintained that the Paris Agreements gave full guarantees against a rebirth of German militarism, as the limits set for the maximum strength of the various military forces could only be increased by agreement of all members. Another guarantee was Dr. Adenauer's undertaking that Germany would not manufacture atomic weapons. "But," M. Spaak said, 'the greatest guarantee of all is the presence of British and American troops in Europe."

The Bill was supported by the three main political parties —the Socialists and Liberals (which form the present Government) and the Social Christians (the present Opposition); the nine dissenting votes were cast by the four Communists, four Socialists, and one Liberal.

M. Spaak announced during the debate that the Belgian Senate would not be called upon to vote on the Bill until the Agreements had been ratified by France and Germany.
(La Nation Belge, Brussels - Le Monde, Paris) **(14053 D.)**

Note. In the vote on Nov 26, 1953, the Bill ratifying the E.D C. Treaty had been passed by the Chamber by 148 votes to 49, with three abstentions (see 13569 A).

B. GREECE. — Reduction in Bank Rate.

The Greek bank rate was reduced on Jan. 1 from 10 per cent to 9 per cent.—(Federal Reserve Bulletin, Washington) **(Prev. rep. 13552 D.)**

A. AUSTRALIA. — Atomic Energy and Research. - Further Atomic Weapons Tests in 1955. - Development of Uranium Production. - Construction of Nuclear Reactor. - Collaboration with United Kingdom.

It was announced in Canberra and London on Feb. 25 that by arrangement between the Australian and U.K. Governments further atomic weapons tests would be conducted in Australia later in 1955 in an area north of the transcontinental railway line (the line across the Nullarbor Plain between South Australia and Kalgoorlie and Perth in Western Australia). The announcement said that the tests were "not atomic explosions, but detonations of high explosive charges to test techniques relating to atomic weapons," adding that there would be some radioactivity but that this would be limited to a small area in the immediate neighbourhood of the explosions. On March 10 the "protected area" of the Woomera rocket range was extended to include a large area in the western part of South Australia north of the transcontinental railway; it was stated that this area would be used for the next series of tests of atomic weapons and would become a permanent testing site if it proved suitable. Earlier, on Feb. 18, it had been officially denied in London and Canberra that any tests of thermo-nuclear weapons would be held on the Australian continent.

Other recent developments in Australian uranium production and atomic energy development and research are described below.

Rum Jungle Uranium Plant. Australia's first plant for refining uranium ore was opened at Rum Jungle (Northern Territory) by the Prime Minister, Mr. Menzies, on Sept 17, 1954. The plant, most of which was supplied by the U.S Atomic Energy Commission under Australia's 10-year contract with the U.S A. and Britain (see 12679 B), will reduce ore mined at Rum Jungle to uranium oxide, the last stage in the treatment of the mineral before smelting into uranium metal.

Opening of Radium Hill Mine. The uranium mine at Radium Hill (South Australia)—see 12202 B—was officially opened by the Governor-General of Australia, Sir William Slim, on Nov. 10, 1954 The Premier of South Australia, Mr Playford, announced at the opening ceremony that his Government planned to establish another uranium mine at Crocker's Well, about 75 miles west of Radium Hill, and to open it in about three years' time; to set up later a metal treatment plant in association with the chemical treatment plant now being built at Port Pirie; and to establish a nuclear power station as soon as technical conditions permitted

Mount Isa Uranium Plant. Mr. J. N. V Duncan, managing director of the Rio Tinto Company, announced in Brisbane on March 1,1955, that his company was to build a uranium processing plant at Mount Isa, in the Cloncurry region of Queensland, under an agreement with the Australasian Oil Exploration Company. He stated that Rio Tinto had agreed to a full-scale development of the area if it were justified by exploration surveys, and announced that, with this in mind, they had bought a controlling interest in Mary Kathleen Uranium Ltd

Discovery of New Uranium Field. The discovery of a new uranium field in the Northern Territory about 150 miles south of Darwin was reported on July 23, 1954. Situated near the headwaters of the Katherine river, about 72 miles east of Pine Creek and 20 miles east of the recently discovered Coronation Hill field (see 13057 B), the new field was reported, on the basis of surface findings, to be better and more extensive than that at Rum Jungle

Building of Nuclear Reactor. Mr. Beale, the Minister for Supply, announced on Oct. 11, 1954, that the Federal Government had approved the construction by the Australian Atomic Energy Commission of a nuclear reactor of advanced type, which would provide Australia with research facilities "as good as any in the world." He said that this was part of a five-year atomic research programme which the Australian Government was undertaking at a cost of more than £A5,000,000 to develop the best means of producing atomic power for Australian industry. Although the Australian programme would be self-contained, it was being undertaken in co-operation with Britain, and similar work being done in Britain would be related to the Australian programme in order to avoid wasteful duplication Britain was providing Australia with nuclear information which she had recently gained at the cost of large expenditure on research, Australia would therefore in one step bring herself up to date in the application of atomic energy for industry, and experts believed that atomic power for industry would become an economic proposition in some parts of the country within the next 10 years.

On Jan. 17 Mr. Beale announced that the A.E.C.'s research laboratory and nuclear reactor would be built between Sutherland and Menai, 17 miles south of Sydney, and that it was hoped to complete the major part of the laboratories by the end of 1956.

Professor C. H. Watson-Monro, Professor of Physics at Victoria College, Wellington, New Zealand, was appointed Chief of Research for the Australian Energy Commission on Nov. 3, 1954. During the war Professor Watson-Monro conducted radio research for the N.Z. Department of Scientific and Industrial Research, and later worked on atomic energy research in Britain, the U.S.A., and Canada.—(Australian News and Information Bureau - Times - Daily Telegraph - New York Times) **(Prev. rep. Atomic Weapons Tests, 13222 A; Uranium, 13057 B; A.E.C., 12607 D; Rio Tinto Co., 14062 D.)**

B. ITALY - UNITED KINGDOM. — Signor Scelba's and Professor Martino's Visit to London.

The Italian Prime Minister, Signor Scelba, and the Foreign Minister, Professor Martino, arrived in London on an official visit on Feb. 15. During their stay they had long discussions with Sir Winston Churchill and Sir Anthony Eden, the Foreign Secretary; saw Mr. Butler (Chancellor of the Exchequer), Mr. Thorneycroft (President of the Board of Trade), Major Lloyd-George (the Home Secretary); and met Mr. Attlee and Mr Herbert Morrison (the Leader and Deputy Leader of the Opposition). On Feb. 16 they were received by the Queen at Buckingham Palace, and called on Queen Elizabeth the Queen Mother. Speaking at a Foreign Press Association lunch on the same day, Signor Scelba expressed "great satisfaction" about the talks with Sir Winston Churchill and Sir Anthony Eden, and declared: "We have realized how close, and I would say identical, are our points of view." On Feb. 17 Signor Scelba addressed members of both Houses of Parliament at Westminster, and later both Ministers spoke to British journalists at a conference arranged by the Foreign Office. After visiting Cambridge on Feb. 18, the Italian Ministers left London on Feb. 20.

The following communiqué was issued from 10, Downing Street on Feb. 18 on the conclusion of the official talks:

"The recent developments in Anglo-Italian relations and the joint diplomatic activity of the two Governments in recent months have made possible an even closer and more cordial collaboration between Italy and the United Kingdom. The two Italian statesmen in the course of their visit have therefore had a very full exchange of views with Sir Winston Churchill, Sir Anthony Eden, and other of H.M. Ministers, on the situation throughout the world, as well as on all aspects of Anglo-Italian relations.

These conversations have revealed full agreement between the two Governments. They are determined to continue to do their utmost, in constant consultation between themselves and with other allied and friendly Powers, to safeguard peace, to build up the security of the free and democratic world, and to preserve the European heritage of civilization to which Italy and Great Britain have so greatly contributed

During their discussions the Ministers reaffirmed their full support of the Atlantic alliance and of the other international organizations of which the two countries are joint members. They agreed to do their utmost to bring the Western European Union into force at the earliest possible moment, in the conviction that this organization is essential for the promotion of closer co-operation within Western Europe The Ministers agreed that the early participation of the Federal Republic of Germany in this free association was essential to the unity and defence of the western community.

The Ministers examined together the discussions now taking place in the working group of Western European Union on the production and standardization of armaments. They confirmed the joint desire of their two Governments that these discussions should lead to practical and constructive arrangements in which the U.K. and Italy, with the other members of W.E.U., would both play their full part.

The Ministers had a most useful exchange of views on the relations between East and West in the light of recent major developments in the international sphere They also reviewed together the position in various areas of the world of mutual interest to their two countries, notably the Mediterranean.

In regard to matters directly concerning Italy and Great Britain, the conversations have confirmed to the satisfaction of both parties that there are no longer any serious problems at issue between the two countries and that their general interests are entirely in accord. The very cordial character of the discussions showed that relations between the U.K. and Italy have now happily returned to their old friendliness. The Ministers placed once more on record their determination to devote their efforts to the further development of these relations in a continuing atmosphere of confidence."

On their way to London Signor Scelba and Professor Martino spent a day in Paris, where, on Feb. 14, they visited Supreme Headquarters, Allied Powers in Europe, and saw General Gruenther. They also attended a session of the North Atlantic Council, and saw M. Mendès-France and M. Faure, the outgoing French Prime Minister and Foreign Minister respectively.—(Times - Daily Telegraph - Le Monde, Paris) **(Prev. rep. 13011 B.)**

C. EGYPT. — Allocation of U.S. Aid.

Four U.S.-Egyptian agreements were signed in Cairo on Feb. 23 which allocated $23,337,000 out of a total of $40,000,000 of U.S. aid to Egypt to four major development projects—road improvement, a pipeline for the supply of drinking water at Abou Homoss in the northern delta, improvement of the port of Alexandria and of inland waterways, and the purchase of equipment for the new machine-shops of the Ministry of Public Works. Egypt, for her part, undertook to contribute in cash, commodities, and services the equivalent of $32,607,000 to the completion of these projects.—(New York Times - Le Monde, Paris) **(Prev. rep. 13879 C.)**

A. INDIA. — Industrial Development.

A review of the major industrial projects established in India since the country achieved independence, apart from those already described in earlier articles, is given below under cross-headings:

Iron and Steel Production.

Soviet Contract for Building of Steel Plant. A Soviet-Indian agreement for the construction by the Soviet Union of a modern, integrated iron and steel plant in India was signed in New Delhi on Feb. 2, 1955, by the Soviet Ambassador (M. Menshikov) and the Secretary of the Indian Production Ministry (Mr. S. Khera). The agreement was the first of its kind between the two countries, and was also the first major agreement on technical and economic aid for industrialization extended by the Soviet Union to a non-Communist country.

The proposed plant, which will be situated in the Bhilai region of Madhya Pradesh, was planned to be in operation by Dec. 31, 1959, with an initial capacity of 1,000,000 tons of ingots to be rolled into about 750,000 tons of rolled-steel products, it would be designed, however, with a view to eventual expansion to a capacity of 1,000,000 tons of rolled steel. The cost of the plant, machinery and equipment to be supplied by the Soviet Union was estimated at Rs. 434,000,000 (excluding transport charges), and the technical fee for setting up the plant was fixed at Rs 25,000,000. The cost would be charged in instalments (according to the progress of deliveries), for which the Soviet Union would extend credit repayable in each case by 12 equal annual instalments, with interest at 2½ per cent p.a.; all payments would be in Indian rupees freely convertible into sterling.

The agreement also provided for visits by Indian experts to the Soviet Union to examine plants and factories of a similar nature, and for the training of a sufficient number of Indian technicians both in India and in the U.S.S.R. so that Indian personnel might man the plant to the maximum extent possible from the beginning. The Indian Government reserved the right to reject the scheme as given in the final report (to be submitted within nine months), with the proviso that it would pay all the expenses so far incurred by the Soviet Union—subject to a limit of Rs. 8,000,000—if the scheme were rejected.

Proposed British Participation in New Steel Plant. At the same time as negotiations were proceeding for the proposed Soviet steel plant, Mr. B. M. Birla, President of the Indian Chambers of Commerce and Industry, was making inquiries in London about the willingness of British businessmen to invest money in a further steel plant (in addition to, and not instead of, the Soviet-built plant). It was reported that Mr. Birla had suggested participation by private British capital in two alternative schemes: one for a plant with a capacity of 675,000 tons, to be built at a cost of £46,500,000, and another for a plant with a capacity of 1,000,000 tons, to cost £70,000,000. Mr. Birla himself undertook to mobilize about £11,250,000 of Indian capital, and had asked the Indian Government to contribute £15,000,000 and to guarantee the British investment of the balance. Although no official announcement was made about the proposals after Mr. Birla's return to India, it was authoritatively reported from New Delhi at the end of November that they had been rejected by the Indian Government because (1) the Government would have been expected to make guarantees available and to subscribe capital without participating in management, and (2) private ownership of new iron and steel works was contrary to Indian industrial policy.

On Jan. 3, 1955, however, the Metallurgical Equipment Export Company of London formally offered to build a steel plant with a capacity of 1,000,000 tons for the Indian Government, and it was subsequently reported that India had accepted this offer in principle. The Metallurgical Equipment Export Company represents a number of British engineering firms in the export market: Davy and United Engineering, Electric Furnace, Head Wrightson, Joseph Parks & Son, Simon Carves, and Wellman Smith Owen Engineering.

Location of German Steel Plant. It was announced in New Delhi on Feb. 16, 1954, that the steel plant to be built in India by the German firms of Demag and Krupp (see 13338 B) would be located at Rourkela, in Orissa. Three other sites had been examined—at Durgapur (West Bengal), Sindri (Bihar) and Bhilai (Madhya Pradesh)—but the Rourkela site had been considered the most suitable. The Indian Minister of Production, Mr. Reddy, announced on Sept. 24, 1954, that construction of the Rourkela works would be started at the end of 1955 and that the plant was expected to go into production four years later. Hindustan Steel Ltd., the Indo-German firm established for the construction and operation of the new plant, announced on Feb. 7, 1955, that it had appointed Dr. Klinar (a Yugoslav) as its technical expert in charge of installing the Rourkela steel plant; Dr. Klinar had formerly been employed by the Tata company and had lately served as adviser to the Yugoslav steel industry.

Expansion of Tata Steel Works. It was announced in New Delhi on Jan. 12, 1955, that the Indian Government had approved a proposal by the Tata Iron and Steel Company to expand its steel production by 500,000 tons annually.

On May 5, 1952, Tata's, in association with Stewarts and Lloyds Ltd., had announced that they were constructing a steel tube works at Jamshedpur (Bihar) which would draw its supplies of strip from a new strip-mill to be installed by Tata's. Mr. Stewart, chairman of Stewarts and Lloyds, announced at the company's annual meeting on Feb. 8, 1955, that the company, in association with Tata's, was erecting a continuous weld tubemaking plant at Jamshedpur.

General Steel Expansion Plans. Mr. Reddy, in a statement on Feb. 2, 1955, on the general steel situation in India, expressed confidence that the present output of 1,200,000 tons of steel a year would be raised to 6,000,000 tons during the second Five-Year Plan, taking into account the new plants and the extensions to existing works. Present Indian steel production, he said, would be raised to 2,300,000 tons if the existing expansion programme of Tata's and other companies were executed. In order to achieve the objective of 6,000,000 tons it was proposed to expand the Rourkela works immediately to a capacity of 1,000,000 tons, Tata's proposed to expand their plant by a further 500,000 tons; and the British, who had offered help for a third plant, had been contacted and invited to come to India. If this project went through, it would add another 1,000,000 tons to the country's capacity. Mr. Reddy added that he was thinking in terms of 10,000,000 tons of steel a year for the third Five-Year Plan.

Railway Locomotives and Rolling Stock.

The Chittaranjan Works. The Indian Railways locomotive manufacturing works at Chittaranjan (a new town some 150 miles west of Calcutta) were formally inaugurated on Jan. 26, 1950. Built at a cost of about Rs 140,000,000, the Chittaranjan works are situated near the proposed Maithon Dam on the Barakar River, the West Bengal coal belt, and the steel-producing centres of Asansol and Tatanagar. Under a five-year agreement with the Indian Government, concluded in 1949, the Locomotive Manufacturers' Co. Ltd. (representing the principal British locomotive builders), undertook to provide expert advice, technicians, and skilled supervisory staff for service at Chittaranjan, who would eventually be replaced by Indian technicians training in Britain. In return, the Indian Government placed an order with the company for 200 locomotives at a cost of Rs. 60,000,000 - Rs. 80,000,000.

The Chittaranjan works will eventually be able to build about 120 steam locomotives a year, and, together with Tata's locomotive factory, to make India ultimately self-sufficient in locomotives.

Perambur Railway Coach Factory. Mr. A. K. Chanda, Financial Commissioner of Indian Railways, stated in New Delhi on Oct. 10, 1952, on his return from Europe, that three Swiss firms—Schlieren, Neuhausen, and Schindler—had agreed jointly to participate in the financial and technical management of a railway coach factory to be built at Perambur (Madras State) at an estimated cost of about Rs. 50,000,000. Mr. Pande, chairman of the Railway Board, stated on Feb. 10, 1955, that the Perambur factory would go into operation towards the end of 1955. Production was planned to exceed one coach every working-day when full production rate was reached.

Locomotive Imports. The chairman of the Indian Railway Board (then Mr. Badhwar) announced on Nov. 27, 1953, that India had placed orders abroad for 480 locomotives at a cost of Rs. 180,000,000 and that negotiations were in progress for the supply of a further 250-300 locomotives by the end of 1955 under the U.S. technical aid programme and the Colombo Plan. Mr. Badhwar said that 125 goods steam-engines had been ordered from Japan; 150 passenger steam-engines, 100 goods steam-engines, and 20 diesel shunting-engines from Western Germany; 60 goods steam-engines from Austria; and 25 from Italy. British locomotive manufacturers had been unable to secure a share of the orders because their quotations were not competitive.

Cables, Telephones, and Electrical Equipment.

Rupnarainpur Cables Factory. A factory for the manufacture of telephone cables was inaugurated on Dec. 26, 1954, at Rupnarainpur, near Chittaranjan. Built in three years at a cost of some Rs.13,000,000, the factory has an initial output of about 500 miles of cable a year and is expected within three or four years to meet India's entire cable requirements. The factory was built by Standard Telephones and Cables Ltd., London, under an agreement concluded with the Indian Government on Dec. 6, 1949. In August 1952 the Indian Government had set up a limited liability company—Hindustan Cables Ltd—to take over the entire assets and liabilities of the factory.

Bangalore Telephone Factory. The foundation-stone of a new factory for the State-owned Indian Telephone Industries was laid at Bangalore on Oct. 12, 1948. The factory at first confined itself to assembling telephones from imported components, but it was planned that, when completed, it would manufacture all forms of telephone equipment.

On Feb. 1, 1950, Indian Telephone Industries was converted into a joint stock company, with the Indian Government holding 75 per cent of the shares, the Government of Mysore 20 per cent, and the Automatic Telephone and Electric Co. 5 per cent.

Bangalore Radio Equipment Factory. It was announced in New Delhi on Nov. 6, 1954, that Bharat Electronics Ltd. had been formed by the Indian Government to produce electronic equipment for the armed Services and for the other Government departments. The Government had signed a contract with the *Compagnie Générale de Telegraphie sans Fil* (Paris) for technical assistance in setting up the factory, which would be situated at Bangalore. Production was planned to start in 1956.

Motor Industry.

Government Policy Statement. The Indian Government announced on May 31, 1953, that they had accepted the Tariff Commission's recommendations that motor-vehicle production in India should be concentrated on five manufacturing firms, and that seven other firms which only assembled imported car parts should be closed down within three years. At the same time the Government announced a reduction in the import duty on motor-vehicle parts from an average of 63 per cent to 40 per cent, and laid down that by 1956 at least 50 per cent of the components used by Indian vehicle manufacturers must be made in India.

The five firms chosen to continue manufacture were: (1) Hindustan Motors (associated with Morris Motors—now part of the British Motor Corporation—and Studebaker), who would manufacture a light car, a big car, and a medium lorry; (2) Premier Automobiles Ltd. (associated with Dodge, the U.S. manufacturers), who would make a big car and a medium lorry; (3) Automobile Products of India Ltd. (associated with the British Rootes Group), who would manufacture a light car and a medium lorry; (4) Standard Motor Products of India Ltd (associated with the British Standard Motor Company), who would manufacture a medium car; (5) Ashok Motors Ltd. (associated with Austins, now part of the British Motor Corporation), who would concentrate on the manufacture of a heavy lorry and a small car.

The seven firms which would have to stop assembly work in three years were Deward of Calcutta, the French Motor Company of Bombay, General Motors, Mahindra & Mahindra, Addison & Company, Ford Motors, and the Peninsular Motor Company; Deward and Mahindra & Mahindra, however, would be allowed to continue the assembly of Land Rovers and Willys Overland jeeps, which are not at present manufactured in India.

The Tariff Commission's report estimated that the total number of motor-vehicles registered in India in 1951 had been 252,000, and that future demand would be about 25,000 annually (excluding the requirements of the Defence Ministry), of which about 40 per cent would be lorries and the balance motor-cars. The main problems facing the industry were the limited demand for automobiles, the scarcity of some of the required raw materials, the absence of ancillary industries, and the competition between assemblers and manufacturers. With regard to these difficulties, the report said that there was little likelihood of any increase in demand in the near future because of the generally low standard of living and the high price of cars, nor was there much hope of overcoming the shortage of certain principal raw materials, such as special type steels, which would still have to be imported from abroad. The development of ancillary industries, however, should be encouraged by suitable measures, one of which should be the standardization of the various types of components, whilst the competition between assemblers and producers would be dealt with by the concentration of production outlined above.

Daimler-Benz Agreement with Tata. An agreement between Daimler-Benz (the German motor manufacturers) and the Indian Tata Locomotive and Engineering Corporation was signed on March 9, 1954. During the first phase of the agreement Daimler would supply 3,000 heavy trucks annually and set up jointly with Tata a large assembly plant in Jamshedpur. The second phase envisaged the building of a motor-car plant, either at Jamshedpur or in Central India near Nagpur. The agreement was subject to approval by the Indian Government.

Bicycles.

Sen-Raleigh Factory at Kanyapur. A bicycle factory, built by Sen-Raleigh Industries of India Ltd. at Kanyapur near Asansol (some 145 miles west of Calcutta), was opened on June 21, 1952; it had an initial capacity of 100,000 cycles a year, rising gradually to 200,000. The firm's British associates, Raleigh Industries Ltd., provided technical assistance in planning the factory, in procuring scarce plant, and in training Indian personnel.

Review of Indian Cycle Industry. The Deputy Minister of Commerce and Industry (Mr. D P. Karmarkar) stated on Oct. 22, 1951, that the production of bicycles in India had risen from 64,425 in 1949 to 103,153 in 1950. Imports, which had risen from 264,392 in 1948-49 to 268,148 in 1949-50, had dropped sharply to 165,461 in 1950-51. Until 1950 the only firms manufacturing complete bicycles in India had been Hindu Cycles Ltd. (Bombay), and the Hindustan Bicycles and Industrial Corporation. Since then, however, T.I. Cycles of India (Madras), Sen-Raleigh Industries (Calcutta), and Atlas Cycle Industries (India) Ltd. (Sonepat), had all established factories for the manufacture of bicycles with the assistance—technical or otherwise—of foreign firms of repute.

Drugs, Dyes and Chemicals.

Poona Penicillin Factory. The foundation-stone of India's first penicillin factory was laid at Pimpri, near Poona, on March 10, 1952. The factory, whose cost will be about Rs. 20,000,000, was set up by the Indian Government in collaboration with the World Health Organization and the International Children's Emergency Fund (UNICEF), the W.H.O. providing the necessary technical assistance and training facilities. It is expected to be in operation early in 1955, and to produce 400,000 mega-units of penicillin monthly when in full production.

Delhi D.D.T. Factory. An agreement for the setting-up of a D.D.T. factory in Delhi was signed on July 19, 1952, by representatives of the Government of India, the W H.O. and UNICEF. UNICEF undertook to supply all the manufacturing equipment at a cost of $250,000; the U.N. Technical Assistance Administration agreed to provide the technical assistance at a cost of about $100,000; whilst India, for her part, undertook to provide land, buildings, power, etc., at a total cost of Rs. 2,300,000. The entire output of the plant—which is expected to begin operations early in 1955—was estimated at 1,568,000 lb. of D.D.T. annually, to be devoted to the development and expansion of public health campaigns.

Parnera Dyes and Chemicals Factory. The Atul Products Dyes and Chemicals Factory at Parnera (Bombay), the first major industry of its type in India, was opened by Mr. Nehru on March 17, 1952. Although the U.S. Cyanamids concern supplied raw materials, "know-how," and technical personnel, the erection and construction work was all done without the help of foreign technicians The initial capacity of the factory was 4,000,000 lb. of dyes and 100,000 lb. of sulpha drugs; it also produces aureomycin (an antibiotic) and folic acid (a vitamin widely used in treating malnutrition).

Petrol and Synthetic Petrol.

Opening of Second Bombay Refinery. The Burmah-Shell refinery at Trombay (near Bombay), the largest in India and the second of the three in construction at Bombay, went into preliminary production on Feb. 2, 1955. When the Caltex refinery—the last of the three—goes into production, India will be nearly independent in petroleum products.

Synthetic Oil Plant. It was announced in New Delhi on Jan. 21, 1955, that the Indian Government had accepted in principle the recommendations for the construction of a synthetic oil plant which had been made by a committee set up in May 1954. The committee recommended that the proposed plant should have an annual manufacturing capacity of 250,000 - 300,000 tons

Mirganj Power Alcohol Plant. The biggest power alcohol plant in India was opened at Mirganj, near Patna (Bihar), on April 13, 1949. With a daily capacity of 3,000 gallons, it was expected to increase India's motor-fuel resources considerably.

Machine Tools.

Ambarnath Machine Tool Factory. The Combined Machine Tool and Prototypes Factory at Ambarnath, near Bombay, built over three years in collaboration with the Swiss firm of Oerlikon, was opened by Mr. Nehru on Jan 13, 1953. The erection of such a factory had been recommended by the Indian Tariff Board in 1948.

Precision Instrument Factories. A precision instrument factory at Lucknow (Uttar Pradesh), described as the first State-owned concern of its kind in India, went into operation in July 1950.

The foundation-stone of new buildings for the National Instruments Factory at Jadavpur, Calcutta, was laid by Mr. Reddy on Feb. 22, 1953. The factory, formerly known as the Mathematical Instrument Office, was started in 1830 as a small repair and service depot for instruments used by the Survey of India, and during the two world wars was transformed into a full-scale factory producing prismatic binoculars, telescopes, prismatic compasses, sun compasses, thermometers, etc.

Newsprint.

India's first national newsprint factory went into production at Nepanagar (Madhya Pradesh) on Jan 12, 1955. The project, known as Nepa Mills, is based on the utilization of chemical pulp from bamboo and mechanical pulp from salai wood, about 30,000 tons and 22,500 tons a year respectively being required for the production of 100 tons of newsprint a day. Although the factory began operations with imported chemical pulp. it was expected to be able to dispense with imported raw material by October 1955, when its chemical section was completed On reaching full production it will meet one-third of India's annual newsprint requirements, and result in an annual foreign exchange saving of about Rs 13,000,000.

The following table, reproduced from *The Eastern Economist* (New Delhi), shows the progress since 1951 in the State-owned factories, together with the targets for 1955-56:

	Annual Production 1951-52	1952-53	1953-54	Target 1955-56
Indian Telephone Industries				
Telephones (nos.) ..	21,628	27,000	40,000	25,000
Exchange lines (nos.)	21,000	11,000	15,000	20,000
Sindri Fertilizer Factory				
Ammonium sulphate (tons)	34,800	230,000	249,000	315,000
Chittaranjan Locomotive Works				
Locomotives (nos.)	17	33	64	100
Hindustan Shipyard Ltd.				
Gross registered tonnage ..	10,208	15,336	10,260	15,818
Passenger Coach Works				
Number of coaches .	542	622	604	4,380*
Mysore Iron and Steel Works				
Pig iron ('000 tons)	23.0	36.4	52 6	100.0†
Finished steel ('000 tons) .	30.5	29.6	32 0	90.0†
Cement ('000 tons) . .	57.0	78.0	68.0	90.0†
Bangalore Electrical Equipment Factory				
Transformers (K.V.A) .	36,534	24,759	34,993	80,000†
U.P. Government Precision Instruments Factory				
Water meters (nos.). .	—	2,100	7,000	12,000
Microscopes (nos.) .. .	—	—	86‡	500

* Production during 5-year plan period, including the output of the private sector. † Represents planned capacity. ‡ Covers 1952-54.

A new coke-oven plant at the Sindri fertilizer factory, built at a cost of Rs. 25,000,000, was put into operation on Nov. 28, 1954. Consisting of 60 coke-ovens and designed to produce 600 tons of coke a day, the new plant was planned to make Sindri self-sufficient with regard to coke and, in addition, to produce 10,000,000 cubic feet of gas, 32-35 tons of tar, two tons of ammonia, and nine tons of crude benzol per day. A further extension of the Sindri works by the construction of two new fertilizer plants utilizing the coke-oven gas for the production of ammonium nitrate sulphate was approved by the Indian Government in January 1955. This extension, estimated to cost about Rs. 70,000,000, will be built by an Italian firm and is expected to be completed in about three years.

MARCH 19—26, 1955

A. MIDDLE EAST DEFENCE. — Ratification of Turkish-Iraqi Mutual Co-operation Treaty. - Treaty Provisions. - Egyptian, Syrian, and Israeli Reactions. - Sir Anthony Eden's Statement. - Proposed New Egyptian-Syrian-Saudi Arabian Military and Economic Pact. - Lebanese Attitude. - Syrian-Iraqi Talks.

Turkish-Iraqi Treaty.

The text of the treaty of mutual co-operation between Turkey and Iraq (which was in the English language) was published in Baghdad and Ankara on Feb. 25. Its provisions were as follows:

Art. 1. Consistent with Art 51 of the U N. Charter, the parties will co-operate for their security and defence. Such measures as they agree to take to give effect to this co-operation may form the subject of special agreements with each other

Art. 2. In order to ensure the realization and effect application of the co-operation provided for in Art. 1, the competent authorities of the parties will determine the measures to be taken as soon as the present pact enters into force. These measures will become operative as soon as they have been approved by the Governments of the parties.

Art. 3. The parties undertake to refrain from any interference whatsoever in each other's internal affairs They will settle any disputes between themselves in a peaceful way in accordance with the U.N. Charter.

Art. 4. The parties declare that the dispositions of the present pact are not in contradiction with any of the international obligations contracted by either of them with any third State or States They do not derogate from, and cannot be interpreted as derogating from, the said international obligations. The parties undertake not to enter into any international obligation incompatible with the present pact.

Art. 5. This pact shall be open for accession to any member-State of the Arab League or any other State actively concerned with the security and peace in this region and which is fully recognized by both of the parties. Accession shall come into force from the date on which the instrument of accession of the State concerned is deposited with the Ministry of Foreign Affairs of Iraq. Any acceding State . . . may conclude special agreements, in accordance with Art. 1, with one or more States parties to the present pact. The competent authorities of any acceding State may determine measures in accordance with Art. 2. These measures will become operative as soon as they have been approved by the Governments of the parties concerned.

Art. 6. A permanent council at ministerial level will be set up to function within the framework of the purposes of this pact when at least four Powers become parties to the pact. The council will draw up its own rule of procedure.

Art. 7. This pact remains in force for a period of five years, renewable for further five-year periods. Any contracting party may withdraw from the pact by notifying the other parties in writing of its desire to do so six months before the expiration of any of the above-mentioned periods, in which case the pact remains valid for the other parties

Art. 8. This pact shall be ratified by the parties and ratifications shall be exchanged at Ankara as soon as possible It shall come into force from the date of the exchange of ratifications

In an exchange of letters between M. Menderes, the Turkish Prime Minister, and Nuri es-Said, the Iraqi Prime Minister, the two countries placed on record their understanding that "this pact will enable our two countries to co-operate in resisting any aggression directed against either of them and that, in order to ensure the maintenance of peace and security in the Middle East region, we have agreed to work in close co-operation for effecting the carrying out of the U.N. resolutions concerning Palestine."

The treaty was ratified by the Turkish Grand National Assembly, as well as by the two Houses of the Syrian Parliament, on Feb. 26.

Turkey. In the National Assembly, which approved the treaty unanimously, Professor Koprulu, the Foreign Minister, stressed that the treaty was purely defensive and said that if any country protested against it Turkey was forced to assume that that country had aggressive intentions He also said that the pact did not conflict with Turkey's obligations under the North Atlantic Treaty or with Iraq's commitments under the Arab League pact After mentioning the exchange of letters between M. Menderes and Nuri es-Said concerning the Palestine question, Professor Koprulu pointed out that Turkey had been a member of the U.N. Conciliation Commission for Palestine, that the agreement laid down in the exchange of letters had not in any way changed Turkey's position in that matter, and that her friendly relations with Israel were in no way affected by it. Speakers of all parties welcomed the treaty as a "big step towards the establishment of peace and security in the Middle East"

Winding up the debate, M. Menderes drew particular attention to the distinction drawn in Art. 5 of the treaty between Arab countries who could automatically adhere to the pact and other countries interested in the defence of the Middle East who could join it after consultation with the two original members. He concluded: "We see in Turkey, as in Iraq, full unanimity concerning the usefulness and necessity of the pact The only shadow comes from the opposition of some Arab countries, but we do not lose hope and we are not irritated by unjust attacks We want to collaborate with all Arab countries, including Egypt."

Iraq. In the Chamber of Deputies Nuri es-Said expressed the hope that Britain and the U.S A. would adhere to the treaty, and said that Pakistan, Persia, and Afghanistan would also be welcome When Britain intimated her wish to join the pact, he added, Iraq would terminate the Anglo-Iraqi treaty of 1930 The basis of Iraq's co-operation with the other signatories, the Prime Minister said, would rest on three principles: (i) Iraq would not accept commitments outside her own frontiers, or outside the frontiers of Arab countries so far as laid down in the Arab League Collective Security Pact, (ii) the Iraqi Government was solely responsible for the defence of Iraq, and no one could dictate to her conditions for co-operation, (iii) Iraq's foreign policy was based on full sovereignty and equal rights between the contracting parties In conclusion, Nuri es-Said pledged continued co-operation with all the other Arab States, whether inside or outside the Arab League, and explained that the provision of Art 5, under which any country not recognized fully by Turkey and Iraq would not be allowed to join the treaty, applied particularly to Israel, which was not recognized by Iraq

The treaty was approved by the Iraqi Chamber of Deputies by 116 votes to four, and by the Senate by 26 votes to one.

Proposed Egyptian-Syrian-Saudi Arabian Treaty.

The ratification of the Turkish-Iraqi treaty led to renewed Egyptian and Syrian protests, and anti-Iraqi demonstrations occurred on Feb. 27 in Damascus and at Deir el-Zour, a town of 20,000 inhabitants near the Syrian-Iraqi border, where two people were killed and eight injured in party clashes. Major Salah Salem, the Egyptian Minister of National Guidance, who was staying in Damascus for discussions with the Syrian Government on measures to counter the Turkish-Iraqi treaty, announced on Feb. 27 that he had submitted details of a new Arab military, economic, and political treaty designed to supplant the Arab League Collective Security Pact and to exclude Iraq.

On March 2 a declaration on the principles of the new treaty was signed by the Syrian Prime Minister, Sabry Assali, and the Foreign Minister, Khaled el-Azem, for Syria, and by Major Salem and Brigadier Riad (director of Arab affairs at the Egyptian Foreign Ministry) for Egypt, and on March 3 Major Salem and Khaled el-Azem left Damascus together for a tour of the other Arab countries in order to gain their adherence. After visiting Amman on March 3, where they had discussions with the Jordanian Prime Minister (Tewfik Abulhuda) and the Foreign Minister (Waleed Salah), they went to Beirut on March 4 to see the Lebanese Government, and on March 5-6 to Riad, the capital of Saudi Arabia

A joint statement issued in Cairo, Damascus, and Riad on March 6 announced that Egypt, Syria, and Saudi Arabia had agreed on the new treaty which was designed to "strengthen the military, political, and economic structure of the Arab world" and was aimed at organizing Arab defensive and economic co-operation to meet aggression against any Arab member-country in the area. The signatories would pledge themselves not to join the Turkish-Iraqi pact or any other alliance without the consent of the other member-States, and the treaty would envisage the following measures:

Defence Co-operation. A joint military command would be set-up to supervise the training, arming, and organization of the military forces of the member-States, to deploy these forces in accordance with their joint defensive policy, and to co-ordinate defence industries and communications required for defence purposes

Economic Co-operation. The participating Governments would establish an Arab Bank and a common Arab currency, would take measures to strengthen inter-Arab trade, would encourage the formation of joint limited liability companies to carry out industrial and agricultural development in the Arab countries, and would set up an Arab Economic Council to co-ordinate these activities

The statement added that the three Governments would draft a treaty on these lines in consultation with other Arab Governments, and that when the draft treaty was ready, they would invite representatives of the other Arab countries to a conference—probably before the end of March—to give final approval to it.

The Yemeni Government announced on March 8 its support for the new Arab treaty proposals. The Lebanese Government, however, with whom Major Salem and Khaled el-Azem had further discussions on March 7 on their return from Riad, declined to commit themselves and, according to a statement made by Major Salem himself, emphasized their intention to follow a neutral course towards both the Turkish-Iraqi treaty and the proposed new Arab alliance. It was stated in Beirut on the same date that the Lebanese Government had suggested that the proposed new Arab treaty be amended to include

Iraq, and that Major Salem had agreed to this provided Iraq gave definite assurances that she would not conclude a separate peace with Israel. The Jordanian Ambassador in Cairo stated on March 8 that his Government (which has alliance treaties with both Britain and Iraq) was still considering the Egyptian-Syrian plan, and that a decision would have to await the return of King Hussein from his State visit to Pakistan.

Syrian-Iraqi Discussions.

In an effort to bridge the differences with Iraq, and also to discuss a number of economic questions outstanding between Iraq and Syria, Khaled el-Azem visited Baghdad with a Syrian Government delegation from March 14-19. In a statement on March 10 he had announced that Syria did not want to see Iraq excluded from the Arab community, and that he wished to explain the proposed new Arab pact and its benefits.

At the end of the discussions between Nuri es-Said and Khaled el-Azem, a joint communiqué was issued in Baghdad on March 19 which said that their talks had covered all Arab affairs, and which expressed mutual regard and hope for understanding and agreement among all Arab countries. The Syrian side, the communiqué went on, had received all clarifications of the Iraqi view for which they had asked, and they now "fully understand Iraq's point of view" and would submit it to the Syrian Government "with a view to the adoption of measures to close the ranks and to establish the desired understanding between the Arab States."

In view of the Baghdad talks the Egyptian Government decided to postpone for the time being the proposed meeting of Arab Prime Ministers which—according to a Cairo announcement on March 13—was to have opened in the Egyptian capital on March 20 to discuss the new Egyptian-Syrian-Saudi Arabian pact.

Tension between Turkey and Syria.

In Ankara the proposed new treaty between Egypt, Syria, and Saudi Arabia was considered to be a direct challenge to the Turkish-Iraqi pact.

M. Menderes, in a statement to the official Anatolian News Agency, expressed regret at the attitude adopted by Egypt, in spite of friendly overtures by Turkey, and criticized the provision in the proposed new Arab pact, which debarred Arab countries from entering into any agreement with non-Arab nations, as "tantamount to a limitation of their sovereignty" M. Menderes alleged that Syria had bowed to pressure exerted upon her by Egypt in becoming a party to the new agreement, and that she was forgetting that she had a long common frontier with Turkey which compelled both countries to be greatly interested in each other. Whilst expressing Turkey's desire to maintain friendly relations with Syria, he gave a warning that if the Syrian Government persisted in its anti-Turkish policy he could not help feeling "deep concern" about the future development of Turkish-Syrian relations

On March 10 the Turkish Government sent an official Note to Syria protesting against Syria's participation in the new alliance and expressing "anxiety" over the future of Turkish-Syrian relations if Syria persisted in "a policy hostile to Turkey." In its reply the Syrian Government denied that the proposed new pact with Egypt was directed against the Turkish-Iraqi treaty, and maintained that its purpose was to protect the Arab countries against an eventual menace from Israel. A second Turkish Note of March 13, however, refuted this argument; asserted that the origin of the new Arab agreement was Egypt's desire to isolate Iraq and to destroy the effects of the Turkish-Iraqi treaty; and reiterated its warning about the serious effects of Syria's persistence in its "hostile" attitude on Turkish-Syrian relations. The Syrian Government rejected this protest on March 20, but M. Menderes informed the Syrian Minister in Ankara that because of its terms the reply could not be accepted and that the relations between the two countries had consequently entered "a most serious phase."

Israeli and British Attitude to Turkish-Iraqi Treaty.

In Israel the Turkish-Iraqi pact met with strong criticism, though for reasons different from those put forward by Egypt and Syria, a Foreign Office spokesman in Jerusalem describing the treaty on Feb. 26 as "hostile to Israel" and "likely to encourage Arab belligerency towards Israel and to foment aggressive Arab ambitions." In an official communication to the Foreign Office in London and the State Department in Washington on March 3, Israel expressed her concern at the Turkish-Iraqi treaty and asked the British and U.S. Governments to issue statements expressing their reservations regarding the "anti-Israel aspects" of the treaty.

At the end of Sir Anthony Eden's visit to Baghdad on March 4 a statement was issued saying that Sir Anthony and Nuri es-Said had reviewed the world situation. The British Foreign Secretary had congratulated the Iraqi Government on the conclusion of the Turkish-Iraqi pact and had "expressed the hope that the pact would prove an important step in fortifying the security of the Middle East and in ensuring peace." It was also stated that Sir Anthony and Nuri es-Said had reviewed defence problems between the U.K. and Iraq and that these would be further examined on the Foreign Secretary's return to London.—(Turkish Embassy, London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune)

A. CANADA. — Ratification of Paris Agreements.

The Canadian House of Representatives approved on Jan. 27 the ratification of the Paris agreements on Western Germany's admission to NATO by 213 votes to 12, with five abstentions.

The vote was preceded by a five-day debate which had opened on Jan. 20 and during which **Mr. Lester Pearson**, the Canadian Secretary of State for External Affairs, had outlined the arguments in favour of Germany's admission to NATO. In the course of his speech Mr. Pearson said that continental defences for North America were certainly vitally important, but that any implication that they would ever be an adequate basis for security in themselves was quite another matter. A German contribution to Western defence was essential, and under the agreements German forces and arms production would be strictly controlled and it would be impossible for any NATO country to operate independently. "Many Canadians, and even more of our Allies, who are taking this decision with us," went on Mr Pearson, "bear in their bodies and minds scars from the German war machine. We remember how Hitler, with shocking and unscrupulous design—and with Soviet connivance and assistance—started World War II. It is, however, my considered view that support of these agreements, with the safeguards I have described, is both wise and far-sighted, and of all the courses open to us this is the best to follow in our effort to shape a better future."

After speaking of the rearmament of Eastern Germany under Soviet auspices, and the strength of the Soviet and satellite forces, Mr Pearson pointed out that under the agreements Canada would not be committed to war by an attack on Western Germany. He deprecated the suggestion that ratification would provoke Soviet "warlike retaliation," saying that the chances of the Soviet Government wishing "to pursue such a belligerent policy" were less now than they had been in the summer of 1954 after the rejection of E.D.C. The Western Powers, he stressed, wanted to negotiate with Russia, but not before the ratification of the London and Paris agreements, and the eventual reunification of Germany must remain their essential goal. "A conference designed by Moscow would not achieve constructive results," he added, but would "delay and prevent the ratification of these agreements."

Support for ratification was expressed by **Mr. Diefenbaker**, the foreign affairs spokesman of the Progressive Conservatives, **Mr. Coldwell**, leader of the C.C.F. Party, and **Mr. Solon Low**, the leader of the Social Credit Party, but part of the C.C.F. group opposed the agreements.

The feeling of uneasiness and apprehension felt by many speakers was epitomized by **Mr. Leon Crestohl** (Liberal), a member of the Jewish community in Montreal. "We cannot and must not forget," he said, "that we are being asked to ally ourselves with and to help arm a country that has been proven guilty of the most heartless atrocities in human history On the other hand, the intentions of the Soviet Union to communize the world are clear If this constitutes the greatest danger to world peace, it must be stopped regardless of any emotional revulsion which most of us feel at the thought of having to arm a people known to misuse military might."

German rearmament, he added, was therefore the lesser of two evils. The "Russian disease" seemed harder to cure than the "German disease," and if the antidote was a defensive force including Germany, this was a powerful consideration in reaching a decision. "During the last war," Mr. Crestohl concluded, "the Western leaders accepted what they considered the lesser of two evils and allied themselves with Russia Their cold and calculated reasoning and rationalization subdued their emotional and idealistic hate of Communism. History confirmed their judgment and proved them right. Today history repeats itself and democratic leadership again must make a choice . . ."

In the vote the resolution was supported by the Liberals, the Progressive Conservatives, and the Social Credit members. Of the 24 C.C.F. members, 12 voted against ratification, five approved it, five abstained, and two were absent.

The Canadian Senate approved the ratification unanimously on Jan. 27.—(Montreal Star) **(Prev. rep. 14501 A.)**

B. AUSTRALIA. — Royal Flying Doctor Service.

Sir Arthur Fadden, the acting Prime Minister, announced on March 25 that H.M. the Queen had consented to the title "royal" being given to the Australian Flying Doctor Service. This service, formed 28 years ago by a Presbyterian Minister, the Rev. John Flynn, links scattered homes in the Australian "outback" by radio to a chain of bases where doctors and pilots are always ready to answer calls. The Queen was reported to have been greatly impressed with the service during her Australian tour in 1954, and she spoke over the Flying Doctor radio network at Broken Hill to families living in remote homesteads and settlements throughout Central and North Australia (see 13531 A). (Australian News and Information Bureau)

A. HUNGARY. — Denunciation of M. Nagy's Implementation of "New Course" Economic Policy. - Condemnation of Prime Minister by Communist Party Central Committee. - Government Changes. - Formation of Patriotic People's Front. - Local Government Elections. - Releases of Political Prisoners. - Admission of Illegal Arrests and Convictions.

The Central Committee of the Hungarian Workers' (Communist) Party passed a resolution on March 4 condemning the Prime Minister, M. Imre Nagy, for "rightist deviation" in implementing the "new course" policy introduced in June 1953 (see 13014 A). The resolution said that although the decisions of June 1953 had "proved themselves completely correct and continue to be valid," they had been "seriously distorted" by the "rightist deviationist, anti-Marxist, and opportunist attitude" of M. Nagy and others, in particular their "belittling" of heavy industry. "Those who deny the importance of the leading role of heavy industry," it declared, "undermine, whether they want it or not, the defensive capacity of the country and so endanger in the crudest manner its freedom and independence . . . Comrade Nagy indulged in dangerous demagogy when he forgot the facts and in his speeches and writings led the toiling masses along the wrong path . . . This rightist deviation is most definitely condemned by the Central Committee."

The resolution enumerated various other failings resulting from this deviation, including leniency towards the "kulaks," failure to increase the number of collective farms, and "wrong-headed" support of private peasants. Though such support had to be continued in the interest of securing higher yields, it said, the ultimate goal was the strengthening and increasing of collectivization Mr Nagy was also accused of "denying the leading role of the [Communist] party" in all walks of life, and was criticized for trying to place the Patriotic People's Front (see below) above the party in the local councils.

The "dictatorship of the proletariat" alone remained the highest repository for State leadership, the resolution continued. This particular deviation had tended to undermine the unity of the party and make it incapable of any action. Criticism and self-criticism had been overdone and had taken on a "*petit bourgeois* character"; some individuals had even "slandered the party under the guise of self-criticism," whilst a further "deviation" was to be found in the "revival of nationalism"

The resolution ended by outlining a programme designed to tighten up the policy of the Government and to give priority to the development of heavy industry and the strengthening of the country's defensive capacity.

M. Nagy, who had not been seen in public since Jan. 25, was officially reported on Feb. 20 to be seriously ill with coronary thrombosis and to be unable to return to work until the end of April. The criticism of him by the Communist Party's Central Committee, and the denunciation of his "new course" policy (under which there had been a relaxation of the priority for heavy industry in favour of the production of consumer goods and a general easing of restrictions), was generally interpreted in Western countries as being a result of the similar policy change in the Soviet Union following M. Malenkov's resignation. As recently as Oct. 22 last the Central Committee had adopted a resolution openly threatening to purge all party members who failed to support wholeheartedly the "new course" policy, and it was noted in the Western Press that the resolution of March 4, whilst condemning M. Nagy's interpretation of the "new course" policy, did not condemn the policy itself.

The official condemnation of M. Nagy was also regarded as an indication of the return to power of M. Matyas Rakosi, First Secretary of the Communist Party, who had generally been considered the "strong man" of Hungary before M. Nagy formed his Government in 1953. Addressing a meeting of the Budapest committee of the party on March 11, M. Rakosi associated himself with the Central Committee's condemnation of M. Nagy, though without mentioning the latter by name. Another strong criticism was voiced on March 10 by *Szabad Nep*, the official party newspaper.

M. Rakosi reaffirmed that the decisions of June 1953 remained valid and that basically the Government's economic policy had not been changed, though, in view of international developments, special efforts would have to be made to strengthen the defence industry. Assistance would continue to be given to independent peasants, but at the same time everything must be done to increase the number of co-operative farms, entry into which would, however, remain strictly voluntary. In his apparent reference to M. Nagy, M Rakosi said that the "condemnation of the machinations of the right-wing deviationists" had been "a serious defeat for the enemy both at home and abroad." who for the past 18 months had had "hopes of driving a wedge into the ranks of the party in order to be able to overthrow the present order." This had been frustrated, the unity of the party had been assured, and the "straight and narrow way to the goal" had been clearly indicated.

Szabad Nep similarly declared that the trouble lay not in the resolutions of June 1953 but in the "opportunistic expositions of them, ideologically and in practice." It went on to say that during the past 18 months the struggle had been carried on exclusively against "leftist deviation," whilst the influence of anti-Marxist tendencies from the Right had been ignored "The fight against the danger from the Right was hampered," it said, "and confusion in the ranks of the party increased, by the fact that Comrade Nagy stood at the head of this trend, which on certain questions contradicted the party policy, and gave support and practical help to rightist opportunism."

Other recent political developments in Hungary are summarized below.

Government Changes. It was announced on Feb. 27, two days after the announcement of M. Nagy's illness, that M Ferenc Janosi, his son-in-law, had been relieved of his post as Chief Deputy Minister in the Ministry of Popular Culture (the Propaganda Ministry) and had been replaced by M György Hon, another Deputy Minister in the same Ministry. No reason was given for the change, but it was pointed out in the Western Press that whilst M Janosi had fully supported M Nagy's policies, M. Hon was a strong supporter of M. Rakosi. M. Kallai (see below) was appointed a Deputy Minister of Popular Culture on Feb. 21, 1955.

Another Government change linked with the new Hungarian industrial policy was the removal on Jan 23 of M. Zoltan Vas from the post of first secretary to the Council of Ministers and his appointment as Deputy Minister for Foreign Trade. M. Vas, who had been dismissed from his post as head of the State Planning Commission in April 1953 (see 13014 A) and, earlier, from the Politburo and the Central Committee of the Communist Party, had been re-elected to the Central Committee in May 1954 and made first secretary of the Council of Ministers, a new post in which he had the task of directing the "new course." M. Gergely Szabo, formerly first Deputy Minister for the Chemical Industry and Electric Power, was appointed first secretary of the Council of Ministers in succession to M Vas.

A number of organizational changes in the Government had earlier been announced in October 1954. Under these the Ministry of Heavy Industry was divided into two separate Ministries, one for coalmining and the other for chemicals and electric power; M. Istvan Hidas, formerly Minister of Heavy Industry, was appointed Minister of Chemical Industry and Electric Power; and M. Sandor Czottner became Minister of Coalmining It was announced at the same time that M. Mihaly Zsofinyecz had resigned as Minister of Metallurgy and Machine Industry on being appointed director of the Matyas Rakosi heavy engineering works in Budapest, and that he had been succeeded by M. Janos Csergo.

On Oct. 30 the setting up of a new Ministry of State Farms, headed by M. Georgy Pogacsas, and several other Government changes were announced as follows · M. Istvan Hidas was relieved of his post as Minister of the Chemical Industry and Electric Power and elected a Vice-chairman of the Council of Ministers (i e , a Deputy Premier), while M. Hegedus, already a Deputy Premier, was relieved of his post as Minister of Agriculture; it was stated that these changes had been made in order to strengthen the work of the Council of Ministers M Arpad Kiss, Minister of Light Industry, was appointed Minister of the Chemical Industry and Electric Power, being succeeded as Minister of Light Industry by M. Bela Szalai, chairman of the State Planning Office. M. Ferencz Erdei, Minister of Justice, was appointed Minister of Agriculture, the Justice portfolio being taken over by M. Erik Molnar, the President of the Supreme Court. M. Andor Berei was appointed chairman of the State Planning Office and M. Jozsef Domokos President of the Supreme Court.

Dr. Jozsef Roman was appointed Minister of Health and Welfare on Feb. 20, 1955, in succession to Dr. Sandor Zsoldas, who had died on Feb. 1.

Formation of Patriotic People's Front. A new political organization, called the Patriotic People's Front and designed to unite all parties and groups in Hungary, held its first congress in Budapest on Oct. 23-24. Inaugural meetings of the new organization had been held throughout Hungary in the preceding months and had elected delegates to the first Congress. M Jozsef Darvas, Minister of Popular Culture, emphasized at the congress that the P.P.F. was not a fusion of parties as the Independence People's Front had been, but was built up on much broader foundations in order to achieve the fullest possible unity. The National Council of the P.P.F. met after the foundation Congress under the chairmanship of Professor Ferenc Harrer (a former diplomat) and elected the following presidium: M Paul Szabo, the distinguished novelist (chairman), M. Jozsef Darvas, President Istvan Dobi, Professor Harrer, M. Imre Nagy, and M. Matyas Rakosi (vice-chairmen); and M. Ferenc Janosi (general secretary).

The Budapest daily newspaper *Magyar Nemzet* was adopted by the P.P.F. and appeared for the first time on Nov. 14 with the heading "Organ of the Patriotic People's Front."

Local Council Elections. Elections were held throughout Hungary on Nov. 28 for county, town, and village councillors, more than 104,000 candidates—all endorsed by the newly-formed P.P.F.—standing for election. Of the 6,595,736 votes cast (97.4 of the electorate), the P.P.F candidates received 6,290,541 (97.9 per cent); 111,295 votes were cast against, 172,256 voters abstained, and there were 21,644 spoiled papers. Electors had the choice only of accepting or rejecting the one candidate named on the ballot paper; 586 candidates were rejected, necessitating fresh elections.

It was announced on Oct. 27, 1954, that M. Gyula Kallai, who had been dismissed as Foreign Minister in April 1951 (see 11476 C) and detained for "Titoist activities," had been released from a concentration camp. On Nov. 21 it was stated

that Mme. Anna Kethly, a leading Hungarian Social Democrat, who was arrested in 1948 after opposing the fusion of her party with the Communists (see 9465 A), had been pardoned and released; with the news of her release came also the first official intimation that she had been tried and sentenced, apparently to 12 years' imprisonment, on charges of undermining the regime. The announcement of these releases followed a statement on Oct. 10 by M. Istvan Kovacs, First Secretary of the Budapest branch of the Communist Party, in which he admitted that the leaders of the former State Security Office had arrested many people by using "criminally improper methods" and that people had been convicted on the grounds of "invented and forged charges and evidence." "The strength of our party and Government," he said, "is proved by the fact that all cases of such prisoners were examined after the Peter case (see 13464 B), and those whose innocence was proved have been released."—(Hungarian Bulletin, Budapest - Times - Manchester Guardian - Le Monde, Paris - Neue Zürcher Zeitung - New York Times) **(Prev. rep. 14080 A; 13014 A.)**

A. EUROPEAN AGRICULTURAL CO-OPERATION. — First Meeting of Ministerial Committee. - Appointment of O.E.E.C. Director of Agriculture and Food. - Inauguration of Market News Service.

The Ministerial Committee for Agriculture and Food of the O.E.E.C. held its first meeting in Paris on March 8-9 under the chairmanship of Signor Medici, the Italian Minister of Agriculture; Yugoslavia was represented by an observer.

The Ministers decided that the Committee of Deputies should draw up by June 1955 a programme of work, paying particular attention to co-ordinating agricultural production and distribution policies and to methods designed to ensure the application of the recently adopted trade liberalization decisions to food and agriculture. The Ministerial Committee also agreed to the appointment of M. Louis-Georges Rabot as O.E.E.C Director of Agriculture and Food. M. Rabot, a former deputy director at the French Ministry of Agriculture, had been closely connected with the preparatory stages of the "Green Pool" and had recently been chairman of the interim committee set up before the establishment of the full Ministerial Committee.

A daily market news service on fruit and vegetables was inaugurated on March 8 under a scheme organized by the European Productivity Agency in conjunction with the U.S. Foreign Operations Administration.

The service—extending initially to Belgium, France, Western Germany, Italy, the Netherlands, and Switzerland—covers the collection and distribution of the latest information by Ministries of Agriculture or national organizations (in order to guarantee its impartiality), its exchange by teleprinter, and its incorporation in bulletins sent from various national centres to firms and individuals interested in the marketing of fresh fruit and vegetables. The service aims at assisting economical marketing, the information circulated comprising details of supply, demand, variety, quality, and prices of fresh fruit and vegetables in both consuming and producing countries, as well as indications of the movements of ships carrying such produce.

The announcement stated that it was hoped that eventually other O.E.E.C. countries would take part in the daily news service, but that they would first be asked to provide a fortnightly survey of their own markets.

B. JAPAN - SWITZERLAND. — Agreement on Japanese War Reparations.

An agreement regulating Japanese reparations payments to Switzerland to cover certain personal and material damages suffered by Swiss nationals in the Far East during the Second World War was signed in Berne on Jan. 21 by M. Petitpierre, head of the Swiss Political Department, and Mr. Hagiwara, the Japanese Minister to Switzerland.

The Japanese Government undertook to pay a global amount of 12,250,000 Swiss francs in settlement of all Swiss claims (estimated at about 22,000,000 frs.) in respect of material damage caused by the Japanese occupation authorities or forces in the Philippines, the Dutch East Indies, Indo-China, Singapore, Hong Kong, and other areas occupied by Japan during the last war. Japan also agreed to the action already taken by the Swiss Government in utilizing part of the former assets of the Japanese State in Switzerland to meet compensation claims (totalling 2,430,000 frs.) by Swiss nationals who had suffered bodily harm, arbitrary imprisonment, etc., in Japan or Japanese-occupied territories The Swiss Government agreed to release Japanese private assets in Switzerland (which were blocked in August 1945 after the Japanese surrender to the Allies) for Japanese reparations payments, and to unfreeze any balance of such assets when Japan had fulfilled her obligations.

As far as compensation for damages caused by military operations in Japan was concerned, the Japanese Government agreed to accord to Swiss nationals equal treatment with Japanese.—(Neue Zurcher Zeitung - New York Times)
(Prev. rep. Japanese Reparations, 13921 A).

C. UNITED KINGDOM. — Wrexham By-election.

The Wrexham by-election, caused by the death of Mr. Robert Richards (Labour), was held on March 17 with the following result:

Jones, J. I. (Labour)	23,402
Jones, Guthrie (C. and Nat.L.) .. .	12,476
Morgan, D. E. (Welsh Nat.)	4,572
No change. Labour majority . ..	10,926

The figures at the general election were. R. Richards (Lab) 33,759; W. G. Cooper (C and Nat L.), 19,124; A. D. Thomas (Welsh Nat.), 1,997; Labour majority, 14,635. The Labour candidate received 57.85 per cent of the votes in the by-election, the Conservative and National Liberal candidate 30.85 per cent, and the Welsh Nationalist 11.3 per cent, compared with the general election percentages of 61.51, 34 85, and 3.64 respectively; the Labour proportion thus fell by 3.66 per cent. The percentage of the electorate voting in the by-election was 62.43, compared with 84.77 at the general election, the total electorate being 64,788, compared with 64,736 in 1951. Mr Morgan forfeited his deposit.

Mr. J I. Jones (54) is a schoolmaster, and in 1951 unsuccessfully contested the Denbigh seat.

The by-election was the 47th of the present Parliament.
(Times - Daily Telegraph) **(Prev. rep. By-elections, 14015A.)**

D. SOVIET UNION. — Dismissal of Minister of Culture. - Appointment of Deputy Foreign Ministers.

It was announced in Moscow on March 21 that Professor G. F. Alexandrov, the Minister of Culture, had been dismissed "for having failed to manage the business of his Ministry," and that he had been succeeded by M. Nikolai M. Mikhailov, Ambassador to Poland. Professor Alexandrov, author of many works on philosophy, was relegated from a leading position in 1947 for giving too much credit to "bourgeois" philosophers in a book on Western European philosophy, but came back into prominence under M. Malenkov, when his re-emergence was regarded as a sign of the greater ideological freedom of the Malenkov era.

The appointment of M. V. V. Kuznetsov as a First Deputy Foreign Minister and of MM. V. Semeonov and M. K. Fedorenko as Second Deputy Foreign Ministers was announced in Moscow on March 22. M. Kuznetsov, already a Deputy Foreign Minister, studied in the U.S.A. in the 1930's and was for many years head of the All-Union Council of Trade Unions. M. Semeonov was formerly Soviet High Commissioner in Germany, and M. Federenko had hitherto been a counsellor at the Soviet Foreign Ministry.—(Times - Daily Telegraph - Le Monde, Paris) **(Prev. rep. Prof. Alexandrov, 13468 A; M. Kuznetsov, 12797 A; M. Semeonov, 13181 C.)**

E. CHILE. — Cabinet Changes.

Señor Sergio Recabarren, the Chilean Minister of the Interior, was appointed Minister of Finance on Feb. 21 in succession to Señor Francisco Cuevas Mackenna, who had resigned because his economic plans, especially his proposals for a freer exchange system and his opposition to the use of preferential exchange rates, had been opposed by other members of the Government. At the same time Señor Carlos Montero Schmidt, leader of the Agrarian Labour Party, succeeded Sr. Recabarren as Minister of the Interior. The Agrarian Labour Party, though constituting only a minority in the Chilean Congress, has now seven representatives in the Cabinet of President Ibañez, including the Ministers of the Interior, Economy, and Finance; it has indicated that it intends to follow the original programme proposed by the President at the time of his election in 1952.

F. MANILA DEFENCE TREATY. — British and U.S. Council Representatives appointed.

Mr. John E. Peurifoy, American Ambassador in Bangkok, was nominated U.S. Representative on the South-East Asia Defence Treaty Council on March 13. The Foreign Office in London announced on March 21 that Mr. Malcolm MacDonald, the British Commissioner-General in South-East Asia, had been appointed U.K. Representative on the Council, whilst Mr. Berkeley Gage, the British Ambassador in Bangkok, would be the alternative Representative.—(Times - New York Times)
(Prev. rep. 14081 A.)

G. YUGOSLAVIA. — Nuclear Power Commission.

The Yugoslav Federal Executive Council decided on March 15 to set up a Federal Nuclear Power Commission with the task of co-ordinating development of nuclear research, controlling the application of nuclear energy for peaceful purposes, and working out plans for the development of nuclear energy in Yugoslavia. (Tanjug Agency, Belgrade)

A. CAMBODIA. — Abdication of King Norodom Sihanouk. - Accession of King Norodom Suramarit. - Evacuation of French Union and Vietminh Troops. - Surrender of "Khmer Resistance Forces." - New Cabinet formed by M. Leng Ngeth.

King Norodom Sihanouk of Cambodia abdicated on March 2 in favour of his father, Prince Norodom Suramarit, after proposals for the revision of the Constitution which he had put forward had been criticized by the International Control Commission as incompatible with the Geneva armistice agreement. The events leading up to the King's abdication are summarized below.

In accordance with the terms of the Geneva agreement, all French Union and Vietminh forces were withdrawn from Cambodia by Oct. 20, when the Joint Commission of military representatives of both sides was dissolved. The last Cambodian rebel leader to submit, M. Son Ngoc-Thanh (leader of the "Khmer Resistance Forces," and a former Prime Minister), had surrendered to the authorities on Oct. 2 with 300 of his followers. In a letter to the King written early in 1955 he gave a pledge of loyalty and asked for an audience; the King refused to see him, however, accusing him of conducting propaganda against both the monarchy and himself, and M. Son Ngoc-Thanh was subsequently reported in March to have taken refuge in North Vietnam.

M. Penn Outh's Government resigned on Jan. 24, and the King thereupon appointed a new Cabinet of supporters of the royal policy drawn from all parties and headed by M. Leng Ngeth. He also announced that he considered the "mission" which he had undertaken after the dismissal of the Democratic Party from office in June, 1952 (see 12328 A) to be completed; that a referendum on the question "Has the royal mission been accomplished to the people's satisfaction?" would be held on Feb. 7; and that elections to a new National Assembly would take place on April 17. The referendum was accordingly held on Feb. 7, and it was subsequently announced that 925,667 votes (99.8 per cent) had been cast in favour and 1,834 against.

Voting took place in public in the presence of police and Government officials, illiterates being required to hand in a white ballot paper for "yes" or a black paper for "no." On the eve of the referendum the police had raided all newspaper offices in Pnom-Penh, suppressed five Opposition papers, and arrested a number of journalists.

The emergency measures decreed by the King in 1952 after the dissolution of the National Assembly were lifted on Feb. 10, to facilitate the proposed elections. On Feb. 19, however, at a joint meeting of the Cabinet and the Royal Council, which was also attended by members of the International Control Commission, the King announced that he intended to hold another referendum on proposals for the revision of the 1947 Constitution.

He explained that he had recently received a number of petitions asking him to retain power in his own hands and not to hold general elections, which it was feared would give rise to disorders. As he considered Western democracy unsuited to Cambodian conditions, he proposed to introduce a new form of government. Under this, each commune would elect a "deputy-mayor," who would act as its representative in a newly-formed Provincial Assembly, while the 15 Provincial Assemblies, which would exercise wide powers, would in turn elect the members of the National Assembly from among their own membership. Only persons who had lived in the same locality for three years would be free to vote and to stand for election, and although political parties would be allowed to exist and to organize election campaigns, candidates would stand as individuals and not as party representatives. In order to ensure stability, Cabinets would be nominated by the King, and the National Assembly would be empowered to call for the resignation of individual Ministers, but not to dismiss the Cabinet as a body.

These proposals were criticized by the International Control Commission, which pointed out that the proposed residential qualification for voters and candidates would automatically exclude the former members of the "Khmer Resistance Forces," and was therefore incompatible with the clause of the Geneva Agreement forbidding discrimination against them. The King thereupon announced on March 2 that he would abdicate; this development was apparently the result of a sudden decision, as the King had given no indication of his intention when he received Mr. Dulles, the U.S. Secretary of State, on Feb. 28 (see 14081 A).

In a proclamation issued on March 2, the King was reported by *Agence France-Presse* to have stated *inter alia*: "My people are not unaware of the work accomplished by their King during the last three years, nor of the importance of the constitutional reforms which I envisaged in order to avoid a return to chaos. Certain political parties, among them Son Ngoc-Thanh's Democratic Party, have intervened with the International Control Commission to prevent me from continuing my work. That is why today I announce publicly my intention to abandon power and to step down from the throne, in order to live henceforward among my people a life as humble as that of my subjects. I shall retire to the country, and I shall refuse to take away anything from my palace. I am abandoning power in favour of my father, Prince Suramarit." M. Leng Ngeth, however, subsequently stated that King Norodom Sihanouk had made no reference to the International Commission in his proclamation. The Commission itself denied that it had interfered in Cambodian internal affairs and declared on March 15 that it had never received any complaint regarding its activities from the Cambodian Government, with whom it had, on the contrary, always enjoyed good relations.

Under the Cambodian Constitution the King nominates his successor, although his choice may be set aside under certain conditions by the Royal Council; thus King Norodom Sihanouk was himself chosen by the Council in 1941 on the death of his grandfather, King Monivong, in order to reconcile two rival branches of the royal family, from both of which he is descended. The new King, who is 60, was enthroned on March 3 with the approval of the Council and the Cabinet. M. Leng Ngeth stated on the same day that the change of ruler had taken place in complete calm, that the Government was in full control, and that no question of its resignation had arisen.—(Le Monde, Paris - Le Figaro, Paris - Times) **(Prev. rep. Geneva Agreement, 13816 A; King Norodom Sihanouk, 13318 A.)**

B. UNITED KINGDOM. — Labour and Manpower. - Manpower Distribution at End of 1954.

The following table shows the manpower position in Britain at the end of 1954, comparison being given with 1953:

	Dec. 31, 1954	Dec 31, 1953†
Total Working Population* ·		
Men	16,050,000	15,949,000
Women	7,768,000	7,600,000
Total	23,818,000	23,549,000
H.M. Forces and Women's Services	832,000	850,000
Ex-Servicemen and Women on Release Leave	6,000	6,000
Registered Unemployed‡	266,000	330,000
Persons in Civil Employment	22,714,000	22,363,000
of whom: *Men*	*15,060,000*	*14,901,000*
Women	*7,654,000*	*7,462,000*

* The "total working population" represents the total number of persons aged 15 or over working for pay or gain, or registering themselves available for such work, including H.M. Forces and the Women's Services, those on release leave and not yet in employment, registered unemployed, private indoor domestic servants, and gainfully employed persons over pensionable age. Part-time workers are counted as full units

† Revised figures.

‡ Excluding persons registered as "temporarily stopped," most of whom were on employers' pay-rolls and therefore included in the numbers shown in civil employment.

An analysis by industrial groups of the total number of persons in civil employment is given below.

Industries or Services	Dec 31, 1954	Dec. 31, 1953*
Basic Industries:		
Mining and Quarrying (including coal-mining)	865,000	866,000
Gas, Electricity, and Water	376,000	375,000
Transport and Communications	1,692,000	1,711,000
Agriculture and Fishing	1,022,000	1,043,000
Total, Basic Industries	3,955,000	3,995,000
Manufacturing Industries:		
Chemicals and Allied Trades	509,000	497,000
Metal Manufacture	565,000	555,000
Vehicles	1,210,000	1,157,000
Engineering, Metal Goods, and Precision Instruments	2,712,000	2,598,000
Textiles	995,000	998,000
Clothing and Footwear	685,000	697,000
Food, Drink, and Tobacco	905,000	870,000
Other Manufactures	1,590,000	1,541,000
Total, Manufacturing Industries	9,171,000	8,913,000
Building and Contracting	1,438,000	1,419,000
Distributive Trades	2,802,000	2,725,000
Professional, Financial, and Miscellaneous Services	4,037,000	3,991,000
Public Administration ·		
National Government Service	583,000	597,000
Local Government Service	728,000	723,000
Total in Civil Employment	22,714,000	22,363,000

* Revised Figures.

The largest percentage increases, as compared with 1953, were in vehicle manufacture (4.5 per cent); engineering, etc. (4.4 per cent); food, drink, and tobacco (4.0 per cent); "other manufactures" (3.2 per cent); distributive trades (2.9 per cent); and chemicals (2.4 per cent). The largest decreases took place in national government service (2.3 per cent), and agriculture and fishing (2.0 per cent).
(Ministry of Labour Gazette) **(Prev. rep. 13482 B.)**

A. UNITED STATES.—Tariff Policy. - Tariff Increase on Imported Watches. - U.S. Anti-Trust Suit against Swiss Watch Manufacturers and U.S. Importers. - Swiss Protests. - Other U.S. Tariff Decisions.

The first tariff increase on an important industrial product since the beginning of the reciprocal trade programme in 1936 was authorized by President Eisenhower on July 27, 1954, when he ordered tariffs on imported watches having no jewels or up to 17 jewels to be raised by up to 50 per cent. The President's Order endorsed a recommendation made by the Tariff Commission on June 30 and was also in line with a Senate sub-committee report published on July 24, which had declared that an "alive and vital" domestic watch and clock industry was essential to U.S. defence.

A White House statement accompanying the Order said that its effect was "to establish rates of duty ranging up to 50 per cent above present rates, but in no event above the original rates set in the Tariff Act of 1930"; for some imported watches there would be no change, while on those affected the additional duty would vary according to the type of movement. The President's decision, it said, was based on the finding of the Tariff Commission that watches were being imported "in such increased quantities as to cause serious injury to the American watch manufacturing industry."

The tariff increase was bitterly criticized in Switzerland in view of the fact that it chiefly affected the Swiss watch manufacturing industry.

A statement issued by the Swiss Legation in Washington said that the Swiss Federal Council had learned "with regret and deep concern" of the President's decision, which dealt "a serious blow not only to existing good relations between Switzerland and the United States, but also to the very principle of freedom of trade" In view of the fact that watch and clock exports constituted one-half of the total Swiss exports to the U.S A., the President's Order might "completely shatter" the trade relations built up between the two countries over the past 20 years, would impair the employment situation in one of Switzerland's leading industries, and appeared to indicate a new trend in American commercial policy. After expressing the hope that the tariff increase would, "in accordance with the letter and spirit of the escape clause [of the Reciprocal Trade Agreements Act], be only a temporary measure," the statement said that the Swiss Government reserved the right to invoke the compensating factors provided for in the U.S -Swiss trade agreement of 1936, though it would be difficult to find adequate compensation in view of the outstanding importance of Swiss watch exports to the U.S.A.

M. Maurice Vaucher, president of the Swiss Federation of Watch Manufacturers (an organization embracing the 550 Swiss producers of jewelled lever watches), issued a statement in Bienne in which he said that one out of every 10 Swiss industrial workers who depended on watchmaking for their livelihood would be directly affected by the decision, which "strikes at the very heart of Switzerland's national economy" since one-third of Swiss watch exports went to the U.S.A.

The measure was also strongly criticized by Mr. Harry S. Radcliffe, executive president of the National Council of American Importers, and by Mr. S. R. Lazarus, president of the American Watch Association (which represents American companies importing chiefly parts for assembly into finished watches).

President Eisenhower himself, at his Press conference on July 28, denied that his Order represented any retreat from the stand he had taken in favour of more liberal tariffs and freer world trade The watch industry, he said, was a special instance, as defence officials had testified that it was of major importance to preserve the ability of watchmakers to do fine precision work; the Defence, State, Treasury, Commerce and Labour Departments had all agreed that a domestic watch industry was essential to national security and to speedy mobilization. Nevertheless, he added, though his decision seemed "right at the moment," he could always instruct the Tariff Commission to reopen the matter if circumstances changed, and in any event the Commission must submit another report within two years on how the industry was faring.

U.S.-Swiss relations were further exacerbated on Oct. 20, 1954, when the U.S. Department of Justice filed a civil suit in the New York Federal Court charging 18 U.S. firms and organizations, five Swiss watchmaking companies, and the Swiss Federation of Watch Manufacturers' Associations with violating the Sherman Anti-Trust Act and the Wilson Tariff Act in the manufacture, sale, import, and export of jewelled watches, components, and parts.

It was alleged that the firms and organizations had agreed to refrain from establishing watch-manufacturing facilities in the U.S.A.; to restrict the manufacture of watches and watch parts in the U.S.A.; to refrain from extending aid to watch manufacturers located in countries other than Switzerland; to fix the prices, terms and conditions of sale for Swiss watches imported into the U.S.A.; to blacklist, boycott, or fine American watch companies which did not adhere to these agreements; and to prevent the exportation of U.S.-produced watch parts and cases to Switzerland and other countries. It also charged the defendant importers and manufacturers of Swiss brand-name watches with executing contracts to import watches in specified amounts, to refrain from handling competitive makes, and to limit the re-export of Swiss watches to designated countries in the Western Hemisphere.

Announcing the proceedings, the Justice Department stated that consultations had been held between U.S. and Swiss Government representatives in order to clarify "the complex issues involved"; that the filing of the suit did not mean a failure of these consultations or an end to negotiations; and that the U.S Government hoped that the issues involved could be satisfactorily dealt with without adversely affecting "the traditionally close and friendly relations between the two countries."

This further U.S. action was again strongly condemned by representatives of the Swiss watch industry, who interpreted it as an additional move designed to ruin the American market for Swiss watches. M. Petitpierre, head of the Swiss Political Department, summoned the American Ambassador (Miss Willis) on Oct. 21, 1954, to inform her of the strong views of the Swiss Government about recent U.S. actions damaging the Swiss watch industry, saying that the "successive measures" taken could not fail to have a bad effect on U.S.-Swiss relations.

M. Vaucher, in a statement on Oct. 20, rejected any suggestion that Swiss firms controlled or even influenced the prices at which their products were sold in the U.S A., and pointed out that, although the Swiss method of doing business had been unchanged for 18 years, no inconsistency with U.S. anti-trust laws had ever been found previously.

The U.S. proceedings against the Swiss companies were also criticized in Switzerland on the ground that they infringed Swiss sovereignty, and the Swiss Government said in a statement on Oct. 20 that, while it would leave it to the defendant companies to answer the charges made, it was "examining the legitimacy of these proceedings from the viewpoint of international law." M. Rubattel, President of the Swiss Confederation, replying to a question in the Swiss National Council on Dec. 22, stated that certain aspects of the U.S. suit constituted "an interference in Switzerland's right to legislate in her own internal affairs," and announced that a formal protest Note to that effect had been presented in Washington on Dec. 1.

This particular criticism arose from the Swiss system of minimum price fixing for different grades of watches and movements which the Swiss industry claims to be necessary to prevent competition taking the form of lowering quality, with consequent damage to the industry's international reputation. It was argued by the Swiss that as this system was sanctioned by Swiss law, and thus lawfully imposed on the industry, the U.S. Government transgressed its international rights by suing Swiss companies for acting in accordance with their own national law.

In reply to a U.S. offer to consider—in accordance with the 1936 trade agreement—a reduction of U.S. Customs duties on other Swiss exports to compensate for the higher tariff on watches, the Swiss Government pointed out on Dec. 29 that in view of the importance of watchmaking products in Switzerland's export trade the only really acceptable U.S. action would be the cancellation of the duty increase on Swiss watches; alternatively, however, it proposed a number of other articles for discussions on duty reductions. On Feb. 21 it was announced in Washington that the U.S. Government was ready to negotiate such compensatory tariff concessions and that public hearings on the U.S. proposals would start on March 28.

Amongst the items mentioned for consideration were coal tar dyes, electrical and clockwork measuring instruments (excluding timepieces), wickerware, hat braids, handkerchiefs, underwear, embroidery, and ciné cameras. This list, however, was criticized as being insufficient by a semi-official Swiss statement, which pointed out that Swiss watch exports to the United States amounted to over 400,000,000 Swiss francs per annum. Against this, the Swiss Government had proposed a list of "compensatory articles" representing exports worth only 70,000,000 francs, but the U.S. list did not even reach this lower total.

A number of other requests for tariff increases were rejected by the President in 1954 on the ground that the evidence did not sufficiently establish that the domestic industry was suffering serious injury from imports. The items involved were scissors (request rejected in May), lead and zinc (Aug. 20), hand-blown glassware (Sept. 9), clothes-pins (Nov. 23), wood screws (Dec. 23), and silk screen scarves (Dec. 23). In rejecting the Tariff Commission's request for higher duties on lead and zinc the President said that he was not prepared to raise them "at the expense of the serious adverse consequences that would follow for our international relations," and announced that instead he would authorize an increase in purchases of lead and zinc for the U.S. strategic stockpile.—(New York Times - New York Herald Tribune - Neue Zurcher Zeitung)

B. AFGHANISTAN - COMMUNIST CHINA. — Diplomatic Relations.

Peking Radio announced on Jan. 19 that Afghanistan and Communist China had agreed to establish diplomatic relations at Embassy level. (Times)

A. AUSTRALIA. — Further Import Restrictions.

Sir Arthur Fadden, the acting Australian Prime Minister, announced on March 21 that Australian imports would be severely restricted as from April 1, details being as follows: (1) "Category A" imports, or essential goods (see 12137 A), would be reduced by 15 per cent, i.e., from 100 to 85 per cent of imports in the base year 1950-51; (2) "Category B" (less essential) imports would be cut by 33⅓ per cent, i.e., from 60 to 40 per cent of imports in the base year; (3) total expenditure on imports subject to administrative control would be reduced by 20 per cent; (4) goods at present admitted without quota restriction would be brought under control; (5) "as a further precautionary measure" licences covering non-sterling non-dollar goods would be issued on a quarterly instead of a six-monthly basis.

Sir Arthur said that the increased restrictions had been made necessary by a deficit in the Australian balance of payments, estimated at £A32,000,000 for the first eight months of the current financial year (July 1954 - June 1955). "Our external reserves of currency," he declared, "are still in a healthy state, but obviously they cannot remain so if they are to continue to fall as they have done over the past 12 months, or at anything like that rate . The Government greatly regrets the necessity for this action as its aim is to get rid of restrictions altogether. But the present high rate of development in Australia must, from time to time, put a strain on the balance of payments, which has been intensified by less favourable export trends. The Government remains firm in its intention finally to eliminate all import restrictions as soon as this can safely be done, and its internal policies will be designed to assist towards this end."

Further details of the import cuts, issued by Senator O'Sullivan (Minister for Trade and Customs) on March 22, showed that consumer goods such as textiles, assembled motor-cars, cigarettes and tobacco, crockery, carpets, furnishings, cutlery, and electrical goods were among those which would be reduced by 33⅓ per cent. Imports of goods previously free but now made subject to quota restriction would be limited to their level in the 1954 calendar year (a quota officially described as "100 per cent of 1954 calendar year imports"), the principal items in this category being:

Replacement parts for agricultural machinery, cycles and motor vehicles, tractors and earth-moving equipment, portable electric hand tools, air compressors, boot and shoe machinery, engines for printing and paper-making machinery, textile machinery, watches and clocks, and pens and pencils; electrical insulating materials; materials for manufacturing abrasive cloths and papers, tobacco; coffee; bandages; iron and steel; aluminium and nickel; ball and roller bearings; mechanical and electrical motors; plate glass; drugs; alarm clocks, unexposed cinematograph film; crude rubber; pulp and waste paper for paper-making; valves for pneumatic tyres, emery abrasives; mercury, cotton waste, resin; and earth and clay.

The new restrictions, which were estimated to save some £A100,000,000 in 1955-56 and £A160,000,000 when fully effective, principally affected imports from Britain (Australia's largest supplier), and in particular the products of the British cotton, pottery, and motor-car industries. Australia is the biggest single market for British cotton textiles and it was feared that the new restrictions would reduce Australian imports from £30,000,000 to £20,000,000 a year, the restrictions were regarded in Lancashire as coming at a particularly bad time for the cotton industry, in view of decreased orders from other export markets as a result of increasing foreign competition. Although Australia is also the largest market for British cars, and in 1954 took 90,977 vehicles worth more than £24,000,000 (about a quarter of the industry's total exports), motor-car manufacturers generally expressed the hope that they would be able to dispose of their output in other overseas markets, particularly South Africa.

The President of the Board of Trade, Mr. Thorneycroft, stated in the House of Commons on March 24 that the effect of the Australian cuts on British exports to Australia in the next financial year might amount to some £30,000,000-£40,000,000 out of a total of £278,000,000, but that it was not possible to forecast the effect on particular industries since quotas were available for imports from any non-dollar source and in some cases for a variety of alternative goods. He added that he did not think any formal representations against Australia's general policy of seeking to safeguard her balance of payments would be either effective or appropriate, but that he would be in touch with the Australian authorities on detailed matters arising from the measures.—(Australian News and Information Bureau - Times - Financial Times - Manchester Guardian - Daily Telegraph) **(Prev. rep. 13916 B.)**

B. HUNGARY. — State of War with Germany ended.

The Hungarian Presidium Council passed a decree on March 22 ending the state of war with Germany.—(Hungarian News and Information Service) **(Prev. rep 14091 C.)**

C. COMMUNIST CHINA. — Introduction of Conscription. - Creation of Officer Corps.

The introduction of compulsory military service by Communist China in order to build up "a modern regular army" was approved by the Standing Committee of the National People's Congress (Parliament) on Feb. 9. At the same time regulations were agreed upon creating an officer corps with ranks similar to those in the Soviet Army; the highest rank would be Supreme Marshal, after which would come Marshals of the Republic. The regulations provided that in peace-time officers would be drawn from military academies, advanced military technical schools, or technical institutes, as well as from n.c.o.s who had passed selective examinations or had gone through special training courses, whilst in wartime they would also be drawn from n.c.o.s and privates who had shown outstanding merit in battle. The official Armed Forces Gazette in Peking stated on Feb. 9 that the new army would be organized into 14 combat and supporting corps, including a special "political division" to serve with front-line troops.

Western observers attached more importance to the decision to create an officer corps than to the introduction of conscription, pointing out that the old recruiting system had never in fact been voluntary. As a preparatory step, the Chinese Communist Government had issued an order on Sept 9, 1954, providing for the calling up of 450,000 men between the ages of 18 and 22 "to fill vacancies caused by retirement from the people's liberation forces and to move generally toward a military service system."

On Feb. 15 the Chinese Communist Government approved conscription regulations which made nearly 80,000,000 men liable for service—three years for those called up for the Army, four years for the Air Force, and five years for the Navy. The regulations applied to all men between the ages of 18 and 40 with the exception of only sons, men responsible for a family, and "counter-revolutionaries" who had been deprived of citizenship rights. Women were exempted from military service, but will be classified in a special reserve list according to their technical capacities, in case of "grave international events."—(Times - Manchester Guardian - New York Times - Le Monde, Paris) **(Prev. rep. 11423 A.)**

D. EASTERN EUROPE. — Proposed Mutual Defence Treaty and Unified Command.

The Soviet Foreign Ministry announced on March 21 that, after consultations between the Soviet Union, Poland, Czechoslovakia, Eastern Germany, Hungary, Rumania, Bulgaria, and Albania, unanimous agreement had been reached on the principles of a mutual defence treaty and the organization of a unified command in the event of the ratification of the Paris agreements. The announcement was worded as follows.

"Consultations between the Governments of the Soviet Union, the Polish People's Republic, the Czechoslovak Republic, the German Democratic Republic, the Hungarian People's Republic, the Rumanian People's Republic, the Bulgarian People's Republic, and the Albanian People's Republic, have been held, in accordance with the decisions of the Moscow Conference of European States on ensuring peace and security in Europe, concerning the conclusion of a treaty of friendship, co-operation and mutual aid between the eight countries which participated in that conference In the course of these consultations, complete unanimity of views revealed itself on the part of the Governments of the above-mentioned countries concerning the principles of such a treaty and the organization of a unified command of the participating States, which will be created in the event of the ratification of the Paris agreements, with the aim of ensuring the security of these States and in the interests of the maintenance of peace in Europe"

The announcement added that the Government of the Chinese People's Republic had taken part in the consultations and had expressed full agreement with the above-mentioned decisions.—(Soviet Weekly) **(Prev. rep. Moscow Conference, 13936 A; 14059 A; 14027 A.)**

E. SOVIET UNION. — New Marshals appointed.

The appointment of 10 new Marshals of the Red Army or Air Force and the promotion of the chief of the Red Air Force (Marshal P. P. Zhigarev) to the new rank of Chief Marshal were announced by Moscow Radio on March 11. The new appointments increased the number of Marshals of the Red Army from 11 to 17.

The new Army Marshals were General Chukov and Colonel-General Gretchko, both former Commanders-in-Chief in Germany; General Biryuzov, former C.-in-C. in Austria, and Colonel-General Moskalenko, a wartime commander; and General Bagramyan and General Yeremenko, former commanders on the Baltic coast. Colonel-General Varentsev and Colonel-General Kazakov became Marshals of Artillery, while Colonel-General Rudenko and Colonel-General Sudets were appointed Marshals of the Air Force.

It was announced on March 19 that the Soviet Navy's highest rank, Admiral of the Fleet, was to be raised to that of Admiral of the Fleet of the Soviet Union. The announcement did not list any promotions to the new rank.

(Times - Daily Telegraph) **(Prev. rep. 12787 A.)**

A. UNITED KINGDOM. — Town and Country Planning Bills, 1954. - Provisions and Enactment.

The Town and Country Planning Bill, 1954, implementing the second part of the Government's revision of the Town and Country Planning Act of 1947—the establishment of a new system of compensation for loss of development value in land in England and Wales—was enacted on Nov. 25, 1954, and came into force on Jan. 1, 1955. The first part of the Government's revisional proposals (see 12628 A)—the abolition of development charges and the suspension of the intended distribution of the £300,000,000 fund to claimants whose land had depreciated in value because of the 1947 Act—had been implemented by the Town and Country Planning Act, 1953, which received the Royal Assent on May 21, 1953.

The 1954 Bill—a most complicated piece of legislation—was considerably amended during its passage through Parliament, the Government itself proposing 119 amendments in the Committee stage in the House of Lords, and the House of Commons having to consider 152 amendments when the Bill was sent back from the House of Lords. The Bill contained no alterations to the 1947 Act other than those arising directly out of the decision to amend the financial provisions.

Moving the second reading of the Bill in the House of Commons on March 15, 1954, **Mr. Harold Macmillan** (then Minister of Housing and Local Government) said that, having suspended by means of the 1953 Act the "great pay-out" of £300,000,000 which had been due to take effect before July 1, 1953, the Government was now aiming in this new Bill to substitute for it a new system of compensation. Its essence was that claims for loss of development value would not in future be transferable as a separate asset but would go with the land; moreover, compensation would be paid only when the loss of the 1947 development value was actually sustained, whether through compulsory purchase for public need or through refusal of permission to develop.

Mr. Macmillan described as completely unfounded the fear expressed in several quarters that the principle of "pay-as-you-go" might expose the Government to the temptation of seeking budgetary economy at the expense of good community planning, and mentioned as evidence to the contrary that the Government had already indicated that it was ready to find £30,000,000 for compensation payments within five years, or in a shorter period if necessary. Finally he pointed out that nothing in the Bill made the position of people who failed to claim any worse than if the original scheme had gone through, whilst in every case where they were allowed to develop their land they were better off, because they no longer had to pay the development charge.

Sir Lynn Ungoed-Thomas (Lab.) moved the rejection of the Bill on the ground that it "fails to safeguard the public interest in land values created by community endeavour, prejudices the planning work of local authorities, and will be detrimental to future land use planning." He said that it was no part of the Opposition's case to insist on the preservation of the development charge, but that betterment in some form or other should be collected by the State; if the Bill were passed the community would pay compensation for development values which were stabilized but would get no advantage from those which were allowed to fructify. Moreover, without provision for collection of betterment, planning was bound to be strangled by finance, and the Government's scheme was "preserving an appearance of planning without its reality."

The Opposition motion was rejected by 296 votes to 262 and the Bill given a second reading on March 15; in the third reading on July 13 the Bill received 288 votes to 228.

In the House of Lords, one of the most important amendments adopted was one designed to prevent a recurrence of what had come to be known as the "Pilgrim case." (Mr. Edward Pilgrim had committed suicide in September, 1954, after land which he had bought for £500 had been compulsorily purchased for £65 by the local authority; because he had failed to submit the claim required by the 1947 Act, he had not been entitled to any compensation for loss of development value.)

Moving the second reading of the Bill on Oct 19, the Lord Chancellor (**Viscount Kilmuir**) announced that the Government intended to move a new clause enabling the Minister of Housing and Local Government to authorize payment of an *ex gratia* supplement in such cases. (On the following day it was announced that, in view of the decision to insert this clause, the Minister had authorized the responsible local authority to pay Mr Pilgrim's widow up to £400, the unrestricted value of the land.) The new clause, moved on Nov 2 during the Committee stage, provided that additional payments could be made in cases where a claim for compensation had not been made but where it would have been established had it been made

On the Report stage (Nov. 15) a Conservative peer, **Lord Hylton**, moved an amendment to grant the right of appeal against the decision to compensate or not, or against the actual amount of compensation awarded under the clause; this was opposed by the Government and, although a number of Conservative peers voted in favour of the amendment, it was eventually rejected by 26 votes to 19. The Bill was given a third reading in the House of Lords on Nov. 16.

The Bill was reconsidered by the House of Commons on Nov. 22 when the 152 Lords amendments were approved. During the discussions, the new Minister of Housing and Local Government (Mr. Sandys) announced that, although the new clause included in the Bill as a result of the "Pilgrim case" could not be applied retrospectively, where a transaction under similar circumstances was still incomplete when the Bill came into force, the local authority could if it wished make an *ex gratia* payment to the person affected and this payment would rank for an Exchequer grant.

The main provisions of the Act are summarized below

Payment of Claims. All payments of compensation for loss of the development value of land will be related to established claims on the £300,000,000 fund which, under the 1947 Act, was to have been distributed by July 1, 1953 Payments will, however, now be made only as and when loss of development value is sustained or where an occasion for payment has already arisen

Types of Claims. Broadly, there will be two main types: (1) claims made on account of events which happened between the passing of the 1947 Act (Aug 6, 1947) and the coming into force of the present Act (Jan 1, 1955), (2) claims made on account of events which take place after Jan 1, 1955

(1) *Compensation on Account of Past Events* will be paid either (*a*) on account of planning restrictions imposed under the 1947 Act by planning authorities or by the Minister, or (*b*) on account of events other than planning decisions

Compensation under (*a*) will be assessed by the Minister of Housing and Local Government—to whom applications have to be submitted by June 30, 1955—and will be paid as soon as possible; the amount of compensation will equal the depreciation in the value of the land due to the planning restriction, provided that the depreciation does not exceed the value of the relevant claim on the £300,000,000 fund on Jan. 1, 1955.

Compensation under (*b*) will be paid, in the main, to claim holders

(i) who paid development charge to which the claim relates, or

(ii) whose land was compulsorily acquired by, or sold by agreement to, public authorities; or

(iii) who before Nov. 18, 1952 (when development charge was abolished) sold land privately at a price which did not include all the development value of the land as established by their claim, or

(iv) who bought their claims without the land to which they relate before Nov 18, 1952.

This form of compensation will be paid by the Central Land Board, to which applications have to be submitted by May 1, 1955

Although no payment will exceed the amount of the appropriate claim on the £300,000,000 fund, established claims will be met in full On both forms of compensation interest (subject to deduction of income tax) will be due at the rate of 3½ per cent per annum from July 1, 1948, to the date of payment or to June 30, 1955, whichever is the earlier.

(2) *Compensation on Account of Future Events* will also be of two kinds. (*a*) that paid because of the imposition of planning restrictions; (*b*) that paid because land has been acquired by a public authority possessing compulsory purchase powers Claims under this heading will be related to the "unexpended balance of established development value" which arises if any payments made by the Minister of Housing and Local Government or by the Central Land Board, or the actual development of the land, do not use up the whole amount of the earlier claim under the 1947 Act. This "unexpended balance" is the basis on which compensation for future loss of development value will be paid, and it may be reduced or extinguished as payments are made or as development of the land is carried out From Jan. 1, 1955 onwards, claims on the £300,000,000 fund cease to have any existence as personal property, they are converted into "unexpended balances" which cannot be detached from the land to which they relate.

Compensation under (*a*) will be made to an owner who has been refused permission by the local planning authority to develop his land or has had a damaging condition attached to such permission; it will be assessed and paid by the Minister of Housing and Local Government to whom claims have to be submitted within six months from the date of the relevant planning decision. If the owner wishes he can appeal to the Minister against the planning decision but if this appeal is rejected he can still claim compensation

Compensation under (*b*) will be paid by the public authority acquiring the land and will be equal to the "existing use value" of the land (as under the 1947 Act) plus the "unexpended balance", where the land is bought by agreement, the price will be determined on the same basis.

Non-qualifying Planning Restrictions. Certain planning restrictions, whether imposed in the past or in the future, will not qualify for compensation. Among these are refusal of permission to change the use of land or buildings, and the imposition of conditions relating to the design of a building, the materials to be used in its construction, and the number or disposition of buildings on a piece of land. Compensation will also not be paid in the case of decisions given after Jan. 1, 1955, where permission to develop is refused either because the development would be premature or because the land is considered liable to subsidence or flooding

The "Unexpended Balance." The Central Land Board will issue a certificate (costing 5s) to anyone wishing to know the "unexpended balance" attributed to a piece of land. Where, however, a special calculation of the development value attributable to a particular part of the claim area is required this will be done only on the owner's application (cost 15s.).

Acquisition of Land with no "Unexpended Balance." When a public authority acquires land in future, there may still be compensation for the owner for loss of development value even though no

claim was established on the £300,000,000 fund, but one would have been established if made at the proper time Under the special provisions inserted as a result of the " Pilgrim case," compensation may be paid for the land equal to the compensation payable on the basis of its " existing use value, " plus a supplementary amount corresponding to the ' unexpended balance " which would have been available if a claim had been made. The District Valuer will notify the relevant public authority of the supplementary amount payable and the public authority will inform the owner, who will then have an opportunity of discussing the amount with the District Valuer

Registration of Compensation Payments. Payments made by the Minister of Housing and Local Government as compensation for planning restrictions will be registered in the Local Land Charges Register Should, however, development of the land subsequently be authorized, any earlier compensation payments will have to be refunded to the Minister. The amount of compensation paid for planning restrictions will reduce the ' unexpended balance " attaching to any piece of land, and if this land is eventually bought by a public authority the price paid by it will to that extent be lower than if there had been no previous compensation.

Appeals. The Land Tribunal will hear appeals (*a*) against the amount of compensation awarded by the Minister in respect of planning decisions, whether made in the past or in the future, (*b*) against decisions made by the Central Land Board

Protection of Prospective Buyers. Anyone who is thinking of buying land for early development, for which he has already obtained planning permission can—before completing the purchase—ask the local authority whether they know of any proposal for the acquisition of the land by any public authority If he is told that no such proposal is known, and on the strength of this within three months buys or contracts to buy the land, any public authority which in fact compulsorily acquires the land within five years will have to pay the market value of the land taking into account the benefit of any permission for development of the land which was in existence at the time the enquiry was made, even though the development has not yet been carried out. By this means a prospective buyer will be able to protect himself against being bought out at the " controlled price " before he carries out his development.

Exchequer Grants. Exchequer grants to local authorities to help them meet compensation claims will in general be at a uniform rate of 50 per cent, instead of ranging from 20 to 90 per cent as hitherto. Where a local authority acquires land for the provision of playing fields, the Exchequer grant may be as much as 75 per cent.

The Town and Country Planning (Scotland) Bill, 1954, containing provisions similar to those of the Bill for England and Wales, was given a second reading in the House of Commons on May 12, 1954, after an Opposition motion to reject it had been defeated by 232 votes to 209.

Like the English Bill, it was considerably revised during its various parliamentary stages In the Scottish Standing Committee of the House of Commons the Opposition protested on June 17 that, with 92 amendments to be discussed (only eight of which had been put down by the Opposition), the Committee had insufficient time to deal with the Bill without endangering consideration of other Scottish matters; when the Government declined to accept a suggestion for alleviating this situation, all the Opposition members of the Committee walked out

The Bill was, however, eventually given a third reading by the Commons on Oct. 20 and by the Lords on Nov. 18. As with the English Bill, it was enacted on Nov. 25 and came into force on Jan. 1, 1955.—(Ministry of Housing and Local Government - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 12628 A; 1947 Act, 8468 A; 9231 A.)**

A. WOOL. — Review of 1953-54 Season.

A summary is given below of the principal wool statistics for the season July 1953 - June 1954.

Australia. Sales totalled 3,846,786 bales, valued at £A412,200,000, and the average price realized was 81 5d. a lb. (greasy). Britain was the principal buyer, with purchases valued at £104,700,000, followed by France, Italy Japan, the Soviet Union, and the United States.

New Zealand. Production totalled 425,500,000 lb., valued at £66,648,000, and the average price realized was 50.25d a lb

South Africa. Production totalled 268,298,542 lb, valued at £64,221,231 and the average price realized was 57.45d. a lb Exports amounted to 262,776,524 lb., the principal buyers being Britain (76,657,115 lb.), France (51,923,071 lb.), Germany (35,447,668 lb.), and Italy (32,604,919 lb.)

There were no marked fluctuations in prices during the season. Though prices at first fell gradually, they strengthened considerably in the closing months of the season.—(Bradford Chamber of Commerce Journal - Australian News and Information Bureau - Directorate of N.Z. Information Services, Wellington - Cape Times) **(Prev. rep. 13158 B.)**

B. UNITED STATES. — New NATO Delegate.

Mr. George W. Perkins, Assistant Secretary of State for European Affairs from 1949 to 1953, was nominated by President Eisenhower on March 1 as permanent U.S. representative on the Council of the North Atlantic Treaty Organization in succession to Mr. John C. Hughes, resigning.
(New York Times) **(Prev. rep. 13115 A.)**

C. PAKISTAN. — U.S. Technical and Economic Assistance Agreements.

Agreements providing for U.S. economic and technical assistance to Pakistan during the fiscal year 1954-55—as distinct from military assistance—were signed in Karachi on Jan. 11 and 18 by the Pakistani Finance Minister, Mr. Mohammad Ali, and the U.S. Ambassador, Mr. Hildreth. The U S. aid, which had been the subject of discussions during the Pakistani Prime Minister's visit to Washington in October 1954, was fixed at $110,200,000, divided as follows:

(1) Economic assistance—$60,000,000.
(2) Technical assistance—$5,300,000.
(3) Agricultural assistance—$29,400,000 for the supply of agricultural commodities and $10,000,000 as an outright gift for relief purposes.
(4) Emergency flood relief assistance—$5,500,000 (under an agreement signed in August, 1954).

It was officially stated that, of the $65,300,000 of economic and technical assistance, about $20,000,000 would be in the form of a loan repayable over 40 years and the remainder in the form of a grant The loan would be used for the purchase of equipment and supplies required for development projects, whilst the grant would cover the provision of expert advisory services and training facilities for Pakistani nationals, the supply of industrial raw materials, and the importation of consumer goods to bring down the cost of living. It was subsequently announced in Karachi that among the goods to be imported would be non-ferrous metals, chemicals, dyes, parts of domestic refrigerators, petroleum products, raw cotton, raw wool, wool tops and shoddy cotton twist and yarn, cotton fabrics, unmanufactured tobacco, motor vehicles, and aircraft.

The agreement on agricultural assistance stipulated that local currency accruing from the sale in Pakistan of the $29,400,000 worth of agricultural commodities should be deposited in a separate fund to be used on mutually agreed projects for the country's economic development

Subsequently, four operational agreements coming within the allocation for technical assistance were signed in Karachi.

The first three—signed on Feb. 6—covered U S. assistance to the value of $840,000 for the extension of medical services. They provided for (*a*) the establishment of three new training schools—one at Dow Medical College in Karachi for training doctors to teach other doctors, another in Karachi for training nurses to teach other nurses, and the third at Peshawar University to train medical students; (*b*) the extension of the anti-malaria campaign, including the construction of a plant to manufacture DDT; and (*c*) the formation of a public health consultation service consisting of seven consultants who would be available to advise the Government.

The fourth agreement—signed on Feb. 23—provided for a U.S. contribution of $816,000, to which the Pakistani Government would add the equivalent of $1,434,000, for expanding the Village Aid Programme, the money would be used chiefly to stimulate agricultural production, to improve rural health conditions, and to increase village literacy.

It was stated on Feb. 23 that by the end of 1955 about 770 village workers would have been trained under the Village Aid Programme and sent out to help people in approximately 3,850 villages throughout Pakistan.—(Pakistan High Commissioner's Office, London - New York Times - New York Herald Tribune) **(Prev. rep. 13853 A.)**

D. NEW ZEALAND. — Royal Commission on Monetary Affairs.

The N.Z. Minister of Finance, Mr. J. T. Watts, announced on March 16 the membership of a Royal Commission to inquire into monetary, banking and credit proposals which might be suggested as suitable for application to New Zealand, and to report on the advisability of any changes in the present system.

The members of the commission were: Mr. Justice Tyndall, Judge of the Arbitration Court (chairman); Mr. G. G. G. Watson, a barrister; Mr. E D. Wilkinson, a public accountant; Mr. C. G Trotter, managing director of the N.Z. Farmers' Co-operative Organization; Mr W. G Fernie, a company manager; and Mr. R. M Hutton Potts, a newspaper editor

The commission, which was also empowered to investigate any " associated matters " deemed to be relevant to the general objects of the inquiry, was appointed " with a view to fostering a greater degree of stability in prices, maintaining full employment of labour, ensuring the healthy development of natural resources, and promoting generally the economic and financial welfare of the people of New Zealand."
(Directorate of N.Z Information Services, Wellington)

E. CANADA - PORTUGAL. — Legations raised to Embassy Level.

The Canadian External Affairs Department announced on Feb. 9 that, in view of the " growing importance " of the close relations between them, Canada and Portugal had decided to raise their Legations in Lisbon and Ottawa to the status of Embassies. (Montreal Star)

A. WESTERN EUROPEAN UNION - NATO. — President Eisenhower's Re-affirmation of U.S. Support. - Assurance of Indefinite Retention of U.S. Armed Forces in Europe under NATO.

President Eisenhower sent identical letters on March 10 to the Prime Ministers of the seven countries which had signed the Paris agreements for the setting up of the Western European Union within the NATO—Belgium, France, Western Germany, Great Britain, Italy, Luxemburg, and the Netherlands—reaffirming U.S. support for the W.E.U. and giving his specific assurance that the U.S.A. would maintain its forces in Germany under NATO indefinitely if the Paris agreements were ratified. The text of the President's letters was as follows:

"At the time when there was under consideration the treaty to establish a European Defence Community, I made a public announcement of certain principles which would guide U.S. policies and actions with respect to Western Europe in the event that treaty should be ratified. Now, in substitution for that community, a plan has been evolved for a Western European Union. Obviously that Union and related arrangements signed at Paris on Oct. 23, 1954, when brought into force, will serve the vital interests not only of the members of the Union, but of the people of the free world, including the U.S.A.

The U.S.A. has twice been drawn into wars which originated in Europe and today it maintains forces there to help minimize the possibility of another war. It is in the interest of the U.S.A. to help reduce such dangers. To this end the U S.A. committed itself to the North Atlantic Treaty This treaty is in accordance with the basic security interests of the U.S A., and the obligations which the U.S.A. has assumed under the treaty will be honoured.

The member-nations are seeking to make the Atlantic alliance an enduring association of free peoples within which all members can concert their efforts toward peace, prosperity and freedom The success of that association will be determined in large measure by the degree of practical co-operation realized among the European nations themselves. The Western European Union and the related arrangements agreed upon in Paris are designed to ensure this co-operation and thereby to provide a durable basis for consolidating the Atlantic relationship as a whole.

It is my belief that the proposed arrangements when effective:

Will promote progress towards unity in Western Europe and draw together those whose past differences have led to recurrent war and gravely depleted Europe's human, material and moral strength;

Will restore sovereignty to the Federal Republic of Germany, a sovereignty which has now been withheld for 10 years, during which time the Government and people of that republic have demonstrated that they are capable of worthily discharging their responsibilities as a self-governing member of the free and peaceful world community;

Will, by controlling armament levels through an appropriate agency of the W.E U., assure against militarism;

Will provide a core of unity at the heart of the NATO, thus permitting adoption of practical defensive measures which offer good hope that any enemy attack could be stopped at the threshold;

Will enable the Federal Republic of Germany to make its appropriately measured contribution to international peace and security, in keeping with the spirit of the NATO;

Will, through action of the North Atlantic Council, assure a closer integration of the armed forces in Europe of the member-countries, thereby giving assurance that these forces cannot be used for nationalistic aggression or otherwise than for the security purposes envisaged by the NATO.

In London on Sept 29, 1954, the U S. Secretary of State, in order to facilitate efforts to produce an effective collective defence of Western Europe, indicated the conditions under which the U.S.A. might be prepared to make a policy declaration similar to that which was announced when the earlier E.D.C plan was under consideration. I am glad to affirm that, when the Paris agreements have been ratified and have come into force, it will be the policy of the U S.A.·

(1) To continue active in the various organic arrangements established under the NATO and to consult with other members of NATO on questions of mutual concern, including the level of forces from the respective NATO countries to be placed at the disposal of the Supreme Allied Commander, Europe.

(2) To consult, if so desired, with the agency for the control of armaments of the W.E.U. with a view to assisting in the achievement of its objective of controlling armaments and preventing unjustified military preparations within the members of the Union.

(3) To continue to maintain in Europe, including Germany, such units of its armed forces as may be necessary and appropriate to contribute its fair share of the forces needed for the joint defence of the North Atlantic area while a threat to that area exists, and to continue to deploy such forces in accordance with agreed North Atlantic strategy for the defence of this area.

(4) To co-operate in developing the closest possible integration among the forces assigned to NATO in Western Europe, including those contributed by the German Federal Republic, in accordance with approved plans developed by the military agencies and the Supreme Commander of NATO in accordance with the resolution adopted by the North Atlantic Council on Oct. 22, 1954.

(5) To continue to co-operate towards Atlantic security by sharing information authorized by Congress with respect to the military utilization of new weapons and techniques for the improvement of the collective defence.

(6) In consonance with its policy of encouraging maximum co-operation among the free nations of Europe, and in recognition of the contribution which the Brussels Treaty, as amended, will make to peace and stability in Europe, to regard any action from whatever quarter which threatens the integrity or unity of the W.E.U. as a threat to the security of the parties to the North Atlantic Treaty, calling for consultation in accordance with Art. IV of that treaty.

In accordance with the basic interest of the United States in the North Atlantic Treaty, as expressed at the time of ratification, the treaty was regarded as of indefinite duration rather than for any definite number of years The U.S.A. calls attention to the fact that for it to cease to be a party to the North Atlantic Treaty would appear quite contrary to our security interests when there is established on the Continent of Europe the solid core of unity which the Paris agreements will provide"

President Eisenhower's letter was generally interpreted as being intended to encourage the completion of the ratification of the Paris agreements by France, where the Council of the Republic was due to begin on March 22 its final debate on the agreements (already ratified by the National Assembly). A spokesman of the British Foreign Office stated that the President's move was warmly welcomed in London.

B. INDIA. — Attempted Assault on Mr. Nehru.

An incident widely interpreted as an attempt on the life of Mr. Nehru, the Indian Prime Minister, occurred at Nagpur, the capital of Madhya Pradesh, on March 12 when Babu Rao, a 36-year-old rikshaw-puller, jumped with a knife in his hand on the footboard of the car in which Mr. Nehru was riding with the Governor and the Chief Minister of Madhya Pradesh from Nagpur airport to the Chief Minister's residence. Babu Rao, who had suddenly pushed his bicycle rickshaw in front of the Prime Minister's car, causing it to halt, was overpowered by the Military Secretary to the Governor (Mr. P. R. Rajagopal) and some police officers, and was arrested. Mr. Nehru, who at the time of the incident had been standing in the car, continued on his way unperturbed.

In a subsequent statement to reporters Mr. Nehru described the incident as follows "I was annoyed at the man pushing the rickshaw in that manner. The man was coming towards the car and I thought he wanted to hand over a petition or a representation. But I saw a knife in his hand. It was a small knife. I would have taken it myself, but before I could do anything three or four policemen nearby caught him and arrested him and took him away. I consider this as an individual act of a cranky person. I do not give any larger meaning to it One should not exaggerate the incident."

It was later stated by the police that Babu Rao, who had been a millworker in various other Indian cities before coming to Nagpur, had told them that he had become "disgusted" with the Government; his complaints about personal injustices and grievances had gone unheeded, and he had wanted to force an interview with the Prime Minister to ventilate his grievances. He had denied any intention of assaulting Mr. Nehru, saying that the knife found on him had been only "incidental."—(The Hindu, Madras - The Statesman, Calcutta)

C. UNITED STATES.—Salary Increases for Members of Congress and the Judiciary.

President Eisenhower signed a Bill on March 2 granting higher salaries to the Vice-President, the Speaker of the House of Representatives, members of both Houses of Congress, and members of the judiciary.

The new salaries were as follows (old salaries in parentheses): Vice-President and Speaker of House, $45,000 a year, including $10,000 for expenses ($40,000); Senators and Representatives, $22,500 ($15,000, including $2,500 taxable expense allowance); Chief Justice, $35,500 ($25,000); Associate Justices, $35,000 ($25,500), Higher Court judges, $25,500 ($17,500); Lower Court judges, $22,500 ($15,000); Deputy Attorney General, $21,000 ($17,500); Solicitor General, $20,500 ($17,500).

The House of Representatives (on Feb. 16) had approved a salary increase of $10,000 for Congressmen, but the Senate (on Feb. 23) voted an increase of only $7,500, with which the House concurred.—(New York Times - New York Herald Tribune) **(Prev. rep. 8155 B.)**

D. ARGENTINA. — Population.

The National Department of Statistics announced on Feb. 16 that the population of Argentina at the beginning of 1955 was estimated at 18,919,000, an increase of about 3,000,000 over the 1947 census figure. Excluding the 3,000 settlers in the Antarctic sector of the Atlantic islands, the total was made up of 9,634,000 men and 9,282,000 women. The population of Buenos Aires, the Federal capital, was estimated at 3,555,000 and that of the Province of Buenos Aires at 4,984,000.

(Prev. rep. 8710 A.)

A. UNITED KINGDOM. — Reorganization of National Coal Board. - Mr. Bowman appointed Deputy Chairman. - Report of Independent Advisory Committee.

Mr. Geoffrey Lloyd, the Minister of Fuel and Power, announced in the House of Commons on Feb. 17 that the Government had decided to reorganize the National Coal Board in accordance with the recommendations of the independent advisory committee appointed in December, 1953. Sir Hubert Houldsworth would continue as chairman, but six members of the Board, including the two deputy chairmen, Sir Walter Drummond and Sir Eric Coates, had resigned. In their place Mr. James Bowman, who had been chairman of the Northern Division since 1950, would become deputy chairman, and six other full-time members had also been appointed.

The constitution of the new Board, as announced by Mr. Lloyd, was as follows: Chairman—Sir Hubert Houldsworth. Deputy Chairman—Mr. James Bowman. Full-time Members—Sir Andrew Bryan; Mr. J. Latham; Dr. W. Reid; Mr. W. H. Sales; Mr. R. H. Thomas; Mr. H. A. Wynn. Part-time Members—Alderman W. Bayliss and Mr. Gavin Martin. Two additional part-time members would be appointed later.

Mr. Lloyd stated that he had "for some time been impressed by the administrative ability shown by Mr Bowman," who had been described by Dr. Fleck, the chairman of the advisory committee, and some of his colleagues as "the outstanding administrator in the coal field." Of the other new appointments to the Board, Dr. Reid, chairman of the Scottish Division since 1952, would be the member specially concerned with production, Mr. Wynn, who would be concerned with research and development, had been director of the Safety in Mines Establishment at the Ministry of Fuel and Power since 1948; Mr. Latham had been the Board's Director-General of Finance since 1948; and Mr. Thomas had been its Director-General of Marketing (Commercial Operations) since 1947 Sir Andrew Bryan, Mr. Sales, Alderman Bayliss, and Mr. Gavin Martin had been members of the former Board.

The new appointments were made for five years and at the same salaries as in the past—the chairman being paid £7,500, full-time members £5,000, and part-time members £500 yearly.

The advisory committee's report was published on the same day, and is summarized under cross-headings below:

Leadership. The report stressed the committee's belief that "much criticism of the N.C.B. is ill-informed" and that the "main structure of the organization and the system of divisions and areas is sound," but made numerous detailed criticisms, particularly in regard to the Board's failure to maintain discipline. After pointing out that there was "no conflict between a commercial approach and the Board's ability to be a good employer," it declared "The prime necessity for the success of any large undertaking is the constant exercise of leadership at the highest level. . For the leaders to know when and how to step in and exercise the difficult role of decision . . . calls for the highest qualities of industrial statesmanship. And when the Board have come to the conclusion that some particular line of policy should be pursued, these same qualities are needed for ensuring that it is carried through effectively." The committee had found, however, that in a minority of coalfields the relations between managements and mineworkers "varied from the bad to the indifferent, just as they did before nationalization," and that in Scotland, Yorkshire, and South Wales many people in responsible positions were "so dominated by the problem of unsatisfactory labour relations" that they found it difficult to devote sufficient time and energy to other problems. The report therefore called on the Board to "strengthen at all levels the calibre of the staff dealing with labour problems" and to adopt clear and resolute policies with regard to labour matters

Composition and Duties of the Board. The committee pointed out that since it had ceased to be the practice for each full-time member of the Board to be responsible for a department, three key departments—production, marketing, and finance—had not been represented on the Board. This was "unsatisfactory both in theory and practice."

The committee therefore recommended: (*a*) that the Board's membership should be increased from 11 to 12—a chairman, a deputy chairman, six other full-time members (to be responsible for particular departments) and four part-time members; (*b*) that before appointing part-time members, the Minister of Fuel and Power should seek the advice of a body of leaders in particular fields (e.g., the president of the Federation of British Industries, the chairman of the T.U.C., and the president of the British Employers' Confederation); (*c*) that before appointing the chairman or deputy chairman or making new appointments of full-time members, the Minister should consult the part-time members, (*d*) that part-time members should have a right of access to the Minister; (*e*) that full-time members should normally be drawn from within the industry; and (*f*) that, in order to secure continuity, the principle of appointing full-time members for a definite term of years should be abandoned.

The committee held that the present salaries of full-time Board members were "not enough to attract the best people," and if continued would mean that many of the chief members of the staff were poorly rewarded, since their salaries were related to those of Board members. It therefore expressed the view that heads of large departments should command salaries of £7,500 annually (the present salary of the Board's chairman), and recommended "substantial increases" in the salaries of the chairman and other full-time members.

An addendum by Dr. Fleck recommended that legislation should be introduced to enable the Board to be enlarged to a maximum of 18, with two deputy chairmen instead of one, six part-time members instead of four, and three additional full-time members.

Management. Calling for better management—"in other words, more people of ability, new and better techniques, and firmer discipline," the report declared that since nationalization "quick promotion has come to more people than is good for them or the industry," and that, in consequence, there was a "serious shortage at every level of management of able people equipped with the right qualifications and experience." It continued: "The staff problem is far from solution . . . The kind of ill-informed talk, both inside and outside the industry, of hordes of officials has had its effects, and so has the cruder sort of cost-consciousness which saves money by not spending it instead of spending it well. The proportion of staff —40,000 out of a total payroll of about 750,000—is certainly not too large, indeed . . the efficient management of the industry requires a higher ratio, as well as a higher average quality. The staff problem will not be solved until there is a comprehensive policy, including a long-term programme of recruitment and training. The nationalized industry inherited more than a few people who were not then, and are not now, able to fill responsible positions satisfactorily. A policy for the retirement of these people is needed"

Labour Relations. The report stressed, however, that the bad labour relations prevailing in some districts were not caused solely by "the lack of firm and consistent direction from above," but in many cases were due to bad discipline among the rank and file and by mineworkers' failure to implement agreements reached by the N.C.B. with the union. This, besides causing stoppages and loss of output, had "a worse effect in that it leads to a feeling of irritation and frustration amongst managements" In this connexion the committee believed that the Board would be "ill-advised" to rely as heavily as in the past on the ranks of trade union officials as a source of recruitment for the labour relations and manpower and welfare departments, and recommended the setting up of a staff department and of an industrial relations department to deal with all workers not coming within the definition of staff. These departments should be recruited primarily from existing departments, but where necessary from outside the industry.

Divisional and Area Organizations. As regards organization in the divisions, the committee recommended (*a*) a review of salaries payable at divisional headquarters, to ensure that the best men were attracted to responsible positions, (*b*) abandonment of the practice of appointing part-time members of divisional boards; (*c*) establishment of a common pattern of organization; (*d*) proper and economical housing of each divisional board and its staff under one roof In the areas it suggested that a general pattern of organization should be laid down; that some area managers should be appointed from outside the ranks of mining engineers; and that a new post of assistant general manager should be created in each area. It also called for comprehensive training courses in colliery administration and management; the training of "organization and methods teams" to improve colliery office methods; the appointment at all large collieries of administrative and personnel officers; and steps to ensure that all colliery offices were brought up to a good standard of cleanliness and equipment.

Decentralization. Declaring that it was "not satisfied that policies and decisions emanating from the Board's headquarters are being properly carried out in the divisions," the committee explained: "There are various reasons for this failure. At the outset of nationalization the many undertakings were grouped together often unwillingly; the managements of some of them have found it difficult to adjust themselves to the new conditions. Again, policies might be accepted by divisions or areas, but inertia, habit, other preoccupations, or lack of staff prevent them from taking effective action. But the main reason is the unwillingness of the N.C.B. to insist on their policies being carried out. From the outset the Board have tried to control their subordinate formations with a very light touch . . . Too often, having adopted a policy, they have been half-hearted in holding to it when divisions have not liked it or have been slow in carrying it out"

The committee approved the Board's decision to decentralize management as far as reasonably possible, but believed that the Board's "indecisive attitude" had stemmed from "a failure to realize that, correctly interpreted, decentralization meant that "each level of management specifies clearly the powers that may be exercised by the level below it . . . and must see that the policies which it lays down are punctually and effectively carried out."

The report recommended therefore (*a*) insistence by the Board on its policies being properly carried out, and consultations between it and the trade unions on bad discipline among the rank and file; (*b*) a clear restatement of the principles of decentralization to be followed in the industry; (*c*) greater boldness in making personnel changes where justified by age, inefficiency, or indiscipline; (*d*) the setting up of a national advisory committee, comprising the full-time members of the Board and divisional chairmen, so as to ensure better consultation between the Board and the divisions.

Other Recommendations. These included (*a*) more thorough scrutinies of large capital schemes and systematic arrangements for progressive capital expenditure; (*b*) the establishment of a purchasing department at headquarters, division, and area levels; (*c*) the setting up of a research and development committee; (*d*) the removal of obstacles to the transfer of men from the coalfields to headquarters; (*e*) the strengthening of the headquarters production department.

In conclusion, the Committee pointed out that none of its recommendations would require legislation.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. 13403 A.)

A. NEPAL. — Dismissal of Mr. Koirala's Government. - Direct Rule by Crown Prince introduced. - Death of King Tribhuvana. - Accession of King Mahendra.

King Tribhuvana of Nepal (48) died on March 13 at Zurich, where he had been undergoing treatment for a heart complaint. His body was flown back to Khatmandu, and was ceremonially cremated on March 17. The eldest son of the late King, Crown Prince Mahendra Vir Vikram Shah (34), who in the King's absence had headed the Council of Regency and on March 2 had himself assumed responsibility for the government, was enthroned as King of Nepal on March 14.

The late King succeeded his father in 1911, at the age of five. For the greater part of his reign Nepal was ruled by the Rana family, which had held power since 1846, the King being merely a titular head. In November, 1950, the King, who supported the demands of the Nepali Congress for reforms, fled to India, and an armed uprising against the Rana rule was launched by the Congress. A settlement was reached in February 1951 through the mediation of the Indian Government, whereby the King returned to Nepal, certain constitutional reforms were introduced, and a coalition Government of Rana and Congress representatives was established (see 11210 A, 11336 A) Dissensions inside the Government (from which the Rana representatives had been excluded in November 1951) led to a constitutional crisis in August 1952, King Tribhuvana thereupon assumed full powers, ruling through an Advisory Council, until Cabinet government was restored in June 1953 (see 12583 A, 13136 A). The King's ill-health obliged him to leave for Switzerland in October 1954, his functions being performed in his absence by a Council of Regency composed of his three sons.

Paying tribute to the late King in the Indian House of the People on March 14, Mr Nehru described him as "an unusual kind of king," who "became the leader of a Liberal movement." Throughout Nepal's difficulties the late King had always been "some kind of anchor," and had "used his authority wisely in trying to soothe the people and bring them together" "Both the late King and the present new King," Mr Nehru concluded, "declared, and declared with sincerity, their desire to promote democratic institutions in Nepal. I have no doubt that the new King will persist in that desire and try to effect it"

The political situation in Nepal remained confused throughout 1954 and the first two months of 1955. The coalition Government formed by Mr. M. P. Koirala in February, 1954, was hampered by disagreements among its constituent parties, whilst a nominated Advisory Assembly, which was convened in April, was boycotted by the Nepali Congress, the leading Opposition party, which alleged that the representation of parties in the Council bore no relation to the real political situation. Causes of unrest included rising prices resulting from a fall in the exchange value of the Nepalese rupee, and discontent among the peasantry resulting in disorders in several districts.

On Jan. 10, 1955, the Nepali Congress launched a civil disobedience campaign and called for a general strike to begin on the next day in support of the following demands: (1) the holding of general elections at the earliest possible date, (2) an independent judiciary and the granting of fundamental rights, (3) control of inflation, (4) maintenance of law and order through a properly organized police force; (5) protection of national independence and of the interests of Nepalese abroad. Following the intervention of the Crown Prince, who gave an assurance that "effective steps" would be taken to implement these demands, the campaign was called off on Jan. 12. A new appeal for a general strike, however, was subsequently issued by the pro-Communist *Jan Adhikar Suraksha Samiti* (Society for Safeguarding Civic Rights), and 26 persons, including the son of Mr. Koirala and a son of Professor Regmi (the Foreign Minister), were arrested on Jan. 17 for defiance of the Act forbidding public meetings and processions

Since the autumn of 1954 relations had become increasingly strained between the four Government parties, viz., the National Democrats (led by Mr. Koirala), the Nepali National Congress (led by Professor Regmi), the Nepal *Praja Parishad* (led by Mr. Tanka Prasad Acharya, Minister without Portfolio), and the People's Congress (led by Mr. Bhadrakali Misra, Minister of Communications). On Dec. 23 the Advisory Assembly adopted by 28 votes to 18 a motion demanding that all legislative measures should be presented to it before they were enacted as law; although the motion had been opposed by Mr. Koirala, a number of members of the Government parties voted with the Opposition. The crisis inside the Government came to a head on Jan. 30, 1955, when a motion reducing the budget grant to the Foreign Ministry was carried by 43 votes to 39. In consequence, Mr. Koirala tendered his resignation on the following day, but the Council of Regency requested him to remain in office until the King's decision was known.

It was announced on Feb. 6 that the Nepal *Praja Parishad* and the People's Congress had united to form a single party, to be known as the Nepal *Praja Parishad*. The party's policy was defined as the establishment of a Socialist economy under a constitutional monarchy, the maintenance of neutrality in foreign affairs, independence from Power blocs, and special relations with India and China. The new party was joined by a section of the National Democrats headed by Mr. Balachandra Sharma (president of the Assembly), whilst most of the remaining members of the National Democratic Party were reported to have returned to the Nepali Congress, from which the National Democrats had broken away in 1952 At Mr. Koirala's demand the Council of Regency removed Mr. Acharya and Mr. Misra from office on Feb 11.

After the Crown Prince had visited the King at Nice for consultations, King Tribhuvana issued a proclamation on Feb. 18 investing him with full royal powers and dissolving the Council of Regency; at the same time the Crown Prince took over from Mr. Koirala responsibility for the Anti-Corruption Department, the Central Intelligence Bureau, and the Public Services Commission. He appealed on Feb. 21 to all the political parties to submit to him their proposals for solving the political crisis, together with lists of their leading members; the latter request was intended as a test of the amount of support which the numerous parties (reported to number 69) could claim. As Mr. Koirala was subsequently unable to form a new Government, the Crown Prince announced on March 2 that he had accepted his resignation and would himself rule directly for the time being to end the present uncertainty; he would, however, constitute a new Council of Ministers "at the earliest possible moment, after giving due and proper weight to the voice of the people."—(The Hindu, Madras - The Statesman, Calcutta - Times) **(13587 A.)**

B. INDO-CHINA. — Monetary and Economic Agreements between France and Associated States. - Abolition of Indo-Chinese Economic and Customs Union.

A four-Power conference of France and the Associated States of South Vietnam, Cambodia, and Laos was held in Paris from Aug. 26 - Dec. 29, 1954, to discuss the revision of the monetary and economic conventions adopted in 1950 at the Pau conference. A series of agreements was signed on Dec. 29, bringing to an end the economic and Customs union established under the Pau conventions, and containing the following provisions:

(1) From Jan. 1, 1955, each of the Associated States would issue its own currency, superseding the Indo-Chinese piastre, and would fix its own exchange rates. Parity between their currencies would be maintained during a transitional period, and the Vietnamese National Bank would continue to honour the signature of the former quadripartite monetary organizations.

(2) Each of the three States would levy its own Customs duties and regulate its own foreign trade.

(3) Freedom of navigation on the Mekong was recognized. Conventions would be negotiated on the conditions for the passage of Cambodian and Laotian traffic on the river and through the port of Saigon.

M. Penn Outh, then Prime Minister of Cambodia, stated on Jan. 3, 1955, that the question of the attachment of the Cambodian piastre to the franc area would be discussed at a forthcoming Franco-Cambodian conference on the economic and financial relations between the two countries, and that meanwhile the piastre would maintain its parity with the French franc.—(Le Monde, Paris) **(Prev. rep. 11429 A.)**

C. ITALY. — Senate Ratification of Paris Agreements.

The Italian Senate, after a debate which had started on Feb. 24, ratified the Paris agreements on March 11 by 139 votes to 82, with no abstentions. The Government was supported not only by the three Coalition parties (the Christian Democrats, Democratic Socialists, and Liberals) and by the Republicans, but also by the Right-wing Opposition (the Monarchists and the members of the neo-Fascist Italian Social Movement); the opposing votes were cast by the Communists and the Left-wing Nenni Socialists.

The debate was wound up by Professor Martino, the Foreign Minister, who declared that Italy could not isolate herself and that any neutrality on her part would be the end, not only of her active participation in world affairs, but also of her independence. Replying to those who had expressed fear of German rearmament, Professor Martino said that "in a certain sense we all share the responsibility for the future of Germany insofar as her future democratic development is conditioned by the general democratic methods of the Europe which she is entering." No threat to peace was involved in bringing Western Germany into a Western European Union, of which Britain was a member and in which there was the "moderating and balancing weight of Britain's general position in Europe and in the world."

Before the final vote the Senate accepted a motion which called on the Government to support, after the ratification of the Paris agreements, any efforts to promote talks between the Western and Eastern Powers with the object of bringing about disarmament both in nuclear and conventional weapons under a proper scheme of international control

The Senate's decision completed the ratification of the Paris agreements by the Italian Parliament.—(Giornale d'Italia, Rome - Corriere della Sera, Milan - Times)

MARCH 26—APRIL 2, 1955

A. FORMOSA SITUATION. — Nationalist Evacuation of Tachen and Nanchi Islands. - Reinforcement of Matsu and Quemoy. - British, U.S., Canadian and Indian Statements on Offshore Islands. - Adjournment of U.N. Debate on Cease-fire. - Soviet Proposal for 10-Power Conference. - U.S. Ratification of Defence Treaty with Nationalist China. - Increased U.S. Aid. - British Labour Party Resolution on Formosa.

The development of the international situation with regard to Formosa and the Nationalist-held offshore islands of China in February and March is described below under cross-headings.

Evacuation of Tachen Islands.

Following repeated and heavy Chinese Communist air attacks on the Tachen Islands (see map, page 14017) the Chinese Nationalist Government announced on Feb. 6 that the islands were to be evacuated. The announcement stated that the evacuation had been decided upon "in order to meet the new challenge of international Communist aggression," and so that the forces defending the Tachens could be redeployed "to strengthen the defence of other islands such as Quemoy, Matsu, etc." The State Department in Washington had announced on Feb. 5 that, at the request of the Chinese Nationalists, the U.S. Seventh Fleet had been ordered to help in the evacuation of the Tachens.

The evacuation accordingly took place on Feb. 7-11, a U.S. State Department announcement on the latter date saying that the operation—which was under the command of Vice-Admiral Pride—had been completed and that the U.S. naval and air forces which had taken part would now "resume their normal operations in the Formosa Strait." The statement added, however, that the U.S. forces would "be alert to any concentration or employment of Communist Chinese forces obviously undertaken to facilitate an attack upon Formosa, and will be prepared to take appropriate action." The evacuation of the islands—which included also the small islands of Yushan and Peishan, some 30 miles north and south of the Tachens respectively—was unopposed by the Chinese Communists, who withdrew all their forces from the area.

The only incident occurred on Feb. 9 when a U.S. plane on anti-submarine patrol was shot down by Communist anti-aircraft fire some 20 miles south-west of the Tachens, another plane was hit, but landed safely. Vice-Admiral Pride announced after the incident that the lost aircraft—whose crew were rescued by an American destroyer—had made an error in navigation.

The U.S. Seventh Fleet, in a communiqué issued on Feb. 13, said that it had employed 132 vessels and 400 aircraft in covering the evacuation, and that it had taken off 10,000 Nationalist troops, 4,000 guerillas, 14,500 civilians, and 40,000 tons of military equipment and supplies.

Shortly after the completion of the evacuation the Communist New China News Agency announced on Feb. 13 that the Chinese People's Liberation Army had "liberated Tachen, Yushan, and Peishan islands," that all "enemy-occupied" islands off the Chekiang coast had now been "liberated," except the southernmost, Nanchisan island, and that the "liberation" of the islands had "created favourable conditions for the liberation of Taiwan (Formosa) and other coastal islands." Earlier (Feb. 7) the Chinese Communist radio had described the U.S. assistance in the evacuation of the Tachens as a "war provocation against the People's Republic of China" and "a grave threat to the peace of the Far East."

Evacuation of Nanchi Islands.

The Nanchi Islands (of which Nanchisan is the most important), south of the Tachens and some 130 miles north of Formosa, were evacuated by the Chinese Nationalists on Feb. 23-25, about 6,000 troops and some 2,500 civilians being taken off. The evacuation, which was carried out despite repeated Nationalist assertions that the islands would be defended at all costs, was effected without assistance from U.S. forces. The islands were occupied by the Chinese Communist forces on Feb. 26.

Defence of Matsu and Quemoy.

Following their occupation of the Tachen and Nanchi Islands, the Chinese Communists renewed their attacks on the Nationalist-held islands of Quemoy and Matsu, the most important islands remaining in Nationalist hands besides Formosa and the Pescadores. The Nationalists reinforced their garrisons on the two islands, and by mid-March were reported to have more than 60,000 troops on Quemoy alone, whilst the Communists, who on March 25 announced that they were withdrawing a further six divisions from North Korea into China, were reported to be massing troops in Fukien Province on the mainland opposite the islands. It was also reported that the Communists had brought up heavy artillery pieces opposite Quemoy, putting the whole of the island within range of heavy artillery fire.

An attempted assault by 40 Communist motorised junks on Kaoteng Island (in the Matsu group) was driven off on March 4, whilst on March 14 the Nationalists announced that their aircraft had destroyed three Communist gunboats and seven armed junks west of Wu Yu Island, south-east of Amoy; apart from these engagements there was little activity during February and March except for exchanges of gunfire between Quemoy and the mainland opposite and Nationalist air attacks on Communist shipping.

The Chinese Nationalist Government continually reiterated their intention to defend Matsu and Quemoy and not to evacuate them, but opinion among the Western Powers remained divided. In Britain, Sir Winston Churchill stated on Feb. 23 that there was "a great deal of difference" between the coastal islands of China and the island of Formosa, whilst Sir Anthony Eden suggested on March 8 that the Nationalists should withdraw from all the coastal islands (see 14100 A). In the United States, on the other hand, where a number of leading Republicans argued that U.S. forces should go to the assistance of the Nationalists if Quemoy and Matsu were attacked, both President Eisenhower and Mr. Dulles refused to say what U.S. policy would be in that eventuality. In Canada, Mr. Lester Pearson (Minister for External Affairs) declared on March 24 that he did not consider a conflict over Quemoy or the Matsus "to be a situation requiring any Canadian intervention in support of the Chinese Nationalist regime." The Indian Prime Minister, Mr. Nehru, stated on Feb. 25 that the offshore islands were "obviously" parts of China and should be immediately evacuated by the Nationalists. The attitude of the various Governments is summarized below.

Nationalist China. General Chiang Kai-shek stated at a press conference on Feb. 14 that it had been made "perfectly clear" that the U.S.A. would defend the Matsu and Quemoy islands, as these two outposts were vital to the defence of Formosa itself. In no case, he said, would they be abandoned to the enemy. Similar statements were made by the Nationalist Foreign Minister (Mr. Yeh) on Feb. 18 and Feb. 25, and by the Prime Minister (Mr. Yui) on March 11.

Britain. Sir Winston Churchill, in his statement, said that, as there was no question of Britain being involved militarily in the defence of the coastal islands, "we should be careful of what advice we offer to our friends and allies on it." "The decision on whether or when these particular islands should be evacuated," he continued, "is not one the burden of which falls upon this Government, and we must recognize the natural preoccupations of other Governments who are immediately affected by the threatened attack from Communist China. This is especially true at a time when the Chinese Communists keep stridently asserting that the islands are to be regarded as a stepping stone to the seizure of Formosa itself, with all that that must mean for the Chinese Nationalists, who have been given shelter and protection there by the U.S.A., and to whom the U.S.A. are bound."

United States. Mr. Dulles made an important statement on the U.S. attitude when he addressed the Foreign Policy Association in New York on Feb. 16. Speaking of the U.S. mutual defence treaty with the Chinese Nationalists he said that it was important to note that the treaty, except where it related to U.S. territories, covered only the islands of Formosa and the Pescadores, and an armed attack against them. He also drew attention to the fact that U.S. armed forces had not been used to help the Chinese Nationalists retain the Tachen islands, but had in fact helped them to evacuate the islands and regroup their forces, thus avoiding "a bloody and wasteful battle which would have inflamed public emotions." The U.S.A. and Nationalist China had thus made an important contribution to the cause of peace.

"It has been suggested," Mr. Dulles went on, "that the Chinese Nationalists should go further and surrender to the Chinese Communists coastal positions which the Communists need to stage their announced attack on Formosa. It is doubtful that this would serve either the cause of peace or the cause of freedom. The Chinese Communists have been the initiators of violence in this area. They have already formally declared their intention to take Formosa by force. If the Chinese Nationalists now oblige by making it easier for the Chinese Communists to conquer Formosa, will they be less apt to do so? I gravely doubt it. The United States has no commitment and no purpose to defend the coastal islands as such. I repeat, as such. The basic purpose is to assure that Formosa and the Pescadores will not be forcibly taken over by the Chinese Communists." After referring to the Chinese Communists' declared intention of taking Formosa by force and using the coastal islands as a means to this end, Mr. Dulles said: "We shall be alert to subsequent Chinese Communist actions, rejecting for ourselves any initiative of warlike deeds. It is hardly to be expected, of course, that the Chinese Communists will renounce their ambitions. However, might they not renounce their efforts to realize their goals by force?"

Senator Knowland, the Republican leader in the Senate, declared on March 28 that he thought Quemoy and Matsu should be defended no matter what the cost "unless we are prepared to see all of Asia

go down the drain" A similar statement in favour of holding Quemoy and Matsu was made on the same day by Senator Bridges, chairman of the Senate Republican Policy Committee, who added that he had heard "in an informal way" that President Eisenhower and Mr. Dulles "will so decide"

President Eisenhower himself, answering questions at his press conference on March 30 about reports that the Chinese Communists planned to attack Quemoy and Matsu in mid-April, ruled out any further U S. commitments, but gave a warning that the surrender of the two islands would have to be weighed against the "disastrous impact" which such a policy would have on the morale of the Nationalist forces on Formosa. Asked if he thought that it would be possible to hold Formosa if Quemoy and Matsu were lost, the President answered that a "terrific burden" would fall on the forces and people of Formosa, and added that high morale was essential. "You have to have something to believe in if you're going to fight," he said. "We must be careful not to weaken or destroy their morale. That is always a military factor when you talk about surrendering this place or that."

Nevertheless he called upon Americans "to be patient and strong in your patience," lest the country be tempted into believing that the time had come for it to attack first in order to forestall an inevitable and imminent aggression, and gave a warning that "the cause of peace will not be served by making further commitments in that area, that is, commitments of intention." (The reports in Washington about an impending Chinese Communist attack on Matsu and Quemoy had originated in remarks made to reporters on March 24 by Admiral Carney, Chief of Naval Operations.)

Admiral Felix B. Stump, C.-in-C of the U.S. Pacific Fleet, visited Matsu on March 6 to inspect defences. He stated on March 7 that "if the United States is willing, we can defend anything against the Communists."

Canada. Mr. Lester Pearson, stating the Canadian position on the question, said that he thought a distinction, politically and strategically, could be made between Formosa and the coastal islands. "I do not consider a conflict over Quemoy or the Matsus to be a situation requiring any Canadian intervention in support of the Chinese Nationalist regime," he declared. "The fact that we have no commitments does not mean that we have no concern. We have a deep and abiding concern because of considerations which make isolation from these questions well-nigh impossible. Canadians understand and accept the inescapable interdependence of Canada and the U.S.A. in the policies required for our joint security and the preservation of peace. It does not mean that whenever the U.S.A. is engaged in any kind of war we are at war. It does not mean that we must participate in limited or peripheral war, although the danger of such war spreading gives us the right to express our concern. I have personally made known our serious doubts and anxieties to Mr. Dulles and have received from him a full statement of the American position and the reasons why it has been adopted . . ." Mr. Pearson said that it would be tragic if widespread hostilities were to develop over Quemoy and Matsu, as the two islands "are in effect part of the mainland, and their strategic role would seem to be more important in the defence of the mainland against attack than in offensive action against Formosa and the Pescadores." He concluded by saying that his main fear was that "even limited intervention by the U.S.A. might have a chain reaction with unforeseen consequences, which would cause the conflict to spread far beyond the locality where it began."

India. Mr. Nehru, who referred to Matsu and Quemoy in the course of a speech on foreign affairs to the House of the People, said: "There is hardly a country which does not recognize that the offshore islands, notably Quemoy and Matsu, are obviously and definitely parts of China . . . They are a few miles—five miles or ten miles—beyond the shore. And no country can tolerate any enemy sitting ten miles from their shore, bombarding them all the time. It is an intolerable situation. Therefore, it is almost generally recognized that those islands should immediately be evacuated and taken possession of by the Government of the mainland. But that has not been done . . ."

New Zealand Cease-fire Proposals. - Adjournment of Security Council Debate.

As a result of the rejection by the Chinese Communist Government of the Security Council's invitation to send a delegate to discuss New Zealand's cease-fire proposals (see page 14020), the Council accepted on Feb. 14 a British proposal that debate on the matter should be adjourned. At the same time it refused, by 10 votes to one (the Soviet Union), to consider the Soviet resolution complaining against U.S. "acts of aggression" against Communist China, or to act upon the renewed Soviet contention that Nationalist China should be replaced on the Security Council by a delegate from Communist China.

The British delegate, **Sir Pierson Dixon,** proposing that the debate on the matter be adjourned, said that the British Government was in consultation with other Governments and would welcome any constructive step. He thought that the attitude of the Peking Government was "unhelpful, to say the least," but that there was no point in rushing matters. For New Zealand, **Sir Leslie Monroe** said that his Government "profoundly deplores" the Chinese Communist reply to the Council's invitation, but would not relax its efforts to end a situation, the dangers of which "are now obvious to all." He added that it was "idle to pretend that the Chinese Communist attitude has not made the attainment of a cease-fire more difficult." After **Dr. Tsiang** (Nationalist China) had urged the Council to "muster enough courage to face the monstrous fact of international Communism in the Far East," the Soviet delegate, **M. Sobolev,** again urged adoption of the Soviet resolution. All the talk about a cease-fire, he said was intended only to cover up the "aggressive intent" of the U S.A, the danger of whose "aggressive acts" was on the increase, he referred in this connexion to the cover afforded by the U S. fleet for the redeployment of Nationalist forces [i.e. the evacuation of the Tachens] and to the shooting down of the U S. aircraft after it had invaded Chinese air space.

Mr Lodge affirmed that the U.S A. sincerely desired the ending of a situation which clearly endangered peace, and that in the U.S. view the Security Council should continue its efforts towards that objective. He emphatically denied the charges made by the Soviet delegate, which he called "the same trumped-up Communist mythology that has become so familiar to the world." and pointed out that M Sobolev in his speech had completely disregarded the proposal for a cessation of hostilities

Soviet Proposal for 10-Power Conference on Formosa.

Following discussions in Moscow between the British Ambassador (Sir William Hayter) and the Soviet Foreign Minister (M. Molotov), and in London between Sir Anthony Eden and the Soviet Chargé d'Affaires (M. Belokhvostikov), the Soviet Government proposed in a Note to Britain on Feb. 4 that a 10-Power conference should be called in February to consider means of resolving the Formosa question. The conference should be convened by Britain, the Soviet Union, and India, and should meet either in Shanghai or New Delhi; the other countries represented should be Communist China, France, Burma, Indonesia, Pakistan, Ceylon, and the United States. The British Foreign Office, however, in a statement issued on Feb. 12, expressed the view that any meeting on the question of Formosa would not have any useful result if Nationalist China were excluded, and that such a meeting should in any case "be organized in a form acceptable to the United Nations."

The Soviet proposal, the text of which was published on Feb. 12, reiterated that the present situation had resulted from the "seizure of Formosa and the Pescadores by the United States with the aid of Chiang Kai-shek" and referred to the rejection of its resolutions in the Security Council for the admission of Communist China to the U N "The unwillingness of the U.S A. and Britain . . . to take into account this just and lawful demand of the People's Republic of China," it continued, "makes it impossible lawfully and impartially to consider in the Security Council the question of the situation of Formosa and other Chinese islands, and the adoption by it of proper measures towards lessening the tension in that area and protecting the national rights of the People's Republic of China. With the aim of strengthening peace and lessening international tension in the Far East, the Soviet Government in the circumstances considers that it would be expedient to try and find other ways which would facilitate the settlement of the question . . " After listing the 10 countries which should participate in the proposed conference the Note declared that the proposal "would comply with the wishes expressed by Sir Anthony Eden regarding the need for joint efforts by Britain and the U.S.S.R. for solving unsettled international problems."

The British Foreign Office statement was worded as follows: ". . . H.M. Government have given the [Soviet] proposal serious examination. It was discussed with the Commonwealth Prime Ministers in London, and the U.S. Government were informed. Pending further exploration of the proposal, H.M. Government made certain observations to the Soviet Government. Their first comment related to the composition of the conference which, as proposed by M. Molotov, does not appear to be representative. In particular, they note that the Chinese Nationalist authorities in Formosa are to be excluded. H.M. Government are convinced that a conference that did not include both of the two parties most directly concerned could not have a useful result Their second comment was that the position of the U.N. should not be overlooked. In the opinion of H.M. Government it is desirable that any meeting for the discussion of the situation in the area of the coastal islands and Formosa should be organized in a form acceptable to the U.N. Finally, H.M. Government stressed once more their earnest hope that all concerned will continue to use their best endeavours to stop the fighting in the area and to reduce the risk of incidents which might have serious consequences. H M. Government asked for the views of the Soviet Government on these points and their reply has not yet been received."

Sir Anthony Eden stated in the House of Commons on Feb. 14 that the exchanges with the Soviet Government were not yet closed, and that he would make a further statement as soon as possible. Sir Winston Churchill, who was asked in the House of Commons on March 31 by Mr. Fenner Brockway (Lab.) whether, in view of the deterioration of the Far Eastern situation, it could be suggested to President Eisenhower that there should be a meeting of the heads of the U.S.A., Britain, France, the Soviet Union, and India to seek ways of preventing an extension of hostilities in the Formosa area, replied: "H.M. Government are prepared to examine any proposals which are likely to prevent an extension of hostilities in the area . . ." He agreed, however, with Sir Anthony Eden's statement of March 8 that the necessary conditions had not yet been brought about where progress could be made at such a conference.

U.S. Senate Approval of Defence Treaty with Nationalist China.

The U.S. Senate approved the mutual defence treaty with Nationalist China on Feb. 9 by 64 votes to six, the dissenting votes being cast by Senators Chavez, Gore, Kefauver, and Lehman (Dem.). Senator Langer (Rep.), and Senator Morse (then Ind.). Before the final vote two amendments by Senator Morse were defeated: (1) stipulating that the treaty was not to be interpreted as giving support to Nationalist claims to ultimate sovereignty over Formosa (rejected by 57 votes to 11); (2) specifically excluding Matsu, Quemoy, and the other coastal islands from the defence area of the treaty (defeated by 60 votes to 10).

British Labour Party Resolution on Formosa.

The National Executive Committee of the British Labour Party adopted a resolution on Feb. 23 in which it outlined the basis for a settlement of the Formosa situation as follows:

"(1) The first step towards such a settlement should be a cessation of hostilities upon both sides and evacuation of all the offshore islands by the Chinese Nationalist forces. The National Executive committee urge the Government to make it clear to the U S. Administration that it could not reckon on any military assistance from Britain in hostilities connected with the offshore islands, and to exert their influence with the U S.A. to obtain the withdrawal of Nationalist troops from those islands.

(2) The admission of the Peking representative to the U.N is an essential part of a Far Eastern settlement. Formosa and the Pescadores should be neutralized by international guarantee and placed under U.N. administration and protection which will ensure that in due course the people of those islands shall be free to make their own choice without intimidation from either side. This will involve the withdrawal of Chiang Kai-shek and his principal supporters.

(3) The National Executive Committee call on the Government to seek acceptance of such a settlement by both the U.S.A and the Chinese People's Republic."

Increased U.S. Aid to Nationalist China.

The U.S. Foreign Operations Administration announced in Washington on March 13 that it was allocating a further $48,000,000 to Nationalist China for the defence of Formosa. The new allocation, which included $3,000,000 for technical co-operation, was made available from the special $700,000,000 fund "for the support of forces of nations in the area of South-East Asia," and brought the total of U.S. aid to Formosa since July 1, 1954 to $138,000,000.—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - U.N. Information Centre, London - Soviet Weekly - The Hindu, Madras) **(Prev. rep. 14081 A; 14017 A.)**

A. UNITED STATES. — Mr. Stassen appointed Special Assistant to President on Disarmament Problems.

Mr. Harold Stassen, head of the Foreign Operations Administration, was appointed by President Eisenhower on March 19 to a newly-created post of Special Assistant to the President on disarmament problems, with Cabinet rank. A White House statement said that Mr. Stassen would continue as head of the F.O.A. until the Administration's foreign aid proposals had been presented to Congress. In his new post he would "take into account the full implications of new weapons now in the possession of other nations as well as the United States, consider future probabilities of armaments, and weigh the views of the military, the civilians, and the officials of our Government and of other Governments." The statement added that the President's decision to create the new post had been prompted by the fact that the current disarmament discussions in London had "resulted in no progress and no clear thinking on this subject." The appointment of Mr. Stassen was the first occasion in any country that a Minister of Cabinet rank had been appointed to deal solely with disarmament problems. (New York Times - New York Herald Tribune) **(Prev. rep. Disarmament, 13993 A; Mr. Stassen, 13115 A.)**

B. TURKEY. — Aircraft Gift to Jordan.

The Turkish Grand National Assembly unanimously approved on Feb. 11 a proposal for the presentation of three Turkish military aircraft to the Jordanian Government, as a gesture of friendship to that country. The aircraft were handed over on March 1.—(New York Times) **(Prev. rep. Turkish-Arab Relations, 14105 A.)**

C. CORRIGENDUM. Through a regrettable error it was stated in report 14105 A (Middle East Defence), in the 11th paragraph in the first column of page 14105, that the treaty had been ratified by the two Houses of the Syrian Parliament. This should, of course, have read "by the two Houses of the Iraqi Parliament." (Ed. K.C.A.)

D. JAMAICA. — General Elections. - Victory for Mr. Manley's People's National Party.

General elections were held in Jamaica on Jan. 12 and resulted in a victory for the People's National Party, led by Mr. Norman Manley, which won 18 of the 32 contested seats, compared with 14 won by Mr. Bustamante's Jamaica Labour Party. At the dissolution the J.L.P. held 17 seats, the P.N.P. 14, and there was one Independent. This was the third general election to be held in Jamaica since the granting of virtual self-government, under Crown supervision, in November, 1944, and the first since the introduction of the ministerial system in 1953 (see 12931 C). Although Mr. Bustamante (who had been in office uninterruptedly since 1944) retained his seat, three of his Ministers were defeated—Mr. D. B. Sangster (Finance, and Leader of the House), Mr. J. A. McPherson (Labour), and Mr L. C. Bloomfield (Communications and Works).

The Jamaica Labour Party is anti-Socialist, drawing its support chiefly from the agricultural workers and enjoying the approval of most of the business community. The People's National Party, which was originally modelled on the British Labour Party, favours a moderate Socialism and draws its support from the middle classes and from the groups of workers who have joined the National Workers' Union.

Mr. Manley (a 61-year-old barrister and cousin of Mr. Bustamante) stated on Jan. 13 that his Government would work for complete self-Government in the shortest possible time; encourage the investment of foreign capital in Jamaica and guarantee it "fair play"; and intensify agricultural development in the island.—(Times - Commonwealth Survey) **(Prev. rep. 10791 B.)**

E. IRISH REPUBLIC. — Diplomatic Appointments.

It was announced in Dublin on March 29 that Mr. Brian Gallagher, Minister to Sweden and Norway, had been appointed Ambassador to Australia in succession to Dr. T. J. Kiernan, who would become Irish Minister to Germany.

Dr. Kiernan had been on leave for the past six months following the Constitutional difficulties arising out of the disagreement between the Australian and Irish Governments as to whether the proposed new Australian Ambassador should be accredited to "Ireland" (as demanded by Dublin) or to the "Irish Republic" (as proposed by Canberra). In consequence, the Australian Government had decided not to appoint a new Ambassador in Dublin and to be represented only by a Chargé d'Affaires, but it was pointed out in Dublin that the appointment of a new Irish Ambassador to Australia indicated that no change was contemplated by the Irish Government in its attitude towards Australia. In Canberra it was stated on March 29 that the new Irish ambassadorial appointment would not "reopen the question of Australian representation in Dublin."

Earlier, on Jan. 31, it had been announced that Mr. Leo T. McCauley, Irish Minister to Spain, had been appointed Ambassador of the Irish Republic to Canada, succeeding Mr. Sean Murphy, and that Mr. McCauley would himself be succeeded in Madrid by Dr. M. A. L. Rynne, legal adviser in the Department of External Affairs.—(Irish Times, Dublin - Australian News and Information Bureau) **(Prev. rep. Dipl. Appts., 13920 A; Credentials Dispute, 13466 B.)**

F. BRITISH WEST INDIES. — Princess Margaret's Caribbean Tour.

H.R.H. Princess Margaret made a month's official tour of the British West Indies from Feb. 1 to March 2. Leaving London on Jan. 31 in the B.O.A.C. Stratocruiser *Canopus* she visited Trinidad on Feb. 1-5, Tobago on Feb. 5, Grenada on Feb. 6-7, St. Vincent on Feb. 8, Barbados on Feb. 9-12, Antigua on Feb. 14-15, St. Kitts on Feb. 16, Jamaica on Feb. 19-24, and the Bahamas on Feb. 27-March 2, her journey between the Caribbean islands being made aboard the Royal yacht *Britannia*. Princess Margaret arrived back in London in the *Canopus* on March 3, and on March 8 was officially welcomed home at a luncheon given in her honour at the Mansion House by the Lord Mayor of London.—(Times - Daily Telegraph - Manchester Guardian) **(Princess Margaret, 13200 B.)**

G. CANADA. — Population.

The Bureau of Statistics announced on March 1 that the population of Canada on Jan. 1, 1955, numbered 15,439,000, an increase of 404,000 or 2.7 per cent over the 1954 figure. This compared with increases of 386,000 (2.6 per cent) and 388,000 (2.7 per cent) in 1953 and 1952 respectively. (Montreal Star) **(Prev. rep. 12175 C.)**

H. ALBANIA.—Ending of State of War with Germany.

The Albanian Telegraph Agency announced on March 18 that Albania had officially ended its state of war with Germany. (New York Times) **(Prev. rep. 14111 B.)**

A. BALKAN PACT. — First Meeting of Permanent Council. - Agreements on Formation of Balkan Consultative Assembly and Postal Communications. - Greek-Turkish River Regulation Agreement.

The first meeting of the Permanent Council of the three member-countries of the Balkan Alliance Treaty was held in Ankara from Feb. 28 - March 2. The meeting was attended by the Greek, Turkish, and Yugoslav Foreign Ministers (M. Stephanopoulos, Professor Koprulu, and M. Koca Popovich), as well as by the Turkish Prime Minister and Deputy Prime Minister (MM. Menderes and Zorlu).

An official communiqué issued on March 3 stressed the " complete cordiality and mutual confidence " in which the meeting had taken place, and said that one of its principal results had been the conclusion of an agreement for the establishment of a Balkan Consultative Assembly. The Ministers, the statement went on, had examined the international situation in the light of developments since the Bled conference in August 1954, and had come to the conclusion that there was no need to revise the declaration issued after the Bled meeting to the effect that the dangers of war had diminished as a result of the relaxation of international tension. Nevertheless, they had agreed that it was necessary, in order to bring about conditions of lasting peace, to continue their countries' efforts to consolidate their defensive power, and at the same time " to endeavour through all suitable political means to make use of the favourable conditions for improving the international situation."

Various measures had also been taken to strengthen tripartite co-operation, and it had been noted with satisfaction that " important success " had been achieved in this respect. " Keeping firmly in mind the need for developing and implementing these agreements [the Ankara agreement and the Bled alliance treaty], " both in the sphere of defence and in the economic, technical, cultural, and other spheres," the Ministers had decided to call in the near future a tripartite economic conference in order to examine the conditions and possibilities of mutual economic co-operation; had also agreed to devote special attention to the work of their economic experts in the examination of common economic problems within the Economic Commission for Europe; and had decided to set up in the near future a joint commission to work out the draft for the establishment of an Institute of Balkan Studies.

The agreement on the setting up of a Balkan Consultative Assembly contained the following provisions:

(*a*) The Assembly, as the joint organization of the three countries, would have the task of " examining all means of developing co-operation between them with the aim of ensuring peace and safeguarding their common interests, as well as achieving the well-being of the three peoples in all spheres of their mutual relations."

(*b*) The Assembly would submit to the three Governments, through the Permanent Council, recommendations and proposals for the attainment of these aims, and might also make suggestions regarding questions of general importance, whilst the Permanent Council might submit to the Assembly for examination all questions on which it considered it necessary to seek the Assembly's advice.

(*c*) The Assembly would consist of 20 members from each of the Parliaments of the three countries and would take its decisions by a majority vote of all the members of each national group present; members of the Permanent Council might take part in its work, but without having a vote.

(*d*) The mandate of the Assembly would be for two years, after which new appointments would be made. It would regularly meet once a year, but could be convened in special session if necessary. Its meetings would be held in the capitals or other cities of the three countries in rotation.

(*e*) When the agreement came into force the three Governments would set up within a month a tripartite commission to draw up the Assembly's constitution, which would then be submitted to each Government for approval.

On his return to Belgrade M. Popovich made a statement on the results of the meeting.

" The basic meaning of tripartite co-operation," he said, " is to contribute to the pacification of the international situation by making effective use of all existing possibilities to that end. In keeping with the changes in the international situation, and bearing in mind what we have already achieved through our co-operation, it is obvious that the ways and means of achieving that end cannot always be the same, with the emphasis always laid on certain particular aspects. It is thus clear that in the present conditions the main stress cannot be placed on military measures, especially if those measures emerged as support to a bloc policy about which Yugoslavia's attitude is well known. In view of the fact that the Ankara conference has drawn us closer to this aim, which I admit is not a modest one but which is nevertheless realistic, and in view of the fact that it has strengthened our conviction of the usefulness of our co-operation channelled in this direction, we have good reason to be satisfied with its results."

An agreement on postal communications between Greece, Turkey, and Yugoslavia was signed on March 19, providing *inter alia* for a reduction of postal and telephone tariffs in order to stimulate communications between the three countries.

Earlier, on Feb. 20, the Turkish and Greek Ministers of Public Works, respectively M. Zeytinoglu and M. Karamanlis, had signed an agreement in Istanbul providing for the joint execution of works for the regularization of the rivers Maritza and Tunja, which form the boundary lines between Greece and Turkey in Thrace. These works, which will control floods and irrigate large tracts of fertile land on both sides, are to be completed in five years at a total cost equivalent to about £12,000,000.—(Tanjug Agency, Belgrade - Turkish Embassy, London - Times) **(Prev. rep. 13999 B.)**

B. MALTA. — Elections. - Labour Party Victory. - Government formed by Mr. Mintoff.

General elections were held in Malta on Feb. 26-28, following the dissolution of the Legislative Assembly on Dec. 18, 1954.

Dr. Borg Olivier's Cabinet (which was based on a coalition between Dr. Olivier's Nationalist Party and Dr. Boffa's Malta Workers' Party) had been defeated in the Assembly on Nov. 23 by 20 votes to 19, on a motion for the adjournment of the House moved by Mr. Dominic Mintoff, leader of the Malta Labour Party. The defeat of the Government followed the defection of Mr. J. J. Cole, deputy leader of the Workers' Party and Minister of Emigration and Labour, who resigned from both the Cabinet and the Workers' Party on Nov. 18 on account of differences with the Prime Minister on the policy to be followed towards the British Government's offer to transfer responsibility for Maltese affairs from the Colonial Office to the Home Office. After Dr. Olivier and Mr. Mintoff had both failed to form a new Administration which could command the support of a majority, the Governor (Major-General Sir Robert Laycock) issued a proclamation dissolving the Assembly.

The elections were contested by the Labour Party, the Nationalist Party, and the conservative Progressive Constitutional Party, led by Miss Mabel Strickland; the executive of the Workers' Party had decided not to put forward any candidates. The Labour candidates included a number of former members of the Workers' and Constitutional parties, among them Mr. Cole and Mrs. de Trafford, a sister of Miss Strickland. The Labour Party's election manifesto, published on Jan. 16, advocated the " gradual incorporation of Malta into the political, financial, and social institutions of the British Isles under a 20-year plan to turn Malta into an integral part of Great Britain, with representatives at Westminster and enough safeguards to keep intact the full rights and privileges of the Roman Catholic Church." It also proposed that Malta, like Northern Ireland, should retain its own Parliament; promised that the Labour Party if returned would submit its plan for integration to a national referendum; and suggested as an alternative to this plan Malta's secession from the Commonwealth and the conclusion of a 20-year treaty of friendship with Britain. The Nationalist Party, on the other hand, advocated Dominion status for Malta inside the Commonwealth.

The elections, which were held under the proportional representation system, resulted in a victory for the Labour Party, the distribution of seats being as follows:

	1954	1953
Malta Labour Party	23	19
Nationalist Party	17	18
Malta Workers' Party .. .	*	3
Progressive Constitutional Party ..	0	0

* Did not contest the elections.

Dr. Olivier resigned on March 8, and on the Governor's invitation Mr. Mintoff formed a new Government on March 10, with the following membership: Mr. Mintoff, Prime Minister and Finance; Mr. J. E. Mercer, Works; Dr. A. V. Hyzler, Health and Social Services; Mr. F. Bonaci, Industry and Commerce; Miss A. Barbara (the first woman to hold Cabinet office in Malta), Education; Dr. J. Cassar, Justice; Mr. J. J. Cole, Posts and Agriculture; Mr. E. C. Tabone, Emigration and Labour.

The new Assembly was opened on March 21, in the presence of the Duke of Edinburgh. In the Speech from the Throne Sir Robert Laycock announced that the Government had appointed a National Employment Board to ensure the fair and impartial allocation of employment, and proposed to promote emigration, to increase old age and other pensions, to extend full time education to all primary school children, and to undertake a programme of school building. As the funds made available by the British Government for capital expenditure were running out, the Government would engage an expert economist " to advise them, not only on the economic aid that they could legitimately claim from the Government of Britain, but also on the shape it could take to fit in with the Labour Government's well-known views on the Home Office offer." One of the Government's major tasks in the next few months, he added, would be " the preparation of Malta's case and its submission at the London talks."

Mr. Hopkinson, the Minister of State for Colonial Affairs, told the House of Commons on March 16 that the Colonial Secretary, Mr. Lennox-Boyd, hoped to have round-table talks with Maltese party leaders in the next two or three months to discuss " the so-called Home Office offer and related topics." (Times - New Commonwealth)**(Prev. rep. 13664 C; 13475 B.)**

A. PAKISTAN. — Dispute over Dissolution of Constituent Assembly. - Sind Court's Ruling reversed by Federal Court. - Governor-General's Emergency Powers Ordinance.- Preparations for Formation of West Pakistan.

Hearings started on March 1 before the Federal Court of Pakistan on the appeal of the Government of Pakistan against the decision of the Sind Chief Court of Feb. 9, which declared the Governor-General's proclamation of Oct. 24, 1954, dissolving the Pakistan Constituent Assembly to be illegal, and held that the five members of the Central Government who were not members of the Assembly were not entitled to exercise their ministerial offices.

The Chief Justice, Mr. Mohammed Munir, declared on March 3 that the question presented for judicial determination was a political issue, that it would therefore be better for the parties to reach a settlement about the question of dissolution among themselves, and that meanwhile the hearings could proceed. As a compromise solution it was suggested that the Government might hold a general election at an early date and that the Constituent Assembly should agree to dissolve itself.

Private negotiations were accordingly held in Lahore between the Advocate-General, Mr. Fayyas Ali Khan, representing the Government, and Mr. Chundrigar, counsel for Mr. Tamizuddin Khan, the President of the dissolved Constituent Assembly, but although the Ministers of Finance, the Interior, and Law (respectively Mr. Mohammad Ali, Major-General Iskander Mirza, and Mr. Suhrawardy) went to Lahore to take part in the discussions, the talks failed as Mr. Tamizuddin's authority to speak for the other Assembly members could not be established.

After further hearings the Court announced on March 21, by four votes to one, that it accepted the Federal Government's appeal against the judgment of the Sind Chief Court; it accordingly set aside this judgment and ordered that both writs of *mandamus* and *quo warranto* be recalled. The text of the Federal Court's Order was as follows :

" We hold that the Constituent Assembly, when it functions under sub-section (1) of Section 8 of the Indian Independence Act, 1947, acts as a Legislature of the Dominion within the meaning of Section 6 of that Act; that under sub-section (3) of the latter the assent of the Governor-General is necessary to all legislation by the Legislature of the Dominion; that since Section 223-*a* of the Government of India Act, under which the Chief Court of Sind assumed jurisdiction to issue the writs, had not received such assent, it is not yet law and that therefore that Court had no jurisdiction to issue the writs. We accept the appeal, set aside the judgment of the Chief Court of Sind, and recall both the writs. The parties will bear their own costs throughout."

Regarding the question of the Governor-General's power of dissolution of the Constituent Assembly, the Chief Justice said, in reply to Mr. Chundrigar: " We purposely did not go into this question."

Justices Akram, Sharif, and Rehman agreed with the Chief Justice, whilst the dissenting opinion was given by Mr. Justice Cornelius.

Commenting on the Federal Court's decision, Mr. Suhrawardy said on March 21 that the judgment had saved Pakistan from " the danger of disturbances and chaos," which would inevitably have followed the " foisting " on the country of a Constituent Assembly which the people did not want. He also said that the judgment ruled out the possibility of " naked military dictatorship," and stated that the Government would now summon without delay a convention of representatives elected by the existing Provincial Legislatures to frame a new Constitution and to pass the one-unit plan for West Pakistan. General elections would then be ordered as soon as possible.

It was officially pointed out in Karachi on March 22 that more than 45 Acts on the Statute Book stood invalid for lack of the Governor-General's assent as a result of the Federal Court's decision that this assent was required for all legislation. In view of this situation, and to enable the undisturbed government of the country to continue, the Governor-General, Mr. Ghulam Mohammed, issued on March 27 an Emergency Powers Ordinance containing the following provisions :

Validation of Laws. The first part of the Ordinance validated with retrospective effect 35 of those laws which had been passed by the Constituent Assembly but had not received the Governor-General's assent; it provided that the validated laws were deemed to have received the assent of the Governor-General.

Amendments to Government of India Act. The second part (*a*) provided *inter alia* that " the Annual Financial Statement when authenticated by the signature of the Governor-General shall be authority for the expenditure of the several sums specified therein "; (*b*) empowered the Governor-General to make such provision as seemed to him to be necessary to constitute the Province of West Pakistan on a specified date; and (*c*) also gave him power as from the same date to declare by special notification that the Province of East Bengal should henceforth be named the Province of East Pakistan.

Constitution. The third part of the Ordinance empowered the Governor-General to make such provision as he considered necessary for the purpose of framing the Constitution of Pakistan and for other matters connected therewith.

On March 28 the Governor-General issued an Order laying down that the new Province of West Pakistan should come into being as early as possible and not later than May, and investing the Council for the Administration of West Pakistan with powers to take the necessary steps to set up the administration of the new Province. The Council, which had been sitting under the chairmanship of Mr. M. A. Gurmani, the former Minister for the Interior, States, and Frontier Regions, and now Governor of the Punjab, had earlier in March submitted to the Governor-General its report on the details of the new set-up and the necessary adaptation of the administration, laws, and public services.

In accordance with the Council's recommendations, the Governor-General's Order laid down that Lahore would become the capital of West Pakistan, whilst a suitable site would be developed in the Abbottabad area as a summer capital; that the new Province would be divided into 50 districts grouped into 11 divisions; and that it would comprise the existing Provinces of Punjab, the North-West Frontier Province, Sind, and Baluchistan, as well as the States of Bahawalpur, Khairpur, and Baluchistan, and the tribal areas. The new Province would have one Governor, one Council of Ministers, one Legislature, and one Secretariat; there would be one High Court at Lahore, with benches functioning at Karachi and Peshawar; and a West Pakistan Power and Projects Authority would be set up as a semi-autonomous body to deal with hydro-electric development, expansion of irrigation, flood control, inland navigation, and land reclamation.—(Pakistan High Commissioner's Office, London - Times) **(Prev. rep. Constitutional Dispute, 14066 A; West Pakistan, 13972 A.)**

B. ITALY - UNITED STATES. — Trade and Aid Agreements.

An agreement initiating a new system of " trade and aid " to stimulate Italian exports and employment was signed in Rome by Signor Vanoni, the Italian Budget Minister, and Mr. Henry J. Tasca, head of the FOA mission in Italy, on Jan. 7.

The agreement provided for the supply of American coal to Italy, in return for which Italy would supply an equivalent value in manufactured goods to other countries to whom U S. aid had been allocated; thus countries in the Middle East or Africa might, for instance, receive Italian-made machinery as part of their aid from the U.S A.

As regards Italian imports of U.S. coal, the agreement laid down that such imports " will not displace normal imports of coal by Italy from the U.S.A and from countries friendly to the U.S.A." As Italy normally obtains most of her coal from the U.S.A., Britain, Western Germany, Belgium, Luxemburg, and Poland, this stipulation meant that the additional American coal supplies would replace part or the whole of the 800,000 tons annually bought by Italy from Poland.

Under an agreement of Feb. 11, the U.S.A. made available a total of $53,000,000 in U.S. aid in support of the Italian economy.

Of the total, $15,520,000 represented new money from U.S. mutual security funds to be used to finance Italian cotton imports from the U.S A., whilst the lire counterpart funds arising from the sale of such cotton to Italian manufacturers would be applied to the construction of roads and other productive public works in Southern Italy.

The remaining $37,500,000 represented lire counterpart funds which had accumulated from Marshal Aid to the Trieste Free Territory during the period of Allied military government, the agreement providing that these funds would be used by the Italian Government for the benefit of the Trieste economy.

The agreement was contained in an exchange of letters between Signor Scelba, the Italian Prime Minister, and Mrs. Clare Boothe Luce, the U.S. Ambassador in Rome.—(Corriere della Sera, Milan - New York Times - New York Herald Tribune) **(Prev. rep. Economic Aid, 13357 A.)**

C. AUSTRALIA. — Diplomatic Appointments.

It was announced in Canberra on Feb. 23 that Mr. H. A. McClure Smith, Australian Minister in Cairo since 1953, had been appointed Ambassador to the Netherlands in succession to Mr. Alfred Stirling. On March 3 it was announced that Mr. Stirling would succeed Sir Keith Officer (retiring) as Australian Ambassador in Paris.—(Australian News and Information Bureau) **(Prev. rep. 14023 B.)**

D. PANAMA.—Ratification of New U.S.-Panamanian Treaty.

President Arias of Panama enacted on March 15 a Bill passed by the Panamanian National Assembly ratifying the new treaty between Panama and the U.S.A. concerning the U.S. use of the Panama Canal.—(New York Times) **(14066 B.)**

A. UNITED KINGDOM. — Royal Navy. - Estimates, 1955-56. - The First Lord's Review. - Strength of Navy. - Post-War Naval Construction. - Submarine Launchings. - Commissioning of "Ark Royal." - Reclassification of Naval Officers.

The Navy Estimates for 1955-56 were published on Feb. 22 and are summarized below.

The net total of £340,500,000 shown in the Defence Estimates included about £127,000,000 for the building and repair programme, of which £40,000,000 was for new construction. The principal items were (1954-55 figures in parentheses): Hulls and Machinery £39,600,000 (£50,300,000); Armour, Gun Mountings, etc. £12,100,000 (£9,400,000); Aircraft and Repairs £23,100,000 (£24,000,000); Ship Repairs, etc. £14,100,000 (£9,500,000); Fuel and Lubricants £18,900,000 (£20,500,000); Stores, Equipment, etc. £38,400,000 (£48,400,000); Guns, Torpedoes, Mines, etc. £6,900,000 (£8,300,000), Ammunition £10,800,000 (£15,100,000).

The Estimates provided for a manpower strength of 133,000 on April 1, 1955 and a reduction of about 6,000 during the year; it was pointed out that the "disturbing decline" in Regular recruiting had continued during 1954-55; that between 1953 and April 1956 nearly 25,000 special engagement men would have completed their service; and that although it was intended to place about 5,000 National Servicemen in the Navy, the number could not be increased indefinitely as this would involve a disproportionate demand on training resources.

An accompanying memorandum by the First Lord of the Admiralty, summarizing "the role of the Navy in the age of thermo-nuclear weapons," explained that the concentrated main fleets of previous wars would in future conflicts be replaced by carriers operating the latest aircraft, powerful cruisers equipped with guided weapons, submarines, and escort vessels to keep the sea lanes clear for supplies. These ships, by their ability to disperse and reconcentrate at will, would "provide the strength on which all other naval activities depend," and would form "a mobile offensive force—elusive and hard-hitting—which can be quickly deployed wherever it is required."

Stressing that although the Navy still had "a sound nucleus of strength," the average age of the fleet was now too high, and that the point had been reached when "a substantial replacement programme is essential," the memorandum declared that the guided-weapon ship would "effect changes in naval warfare comparable to the change brought about by the introduction of the Dreadnought." The guided missile, it stated, was far enough developed for the Admiralty to proceed with the design and construction of operational ships to replace the ageing cruiser fleet. The first application would be a purely ship-to-air weapon of "great lethality," which would enormously improve defence against air attack even by the fastest modern aircraft, but in the years ahead a system would be developed capable of operating a ship-to-ship weapon from the same equipment. To fill the gap before these guided-weapon ships came into service, the three *Tiger* class cruisers would be completed and the best of the existing cruisers would be modernized.

Turning to aircraft-carriers, which "made up the fists of the fleet and provided it with a formidable punch," the memorandum stated that during the coming year the operational fleet would include the heavy carriers *Ark Royal* and *Eagle* and the light fleet carriers *Albion* and *Centaur*, whilst the *Bulwark* would be engaged on aircraft trials and training; meanwhile the *Hermes* was being completed and the *Victorious* extensively modernized. These modern carriers, equipped with angled decks, steam catapults, and mirror landing devices, would be able to operate the latest types of aircraft, including those able to deliver atomic bombs.

After stating that two fleet escort ships (embodying the latest developments in the destroyer field), eight "general purpose" frigates (able to give anti-submarine and anti-aircraft protection), and 10 more coastal minesweepers would be ordered, the memorandum gave the present strength of the Royal Navy as:

Fighting ships in commission, 247.
In reserve, or undergoing refit, modernization, or conversion, 481.
Under construction, 146.

These categories included the following:

Ships in the Operational Fleet, or preparing for service: Four aircraft-carriers, one battleship, nine cruisers, seven *Daring* class ships, 22 destroyers, 30 frigates, one minelayer, 43 submarines, 32 minesweepers, 26 coastal craft, seven landing vessels.

Ships engaged in trials and training: Four aircraft-carriers, one cruiser, three destroyers, 22 frigates, 23 minesweepers, four coastal craft, one tank landing ship.

Ships in course of construction: Four aircraft-carriers (including two on which work had been suspended and one completing for the Royal Australian Navy), three cruisers, 26 frigates, two submarines, 94 minesweepers, and 10 coastal craft.

Ships in reserve or in dockyards for refits, modernization, or conversion: Seven aircraft-carriers, four battleships, 14 cruisers, one *Daring* class ship, 57 destroyers, 115 frigates, two minelayers, 14 submarines, 165 minesweepers, 42 coastal craft, and 58 tank landing vessels.

As regards the Fleet Air Arm, it was stated that the *Sea Hawk* and *Sea Venom*, which at present provided the day and all-weather fighter strength, would in time be replaced respectively by a new fighter, the N 113 [reported in the Press to be a development of the *Supermarine 525* swept-wing twin-jet aircraft shown at Farnborough in 1954], and the DH 110 all-weather fighter; both of these, for which orders had already been placed, would have greatly improved performances and would be able to carry guided missiles. For strike operations a replacement had been planned for the *Wyvern*; this new aircraft, which would be able to carry atomic bombs, would have far greater range and speed than previous aircraft of its type. The number of F.A.A. pilots and observers was now satisfactory.

In conclusion, the memorandum spoke of the "encouraging advances" achieved with anti-submarine detectors and locators for use on the surface, underwater, or by aircraft and helicopters, as well as of improvements in mine locating and sweeping techniques and the "great promise" shown by the performances of new types of torpedoes both as regards range and accuracy.

The Estimates were passed by the House of Commons without a division on March 3.

Mr. J. P. L. Thomas (First Lord of the Admiralty), moving their adoption, said that in spite of predictions that the coming of the hydrogen bomb would make naval forces obsolete, the Government had accepted the opinion of scientists and strategists that the Navy still had a vital role to play. Although Britain could no longer control the seas alone, there had been an "extraordinarily successful" integration of the Allied navies, and if war came the British contribution would be formidable even before the guided weapons and new naval aircraft had arrived. The five latest aircraft carriers were among the most modern in the world, and since rearmament began in 1950 over 120 new or modernized ships had either joined the fleet or were ready to do so.

The criticism had been made that these small ships were no answer to the new Russian cruisers of the *Sverdlov* class, but the real answer to the *Sverdlovs* was the carrier and its aircraft. The Navy had also been accused of spending too much on small anti-submarine and anti-mine vessels, but the Russian submarine force which could menace Britain's trade routes was formidable, and Russia was also concentrating on mine-laying. It had been argued, too, that the number of submarines given in the Estimates was not large enough, but it was not customary to give particulars of operational submarines until they were launched; in actual fact they were building modern submarines, some with very high submerged speeds, and more midget submarines were coming into service.

The cruiser fleet was admittedly ageing, but these vessels would be able to give a good account of themselves in a "hot" war and performed valuable service in peace. The Admiralty, however, would not build any more conventional cruisers and would concentrate on guided-weapon ships, which would be over 10,000 tons and were the obvious successors to the cruiser. An exception had been made for the three *Tiger* class cruisers, which had been awaiting the latest gun armament. This was now ready, and the new guns would be almost entirely automatic and would fire a new design of shell at a very high rate. The Admiralty had therefore decided to complete these ships at a total cost of £18,000,000—i.e., about the cost of one new cruiser today.

Turning to naval aircraft, Mr. Thomas explained that during 1955-56 the re-equipment of the front line with jet and turbo-prop planes in day fighter, all-weather fighter, strike, and anti-submarine roles would be completed, and that the Fleet Air Arm would be equipped with *Sea Hawks*, *Sea Venoms*, *Gannets*, and *Wyverns*. The last-named, which had been the first military turbo-prop aircraft, had had an unusual number of "teething troubles," but the latest reports were "reasonably hopeful" that they would shortly be cleared for operation from carriers; meanwhile the *Whirlwind* helicopter had demonstrated its great possibilities in the anti-submarine role.

Although the various new types of aircraft would be expensive, substantial economies would be made in other directions, experience with the angled deck and mirror sights indicating that there would be a marked decrease in deck landing accidents. Mr. Thomas added that the conversion of R.N.V.R. fighter squadrons to jets was planned for 1955, and that within the next year or two R.N.V.R. divisions would receive *Sea Hawks*, *Gannets*, and *Sea Mews*; the actual number of aircraft allotted to the R.N.V.R. would, however, have to be reduced by about one-fifth, together with some reduction in aircrew.

As regards the role of the aircraft-carrier and the development of the guided-missile ship, Mr. Thomas explained that expert advice given to the U.S. and British navies supported the conception of the carrier battle-group in a nuclear war as "a self-protecting, largely self-contained mobile airfield." In the last war only 39 carriers had been sunk out of 226 used by all sides, and only four of these had been sunk by shore-based aircraft. In a future war the carrier battle-group, with its fighter screen and early-warning aircraft, might well be relatively immune from some of the most formidable modern weapons. As to guided-weapon ships, equipment would take longer to complete than the hulls, and the Government intended to order much of the equipment this year, so that the building of ships could proceed. Mr. Thomas added that the ship-to-air missile would be tested at sea during 1956 in the guided-weapon ship *Girdleness*.

Dealing with manpower and recruitment, the First Lord explained that the problem was particularly acute in the seaman and stoker-mechanic branches and in the Royal Marines, where the situation was sufficiently disturbing for the Admiralty to have initiated an inquiry. There was, however, available on call an immediate highly-trained first reserve of over 80,000 officers and men, with a considerably larger list of emergency reservists.

For the first time for 30 years, Mr. Thomas continued, a review of the officer structure had been begun, and three major problems had come to light: (1) the base of the career pyramid was too large to provide a satisfactory prospect for those reaching commissioned rank through the cadet entry or "upper yardman" schemes; (2) the problem arose of giving executive officers enough time in command at sea to be certain that operational direction remained first-class; (3) the higher direction must include officers with first-hand knowledge of aviation matters. The following steps would therefore be taken to deal with these and allied problems:

(1) The rate of cadet entry would be reduced, to give those entering a better chance of promotion to the rank of commander and above.

(2) The number of officers given sea commands would be limited to those who might one day command fleets or squadrons, since to attempt to give all executive commanders and captains the necessary sea experience would mean that none would get enough.

(3) At a certain point in their careers, executive officers would be placed on one of two lists: (*a*) the sea-going or post list, or (*b*) the general list. Officers on (*b*) would be needed in command of establishments and on staff and administrative duties, and many such appointments would qualify their holders for promotion up to flag rank where recent sea experience was not considered indispensable. This change would come into force immediately for commanders and captains of certain seniorities.

(4) To increase the proportion of permanent officers who were qualified pilots or observers, and to avoid a shortage of general service officers caused by having a vast number of cadet entry officers devoted exclusively to flying, it was intended that a number of pilots and observers should leave the Fleet Air Arm after seven years and go on as general service officers. For those remaining in the F.A.A. there would be one commission in the rank of lieutenant in a non-flying appointment at sea and another in the rank of commander to help keep them qualified for sea-going command.

(5) In order to attract young men to the engineer, electrical and supply, and secretariat branches, and to give them scope in the higher ranks, rules governing marks of respect would be changed and differences in treatment between senior officers of the executive and non-executive branches would largely disappear. The coloured distinction cloth worn between the stripes of officers of the non-executive branches would be abolished except in the medical and dental departments, which must be recognizable as non-combatant.

In conclusion, Mr. Thomas deprecated "rumours that a number of officers are likely to be axed," saying that, whilst it was "difficult to look far ahead" in personnel matters, he had seen "nothing in the course of the review to give any reason to believe that there was any necessity for a measure of this kind."

An account of naval construction since the war was given by the naval correspondent of *The Times* on Feb. 22, and is summarized below:

No battleship had been laid down since 1941, and the five remaining in reserve or in dockyard hands were now regarded as super-cruisers. The building of most other types of warship had, however, continued, the position being as follows.

Aircraft-Carriers. Two large carriers of 36,800 tons, the *Ark Royal* and *Eagle*, had been completed, as well as three of the four *Hermes* class ships, the fourth (the *Hermes* herself) being due to join the Fleet later in 1955. The wartime-built *Victorious* had been drastically modernized and might come into service in 1956. Three light fleet carriers, the *Theseus*, *Triumph*, and *Warrior*, all completed in 1946, were now obsolescent and could render their most useful service as escort carriers. Two 14,000 ton carriers, launched in 1945, remained uncompleted. No further carriers were on the stocks.

Cruisers. Although one cruiser, the *Superb*, had been completed since 1945, no existing cruiser had been laid down after 1942, two more modern ships, the *Hawke* and *Bellerophon*, having been cancelled in 1946. The three *Tiger* class cruisers (*Blake*, *Defence*, and *Tiger*), laid down during the war and now to be completed with the new quick-firing gun armament, would not be in service for several years. There were no cruisers on the stocks.

Destroyers. Eight ships of the *Daring* class—used tactically as light cruisers rather than as conventional destroyers—had been completed since 1945, as well as 38 destroyers laid down during the war. It seemed probable that no further conventional destroyers would be laid down and that "destroyer" duties would fall to frigates of specialized type.

Submarines. Besides the *Explorer* and *Excalibur*, having exceptionally high underwater speeds (see below), 19 submarines laid down during the war had since been completed, and some submarines of an interim type were now on order.

Miscellaneous Vessels. Vessels completed included fast patrol boats, seaward defence boats, fleet auxiliaries, and minesweepers.

The submarines *Stickleback* and *Shrimp*, the first two of a new class of "midget" submarine, 54 ft. long and having a crew of five, were launched from the Barrow-in-Furness shipyard of Vickers-Armstrong Ltd. on Oct. 1 and Dec. 30, 1954, respectively. The fast submarine *Excalibur*, the sister ship of the *Explorer*, was launched at Barrow in March 1954 (see 13493 A).

The aircraft carrier *Ark Royal* (36,800 tons displacement), the first carrier equipped with the angled deck, steam catapult, and mirror sight to be accepted into service, was commissioned at Birkenhead on Feb. 22. The *Ark Royal* is 800 ft. long, will have a peacetime complement of 2,200, and is fitted with remote engine-room control—which will enable her to keep on sailing without a single man in the engine room—as a precaution in the event of radio-active air being sucked into the engine-room after an atomic explosion near the ship.

A. BRITISH COLONIAL EMPIRE. — U.K. Gifts to Dependencies.

The Chancellor of the Exchequer, Mr. R. A. Butler, indicated, in reply to a question in the House of Commons on Dec. 21, 1954, that the total value of gifts of money made or promised by the United Kingdom to its dependencies and Mandated Territories since 1920 was £529,700,000. Of this, £107,300,000 represented grants to Palestine and Transjordan between 1921-22 and 1949-50, and £55,400,000 waivers of claims on Burma arising from the second world war. The remaining £367,000,000 consisted of gifts to Colonial territories made up as follows:

	£ sterling			
	Issued 1920 to 1953-54	Estimated 1954-55	Further amount promised	Totals
Colonial Development and Welfare	104,233,042	18,000,000	48,435,958	170,669,000

(Commonwealth Survey) **(Prev. rep. 12164 D.)**

B. PANAMA. — Ambassador in London.

Dr. Roberto Arias (36), son of a former President of Panama (Señor Harmodio Arias, who held that post in 1931 and 1935), and nephew of ex-President Arnulfo Arias (President in 1940 and 1948-51), was appointed Panamanian Ambassador in London on Feb. 15. He is the husband of Margot Fonteyn, the famous British *prima ballerina*, and was lately Panamanian representative at the United Nations. (Times)

C. DENMARK. — Commission for Peaceful Development of Atomic Energy.

It was announced in Copenhagen on March 8 that the Danish Government had appointed a commission to develop the use of atomic energy for peaceful purposes, and that the chairman of the commission would be Professor Niels Bohr, the famous physicist and Nobel prizewinner.—(Berlingske Tidende, Copenhagen - Politiken, Copenhagen)

D. AUSTRALIA. — New Chief of Naval Staff.

Rear-Admiral R. R. Dowling, flag officer commanding the Australian Fleet since December 1953, assumed office on Feb. 24 as First Naval Member and Chief of Naval Staff in succession to Vice-Admiral Sir John Collins, retiring.

A. INDIA. — Congress Victory in Andhra Elections. - Fall of Praja Socialist Ministry in Travancore-Cochin. - Formation of Congress Ministry. - New Ministry in Delhi.

Elections to the Andhra Legislative Assembly were held on Feb. 11-27, all the 196 seats (in 167 constituencies) being contested except three for which Congress candidates were returned unopposed. The elections resulted in an overwhelming victory for the United Congress Front (comprising the Congress, *Krishikar Lok*, and Praja parties), which won a little under half the votes and 146 of the 196 seats. The Communist Party suffered a serious setback in that it won only 15 seats, although receiving over 30 per cent of the votes. The distribution of seats between the various parties was as follows:

United Congress Front:	
Congress Party	119
Krishikar Lok Party	22
Praja Party	5
Communist Party	15
Praja Socialist Party	13
Independents	22

Prior to the elections, the Praja Socialist Party had formed an electoral alliance on Dec. 12, 1954, with the Krishikar Lok Party and the Scheduled Castes Federation; on Dec. 24, however, the *Krishikar Lok* Party reached an agreement with the Congress and Praja parties to fight on a common platform under the name of the United Congress Front, with the result that its alliance with the Praja Socialists broke down. In view of the strength of the Communists in certain parts of Andhra and their declared aim to become the dominating party in that State, the elections were regarded by the Congress Party and its associates as a contest of national importance, and Mr. Nehru himself, as well as the Congress President, Mr. Dhebar, visited Andhra during the election campaign. The main points in the three opposing party programmes, all of which laid their primary emphasis on agrarian reform, are summarized below.

Congress. The United Congress Front's agrarian policy included the establishment of a ceiling on land holdings; the resumption of Government grants of land (*inams*) with reasonable compensation; protection of tenants from eviction; remunerative and stable agricultural prices; the fixing of minimum wages for agricultural workers; and the appointment of an Agricultural Board, including tenants' representatives, to decide on land policies. The programme favoured the continuation of prohibition, whilst promising that work would be provided for the toddy tappers who had been deprived of employment. Other items included the improvement of rural housing and sanitary conditions; State assistance for cottage industries and for the formation of handloom weavers' co-operatives; measures for the establishment of free and compulsory elementary education and the liquidation of adult illiteracy; increased supplies of hydro-electric power; and the development of road and canal transport.

Communists. The Communist programme included the limitation of holdings to 20 acres of irrigated land or 30 to 60 acres of dry land; distribution of land among landless labourers, without compensation for the previous owners; minimum prices for agricultural commodities; a three years' moratorium on debts; the abolition of prohibition; and a State monopoly for the sale of alcohol.

Praja Socialists. The Praja Socialists' programme provided for a uniform land tenure system; limitation of holdings to 30 acres of average fertility or Rs. 3,600 net profit a year; formation of a land army of 30,000 men for the improvement of irrigation; increased powers for local government bodies; free education up to the secondary stage, and in all stages for backward communities and *harijans* (untouchables); development of major irrigation and hydro-electric projects; and measures for the protection and assistance of cottage industries.

Of the total electorate of about 11,500,000, over 8,600,000, or 62.25 per cent, went to the polls, as compared with 57 per cent in the 1952 elections. The United Congress Front received 4,279,004 votes (49.8 per cent of the total), as compared with 3,877,003 for its three constituent parties in 1952. The Communists received 2,607,675 votes (31.6 per cent), against 1,452,516 in 1952. Of the smaller parties, the Praja Socialists received about 482,000 votes (5.2 per cent) and the *Jan Sangh* less than 10,000 votes. The 162 Independent candidates polled about 1,100,000 votes (13.4 per cent), but 110 of them forfeited their deposits. Strict comparisons with the 1952 figures were, however, rendered difficult by the fact that the State of Andhra had in 1952 not yet come into existence and still formed part of Madras and Mysore States; by the increase in the number of seats from 140 to 196, which had since taken place; and by the fact that the Communists now put forward 169 candidates against only 67 in 1952.

The successful United Congress Front candidates included all the members of Mr. Prakasam's Government, except Mr. Viswanatham (leader of the Praja Party), and Mr. Latchanna, leader of the *Krishikar Lok* Party in the previous Assembly, who moved the no-confidence motion which led to the Government's fall. Several leading Communists were defeated, including Mr. Rajeswara Rao, a member of the party's politburo, and Mr. T. Nagi Reddi, Leader of the Opposition in the previous Assembly. The Praja Socialists won nine of their 13 seats in the Visakhapatnam district, where their success was believed to be mainly due to the personal popularity of Mr. P. V. G. Raju, general secretary of the Andhra party. Most of the Independent candidates returned were dissident Congressmen, who were expected to support the new Government. Four Moslems (three Congress and one Communist), one Christian (Congress), and three women were among the newly elected Assembly members.

Mr. Nehru, the Prime Minister, in a letter to the Andhra Congress Committee, described the election results on March 11 as possessing "not only a national, but an international significance," and as demonstrating "the faith of the Andhra people in the Congress."

The principal reason suggested in the Indian Press for the Congress victory was the formation of the United Congress Front, which led to many straight or triangular fights, thus greatly reducing the number of Communist candidates returned on a split vote in many-cornered contests. Other factors given were the Communists' decision to contest a large number of seats, instead of concentrating on a limited number of constituencies as in the past; Mr. Nehru's personal popularity; the vigorous anti-Communist campaign of the Congress Party, in which it was helped by an article published in *Pravda* praising Mr. Nehru and his policy; the recent adoption by the Congress of a "Socialistic" programme; and the improvement in the food situation in Andhra State. It was also believed that a majority of the Christian community of former untouchables, among which the Communists had enjoyed strong support, had abstained from voting for fear of victimization. In 1952, it was pointed out, the non-Communist vote had been divided among several political parties, and the Congress had moreover been weakened by internal divisions, allegations of corruption made against the Madras Ministry, and popular resentment against food control and against the Central Government's failure to create a separate Andhra State. It was nevertheless emphasized in Congress circles that the large increase in the Communist vote in the present elections, as compared with 1952, afforded no reason for complacency and demonstrated the need for extreme watchfulness.

The executive committee of the Andhra Communist Party, in a statement issued on March 16, admitted that it had hoped to win 100 to 110 seats, and attributed its defeat to the fact that it had "underestimated the hold of the landlords and capitalists over the present social order," whilst "over-estimating the political consciousness and political determination of the masses."

Mr. Gopala Reddy, who was unanimously elected leader of the United Congress Legislative Party in the Andhra Assembly on March 20, formed a new Cabinet consisting entirely of United Congress Party members on March 28, as follows:

Mr. Gopala Reddy, Chief Minister, Finance, Education, Press, Stationery, and Home Dept. (Services and Information); Mr. N Sanjeeva Reddy, Deputy Chief Minister, Home Dept. (Police, Law and Order), and Public Works (excluding Electricity); Mr. Kala Venkata Rao, Planning, Industries, and Public Health; Mr. G. Latchanna, Electricity and Social Welfare; Mr. D. Sanjeviah, Co-operation and Commercial Taxes, Dr. Nageswara Rao, Local Administration and Prohibition; and Mr. Rama Rao, Agriculture.

As from the same date (March 28), President's rule in the State, which had been ordered on Nov. 15, 1954, was ended by a proclamation of President Prasad.

Recent developments in other States are summarized below.

Travancore-Cochin. The Government of Travancore-Cochin under Mr. P. T. Pillai, the only Praja Socialist Ministry in India, was defeated in the State Assembly on a no-confidence motion on Feb. 8 by 60 votes to 30, with 27 abstentions. The motion was supported by the Congress and the Travancore Tamil Nad Congress (T.T.N C.), and opposed by the Praja Socialist, Revolutionary Socialist, and Kerala Socialist parties, whilst the Communists abstained.

Mr. Pillai thereupon resigned on Feb. 10, and a Congress Ministry was formed on Feb. 14 with the following membership: Mr. P. G. Menon, Chief Minister, Finance, and Justice; Mr. A. J. John, Home Minister; Mr. P. Kochukuttan, Local Government; Mr. A. A. Rahim, Health; Mr. K. I. Velayudhan, Public Works. Mr. Menon announced on the same day that the 12 T.T.N.C. members and a former Praja Socialist had joined the Congress, giving the Ministry a following of 59 members out of 118; it was thus dependent for support on the two Independent members, against an Opposition of 57 Communists and Praja Socialists

The Communist Party announced on March 12 its decision to withdraw from the United Front of Leftists, formed at the time of the 1951 general election. The other parties comprising the United Front were the Revolutionary Socialists, who had already withdrawn from it in the summer of 1954, and the Kerala Socialists.

Delhi. A new three-man Ministry was formed in Delhi on Feb. 12 by Mr. G. N. Singh, the other members being Mr. C. B. Prakash and Dr. Y. Singh. Mr. Prakash, the former Chief Minister, had resigned following differences within the Delhi Congress Assembly Party, as a result of which Mr. Singh (then Speaker of the Assembly) was unanimously elected leader of the Assembly Party.

A. RHODESIA AND NYASALAND FEDERATION. — Hydro-Electric Power. - Priority for Kariba Scheme.

Sir Godfrey Huggins, the Rhodesian Federal Prime Minister, announced in the Federal Parliament on March 1 the Government's decision to give the Kariba hydro-electric scheme priority over the Kafue project, subject to two reservations: (1) that the scheme received the final approval of M. André Coyne, the French engineering consultant; (2) that it was also approved by the economic mission of the International Bank. "Subject to these reservations," he declared, "our decision as between the two schemes may be regarded as final."

Sir Godfrey explained that there were good reasons to hope for a substantial reduction in the time before the Kariba project could be brought into operation, and that meanwhile the French consultants had given an assurance that it would be entirely feasible to provide the Northern Rhodesian copperbelt with additional power by means of a transmission line from Umniati, in Southern Rhodesia. The Government had agreed to contribute £8,000,000 towards the estimated cost (about £54,000,000) of the first stage of the Kariba scheme, and proposed to finance the initial work itself so that no time might be wasted in the coming dry season. He anticipated that this preliminary work would be started as soon as the rains ended.

The Kafue scheme, Sir Godfrey continued, had not been proved beyond Stage 2, because it was not possible to prove satisfactorily to potential lenders of money that damming the Meshi-Teshi gap, as had been recommended by M. Coyne (see below), would make future expansion possible. Later, however, the Kafue scheme would be essential for the Federation's development. Before giving reasons for the Government's decision in favour of priority for Kariba, he emphasized that they had "started off with a very strong predisposition in favour of Kafue," on which much exploratory work had already been done and money spent. "We had already decided to go on with Kafue," he went on, "and a good deal of pressure was being brought on us from interested parties not to alter that decision. We were never in any doubt that a change in policy and a decision to give priority to Kariba would be politically embarassing . . . We had to have the strongest possible reasons for favouring Kariba and a determination to do what was right for the Federation as a whole. We are not considering one hydro-electric scheme in isolation, but are contemplating a major policy decision by switching our reliance in the Federation on thermal power to a reliance on hydro power."

Whereas the Government felt that the Kafue scheme was too small in scope and potentialities, the Kariba project had been "proved up to the hilt from the point of view of hydrology," went on Sir Godfrey. One of its big advantages was that, after the first stage had been completed and a dam built, the power output could be increased merely by adding further generating sets at a comparatively low cost. The construction of the Kariba installations would involve building about 90 miles of railway northwards towards Sinpiam, but this would make a valuable contribution towards completing the railway link between Sinoia and Kafue, in Southern and Northern Rhodesia respectively. The Government's consultants had assured them that harnessing the Zambesi was practicable, and calculations of the cost of the power produced favoured the Kariba project. Since an essential prerequisite to the start of work was a visit by an economic mission of the International Bank, he had asked the president of the Bank to send a mission without delay to investigate the scheme; M. Coyne was also coming out to make his final technical appraisal on the spot and to consider details, such as the design of the dam.

Finally, the Prime Minister explained that the Government had decided to seek finance outside the London market, as they wished to utilize borrowing in that quarter to meet the Federation's normal development programme. There was "good reason to believe" that finance to cover the first stage of the scheme was already in sight. The Government had considered the alternative of atomic power, but had been advised that it would be "very many years" before energy so produced could be sold in the Federation at economic prices. Sir Godfrey added that he had discussed with the Colonial Secretary the question of the resettlement of Africans now living in the part of the Zambesi valley which would be inundated, and proper provision would be made. The U.K. Government regarded the completion of the hydro-electric project as "of major importance," and were giving all possible aid.

The reports on the Kariba and Kafue projects, prepared at the Government's request by MM. Tisno and Misson, the French consultants (see 13734 A), had been published on Jan. 14, together with comments by M. André Coyne. The reports, as well as M. Coyne's comments, are summarized below:

Kariba. The report estimated the total cost of the scheme itself at £85,800,000, of which £56,600,000 represented external expenditure. This total included £29,400,000 for civil engineering works and generating plant; £27,210,000 for generators, transformers, and switch gear; and £29,100,000 for the transmissions system. In addition, there would be an estimated £3,900,000 for railway extension from Sinoia (see above), £90,000 for necessary road widenings, and £650,000 for the resettlement of displaced Africans. The guaranteed annual output of power from the full scheme, even in the driest years, was put at 6,500,000 kilowatt-hours, corresponding to a continuous output of 740 megawatts. The full project would not be completed before 1970, but the first power could be available in July, 1961, when a minimum output of 140 megawatts would be generated. The first stage of the scheme (i.e. the first power house, with six generating sets, giving half the final installed capacity) could be in operation by the first half of 1963, the estimated total cost of this stage being put at £53,380,000. The cost of energy delivered at the receiving sub-stations would be 0.286d. per unit during the first stage and 0 254d. per unit when the scheme was completed.

Kafue. The total cost was estimated at £55,000,000, of which £24,220,000 would represent external payments. The total would include £8,030,000 for civil engineering works and generating plant; £13,910,000 for generators, transformers, and switch gear; and £23,110,000 for the transmission system. The guaranteed annual output would be 2,600,000,000 kilowatt-hours, corresponding to a continuous power output of 300 megawatts, and the first 75 megawatt unit could be brought into operation in July, 1959. The cost of energy delivered at the receiving sub-stations would be .33d. per unit during the first stage, increasing to .406d. per unit at the second stage. This stage would include the construction of a dam at the Meshi-Teshi gap (see below) and could be brought into operation by 1963.

In his comments on the reports, M. Coyne recommended that the output programme for the next ten years should be centred on Kariba, but that the Kafue project should also be taken in hand at once, though only as an accessory, since it could not be considered as "anything else but an extra source of supply" until means had been found of regulating the water supplies more thoroughly—perhaps by damming the Meshi-Teshi gap 100 miles upstream from the Kariba Gorge. He added that from the point of view of industrial expansion the Kariba scheme would be "the mainstay and a great future stimulant," that it would be "a powerful provider of guaranteed energy at a price amongst the lowest in the world," and that on the basis of estimates of future power demands in Southern and Northern Rhodesia the entire output of both the Kariba and Kafue schemes would be needed within 15 years.

Although the Government's decision to give priority to the Kariba scheme aroused many protests in Northern Rhodesia, a debate in the Federal Parliament on March 8 showed that most Northern M.P.s, though regretting that the Kafue project would not be proceeded with forthwith, conceded that the latest information available showed Kariba to be the better scheme. Sir Roy Welensky, the Northern Rhodesian leader and Federal Minister of Development and Transport, explained that he had himself been a strong supporter of the Kafue project, but that he now felt forced to support the Kariba scheme since he found that the question of raising money depended on having a project which had been fully proved. A motion by a Northern Rhodesian member (Mr. G. W. R. L'Ange), calling on the Government to "prosecute with vigour their scheme for the establishment of hydro-electric power in the Federation," was carried by 25 votes to 6, after an amendment by Mr. G. F. M. Van Eeden (Ind., Kafue), urging the Government to reconsider its decision not to give priority to the Kafue project, had been defeated by 25 votes to 7, including the four African members from Northern Rhodesia and Nyasaland.

Full support for the Government's decision to proceed with the Kariba scheme was expressed on March 2 by Sir Ernest Oppenheimer, chairman of the Anglo-American Corporation of South Africa, Ltd. and its associated copper mining interests in Northern Rhodesia, who promised that the group would give "every assistance towards bringing the scheme to the production stage at the earliest possible moment." On the same date Mr. R. K. L. Prain, chairman of the Rhodesian Selection Trust group of copper mining companies, expressed the hope that the Kariba project would require "a shorter construction period than hitherto indicated," and that it might yet be in time to meet Copperbelt requirements; he added that the Rhodesian Selection Trust would certainly examine the proposal to transmit thermal power from Umniati to the Copperbelt, but that the possibility of creating further thermal power in the Copperbelt itself would also have to be examined.

It was announced on March 4 that Mr. J. H. Lascelles, executive vice-president of the Rhodesian Selection Trust, had resigned from the Federal Hydro-Electric Power Board as a protest against the Government's decision to proceed with the Kariba scheme instead of the Kafue project.—(Federal Information Department, Salisbury - Times - Manchester Guardian - Financial Times) **(Prev. rep. 13734 A; Map, 11680.)**

B. BELGIUM. — Loan Issue in Holland.

The Netherlands Bank announced on March 11 that discussions on the issue in Holland of a 100,000,000 guilder loan for the Belgian Government had been completed; that the loan would bear interest at 3¼ per cent and be for a period of 30 years, with redemption payments beginning after five years; and that it would be issued at par for public subscription through the Amsterdam Stock Exchange.—(Netherlands News Agency) **(Prev. rep. Benelux Capital Transfer Agreement, 14014 A.)**

A. UNITED STATES. — President Eisenhower's Message to Congress on Foreign Economic Policy.

President Eisenhower sent his legislative proposals on U.S. foreign economic policy to Congress on Jan. 10. He recommended a three-year extension of the Reciprocal Trade Agreements Act, with authority for the President to negotiate the reduction of U.S. tariffs on a reciprocal basis; a further simplification of Customs procedures; the stimulation of U.S. overseas investment; U.S. participation in technical co-operation programmes and international trade fairs; and encouragement of U.S. citizens to travel abroad. A summary of the proposals is given below.

Extension of Reciprocal Trade Agreements Act. The President requested a three-year extension of this Act, giving him authority to negotiate tariff reductions with other countries "on a gradual, selective, and reciprocal basis," and stated that he would ask all countries with whom the U.S.A traded to take similar steps in their relations with each other The three-year extension of the Act should also authorize, subject to the present "peril point" and "escape clause" provisions, (*a*) a reduction in existing tariff rates on certain commodities of not more than 5 per cent of present rates in each of the three years; (*b*) a reduction over the three years to 50 per cent *ad valorem* of any rates at present more than 50 per cent; (*c*) a reduction, by not more than one-half over a three-year period, of tariff rates in effect on Jan. 1, 1945, on articles not now being imported or being imported in negligible quantities. The President emphasized that the programme he was recommending was "moderate, gradual, and reciprocal," and would "add immeasurably to the security and well-being of the United States and the rest of the free world."

GATT. The present review of the General Agreement on Tariffs and Trade by the 34 participating countries would be submitted to Congress for approval when it was completed.

Customs Simplification. Although an important step towards simplification of the tariff structure had been taken by Congress with the passage of the Customs Simplification Act (see 13123 A), the "uncertainties and confusion" arising from the complex system of valuation on imported articles still caused unwarranted delays in the determination of Customs duties, and Congress should therefore give favourable consideration to legislation for remedying this situation. Further technical amendments designed to simplify Customs procedures would be made by the Treasury in its report to Congress.

U.S. Investment Abroad. The flow of U.S. capital abroad must be stimulated, and in such a manner that it resulted in investment largely by individuals or private enterprises rather than by the Government. An increased flow of such investment would contribute much to the expansion of two-way international trade; the underdeveloped countries would be enabled more easily to acquire the capital equipment which they so badly needed; and this in turn would do much to offset "the false but alluring" promises of the Communists. To facilitate the investment of U.S. capital abroad the President recommended:

(i) the enactment of legislation providing for taxation of business income from foreign subsidiaries or branches at a rate 14 percentage points lower than the corporate rate on domestic income, and a deferment of tax on income of foreign branches until it was removed from the country where it was earned;

(ii) the approval by Congress at the appropriate time of U.S. membership in the proposed International Finance Corporation (see 13984 A, 13306 A).

In addition, the President would explore the further use of tax treaties with the possible recognition of tax concessions made to foreign capital by other countries. Under proper safeguards, credit would be given for foreign income taxes which were waived for an initial limited period, thereby giving maximum effectiveness to foreign tax laws designed to encourage new enterprises. Furthermore, the Executive branch would continue, through U.S. diplomatic representatives abroad, to encourage "a climate favourable to the private enterprise concept in investment," and would seek other new ways to enlarge the outward flow of capital. The President emphasized, however, "that when American private capital moves abroad it properly expects to bring home its fair reward," and that this could only be accomplished "by our willingness to purchase more goods and services from abroad in order to provide the dollars for these growing remittances." "This fact," the President declared, "is a further compelling reason for a fair and forward-looking trade policy on our part."

Technical Co-operation. The United States had a responsibility to make available to under-developed areas its "vast store" of practical and scientific "know-how" U S. technical co-operation programmes should therefore be carried forward, but they should be concerned with "know-how" rather than with large funds.

International Travel. Travel abroad by Americans provided an important source of dollars for many countries, and the Executive branch would consequently continue to look for ways of facilitating international travel and would continue to co-operate with private travel agencies. Legislation should be passed by Congress to increase the present half-yearly duty-free allowance for tourists from $500 to $1,000.

Trade Fairs. The United States, which had a larger volume of international trade than any other nation, had until recently been "conspicuous by its absence" at international trade fairs, and American visitors and participants had pointed out the failure of their Government to tell adequately the story of the American free enterprise system and to provide effective co-operation in international trade promotion. The Administration had therefore undertaken an "international trade fair programme," under which U.S. participation had been authorized in 11 fairs to be held before June 30, whilst 16 fairs were being considered for exhibition purposes in the latter part of the year.

Convertibility. Convertibility of currencies was required for the development of a steadily rising volume of world trade and investment, but its achievement had not been possible since the war because of the dislocations caused by the war, inflation, and domestic economic difficulties in many countries. Steady progress was nevertheless being made towards "our mutual objective of restoring currency convertibility," particularly by Western European countries, and the foreign economic programme proposed in the present message would make an important contribution.

Agriculture. In view of the importance of agricultural products in U.S. exports, programmes designed to promote the prosperity of agriculture should be consistent with the foreign economic programme.

The President's proposals were based largely on the programme submitted by him in March 1954 and later shelved by Congress.—(New York Times - New York Herald Tribune) **(Prev. rep. 13685 C; Tariffs, 14110 A.)**

B. INDIA - UNITED KINGDOM. — Responsibility for Pension Payments to Former Servants of the British Crown in India transferred to U.K. Government.

It was announced in New Delhi on March 10 that under an exchange of letters dated March 7 between Sir Alexander Clutterbuck (the U.K. High Commissioner in India) and Sir Chintaman Deshmukh, the Indian Finance Minister, India had agreed to transfer to the U.K. Government as from April 1, 1955, the responsibility of controlling, administering, and paying pensions and other liabilities to or in respect of persons who had served the British Crown during the British rule in India. The Government of India would, however, remain responsible for any instalments of pensions in respect of periods prior to the transfer date which remained unpaid on April 1.

Under the financial agreement of July 9, 1948, the Government of India had purchased from the U.K. Government annuities for the purpose of meeting the sterling pensions payable by the Dominion of India or the then Indian Provinces to former servants of the British Crown in India.—(The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. 1948 Agreement, 9412 A.)**

C. TURKEY. — Parliamentary Ratification of Paris Agreements and Balkan Alliance Treaty.

The Turkish Grand National Assembly unanimously approved on Feb. 16 the ratification of the Paris agreements under which the German Federal Republic was admitted to the North Atlantic Treaty Organization. Addressing the Assembly before the vote, Professor Koprulu, the Foreign Minister, stressed that Turkey had always believed that German membership of NATO was necessary for the defence of the free world, and that the entry of a peaceful and democratic Germany into NATO was its "historical right and also its duty."

On the same date the National Assembly ratified without a dissenting vote the Balkan Alliance Treaty with Greece and Yugoslavia, thus completing the ratification process for that treaty by the three countries.—(Turkish Embassy, London - New York Times) **(Prev. rep. Paris Agreements, 14116 C; 14106 A; Balkan Alliance, 14001 B; 13999 A.)**

D. UNITED KINGDOM. — New Knights of the Thistle. - Title taken by Sir Godfrey Huggins.

It was announced on March 25 that H.M. the Queen had appointed Lord Crawford of Balcarres and Lord Bilsland Knights of the Thistle to fill the vacancies caused by the deaths of the Marquess of Linlithgow and Lord Hamilton of Dalzell. The Order of the Thistle is the premier Scottish Order of knighthood.

The viscounty conferred recently by the Queen on Sir Godfrey Huggins, Prime Minister of the Rhodesia and Nyasaland Federation (see 14062 A), was gazetted on March 18 by the name, style, and title of Viscount Malvern of Rhodesia and of Bexley in the county of Kent.
(Times - Manchester Guardian) **(Prev. rep. 14052 B.)**

E. INDIA. — Pondicherry. - Inauguration of French Institute of Higher Studies.

The French Institute of Higher Studies at Pondicherry, the setting up of which was provided for in the agreement between France and India for the *de facto* transfer of the French Settlements to India, was inaugurated on March 20 by Count Ostrorog, the French Ambassador in New Delhi, in the presence of Mr. Rajagopalachari, the Chief Minister of Madras. Dr. Filliozat, an eminent French Orientalist, was appointed the first Director of the Institute.—(The Hindu, Madras) **(Prev. rep. 13857 A.)**

A. UNITED KINGDOM. — Foreign Trade in 1954. - Figures for January-February, 1955.

Imports into the United Kingdom in 1954 totalled £3,378,934,000 (£3,342,885,000 in 1953), exports £2,673,396,000 (£2,582,001,000), and re-exports £100,800,000 (£105,000,000). The adverse balance on visible trade thus amounted to £604,738,000, compared with the revised figure of £655,884,000 in 1953. The quarterly and annual figures were as follows:

	Total Imports (c.i.f.) (£'000)	Retained Imports (£'000)	Re-exports (f.o.b.) (£'000)	U.K. Exports (f.o.b.) (£'000)	Adverse Visible Balance (£'000)
First Quarter	822.7	794.7	28.0	673.2	121.5
Second Quarter	855.7	830 0	25.7	671.5	158.5
Third Quarter	842 3	818.6	23 7	662 9	155.7
Fourth Quarter	876.5	853.4	23 1	667 1	186.3
Year 1954	3,378.9	3,278.1	100 8	2,673.4	604.7

Note. The figures for the year include corrections not made to the individual quarters

Divided into the six main categories, value figures were as follows. (As the basis of classification is different from earlier years, 1953 figures on the new basis are given for comparison.)

	1954		1953	
	Imports (£'000)	Exports* (£'000)	Imports (£'000)	Exports* (£'000)
Food, drink and tobacco	1,330.6	157.3	1,315 1	149 3
Basic materials . ..	1,024.5	101.1	1,053.7	96.8
Mineral fuels and lubricants	329.2	152 2	313.5	147.6
Manufactured goods .	679.8	2,171.0	642 6	2,098 4
Postal packages .. .	8.2	85.4	10.8	83.4
Live animals not for food	6.7	6.4	7.1	6 6
Total	3,378.9	2,673.4	3,342 9	2,582.0

* Excluding re-exports

Volume of Trade.

The quarterly volume figures are shown below (1950 = 100):

	Total Imports	Retained Imports	Exports*
1953 : Year	112.0	111.8	98.0
1954 : First Quarter .	113.3	113.0	103.3
Second Quarter ..	114.5	114.6	103.7
Third Quarter ..	112.7	113.0	103.3
Fourth Quarter .	114.2	114 6	104.4
1954 : Year . .	113.7	113.8	103.7

* Excluding re-exports.

Terms of Trade.

The terms of trade, which had moved in Britain's favour during 1952 and 1953, moved against Britain in 1954, as shown in the Board of Trade's "Terms of Trade Index" (which expresses the ratio of import prices to export prices, a rise indicating an adverse movement and *vice versa*). This index, though falling from 99 in January to 98 in February and to 97 in March, rose again to 99 in April and May, to 100 in June and 101 in July; it fell again to 99 in August, but rose to 100 in September and October, 101 in November and 102 in December.

The index of import prices (1953 = 100) fell from 98 in January to 97 in February and to 96 in March; thereafter it rose to 98 in April and May, to 99 in June-October, to 100 in November and to 101 in December. The index of export prices (on the same basis), after remaining unchanged at 99 for the first six months of the year, fell to 98 in July, rose again to 100 in August, and then fell once more to 99 for the remaining four months of the year.

Imports.

The *Board of Trade Journal* pointed out on Jan. 22, 1955, that since 1938 there had been a considerable change in the commodity pattern of imports, arising on the one hand from an expansion of the output of domestic agriculture by nearly one-third and on the other from an increase in industrial production amounting to nearly one-third since 1948. Britain therefore relied relatively less than before the war on food imports, and relatively more on imported raw materials. Whereas in 1938 47 per cent of total imports consisted of food, beverages and tobacco, the proportion in 1948 was only 42 per cent and in 1954 39 per cent The proportion for basic materials, on the other hand, had increased from 26 per cent in 1938 to 31 per cent in 1948, though it fell again to 30 per cent in 1954. The fact that there had been no further increase in recent years had been mainly due to (1) the smaller share in production accounted for by "import-intensive" industries like textiles, and the larger share of such industries as engineering and chemicals, which made a relatively smaller demand on imports; and (2) the development of new industries and methods specifically in order to save imports.

Food, Drink, and Tobacco. Imports in this group (£1,330,600,000) were about one per cent higher in value than in 1954 owing to higher prices, but the volume of such imports fell. Meat imports, which had increased by £41,000,000, or 18 per cent, between 1952 and 1953, fell somewhat in 1954, but were still some 14 per cent above 1952; bacon imports decreased both in volume and in price so that their value fell by 10 per cent, and imports of Australian beef fell by 34 per cent. On the other hand, the value of live animals imported for food (almost entirely from the Irish Republic) increased by £9,000,000 (37 per cent), and there was a substantial increase in home production Sugar imports (£103,400,000) were over £25,000,000 less than in 1953; imports of cereals (£175,900,000) fell by nearly £60,000,000 (over 25 per cent); and imports of eggs and dairy products (£160,800,000) declined by about £9,000,000. On the other hand there were sharp increases in imports of fruit and vegetables (£204,000,000), where the rise of £30,000,000 (17 per cent) was mainly accounted for by tinned and bottled fruit which, at £26,000,000, was nearly double the 1953 value. Imports of cocoa, coffee, and tea, etc. (£217,200,000) were also over £62,000,000 (40 per cent) higher than in 1953, mainly as a result of a rise in prices—40 per cent for tea, 50 per cent for raw cocoa, and 17 per cent for coffee

Basic Materials. Imports of wool and other animal hair (£197,700,000), which had increased considerably between 1952 and 1953, fell by £44,000,000 (19 per cent) in 1954 Cotton imports (£126,200,000), on the other hand, were £19,000,000 higher than in 1953. Imports of wood and timber (£155,300,000) were some £4,000,000 less as a result of lower imports of hardwood, pitprops, and sleepers; the increase in home deliveries of imported softwood which took place during 1954 following the removal of restrictions on the use of timber was cushioned by the stocks built up during 1953, and softwood imports consequently increased by only 3 per cent.

The increased capacity of the paper-making mills in Britain and the continued rise in demand for almost all paper and board products resulted in a steady increase in imports of woodpulp and waste paper which, at £86.600,000 in 1954, were £19,000,000, or 28 per cent, higher than in 1953. Of the other basic materials, imports of metalliferous ores and metal scrap (£137,100,000) were some £4,000,000 lower in value but higher in volume, oilseeds, etc. (£68,000,000) about £5,000,000 less, rubber (£50,700,000) £6,000,000 less, but greater in volume, and hides, skins and furs (£43,800,000) over £6,000,000 less

Fuels and Lubricants. The continued expansion of the output of the new oil refineries led to higher imports of crude petroleum, which, at £312,200,000, were £2,500,000, or one per cent, higher than in 1953 Coal imports totalled nearly 3,000,000 tons, valued at £17,000,000, more than in any year since 1926; these imports, which were more than £13,000,000 greater than in 1953, had been necessary for the growing coal requirements of industry and commerce, in addition to higher domestic consumption, which could not be met by home production despite some limitation in exports.

Manufactures. Imports in this group rose by £37,000,000 to £679,800,000, the most important increases being in chemicals (by £26,000,000 to £101,600,000); wood and cork manufactures (by £15,000,000 to £39,100,000)—due mainly to imports of plywood, which were more than double the 1953 quantity and accounted for two-thirds of the increase; paper and paperboard (by £18,500,000 to £51,600,000); cotton yarns and woven fabrics (by £11,000,000 to £21,700,000); non-ferrous base metals (by £23,000,000 to £174,500,000); and electrical machinery and apparatus (by £5,500,000 to £16,000,000).

Imports of iron and steel (£28,200,000), on the other hand, fell by 55 per cent in quantity and by £33,000,000 in value as a result of the rapid increase in home steel production. For similar reasons, as well as because of smaller defence requirements, imports of machine-tools (£16,000,000) fell sharply from £47,000,000 in 1953; although other items in the machinery group were generally higher, the total, at £75,000,000, was 23 per cent less than in 1953. Imports of aircraft fell by £26,000,000, but this was more than accounted for by the difference in the Canadian gifts of aircraft to Britain—£35,000,000 in 1953, but only £7,000,000 in 1954.

Exports.

The *Board of Trade Journal* pointed out that there had been a considerable change in the commodity pattern of exports since the war as compared with pre-war, notably a movement away from the traditional items, coal and textiles, in favour principally of engineering products. Coal exports declined from 8.6 per cent of total British exports in 1938 to 2.8 per cent in 1948, whilst textiles fell from 19.4 per cent in 1938 to 18.4 per cent in 1948, 13 per cent in 1952, and 12.2 per cent in 1954. Exports of engineering products, on the other hand, increased from 24.4 per cent of the total in 1938 to 35 8 per cent in 1948; in 1954 they accounted for 37.8 per cent of the total (which was slightly less than in 1952) and the proportion would have been higher but for the dock strike in the last quarter.

Manufactured Goods. Exports in this group (£2,171,000,000) accounted for over 80 per cent of total exports. Within the group, engineering products, at £1,012,000,000, were £42,000,000 (over 4 per cent) higher than in 1953, the road vehicles and aircraft sub-group improving most, viz., by £17,000,000 (6 per cent) to £307,500,000. Nearly three-quarters of the increase in this sub-group was accounted for by shipments of passenger cars, which were particularly large to Australia and New Zealand following the relaxation of import restrictions in those countries; car exports to Sweden were also greatly increased, and at over £12,500,000 were 73 per cent more than in 1953, but shipments to Canada, at under £6,000,000, were little more than half the 1953 figure. Exports of aircraft were reduced to £31,000,000, only three-quarters of the 1953 total

Exports of machinery other than electric (nearly £408,000,000) reached a new record level, being 2½ per cent more than in 1953; the most notable increase was in agricultural and track-laying tractors, shipments of which rose by £7,000,000 to over £47,500,000. Exports of ships and boats (£50,400,000) were 25 per cent more than in 1953; exports of railway vehicles (£44,500,000) nearly £2,000,000 higher; and exports of scientific instruments (£31,500,000)—which have

increased every year since the war—15 per cent above 1953. Exports of electrical machinery and apparatus on the other hand fell by 1½ per cent to £170,000,000, electric cables, wires, etc. (at about £19,500,000) being one-third less than in 1953.

Of the other manufactured goods, exports of textiles (£325,000,000) continued the decline which had taken place since 1951, being £1,000,000 less than in 1953; within the group, however, both cottons and woollens showed substantial reductions. Exports of cottons (£112,000,000) were £5,000,000 less than in the previous year; competition from India and Japan was chiefly responsible for this, particularly in Africa and the East, and but for an increase of nearly £6,500,000 in exports to Australia and New Zealand the position would have been considerably worse. Exports of wool yarns and fabrics and wool tops fell by £4,000,000 to under £83,500,000, this being entirely attributable to the North American recession. Synthetic fibre yarns and fabrics (£40,000,000) were a little higher, while miscellaneous textile manufactures increased by 9 per cent to £90,000,000, mainly because of substantially higher shipments of carpets and other floor coverings to Australia and New Zealand.

Exports of metals (£338,000,000) were slightly lower than in 1953, principally on account of lower shipments of aluminium and tin and their alloys to the U.S.A., though iron and steel exports (£136,900,000) were about £2,000,000 higher than in the previous year. Exports of chemicals (£203,800,000) reached the highest figure yet recorded, being £26,500,000 (15 per cent) over 1953. Paper and paperboard exports (£33,500,000) were £4,500,000 higher than in 1953.

Food, Drink, and Tobacco. Exports in this group (£157,300,000), after falling in 1952 and 1953, rose in 1954 almost to the 1951 level. Higher prices accounted for the rise of £2,500,000 in exports of coffee, cocoa, and tea, the quantity shipped being 4 per cent less than in 1953 but the value being 18 per cent more The principal items in this group were beverages (£46,000,000), sugar (£33,000,000), tobacco (£22,000,000), and coffee, cocoa, tea, and spices (£15,800,000).

Basic Materials. At £101,100,000, exports in this group were 4½ per cent above the 1953 level; nearly two-thirds of the total (£63,200,000) was accounted for by raw wool exports.

Fuels and Lubricants. The total of £152,200,000 comprised £84,300,000 of petroleum and petroleum products and £68,000,000 of coal and coke. Petroleum exports had increased steadily from £35,700,000 in 1951 to £59,600,000 in 1952, and to £76,800,000 in 1953.

Distribution of Trade.

The distribution of U.K. trade in 1954 is shown below, with 1953 figures in parentheses.

	Imports	Total Exports* (£ million)	Trade Balance
Dollar area ..	620 (634)	375 (404)	−244 (−231)
O.E.E.C. countries and possessions	819 (769)	778 (750)	− 41 (− 19)
Other non-sterling area	440 (437)	275 (264)	−165 (−172
Sterling area ..	1,500 (1,503)	1,346 (1,269)	−155 (−234)
Total .	3,379 (3,343)	2,774 (2,687)	−605 (−655)

* Including re-exports.

Dollar Area. As a result of the recession in the U.S A. and Canada, U.K. exports to the dollar area—which had been growing over the previous four years—declined by 6½ per cent compared with 1953 to £360,000,000. Cars and woollen goods were the chief items affected in exports to Canada, whilst with the U.S.A. the items affected were non-ferrous base metals, iron and steel, and woollen yarns and fabrics.

Dollar imports fell by £14,000,000 (2½ per cent). Imports of Canadian wheat declined by nearly 30 per cent in quantity and £29,000,000 in value, and a sharp fall in sugar purchases resulted in a drop of £22,000,000 in the value of imports from Cuba, but these were partially offset by higher imports of raw cotton and a wide variety of other articles from the U.S.A., amounting in all to £30,000,000.

O.E.E.C. Countries. The increased liberalization of trade by member-countries, accompanied by the higher levels of production and consumption, resulted in both higher exports to and higher imports from other member-countries. Exports, which had risen steadily over the previous three years, rose by a further 4 per cent in 1954, despite strong competition from Western Germany (which was re-establishing herself in her traditional markets) and from dollar goods (which were being imported in increased quantities as a result of the relaxation of import restrictions). Total imports from O.E.E.C. countries were £50,000,000, or over 6 per cent more than in 1953.

Other Non-sterling Countries. Total exports to these countries increased by 4½ per cent over 1953 to £259,000,000. Although exports to Finland increased by over £10,000,000 to nearly £32,000,000 and those to Communist Eastern European countries by over £8,000,000 to £24,000,000, exports to the larger markets of the Middle East and non-dollar South America (with the notable exception of Argentina and Uruguay) did not make great headway (although Western Germany was able to increase her exports to these areas considerably).

Sterling Area. Exports to the sterling area (£1,330,000,000) accounted for about 50 per cent of total British exports, a proportion slightly above that in 1953 and 1952 but lower than the 51 per cent in 1951. There were, however, great variations between the different markets. The large increases in exports to Australia (£65,000,000) and New Zealand (£25,500,000)—especially in consumer goods such as road vehicles, textiles, paper, and chemicals, which had previously been most affected by import restrictions—and the higher exports of iron and steel and machinery to Pakistan, were partly offset by reduced exports to India, South Africa, and the Colonies, where competition from Germany, Japan, or the dollar area was more severe.

Imports from the sterling area were only fractionally less than in 1953. a reduction of £57,000,000 (20 per cent) in imports from Australia (wool, meat, cereals, and sugar) being offset by a £35,000,000 increase in imports from India (largely because of greater quantities and higher prices of tea and textiles) and by a general increase in the quantity of food and raw materials imported from other parts of the sterling area.

Imports in January 1955 totalled £332,300,000, exports £248,600,000, and re-exports £10,300,000, giving an adverse balance for the month of £73,400,000. In February imports fell to £309,500,000, exports were £232,800,000, and re-exports £9,000,000, giving an adverse balance of £67,700,000.
(Board of Trade Journal) **(Prev. rep. 13987 B; 13495 A.)**

A. COMMUNIST CHINA. — Tibet Autonomous Region. - Preparatory Committee set up under the Dalai Lama. - Economic Development Plans for Tibet.

It was announced in Peking on March 12, at the conclusion of a six-month visit to the Chinese capital by the Dalai Lama and the Panchen Lama of Tibet, that a preparatory committee had been set up for establishing an expanded "Tibet autonomous region" within the national framework of Communist China. The Dalai Lama had been appointed chairman of the committee and the Panchen Lama and General Chang Kuo-hua (Chinese commander of the Tibet military district) vice-chairmen; the committee's 51 other members comprised 15 representatives of the "Tibet local Government," 10 of the *Panchen Kanpo Lija* (the Panchen Lama's former ecclesiastical and secular institution), 10 of the "People's Liberation Committee in the Chamdo area," five from the Central Government personnel in Tibet, and 11 from "major monasteries, religious sects, and people's organizations."

The announcement added that the committee, whose main task would be to prepare for regional autonomy in Tibet, would have the status of a State organ subordinate to the Central State Council (i.e. the Central Government). It would have two sub-committees—for financial and economic affairs and for religious matters—and 10 departments, dealing with civil affairs, finance, construction, culture and education, health, public security, agriculture and afforestation, animal husbandry, industry and commerce, and communications.

It was also announced that the State Council had taken the following other decisions in the economic field: (1) to extend the Tsinghai-Tibet road to Shigatse, the second largest town in Tibet, and to build a road from Shigatse south-eastwards to Gyangtse. (2) To establish a Tibetan transport bureau at Lhasa, with sub-administrative units for the Sikang-Tibet and Tsinghai-Tibet roads (3) To build a hydro-electric power station in Lhasa and a smaller thermal power station at Shigatse, and to send technicians to study the question of building a hydro-electric plant at Shigatse. (4) To establish a leather works and a small iron works at Lhasa. (5) To repair and build dykes and dams to protect Lhasa and Shigatse from floods, expand the school systems at these towns, and improve an experimental farm at Lhasa.

The Peking announcement also disclosed that rival groups backing the Dalai Lama and Panchen Lama had reached an agreement on Jan. 19 on their "historic and unsettled problems" and that the Chinese State Council had approved the agreement. No details of the agreement were given, however.
(New York Times - Manchester Guardian) **(Prev. rep. 11610 A.)**

B. SOUTH AFRICA. — Formation of South African Congress of Trade Unions.

A new trade union co-ordinating body with no colour bar—the South African Congress of Trade Unions—was formed at a conference in Johannesburg on March 5-6 by delegates from 35 national and regional unions, representing nearly 42,000 workers. The conference was organized by those unions which had opposed the dissolution of the old South African Trades and Labour Council in October last and had not joined the new South African Trade Union Council, from which Africans had been excluded. A national executive committee was formed pending the first annual conference of the new organization.—(Cape Times) **(Prev. rep. 13873 A.)**

C. UNITED KINGDOM. — Purchasing Power of £.

The Economic Secretary to the Treasury (Mr. Maudling) stated in a Parliamentary answer on March 24 that, taking the internal purchasing power of the pound sterling as 20s. in October 1951 (i.e. when the Conservative Government took office), it was estimated that the value had declined to 19s. 2d. in October 1953, 18s. 8d. in October 1954, and 18s. 5d. in February 1955. These estimates, he said, were based on the consumer price index and the interim index of retail prices.
(Times) **(Prev. rep. 13025 E.)**

APRIL 2—9, 1955

A. UNITED KINGDOM. — Resignation of Sir Winston Churchill from Premiership. - Sir Anthony Eden appointed Prime Minister. - Ministerial Changes. - Mr. Macmillan becomes Foreign Secretary. - Mr. Selwyn Lloyd appointed Minister of Defence.

Sir Winston Churchill resigned from the Premiership on April 5, the following announcement being issued from Buckingham Palace: "The Rt. Hon. Sir Winston Churchill had an audience of the Queen this evening and tendered his resignation as Prime Minister and First Lord of the Treasury, which her Majesty was graciously pleased to accept." Sir Winston had held the office of Prime Minister since Oct. 26, 1951, following the Conservative victory in the last general elections; in all he had been Prime Minister for over eight years, including five years during the Second World War when his term of office was ended by the Labour victory in the first post-war election in 1945.

Earlier the same day, at noon, Sir Winston Churchill had held his last Cabinet meeting and taken leave of his colleagues in the Cabinet, whilst after the audience of the Queen he saw the Ministers not in the Cabinet and thanked them for their services.

On the previous evening (April 4) Sir Winston and Lady Churchill had given a dinner party at No. 10, Downing Street, which was attended by H.M. the Queen and the Duke of Edinburgh, and by leading members (and their wives) of both Sir Winston's post-war Cabinet and his wartime Coalition Government, as well as by the principal military leaders during the war, other close associates, members of his family, and Mrs. Neville Chamberlain. During the dinner Sir Winston Churchill proposed the health of the Queen and the Duke of Edinburgh, after which the Queen rose and said she wished to do something which probably few of her predecessors had had an opportunity of doing, namely, to propose the health of her Prime Minister.

On April 6 it was announced that Sir Anthony Eden had accepted the Queen's invitation to become the new Prime Minister, the following statement being issued from Buckingham Palace after Sir Anthony had been received by the Queen: "The Queen this morning received in audience the Rt. Hon. Sir Anthony Eden, M.P., and offered him the post of Prime Minister and First Lord of the Treasury. The Rt. Hon. Sir Anthony Eden accepted her Majesty's offer and kissed hands upon his appointment."

It was pointed out in the Press that the time-lag between Sir Winston Churchill's resignation and the appointment of Sir Anthony Eden as Prime Minister indicated that under the traditions of the British Constitution the appointment of a new Prime Minister is the sole prerogative of the Sovereign, who is under no obligation to consult a retiring Prime Minister about his successor and may consult anyone he or she chooses. With the exception of certain Court appointments and the awarding of certain honours such as the Garter, the Thistle, and the Order of Merit, the choice of a Prime Minister is, in fact, the only part of the royal prerogative which a modern British Sovereign can exercise without ministerial advice.

Tributes to Sir Winston Churchill and to Sir Anthony Eden were paid later the same day (April 6) in both Houses of Parliament.

In the House of Commons **Mr. Attlee**, after referring to "the event which is in all our minds—the change of Prime Ministers," spoke as follows. "Today we are parting with a Prime Minister who led this country through some of the most fateful years of Britain's history and who served in this House for more than 50 years. For the greater part of that time he has been one of the outstanding figures in the parliamentary arena. The retirement from active political life of the right honourable gentleman, the member for Woodford, does indeed mark the close of an epoch.

"He is the last survivor in this House of those who served in Queen Victoria's reign. He held high office before and during the First World War, and in the length of his political career he rivals Palmerston and Gladstone. He gave leadership to this country when it needed it most, and in history, as one of the greatest of all Prime Ministers, his name is assured.

"This is not the occasion for an appraisal of his career either as a most illustrious statesman on the world stage or as a great Parliamentarian. Fortunately, we were enabled to give expression to our appreciation of a great man not long ago on his 80th birthday, and we hope that the day may be still far distant when more formal tributes will have to be paid.

"But we feel today the loss from the front bench of a great Parliamentarian whose speeches have added lustre to our debates, and we shall miss those witty replies which so often enlightened our debates. Only last week we were enjoying them. Above all we shall miss a familiar figure for whom, despite the many differences we may have had with him, we could not help having a warm affection. We do not know whether there will be occasions on which he will address this House again, but he has now left the front line.

"He is going to have a well-earned rest. Instead of continuing to make history we hope he will continue to write it, and he carries with him the warm good wishes of us all.

"I should now like to offer to his successor our very sincere congratulations. The member for Warwick and Leamington [Sir Anthony] has had a long apprenticeship in high office and has earned the esteem of members in all parts of the House.

"He has, I am sure, no illusions as to the weight of the burden he now takes up in these troublous times. We all wish him health and strength, but we on this side cannot, of course, wish him a long tenure. Indeed, it is our duty as soon as opportunity offers to try to give him a period of rest. As a Mr. Young said to Lord Melbourne when that statesman hesitated to accept the Premiership: 'Why, damn it, such a position was never held by any Greek or Roman and if it lasts only three months it will have been worth while to have been Prime Minister of England.' So we are glad to congratulate him."

Mr. David Grenfell (Lab.), the Father of the House, said Sir Winston had no need of praises, "but he has fully earned them and we would be unworthy if we did not now sound our appreciation of his great services to the House and to the country." He also supported the welcome for Sir Anthony Eden.

Mr. Walter Elliot (C.) said: "Sir Anthony Eden is one of the very few persons obviously destined for a great post who has in fact eventually attained that post." His party in particular wished him well. Of Sir Winston, Mr. Elliot said that he had become a legend in his lifetime. "For all our lives we have sat down with this legend. To us he is fresh and the most human of men. The House today lost one of the greatest front-benchers in all its history and for that we are all the poorer. But the back-benchers have gained the greatest back-bencher of all times. By this at least, we can say, each of us is ennobled and the whole House is enriched."

Mr. John Maclay welcomed Sir Anthony Eden as Prime Minister on behalf of the National Liberal-Conservative members, and **Mr. Donald Wade**, in the absence of Mr. Clement Davies (the Liberal leader) did so on behalf of the Liberals.

Sir Anthony Eden, making his first appearance as Prime Minister, spoke as follows: "I must first try to acknowledge the generous terms which have been used . . . the well deserved terms about my right honourable friend, the member for Woodford. It is rightly said that this is not the time to appraise his work. For one thing he is, fortunately, still among us. We all know quite well that whenever he returns to us from his holiday, he will still be a dominant figure among us.

"For more than 16 years I have been intimately associated with Sir Winston in political work. As I reflect over those years and think of them in the terms of what we yet have to do, certain lessons seem to me to stand out for us in the message of what he has done.

"First, I think, in the war, his absolute refusal, as his War Cabinet colleagues knew so well, to allow any obstacle, however formidable, to daunt his determination to engage upon some task. And there is the courage, the courage that expresses itself not only in a first enthusiastic burst of fervour, but the courage that is endurance also, perhaps the rarer gift of the two.

"I think Sir Winston has perhaps the widest and the most varied interests in life of any man we are likely to know. Though that is true, I think his great passion was the political life, and that he brought to that service a most complete vision. No man I have ever known could make one understand at the same time the range of a problem and go straight to its core. I believe that in statesmanship that will be the attribute which many who knew him will place first among his many gifts.

"Sir Winston's spirit of magnanimity is the most agreeable of virtues—and let us be frank about it, one not all of us politicians find it easy to practice, although we would all like to. Perhaps, in part, with him it was easier because he always thought of problems not in abstract terms but in human values; that was one of the things that endeared him to all in this House.

"Finally, the humour, the humour based on his incomparable command of the English language, which was often our delight, not least at question time. I am sure he will be deeply moved by the things Mr. Attlee and others have said of him this afternoon, for he loves this House, loves it in companionship and in conflict.

"Mr. Attlee and other members have been kindly in their welcome to me. I enjoyed very much the Melbourne reflection. Mr. Attlee, with his deep knowledge of history, will not, however, I think, have forgotten that Melbourne, always talking of leaving office, contrived to stay there a very long time indeed. I have no desire—I beg him to believe—to emulate that in its entirety.

"For the rest, I can only say—and to the Father of the House—that I have been deeply touched with what has been said this afternoon and that I, for my part, will do all I can to serve our country."

In the House of Lords **Lord Salisbury** (Leader of the House) said Sir Winston belonged to that illustrious company "who will never pass from the minds of men—who will live in their hearts as long as Britain endures." His passionate love of freedom had made him, although the leader of the Conservative Party, one of the greatest Liberals in the fullest sense of the term.

Lord Jowitt, a former Lord Chancellor, speaking on behalf of the Labour peers, said that the very fact that the motion of tribute was so wholeheartedly supported on all sides created a precedent, but the man himself was without precedent. "Indeed, the motion fits the man," he went on. "And in the case of Sir Winston Churchill nothing seems more natural than that we should for a moment forget our party differences and bear witness to that underlying unity which adds to the confusion of our critics and the consternation of our enemies." Historians of the future would certainly analyse Sir Winston and would no doubt point to this mistakes. But those who

had served under him would, Lord Jowitt knew, testify to "the inspiration we received from his superior courage and matchless eloquence." There was no one, he said, who had striven so mightily for truth and justice, and in the long line of statesmen none had rendered such incomparable service not only to his country but to the free world. Lord Jowitt concluded . "Long may he be with us to give us the fruits of his experience and judgment. We salute him An epoch has ended and we turn to the future."

Lord Samuel (Leader of the Liberal peers), speaking of Sir Winston Churchill's achievements, recalled that he was Sir Winston's earliest colleague in the Government nearly 50 years ago. It was unfortunate, he said. that at that moment the London daily Press was silenced, adding : "It is only a muted farewell that the nation can give to the outgoing Prime Minister and greeting to his successor."

Lord Samuel had on the previous evening (April 5) broadcast the following tribute to Sir Winston Churchill:

"It was said very truly, by John Bright, that men are not great statesmen merely because they happen to fill great offices. That is so, even with the highest office of all. Looking at the list of Prime Ministers over the last 200 years, we must allow that by no means all of them had personalities that matched their position. Indeed, there are not more than perhaps ten or twelve who would be generally agreed to rank with the great who still live in the halls of fame. We do not doubt that, among the small company, is Winston Churchill. What the verdict of the future historian may be we cannot foretell . but at least we can send on to him a message that this has been the judgment of contemporaries.

A man's achievements must depend, not only on himself, but also on his times. This century has been an era of vast political upheavals and terrible wars. Here the occasion fitted the man ; and the man, the occasion.

That Churchill, from his youth up, was ambitious, he would be the last to deny. But his ambition was justified by great talents and an indefatigable industry. It was an honourable ambition to lead in public service ; and the success was merited that fulfilled his hopes :

> Thine to conduct—through ways how difficult—
> A mighty nation in its march sublime
> From good to better.

His character is many-sided ; he is versatile in his interests ; his career has been full of adventure. In politics, he was with us for ten years as a good Liberal ; afterwards, for much longer, he has been a good Conservative ; always he has been both a fervent patriot and a true citizen of the world. But I do not know that he has ever been inconsistent with himself.

He meets life with gusto, and danger with zest. He is one of those whom danger does not intimidate but exhilarates. Yet he has plenty of practical caution and prudent restraint when they are needed. That, in the course of his carcer, he has sometimes adopted or advocated policies that were mistakes cannot be denied ; but if, in a long life full of great responsibilities and grave decisions, he had made no mistakes he would have been unique among the statesmen, not only of this country. but of the world.

There is a special kind of affection that an individual may feel for an institution. I think that all of us, who have been for a long time, perhaps twenty years or so, in the House of Commons, do feel for it such an affection. Clearly that is so with Sir Winston Churchill. And the House returns it in full measure. He is very human. and that brings liking. He has wit, and there it has full scope. His wit is spontaneous, swift, often ironic, sometimes devastating. But it is never cynical, never ill-humoured or unkind. He may be scornful or angry, when scorn and anger are merited , but is never malignant, and he is neither self-assertive nor aloof.

It would not be just to say that he is variable ; but he is certainly various—almost as various as Shakespeare himself. Sometimes he is Hamlet or Jacques, reflecting on the qualities and fortunes of men and the destinies of nations. And then there are moments—perhaps in the House of Commons at question time, if things generally are going well, when we may catch a fleeting glimpse of an amiably mischievous Puck. But most truly and most deeply he is Henry V : 1940 was his Agincourt ; the nation's finest hour—and his own.

We passed through those two wars, the most widespread and destructive that have ever affected mankind ; and both ended—after so much tribulation, so much sacrifice—in full victory for the cause that we are sure was right. A democracy must judge its statesmen by results. Before and during the First World War, Churchill rendered great services ; but in the Second, he, more than any man, was the architect of victory. Beginning so young in the conduct of affairs, he is now full of years. Today he retires from public office ; but not, we hope, from public life. He carries with him the thanks of the British nation to a faithful servant of the people—and of mankind."

Owing to the non-publication of the London newspapers through the strike of electricians and maintenance men, the London Press was prevented from publishing the news of, and its comments on, Sir Winston Churchill's retirement, but a number of papers supplied the Press Association with extracts from the leading articles which they would have published had not the strike intervened. The following are quotations from some of these leaders (the Press Association stated that *The Times* and the *Daily Express* had supplied no articles).

Daily Telegraph (Conservative) : "His decision to hand on the torch cannot easily be questioned, but it is profoundly saddening. 'Peace,' he has said 'is the last prize I seek to win,' and retirement has come before it has been won. Indeed, as he surveyed the future, he may well have become convinced that the winning of it would take more years than those in which he could expect to enjoy the plenitude of his powers. In that case, to give way to others now is a course both wise and noble. It is only fair to those others that they should take on now a task which, in any case, they would have to complete. . . . Sir Winston Churchill has enriched our history, has nursed our strength, and has fortified our courage. We wish his successor good fortune in his heritage "

Daily Mail (Conservative) : "Few political careers have been so turbulent or so many-sided as his He has never been a party man. In this he resembles all his most notable predecessors. It goes without saying that he will be numbered among the great Prime Ministers. Indeed history will probably decide that he was the greatest of them all. To follow him will not be easy . . ."

News Chronicle (Liberal) · "The old lion, full of years and honour, takes his leave. Generations of Britons will count us fortunate who lived under his leadership. Today is the moment to salute him with pride and gratitude. But then the tomorrows, and the prospects of the succession, will be upon us . . ."

Daily Herald (Labour) : "He goes while at the peak of his form. His latest parliamentary performances have been better than his first But those who control the Conservative Party in peacetime have never shown unadulterated enthusiasm for him as Leader. Nor did he court their approval. It is not as a party politician, but as a national figure—one of the giants of world history—that Winston Churchill has earned his country's gratitude."

Financial Times (non-party) : "At the centre of Sir Winston's statesmanship seems to be his massive combination of tradition with progress, his sense both of the changes and of the continuities of history. It is this which has enabled him so often to prove more alert to modern needs than the critics who said that his views were obsolete."

Some of the principal provincial newspaper comment was as follows:

Manchester Guardian (Liberal) · "No man can ever give up being Prime Minister without a wrench : it takes a rare degree of will. But Sir Winston has been wiser than that other octogenarian, Gladstone, who hung on until he was in irritated conflict with his Cabinet and had bewildered his party Sir Winston has chosen his hour well He leaves with his party all set for an election and the Opposition in disarray. He leaves with all the personal honours that can come to a commoner and with the marked goodwill and friendship of his Queen. What a contrast was Queen Victoria's shabby treatment of the departing Gladstone ! . .

He has a part to fill as an elder statesman above the battle. There's no telling what fresh bursts of energy may come, what new phase of his incredible career may open up."

Yorkshire Post (Conservative) : "When the final appraisal has to be made, Churchill's greatness resides not in what he did, but in what he is Like all the great of this earth he has two aspects. He is great as a man and as a representative of his nation. He has the endurance, the will to conquer adverse fortune, of a Washington and a Lincoln (with the latter he also shares a rough humour and the tendency to seek relief in humour). He shares with Napoleon the sense that 40 centuries gaze on this transitory scene. He has the penetrating contempt for human pettiness of a Bismarck. Yet equally he could claim for himself the appellation (despite his mixed parentage) which Queen Elizabeth I claimed, of 'mere English.' That robustness, that disdain for superfluous detail, that contempt for routine, these are Shakespearean qualities . . ."

The Scotsman (non-party) . "The predominating emotion should rather be gratitude for his manifold services to the State, coupled with the hope that he will long enjoy the leisure earned by a life of phenomenal activity. He is one of those Olympian figures whose fame is so great that, whatever superlatives may be employed in his praise, they will still seem halting and inadequate . . ."

Sir Winston Churchill's resignation was a major topic in the world Press, and warm tributes, coupled with the hope that his wisdom and advice would continue to be available to the world, came from all parts of the globe. Some of the statements and messages are summarized below.

Australia. Mr. Menzies, the Prime Minister, said in Canberra on April 6 : "The simple fact about this world leader is that he is in the true sense a great man, and is, I believe, the greatest of our time. His is a genius which defies analysis. The splendour of his mind is so intermingled with a rich sense of fun, and a fun that is for simple things, that the total result is one of intense and intelligible humanity."

The Leader of the Opposition, Dr. Evatt, described Sir Winston as "the greatest wartime leader in Britain's history."

Canada. Mr St Laurent, the Prime Minister, declared in the Canadian House of Commons on April 5 · "We shall miss a leadership which for so many years—and especially in the anxious days of the war—has inspired and encouraged the people of the Commonwealth of Nations and, indeed, the whole free world."

New Zealand. The N Z Parliament passed a resolution on April 6 expressing deep appreciation of Sir Winston Churchill's services to the Commonwealth.

Mr. Holland, the Prime Minister, said in a personal tribute : "Though Sir Winston Churchill has retired as Prime Minister, British people all over the world will never allow him to retire from the special place in their affection and respect that he has won in a lifetime of service and achievement. Seldom in the field of human endeavour has one man meant so much to so many people."

The Leader of the Opposition, Mr Walter Nash, declared that Sir Winston would be " one of the great immortals of England "

South Africa. Mr. Strijdom, the Prime Minister, said on April 5 : " Sir Winston Churchill leaves the public scene at the zenith of his power and prestige, and as one of the most dynamic political figures that Europe has ever produced."

India. Mr Nehru, the Indian Premier, said on April 6 that Sir Winston had had " what might be called a tremendous life in many ways." and added · " I hope he will have a good rest now, but will continue to write and advise."

Ceylon. Sir John Kotelawala, the Prime Minister sent the following message to Sir Winston " This act of self-abnegation comes as a climax to the most brilliant and most versatile career of any man in the history of modern times. It might be said of you with truth that never in the history of democracy has so much been owed to one single man . . ."

Northern Ireland. Lord Brookeborough, the Prime Minister, stated on April 6 : " I think it is very sad and regrettable that a man with his great ability finds it necessary to resign In my opinion he is the greatest Englishman of any time His personality is unique and his leadership of the greatest "

U.S.A. President Eisenhower, in a message to Sir Winston, declared on April 5 · " Out of your great experience, your great wisdom, and your great courage, the free world yet has much to gain, and we know that you will never be backward in bringing those qualities forward when we appeal to you for help, as all of us are bound to do. We shall never accept the thought that we are to be denied your council, your advice "

France. M. Edgar Faure, the Prime Minister, told Sir Winston Churchill in a telegram that " France has not forgotten that you were a firm, vigilant, and faithful friend at her side in the dark hours of two wars," and on behalf of the French Government, " united unanimously around me," expressed their " sincerest admiration and warmest wishes." He added that the whole French people joined him in the " sincerest and most affectionate wish " that Sir Winston would continue to give unofficial guidance to British policy. M Mendès-France, the former Prime Minister, said : " Whatever the virile gruffness of his language on occasion, none of us forgot the affection he has always had for France."

Netherlands. Dr. Drees, the Prime Minister, said in a broadcast to the Netherlands people in the evening of April 5 " The resignation of Sir Winston Churchill as Prime Minister comes at a time when we are preparing to commemorate the liberation Churchill's name is closely bound up with this liberation. On the occasion of his 80th birthday I recalled already how he was the man who, by his indomitable spirit and his powerful and inspiring words, aroused and strengthened the spirit of determination in the British people at an historic moment when Britain stood almost alone against a totalitarian power of terrifying force . . At this moment of his resignation as Prime Minister, I am happy to express once again the special place Churchill has won in the hearts of our people by his fight for freedom, which is also our freedom."

Western Germany. The Federal Chancellor, Dr. Adenauer, in a statement on April 5, described Sir Winston Churchill as " the personification of the Western spirit in our day," and said : " It is one of Sir Winston's greatest services that the Western world now lives in freedom." Calling Sir Winston " a friend of Germany's," Dr Adenauer added " I am grateful to him that he offered friendship and counsel to me and stood by our side during the difficult hours of our young republic's history "

Sir Winston Churchill was first elected to Parliament in 1900. From 1900 to 1906 he was member for Oldham. He represented North-West Manchester from 1906 to 1908, and Dundee from 1908 to 1922. He re-entered the House in 1924 as member for Epping, and since 1945 he has sat for Woodford.

The following is a list of Sir Winston's offices :

Under-Secretary of State for the Colonies, 1906-09.
President of the Board of Trade, 1908-10.
Home Secretary, 1910-11
First Lord of the Admiralty, 1911-15.
Chancellor of the Duchy of Lancaster. 1915.
Minister of Munitions, 1917.
Secretary of State for War and Air, 1919-21.
Secretary of State for Air and the Colonies, February-April, 1921.
Secretary of State for the Colonies, 1921-23.
Chancellor of the Exchequer, 1924-29.
First Lord of the Admiralty, 1939-40.
Prime Minister. First Lord of the Treasury, and Minister of Defence, 1940-45.
Leader of the Opposition, 1945-51.
Prime Minister and First Lord of the Treasury, since October, 1951, and Minister of Defence from October, 1951 - February, 1952.

Eleven ministerial changes were announced by Sir Anthony Eden on April 7, three of them in the Cabinet, viz., the appointment of Mr. Harold Macmillan as Foreign Secretary, of Mr. Selwyn Lloyd as Minister of Defence, and of the Earl of Home as Secretary of State for Commonwealth Relations. All the other Cabinet members and Ministers were confirmed in their appointments.

With these changes the composition of the Cabinet was as follows :

Sir Anthony Eden ..	Prime Minister and First Lord of the Treasury.
Mr. Harold Macmillan ..	Foreign Secretary.
*The Marquess of Salisbury	Lord President of the Council.
*Viscount Kilmuir ..	Lord Chancellor.
*Viscount Woolton ..	Chancellor of the Duchy of Lancaster.
*Capt. H. F. C. Crookshank	Lord Privy Seal and Leader of the House of Commons.
Mr. Selwyn Lloyd ..	Minister of Defence.
The Earl of Home ..	Secretary of State for Commonwealth Relations.
*Mr. James Stuart ..	Secretary of State for Scotland.
*Mr. A. T. Lennox-Boyd ..	Secretary of State for the Colonies.
*Major Gwilym Lloyd-George	Secretary of State for the Home Department and Minister for Welsh Affairs.
*Mr. R. A. Butler .. .	Chancellor of the Exchequer.
*Sir Walter Monckton ..	Minister of Labour and National Service.
*Mr. Duncan Sandys ..	Minister of Housing and Local Government.
*Mr. Peter Thorneycroft ..	President of the Board of Trade.
*Mr. D. Heathcoat Amory	Minister of Agriculture, Fisheries, and Food.
*Mr. Osbert Peake ..	Minister of Pensions and National Insurance.
*Sir David Eccles	Minister of Education.

* No change.

The eight other appointments of Ministers not in the Cabinet were :

Mr. R. Maudling	Minister of Supply.
Dr. C. Hill . ..	Postmaster-General.
Cmdr. T. D. Galbraith ..	Minister of State, Scottish Office.
Sir Edward Boyle .	Economic Secretary, Treasury.
Mr. J. N. Browne ..	Parliamentary Under-Secretary, Scottish Office.
Mr. H. Nicholls .. .	Parliamentary Secretary, Ministry of Agriculture.
Mr. D. Kaberry	Parliamentary Secretary, Board of Trade.
Mr. F. J. Erroll	Parliamentary Secretary, Ministry of Supply.

Sir Anthony Eden (57), who has represented the Warwick and Leamington division in the House of Commons uninterruptedly since 1923, became Foreign Secretary in the Baldwin Government in 1935 at the age of 38, succeeding Sir Samuel Hoare (now Lord Templewood). He continued as Foreign Secretary in Mr. Neville Chamberlain's Government formed in 1937, but resigned on Feb. 20, 1938, because of his disagreement with Mr. Chamberlain's policy towards Mussolini and Hitler, which he—like Mr. Churchill (as he then was)—regarded as appeasement (see 2948 F). On the outbreak of war in 1939 he re-entered the Government as Dominions Secretary (see 3716 B), and when the Coalition Government under Mr Churchill was formed on May 10, 1940, he became Secretary for War (see 4045 A) On Dec. 23, 1940, he was again appointed Foreign Secretary in succession to Lord Halifax (who had succeeded him in 1938), and held the post throughout the war and in Mr. Churchill's " caretaker " Government pending the post-war election in 1945 During the war he visited Moscow in December 1941, when the Germans were almost in sight of the Russian capital, and later took part in all the important Allied wartime conferences at Quebec, Cairo, Moscow, Teheran, and Yalta, as well as in the first part of the Potsdam conference in 1945 On the Conservative electoral victory in 1951 he was appointed Foreign Secretary and Deputy Prime Minister in Mr. Churchill's Administration (see 11793 A).

Mr. Harold Macmillan (61), who succeeded Sir Anthony Eden as Foreign Secretary, had been Minister of Housing and Local Government since the formation of Sir Winston Churchill's Government in 1951, and had been mainly responsible for the success of the Government's house-building programme which aimed at reaching a target of 300,000 new houses a year, in October 1954 he had succeeded Field-Marshal Earl Alexander of Tunis as Minister of Defence.

Mr. Selwyn Lloyd, Q.C. (50), who took over the Defence portfolio formerly held by Mr. Macmillan, was Minister of State at the Foreign Office from 1951-54 and in this capacity led the British delegations at several sessions of the U.N. General Assembly ; he became Minister of Supply in October, 1954.

The Earl of Home (51), who became Secretary of State for Commonwealth Relations in succession to Lord Swinton, had been Minister of State, Scottish Office, since 1951. From 1937-39 he had been (as Lord Dunglass) Parliamentary Private Secretary to Mr. Neville Chamberlain, then Prime Minister, and in Mr. Churchill's " caretaker " Government prior to the 1945 elections he was Joint Parliamentary Under-Secretary at the Foreign Office.

Mr. Reginald Maudling (38), who succeeded Mr Selwyn Lloyd as Minister of Supply, has been M P. for Barnet since 1950 and Economic Secretary to the Treasury since 1953 ; in 1952 he was Parliamentary Private Secretary to the Minister of Civil Aviation.

Dr. Charles Hill (51), the new Postmaster-General in succession to Earl De La Warr, has been National Liberal-Unionist M.P. for Luton since 1950 and Parliamentary Secretary to the Ministry of Food since 1951. From 1944-50 he was Secretary of the British Medical Association, and became widely known as the "Radio Doctor."

Commander Thomas Dunlop Galbraith, R.N. (64), who succeeded the Earl of Home as Minister of State, Scottish Office, has represented the Pollok division of Glasgow since 1940, he has been Joint Parliamentary Under-Secretary for Scotland since 1951—a post which he also held in Sir Winston Churchill's "caretaker" Government in 1945.

Sir Edward Boyle (31), who became Economic Secretary to the Treasury in succession to Mr Maudling, has been M.P. for the Handsworth division of Birmingham since 1950, and Parliamentary Secretary at the Ministry of Supply since July 1954.

Mr. J. N. Browne (50), who succeeded Commander Galbraith as Parliamentary Under-Secretary, Scottish Office, has represented the Govan district of Glasgow since 1950, and since 1953 has been Parliamentary Private Secretary to the Secretary of State for Scotland.

Mr. Harmar Nicholls (42), who became Parliamentary Secretary, Ministry of Agriculture, has been M.P. for Peterborough since 1951, and was Parliamentary Private Secretary to the Postmaster-General: it was Mr Nicholls who, at the Conservative Party conference in 1950, demanded the target of 300,000 houses a year.

Mr. Donald Kaberry (47), who succeeded Mr. Henry Strauss as Parliamentary Secretary, Board of Trade, has been M.P. for North-West Leeds since 1950 and was appointed Conservative Assistant Whip in 1952.

Mr. F. J. Erroll (40), who succeeded Sir Edward Boyle as Parliamentary Secretary, Ministry of Supply, has represented the Altrincham and Sale division of Lancashire since 1945.

Ministers leaving the Government were Viscount Swinton (Secretary of State for Commonwealth Relations), Mr. Henry Strauss (Parliamentary Secretary, Board of Trade), and Earl De La Warr (Postmaster-General). It was announced on April 7 that an earldom had been conferred on Lord Swinton and a barony on Mr. Henry Strauss, and that Commander Galbraith had also been made a baron.

The changes reduced the average age of the Cabinet from 58 years 6 months to 55 years 8 months.

The Order transferring the functions of the Ministry of Food to the combined Ministry of Agriculture, Fisheries, and Food, thereby completing the merger of the two Ministries (see 13841 A), had been approved by the Privy Council on April 7 after approval by the House of Commons on March 28.

Sir Winston Churchill left No. 10, Downing Street on April 6 for his home at Chartwell, and on April 12 he and Lady Churchill flew to Sicily, where it had previously been announced they would spend a holiday at Syracuse.

In a letter to the chairman of the Conservative Party Association in his constituency of Woodford on April 6, Sir Winston explained the reasons for his resignation as Prime Minister and expressed his intention of remaining a member of the House of Commons and of standing again for Woodford at the next general election. The letter said:

"At a general election the head of the Government and Leader of the Party unfolds the policy for the new Parliament to which he is personally pledged. For some time past I have not felt that at my age it would be right for me to incur such new and indefinite responsibilities. It is necessary that my successor should enter upon his duties in reasonable time to present himself and his programme to the nation as and when he chooses. I have, therefore, tendered my resignation to the Queen. Her Majesty has invited Sir Anthony Eden to form a Government."

It had been announced in Bonn on March 11 that the Charlemagne Prize for 1955 had been awarded to Sir Winston Churchill for his outstanding service for European unity, and that Sir Winston had accepted an invitation to visit the city of Aachen (which founded the prize in 1949) to receive it.

(Manchester Guardian - Bath & Wilts Chronicle & Herald - Western Daily Press - Yorkshire Post - The Scotsman - The Listener - Australian News Bulletin - N.Z. Directorate of Information - The Statesman, Calcutta - New York Times - Le Monde, Paris - Netherlands News Agency) **(Prev. rep. 13982 C; 13841 A; 13712 A; 13248 B; 13125 A.)**

A. COMMUNIST CHINA. — State of War with Germany ended.

Peking Radio announced on April 8 that President Mao Tse-tung had issued a proclamation ending the state of war between China and Germany which had existed since Dec. 9, 1941. The proclamation, which implemented a resolution adopted on April 7 by the Standing Committee of the National People's Congress, declared that the termination of the state of war would not change Germany's internal obligations and would also not affect "the rights the People's Republic of China enjoys, and the commitments it undertakes, under international agreements relating to Germany."—(New York Times - New York Herald Tribune) **(Prev. rep. 14111 B.)**

B. GOLD - SILVER. —World Production and Consumption Figures in 1954.

The following estimates of gold production in the leading producing countries in 1954 (in thousands of fine oz.) were published in the Annual Bullion Review issued by Samuel Montagu and Company, from figures compiled by the Union Corporation Ltd. Revised estimates for 1953 are shown in parentheses.

South Africa	13,235*	(11,940)	Peru	130*	(130)
Canada	4,310*	(4,069)	New Guinea .	85*	(121)
Soviet Union	2,000*	(2,000)*	Fiji . ..	75*	(77)

* Estimated or provisional figure.

The official gold price in London stood at 248s. per fine oz. when the year opened, but on March 22, on the reopening of the London Gold Market (see 13483 A), the price was fixed at 248s. 6d. per fine oz. Thereafter it rose gradually to 249s. 1d. in April and May, dropped to 249s. in June, but advanced again to 249s. 1½d. in July and to 250s. in August, the upward trend persisting (apart from a slight drop in October) until at the close of the year the figure stood at 251s. 7½d.

Gold quoted in Continental centres at the beginning of the year stood at $35.20-$35.30, but pressure from Russian sales forced prices down until, on the reopening of the London Market, the figure stood at $35.00 per oz.; it then fluctuated between $34.95 and $35.15 in May, but steadied in June to between $35.06 and $35.11. There was little movement in the price until the end of September, and during the final quarter of the year it ranged from $35.07 to $35.10 in October, $35.04½ to $35.09 in November, and $35.03½ to $35.06½ in December.

About 5,000,000 fine oz. were estimated to have been absorbed by the free gold markets, compared with 7,500,000 fine oz. in 1953.

Details regarding the world silver market in 1954 were given as follows:

Silver Production. Estimates, with revised 1953 figures in parentheses, were as follows (in fine oz.): Mexico, 47,000,000 (47,900,000); U.S.A., 37,000,000 (37,000,000); Central and South America, 34,000,000 (34,000,000); Canada, 31,000,000 (28,300,000); Australia, 12,000,000 (12,500,000). Total production in the Western Hemisphere (excluding Australia) was thus estimated at 149,000,000 oz., compared with a revised output of 147,900,000 oz in 1953. After adding the Australian output, plus 7,000,000 oz. produced in Japan and 5,000,000 oz. in the Belgian Congo, and allowing for a production of 41,000,000 oz. in other countries for which accurate figures were not available, world output (excluding the Soviet Union) was tentatively estimated at about 214,000,000 oz. On the assumption that the total U.S. production was taken up by the U.S. Treasury, a balance of 177,000,000 oz. remained available for general consumption.

Silver Consumption. Estimates of consumption in arts and industries in some of the principal countries were: 85,000,000 oz. in the U.S.A. (a fall of 20,000,000 oz.), 24,000,000 oz. in Western Germany (an increase of 6,500,000 oz.), and 12,000,000 oz. in Britain. With the addition of other countries, total industrial consumption of silver was estimated at 152,000,000 oz.

The off-take for coinage purposes was estimated at about 67,000,000 oz., of which the U.S.A. accounted for 54,000,000 oz. Consumption for industry and coinage together thus amounted to 219,000,000 oz., this figure exceeding the available new production by about 5,000,000 oz.

British Bar Silver Imports and Exports were estimated at 23,119,900 troy oz. and 12,049,200 troy oz respectively. The largest imports came from the Soviet Union (9,098,400 oz.), Australia (7,167,000 oz.), the U.S.A. (1,954,600 oz.), Japan (1,766,600 oz.), and Canada (1,105,300 oz.). The largest exports went to France (3,034,000 oz.), Italy (2,820,600 oz.), and Sweden (1,684,400 oz.)

Silver Price. The official London price opened at 73⅞d. and in March stood at 73⅝d., falling gradually to 72½d. in May. After a temporary recovery to 73¼d. in June, the price again declined and on July 21 touched the lowest figure for the year at 72d.; it improved, however, to 73⅛d. in August, though dropping again to 73d. at the beginning of September. Thereafter prices rose, reaching 74⅛d. on Oct. 15, but receded slightly to 74¼d. in November, at which level they remained until the end of the year.

The figures for Lend-Lease silver remained the same as at the end of 1953, except for a repayment in August of 11,000,000 oz. of the 57,000,000 oz. borrowed by the Netherlands, which brought the total amount outstanding down to about 399,553,000 oz. (Samuel Montagu & Co.'s Annual Bullion Review)

(Prev. rep. 1953 Statistics, 13470 A; S.A. Production, 14088 C; Reopening of London Gold Market, 13483 A.)

A. JAPAN. — General Elections. - New Cabinet formed by Mr. Hatoyama.

General elections were held in Japan on Feb. 27, and resulted in heavy gains for the Democrats and Socialists at the expense of the Liberals. The Democrats, however, although becoming the largest party, failed to obtain a majority in the new House of Representatives, whilst the Democrats and Liberals together failed to secure the two-thirds majority which they would have needed to carry out their proposals for the revision of the Constitution (see below). The distribution of seats and votes between the various parties, as compared with the number of seats which they held before the dissolution and the number of votes received in the 1953 elections, are shown below.

	Seats	
	New House	Old House*
Democrats	185	124
Liberals	112	180
Left-wing Socialists	89	74
Right-wing Socialists	67	61
Labour-Farmer Party	4	5
Communists	2	1
Others	8	11

	Votes	
	1955	1953
Democrats	13,536,038	9,240,920†
Liberals	9,849,453	13,476,428
Left-wing Socialists	5,683,308	4,516,715
Right-wing Socialists	5,129,593	4,677,833
Labour-Farmer Party	357,611	358,773
Communists	733,121	655,990
Others	1,725,695	1,675,786

* At time of dissolution, with 11 seats vacant. † Votes cast for dissident Liberals led by Mr. Hatoyama and Progressives.

The Democrats thus received 36 57 per cent of the total vote against 26.7 per cent cast in the previous elections for the then dissident Liberals under Mr Hatoyama and the Progressives, Mr. Hatoyama himself received 149,000 votes in a Tokio constituency, the highest vote ever given to a single candidate in a Japanese election. The Liberals' polling percentage fell from 39 per cent to 26.61 per cent; the Left-wing Socialists increased theirs from 13.1 per cent to 15.35 per cent; and the Right-wing Socialists showed a slight increase from 13.5 per cent to 13 86 per cent The Communist vote remained practically stationary at under two per cent of the total poll (1 98 per cent now, against 1 9 per cent in 1953), whereas the Labour-Farmers' percentage fell from 1 0 per cent to 0.97 per cent Other candidates, including Independents, received 4.66 per cent of the vote, against 4.8 per cent in 1953.

The total poll was 37,338,182, or 75 per cent of the electorate of 49,235,242; this compared with polls of 74 2 and 76.43 per cent respectively in the 1953 and 1952 elections

The main issue before the electorate was the Government's proposal for the revision of the Constitution in order to allow Japan to rearm, which was supported by the Liberals but opposed by the four Left-wing parties which form the so-called "renovationist camp" (the Left- and Right-wing Socialists, the Labour-Farmers, and the Communists). In order to reduce contests between the Left-wing parties and to strengthen their chances of gaining sufficient seats to prevent constitutional revision (i.e. over one-third of the total membership of the House), the Communists had withdrawn 39 of their 99 candidates on the eve of the election. All parties agreed in advocating the resumption of normal relations and the development of trade with the Soviet Union and Communist China; the Right-wing parties, however, stressed that this should be achieved without departing from the basic principle of co-operation with the Western Powers.

The heavy losses suffered by the Liberals were interpreted as an indication of a widespread desire that the country should pursue a more independent policy than that of Mr. Yoshida's Government, which had been attacked as being too closely tied to the U.S.A., and as an expression of Japanese determination, ten years after the end of the war, to develop their own internal, foreign, and economic policies, independent of external influence. The advance of the Socialists, especially the Left-wing group (which received about 1,160,000 more votes than in the previous election), was attributed essentially to the support given to them by a majority of the 2,140,000 new voters who, having come of age, exercised the franchise for the first time; it was estimated in the Japanese Press that more than 45 per cent of these new voters alone had cast their vote for the Left-wing Socialists. Thus, the four Left-wing parties together secured for the first time more than one-third of the total number of seats.

A feature of the elections was the unprecedented number of violations of the electoral law and of alleged cases of corruption; this was attributed in part to the strictness of the law as revised by the previous Diet, which, for example, prohibited candidates from using loudspeakers in the streets The Public Prosecutor's office stated on March 2 that candidates had distributed over 3,000,000,000 yen (£3,000,000) to buy votes, and that at least 30 candidates would be prosecuted

Mr. Hatoyama was elected Prime Minister by the Diet on March 18 by 254 votes to 160, with Liberal support, and on the following day announced the membership of his new Government, in which all the more important posts were held by the same Ministers as in his previous Cabinet (see 14005 A). The new appointments were as follows. Mr. Takao Nishida (Labour), Mr. Kenzo Matsumura (Education), Mr. Hideji Kawasaki (Welfare), Mr. Takechiyo Matsuda (Posts), Mr. Arata Sugihara (Minister of State for Defence), Mr. Shojiro Kawashima (Minister of State for Local Government), and Mr. Tomejiro Okubo (joint Minister of State for Police with Mr. Oasa).—(Japanese Embassy Information Bulletin, London - Times - New York Times - New York Herald Tribune)

(Prev. rep. 14005 A.)

Note. Art. 96 of the Japanese Constitution of 1947 lays down that "Amendments to this Constitution shall be initiated by Parliament, through a concurring vote of two-thirds or more of the members of each House, and shall thereupon be submitted to the people for ratification, which shall require the affirmative vote of a majority of all votes cast thereon at a special referendum or at such election as Parliament shall specify. ."

(Japanese Embassy Information Bulletin, London)

B. INDIA. — Defence. - New Designation for Heads of Armed Services. - Principles of Defence Policy. - New Chief of Naval Staff. - Number of British Officers in Indian Armed Forces.

Mr. Nehru, the Indian Prime Minister, announced during a debate in the House of the People on March 25 that the heads of the Army, Navy, and Air Force would in future be known as Chiefs of Staff instead of by their present designation of Chiefs of Staff and Commanders-in-Chief.

He explained that the change did not signify any lessening of the commanders' authority or status but was made because the designation of commander-in-chief was "slightly incongruous in a democratic set-up" and not quite in keeping with the provisions of the Constitution. Later in the debate he stated that the Government was considering the question of setting up defence councils for each of the three services on the lines of the British Army and Air Force Councils and the Board of Admiralty, which would perform the functions of a commander-in-chief After expressing high appreciation of the help given by British officers in developing the defence services, particularly the Navy and Air Force, Mr. Nehru announced that the present Chief of Naval Staff would shortly retire and would be succeeded by an officer of the Royal Navy, who would be the last British officer to hold that office and would then be succeeded by an Indian.

During the debate Mr. Nehru also outlined the three basic considerations governing India's defence policy as follows: (i) since it was purely defensive she was not concerned with long-distance striking power, but only with regional defence; (ii) she had neither the capacity nor the intention to develop atomic weapons, but would rely only on the conventional type; and (iii) she would prefer slightly inferior indigenously produced weapons to others for which she would have to depend on foreign countries.

In a parliamentary reply in the House of the People on April 5 it was stated that there were now only 14 British officers in the Indian Army against 410 in February 1948, 33 British naval officers and Admiralty civilians in the Indian Navy as against 120 in July 1949, and three British technical Service officers and 22 civilian instructors in the Indian Air Force, compared with 20 Service officers and 38 civilians in December 1949.

On April 2 it was announced that Vice-Admiral S. H. Carlill had been appointed Chief of Naval Staff in succession to Admiral Pizey, who would relinquish his office in July. Vice-Admiral Carlill, whose services will be lent by the British Government, is at present Flag Officer of the Home Fleet Training Squadron in the Royal Navy, and up to 1954 was Senior Naval Member of the directing staff of the Imperial Defence College.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London)

(Prev. rep. 14050 B; 13358 B; 11298 B.)

C. INDONESIA. — Netherlands Investments.

A memorandum published by the Indonesian Government in January in connexion with the dissolution of the Netherlands-Indonesian Union gave the following estimates of Dutch investments in Indonesia (in millions of rupiahs): Sugar estates and factories, 400; Rubber estates, 450; Other estates, 350; Banks, 274; Tin mines, 10; Oil wells, 500; Shipping, 100; Trams and railways, 150; Industries, 50; Other investments, 250. Total 2,534.

(Indonesian Embassy, London) **(Prev. rep. 13759 A.)**

A. UNITED KINGDOM. — Revenue and Expenditure Returns, 1954-55. - The Floating Debt.

Exchequer returns for the financial year 1954-55, published on April 1, showed an Ordinary Budget surplus (after charging sinking funds of £36,067,202) of £433,166,594; this compared with a surplus of £10,476,000 estimated by Mr. Butler in his Budget speech. Net capital expenditure" below the line" (i.e., excluded from the Ordinary Budget) amounted to £500,646,000, as against Mr. Butler's estimate of £407,000,000, so that there was an " overall " deficit of £67,479,406, instead of the estimated £396,524,000.

The following table gives the actual returns for the year, the 1954-55 Budget estimates, and the returns for the year 1953-54 :

	Revenue £	Expenditure £
1954-55 Actual*	4,737,892,404	4,304,725,810†
Budget Estimate ..	4,532,875,000	4,522,399,000‡
1953-54 Actual§	4,368,129,723	4,274,492,051‖

* Excluding self-balancing revenue and expenditure amounting to £248,786,000, i.e., £243,600,000 for the Post Office and £5,186,000 for income-tax deducted from post-war refunds of excess profits tax. † Including sinking funds of £36,067,202. ‡ This was subsequently increased to £4,558,202,000 by Supplementary Estimates totalling £42,663,000, less £6,860,000 for additional Post Office expenditure which was transferred to self-balancing expenditure. § Excluding self-balancing revenue and expenditure, amounting to £232,000,000 for the Post Office and £5,940,000 for income-tax deducted from post-war refunds of excess profits tax. ‖ Including sinking funds of £35,624,765.

Details of the various revenue items were as follows :

	Year ending March 31, 1955 £	Year ending March 31, 1954 £	Increase (+) or Decrease (−) £
Income-tax ..	1,892,965,000	1,730,991,000	+161,974,000
Surtax	134,700,000	132,400,000	+ 2,300,000
Death Duties ..	187,900,000	164,500,000	+ 23,400,000
Stamps	75,100,000	56,600,000	+ 18,500,000
Profits Tax and Excess Profits Tax ..	172,800,000	188,400,000	− 15,600,000
Excess Profits Levy.	76,500,000	65,850,000	+ 10,650,000
Other Inland Revenue Duties . .	1,280,000	1,390,000	− 110,000
Customs	1,100,049,000	1,042,396,000	+ 57,653,000
Excise	771,637,000	721,975,000	+ 49,662,000
Motor Vehicle Duties	78,980,000	73,115,000	+ 5,865,000
Post Office (net) ..	5,100,000	—	+ 5,100,000
Broadcast Receiving Licences .. .	22,300,000	16,400,000	+ 5,900,000
Sundry Loans .	23,023,559	38,013,936	− 14,990,377
Miscellaneous ..	195,557,845	136,098,787	+ 59,459,058
Total Ord. Revenue .	4,737,892,404	4,368,129,723	+369.762,681

All Inland Revenue items exceeded the Budget estimates, Income-tax by nearly £93,000,000, Surtax by £2.700,000, Death Duties by £23,500,000, Stamps by over £20,000,000, Profits Tax and Excess Profits Tax by £800,000, Excess Profits Levy by £16,500,000, and other Revenue Duties by £280,000. Customs receipts were over £37,500,000 higher and Excise receipts over £52,600,000, the two items together thus yielding over £90,000,000 more than budgeted last year. Small increases over the estimates were shown by Motor Vehicle Duties (nearly £2,000,000) and Broadcast Licences (£1,300,000), whilst Sundry Loan receipts fell below the estimate by nearly £1,000,000 and Miscellaneous Revenue by nearly £50,000,000. The Post Office receipts of over £5,000,000 compared with an estimate of nil.

The following table shows Ordinary Expenditure :

	Year ending March 31, 1955 £	Year ending March 31, 1954 £
Interest and Management of National Debt.	569,722,542	579,759,765
Sinking Funds	36,067,202	35,624,765
Payments to Northern Ireland Exchequer	50,190.807	50,064,350
Other Consolidated Fund Services .	8,812,259	9,324,171
Total Supply Services (excluding Self-balancing)	3,639,933 000	3,599,719,000
Total Ordinary Expenditure .	4 304,725,810	4,274,492,051

Total Ordinary expenditure (excluding self-balancing items) was £217,673,190 less than the original Budget estimate, and £253,476,190 less than the revised estimate of £4,558.202,000 The shortfall in expenditure was due largely to the cost of defence (excluding American Aid receipts) being £142,854,000 less than estimated, i.e., £1,497 050,000 against an estimated £1,639,904.000 ; the net defence expenditure after appropriation of U.S. Aid was £1,435,900,000, against an estimate of £1,554,544,000. On Civil Votes actual expenditure also kept below the estimate, viz., £2,157,741,000, against an estimated £2,289,549,000.

Net expenditure " below the line " (i.e., capital expenditure) of £500,646,000 exceeded the estimate of £407,000,000 by over £93,000,000. This was mainly due to higher outgoings on loans to Local Authorities, which amounted to £328,088,000 net as compared with the estimate of £275,000,000 net; to Post Office capital expenditure of £45,100,000, compared with an estimate of nil; to higher loans to the National Coal Board at £67,284,000 net, compared with an estimated £54,000,000 net; and to compensation payments under the Town and Country Planning Acts of £7,900,000, against an estimate of nil. These higher outgoings were only partly compensated for by lower capital expenditure on other items, as compared with the amounts originally estimated. The principal other capital payments were war damage payments (£30,175,000), loans for New Towns development (£29,615,000 net), post-war credits (£23,850,000), E.P.T. refunds (£6,338,000), loans to the Colonial Development Corporation (£3,950,000 net), housing expenditure for the armed forces (£1,060,000), and loans to the Northern Ireland Exchequer (£1,040,000 net). Loans to the National Film Finance Corporation amounted to £184.000 net, loans to the Independent Television Authority to £55,000, and payments for the development of inventions to £300,000. Export guarantees increased by £1,460,000 net. On the revenue side, net repayments by the Raw Cotton Commission totalled £25,173,000, and net receipts from various Housing Acts £18,963,000. Repayments under the Anglo-Turkish armaments credit amounted to £1,064,000, and those from the Overseas Food Corporation to £553,000.

Details of the floating debt are shown below :

	March 31, 1955 £	March 31, 1954 £
Ways and Means Advances Outstanding .		
Advances by Bank of England	—	—
Advances by Public Departments	315,210,000	327,945 000
Treasury Bills Outstanding . ..	4,931,390,000*	4,491 420,000
Total Floating Debt Outstanding	5,246,600,000	4,819,365,000

* Includes £225,000, the proceeds of which were not carried to the Exchequer within the period of the Account.

The floating debt thus showed a net increase over the year of £427,235,000.—(Treasury Press Office - Manchester Guardian) **(Prev. rep. Revenue and Expenditure, 1953-54, 13553 A; 1954-55 Budget, 13497 A; 13557 A; National Debt, 13982 A.)**

B. TANGANYIKA. — Tanganyika Agricultural Corporation set up.

The Tanganyika Agricultural Corporation, formed to continue the work of the Overseas Food Corporation, came into being on March 30.

The new Corporation will work in the areas taken over from the O.F.C., for which purpose it will be financed by a Colonial Development and Welfare grant from the British Government. It was stated that it would also be invited by the Tanganyika Government to assist in carrying on the Rufiji basin reconnaissance survey now in progress under the aegis of the U N. Food and Agriculture Organization, and, in particular would be asked to establish the trial farms planned as part of that investigation

Mr. S. Gillet, formerly chairman of the O.F.C., was appointed chairman of the new Corporation, the board of which will also include Mr. A. E. Trotman, member for Agriculture and Natural Resources in the Tanganyika Government.
(New Commonwealth - Times) **(Prev. rep. 14055 B; 13561 B.)**

C. PERSIA. — Revaluation of the Rial.

The Persian Government revalued the rial on Feb. 6, raising the National Bank's commercial buying rate from 82 rials to 75 rials to the dollar, though the official rate remained unchanged at 89.4 rials. It was stated, however, that until an accumulation of foreign exchange had been sold, the National Bank would, as a temporary measure, sell foreign exchange to Persians half at 76.5 rials and half at 82.5 rials to the dollar. For sterling, the bank's new commercial buying rate was 210 rials, and the commercial selling rate 222.6 rials. The commercial buying rates for the rial had earlier (Aug. 9, 1954) been reduced from 93 rials to 82 rials for the dollar, and from 253 to 229.6 for the pound sterling.—(Times-Financial Times) **(Prev. rep. 11582 F.)**

D. SOUTH AFRICA. — Immigration.

The Minister of the Interior, Dr. Donges, announced on Feb. 25 that during 1954 the number of immigrants entering South Africa was 14,313, and the number of South African citizens leaving the country 9,641—giving a net gain of 4,672. Countries of origin of the immigrants, with 1953 figures in parentheses, included the following. Britain, 4,090 (5,361); Netherlands, 2,874 (3,503); and Germany, 1,861 (2,889).
(Cape Times - Cape Argus) **(Prev. rep. 12988 B.)**

A. EGYPT. — Trials of Members of Alleged Zionist Spy Ring, Moslem Brotherhood, and Democratic Movement for National Liberation.

The trial of 11 Jews, whose arrest had been announced on Oct. 6, 1954, on charges of espionage on behalf of Israel and acts of arson and sabotage, opened before a military court in Cairo on Dec. 11, 1954. The indictment alleged that the accused were members of a Zionist spy ring, which between 1951 and 1954 had supplied Israeli agents with military secrets; had prepared to maintain contact with Israel by radio in the event of war; had attempted to set fire to, or blow up, U.S. information offices, cinemas, and other public buildings in Cairo and Alexandria; and had collected and disseminated news calculated to create "a state of disturbance and public unrest endangering the State of Egypt."

The accused, all of whom pleaded "not guilty," were Max Bennett (37), a German citizen said to be the acting leader of the group; Dr. Moussa Marzouk (28), a surgeon of Tunisian origin and French nationality, said to be the leader of the organization in Cairo; Samuel Azar (26), a teacher, said to be its leader in Alexandria; Mlle. Victorine Nino, who was alleged to have acted as a link between the two branches; and Victor Levy, Philip Natanson, Robert Dassa, Mayer Zaafran, Mayer Muhass, Caesar Cohen, and Jacob Naim, most of these accused being young commercial employees. Two other Jews, Abraham Dar *alias* John Darling, said to be an officer in the Israeli Army, and Paul Frank, were tried *in absentia*. While the trial was in progress Bennett was found dead in his cell on Dec. 21; the police stated that he had committed suicide.

Evidence was given for the prosecution that Levy and Natanson had been arrested as a result of information received that they had purchased cases for the transport of explosives; that Natanson had implicated Dr. Marzouk; and that further inquiries had revealed that Dassa had been commissioned to set fire to Cairo theatres, and that Azar had acted as radio operator for the group. Mlle. Nino stated in evidence that she had been introduced to members of the group by Darling and had received money from him, knowing that he worked in the interests of Israel; she denied however, that she had admitted during her interrogation that the organization had collected military information, claiming that she had been tortured by the police to extract a confession. Levy, who together with Azar, Natanson and Dassa confessed to having set fire to the U.S. information centre and a post office in Alexandria, stated that this had been done as part of a plan to disturb relations between Egypt and the U.S.A., and that he had been trained as a radio operator during a visit to Israel in 1952. Counsel for the defence pleaded that the accusation of espionage for a foreign State was untenable, as Egypt did not recognize Israel as a State, and appealed for clemency on the ground of the defendants' youth.

The verdict and sentences were announced on Jan. 27, 1955—over three weeks after the conclusion of the trial on Jan. 5—when they had already been reviewed and confirmed by the Prime Minister, Colonel Nasser. All the accused, except Cohen and Naim, were found guilty and Dr. Marzouk and Samuel Azar were sentenced to death by hanging, Levy and Natanson to life imprisonment, Mlle. Nino and Dassa to 15 years' hard labour, and Zafraan and Muhass to seven years'. Despite appeals for clemency by the Israeli and French Governments, as well as by the World Jewish Congress and a number of non-Jewish organizations, the two death sentences were carried out on Jan. 31.

In Israel, where anti-Egyptian protest demonstrations took place throughout the country, the Prime Minister, Mr. Sharett, in a statement in the *Knesset* on Jan. 31, expressed his Government's "contempt and horror at the heartless rejection by the rulers of Egypt of the urgent representations made to them," and accused the Egyptian Government of carrying out the executions in order to "strengthen its position against its rivals at home and abroad by spilling Jewish blood." As a sign of mourning the *Knesset* then adjourned for a brief period. M. Edgar Faure, then the French Foreign Minister, told the Egyptian Ambassador in Paris on the same day that the executions, which had been carried out "in spite of repeated moves by the French authorities in Paris and Cairo to obtain a measure of clemency," had aroused strong feeling in France.

A statement on "Zionist espionage in Egypt," issued by the Egyptian Ministry of National Guidance on Jan 31, which included reproductions of alleged confessions by members of the group, claimed that the Jewish population in Egypt had received considerate treatment, even during the war with Israel, and declared that in spite of the "almost daily infringements of the armistice by the Israeli Government," and the "acts of espionage and sabotage committed by hundreds of Zionist agents throughout the Arab world," Egypt would "continue to treat non-Zionists with kindness and the respect due to every citizen."

Seven more Jews, five of them (one a woman) French citizens, who had been arrested on Oct. 4 on charges of "Communist and Zionist" espionage and attempts to overthrow the regime, were brought to trial before a military court on Feb. 26, 1955. The indictment alleged that the leaders of the group, Henri Cohen and Joseph Osmo, were the directors of the pro-Communist Democratic Movement for National Liberation; that all the accused had carried on propaganda urging the forcible overthrow of the Government; and that they had supplied information to the Soviet Union and Israel through a centre in Paris. The trial, which was held *in camera*, ended on March 22, when Cohen and Osmo were sentenced to eight years' hard labour and a third defendant (Nissim Nahmias) to three years' imprisonment; the four other defendants were acquitted.

Previously, another 36 members of the Democratic Movement for National Liberation, including lawyers, engineers, and students, who had been arrested in May, 1954, had been sentenced on Dec. 30 to terms of imprisonment ranging from five years' to life imprisonment. The court also ordered the dissolution of the Movement.

Mass trials of members of the Moslem Brotherhood accused of conspiracy and terrorism continued throughout December and the first three weeks of January, 15 men being sentenced to death between Dec. 14 and Jan. 19, and over 300 to terms of imprisonment ranging from five years' to imprisonment for life. Among those condemned to death were Mohammed Mustafa, head of the Brotherhood's secret organization in Alexandria; Ahmed Hassanein, leader of the organization in the provinces; Major Shadi, organizer of the Brotherhood's cells in the police force; Mohammed Nosseiry, a lawyer, who confessed that he had been ordered to assassinate Colonel Nasser if the attempt on his life on Oct. 26 failed; and Colonels Abdel Raouf and Abou Hay, leaders of the secret organization in the armed forces, both of whom were tried *in absentia*. All the death sentences were, however, subsequently commuted by the Revolutionary Council to life imprisonment. (Times - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. Political Trials, 13929 A.)**

B. TURKEY. — President Bayar's Official State Visit to Pakistan and Iraq.

President Bayar, accompanied by Madame Bayar, paid a State visit to Pakistan on Feb. 18-28. Arriving at Karachi on board the Presidential yacht *Savarona*, he was greeted by the Governor-General of Pakistan (Mr. Ghulam Mohammad), the Prime Minister (Mr. Mohammed Ali), and other Ministers and high officials. After attending a number of official functions during his two-day stay in the Pakistani capital, President Bayar visited Peshawar on Feb. 21-22 (receiving an honorary degree of Doctor of Law from Peshawar University) and Lahore on Feb. 25-26, and on Feb. 27 saw the Kotri barrage before returning to Karachi. On Feb. 28 he received the freedom of the City of Karachi and later the same day embarked again on the *Savarona*.

On March 4 President Bayar arrived at Basra and from there travelled to Baghdad for a State visit to Iraq. During his six-day stay he dined with King Faisal and had a series of discussions with General Nuri es-Said (the Prime Minister) and other Iraqi Ministers. The President and Madame Bayar returned to Ankara on March 10.—(Turkish Embassy Press Office, London - Pakistan High Commissioner's Office, London) **(Prev. rep. 14105 A.)**

C. SOUTH AFRICA. — Withdrawal from Unesco.

Mr. Louw, the South African Minister for External Affairs, announced in the Union Parliament in Cape Town on April 5 that the Government had decided to withdraw from the United Nations Educational, Scientific, and Cultural Organization. This decision, he said, had been taken because of the "general criticism of the activities of UNESCO as revealed at the Montevideo session, and also its interference in South Africa's racial problems by means of UNESCO publications." Mr. Louw added that the £26,000 ($72,800), which South Africa contributed annually to UNESCO, would this year be used to enable the State Information Office to disseminate information abroad about South Africa.

It was pointed out at UNESCO headquarters in Paris that under the Organization's statutes South Africa's withdrawal could not become effective until the end of 1956.—(Cape Times - Cape Argus - Le Monde, Paris) **(Prev. rep. Unesco, 14084 A; S.A. and U.N., 13993 A.)**

D. UNITED KINGDOM. — Post-war Credits.

The Financial Secretary to the Treasury, Mr. Henry Brooke, announced on March 24 that it was estimated that the amount of post-war credits outstanding on March 31, 1955, would be £540,000,000, of which £78,000,000 would relate to holders aged 60 or over, and £187,000,000 to holders aged between 50 and 60 years.—(Manchester Guardian) **(Prev. rep. 13557 A.)**

A. BRITISH WEST INDIES. — Federation Scheme. - Adoption by Remaining Islands. - Preparatory Steps for Implementation. - Leeward Islands Federation to be dissolved. - New Constitutions for Smaller West Indian Islands. - Introduction of Ministerial System.

Mr. Lennox-Boyd, the Colonial Secretary, announced in the House of Commons on Feb. 2 that the plans for a British Caribbean Federation had now been adopted by the Governments of all the territories concerned, and that H.M. Government therefore proposed to press on with the next measures towards their implementation, as follows:

(*a*) Sir Stephen Luke, the Comptroller for Development and Welfare in the West Indies, was being designated Commissioner for the Preparation of the Federal Organization.

(*b*) Three commissions would be appointed to work out respectively the fiscal, civil service, and judicial arrangements for the federation with the minimum delay; these commissions would work in close touch with the Territorial Governments and would also seek the advice of regional bodies such as the Regional Economic Committee.

(*c*) In accordance with a West Indian suggestion, H.M. Government would call an early conference of representatives of the West Indian Governments to consider the question of freedom of personal movement within the proposed federation.

A final plan, Mr. Lennox-Boyd explained, taking into account the results of the work of the three commissions, the Commissioner for the Preparation of the Federal Organization, and the conference on inter-territorial movement, would eventually be drawn up. Meanwhile, to save time at a later stage, as much work as possible would be done on the constitutional instruments, which would provide for additions to the federation should other territories wish to join later. The plan would then be laid before a final West Indian conference, to which the West Indian Governments would be asked to send plenipotentiary delegates, and when agreement had been reached by the conference the Colonial Secretary would ask Parliament to pass the necessary legislation.

In reply to supplementary questions, Mr Lennox-Boyd emphasized that, although for the moment British Guiana had rejected proposals for joining the federation, the way would be open for her, British Honduras, and other territories to join it later.

The federation proposals had been adopted by the Dominica Legislative Council on Nov 25, 1954, and by the Trinidad Legislative Assembly (by 15 votes to 6) on Dec. 11, acceptance by Trinidad being conditional (*a*) on the holding of an inter-colonial conference on migration (see above) and (*b*) on the leaving of the final choice of the site of the Federal capital to the future Federal Government; the East Indian members of the Trinidad Legislative Assembly either voted against federation or abstained. The last West Indian legislature to approve the proposals was the Legislative Council of Montserrat, at the end of January, 1955.

The inter-colonial migration conference referred to by Mr. Lennox-Boyd took place at Port of Spain (Trinidad) on March 14-17, under the chairmanship of Lord Lloyd (Colonial Under-Secretary), assisted by Sir Stephen Luke The conference's report was signed on March 17 by all delegates except Mr Grantley Adams, the Premier of Barbados, who had left earlier for talks with the British Government in London, but had agreed to sign on his return home. The report recommended:

(1) That it should be clearly stated in the preamble to the Federal Constitution that the greatest possible freedom of movement for persons and goods within the Federation was one of the objects of federation.

(2) That the control of the movement of persons between the various units should be placed on the "concurrent legislative list" (covering matters on which both the federal legislature and the units' legislatures might legislate, with federal law prevailing—see 10629 A).

(3) That any unit legislation on migration control on grounds other than health or security, which was still in force after five years of federation, should then require the approval of both Houses of the Federal Legislature for its continuance in force.

Earlier, on Dec. 21, 1954, Mr. Lennox-Boyd had announced in a written parliamentary reply that legislation would shortly be introduced to abolish the Federation of the Leeward Islands, and that the four Presidencies of the Federation—Antigua, St. Christopher-Nevis and Anguilla, Montserrat, and the Virgin Islands—would then be administered as separate Colonies directly under the Colonial Office. On Dec. 29 it was announced that he had approved in principle proposals for new constitutions, including ministerial systems, in the Presidencies of Antigua, and St. Christopher-Nevis and Anguilla (Leeward Islands), and in the Colonies of Grenada, St. Lucia, and St. Vincent (Windward Islands). He had also agreed that the proposals should be applied to Dominica when a request for this had been made, provided that the circumstances obtaining at the time were favourable; in any case he would review the matter towards the end of the life of the present Legislature.

The proposals followed the lines of the constitutions already in force in Barbados, Trinidad, and Jamaica Accordingly the Executive Councils would be recognized as "the principal instruments of policy" and the Governor or Administrator would normally accept the Council's advice unless he deemed it expedient to do otherwise "in the interest of public faith, public order, or good government." Each Executive Council would include, as at present, the Governor or Administrator (who would preside), the Crown Attorney, the Financial Secretary, one member of the Legislative Council nominated by the Governor, and four other members of that Council elected by the unofficial members The Governor or Administrator, as president, would have a casting vote only, and elected members would thus have a voting majority on the Executive Council There would also be three Ministers, all appointed by the Governor-in-Council; a Minister would cease to hold office if by a majority, the Legislative Council recommended his removal, and if he were an elected member of the Executive Council, he would cease to be a member of that body as well. In addition, the Governor-in-Council would be empowered to remove a Minister from office and from the Executive Council

The Colonial Secretary approved the proposals on the following conditions (amongst others). (*a*) that full responsibility for financial matters should remain with the Governor through the Financial Secretary, (*b*) that the appointment, retirement, dismissal, and promotion of civil servants should be the sole responsibility of the Administrator or Governor; (*c*) that the Governor's reserve legislative powers should be retained, and (*d*) that legislation should be passed empowering the Governor to make any emergency regulations which he deemed necessary to maintain public safety and order, or to provide and maintain supplies and services.

It was stated that it was proposed to introduce the ministerial systems as soon as practicable, but that this could not be done until drafts of the new constitutions had been prepared and submitted to H.M. the Queen in Council and satisfactory arrangements for staff and accommodation had been made. (New Commonwealth - Times - Daily Telegraph - Manchester Guardian - Commonwealth Survey) **(Prev. rep. 13733 B; Barbados Constitution, 13402 A.)**

B. REFUGEE PROBLEMS. — Four-year Resettlement Plan. - Proposed Fund of $16,000,000. - U.N. Refugee Fund Executive Committee set up. - Results of Netherlands Voluntary Aid Campaign.

The U N High Commissioner's Advisory Committee on Refugees met in Geneva on Dec. 6-10, 1954, to discuss in detail the four-year plan designed to solve the refugee problem which had earlier been approved by the ninth session of the U.N. General Assembly (see 14010 A).

Dr. van Heuven Goedhart, the U.N. High Commissioner, proposed at the meeting that Governments should be asked to make available a sum of $17,000,000, of which $12,000,000 would be used for promoting a permanent solution and $5,000,000 for emergency aid. The committee, however, recommended a reduction in the amount for the full four-year programme to $16,000,000, of which $4,200,000 should be sought for the year 1955, namely, $3,200,000 for permanent projects and $1,000,000 for emergency relief; the amounts to be asked for in the second and subsequent years should, it was felt, be fixed in the light of further experience.

At a meeting of the General Assembly's Negotiating Committee for Extra-Budgetary Funds, which took place at U.N. headquarters on April 6, 1955, seven Governments announced that, subject to parliamentary approval or other formalities, they would contribute a combined sum of $451,200 towards the first year's requirements. The countries concerned and their promised contributions were: Netherlands, $128,000, Sweden, $115,000, Norway, $84,000, Denmark, $71,000; Western Germany, $24,000; Israel, $5,000; Turkey, $4,200. The U S.A., Belgium, and Switzerland announced that amounts of $1,400,000, $160,000, and $75,000 respectively were under consideration.

Earlier, on March 4, the Netherlands Government had announced that contributions to the voluntary aid fund launched on Oct. 11 (see 13898 A) had reached the final total of 4,123,000 guilders, this amount would be handed over to the fund at the disposal of the U.N. High Commissioner, in addition to the Dutch Government's official contribution.

The U.N. Economic and Social Council decided on March 31 to accept a proposal by Dr. van Heuven Goedhart for the setting up of a new U.N. Refugee Fund Executive Committee to approve refugee projects and generally to administer the fund. The committee, consisting of the 15 members of the former advisory committee together with representatives of Colombia, Greece, Persia, the Netherlands, and Norway, was formally elected on April 5.—(U.N. Information Centre, London - Times - Manchester Guardian - Netherlands News Agency) **(Prev. rep. 14010 A; 13898 A; Advisory Cttee., 12074 A.)**

C. NATIONALIST CHINA. — Revaluation of Dollar.

The Bank of Taiwan's certificate rate for the U.S. dollar was increased on March 10 from 15.60 to 24.78 Taiwan dollars for one U.S. dollar. The adjustment was part of a move aimed at stimulating exports. (New York Times)

APRIL 9—16, 1955

A. MIDDLE EAST DEFENCE. — New Anglo-Iraqi Defence Agreement. - British Adherence to Turkish-Iraqi Treaty. - Termination of Anglo-Iraqi Treaty of 1932. - Ratification by British and Iraqi Parliaments.

A special agreement setting out the terms of defence co-operation between Britain and Iraq, and replacing the 1930 Anglo-Iraqi treaty of alliance, was signed in Baghdad on April 4 by General Nuri es-Said (the Iraqi Prime Minister) and Mr. R. H. Turton (British Joint Under-Secretary for Foreign Affairs). The agreement entered into force on the following day, when Britain's instrument of accession to the Turkish-Iraqi Treaty (see 14105 A) was formally deposited at the Iraqi Foreign Ministry.

Sir Anthony Eden, then British Foreign Secretary, announcing the conclusion of the agreement in the House of Commons on March 30, said that it was based on the concept of co-operation between equal partners. Although Iraq would continue to enjoy much the same defence guarantees from Britain, and would give her much the same facilities in Iraq for carrying out these guarantees, as were provided under the 1930 treaty, Britain would in future only be able to make use of these facilities through her membership of a mutual defence pact, rather than as of right as hitherto. With regard to British adherence to the Turkish-Iraqi treaty, Sir Anthony emphasized that no aspect of the treaty could possibly be directed against Israel, and that Britain did not associate herself with the letters on the subject of Palestine which had been exchanged between the Turkish and Iraqi Premiers at the time of the signing of the treaty. " I take the view," Sir Anthony declared, " that when this agreement comes to be studied it will be seen, from the point of view of Israel, that it is a truly desirable development because this is the first time an Arab State is looking in directions other than simply towards Israel. That is a development of very real importance."

" The central theme of the new agreements," Sir Anthony Eden continued, " is that there shall be close and continuous collaboration between the armed forces of the two countries. There will be joint planning and exercises in peace-time, so that if there were to be an aggression against Iraq we would be in an effective position to support her. We shall advise and give technical assistance in establishing an air defence organization, including a radar warning and an aircraft reporting system. We shall be able to stock military stores and equipment in Iraq for use in war. Repair workshops and storage depots will, where necessary, be maintained for the benefit of Iraqi and British forces There will be British advisers and instructors to assist in the training of the Iraqi Army There is provision for mine-watching and mine-clearance and we may maintain our present facilities for over-flying, landing, and servicing our aircraft in Iraq.

" As part of these arrangements, the airfields of Iraq which are now occupied by the R A F. (under the 1932 treaty we have had air bases at Habbaniya and Shaiba, near Baghdad) will pass under Iraqi control and the British squadrons now stationed there will be progressively withdrawn. But it is agreed that R.A F. squadrons shall visit Iraq as part of the joint training process, and British service personnel will remain in Iraq to service British aircraft, to instal, operate, and maintain facilities and equipment, as well as to assist in the training of Iraqi forces. These men will be commanded by British officers acting in close liaison with the Iraqi officer in command of each establishment. They will enjoy the appropriate immunities, and provision is made for the requisite services and accommodation for them. The installations at the airfields which are required for our use will remain British property . . . Thus we shall be furnished with all the necessary facilities and arrangements to enable us to carry out our part in the defence of Iraq and the Middle East."

Replying to Mr. Arthur Henderson (Lab.), who referred to the special problems created by the 6,000-7,000 Assyrian Christians now employed by the R A.F., Sir Anthony said that " very special attention " had been given to this question " We have made arrangements about them which we are confident are satisfactory," and we have an assurance from the Prime Minister of Iraq about them."

The texts of the special defence agreement with Iraq and of the accompanying memorandum were published as a White Paper on March 30 and are given below.

Anglo-Iraqi Defence Agreement.

" The Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Kingdom of Iraq, considering that the U.K. intends to accede to the Pact of Mutual Co-operation between Iraq and Turkey signed at Baghdad on Feb. 24, 1955, and desiring as equal and sovereign partners in the pact to make a special agreement in accordance with the provisions of Art. 1 of the pact, have agreed as follows :

Art. 1. The two contracting Governments shall maintain and develop peace and friendship between their two countries and shall co-operate for their security and defence in accordance with the Pact of Mutual Co-operation.

Art. 2. The Treaty of Alliance between the U.K. and Iraq signed at Baghdad on June 30, 1930, with Annexure and Notes exchanged, shall terminate from the date when the present agreement comes into force.

Art. 3. The Government of Iraq, by the present agreement, undertake no obligations beyond the frontiers of Iraq.

Art. 4. The Government of Iraq assume full responsibility for the defence of Iraq and will command and guard all defence installations in Iraq

Art. 5. In accordance with Art 1 of the pact there shall be close co-operation between the competent authorities of the two Governments for the defence of Iraq This co-operation shall include planning, combined training, and the provision of such facilities as may be agreed upon between the two contracting Governments for this purpose and with the object of maintaining Iraq's armed forces at all times in a state of efficiency and readiness.

Art. 6. The U K Government shall at the request of the Government of Iraq do their best :

(*a*) To afford help to Iraq (i) in creating and maintaining an effective Iraqi Air Force by means of joint training and exercises in the Middle East, and (ii) in the efficient maintenance and operation of such airfields and other installations as may from time to time be agreed to be necessary.

(*b*) To join with the Government of Iraq in (i) establishing an efficient system of warning against air attack, (ii) ensuring that equipment for the defence of Iraq is kept in Iraq in a state of readiness, (iii) training and equipping Iraqi forces for the defence of their country

(*c*) To make available in Iraq technical personnel of the British forces for the purpose of giving effect to the provisions of paragraphs (*a*) and (*b*) of this Article.

Art. 7. Service aircraft of the two countries shall enjoy staging and over-flying facilities in each other's territories.

Art. 8. In the event of an armed attack against Iraq, or of a threat of an armed attack which in the opinion of the two contracting Governments endangers the security of Iraq the U K. Government at the request of the Government of Iraq shall make available assistance, including if necessary armed forces, to help to defend Iraq The Government of Iraq shall provide all facilities and assistance to enable such aid to be rapid and effective.

Art. 9. (*a*) The present agreement shall come into force on the date on which the U K becomes a party to the pact. (*b*) The agreement shall remain in force so long as both Iraq and the U.K are parties to the pact "

Memorandum of Mutual Defence Arrangements.

" (1) (*a*) Command of Habbaniya, Shaiba, and Margil shall pass as from the date of signature of the Special Agreement to the Government of Iraq, and Iraqi officers of appropriate rank shall be appointed for this purpose on May 2, 1955

(*b*) All flying units of the R.A F. now stationed in Habbaniya and Shaiba shall be withdrawn progressively and their withdrawal shall be completed within one year after the date of signature of the Special Agreement

(*c*) As the withdrawal of these flying units proceeds, the U.K. Government shall also progressively withdraw members of their technical and administrative personnel and personnel of authorized service organizations until only those remain in Iraq who are required for the purpose of the Special Agreement and this memorandum.

(2) (*a*) Under the Special Agreement, British personnel shall be in Iraq to assist the Iraqi forces with training and with the installation, operation, and maintenance of facilities and equipment and to service aircraft.

(*b*) The command and administration of British personnel and installations shall be the responsibility of the U K Government, and for this purpose the U.K. Government shall make available the necessary British staff to command and administer them under the overall authority of the Iraqi officer in charge of each establishment.

(*c*) The Senior British officer appointed in each case shall act in close liaison with the Iraqi officer in command

(3) The provisions of the agreement regarding the status of forces of parties to NATO signed in London on June 19, 1951, shall apply to the forces of each Government in the territories of the other Government. Detailed arrangements for the application of those provisions shall be made by the two Governments as soon as possible. Until such detailed arrangements have been made in Iraq the provisions at present applicable to British forces there shall continue to apply

(4) (*a*) In accordance with Art. 4 of the Special Agreement, the Government of Iraq shall assume responsibility for the protection of all airfields and installations in Iraq and to this end shall incorporate into the Iraqi forces those members of the R.A F levies of Iraq who wish to volunteer. The U.K. Government shall for a limited period make available for loan to the Iraqi forces British personnel as far as possible from among those now serving with the R.A.F levies of Iraq to facilitate such transfer and integration.

(*b*) The two Governments shall use their best endeavours to ensure that as many as possible of the civilians at present employed at Habbaniya, Shaiba, and Margil shall continue in employment there.

(5) The U.K. Government undertake in accordance with Art. 6 (*a*) and (*c*) of the Special Agreement, and in order to facilitate the closest co-operation between the air forces of the two countries, to do their best :

(*a*) To provide expert advice and assistance in operational and technical matters, including the extension of Iraqi airfields and the construction of such additional airfields and facilities as may be agreed to be necessary.

(*b*) To provide personnel to assist in the training of the Royal Iraqi Air Force and to offer continuous consultations regarding methods and techniques of training at all stages.

(c) To arrange that R A.F. squadrons and other British aircraft shall make periodic visits to Iraq in accordance with the provisions of the Special Agreement and this memorandum, in particular for the purpose of joint training

(d) To make available in Iraq British personnel for the servicing, maintenance, and repair of British aircraft as well as for such airfield services as it may be agreed that they should provide on airfields jointly used by both parties.

(e) To grant facilities, including instructional courses, abroad for training Iraqi personnel if suitable facilities are not available in Iraq.

(f) To facilitate as far as possible the supply of necessary aircraft and associated equipment of modern design.

(6) The U K. Government shall do their best to join with the Government of Iraq in establishing as soon as possible an efficient system for anti-aircraft defence, including a radar warning system and a system for aircraft reporting. For these purposes the U.K. Government shall make available to the Government of Iraq the co-operation and advice of qualified service and technical personnel.

(7) For the purpose of Art. 8 of the Special Agreement the Iraqi land forces shall be so trained as to facilitate closest co-operation with U.K. land forces, and suitably trained and experienced British personnel shall be made available to assist in the training of Iraqi land forces and to attend and advise in field and other exercises. The U K Government shall do their best to facilitate the supply to the Government of Iraq of arms and other appropriate equipment of modern design.

(8) The U.K. Government will co-operate with the Government of Iraq in establishing in advance and maintaining to an agreed standard such maintenance installations, including tank repair facilities, as may be agreed to be necessary in the event of an armed attack against Iraqi forces and British forces co-operating with them. Expert service advice on their siting and construction and advice and assistance in their maintenance and manning will be made available by the U K. Government.

(9) (a) The U.K. Government shall make available as may be agreed between the two Governments the co-operation and advice of suitably qualified service and technical personnel with a view to the establishment of an organization for mine-watching and mine-clearance on the Shatt-el-Arab.

(b) The Government of Iraq shall continue to permit British naval units to visit the Shatt-el-Arab at any time on previous notification being given.

(10) The existing procedures and facilities under which aircraft under the control of the R A.F overfly, land, refuel and are serviced in Iraq shall be continued. Similar procedures shall apply and similar facilities shall be made available in the U.K. and its dependent territories to aircraft under the control of the Royal Iraqi Air Force.

(11) (a) The U.K. Government shall join with the Government of Iraq in establishing in Iraq stocks of military stores and equipment for use by the armed forces of the two countries for the defence of Iraq in the event of an armed attack against Iraq These stocks shall be stored at sites in Iraq to be agreed between the competent authorities of the two Governments.

(b) The Government of Iraq shall provide the depots necessary for the safe keeping of those stocks and shall assume full responsibility for their security

(c) For administrative purposes stocks which are the property of the Government of Iraq shall be stored separately from those which are the property of the U.K. Government.

(d) The stocks shall be kept in a state of readiness at all times. Accordingly, provision shall be made for their maintenance, turnover, inspection, and periodical replacement, and each Government shall provide the personnel necessary for those purposes with respect to the stocks belonging to them.

(e) The U.K. Government may freely dispose of any items of such stocks, the property of the U.K. Government, which may become surplus to British requirements, subject to the offer of first refusal to the Government of Iraq in the case of any property to be disposed of in Iraq.

(12) (a) The Government of Iraq shall make available essential services for the use of British personnel and shall, if necessary, allocate suitable accommodation for them and their families

(b) Where new installations are from time to time agreed to be necessary for the purposes of the Special Agreement and this memorandum the terms of their provision shall be agreed between the two Governments."

The special agreement with Iraq and Britain's adherence to the Turkish-Iraqi mutual defence treaty were approved by the House of Commons on April 4 without a division, on a motion to that effect moved by Mr. Anthony Nutting (Minister of State, Foreign Office).

It had long been the purpose of British policy, **Mr. Nutting** said, to establish and maintain an effective defence system for the Middle East, for reasons of geography, strategy, and the protection of oil resources. Now the political and strategic picture had changed, and nationalism and nuclear weapons had made their appearance, necessitating an adaptation of British plans. That was what the Government had done by entering into the new agreement with Iraq and by acceding to the Turkish-Iraqi pact. ' Our strategic need is to safeguard and strengthen the extreme flank of NATO," he went on. " At the same time, the change in the political scene requires us to base our defence arrangements on the concept of equal partnership between sovereign States."

After referring to the " importance and significance " of the move by Turkey and Iraq to unite for their mutual defence, and to the opportunity which this provided for the Government to place Britain's relationship with Iraq within this wider settlement Mr. Nutting added . " We hope this new strength and unity will grow and spread and that it will eventually include other countries in the area. Essential as this new arrangement is in its present form, it can lead to an even greater defence system and hence to greater and wider security within the Middle East area."

There was nothing in the Turkish-Iraqi pact. he declared, " which need threaten, weaken, or cause anxiety to any State in the Middle East." It was, he said, directed against no State or group of States, and in fact it respected the independence of all countries and under Article 3 offered a specific guarantee of non-interference in their internal affairs both to the original parties and to all acceding States.

Replying to **Mr. Shinwell** (Lab), who asked whether or not it was true that, as a result of the exchange of letters between Turkey and Iraq, Israel would not be allowed to accede to the pact, **Mr. Nutting** agreed that under existing circumstances Israel could not accede, as under Art. 5 of the pact it was only open for accession to " any member of the Arab League or any other State actively concerned with security and peace in this region, and which is fully recognized by both the high contracting parties " When **Mr. Shinwell** asked whether, accordingly, the guarantee of non-interference was also not available to Israel, **Mr. Nutting** replied · " Nothing prohibits us from giving any such guarantee. And, indeed nothing under these arrangements in any way alters the position or the responsibility or the obligation of H.M Government under the Tripartite Declaration."

Continuing, Mr Nutting referred to the new defence arrangements and added : " If war should come to that part of the world we and our Turkish and Iraqi friends will by virtue of this agreement be the better able to act together in defence of this critically important region By planning our defence arrangements in this forward area—the northern tier of Middle Eastern defence as it is sometimes called—we can the more easily deal with an aggressor before he can penetrate deeply into the Middle East If this is realized and understood the likelihood of war will be vastly reduced. These new arrangements are yet another essential contribution to the deterrent to aggression and the cause of peace."

Concern about the position of Israel as a result of the new agreement was also expressed by a number of other Labour speakers. **Mr. Morrison** (Deputy Leader of the Opposition), who said that Israel was being subjected to an economic boycott and was in a state of " near siege," suggested that as the Government had entered into agreements with Egypt, Jordan, and Iraq, they should consider entering into a " somewhat similar pact with Israel so that there could be mutual co-operation and assistance, and so that Israel herself might feel and other people might feel that Israel had friends in the world as well as other countries in the Middle East " **Mr. Gordon-Walker** thought that the pact seemed to be " an incomplete step " which " raises as many questions as it solves " " One cannot deny," he said, " that this treaty does disturb relations between Israel and the Arab States Following upon the Suez pact it is quite intelligible that Israel should be worried by these developments . . . We should explore the possibility of establishing—with, of course, Israel's consent—a base in Israel. It would, I think, have a very stabilizing effect upon the Middle East and fit very properly into the pattern of events in the Middle East."

Mr. Crossman declared that the Iraqis wanted their new Army for only one purpose—" the second round against Israel "—and asserted that it was at this that the Government was now "conniving." He thought that the fact that Britain now had agreements with three Arab States would be interpreted in the Middle East as signifying support for the Arab point of view against Israel, and alleged that the Arab refugees were " being systematically used in order to maintain a psychological state of war between Israel and the Arab States," the money and organization for which were " largely contributed by the British Government." When Mr. Crossman continued to attack the U.N. Relief and Works Agency for Palestine Refugees, alleging that it was used " to keep the refugees as refugees and to keep the war spirit going," and that it was " so used with the connivance of the British Government," **Sir Anthony Eden** intervened to declare · " I really must protest. Successive Governments have given support to these refugees and, whatever their complexion, have worked their utmost and hardest to try and get resettlement. We cannot compel the Arabs to settle these people in places if they will not do it To indict the Government with that inhumanity . . . is a most discreditable statement." **Mr. Crossman,** however, refused to withdraw his charges and said that. if the Government gave money without any conditions, resettlement would never take place. He also suggested that the reason why the Foreign Secretary could not announce simultaneously with the present negotiations a similar treaty with Israel was that if he did so " two or three Governments would probably fall."

Another Labour speaker, however, **Mr. T. Reid,** who argued that it was " iniquitous and a blunder to take Palestine from the people who had it for 13 centuries and hand it over to Jewish immigrants," warmly welcomed the new agreement and suggested that it should be extended by inducing Persia, Saudi Arabia, and Egypt to join it.

Mr. E. S. T. Johnson (C.) likewise welcomed the new pact, saying that one of its effects would be to awaken the Arab States to the real danger which threatened them from the North and to take their minds off " the very unreal and imaginary danger which they imagine

threatens them from Israel." "Nonetheless," he went on, "Israel is undoubtedly very worried. They do feel that this pact, coming fairly soon after our agreement with Egypt, may give the Arab world the impression that Israel is being isolated and has been very largely forsaken by the Western Powers."

Sir Anthony Eden, replying to the debate, affirmed that the pact with Turkey and Iraq in no way affected Britain's special responsibility towards Kuwait and the other States of the Persian Gulf. Emphasizing that there was "no sinister, ulterior motive" to Britain's adherence, he read telegrams from various countries and said that the pact had been received "with enthusiasm in Ankara, calmly in Israel, not so well in Egypt, and worst of all in Moscow." "Is it not just possible" he said, "that the truth lies between all those extremes and that we are really not guilty of the very violent charges made by Mr. Crossman?"

After claiming that the pact was "a reasonable contribution in a difficult situation in the Middle East," Sir Anthony continued: "You will not get any settlement between the Arabs and Israel which does not include (1) a settlement of the refugee problem; (2) a settlement of the question of the frontier and (3) a settlement of the question of the Jordan waters. H.M. Government would be perfectly ready to enter into some new form of guarantee for such a settlement, which would have to cover those three vital factors. If we could get an arrangement between those countries, we would be willing, if need be, to enter into further engagements ourselves to back up the arrangement that was arrived at. What I am saying is that our position is that we are prepared, if an arrangement can be arrived at to bring about peace in the area, to lend our name and authority to it, to underwrite the arrangement if we think it is a fair and reasonable arrangement."

The Anglo-Iraqi agreement had been unanimously approved by the Iraqi Parliament on March 30.

A. UNITED KINGDOM. — British Transport Commission. - Traffic Receipts in 1954.

Traffic receipts of the British Transport Commission in 1954 totalled £645,163,000, compared with £634,897,000 in 1953. The receipts of the various undertakings are tabulated below, with 1953 figures (revised) shown for comparison.

	1954 £'000	1953* £'000	Increase or Decrease £'000
British Railways			
Passengers	116,312	114,491	+ 1,821
Parcels	40,665	38,478	+ 2,187
Merchandise and Livestock	110,271	108,460	+ 1,811
Minerals, etc.	45,915	45,049	+ 866
Coal and coke.	115,663	108,614	+ 7,049
	428,826	415,092	+13,734
British Railways Collection and Delivery Services	12,110	11,681	+ 429
Road Passenger Transport			
Provincial and Scottish buses, coaches, trolley-buses and trams	50,738	49,820	+ 918
London Transport			
Railways	19,120	18,228	+ 892
Road Services.	50,721	49,955	+ 766
Other Services			
British Road Services, Ships, and Inland Waterways, etc.	83,648	90,121	- 6,473
Total	645,163	634,897	+10,266

* Revised figures.

The Railway Clearing House, set up in 1847 to facilitate the through booking of goods and passengers over the various independent railway systems, and one of the last railway organizations in the United Kingdom to remain outside nationalization, was absorbed by the British Transport Commission as from Jan. 24, 1955.—(Times - Daily Telegraph - Financial Times) **(Prev. rep. 13426 B.)**

B. INDIA. — Merger of Krishikar Lok Party with Congress Party.

Professor N. G. Ranga, president of the *Krishikar Lok* Party, announced on March 8 that the party's general council had decided in favour of an immediate and unconditional merger with the National Congress. In taking this decision, he explained, the council had been influenced by the Government's removal of controls; its decision to establish a State Bank to provide rural credit facilities; its efforts to stabilize agricultural prices; the decisions of the Avadi Congress (see 14044 A); and the results of the recent Andhra elections, which had shown that the peasantry desired "the unity of the democratic forces." The *Krishikar Lok* Party, which had been formed in August 1951, had already coalesced with the Congress Party in the recent elections in Andhra.—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. Forward Bloc Merger with Congress, 14083 A; Andhra Elections, 14124 A.)**

C. PETROLEUM. — Anglo-Iranian Oil Company. - Name changed to British Petroleum Company. - Capital Increase. - 1952 and 1953 Results. - Value of British Government Holding.

The shareholders of the Anglo-Iranian Oil Co., Ltd., at an extraordinary general meeting held in London on Dec. 16, 1954, approved a proposal for the immediate change of the company's name to "British Petroleum Company Limited" to conform with the company's world-wide operations and changed position in the Persian oil industry.

Resolutions were also approved providing for (*a*) an increase of the company's share capital to £120,000,000 by the creation of 87,000,000 new Ordinary shares of £1 each; (*b*) the capitalization of £80,550,000 of the general reserve by the issue of 80,550,000 Ordinary shares to Ordinary stockholders on the register at the close of business on Nov. 23 in the proportion of four new shares for each £1 of Ordinary Stock held; (*c*) the conversion of the new shares into Stock, which would participate in all future dividends, including the final payment for 1954.

Sir William Fraser, the company's chairman, recalled that in view of the "unusual circumstances" prevailing since 1946, a total of £113,500,000 had been allocated to reserves between 1947 and 1953, compared with only £24,750,000 distributed as dividends to Ordinary stockholders. During the same period capital expenditure, largely financed from depreciation provision and from reserves, had totalled about £340,000,000, whilst in 1953 it had amounted to about £75,000,000 and in 1954 was estimated to have reached £55,000,000. However, the principal capital projects now in hand would shortly be completed, and in 1955 and for some time to come capital expenditure would probably be on a smaller scale; it should therefore be possible to distribute a larger proportion of the company's available profits in the form of dividends.

The company's report and accounts for the year ended Dec. 31, 1953, published on May 18, 1954, showed that crude oil production in Kuwait, Iraq, and Qatar in 1953 totalled 32,200,000 tons, compared with 25,600,000 tons in 1952. The major source of supply was Kuwait, where the offtake amounted to 23,316,000 tons, compared with 19,820,000 tons in 1952. The company's share of the Iraq Petroleum Company's production amounted to 6,780,000 tons (against 4,295,000 tons in 1952), whilst from Qatar it obtained 1,018,000 tons (compared with 775,000 tons); the balance was made up from other sources.

The gross consolidated profit for the year was £63,883,828, compared with £61,260,584 for the year ended Dec. 31, 1952. After providing £20,056,243 for depreciation on fixed assets, oil exploration interests, trade investments, and holdings in allied companies (against £14,198,946 in 1952), the net consolidated profit amounted to £43,827,585, compared with £47,061,638 in 1952.

The chief items of capital expenditure in 1953 included *Refineries*: Aden, £26,500,000; Britain (Isle of Grain, Kent), £14,600,000; Kwinana (Western Australia), £10,700,000; various other U.K. refineries, £4,300,000. *Tankers*: £8,500,000.

The Chancellor of the Exchequer (Mr. Butler) stated in the House of Commons on Nov. 9, 1954, that the British Government then held £11,250,000 of Anglo-Iranian Ordinary Stock, and £1,000 of Preference Stock, and that the value of this holding on the basis of current prices was about £201,000,000. (Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 12314 A; Persian Oil Agreements, 13863 B; Refineries, Aden, 12662 A; Kwinana, 12314 A; Isle of Grain, 11997 A.)**

D. SOVIET UNION. — Forthcoming Return of Zwinger Paintings to Eastern Germany.

It was officially announced in Moscow on March 30 that the Soviet Government had decided to return to the Zwinger museum in Dresden (Eastern Germany) its entire collection of 750 paintings which had been taken by the Red Army to the Soviet Union after the end of the last world war.

Among famous masterpieces in the Zwinger which was one of the most important art galleries in Europe, were Raphael's "Sistine Madonna"; Titian's portrait of his daughter Lavinia, and numerous other of his works, Rembrandt's self-portrait with his wife, "Self-Portrait with an Album," and "Saskia, with a Red Flower"; Rubens's "The Judgment of Paris" and "Mercury and Argus", Durer's "Portrait of a Young Man"; Velasquez's "Portrait of Juan Mathias" and "Portrait of an Old Man with the Order of St Yazo"; Watteau's "Gathering in a Park" and "Holiday of Love"; and Poussin's "Narcissus"

M. Ilyichev, the spokesman of the Soviet Ministry of Foreign Affairs, said in a press statement that the Soviet decision to return the Zwinger paintings had been taken "with the aim of strengthening friendly relations between the Soviet Union and the German Democratic Republic"; that during the preceding negotiations the East German Government had suggested that the paintings be put on view in Moscow; and that they would accordingly be exhibited in the Pushkin Museum from May 1 to Aug. 31 next, prior to their return.
(Der Tagesspiegel, Berlin - Manchester Guardian)

A. NIGERIA. — Entry into Force of New Constitution. - Appointment of Regional Premiers. - Federal Elections. - First Federal Council of Ministers. - Sir James Robertson appointed New Governor-General.

The new Federal Constitution for Nigeria came into force on Oct. 1, 1954, after an Order in Council confirming the constitutional changes recommended by the London and Lagos conferences had been laid before the British Parliament on Sept. 3.

Earlier, on July 8, 1954, it had been announced that, on the entry into force of the new Constitution, Sir John Macpherson, Governor of Nigeria, would become Governor-General of the Federation; that Sir Bryan Sharwood-Smith and Sir Clement Pleass, the Lieutenant-Governors of the Northern and Eastern Regions respectively, would become Governors of those regions; and that Sir John Dalzell Rankine, British Resident at Zanzibar, would become Governor of the Western Region.

It was stated that the existing Lieutenant-Governor of the Western Region, Sir Hugo Marshall, had expressed a wish to return to the Secretariat in Lagos as Chief Secretary, in which post he had been acting since Sir Arthur Benson had left to become Governor of Northern Rhodesia.

Each of the three principal political leaders in Nigeria took office as Prime Minister of one of the regions following the coming into force of the new Constitution. They were: Northern Region—the Sardauna of Sokoto (Northern People's Congress); Western Region—Mr. Obafemi Awolowo (Action Group); Eastern Region—Dr. Nnamdi Azikiwe (National Council of Nigeria and the Cameroons). Dr. E. M. L Enderley (Kamerun National Congress) was sworn in as Prime Minister of the Southern Cameroons.

The first elections to the Federal House of Representatives under the new Constitution were held under varying systems between the middle of October and the end of December.

In the Eastern and Western Regions, where they took place on Nov. 10 and 11 respectively, and in Lagos, where they took place on Dec. 11, the elections were conducted by direct secret ballot; whereas, however, in the Eastern Region all the 4,500,000 adults were eligible to vote, in the Western Region only those men and women who paid taxes in 1953-54 or who paid more than £1 a year in rates were qualified, thus reducing the electorate to about 1,500,000. In the Northern Region and in the Southern Cameroons, the electoral college system was used and the various stages of the elections were therefore spread over two months, the results being announced at the end of December.

The results of the elections—during which only 15 elected members of the former House of Representatives were returned—are given below:

	Northern Region	Western Region	Eastern Region	South Cameroons	Lagos	Total
Northern People's Congress (NPC)	79	—	—	—	—	79
National Council of Nigeria and the Cameroons (NCNC)	—	23	32	—	1	56
Action Group—United National Independence Party Alliance	1	18	7	—	1	27
Kamerun National Congress (KNC)	—	—	—	6	—	6
Others	12	1	3	—	—	16
Total	92	42	42	6	2	184

In addition to the 184 elected members, the new House of Representatives consists of a Speaker, three *ex-officio* members, and six members who were subsequently appointed by the Governor-General to represent interests of communities not otherwise adequately represented.

Under the Constitution all members of regional legislatures were debarred from being elected to the central House of Representatives so that none of the regional Premiers was a candidate in the federal elections; the most surprising result of these was the victory of the NCNC in the Western Region where the Action Group, led by Mr. Awolowo, is the Government party.

No party secured the absolute majority of seats in the new House of Representatives which would have entitled it to nominate nine Ministers in the Federal Government. In accordance with the terms of the new Constitution, the Governor-General therefore appointed three Ministers from each of the three main regions after taking the advice of the leader of the party to which the majority of members from the region belonged. In consequence, the NCNC, having secured the largest number of seats in the Eastern and Western Regions, nominated six Ministers, whilst the Northern People's Congress —despite the fact that it held more seats than any other party —nominated three; the tenth Ministerial post had to be allocated to a member from the Southern Cameroons. The composition of the Council of Ministers was announced on Jan. 10, and portfolios were distributed a few days later as follows:

Ex-officio Members.

The Governor-General.
The Chief Secretary.
The Financial Secretary.
The Attorney-General.

The main subjects for which these will be responsible will include defence, external affairs, justice, and taxation.

Ministers from the Northern Region.

*Malam Abubakar Tafawa Belewa	Transport and Works.
*Malam Muhammudu Ribadu	Lands, Mines, and Power.
*Malam Inuwa Wada Kano	Minister without Portfolio.

Ministers from the Eastern Region.

*Mr. K. O. Mbadiwe	Communications and Civil Aviation.
*Mr. R. A. Njoku	Trade and Industry.
*Mr. M. T. Mbu	Minister without Portfolio.

Ministers from the Western Region.

Mr. A. Adelabu	Natural Resources and Social Services.
Chief F. S. Okotie-Eboh	Labour and Welfare.
Mr. K. Balogun	Minister without Portfolio.

Ministers from the Southern Cameroons.

Mr. V. Mukete	Minister without Portfolio.

* Members of the previous Council of Ministers.

The first session of the new House of Representatives was opened by the Governor-General, Sir John Macpherson, on Jan. 12, 1955, when messages were read from H.M. the Queen and the Colonial Secretary, Mr. Lennox-Boyd. Sir Frederick Metcalfe, formerly Clerk of the British House of Commons, presided as Speaker of the new House.

A Colonial Office spokesman had stated on Sept. 3, 1954, that, whilst the new Constitution would come into force on Oct. 1, certain of its provisions would require "a long transitional period" before they too became effective. For instance, the transformation of the unitary public service into a federal service and three regional services would not become fully effective until Aug 30, 1956, while the substitution of a Federal Supreme Court and regional High Courts for the existing Nigerian Supreme Court would be governed by the date on which the necessary legislation was passed by the federal and regional legislatures.

Chief Michael Okorodudu, a member of the Action Group, arrived in London on Oct. 15, 1954, to take up his post as Commissioner in London for the Western Region of Nigeria —the first appointment of its kind made following the introduction of the new Constitution.

It was announced on April 8, 1955, that Sir John Macpherson would shortly be retiring from the post of Governor-General and Commander-in-Chief of the Federation of Nigeria and would be succeeded by Sir James Robertson (55), Civil Secretary of the Sudan Government until 1953 and, more recently, chairman of the Constitutional Commission for British Guiana. Sir John Macpherson left Nigeria on April 11.—(New Commonwealth - Commonwealth Survey - Times - Daily Telegraph - Manchester Guardian)

B. SUDAN. — U.N. Technical Assistance.

An agreement providing for an enlarged programme of U.N. technical assistance to the Sudan was signed at the U.N. headquarters on April 4 by Mr. David Owen (chairman of the U.N. Technical Assistance Board) and by representatives of the two Governments responsible for the Sudan's foreign relations, M. Omar Loufti (Egypt) and Sir Pierson Dixon (U.K.). Among plans for the Sudan which the Board agreed should be carried out in 1955 were a campaign against malaria and insect control to be conducted by the WHO and a project in fundamental education to be undertaken by UNESCO.

(U.N. Information Centre, London) **(Prev. rep. 13367 A.)**

C. SPAIN. — Population.

Figures recently published in the Spanish Government's Bulletin of Statistics showed that the population of Spain (including the Balearic and Canary Islands) on Dec. 31, 1953, was 28,638,977. In addition, the population of the Spanish Protectorate of Morocco numbered 1,015,631, that of Spanish territories in the Gulf of Guinea, 204,495; and that of Spanish possessions in North Africa, 142,688.

A. INDIA - PAKISTAN. — Mr. Ghulam Mohammad's Delhi Visit. - Forthcoming Meeting between Mr. Nehru and Mr. Mohammed Ali. - Steering Committees' Discussions. - Provisional Agreement on Financial Questions and Movable Evacuee Property.

The Governor-General of Pakistan, Mr. Ghulam Mohammad, visited Delhi on Jan. 25-28, at the invitation of President Prasad, to attend the fifth anniversary celebrations of the foundation of the Republic of India. During his visit he had informal talks with Mr. Nehru and Dr. Kalam Azad (Indian Minister of Education) on the Kashmir question and other problems affecting India and Pakistan.

At a banquet held in Mr. Ghulam Mohammad's honour on Jan. 25, **President Prasad** said: "Although we have voluntarily parted company, years of close association, assisted by a common background and a common experience, provide the foundation for enduring friendship and understanding between us ... There should therefore be no problem between our two countries which could not be capable of solution in a spirit of friendship and understanding. My Government are anxious to do everything in their power to solve these problems in fruitful co-operation with yours."

Mr. Ghulam Mohammad said in reply: "It is a sad fact of history that some happenings in the wake of freedom have left behind a legacy of misunderstandings and bitterness, owing to which our relations have not been very pleasant. I think this dark period of strain has now lasted too long, and the time has now come to end it completely. I am glad that your Prime Minister has also expressed the view that an atmosphere better than ever before now prevails for settling our mutual problems. The ideal time has now come to prove —and sincerely prove—that the basic and major points of dispute can be mutually solved without delay; otherwise our people will laugh at our insincerity and lack of leadership Time for action is now; the people will not wait. You have men of goodwill and good sense, so have we. Our two Governments have a common objective. We seek international peace and amity, we seek to secure the uplift of the common man Let us put an end to our disputes. We owe this as a duty to posterity .. There is no alternative except that the two countries act in a spirit of truth and sincerity, without which it seems difficult for them to achieve real prosperity and well-being I feel that with you, Mr. President, as Head of the Indian Republic, and Mr Nehru as Prime Minister, there should be no difficulty in realizing this truth and giving effect to an early settlement of these points, some of which have for years been the basis of misunderstanding and discord Given goodwill and breadth of vision, I have no doubt that such an end could be realized much sooner than most of us think."

On returning to Karachi on Jan. 28 Mr. Ghulam Mohammad announced that President Prasad had accepted an invitation to visit Pakistan. He added that he now had better hopes for a solution of the disputes between the two countries, as he had noticed a mutual desire for closer relations during his visit, and that a propitious atmosphere now existed for mutual understanding.

Earlier, on Dec. 15, 1954, Mr. Nehru had told the Indian Council of States that negotiations between India and Pakistan had not broken down, but had merely been suspended. A proposal by the Pakistani High Commissioner in Delhi, Mr. Ghazanfar Ali Khan, that direct discussions should be resumed at various levels had been accepted by India, and preliminary steps were being taken to prepare a list of the problems to be discussed.

A letter from the Pakistani Prime Minister, Mr. Mohammed Ali, suggesting that Mr. Nehru should visit Karachi in January for discussions, was delivered by Mr. Ghazanfar Ali Khan on Dec. 15. Mr. Nehru, however, whilst reciprocating Mr. Mohammed Ali's desire for a meeting, replied that he would be unable to visit Karachi in the near future. On Jan. 25 Mr. Mohammed Ali accepted an invitation from Mr. Nehru to visit Delhi on March 28 for discussions, but the meeting was subsequently postponed until May 14, owing to the heavy pressure of engagements on both Prime Ministers. While passing through Calcutta on his way to the Bogor conference on Dec. 27, Mr. Mohammed Ali had stated that his Government had decided to postpone raising the Kashmir question in the Security Council in view of the possibility of a meeting between Mr. Nehru and himself.

In a letter to Mr. Nehru on Dec. 25 Mr. Mohammed Ali suggested that issues other than Kashmir (e.g., evacuee property, implementation of the Bagge tribunal's award, and improvement of travel facilities, especially between West and East Bengal) should be discussed by Steering Committees of the two Governments. This proposal was accepted by the Indian Government, and the Steering Committees of high officials met in Karachi on Feb. 26-28 to scrutinize and classify the lists of outstanding items prepared by their Governments, and to formulate procedure for discussions at various levels As a result, the Committees requested the Ministries concerned to take up their outstanding items with their counterparts and to report progress by April 15. A second meeting of the Steering Committees, at which agreement on a number of items was reached, was held in Delhi on March 11-12, whilst talks at secretariat level on movable evacuee property and banking arrangements took place in Karachi on March 1-12.

A communique issued on the Karachi talks stated that agreement had been reached on most of the issues discussed, subject to the approval of the two Governments.

The communiqué said that the discussions had covered a wide range of subjects such as the restoration of personal and household property; disposal of trade goods; restoration of, or payment of compensation for, property of joint stock companies allotted or acquired by either Government, release of shares, securities, debentures and insurance policies held in custody of banks, transfer of postal certificates and savings bank accounts; transfer of bank accounts; realization of bank assets; and release of lockers and safe deposits in banks

Financial items discussed included verification of claims by Central Claims Organizations; payment of postal life insurance policies; payment of pensions; and settlement of contractors' claims and of claims in respect of provident funds.

In all cases where agreement was reached target dates were fixed for implementation, whilst it was stated that it was hoped that the few items still outstanding would be settled "in the very near future."

B. AUSTRALIA. — New Atomic Testing Ground.

It was announced in Canberra and London on April 4 that the Australian and British Governments had agreed on the establishment of a new atomic testing ground in the desert country of South Australia north of the section of the trans-continental railway line between Kingoony and Deakin, as the existing site at Emu Field was no longer suitable because of inadequate water supplies. Construction work on the new ground would begin soon, and the tests proposed for later this year—which would not be atomic explosions, but would involve the detonation of high explosive charges to test techniques related to atomic weapons—would be carried out at the site. The new ground would be known as Maralinga, an aboriginal word for "thunder."—(Australian News and Information Bureau) **(Prev. rep. 14102 A.)**

C. UNITED KINGDOM. — Gold and Dollar Reserves in March. - Deficit of $14,000,000.

The sterling area had a gold and dollar deficit in March of $14,000,000 after taking account of (*a*) $21,000,000 received in U.S. defence aid; (*b*) $3,000,000 received from the E.P.U. in respect of the February surplus; and (*c*) $2,000,000 paid to E.P.U. creditors in bilateral settlements. As a result, the gold and dollar reserves fell to $2,667,000,000 on March 31, the lowest level since February 1954.

Provisional figures for the E.P.U. March settlement showed that the U.K. had a surplus of $25,200,000 (£9,000,000) which would be settled in April.—(Treasury Press Office) **(14083 B.)**

D. TIBET. — Indian Transfer of Postal Services and Rest Houses to China.

A protocol was signed in Lhasa on April 1 by representatives of the Indian and Chinese Governments, whereby the postal, telegraph, and public telephone services in Tibet formerly operated by the Indian Government, with their equipment, were transferred to the Chinese Government without compensation as a gesture of goodwill. The 12 rest houses formerly operated by the Indian Government were also handed over at an agreed price, which had already been paid.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 13588 A.)**

E. WOOL. — Rotation of U.K. Stockpile.

The Board of Trade in London announced on March 3 that, in order to prevent deterioration of the wool stockpile, up to 30,000 bales of wool would be sold at auctions in the U.K. in the year ending March 31, 1956, and replaced by purchases made at auctions in Commonwealth countries in the same period. In subsequent years the quantity to be turned over would be between 52,000 and 78,000 bales, enabling the complete stock of some 96,000,000 lb. to be turned over in 7-10 years. The announcement said that both the buying and selling would be spread over each year.—(Bradford Chamber of Commerce Journal) **(Wool Stockpile, 12468 A; 12010 B.)**

A. COSTA RICA. — Report by Commission of Organization of American States on January Revolt.

The five-man fact-finding commission, sent by the Organization of American States to investigate the revolt in Costa Rica in January, and the extent, if any, to which there had been foreign intervention, published its report on Feb. 17. The commission, without definitely accusing Nicaragua of instigating the revolt, confirmed that a "substantial number" of the rebel forces had entered Costa Rica from Nicaragua, and made a number of recommendations designed to strengthen friendly relations between the two countries. The conclusions and recommendations of the commission are summarized below, together with certain reservations entered by the Ecuadorean member.

Conclusions.

"(1) There was foreign intervention in the preparation, financing, furnishing of arms and ammunition, and transportation facilities to the persons who entered Costa Rica by force.

(2) A substantial number of the rebel forces and the war materials used by them, whatever their origin, entered by way of the Costa Rican - Nicaraguan frontier.

(3) One or more clandestine radio stations, apparently operating outside Costa Rica, incited the people of that country to support the rebel movement.

(4) Aircraft . . . from abroad dropped arms and ammunition for the rebels at pre-determined points in Costa Rican territory.

(5) Transport and combat planes proceeding from abroad and without identification marks, landed clandestinely on Costa Rican territory and made flights in which they bombed and machine-gunned various towns of that country, including San José, the capital.

(6) There was violation of the territorial integrity, sovereignty, and political independence of Costa Rica.

(7) After the Investigating Committee had established a system of pacific aerial observation . . , had also . . . established a system of land observation in strategic zones . . . , and had set up security zones in areas of Costa Rica and Nicaragua contiguous to the frontier, the attacking forces abandoned their offensive and fell back towards the north-western frontier, a large number of them being ultimately interned in Nicaragua.

(8) Even after the rebels who had been fighting in the western part of Costa Rica were interned in Nicaragua, a considerable number of them reappeared and fought again on Costa Rican territory, this time in the central region of the frontier with Nicaragua A large majority of the members of the attacking forces and the political leaders of the movement were of Costa Rican nationality This circumstance does not, however, in any way alter what has been pointed out in the preceding paragraphs."

Recommendations.

After expressing the hope that Costa Rica and Nicaragua would soon be able to resume peaceful relations, the Commission made the following specific recommendations.

(1) That the "pact of amity" signed between Costa Rica and Nicaragua on Feb. 21, 1949 (see 9820 G) should be perfected and strengthened.

(2) That Costa Rica and Nicaragua should prepare and sign the bilateral agreement mentioned in Art IV of the aforesaid pact so that it might be applied immediately in the event of civil strife, especially with respect to measures for the control and supervision of frontiers, and to any other measure intended to prevent the organization or existence of any revolutionary movement against the Government of either of the two parties in the territory of the other.

(3) That when the pact of amity was revised, an additional article should be included for the purpose of preventing the preparation of terrorist acts in the territory of either party against the Government of the other.

(4) That Costa Rica and Nicaragua should at once appoint a commission of investigation and conciliation in accordance with the American Treaty on Pacific Settlement (the Pact of Bogotá). This would constitute a permanent guarantee, for both, of the friendly and satisfactory settlement of any difficulty that might arise as a result of situations such as those envisaged in the "pact of amity."

(5) That, as a general measure desirable for all the American States, consideration should be given to improving control of the traffic in arms and ammunition, and also to applying effectively the recommendation contained in Resolution XI of the Inter-American Conference for the maintenance of continental peace and security that 'no stipulation of the treaty nor any of the obligations created under it should be interpreted as justifying excessive armaments or may be invoked as a reason for the creation or maintenance of armaments or armed forces beyond those required for common defence in the interest of peace and security.'

(6) That the Council of the Organization of American States should, acting provisionally as Organ of Consultation, offer its collaboration to Costa Rica and Nicaragua for the purpose of perfecting the pact of amity.

(7) That, taking into consideration the gradual re-establishment of normal international relations between Costa Rica and Nicaragua, the provisional action of the Council as Organ of Consultation should be duly terminated and the American Governments be consulted with respect to the cancellation of the meeting of Foreign Ministers as Organ of Consultation.

Reservations of Ecuadorean Member.

The Ecuadorean member of the Commission though expressing his agreement with the above conclusions and recommendations, signed them with certain reservations He thought that the commission's report was incomplete inasmuch as it did not contain a sufficiently "precise and orderly summary of the facts and evidence" to enable "the author or authors of the 'foreign intervention' that gave rise to the violation of the territorial integrity, sovereignty, and political independence of Costa Rica to be identified." He also expressed the view that there should be an early meeting of the Foreign Ministers of the American Republics to consider, among other things, "the possibility and desirability" of establishing, on a permanent legal basis an inter-American police force This should be composed of contingents from various non-belligerent countries and should be employed in the pacific surveillance and observation of the frontiers of any country which might be the victim of intervention or aggression, and if necessary in repelling the attacks of armed forces which might attempt to carry out an act of intervention or aggression. The Foreign Ministers should also consider methods for improving the control of traffic in arms and ammunition.

The members of the fact-finding commission were Señor Luis Quintanilla (Mexico), chairman; Mr. John C. Dreir (U.S.A.); Senhor Fernando Lobo (Brazil); Señor Jose R. Chiriboga (Ecuador); and Señor Guillermo E. Vallodo (Paraguay).—(New York Times) **(Prev. rep. 14048 A.)**

B. BRITISH COMMONWEALTH. — United Kingdom Loans and Grants to Commonwealth Countries, 1954.

The Treasury published figures on April 4 showing that the total amount of loans and grants authorized by the U.K. Government (but not necessarily drawn) during 1954 was £120,000,000, details being as follows:

London Market Loans Authorized.	
(*a*) Colonial	
East African High Commission	7,045,000
Trinidad	4,245,000
Nairobi City	1,000,000
Malaya	4,000,000
Total	16,290,000
(*b*) Other Government Loans	
Rhodesia and Nyasaland	10,000,000
New Zealand	10,000,000
Ceylon	5,000,000
Total	25,000,000
(*c*) Consent for Private Capital Issues	48,327,000
Total Market Loans	86,617,000
Loans and Grants from Government Funds.	
(*a*) From United Kingdom Contribution to World Bank	1,020,000
To India	5,000,000
To Pakistan	2,750,000
(*b*) Under Colonial Development Act	15,567,000
(*c*) Colonial Development Corporation	6,014,000
Grand Total	119,969,000

In 1953 the total amounted to £122,600,000.—(Manchester Guardian) **(Prev. rep. Commonwealth Economic Conference, 13365 A.)**

C. ITALY. — Deferment of Local and Provincial Elections until 1956.

The Italian Chamber of Deputies adopted a Government proposal on March 22 to defer until 1956 those communal and provincial elections which, under the existing legislation, were due to be held this year, thus enabling all such elections to be held in future during the same year according to a uniform procedure to be laid down by a new law now in preparation. Hitherto part of these elections had been held in one year and the other part in the following year, the last local and provincial elections having taken place partly in 1951 and partly in 1952.

Signor Scelba, the Italian Prime Minister, explained during the debate that the new arrangement of holding all local and provincial elections in the same year and under the same procedure would facilitate administrative arrangements, reduce expenditure, and save the country much political unrest caused by electoral campaigns in successive years. The voting was 298 to 232, the Government thus obtaining a majority of 66; the opposing votes were cast by the Communists, Left-wing (Nenni) Socialists, and the deputies belonging to the neo-Fascist Italian Social Movement, who had alleged during the debate that the deferment of the elections was only due to Government fears about their outcome.—(Giornale d'Italia, Rome - Corriere della Sera, Milan - Neue Zurcher Zeitung)

(Prev. rep. Local and Provincial Elections, 13017 A.)

A. UNITED STATES - COMMUNIST CHINA. — Imprisoned U.S. Airmen in China. - Dr. Hammarskjöld's Peking Discussions. - Chinese Permission for Relatives to visit U.S. Prisoners. - U.S. Refusal of Visas. - Chinese Students in U.S.A. allowed to return Home.

As a result of the resolution adopted by the U.N. General Assembly on Dec. 10, requesting the U.N. Secretary-General to take immediate action towards securing the release of the 11 U.S. airmen imprisoned in Communist China and of all other captured personnel of the U.N. Command still detained in that country, Dr. Hammarskjold wired immediately to Mr. Chou En-lai, the Chinese Prime Minister and Foreign Minister, requesting a meeting in Peking. Mr. Chou En-lai replied on Dec. 17 that he welcomed a visit by Dr. Hammarskjold, and that " in the interests of peace and relaxation of international tension I am prepared to receive you . . . to discuss with you pertinent questions." In another telegram to the Secretary-General on the same day, however, the Peking Government took an uncompromising line on the subject of the American airmen, saying that " no amount of clamour on the part of the United States can shake China's just stand of exercising its own sovereign rights in convicting the U.S. spies."

This second Chinese communication, after referring to the " absurd " General Assembly resolution of Dec. 10, and asserting that the evidence had conclusively proved that the 11 airmen had conducted espionage activities in China, continued : " To convict foreign spies caught in China is China's internal affair. There is no justification at all for the U.N. to try to intervene in China's conviction of fully-proved U.S spies, while failing to condemn the U.S.A. for despatching, in violation of the U.N. Charter, spies to intrude into China to carry out subversive activities."

The telegram went on to say that the case of " the American spies " had nothing to do with the question of the prisoners-of-war in Korea, and to accuse the U S A. and the U.N Command of violating the Korean armistice agreement. " The U.S Government," it said, " connived at the forcible retention in June, 1953, of more than 27,000 Korean and Chinese captured personnel by the Syngman Rhee clique in open violation of the agreement on the repatriation of prisoners-of-war. The U.N. Command, disregarding the decision of the Neutral Nations Repatriation Commission in Korea, then abducted in January more than 21,000 Chinese captured personnel, who were pressed into the troops of Syngman Rhee and Chiang Kai-shek.

" Up to now these cases are not yet accounted for. The Chinese people and the Korean people will never forget the distress suffered by their sons under the tyranny of Syngman Rhee and Chiang Kai-shek. The U N , overwhelmed by the clamour of the United States and submitting to its domination, wilfully ignores the tragic retention and abduction of more than 48,000 Korean and Chinese captured personnel, but casts slander upon China s conviction of the 11 U.S. spies. This cannot but evoke a great indignation of the Chinese people. The aim of this clamour of the U S. Government is to stir up animosity and hatred against China, so as to cover up U.S. aggression in manufacturing the U.S -Chiang Kai-shek ' mutual security treaty ' and in seizing Taiwan [Formosa] and the Penchu islands [Pescadores], and to frustrate the accusation by China against the U.S armed aggression on Chinese territory.

" Such activities of the U.S.A are an integral part of its endeavour to create international tensions in the East and the West and to prepare a new war. The Chinese people are opposed to war, but they will never be frightened into submission by threats of war The Chinese people desire peace, but they will never beg for peace at the expense of their territory and sovereignty . . ."

Dr. Hammarskjold accordingly left New York on Dec. 30 and flew to Peking via London, Paris, New Delhi, Canton, and Hankow, arriving in the Chinese capital on Jan. 5. He was accompanied by Professor Humphrey Waldock, Chichele Professor of International Law at Oxford University (as his legal adviser); Hr. Gustav Nystrom, of Stockholm (as interpreter); Professor Ahmed S. Bokhari (Pakistan), a U.N. Under-Secretary; and Hr. Per Lind (Sweden), of the Secretary-General's executive office. During his journey to China Dr. Hammarskjold had talks with Sir Anthony Eden (then British Foreign Secretary) in London on Dec. 31; with M. Mendès-France (then French Premier) in Paris on Jan. 1; and with Mr. Nehru and Mr. Krishna Menon (the Indian Prime Minister and Indian representative at the United Nations respectively) in New Delhi on Jan. 3.

Mr. Nehru, in a statement in Calcutta on Jan. 1, had said that the U.N. resolution was " regrettable " because it had been made " in an *ex parte* way " and without reviewing the facts. He repeated the Chinese view that the airmen had not been shot down over Korea but over Chinese territory, and said that the Chinese had been greatly concerned by the fact that thousands of Chinese prisoners in Korea had been sent to Formosa, without the International Commission having been able to meet them or ascertain their wishes.

Dr. Hammarskjöld had four meetings with Mr. Chou En-lai, on Jan. 6, 7, 8 and 10, their discussions lasting altogether over 13 hours. A communiqué issued after the final meeting said that " reference was made " during the talks to " questions pertinent to the relaxation of world tension "; that it was felt that the talks had been " useful "; and that it was hoped to be able " to continue the contact established at these meetings." No indication was given, however, of what decision, if any, had been reached about the U.S. airmen and other U.N. personnel detained in China. Dr. Hammarskjold returned to the United States via Hong Kong and Tokio, arriving back in New York on Jan. 13. At a press conference on the following day he expressed the view that his visit had to some extent been successful as it had established contact between the U.N. and Communist China, and emphasized that " no deals of any kind " had been made with China on the question of the 11 airmen and other matters.

The Secretary-General said that he had presented to Mr. Chou En-lai " the full and complete case " for the release of the convicted men and had heard the Chinese viewpoint on the matter. " There was need," he continued, " to exchange information in this way so that the facts might be brought out clearly and possible misunderstandings might be straightened out I may say that our discussions were very thorough and that the visit to Peking has achieved what I was aiming at by this step Chou En-lai also gave me his views on other questions pertinent to present international tensions. This part of our conversations was, however, entirely apart from the question of the prisoners . . Chou En-lai and I hope to be able to continue our contacts. I cannot tell you at this time what the next steps will be, but I do feel . that the door has been opened, and can be kept open, given restraint on all sides."

It was announced by Peking radio and at U.N. headquarters in New York on Jan. 21 that the Chinese Communist Government had agreed to provide facilities for relatives to visit those Americans imprisoned in China who had been convicted as spies, as well as those whose cases were under investigation by the Chinese authorities, these facilities would be provided through the Chinese Red Cross Society, which would make all the necessary arrangements. It was stated that the offer had been made by Mr. Chou En-lai to Dr. Hammarskjöld during their talks in Peking, in response to Dr. Hammarskjold's request for assurances about the well-being of the prisoners.

The U.S. Defence Department, in conveying the Chinese offer to the relatives of the airmen, made it clear that, as the U.S.A. had no diplomatic relations with the Peking Government, the relatives would travel at their own risk once they reached China, whilst the State Department said that the U.S. Government " cannot in good conscience encourage those who may wish to go into an area where the normal protections of an American passport cannot be offered."

The State Department announcement added : " World public opinion will judge the motives of those who, having it in their power and being under an obligation to end promptly the tragic grief they have caused, now visit upon the families of these imprisoned Americans a harrowing dilemma It is by releasing those they hold that the Chinese Communists can convincingly show concern for the human sufferings they have caused."

Although a number of the relatives expressed a wish to accept the Chinese offer, and although the American Red Cross announced that it would provide " supplemental financial assistance " and help the relatives in " every appropriate way," Mr. Dulles, the U.S. Secretary of State, announced on Jan. 27 that the U.S. Government had reluctantly decided not to allow any relatives to travel to China.

" The increasingly belligerent attitude and actions of the Chinese Communists in recent days," Mr. Dulles said, " have forced this Government to the reluctant conclusion that it would be imprudent for the time being to issue passports valid for travel to Communist China by any American citizen This decision is made only after careful deliberation and in the belief that it is in the best interests of our nation. In the interest of peace, we do not think it prudent to afford the Chinese Communists further opportunities to provoke our nation and strain its patience further." [Mr. Dulles's reference to the ' increasingly belligerent attitude ' of the Chinese Communists apparently referred to the increased Communist attacks on the Tachen Islands following their capture of Yikiangshan Island—see 14117 A.]

Dr. Hammarskjold stated at a press conference on April 5 that contacts were continuing regarding the release of U.N. Command personnel detained in Communist China, and that he would not continue these contacts if he did not feel that they served a useful purpose. The Burmese Prime Minister, U Nu, had announced on Feb. 28 that, during his recent visit to Peking (see 14037 A), Mr. Chou En-lai had expressed willingness to receive an unofficial U.S. mission to discuss the case of the imprisoned airmen and all other causes of tension between the U.S.A. and China; U Nu added that he had conveyed Mr. Chou's message to Mr. Dulles.

A Canadian fighter pilot, Squadron-Leader A. R. Mackenzie, who was released by the Chinese Communists on Dec. 5 after being held for two years in a Chinese prison, stated at a press conference in Ottawa on Dec. 17 that he had only been released after he had signed a false statement to the effect that he was " invading " Chinese territory when he was shot down during

the Korean war. He stated that he had not been subjected to actual torture to secure the "confession," but said that the indirect pressure on him—which included 16 months of solitary confinement—had been even harder to stand. He also mentioned the names of three American airmen with whom he had spent the last six months in prison, and said that it could be assumed that they had signed similar "confessions."

Two American students, however, who were released by Communist China on Feb 27 after 3½ years in prison, referred on their arrival in Hong Kong to the "excellent treatment" which they had received from the Chinese The two students—Mr Malcolm Bersohn and Mrs Adele Rickett—admitted that they had been "spies" for the United States and that the Chinese had been justified in imprisoning them, and said that they were "full of shame and remorse" for what they had done They described themselves as "former reactionaries" who had learned "morality" as Communist prisoners, and declared that they now wanted to be "honest" and "help the people."

The State Department announced on April 3 that 76 technically trained Chinese students, to whom U.S. exit visas had previously been refused because it was thought that the knowledge which they had acquired in the U.S.A. might help the Chinese Communist war effort, would now be allowed to return to China. It was emphasized, however, that there was no question of an attempt to make a "deal" with Communist China over the 41 Americans detained there, though the State Department spokesman said that they would like "Americans of all categories in China to be released for whatever reason might appeal to the Red Chinese authorities." Earlier (March 1) the State Department had announced that the U.S. Government, through its Consul-General in Geneva, had presented a new demand for the release of the 41 Americans still held in China, on the ground of their "unwarranted detention."

A. UNITED KINGDOM. — Forthcoming Dissolution of Parliament and General Election.

Sir Anthony Eden, the new Prime Minister, announced in a broadcast at 7.30 p.m. on April 15 that Parliament would be dissolved on May 6 and that a general election would be held on May 26. The text of his statement was as follows:

"The announcement I want to make to you tonight is an important one, and I thought that I should give it to you myself The Parliament elected in 1951 is now in its fourth year. It is therefore not surprising that with a change of Prime Minister there should be expectation of a general election. Uncertainty at home and abroad about the political future is bad for our influence in world affairs, bad for trade, and unsettling in many ways. I believe that it is better to face this issue now

Accordingly, I have asked H.M. the Queen to grant a dissolution of Parliament on May 6, and her Majesty has been pleased to signify her acceptance of my recommendations Between now and then we shall invite both Houses of Parliament to deal with essential financial and other business.

Polling will take place on May 26 The advance notice which I am now giving is in accordance with the practice of recent years and will give all concerned time to make preparations for the election. The new Parliament will be summoned on Tuesday, June 7, when first business will be the election of the Speaker and the swearing-in of members. Her Majesty has graciously intimated her intention to open the new Parliament on June 14"

At the present time the Conservative Government has a majority of 20 over all other parties in the House of Commons and there are three vacant seats.—(Manchester Guardian) **(Prev. rep. 14129 A.)**

B. PAKISTAN. — Opening of Lower Sind Barrage.

Mr. Ghulam Mohammad, the Governor-General, formally opened the Kotri Barrage in Sind on March 15, thus marking the completion of Pakistan's greatest irrigation project.

The barrage, built across the River Indus near the village of Jamshoro, just over four miles upstream from Kotri, is designed to feed four big canals and to irrigate 2,750,000 acres in two districts of Hyderabad and Sukkur, with an expected annual increase in crop production from 170,000 tons to 750,000 tons. Water from the feeder canals on the right bank is to be used to form a lake 20 miles long and 45 square miles in extent, which will constitute a reserve for the water supply of Karachi and will afford facilities for the production of hydro-electric power

During the opening ceremony, Mr. Ghulam Mohammad stated that the Pakistan Government was engaged in implementing projects of a similar nature costing nearly 2,000,000,000 rupees (approx. £216,000,000), of which 500,000,000 rupees (approx. £54,000,000) had already been spent. Mr. Khuro, the Chief Minister of Sind, announced that one-third of the land benefiting from the barrage had been reserved for landless peasants, and that, in appreciation of the Governor-General's services to Pakistan, the barrage would be re-named the Ghulam Mohammad Barrage.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 13429 A.)**

C. SOUTH AFRICA. — Defence Policy. - Statement by Mr. Erasmus.

Mr. Erasmus, the South African Minister of Defence, made an important statement on the Union's defence policy in the Senate on March 7. Extracts are given below.

African Defence Organization. Referring to his talks in London last year (see 13913 C), Mr. Erasmus stated that he had discussed with the British Ministers the need for establishing such an organization for anti-Communist countries which had an interest in the defence of Africa south of the Sahara, and had pointed out that the lack of such an organization left a serious gap in the anti-Communist security network of the Western Powers. The proposal was now being considered by Britain, and he hoped that there would soon be an opportunity to approach the other Governments concerned.

In present day circumstances, Mr. Erasmus said, it must be accepted that the greatest danger for Southern Africa from a potential enemy was on the East Coast. One of the strategic objects of such an enemy would be to try to occupy the Persian Gulf area as soon as possible after an outbreak of war, because of its oil resources, in order to establish bases for air attacks on distant targets, and for obtaining a passage into the Indian Ocean Such a possibility was of "vital interest" to South Africa After referring to the establishment of U.S. bases in North Africa, the large-scale U.S. aid to Turkey, the Turkish-Iraqi treaty, and the long-term agreements between the U.S.A. and Ethiopia for the establishment of land, air and naval bases in Abyssinia, Mr. Erasmus said that in the light of this new picture the Union Government was of the opinion that discussions between the anti-Communist countries, including Britain and the U.S.A., had become essential with a view to establishing an African defence organization

In the meantime South Africa had taken steps to achieve greater defence preparedness. The Minister summarized the Union's defence policy as follows: (*a*) to defend South Africa against possible Communist aggression and to ensure that chaos would not arise as a result of the activities of fifth columns, (*b*) to keep a potential enemy as far as possible from the Union's borders. The place where this help could best be used, he said, could only be decided when an understanding was reached between the countries concerned about the defence of Africa, especially Africa south of the Sahara.

Army. In order to give help outside the Union's borders the Government was preparing a trained armoured task force, assisted by air support, for use if and when circumstances demanded. The deliveries of tanks, reconnaissance cars, armoured troop carriers, and accessories was progressing satisfactorily. Furthermore, the existing structure of the Army was gradually being revised to give greater mobility, coupled with the requisite striking power, which could be adjusted to meeting possible attacks by nuclear weapons.

Navy and Coastal Defence. The Government had decided to give particular attention to the defence of the South African coastline against possible submarine attacks, as well as to the defence of the Union's most important industrial centres, which today had come within range of possible air attacks. In view of the danger of submarine attacks, possibly with nuclear weapons, on important South African harbours they had decided to undertake an eight-year naval expansion programme Arrangements were being made to buy two modern electronically-equipped coastal minesweepers in 1955 and two harbour defence ships, the coastal reconnaissance maritime squadrons would be equipped with modern sea reconnaissance aircraft; long-distance *Shackletons* and *Venom* night-fighters had been ordered for training purposes. and modern helicopters would be bought to replace motor launches in air-sea rescue work. Mr. Erasmus also stated that a Joint Operations H.Q. was being built with a communications system which would ensure the closest co-operation between the Navy and the Air Force in coastal defence

Radar Network. Mr. Erasmus announced that the Government had decided to establish a radar network, which would take five years to build and would cost £5,000,000. This would be coupled with the provision of the necessary communications and the air striking power for the interception of hostile aircraft.

Air Force. It had been decided gradually to replace a number of the S.A.A.F.'s transport aircraft by modern four-engine planes in order to enable troops and supplies to be transported more rapidly. A three-monthly S.A.A.F. shuttle service had been introduced between the Union and London, which enabled pilots to get the valuable wind and weather service of the route, and which was also used to take military units overseas for training courses.

Defence Production. In so far as general military supplies were concerned the Union was today almost self-supporting. Where it had not been possible, however, for South African industry to supply the necessary arms and equipment the Government had established special factories, such as the defence equipment workshops near Pretoria, which had been set up for the Defence Department by the B.S.A. and were expected to begin production in 1955.

Asked by Senator Ballinger (Natives' Representative) about the Government's policy regarding the employment of coloured and native workers in the armed forces, Mr. Erasmus replied that there had been no change. They were prepared to have Coloured people as cooks and camp staff, but would not train or arm them, whilst so far as the Natives were concerned the Government had "learnt a lesson" and did not intend to arm them, give them any military training, or to use them in any military capacity either inside or beyond the boundaries of South Africa.—(Cape Times - Die Burger) **(Prev. rep. 13913 C.)**

APRIL 16—23, 1955

A. UNITED KINGDOM. — The Budget, 1955-56. - Income Tax Reductions. - Purchase Tax on Cotton, Rayon, and Linen Textiles halved.

The Chancellor of the Exchequer, Mr. R. A. Butler, introduced the Budget for 1955-56 in the House of Commons on April 19. Estimates of Ordinary Revenue and Expenditure are shown in the following table:

ESTIMATED REVENUE

	£
Inland Revenue—	
Income Tax	1,877,400,000
Surtax	136,000,000
Death Duties	185,000,000
Stamps	74,000.000
Profits Tax and Excess Profits Tax	180,000,000
Excess Profits Levy	25,000,000
Other Inland Revenue Duties	1,000,000
Total Inland Revenue	2,478,400,000
Customs and Excise—	
Customs	1,131,700,000
Excise	796,050,000
Total Customs and Excise	1,927,750,000
Motor Vehicle Duties	80,000,000
Total Receipts from Taxes	4,486,150,000
Broadcast Receiving Licences	25,000,000
Receipts from Sundry Loans	24,000,000
Miscellaneous	175,000,000
TOTAL REVENUE	4,710,150,000

ESTIMATED EXPENDITURE

	£	£
Interest and Management of the National Debt	*600,000,000

TOTAL EXPENDITURE	4,561,875,000	
SURPLUS	148,275,000	
	44,710,150,000	

SELF-BALANCING REVENUE AND EXPENDITURE

	£
Post Office expenditure corresponding to revenue	257,350,000
Excess Profits Tax, Post-war refunds (part deducted for tax)	2,500,000
Total	259,850,000

* In addition £120 million for Interest on the National Debt will be met from receipts under various Acts authorising such application.

The changes brought about by the Budget are set out below.

Income Tax. A reduction of the standard rate of Income Tax by 6d., i.e., from 9s to 8s. 6d. in the £, and of the lower rates by 3d., i.e., from 7s. to 6s. 9d., from 5s. to 4s. 9d., and from 2s. 6d. to 2s. 3d.

An increase of the personal allowance for single persons from £120 to £140, of the allowance for married people from £210 to £240, and of the allowance for each child from £35 to £100 At the same time the band of taxable income charged at the lowest rate was reduced from £100 to £60, so that the first £60 of taxable income will be charged at 2s. 9d., the next £150 at 4s. 9d., and the next £150 at 6s. 9d , before the full rate of 8s. 6d. will apply.

The income limit for small income relief (whereby relief from tax is given on two-ninths of the total income instead of on two-ninths of earned income only, thus extending the earned income allowance to small investment incomes) was increased from £250 to £300.

The income limit for the allowance for dependent relatives was increased, so that the full allowance will be given where the relative's income does not exceed £105, the allowance thereafter being reduced by £1 for each £1 by which the relative's income exceeds that figure.

The special emoluments limit of £52 applicable to child allowances for apprentice children (i.e. those undergoing training for a trade, profession, or occupation) was abolished, so that the full child allowance may now be claimed in all such cases provided the child's income does not exceed £85 a year.

The new rates, which will remove 2,400,000 taxpayers from Income Tax liability altogether, will operate for P.A.Y.E. purposes from the first pay day after July 5.

Purchase Tax. A reduction from 30 per cent to 25 per cent in the tax on textile tissues and fabrics, domestic textile articles (sheets, towels, etc), and domestic soft furnishings, made of cotton, rayon, linen, and other non-woollen materials, as well as on plastic sheeting; the reduction to apply to goods delivered by manufacturers, wholesalers, or importers after April 19. Materials containing 15 per cent of wool or less will not count as woollen material

The Chancellor's Budget speech is summarized below under cross-headings. In his speech, Mr. Butler pointed out that in view of the impending general election there would be a change in the normal practice inasmuch as there would be no time for the House to consider a comprehensive Finance Bill. The Bill he would propose for enactment before the dissolution, and the Budget resolutions, would therefore be confined to such clauses as were needed to give effect to his Budget proposals and to carry on the finances of the nation, and in view of their restricted scope there would be a corresponding restriction in the opportunities for moving amendments and new clauses. This procedure followed "the practice adopted on previous exceptional occasions of this kind" [i.e., before the 1929 elections], and it would then be for the next Government to consider whether any further fiscal legislation was necessary later in the year.

Progress in Economic Recovery and Expansion. "This year," Mr Butler said, "the Budget comes at a particularly tantalizing time, both from the political and the economic point of view It is therefore more than ever necessary that the Committee should exercise its soul in patience, and should analyse with me the facts and features of the economic situation in as objective a manner as our various temperaments permit ..

During this last year we have learned much about the problems which we must solve if we are to succeed in combining expansion and stability, particularly when competition is becoming fiercer and the terms of trade are less favourable But the expansion of the economy has brought with it many improvements in living standards for our people

Let us look for a moment on the sunny side of things In each of the past two years the average person has been able to buy for his own use 4 per cent more goods and services than in the previous year. Since October, 1951, real wage rates, which make full allowance for changes in the cost of living, have risen by 6 per cent in contrast to the period between mid-1947 and 1951 when they were falling. Over the same period, to October, 1954—the latest date for which figures are available—earnings in industry, again in real terms allowing for changes in the cost of living, rose by 9 per cent.

There have also been very substantial increases in social service payments, some by more than a half again in value, none by less than a quarter. For example, the weekly rate of sickness benefit, which was 26s in October, 1951, will be 40s.; and the corresponding figures for industrial injuries benefit are 45s. and 67s. 6d. When our new scales are fully effective, the increase in retirement pensions, sickness and unemployment benefit, and family allowances since October, 1951, will be much greater than the increase in the cost of living—in some cases more than twice as much, in some nearly four times as much The Government have deliberately helped old age pensioners and those who rely on the social services. We have also reduced the burdens on every taxpayer. Rising real wages, rising benefits, falling taxes, all these are clear signs of improving standards.

In introducing this, my fourth Budget, I have to take account of all these improvements Can we have them and more, too? How does this Budget fit into a series designed from the beginning to keep up the momentum of our progress? My aim in 1952 was to rescue and fortify sterling The following year I deliberately gave the incentives needed to encourage effort and the expansion of production. New spirit was infused into industry. Last year, some people thought that I might have been a little more expansive and a little more expensive But I am satisfied that what happened justified my decision and my judgment The expansion of the economy continued throughout 1954. Employment kept at a record level. Industrial production rose by more than 6 per cent. The increase in exports, which began late in 1953, was well sustained. Home demand for

manufactured goods expanded. Stocks and work in progress increased, and the rise in investment continued.

The Committee is aware of our substantial investment in our basic industries of coal, steel, gas, and electricity; of our massive designs for modernizing road and rail transport; of the increase in factory building; and of other encouraging signs that the demand for investment in private manufacturing industry is rising in response to the incentives of my last two Budgets. In fact, our experience over 1954 has shown us how rich an opportunity we have of increasing the future standard of living of our people. Now we must decide how we can best maintain our progress and, at the same time, keep in balance with the rest of the world."

Balance of Payments. "I now come to consider the balance of payments situation against which we must look at all I have just been saying. The past year has shown that, while it is right to run our island economy in a free and expanding mood, problems can spring from the very success which it has been our happy lot to achieve. The increase in our production, which is so important both for our export trade and for the maintenance of employment, necessitates a rising level of imports of raw materials for our factories. We are also eating more and importing more food. And we are importing more, unfortunately—and exporting less—coal. Before the war we always had a substantial surplus of coal to export to our friends and customers overseas. But by 1954 lack of coal cost us many millions in foreign exchange for imports, and still more if we take account of lost opportunities to expand our overseas earnings. More coal, more efficiently used, would be one of the most substantial reinforcements to our balance of payments which our own efforts could contribute.

The U.K.'s balance of payments has also been affected by the alteration in the terms of trade. In my last two Budget speeches I reported that we were profiting by the terms of trade, which had been moving in our favour. During the past year the movement was reversed. The index of import prices began to rise in April, 1954, and for February, 1955, was 7 per cent higher than in the first quarter of 1954. At the same time, export prices did not increase until February of this year, when a rise of 1 per cent was recorded.

The result to date has been that on the provisional estimates for the six months from October, 1954, to March, 1955, our imports c.i.f. at about £1,875 million were some £225 million higher than in the corresponding period 12 months earlier; but our exports at £1,460 million rose by only £40 million. The tables in the Balance of Payments White Paper show in detail the effect of these changes. . . .

For 1954 the U.K.'s surplus is provisionally estimated at £160 million, but we earned the whole of this surplus in the first half of the year. The Committee should note that, although there was a welcome increase in receipts from offshore contracts, American defence aid was halved as compared with the year before—the total for 1954 being only £50 million. We are grateful for this aid, especially for the programmes designed to help our expanding Air Force; but we are proud that our own efforts, reflected in full employment and rising production, are making us increasingly independent. Those efforts have had and will have a profound effect on our economy, our morale, and our influence in world affairs

The balance of payments of the whole sterling area in 1954 shows much the same pattern of change. The provisional estimate for the calendar year as a whole shows the sterling area roughly in balance with the rest of the world; but a surplus in the first half year was followed by a deficit in the second. All this was reflected in the level of the gold and dollar reserves. During 1954 these rose by £87 million to £986 million, but the record reads differently for the two half-years In the first six months the reserves rose by £179 million, but in the second half-year they fell by £92 million. This decline must be seen in perspective. In this last period we not only had to meet the normal annual payments on the American and Canadian Loans, but we also repaid in gold or dollars £40 million to the International Monetary Fund, and £39 million in part discharge of our debt to the European Payments Union. That is, in all, £79 million of debt paid. Thus we fortified our capital account by repaying debt.

Moreover, the sterling area's reserves exist to be drawn upon in case of need. Indeed, in Sydney, over 15 months ago, the Finance Ministers of the Commonwealth accepted the fact that, important as programmes of internal development are as an investment for the future—and we have all been going in for them in the sterling area—they inevitably result in some immediate strain on the sterling area's balance of payments This impression and outlook we confirmed when we met in Washington in September of last year. The relatively small decline in the reserves must, therefore, be seen in due proportion.

I can sum it up like this, that apart from the special repayments which I have mentioned, the loss in the whole of the nine months from mid-1954 to the end of the first quarter of 1955 has been no more than £46 million—only about half the average monthly loss in the corresponding nine months of 1951-52. Therefore, at £953 million, the end-March figure, the reserves are more than £350 million above their lowest point, which they reached in April, 1952, just after I introduced my first Budget."

The Measures of February 24. "Nevertheless, it became clear by February that we needed to take action to moderate the growth of imports and to encourage exports. And from the result, all I can say is, thank goodness that we took action in time. To take such action the Government of the day has, broadly speaking, one of two choices. The first is to limit and control the supply of goods which the consumer at home can buy. But there is an alternative, namely, to check spending at home by more flexible methods. The former course would involve a return to curtailment of trade, both at home and abroad, a return to controls on consumer choice, even perhaps a return to rationing. We do not believe in a policy of this kind.

It is only by looking forward and outward, by expansion, by liberating the human spirit to give and do of its best, that our island people can survive. This is the road we prefer—an adjustment of fiscal and monetary policy which, without cramping or distorting the natural vigour of the economy, maintains the disciplines which are essential to an expanding community. It was in this faith that in February credit control was applied; the Bank Rate was raised, hire-purchase transactions were restricted, and finance for such business was limited. At the same time, I authorized the Exchange Equalization Account to operate with wider discretion in overseas exchange markets. This was certainly a case of putting in the troops to save sterling from being sold at too great a discount, thus losing business for Britain as well as dollars for our reserves.

I see that it has been suggested that we have departed from our policy of a collective approach with the Commonwealth, Europe, and the U.S.A. to the solution of the world's trade and currency problems. This is not so. We still seek to find with our partners the best method of freeing our payments to match the widening of our trade and the opening of markets.

I am glad to say that already, in the field of the exchanges, our action has produced distinct results, which have taken the shape which I had hoped for. For example, . . . the sterling-dollar rate has risen from about 2.78⅛ dollars in the third week of Febrary to just over 2.79⅛ dollars, and the rate for transferable sterling from under 2.72 dollars to just over 2 77⅛ dollars. That is a very considerable rise. This shows that the action which we have taken to meet the needs of our balance of payments has strengthened international confidence in our policies and our determination to carry them out. We have thereby fortified sterling.

It will, naturally, take some time for the effects of the Bank Rate and of the tightening of credit to make themselves fully felt on our balance of payments. Our import bill, as the March import figures show, will inevitably continue for a time to be affected by decisions taken and orders placed before the measures of Feb. 24—at any rate for a time But the situation has been brought under control, as, for example, is shown by the movement of the reserves since then and the latest rates for sterling. Of course, we cannot be satisfied yet, and we shall remain very watchful."

Out-turn for 1954-55. After explaining that the "alternative classification" of the Government accounts, which had been introduced by the late Sir Stafford Cripps in 1948 as an experiment, had been dropped in this year's Financial Statement as "other and better methods of economic analysis had since been developed in the annual publications of National Income and Expenditure," the Chancellor summarized the results of 1954-55 as follows: "Total revenue amounted to £4,738 million, which is £205 million more than my Budget estimate Inland Revenue duties were £2,541 million, or £157 million more than the estimate of £2,384 million. About half of this excess came from Income Tax, which yielded £1,893 million against the estimate of £1,800 million. The yield from profits assessed under Schedule D was about £40 million above the estimate, and P.A.Y.E. on wages and salaries brought in £50 million more than was expected—which reflects, among other things, the rapid increase in employment and industrial activity which we have achieved this year. The other main contributors to the higher yield were death duties, stamp duties and Excess Profits Levy, which showed increases of £24 million, £20 million, and £16 million respectively over the estimates. The first two, death duties and stamps, are due mainly to the rise in Stock Exchange prices over the year; the last, Excess Profits Levy, is due to the clearing up of difficulties which had delayed assessments. Profits Tax and Surtax were very close to their estimates.

These high yields of Inland Revenue are matched by the performance of the Customs and Excise duties. These amounted to £1,872 million, £90 million above the estimate. About half of this increase is accounted for by Purchase Tax, which produced £342 million, or £47 million more than I estimated, a striking indication of the rising level of demand, particularly for cars and durable consumer goods of all kinds. Tobacco produced a revenue of no less than £650 million, or £17 million above the estimate. Beer, wines, and spirits yielded a total of £390 million, £9 million more than the estimate, though the Committee should note that within this satisfactory total beer was down by £4 million Receipts from the duties under the Import Duties Act, 1932, were above expectations, yielding a total of £62 million, or £6 million over the estimate.

Non-tax revenue was lower than my estimate—£246 million, compared with £290 million. Smaller receipts from sales of the Ministry of Food's stocks are the main reason for this change.

Now for expenditure. While revenue exceeded expectations, expenditure fell short of them. Consolidated Fund Services amounted to £665 million, or £2 million less than the Budget estimate. Supply services cost £3,640 million, or £216 million less than my forecast. This shortfall was shared by both defence and civil supply. The estimate for defence was £1,555 million; actual expenditure was £1,436 million, a shortfall of £119 million, in spite of the fact that appropriations-in-aid from the sterling counterpart of economic aid and other receipts from the U.S.A. amounted to £61 million, or £24 million less than my original estimate. The reasons for the shortfall in expenditure on defence have already been described in the Defence White Paper and during our debates on it.

Civil expenditure, at £2,204 million, was £97 million less than my estimate, in spite of Supplementary Estimates during the year amounting to £42 million. The savings here are spread over a large number of items, but are shared mainly by the Ministries of Food, Materials, and Supply. In total, expenditure under all heads amounted to £4,305 million, a saving of £218 million.

I budgeted last year for a small surplus of £10 million. In fact, we have realized a surplus of £433 million Of the difference of £423 million, increased revenue accounts for £205 million and lower expenditure for £218 million. Below the line receipts for the year were the same as the estimate of £191 million; but expenditure, at £692 million, was £94 million bigger. Three items account for practically the whole of this excess. The first is a larger volume of advances to local authorities by the Public Works Loan Board which involved the Exchequer in issues of £353 million, or £53 million more than the estimate. The second item is a new one, £45 million advanced to the Post Office for capital expenditure. This follows from the Post Office and Telegraph (Money) Act, 1953, under which the Exchequer took powers to make advances to the Post Office which had previously been made by the Savings Banks funds. The third item is an increase in Exchequer advances to the National Coal Board for capital purposes which at £75 million were £16 million more than the estimate.

As a result, total net payments below the line amounted to £501 million, or £94 million more than the Budget forecast But owing to the surplus of £433 million above the line, all but £68 million was met from revenue. Most of these payments below the line are made to finance capital expenditure by local authorities Housing is, of course, the main item. This expenditure, and the money spent by the National Coal Board and by the Post Office, are matched by an increase in the useful physical assets of the country."

National Debt. "The National Debt outstanding at 31st March, 1955, was £26,933 million, an increase of £350 million over the year Apart from the £68 million borrowed to cover the deficit below the line—which, as I pointed out, was nearly covered by revenue—this increase was primarily due to the provision of an additional £300 million for the sterling capital of the Exchange Equalization Account to enable it to finance the increase in the gold and dollar reserves early in the financial year. The Exchequer also issued £35 million of Government stock for coal compensation. These increases were offset by £36 million of debt redeemed by application of sinking funds and by the cancellation of £13 million of stock tendered for steel shares, together with £4 million for other adjustments.

The principal changes in the composition of the Debt are as follows: Floating Debt rose by £427 million, largely as a result of the issue to the Exchange Equalization Account During the year £292 million of 3 per cent National Defence Loan, 1954-58, £413 million of 1¾ per cent Serial Funding Stock, 1954, and £650 million of 2½ per cent Exchequer Stock, 1955, were converted into securities maturing in later years. As a result of these operations, the amount of the three loans remaining to be paid off on maturity during the year was reduced to £234 million—a notable achievement. A new cash issue of £300 million of 2 per cent Conversion Stock, 1958-59, was made in conjunction with the first of the conversion operations just mentioned . . ."

National Savings. "One success story of the past year of which we can all be proud is the record of the National Savings Movement. After passing through a difficult phase the Movement had begun to show signs early in 1954 of a change for the better. As the Committee will remember, I was able to report in my last Budget speech that in the first quarter of 1954 new savings had exceeded withdrawals by about £40 million, and that this was £30 million more than a year before. But in the same period this year new savings have exceeded withdrawals by £80 million—twice as good as a year ago. And over the financial year as a whole there is a net gain in savings of £120 million, compared with a net loss in 1953-54 of £12 million —an improvement of over £130 million. I am sure that the Committee will greet this as a remarkable and heartening achievement in which we can take proper pride in this year's appraisal of our affairs . . ."

Revenue Estimates for 1955-56. "I . . . propose first to look at the Budget accounts, starting above the line. On the basis of existing taxation I estimate total revenue to be £4,844 million, an increase of £106 million over the actual yield in 1954-55 Inland Revenue duties in 1955-56 are expected to provide £2,610 million, an increase of £69 million on the out-turn for 1954-55. From Income Tax I expect to receive £2,009 million, or £116 million more than last year. This increase will come partly from the higher profits of the past year, and partly from the effect over a full year of recent increases in wages and salaries. The yield of Profits Tax is expected to rise by £7 million to £180 million, but the yield of the Excess Profits Levy will naturally fall, to about £25 million. I look for a further small increase in Surtax, which will bring the yield up to £136 million. Death duties at £185 million, stamp duties at £74 million, and miscellaneous Inland Revenue duties at £1 million, are expected to bring in approximately the same amounts as last year.

I estimate the revenue from Customs and Excise duties at £1,930 million in 1955-56, compared with £1,872 million last year. The principal items in this total which I forecast are: tobacco, £660 million; beer and other alcoholic drinks, £388½ million, Purchase Tax, £370 million; oil, £320 million; duties under the Import Duties Act, 1932, £70 million; Entertainments Duty, £41 million; and betting, £28½ million. After taking motor duties of £80 million into account I estimate total tax revenue in 1955-56 at £4,620 million, an increase of £128 million over the yield in 1954-55 From non-tax revenue I expect £224 million, or £22 million less than the actual yield in 1954-55"

Expenditure Estimates for 1955-56. "I estimate total expenditure above the line in 1955-56 at £4,562 million—an increase of £39 million over the Budget estimate for 1954-55. Practically the whole of this increase is accounted for by the Consolidated Fund services which, at £699 million, are £32 million more than last year's estimate. This increase arises on the provision for debt interest, which reflects recent developments in the money market, and is, of course, particularly influenced by the increase in the rates for Floating Debt

Expenditure on Supply in 1955-56 is estimated at £3,863 million and is only £7 million more than the original estimate of a year ago. Within this total, net expenditure on defence at £1,494 million is £61 million less than the original estimate of last year, despite a reduction of £42 million in the estimated receipts from American aid Civil expenditure, at £2,369 million, is £68 million more than last year's original estimates . . . These expenditure figures . . . do not include the additional cost arising from the Special and General Agricultural Price Reviews recently concluded. This cost, as has already been announced, will amount to £14 million in all during 1955-56, and will be provided, along with other changes likely to be necessary in the existing provision for food and agriculture, by further Estimates in due course.

To round off the main outlines of the picture, I must mention that below the line I expect a further increase in net payments, from £501 million last year to £584 million in 1955-56. The main factors are smaller receipts from Housing Votes and from the Raw Cotton Commission; a whole year's advances to the Post Office instead of only part of a year, larger advances to the National Coal Board; and heavy payments to clear up the large arrears of compensation which accumulated while we recast the scheme of the Town and Country Planning Acts All these much more than offset the reduction of £33 million in loans to local authorities which we can reasonably look for after their spurt in the past few months. I am estimating these loans at no less than £320 million this year.

Now to return to the Supply figure. I spoke at some length last year about the urgent need to control expenditure, and to achieve savings wherever possible, in order that the economy may carry, without undue strain, the heavy burdens which both external circumstances and our domestic policies impose upon it. The major strains are due, of course, to the continuing high level of defence costs and to the inevitable growth of the cost of the social services Moreover, we have had to make provision for unavoidable increases in salaries; and, although additional expenditure is involved, nobody is more glad than I that the cautious hopes which I expressed last year on the subject of equal pay have already been realized, and have been embodied in a firm agreement with the staff associations. This is now in operation The wishes of Parliament have been carried out by this Government.

It is true that on both the defence and civil sides last year's expenditure was appreciably less than the figures I had budgeted for, so that this year's estimates represent a corresponding increase over last year's actual outgoings Nevertheless, the fact that on a total of well over £3,800 million of Supply Expenditure this year's Estimates are only £7 million higher than those of a year ago shows, I think, that during the last 12 months we have been making a special and sustained effort to curb non-essential expenditure. That effort has contributed not a little to enabling us to accommodate the inevitable growth in the cost of some of our essential policies. Let me say for a moment or two what these are."

Defence Expenditure. "First, defence. I said last year that we must see to it that we obtain some definite relief from the defence burden. The plans which were then in existence would have meant a considerable increase in expenditure in 1955-56. But as a result of a full review of our strategic needs and a careful scrutiny of the estimates over the whole field, provision for defence has been kept at a level which, broadly speaking, is not very different from the actual expenditure of last year. This is welcome so far as it goes; but the development of new arms, the changes which will follow the end of the occupation in Germany, and the continuing reduction of American aid, all emphasize the importance of maintaining our efforts to secure, within the new strategic framework, all possible economies in this field.

Agriculture and Food. "Coming to civil expenditure, I will just mention agriculture and food. There are always a good many questions about what the agricultural policy costs us, so I have analysed it as follows: the total cost of the production grants and subsidies paid by the Government is estimated at £323 million. Of this sum, production grants, which go direct to farmers to help meet their bills for fertilisers, lime, and so on, account for £54 million. The agricultural price guarantees, together with a small amount for the related trading services, amount to £163 million. To this, £29 million must be added for the net cost of the price guarantee on milk for the ordinary consumer. The last three figures I have given add up to £246 million, and this—for the Committee's interest—is the measure of the cost of supporting our home agriculture. The rest of the £323 million is made up by the bread subsidy of no less than £41 million and the welfare subsidies, which includes children's milk, and so forth, at £36 million.

Last year, in discussing this field of expenditure, I said that our task was to reconcile two needs—the need to secure a greater measure of financial control, and the need to preserve the stability of the farming industry, in the interests of farmers and workers, and of national security. Both needs were very much in my mind during the recent Annual Review. The stability of the industry, and, in particular, its ability to finance improvements and adjustments in methods of production, were threatened for two reasons. First, there had been a marked increase in the costs of farming Secondly, the farmers and farm workers have been struggling manfully under the stress of exceptionally severe and difficult weather over the last 12 months. I think that the Committee would wish me to give a special word of praise to the spirit in which the farm workers apply themselves to their varied tasks all the year round . . . Moreover, I wanted to adjust the price guarantees to help our balance of payments.

Thus, we increased the ploughing and fertilizer grants, and the guaranteed prices for barley and oats, so as to reduce our imports of feedingstuffs by encouraging the growth of more of these crops at home Together with coal, to which I referred earlier, the cost of imported feedingstuffs has been a major factor weighing down our balance of payments. We were also obliged to avoid the danger of a Gadarene herd of expensive pigs rushing us into bankruptcy, so we reduced pig prices."

Social Services. "The other large bloc of civil expenditure is concerned with the social services At the beginning of 1954-55, quite apart from the Exchequer contributions to the National Insurance Funds, these were expected to cost £1,260 million. They have, in fact, cost £1,278 million; and for 1955-56 it is expected that they will cost £1,315 million. Let us examine some of the other details Comparing the original Budget estimate for last year with my present estimates for 1955-56. the Health Service shows an increase of £32 million; education, including grants to universities, an increase of £25 million; and war pensions, following the recent rise in the rates, an increase of £8 million. The Exchequer contributions to the National Insurance Funds are also, as the Committee well knows, a growing and inescapable commitment, and in the coming year, as a result of the action taken by Parliament last December, they will demand £100 million compared with £78 million for last year. The increased cost of the items I have just mentioned amounts to no less than £87 million. This is more than the whole of this year's increase in Civil Supply, and is striking evidence of the fact that, in this field of social services, a growing burden on the Exchequer is to be reckoned with

Much of the increase in expenditure is contractual, while the remainder represents what I am convinced is a worth-while investment in the future well-being of the country. Investment in human health, wider opportunity, and increased technical skill means something more than "investing in success." It means the assurance of a happily working and socially responsible democracy. But if we are to carry this burden . . we must not only maintain the increase in the national income, but also be constantly watchful that all our existing services are administered as economically as possible. We must, at the same time, examine with a critical eye all the many additional claims which are constantly being made on the Exchequer for new services, so that the basic social needs of our people come first"

Exchequer Prospects on Existing Basis of Taxation. "During the past year we have maintained a vigilant watch on both the totality of Government expenditure and its detailed distribution. Had we not done so I should not now be able to lay before the Committee the prospect of so favourable an Exchequer out-turn for 1955-56 on the existing basis of taxation. Expenditure of £4,562 million, revenue of £4,844 million, a surplus of £282 million This last is a very considerable sum. Before I can say how much of it—if any—should be given back to the hard pressed taxpayer, I must look ahead and analyse briefly the likely demands to be made upon us abroad and at home in the coming months . . . What, in fact, are the probable calls upon our resources, and what are our chances of meeting these calls, while combining a vigorous expansion of production at home with the maintenance of a healthy balance in our overseas account?"

External Prospects. "It is not enough for us to earn abroad sufficient merely to meet the cost of our imports. We have also to repay our debts; and we have to resume our traditional position as the main supplier of capital for the development of the Commonwealth and Colonial Empire, which offer such inspiring opportunities. We have taken on heavy liabilities to the Colonies under the Colonial Development and Welfare Acts and our participation in the Colombo Plan. We are also making increasing facilities available to Commonwealth Governments in the London market. All these external liabilities add up to a formidable call on our resources. We shall succeed in meeting this call only if we play our full part in establishing two prior conditions. First, we must seek to ensure an expanding volume of world trade in conditions which give our industry every chance to share in it Secondly, we must be sure that British industry is equipped to take full advantage of this chance by its efficiency and initiative.

What are the prospects for an expanding and freer world trade? It may be said that we have been trying to recreate the ideal conditions envisaged by Adam Smith and Cobden, and that to attempt this in a world of selfish and protectionist lobbies is no more than ineffectual idealism. But, in fact, our policies have been open-eyed in their realism. They spring from our conviction that without a system of trade rules and open trade behaviour, applied to our competitors no less than to ourselves, our exports would be exposed to every kind of restriction and retaliation, and our island interests would be submerged. That is why we have got together with our colleagues in the Commonwealth and our friends in Europe, in the O E.E.C., and the U.S.A. in a fresh effort to remove barriers to the free flow of trade and payments.

Last year we were concerned about the possible effects of a recession in America. But I am glad to say that the Government and people of the U.S.A. did much to stem the threatened decline in their output; and now there is an upsurge of renewed confidence and re-invigorated production in that country. This general revival of industrial activity in the U.S A. should benefit not only America herself but also the rest of the free world—the more so if President Eisenhower's fresh initiative in developing more liberal trade policies commands the support of all men of good will.

In Western Europe trade and production are still rising, and it was largely due to that recovery that we got through last year so well. It has been a great satisfaction to me, as Chairman of the O.E.E C., to watch, applaud, and encourage this expansion in Europe—an expansion which is reflected in the current plans for further removal of restrictions on trade this year.

The Committee will wish to study the White Paper . . outlining the Government's policy towards the changes in the G A T.T. recently negotiated in Geneva; but I can say now that the G.A.T.T. emerges from this review as an instrument better adapted to reinforce our efforts to liberate trade The instrument is there to our hand; it is for the member-countries to use it. Looking outwards, some of our export markets may be difficult—in Australia, for example, where our friends have recently announced reductions in their imports in the interests of the sterling area's balance of payments and of their own. But, in general, there are good prospects that world markets will offer us substantial opportunities to increase our exports this year. But we shall not achieve this essential increase unless our goods stand up to competition, particularly from the U.S A., Germany, and Japan If we are to be competitive, above all in price, we must combine a policy of incentive and expansion with continued restraint in the demands which we make on that expansion for our own personal satisfaction. I must warn the Committee that between 1953 and 1954 output per man, over the economy as a whole, rose by about 2½ per cent; but the increase in wage rates was over 4 per cent. Clearly, if this tendency continues, prices will be subject to constant upward pressure, and the effects both at home and in export markets will be adverse.

We must certainly watch other personal incomes also—for example, dividends. It would be as well if, before cheering, hon. Members would keep matters in their true perspective. The Committee will have observed from the Economic Survey that personal incomes from rent, interest, and dividends rose last year by £60 million or about 4 per cent, while wages and salaries rose by £645 million, or about 7½ per cent. Nevertheless, it remains true that, whatever source of income we consider, any tendency for money incomes to increase faster than productivity must lever up prices, or tilt the balance of payments against us, or both. The country should realize that there is a limit to the additions to our costs and prices which we can afford, if we are to remain competitive with our keen rivals in export markets."

Home Prospects. "Now I come to the analysis of likely home demand. If we consider the whole range of the economy, will there be room for an increase in exports? It is in the light of this fundamental question that I must assess the claims which home demand seems likely to make on our productive capacity in 1955. I will do it under four heads, very shortly in a few sentences. How much will be taken by Government expenditure; by investment, by stock-building; and by personal consumption, that is, by people spending on themselves?

Taking, first, expenditure, I calculate that, in real terms, Government expenditure on goods and services in the coming year is likely to be about the same as in 1954-55.

Now, investment. The upward trend in fixed investment is continuing. Housing is not likely to show so great an increase this year; but investment in the nationalized industries should continue to rise at about the same rate as in the past two years, the largest increases being in coal and electricity. I have already referred to the encouraging indications that, in private manufacturing industry, demand for factories, plant, and machinery is rising . . There is no reason why the recent increase in interest rates should discourage sound long-term investment. Indeed, the need for the type of investment which will raise productivity and expand our productive capacity is as great as ever; and the conditions of orderly economic growth, which our monetary policy is designed to foster, are precisely those conditions in which long-term investment can be undertaken with the surest hope of success. We are looking, then, for a real increase in investment in manufacturing industry this year. Summing up investments, therefore, I would say that over the whole field, public and private, I expect investment in 1955 to increase by at least the same amount as last year; but productive industry is likely to take a larger, and housing a smaller, share of this increase.

Next we come to stocks. The movement of investment in stocks and work in progress is, as always, very difficult to foresee There was a marked increase during 1954, which, as I have already pointed out, was one of the factors in our expansion. Our present rate of stock-building should be at least enough to meet the needs of expanding production The recent change in the Bank Rate was designed partly to emphasize the need for caution in the accumulation of stocks. Thus I estimate that stockbuilding will not take more of our resources than it did last year.

Finally, I must consider the prospects for personal spending and consumption. There have been substantial increases in wages. But prices have also risen to some extent, and the restraint which we have reimposed on hire-purchase transactions should also help to prevent an excessive growth of personal consumption Moreover, the rise in personal savings which has occurred during the last few years should be well maintained. I do not, therefore, expect personal spending and consumption to rise as rapidly this year as last.

Taking all these considerations into account, I estimate that the increase in home demand should be appreciably less than it has been in the last two years. On the other hand, the scope for increased production is at least as great as it has been in the past, if not greater. In each of the last two years output per man in industry has risen very encouragingly. Throughout the same period, new projects of investment have been put in hand, while industry has been showing itself increasingly aware of the need to raise productivity, and increasingly eager to explore the possibilities of new techniques and methods of production. In these circumstances, and taking into account the resources of a flexible monetary policy, I judge that the

claims which domestic demand is likely to make on our production will leave a margin for an increase in exports. Any incentive I can give should clearly be directed towards increasing production and, therefore, this margin."

Budget Policy. "What, then, should be my final Budget judgment? This year there are clear limits to the possibilities of large remissions of taxation, especially of indirect taxes which would encourage spending at home and so risk diminishing our export effort. With very full employment, higher social benefits, increased old-age pensions, generous support prices for agriculture, and better pay packets, our people must realize that all the good things of life are not, and cannot be, confined to Budget day. Indeed, some might urge that no tax concessions at all should be made this year But I judge that this would be a timid policy which might prevent us from achieving the full increase in production of which we are capable

In conditions of stricter monetary discipline, industry will have to scrutinize its plans with a shrewder and more selective eye. The plans should be all the better for that. They should, therefore, be all the more likely to show the maximum return to the whole economy from any encouragement I can give them. We do not want to smother the new spirit in British industry which many observers believe is transforming our approach to production problems. I believe that, given a continuing incentive, both management and men will accept the challenge to redouble the efforts which they are now making and so increase production and improve exports.

Since I became Chancellor of the Exchequer 3½ years ago, I have continually called for investment and expansion, and I have adopted whatever measures were within my power with this in view. There are risks in everything that is worth doing, and, on the analysis which I have made, I feel no hesitation in deciding where my duty lies between policies of expansion or of restriction. If we are to achieve the full increase in production of which the economy is capable, we must continue to provide encouragement to the whole productive effort of the country. We must seek fresh incentives to the forces of growth by the stimulation of output and productivity.

I come now to my Budget proposals. The advice which I have received this year has been almost unlimited. The representatives of industry, commerce, and organized labour have sent me their annual suggestions; my hon. friends and I have received many deputations from various interests affected by taxation, particularly by Customs and Excise duties. We have had before us the Second Report of the Royal Commission on Taxation (see 13616 A). The most obvious conclusion which my hon. friends and myself draw from all these representations is that the sheer burden of taxation is far too great. Both from the personal angle and from that of industry, we remain one of the most heavily taxed nations in the world. I am convinced that some further lightening of the load is needed to give industry the spur to be more competitive. The question is how to choose a method of relieving the burden which is likely to increase rather than to diminish confidence in our financial policy at home and overseas."

Purchase Tax. "I do not feel justified this year in making any general reductions in indirect taxation I have considered carefully the representations that Purchase Tax is bearing heavily on some sections of the textile trade. Their difficulties are due to a variety of causes, not least to the loss of export markets. Today, I am dealing only with the Purchase Tax aspect of these difficulties. No adjustment of Purchase Tax can be a panacea for the complex problems of any industry But the Government have great sympathy with the difficulties which are being experienced at present in Lancashire, and also in Northern Ireland As evidence of our desire to help, I am proposing forthwith to reduce the rate of Purchase Tax by half from 50 per cent to 25 per cent on piece goods and sheets, towels, and other household textile articles of cotton, linen, rayon, and other non-wool materials. An important result will be to halve the tax on quality furnishing fabrics and household textiles, and so to provide a better market for these goods, thus encouraging production and aiding exports. The D allowances which may be made from the value before calculating the tax will not be affected. These changes will take effect from midnight, and they will cost me about £2½ million this year and £3 million in a full year . . ."

Income Tax. "I now come to my final Budget decisions. This year I have had to bear three considerations in mind. First, if we are to continue to preserve the balance of the economy, I can afford to give away only a limited amount of my surplus. Secondly, the Budget proposals must constitute, before all else, a fresh incentive to the forces of growth and expansion. Thirdly, anything I suggest this year must, of necessity, be of a classical purity and simplicity.

I have considered carefully the recommendations in the Second Report of the Royal Commission on Taxation . . . In the light of their study of the graduation of the personal Income Tax, I should very much like to give some help to the family man. I should also like so to adjust the tax scales as to liberate as many people as possible from the complications of P.A.Y.E., especially where the amount of tax which it collects is very small. Some of these proposals would, on margin, make no vital difference to consumer demand, but would give much needed and much deserved encouragement to individual households So, if my first task is to lighten the sheer burden on the economy, I can think of one measure only which would enable me to combine with these objectives the type of direct incentive which I am seeking—one measure only which would be regarded as the most positive and heartening encouragement to all, employers and workers alike, who can contribute energy and enterprise to the development of the economy. This is a simple orthodox reduction of 6d. in the standard rate of Income Tax, together with appropriate reductions in the lower rates.

No other proposal would so simply and effectively suit the needs of the moment. It has several substantial advantages To industry, it offers the prospect of a tax relief—and I attach great importance to this—of rather more than £40 million—a relief which should give fresh encouragement to expansion and a keener edge to our competitive power. To the individual, it offers relief on existing income at all levels of tax liability, and it lightens the burden of tax on any extra income which he or she may earn by greater personal effort. I trust those who benefit to save, rather than to spend, as large a proportion as possible of what they gain. The heavier the present burden of tax, the greater the relief and, therefore, the greater the opportunity to save.

The reduction of 6d. in the standard rate will be accompanied by 3d off each of the reduced rates. In 1953, I took 6d. off all the rates, but then I was withdrawing the increase of 6d. all round which had been imposed by the previous Government in 1951. This time, I

return to the tradition that reductions in the general rates of Income Tax should be broadly proportionate to the rates already borne.

This reduction in the rates of tax will bring relief to the individual taxpayer at all levels of income But it will do nothing, of itself, to improve the points at which tax starts to be payable. I want, therefore, to supplement the 3d. remission in the reduced rates by an improvement on the lines suggested by the Royal Commission. I have been impressed by the principles which lie behind its proposals for relief for the smaller incomes, and I therefore propose, in addition, to exempt many of such incomes from all liability to tax by increasing the personal allowance—from £120 to £140 for a single person and from £210 to £240 for a married couple—while reducing the band of income taxable at the lowest rate from £100 to £60. By this means, I shall achieve though in a simpler way, the object the Royal Commission had in mind in proposing its scheme for a minimum earned income relief. Indeed, . . in most cases, the new starting points of liability will be appreciably higher than in the less far-reaching of the two schemes put forward by the Royal Commission Moreover, I shall apply the principle of this relief to small investment incomes—a class very deserving of help—by increasing the limit for the small income relief, under which small investment incomes are treated as earned, from £250 to £300.

Finally, I have made room, within this scheme of relief, for the family man. For him, I propose an increase in the child allowance from £85 to £100. At the same time, I propose to remove the special earnings limit applying to apprenticed children so that the same income limit will apply to all children . . . Here again, the relief which I am offering is a step along the road marked out by the Royal Commission, and is, moreover, free from the practical and administrative difficulties of its own scheme. I put this proposal forward as further evidence of my firm intention to do all I can to help parents of families, on whom the present load of taxation falls with especially discouraging severity, especially when they have several children to educate.

For the reasons which I have given throughout my speech I cannot go further, for the time being, either in reducing the total burden of taxation or in adopting the other improvements in graduation which the Royal Commission recommended But the effect of the changes which I am proposing will be that, in terms of earned income, the starting point of liability to tax will be raised for the single person from £155 to £180 : for a married man with no children, from £270 to £309 , for a married man with two children, from £489 to £566 ; and for the married man with four children, from £707 to £823. No fewer than 2,400,000 taxpayers will be removed from liability altogether. . . , and the load will be lightened on all those who remain liable."

Conclusion. After explaining that for the purpose of P A.Y.E deductions the tax changes would become effective on the first day after July 5, the Chancellor concluded : " In total, my proposals are estimated to cost £134 million in 1955-56, and £155 million in a full year. These are substantial and valuable remissions of taxation Yet they leave me budgeting for a surplus of no less than £148 million Rather more than half the surplus with which I began should survive at the end. This fact is, in itself, evidence of my conviction that, this year, we must set clear limits to the distribution of tax reliefs, if the continuing growth of the economy is to be nourished from firm and healthy roots. Nevertheless, the reliefs which I have proposed are not, I think, wholly inconsiderable They carry one stage further a process of liberation which, in the course of four Budgets, has reduced the standard rate of Income Tax by 1s , has improved the earned income relief and the age relief, has twice increased the personal allowances and the child allowance, and has provided successive measures of practical incentive to productive investment By this Budget the Government are leading the people of this country further along the road of confident expansion. I am satisfied that the world at large will applaud our continuing climb back to the uplands of prosperity, and I rely on our people to respond to the trust which I have placed in their sure and steady steps."

The effect of the taxation changes was set out in the Financial Statement as follows : (*a*) Income Tax reduction in the standard rate and the lower rates : a loss of £102,000,000 in 1955-56 and £116,000,000 in a full year ; (*b*) increase in the single and married allowances, and lowering of the reduced rate band : a loss of £14,000,000 in 1955-56 and £17,000,000 in a full year ; (*c*) increase in the child allowance : a loss of £15,000,000 in 1955-56 and £18,000,000 in a full year ; (*d*) increase in the income limit for small income relief : a negligible loss in 1955-56 and £750,000 in a full year ; (*e*) increase in the income limits for the dependent relative allowance : a loss of £200,000 in 1955-56 and £250,000 in a full year ; (*f*) removal of " emoluments " limit for apprentice children : a loss of £400,000 in 1955-56 and £500,000 in a full year ; (*g*) Purchase Tax reduction on textiles : a loss of £2,250,000 in 1955-56 and £3,000,000 in a full year. Total loss, £133,850,000 in 1955-56 and £155,500,000 in a full year.—(Parliamentary Debates, Official Report - Financial Statement - Manchester Guardian) **(Prev. rep. 1954-55 Budget, 13557 A ; 13497 A ; Revenue and Expenditure, 14134 A ; Credit Restrictions, 14067 A.)**

Note. The tables below show the amount of Income Tax and Surtax (if any) payable after deduction of personal allowances, married allowances, child allowances, and earned income relief The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown. Shillings and pence are omitted.

* Age Relief.—Where the taxpayer (or his wife) is over 65 and his total income does not exceed £600, age relief is given : this reduces the tax payable to that chargeable on the earned income scale. Where the total income exceeds £600, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

A. INDIA. — Congress Party. - Standing Committee on Party Organization. - Definition of Economic Objectives.

The new Congress Working Committee, meeting in Delhi on March 5-6, appointed a standing committee. consisting of Mr. Dhebar (the Congress President), Mr. Nehru (the Prime Minister), Pandit Pant (the Home Minister), Dr. Azad (Minister of Education), Mr. Morarji Desai (Chief Minister of Bombay), Mr. L. B. Shastri, Mr. G. Nanda, and Mr. S. K. Patil, to implement the resolution on the strengthening and purification of the party's organization adopted at the Avadi Congress.

The committee was required to prepare literature on the party's social and economic objectives , to draw up a scheme for the training of Congress workers ; and to suggest means for " the eradication of the spirit of casteism and communalism," for ensuring adequate representation of women and unrepresented sections of society in the party's organization, for raising the standards of efficiency of Congress committees, for a more effective scrutiny of active members, for a more harmonious working of the organization, and for the avoidance of the formation of groups inside the party. Mr. Dhebar was also empowered to appoint a central advisory committee for the guidance of constructive work, and a new administrative system was approved for this purpose, whereby the country was divided into six zones, each with its own organizer.

In a circular letter to the presidents of the Pradesh Congress Committees, dated April 1, Mr. Dhebar defined the " Socialistic pattern of society " approved by the Avadi Congress as the party's objective as follows : (*a*) social ownership or control of means of production in the interests of society as a whole, as distinguished from that of the individual or of a section of society ; (*b*) equitable distribution of the nation's wealth, resources, and income ; (*c*) equality of opportunity for all sections of society. Manifestations of an outlook inconsistent with this objective, he stated, included " individualism, groupism, linguism, provincialism, casteism, and communalism." (The Hindu, Madras) **(Prev. rep. 14044 A.)**

B. TURKEY. — Cabinet Change.

It was announced in Ankara on April 15 that Professor Koprulu had resigned as Foreign Minister and had been appointed Minister of State, and that M. Adnan Menderes, the Prime Minister, had taken over the Foreign Affairs portfolio for the time being. (Turkish Embassy, London) **(Prev. rep. 13999 C.)**

A. INDIA - PAKISTAN. — Increase in Migration from East Pakistan to India and from India to West Pakistan. - Talks on Migration Problems. - Agreement on Improved Travel Facilities and Resumption of Rail Communications. - Pakistani Assurances to Hindu Minority.

A sharp increase in migration from East Pakistan to India occurred during the six months September 1954-February 1955, about 65,000 people crossing the border during the last four months of 1954 (an increase of 300 per cent over the figure for the previous four months) 18,128 in January and 24,320 in February. Mr. Nehru, who described the situation as "of the utmost seriousness," said in the House of the People on March 24 that deteriorating economic conditions in East Pakistan were an important factor in causing the migration; this was, however, denied by the Pakistani authorities.

Most of the evacuees were peasants belonging to the scheduled castes, few members of which had previously left East Pakistan, and came from the districts of Khulna Jessore, Faridpur, and Barisal. Their sudden migration was attributed in Pakistan mainly to a Press Note issued by the West Bengal Government in July, which defined a refugee eligible for rehabilitation as a person who had entered India between June 1, 1947, and Dec. 31, 1954, because of communal disturbances or the fear of such disturbances; this was said to have led many members of this community to cross the border before the final date in the hope of receiving large rehabilitation grants, in spite of statements to the contrary issued by the Indian Deputy High Commissioner in Dacca The continuation of large-scale migration during the first months of 1955, however, was taken in India as an indication that economic conditions in East Pakistan were responsible, factors suggested in the Indian Press being a rapid fall in the price of rice, without any corresponding fall in the prices of other commodities; the unwillingness of landlords to employ labour for non-agricultural work at a time of falling crop prices; and a sense of insecurity caused by the removal of Hindu *zamindars* (landowners) under land reform legislation.

The Pakistani authorities reported at the end of March that there had also been an increase in recent months in the number of Indian Moslems entering West Pakistan through Sind, which had risen to an average of over 2,000 a week.

Discussions were held in Karachi from April 9-12 between Mr. M. C. Khanna (the Indian Minister of Rehabilitation) and Major-General Mirza (the Pakistani Minister of the Interior) on general problems relating to travel and migration between the two countries, as well as the exodus of Hindus from East Pakistan. Agreement was reached that travel between India and Pakistan should be facilitated by the introduction of a simplified visa system, additional authorized routes, and additional check-posts; that two authorized routes with railway facilities should be established on the West Pakistan border, one at Khokropar, and one at Gandhasinghwala; and that immediate steps should be taken to restore confidence among the minority community in East Pakistan. The Government of Pakistan, the official communiqué stated, had assured the minority community that their interests and security would be fully safeguarded, and that returning migrants would be taken back to their homes and their property restored.

An official statement issued in Karachi on April 11 said:

"The Government of Pakistan have viewed with increasing concern the rise in migration of members of the minority community from East Pakistan. Members of the minority community are reminded that the Government of Pakistan regard them as much as citizens of the State as members of the majority community. They are consequently assured of all rights and privileges of citizenship. Special machinery has been established for providing early redress of grievances of members of the minority community The Pakistan Government assures them that all measures will be taken to safeguard their interests and security so that they shall continue to live in Pakistan with honour and dignity."

In the talks on April 12 between Mr. Khanna, General Mirza, and Dr. Khan Sahib, the Pakistani Minister of Communications, it was decided (*a*) to resume rail traffic on the Sind-Jodhpur and Gandhasinghwala-Ferozepur routes from June 1; (*b*) to run through trains between Lahore and Calcutta; and (*c*) to resume the movement of goods to and from West Bengal through East Pakistan from May 1. The question of a through train service between Sind and Jodhpur was left open for further discussion.

Mr. G. Pathan (the Pakistani Minister for Minority Affairs) discussed the question of migration of minorities from East Pakistan with Mr. C. C. Biswas (the Indian Minister for Minority Affairs) in Calcutta on April 12, and on the following day began a tour of the affected areas of West Bengal and East Pakistan, together with Mr. A. K. Chanda (the Indian Deputy Minister for External Affairs).—(Indian and Pakistani High Commissioners' Offices, London - The Statesman, Calcutta)

B. PERSIA. — M. Hussein Ala succeeds General Zahedi as Premier.

General Zahedi, the Persian Prime Minister, resigned on April 5 for reasons of health, and on April 7 the Shah appointed M. Hussein Ala as the new Premier. M. Ala's Cabinet was announced on April 8 as follows:

M. Hussein Ala	Premier.
*M. Abdullah Entezam ..	Foreign Affairs.
General Hedayat .. .	War.
*M. Ali Amini	Finance.
M. Asadullah Alam ..	Interior.
*Dr. Jehanshah Saleh ..	Health.
M. Mehdi Kashani .. .	Economic Affairs (Acting).
M. Khalil Taleghani ..	Agriculture.
*Dr. Mahmoud Mehran ..	Education.
Dr. Mohsen Nasr	Labour.
General Vali Ansari.. ..	Public Works.
M. Ghasem Eshraghi ..	Posts and Telegraphs.
M. Hadj Mohammed Nemazi	Minister without Portfolio.

* Held same post in previous Cabinet.

M. Ala, one of the trusted friends of the Shah and one of the principal adversaries of Dr Mossadeq, has been Minister of the Court since 1951, a post he also held from 1942-45. Previously he had been for many years Persian Ambassador in Paris, whilst from 1945-50 he was Persian Ambassador in Washington and, since 1946, Persian representative at the U.N. He had held the premiership for a short time in 1951.

In a Press statement on April 7 M. Ala announced that his general policy would be a continuation of General Zahedi's policy, but added: "My first aim, however, is a large-scale campaign against corruption. To fight against Communism is not enough. The Government must strongly fight against corruption and bribery."

The *Majlis* passed a vote of confidence in the new Government on April 17 by 92 votes to two, with seven abstentions.

At a reception on March 22 the Shah himself, addressing a large gathering of notables, spoke of "the miserable condition of the masses in the provinces still deprived of the basic needs of life," and continued:

"Graft and corruption must be uprooted before reforms can be undertaken. Henceforth I shall want to see only honest and competent men in key positions, and shall be ruthlessly intolerant of demagogues, dishonest people, and egoists. Positive work for the welfare of the masses, combined with a merciless fight against corruption, shall mark the coming year."

General Zahedi left Teheran on April 7 to undergo medical treatment in Germany. M. Ala himself left on April 10 for medical treatment in Paris, M. Entezam deputizing for him in his absence.—(Le Monde, Paris - New York Times - New York Herald Tribune - Manchester Guardian - Times)

(Prev. rep. 13571 B; 13268 A; 13093 A.)

C. RHODESIA AND NYASALAND FEDERATION. — New Ministry of Power. - M. Coyne's View on Kariba Scheme.

Sir Malcolm Barrow, the Rhodesian Federal Minister of Commerce and Industry, was sworn in on April 6 as Minister of Power, a newly-created post. Sir Malcolm stated on the same date that the new Ministry had been created so that a separate organization could devote all its energies to the question of power supplies within the Federation, and that it would take over the Electricity Supply Commission and the distribution of power, as well as the Hydro-Electric Board and the hydro-electric power schemes.

M. André Coyne, the French hydro-electric expert, said in a Press statement in Salisbury on April 1, after a personal inspection of both the Kafue and Kariba sites, that the Kafue scheme was an excellent project but that the Kariba scheme was much better from a technical point of view. The future potential of Kariba would excel that of Kafue, and the Kariba scheme would give the cheapest power in the world when its total output was being used. Referring to the Meshi Teshi gap, M. Coyne said that if it was included with the Kafue main scheme its power output would in the long run equal that of the Kariba project, but more information would be necessary on Meshi Teshi and especially on the Kafue River levels during the dry seasons.—(Federal Information Dept., Salisbury)

(Prev. rep. Federal Government, 13856 A; 13333 A; Kariba, 14125 A.)

D. AUSTRALIA. — Tasmanian Elections.

Elections to the Tasmanian House of Assembly, held on Feb. 19, resulted in the return to power of the Labour Government (led by Mr. Cosgrove), which has been in office for the past 21 years. The Labour and Liberal parties each won 15 seats in the Assembly, but under recently-enacted legislation the Labour Party—which had a majority of 10,606 votes—was given one extra seat for the choice of Speaker.—(Australian News and Information Bureau - Daily Telegraph) **(11019 A.)**

A. SINGAPORE. — Elections. - Formation of Labour Front Government with M.U.A. Support.

The first general elections to be held in Singapore under the new constitution took place on April 2 and resulted in a victory for the left-wing Labour Front, led by Mr. David Marshall, which secured 10 of the 25 elected seats. Fifty-three per cent of the electorate went to the polls, the Labour Front polling 27 per cent of the votes cast. The results were as follows:

	Seats
Labour Front	10
Progressive Party	4
People's Action Party	3
Malay Union Alliance	3
Democratic People's Party	2
Independents	3

The *Labour Front*, from which the Labour Party seceded in the early stages of the election campaign after disagreement over the nomination of candidates, campaigned on a policy of moderate socialism, including among its aims the nationalization of passenger transport and the introduction of unemployment insurance. Politically, it advocated union between Singapore and the Federation of Malaya, and "immediate self-Government and eventual independence within the Commonwealth." The *Labour Party* put up only one candidate at the election, who was defeated.

The *People's Action Party*, launched on Nov. 21, 1954, is an inter-racial extreme left-wing party, drawing its support mainly from the younger professional people. During the campaign it demanded immediate independence for a Malaya comprising Singapore and the Federation, and criticized the new constitution on the grounds that under it "ultimate power and control still rests in the hands of the Colonial Power and not in the hands of the people." The *Progressive Party*, a non-communal right-wing party, is the oldest of the parties, having been formed in 1948, it held six of the nine elected seats in the last Legislative Council, and some of its members have also served on the Executive Council. Its programme was one of social progress, economic expansion based on free enterprise, and political development towards a "Confederation of Malaysia" (including the British Borneo territories as well as the Federation of Malaya). The *Democratic People's Party* is a right-wing Chinese party, also basing its economic policy on free enterprise, and urging an ending of the monopoly of English as the official language in the Legislative Assembly.

The *Malay Union Alliance* is a coalition of the United Malay National Organization, the Malayan Chinese Association, and the Singapore Malay Union. The U.M.N.O.-M.C.A. Alliance is a branch of the alliance formed in 1952 between the two principal communal political parties in the Federation of Malaya (see 12122 E), under which the parties continue to retain their separate identities, but act in association on all questions relating to elections. The Singapore Malay Union is another group which seceded from the Labour Front in the early stages of the elections.

As a result of the success of the Labour Front, the Governor of Singapore (Sir John Nicoll) had consultations with Mr. Marshall and, after the Malay Union Alliance had promised its support, announced the appointment of the following Council of Ministers on April 6: Mr. David Marshall (Labour Front), Chief Minister and Commerce; the Che Abdul Hamid Bin Haji Jumat (U.M.N.O.-M.C.A. alliance), Communications and Works; Mr. Chew Swee Kee (Labour Front), Education; Mr. A. J. Braga (Labour Front), Health; Mr. Lim Yew Hock (Labour Front), Labour and Welfare; Mr. Francis Thomas (Labour Front), Local Government, Lands, and Housing; Mr. J. M. Jumabhoy (Labour Front), Assistant to the Chief Minister in the Ministry of Commerce.

Mr. Marshall (39), a criminal lawyer by profession, was the only white man to be elected to the Assembly.

(Commonwealth Survey - Times) **(Prev. rep. 13748 F.)**

B. UNITED STATES. — Bank Mergers.

The Chase National Bank and The Bank of the Manhattan Company were merged on March 29, when shareholders of the two companies approved the merger proposals. The new bank, to be called the Chase Manhattan Bank, will be the second largest in the country (the Bank of America National Trust and Savings Association of San Francisco being the biggest), with deposits of more than $6,800,000,000.

The First National Bank of New York was sold to the National City Bank of New York (the third largest bank in the country) for $165,000,000 on March 30, when the sale was approved by the two banks' shareholders; the consolidated institution, which has deposits totalling $6,200,000,000, opened for business on March 31 as the First National City Bank of New York.

A third major bank merger, that of the Bankers Trust Company (the country's ninth largest bank) and the Public National Bank and Trust Company, was announced on Feb. 15, and approved by shareholders on March 24. The new institution, which would have deposits totalling some $2,500,000 000, would continue the name and charter of the Bankers Trust.

(New York Times) **(Prev. rep. 13892 D.)**

C. COMMUNIST CHINA. — Dismissal and Suicide of Kao Kang. - Expulsion of other Communist Party Leaders.

It was announced in Peking on April 4 that Kao Kang, a Deputy Premier and chairman of the Administrative Committee of the North-East Region (Manchuria), had been expelled from the Communist Party by the party's central committee for activities "directed against the people and against the State," and had since committed suicide. Jao Shu-shih, a political commissar whose last known post was that of head of the party's organization bureau, was stated to have been expelled from the party at the same time for anti-party activities, and "disciplinary action" had been taken against seven other members for their part in the alleged conspiracy.

Teng Hsiao-ping, another Deputy Premier, stated in a report drawn up for the party's central committee, that Kao Kang had tried to split the party by forming an "anti-party faction" to further his plan to take over the leadership of the State, and had attempted to make the North-East Region of China (i.e. Manchuria) into "the independent kingdom of Kao Kang." After referring to the "serious warning previously given by the central committee to anti-party elements," Mr. Teng added: "Kao Kang not only did not admit his guilt to the party, but even committed suicide as an expression of his ultimate betrayal of the party."

With regard to Jao Shu-shih, Mr. Teng said that between 1943 and 1953 he had resorted on many occasions to "shameless deceit" in order to seize power. Although he had been warned by the central committee, together with Mr Kao, he had "never shown any signs of repentance and now persists in an attitude of attacking the party."

A national conference of the Chinese Communist Party, which met on March 21-31, adopted Mr. Teng's report and approved a resolution ordering the setting-up of control commissions at all party levels to replace the existing discipline inspection committees, with the aim of "fighting more vigourously against acts by party members that violate party constitution, party discipline, or the laws and ordinances of the State." The resolution said that the party must fight "personal dictatorship and fragmentation," which undermined the principle of collective leadership, as well as "conceit, complacency, and tendencies towards the worship of individuals." It called on the party to "keep a strict, constant, systematical supervision of every area, department, and party worker from top to bottom and back again."—(Manchester Guardian - New York Times) **(Prev. rep. Kao Kang, 14051 A; 12784 A.)**

D. UNITED KINGDOM. — Sir Anthony Eden elected Leader of Conservative Party. - Support by Liberal Unionist Group.

Sir Anthony Eden was elected leader of the Conservative Party in succession to Sir Winston Churchill on April 21 at a party meeting at Church House, Westminster. The meeting was attended by Conservative and National Liberal members of the two Houses of Parliament, Conservative and National Liberal parliamentary candidates, and members of the executive committee of the National Union of Conservative and Unionist Associations—in all over 1,000 people; Lord Salisbury presided.

Sir Anthony Eden's election as leader was moved by Lord Salisbury, seconded by Mr. Butler, Chancellor of the Exchequer, and supported by Sir Eric Errington, M.P., chairman of the executive committee of the National Union. The motion was carried unanimously, and Sir Anthony Eden then appeared on the platform and made a short speech.

Before this the meeting had passed a motion expressing thanks to Sir Winston Churchill for his services to the country and the party during the 14½ years in which he held the leadership.

On the same day Mr. J. S. Maclay, chairman of the Liberal Unionist group in the House of Commons, in a letter to Sir Anthony Eden, expressed on behalf of all members of the group their confidence in his leadership and their whole-hearted support.—(Times - Daily Telegraph) **(Prev. rep. 14129 A.)**

E. SOUTH AFRICA. — Report on Decimal Coinage.

The report of the South African Bureau of Standards on the decimalization of the country's coinage was tabled in the House of Assembly on Feb. 25. It recommended the conversion of the Union's currency from the pound sterling to a rix dollar, equivalent to 10s. sterling in value, and the issue of banknotes ranging from one rix dollar to 100 rix dollars; silver coins of 50 cents (5s.), 25 cents (2s. 6d.), 10 cents (1s.), 5 cents (6d.), and 2.5 cents (3d.); and copper coins of 1 cent (1.2d.), ½ cent (0.6d.), and ¼ cent (0.3d.). The report, which was drawn up by a committee under the chairmanship of Mr. J. T. Becklake, a former director of the South African Mint, estimated the cost of conversion to the decimal system at about £8,000,000, and recommended a three-year preparation period before the change was made. It called for an early decision by the Government on whether or not to introduce the new system, as the cost of the change was steadily increasing with the growing use of mechanical aids in the calculation of accounts.—(Cape Times - Die Burger, Cape Town) **(Prev. rep. 12594 D.)**

Note. The rix dollar was the currency unit used by the early Dutch settlers in Cape Colony in the 17th century. (Ed. K.C.A.)

A. PAKISTAN. — Resignation of Mir Ghulam Ali Talpur from Central Government. - Opposition to Land Reform Measures in Sind. - Mr. Khuhro's Appointment as Chief Minister of Sind declared Illegal by Sind Chief Court. - Alleged Conspiracy for Assassination of Sind Ministers. - Arrest of Mir Ghulam Ali Talpur and Other Sind Leaders.

Mir Ghulam Ali Talpur, vice-president of the All-Pakistan Moslem League and Speaker of the Sind Legislative Assembly, resigned his post as Minister of Education in the Government of Pakistan on March 18 in protest against the policy of Mr. M. A. Khuhro, the Chief Minister of Sind, and announced his intention of re-entering Sind provincial politics. He had previously challenged the legality of a decision of the Provincial Ministry to restrain him from functioning as Speaker of the Assembly, and on March 18 was granted an interim injunction by the Sind Chief Court.

Strong feeling had been aroused in Sind by an executive order issued by Mr. Khuhro's Government on Feb. 8, which provided for the confiscation without compensation of 1,100,000 acres of land held by 124 *jagirdars* (feudal landlords), most of whom were members of the Talpur family. Under the order the confiscated estates, ranging in size from 500 to 217,000 acres, were to be divided into lots of 24 acres and distributed among the peasantry. Shortly after the order was issued Pir Illahi Bakhsh, a former Chief Minister of Sind and one of the largest landowners in the Province, filed a petition with the Sind Chief Court challenging the validity of Mr. Khuhro's appointment as Chief Minister on the ground that the Governor-General's order of Oct. 20, 1954, removing Mr. Khuhro's disqualification from public office was illegal. This view was upheld on March 11 by a full bench of the Court, which, however, granted 10 days' stay of execution to allow Mr. Khuhro to file an appeal to the Federal Court.

In his judgment declaring Mr Khuhro's appointment illegal, Chief Justice Sir George Constantine held that a Governor-General's order issued under the Public and Representative Offices (Disqualification) Act (PRODA) " bears a close resemblance to a sentence which a judge pronounces upon a finding of guilty " " Such an order," he continued, " is made with due regard to facts and circumstances of the case, and, like a sentence, is presumably unalterable by the authority which has made it. Non-appealable sentences are by no means unknown to law, and I can see no reason why the Legislature should be presumed to intend a power of review or revision " Mr Justice Muhammad Bakhsh and Mr Justice Vellani both concurred with the Chief Justice's ruling.

Pir Ali Mohammed Rashdi, Minister of Information in Mr. Khuhro's Government, announced on March 19 that a criminal conspiracy for the assassination of members of the Ministry and the creation of disturbances had been discovered, and stated that the object of the conspiracy, in which politicians and large landowners were involved, was to prevent the implementation of the Government's land reforms. Mir Ghulam Ali Talpur (who had described the allegations of a conspiracy as " a made-up affair," and had accused Mr. Khuhro of " victimizing and terrorizing " the landed aristocracy), as well as Pir Illahi Bakhsh (the former Chief Minister) and Mir Imam Bakhsh Talpur (a former member of Pirzada Abdus Sattar's Ministry), were arrested on March 20 under the Sind Public Safety Act in connexion with the alleged conspiracy; public meetings and processions were banned in Hyderabad (Sind); armed police were posted at important points in the city; and police guards at Ministers' residences and in the Assembly building were strengthened. Kazi Fazlullah, another former Chief Minister of Sind but not a member of the present Assembly, at whose house the police were reported to have seized unlicensed arms and ammunition, was arrested on March 25, whilst Mir Jaffar Khan Jamali, a member of the Assembly, was arrested on the same day on an old warrant for non-payment of land revenue.

When the Assembly met on March 21 a leading member of the Opposition, Mir Ali Ahmed Talpur, strongly protested against the arrest of the Speaker as " an insult to the House " and withdrew, followed by seven other members. The 89 remaining members then unanimously approved a motion proposed by Pir Ali Mohammed Rashdi for Mir Ghulam Ali Talpur's removal from the office of Speaker.

Mir Ghulam Ali Talpur was released on bail by the Sind Chief Court on March 26, Mir Jaffar Khan Jamali on March 27, and Pir Illahi Bakhsh, Kazi Fazlullah, and Mir Imam Bakhsh Talpur on March 28. The Sind Government's detention order against Mir Ghulam Ali Talpur was withdrawn on March 25 and those against Pir Illahi Bakhsh, Kazi Fazlullah, and Pirzada Abdus Sattar (Mr. Khuhro's predecessor as Chief Minister) on April 12; the Government, however, imposed a one-month ban on their stay in Sind. The order for the arrest of Pirzada Abdus Sattar had actually been ineffective as he had meanwhile gone to Karachi (a centrally administered area outside the jurisdiction of the Sind Government).—(Times - Pakistan High Commissioner's Office, London) **(Prev. rep. Central Cabinet 14003 E; PRODA, Mr. Khuhro, 13893 A.**

B. UNITED KINGDOM. — Sir Richard Acland's Resignation from House of Commons.

Sir Richard Acland, the Labour M.P. for Gravesend, announced on March 10 that, because of his disagreement with the Parliamentary Labour Party's approval of the Government's decision to manufacture the hydrogen bomb in Britain, he would resign his seat in the House of Commons and contest the ensuing election as an Independent candidate.

Explaining his decision during the House of Commons debate on the Air Estimates, Sir Richard Acland said that he had " sinned " in the past by not protesting more vigorously, not merely against the H-bomb but against the A-bomb and the strategic bomber force, but the H-bomb explosions during the last twelve months and the death of Japanese fishermen who were hundreds of miles away had made him understand the significance of the matter.

" The only hope for the future," he went on, " now lies in some other people extending the maximum tolerance, understanding, and constructive criticism to America and Russia that they might be able over the years to show them the way of tolerance towards each other. By making ourselves an integral part of one of the two poles between which tension exists, we can do nothing more to relieve it All our actions from now on will serve to intensify fear, hate, and suspicion. We are handing over the task of assuaging tension to . . Sweden, India, Indonesia, and others. My fear is that those others, without us, are not quite strong enough to succeed . ."

Referring to his decision to leave the Labour Party, Sir Richard said that " many little people " were bewildered by the fact that both the leading parties had accepted the horror of the hydrogen bomb. At the same time, Mr. Bevan's attitude towards the bomb, as stated in the defence debate, was also " bewildering." " Somebody," he declared, " must go to the limits of what is possible within the framework of democracy. I should not be true to myself if I did anything other than that."

The *London Gazette* of March 25 announced that the Chancellor of the Exchequer had appointed Sir Richard to be Steward and Bailiff of the Manor of Northstead—a device enabling him to retire from the House. Earlier, the National Executive of the Labour Party decided on March 14 that, in announcing his decision to stand as an Independent candidate, Sir Richard Acland had voluntarily severed his connexion with the Labour Party.—(Times - Manchester Guardian)

(Prev. rep. 14093 A.)

C. FRANCE. — Appointment of Military Commission of Inquiry into Battle of Dien Bien Phu.

A decree signed by General Koenig, the French Defence Minister, on March 31, and promulgated on April 11, set up a military commission to inquire into the military and political responsibility for the disaster at Dien Bien Phu. The decree stated that, " taking into consideration the political and military situation, the conduct of the war by the Government and the Commissioner-General's department, the orders given to General Navarre, the C.-in-C., and the resources at his disposal while he held his command, the commission is required to express its opinion on the conduct of the operations leading up to the battle of Dien Bien Phu, and on the preparations for and the conduct of the battle, and to determine responsibilities at various levels." General Catroux (the first French senior officer to rally to General de Gaulle in 1940, and later French High Commissioner in Syria and French Ambassador in Moscow) was appointed chairman of the commission. The other members will be Air Force General Valin, Admiral Lemonnier, and Army General Magnan, whilst M. Le Beau (a former Governor-General of Algeria) was appointed an advisory member.

A request for the setting-up of an inquiry commission into the siege and fall of Dien Bien Phu had been made by General Navarre in an interview published by the weekly *Jour de France* on July 20, 1954. General Navarre then said that such an inquiry was essential in the interest of the French Army because the country should know the conditions under which the Army had been compelled to fight. In a note published at the same time General Koenig had stated that he had refused General Navarre's earlier request for an official inquiry in order to keep the armed forces outside polemics, but that, in view of the violent campaign which had meanwhile been launched against General Navarre, the latter was entitled to defend his actions.

A Parliamentary commission for the co-ordination of Indo-Chinese questions and the study of the operations at Dien Bien Phu had been set up under the Laniel Government on May 11, 1954, but nothing had resulted from its activities and its chairman, M. René Mayer, had since resigned.—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 13566 A.)**

A. AUSTRIA. — Austrian State Treaty. - Withdrawal of Soviet Insistence on Retention of Occupation Troops. - Dr. Raab's Visit to Moscow. - Soviet-Austrian Agreement on Outstanding Treaty Provisions. - Western Powers' Assurances to Austria. - Soviet Proposal for Four-Power Foreign Ministers' Conference to conclude Treaty. - Western Powers' Acceptance. - Proposal for Preparatory Meeting of Ambassadors.

Following M. Molotov's reference to the Austrian State Treaty in his foreign policy speech to the Supreme Soviet on Feb. 8 (see 14059 A), the Austrian Ambassador in Moscow (Herr Norbert Bischoff) had discussions with M. Molotov on Feb. 25 and March 2 in order to obtain a clarification of the Soviet attitude. A statement issued by the Soviet Foreign Ministry on March 11 said that during the discussions M. Molotov had emphasized that the Soviet Union would no longer insist on the retention of occupation troops in Austria, provided that measures were taken to prevent another *Anschluss* between Austria and Germany, and that Austria did not join in any military coalition or allow foreign bases to be built on her soil. M. Molotov had also suggested that a settlement of the Austrian treaty question would be promoted by preliminary negotiations between the Soviet Union and Austria and by private talks between Soviet and Austrian leaders. The statement concluded by calling for an immediate four-Power conference to consider both the German question and the question of signing a State Treaty with Austria, and added: "The Soviet side now proposes to effect the withdrawal of troops of the four Powers from Austria without waiting for the signing of a peace treaty with Germany, having agreed to corresponding joint measures which would exclude the possibility of Germany effecting a new *Anschluss* with Austria."

The Austrian Government's reply to the Soviet proposals, in the form of an *aide-mémoire* handed to M. Molotov by the Austrian Ambassador on March 14, said that final agreement on the Austrian question could be reached only through a conference attended by all four occupying Powers and Austria, and that such a conference should deal with Austria as a separate problem; however, for such a conference to have any prospect of success, M. Molotov's proposals would first have to be clarified. The *aide-mémoire* was worded as follows:

"The Federal Government has learned with satisfaction that the Soviet Union attaches great importance to a settlement of the Austrian question, the question of full restoration of the independence of a democratic Austria in accordance with the interests of preserving and securing peace in Europe. It learns with satisfaction that the Soviet Union deems unjustified any further delay in concluding the State Treaty.

(1) The Federal Government welcomes every effective assurance and guarantee of Austria's independence and freedom on all sides, and thus welcomes every effective assurance and guarantee against the danger of an *Anschluss*.

(2) The Federal Government has repeatedly and unequivocally declared that Austria has no intention of entering into any military alliances or of permitting any military bases upon her territory. The Federal Government is ready to make the form in which any such declaration might eventually be given afresh the subject of an exchange of views.

(3) The Federal Government is also convinced that a final solution of the Austrian question can be reached only through a conference of all the Powers involved, with Austria also taking part. It considers nevertheless that the problems referred to under paragraphs (1) and (2) should be so clarified that such a conference would have prospects of speedy and concrete results.

The Federal Government believes that a successful result could be reached if the State Treaty were dealt with by the four Powers, with Austria taking part, as a separate problem."

On March 24 M. Molotov had a further meeting with the Austrian Ambassador in Moscow, at which he issued an invitation to the Austrian Chancellor, Dr. Raab, to visit Moscow "in the nearest future" to discuss an Austrian treaty; M. Molotov also suggested that Dr. Raab might be accompanied by such "other representatives of Austria whom the Austrian Government would consider it desirable to send to Moscow for discussions." At the same time M. Molotov handed to the Ambassador the Soviet reply to Austria's *aide-mémoire* of March 14, in which, among other things, the Soviet Union agreed with the Austrian request that the question of an Austrian treaty should be discussed as a separate matter at a four-Power conference attended also by Austria. The text of the Soviet reply was as follows:

"Having acquainted itself with the reply of the Austrian Government of March 14, the Soviet Government finds with satisfaction that the Austrian Government agrees with the opinion of the Soviet Government that the settlement of the Austrian question and the question of re-establishing the full independence of a democratic Austria should be in accordance with the interests of maintaining and consolidating peace in Europe. Meeting the wishes of the Austrian Government, the Soviet Government considers it necessary to give a further clarification of the questions referred to in the reply of the Austrian Government.

(1) The Soviet Government takes note of the statements of the Austrian Government to the effect that it welcomes any effective assurances and guarantee of Austrian independence and freedom, and against any danger of an *Anschluss* and encroachments from any side. From this follows the need to take specific measures taking into account the present plans for the remilitarization of Western Germany, which increase the danger of Austria's being absorbed. In this connexion it is necessary to examine the questions of the time limits for the withdrawal of the troops of the four Powers from Austrian territory, as well as measures to be taken in the future, in the event of the emergence of a direct threat of an *Anschluss*.

(2) The Soviet Government regards the statement of the Austrian Government to the effect that it has no intention of joining military alliances or permitting the creation on her territory of military bases as an agreement of the Austrian Government with Point Two of the Soviet Government's proposals of Feb. 8, 1955, on this subject. The Soviet Government is ready, in accordance with the wish of the Austrian Government, to discuss the question of the form in which a relevant statement on this subject could be made by Austria. The Soviet Government confirms the need for the Governments of the U.S.A., Britain, and France to undertake corresponding commitments.

(3) Meeting the desires of the Austrian Government, the Soviet Government agrees that the question of the Austrian treaty be discussed separately at a four-Power conference with the participation of Austria"

It was announced in Vienna on March 29, after discussions between the Austrian Cabinet and the Austrian Ambassadors in London, Washington, and Paris (who had flown home for the consultations), that Dr. Raab had accepted the invitation to visit Moscow and that he would be accompanied by the Vice-Chancellor (Dr. Schärf), the Foreign Minister (Dr. Figl), and the Foreign Under-Secretary (Dr. Kreisky).

The United States, Britain, and France issued a joint statement on April 5 emphasizing that the conclusion of an Austrian Treaty was of concern to all the four Great Powers as well as Austria, and suggesting that, if the Soviet Union should offer "proposals which hold clear promise of the restoration of freedom and independence to Austria, these would appropriately be discussed by the four Ambassadors in Vienna, with the participation of the Austrian Government." The statement was as follows:

"For many years the Governments of the U.K., the U.S.A., and France have sought to conclude an Austrian State Treaty. They have made ceaseless efforts thus to bring about the restoration of Austrian freedom and independence at the earliest possible moment.

At the Berlin conference in 1954 the three Governments expressed their readiness to sign the draft State Treaty with the Soviet texts of the previously unagreed articles This would have resulted in the termination of the occupation and the withdrawal of all foreign troops within three months of the entry into force of the treaty. But the Soviet Government declined and insisted on putting forward new and unacceptable conditions which would have infringed Austrian sovereignty.

The three Governments have followed closely the recent exchanges between the Austrian Government and the Soviet Government on matters relating to the State Treaty. From these exchanges it appears that the Soviet Government may now have certain clarifications to offer regarding their policy towards Austria, in particular on the question of the independence and sovereignty of that country already provided for in the first five articles of the draft treaty. The three Governments trust that the decision of the Austrian Government to accept the Soviet invitation to Moscow will result in useful clarification.

Questions relating to the conclusion of the State Treaty are of concern to the Governments of all four responsible Powers, as well as to the Austrian Government. The Governments of the U.K., the U.S.A., and France accordingly consider that, if the Soviet Government should offer proposals which hold clear promise of the restoration of freedom and independence to Austria, these would appropriately be discussed by the four Ambassadors in Vienna, with the participation of the Austrian Government.

It remains the earnest desire of the Governments of the U.S.A., U.K., and France to conclude the State Treaty as soon as possible in conformity with principles which would ensure Austria's full freedom and independence"

An official statement issued by Dr. Raab's office on April 6 expressed satisfaction with the declaration by the Western Powers. It said that Austria had never doubted that the Western Powers were always prepared to bring freedom to her, and declared that the visit of the Austrian delegation to Moscow was "a suitable step towards reaching this aim." The Soviet News Agency, *Tass*, however, asserted that the Western Powers' declaration was an attempt to impede positive results from emerging from the Soviet-Austrian talks, and deprecated the suggestion that instead of a four-Power conference the Ambassadors of the four Powers in Vienna might meet to discuss any new points raised in the talks.

In identical Notes handed to the three Western Ambassadors in Moscow on April 9, the Soviet Government reviewed the

recent developments with regard to a treaty with Austria, and expressed the hope that such a treaty might be concluded "in the immediate future."

The Notes, after referring to the discussions on the Austrian problem at the Berlin conference in 1954 (see p. 13438), and to the Soviet proposal in August for a conference of the Ambassadors of the four Powers in Vienna, together with an Austrian representative (see 13731 A), turned to the latest developments arising out of M. Molotov's proposals of Feb. 8. They recalled the preliminary exchanges of views which had taken place between the Soviet Union and Austria, and continued: "In view of the fact that it also became clear that personal contact between leading representatives of the Soviet Union and Austria could assist in this important matter, it was agreed that an Austrian Government delegation, headed by Herr Raab, should visit Moscow on April 11 to continue discussion of the questions under consideration.

"The Soviet Government believes that an exchange of views with representatives of the Austrian Government will help in advancing matters with regard to a settlement of the Austrian question. It is also taking into consideration the fact that, in the time since the Berlin Conference, the heads of the Austrian Government have already had appropriate meetings and exchanges of views with leading representatives of Great Britain, France, and the U.S.A. The Soviet Government expresses the hope that, given the corresponding desire by all the States concerned, it will be possible in the immediate future to achieve the necessary agreement, and to conclude a State Treaty with Austria."

Dr. Raab and the other Austrian Ministers flew to Moscow on April 11 and during the following four days had discussions with M. Molotov, M. Gromyko (a Deputy Foreign Minister), M. Ilyichev (Soviet High Commissioner in Austria), M. Mikoyan (a Deputy Premier), and other Soviet officials. Dr. Raab also met the British, French, and U.S. Ambassadors, and the latter also had talks with M. Molotov. The Austrian delegation was entertained at an official banquet given by M. Molotov on April 12, which was attended by Marshal Bulganin (the Soviet Premier), other Soviet leaders, and members of the Diplomatic Corps, and at which toasts were drunk to the ending of the occupation of Austria.

A joint Soviet-Austrian communiqué issued on April 15 at the conclusion of the talks announced that the two countries had reached agreement on the disputed points of the Austrian State Treaty, and expressed the hope that the four Great Powers might now be able to conclude the treaty. The communiqué was worded as follows:

"From April 12 until April 15, 1955, discussions were held in Moscow between an Austrian Government delegation headed by Chancellor Julius Raab and Vice-Chancellor Dr. Adolf Schärf and a Soviet delegation headed by . . . M. Molotov, and . . . M. Mikoyan, which were carried on in a friendly spirit.

As a result of these discussions, the Governments of the Soviet Union and of Austria consider as desirable the earliest conclusion of a State Treaty on the establishment of an independent and democratic Austria, which should serve the national interests of the Austrian people and promote the consolidation of peace in Europe.

The Austrian delegation gave assurances that the Austrian Republic, in the spirit of the declaration made at the Berlin Conference in 1954, does not intend to join any military alliances or permit military bases on her territory and will pursue a policy of independence in regard to all States which should ensure the observance of this declaration.

The Soviet side expressed its agreement that the occupation forces of the four Powers be withdrawn from Austria upon the entering into force of the State Treaty, and in any case not later than Dec. 31, 1955.

Taking into consideration the declaration of the United States, Britain, and France made public on April 5 to the effect that they are striving to achieve the earliest conclusion of an Austrian State Treaty, the Soviet Union and Austria express the hope that at the present time there are favourable opportunities for the conclusion of a treaty through an appropriate agreement among the four Powers and Austria.

The Soviet Government further agreed, in the spirit of its statement at the Berlin Conference in 1954, to accept the equivalent of $150,000,000 provided for by Art. 35 of the State Treaty entirely by the delivery of Austrian goods.

The Soviet Government declared its readiness, in addition to the earlier stipulated transfer of former German property in the Soviet zone of occupied Austria, to transfer to Austria immediately after conclusion of the State Treaty, for appropriate compensation, the property of the Danube Shipping Company, including the shipyards and Korneuburg wharves and all vessels and port installations.

The Soviet Government agreed further to cede to Austria the oilfields and refineries, including the company for trade in oil products (OROP), defined as belonging to Austria in Art. 35 of the State Treaty, in exchange for the delivery of crude oil in amounts agreed to by the parties.

Moreover, agreement was reached to enter into negotiations in the near future aimed at the normalization of trade relations between Austria and the Soviet Union.

The Soviet delegation informed the Austrian delegation that the Presidium of the Supreme Soviet of the U.S.S.R. had expressed its consent to consider favourably the request of the Austrian Federal President, Dr. Korner, for the return to their motherland of those Austrians who are serving terms under the decisions of Soviet courts.

After the withdrawal of the Soviet occupation troops from Austria, not a single military prisoner or detained civilian person of Austrian citizenship will remain on the territory of the Soviet Union."

The Austrian delegation returned to Vienna on April 15, and was welcomed by large crowds at the airport in the Soviet zone and along the 30-mile route to the capital. Dr. Raab, in a statement at the airport, said: "We are bringing you good news. We shall be free; and the Austrians imprisoned in Russia—they will be free too. We shall get our oil as Austrian property, and the Danube Shipping Company and all the U.S.I.A. properties (former German assets in Austria appropriated by the Russians) will return to Austrian ownership. Our conference in Moscow was a contribution to the peace of the world. We shall continue to work for Austrian freedom with all our power." At a People's Party rally at St. Polten (Lower Austria) on April 17 Dr. Raab said that Austria would invite the four occupying Powers to meet in Vienna to conclude an Austrian State Treaty as soon as possible.

Sir Anthony Eden, the British Prime Minister, stated in the House of Commons on April 19 that the Government welcomed the statement in the Moscow communiqué of April 15 in which the Austrian and Soviet Governments placed on record their desire for the early conclusion of a treaty, and that they earnestly hoped that a treaty could now at last be concluded. He added that the Soviet Government, by agreeing to the prompt withdrawal of occupation forces, had removed one of the major obstacles to its conclusion.

The Soviet Union, in identical Notes handed to the three Western Ambassadors in Moscow on April 19, formally notified Britain, the U.S.A., and France of the satisfactory outcome of the Soviet-Austrian discussions in Moscow, and proposed that a four-Power conference of Foreign Ministers should be held in Vienna in the near future, with the participation of Austrian representatives, to consider and sign an Austrian State Treaty. The Notes said that, as a result of the Soviet-Austrian discussions, "it became clear that at present the possibility exists of completing the settlement of the Austrian question and of concluding a State Treaty with Austria."

The three Western Powers, replying to the Soviet Note on April 22, welcomed the possibility of concluding an Austrian treaty and suggested an early meeting of their Ambassadors in Vienna with the Soviet Ambassador and Austrian representatives to undertake the preparatory work. The Notes were in similar terms, the text of the British Note being as follows:

"H.M. Government welcome the Soviet Government's view that the possibility now exists for concluding the Austrian State Treaty. They would be pleased to participate at the earliest possible moment in a meeting of the Foreign Ministers of the four Powers, together with representatives of Austria, in order to sign the treaty From the information they have received regarding the exchanges between the Austrian and Soviet Ministers in Moscow, it is clear that some preparatory work still remains to be done. Recalling the tripartite declaration of April 6, they suggest that the Ambassadors of the four Powers in Vienna should meet at a very early date, with the participation of Austrian representatives, in order to examine the results of the exchanges in Moscow and to reach the necessary agreements for the early signature of the State Treaty by the Foreign Ministers. They would therefore propose that the Ambassadors together with Austrian representatives should meet in Vienna on May 2. As soon as the necessary preparations have been completed, the earliest practicable date should then be set for the Foreign Ministers to meet and sign the treaty."

Before the present Soviet initiative on the Austrian Treaty, it had again been emphasized by Austria and the Western Powers that the conclusion of an Austrian Treaty was conditional upon the withdrawal of all occupation troops from Austria.

The Austrian Government, replying on Oct. 12, 1954, to the Soviet Note of Aug. 12 (which had suggested fresh talks on the Austrian Treaty—see 13731 A), had said that the calling of a further conference was "primarily the duty of the four occupation Powers," and that for such a conference to be a success "there must be a direct and indissoluble link between the conclusion of the treaty and the evacuation of Austria by the occupation troops." This view was also emphasized in a joint U.S.-Austrian communiqué, issued in Washington on Nov. 26 at the end of a visit by Dr. Raab to the American capital, which stated (among other things) that "both Governments would continue with determination to work together for a State Treaty, which would provide for the withdrawal of all occupation troops from Austria at an early and fixed date."

A further reference to the question was made by M. Mendès-France in his address to the U.N. Assembly on Nov. 22 (see 13910 A), following which it was announced on Dec. 7 that the French Embassy in Moscow had been instructed to inquire what the Soviet Union's reactions were to the address. No official indication of the Soviet view was given, however, until M. Molotov's speech on Feb. 8.—(Soviet Weekly - Wiener Zeitung - Le Monde, Paris - Le Figaro, Paris - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. 13914 A.)**

A. UNITED STATES. — Mr. Adlai Stevenson's Speech on Far Eastern Situation. - Statement by Mr. Dulles.

Mr. Adlai Stevenson, the Democratic candidate in the 1952 Presidential election and now titular head of the Democratic Party, made an important speech in Chicago on April 11 in which he criticized the Republican Administration's policy in the Far East and emphasized the danger of the United States isolating herself from her allies in this matter. Extracts from Mr. Stevenson's speech are given below.

After referring to the fact that, " despite the uneasy truces in Korea and Indo-China, our country once again confronts the iron face of war," Mr. Stevenson continued " The tragedy is that the possibility of war just now seems to hinge upon Quemoy and Matsu, small islands that lie almost as close to the coast of China as Staten Island does to New York; islands that presumably have been fortified by the Chinese Nationalists with our approval and assistance. Having loudly hinted at American intervention in Indo-China just a year ago and backed away, having forced General Chiang Kai-shek to evacuate the Tachen Islands when the Communists made menacing gestures just a couple of months ago, we now face the bitter consequence of our Government's Far Eastern policy once again. Either another damaging and humiliating retreat, or else the hazard of war, modern war, unleashed not by necessity, not by strategic judgment, not by the honour of allies or for the defence of frontiers, but by a policy based more on political difficulties here at home than the realities of our situation in Asia

" Given these unhappy choices it appears that President Eisenhower will decide what to do if and when the attack comes, depending on whether in his judgment it is just an attack on these islands or a prelude to an assault on Formosa. While our President has great military experience, perhaps it is not improper to ask whether any man can read the mind of an enemy within a few hours of such an attack and determine whether, at some later date, the enemy plans to go further and to invade Formosa Is it wise to allow the dread question of modern war to hinge upon such a guess ?

" Now many of the President's most influential associates have been insisting that he pledge us to the defence of these islands. They say that another rebuff and backdown, another retreat in Asia, would add substance to what the Chinese Communists say about the United States being a ' paper tiger ' . . . [They] also say that, having gone this far with Chiang Kai-shek, to let him down now when he is reinforcing these islands and preparing an all-out stand would deal a heavy blow to the morale of his forces and endanger the defences of Formosa itself

" There is undeniable merit to these and other arguments, but I must say in all candour that they seem to me overborne by the counter-arguments, and I have the greatest misgivings about risking a third world war in defence of these little islands in which we would have neither the same legal justification nor the same support as in the defence of Formosa. They are different from Formosa. They have always belonged to China. But Formosa belonged to Japan and was ceded by the Japanese peace treaty. We have as much right to be there as anybody, except perhaps the real Formosans."

Mr. Stevenson went on to question whether the offshore islands were—as claimed by the Administration—essential to the security of the U.S A.; whether they were even essential to the security of Formosa ; and whether in any case they could be defended without using nuclear weapons. He then turned to the danger of the U.S.A. isolating herself from the rest of the world with regard to her policy on Formosa and the offshore islands, saying : " Are we prepared to shock and alienate, not alone our traditional allies but most of the major non-Communist powers of Asia, by going to war over islands to which the U.S.A. has no colour of claim and which are of questionable value to the defence of Formosa ? Are we, in short, prepared to face the prospect of war in the morass of China, possibly global war, standing almost alone in a sullen or hostile world ? These are the questions that must be answered, this time I hope with more concern for realities in Asia and for unity with our allies than for fantasies in Formosa and for placating implacable extremists in America.

" At this late date there may be no wholly satisfactory way of resolving the dilemma. But if we learn something from this experience, if we realize at last that we have been pursuing a dead-end policy in Asia, then perhaps we can turn our present difficulties to good account and devise an approach more in keeping with the realities of Asia and of the hydrogen age.

" And that causes me to say that the division of our coalition over these offshore islands, the weakening of the grand alliance of free nations pledged to stand together to defend themselves, is in my judgment a greater peril to enduring peace than the islands themselves. I know some politicians tell us that we don't need allies . . . But it is not so. We need allies because we have only 6 per cent of the world's population. We need them because the overseas air bases essential to our own security are on their territory. We need allies because they are the source of indispensable strategic materials. We need, above all, the moral strength that solidarity of the world community alone can bring to our cause. Let us never underestimate the weight of moral opinion . . ."

" So I would urge our Government to promptly consult our friends, and the uncommitted States, too, and ask them all to join with us in an open declaration condemning the use of force in the Formosa Strait, and agreeing to stand with us in the defence of Formosa against any aggression, pending some final settlement of its status —by independence, neutralization, trusteeship, plebiscite, or whatever is wisest. Nor do I see any reason why we should not invite Soviet Russia, which is united by treaty with Red China, to declare its position, to indicate whether it prefers the possibility of ultimate settlement by agreement to an unpredictable, perhaps limitless conflict, started by an arrogant, foolhardy Communist China either by design or by miscalculation.

" Fortified by such an international declaration denouncing the use of force, with the assurance of such collective support for the defence of Formosa, and with the addition thereby of moral solidarity to military strength, I should think that Quemoy and Matsu would have little further importance to the Nationalists, let alone to us And that they could then be relinquished before we stumble any further down the dismal road to war that nobody wants . . .

" Another major avenue in the quest for a peaceful solution in the Far East remains unexplored : the United Nations. I should think that the U.S A , together with friends and allies in Europe and Asia, could submit a resolution to the U.N. General Assembly, calling upon the Assembly likewise to condemn any effort to alter the present status of Formosa by force. And I think we could afford to go further and call upon the U N. Assembly to seek a formula for the permanent future of Formosa, consistent with the wishes of its people, with international law, and with world security."

Mr Stevenson emphasized that if the Chinese Communists refused to accept a settlement along the lines which he had outlined, then at least it would be clear to everyone who the aggressors were. If the U.S A. was faced with no alternative " but to meet force with force," then she would at least face it " with our allies beside us and the blame placed squarely where it belongs."

In conclusion, Mr. Stevenson drew attention to the " urgent and larger problems " of Asia, and made an appeal for increased U S. technical assistance to that area and for greater U.S. moral leadership in the world as a whole. " Preoccupied as we all are these days with the immediate problem of these islands," he said, " we must try to keep things in perspective somehow and not lose sight of our main objectives. Far beyond Quemoy and Matsu, and even Formosa, lie the urgent and larger problems of Asia—the growing attraction of enormous, re-awakened China, the struggle of the under-developed countries to improve their condition and keep their independence, and the grave misgivings about America. If the best hope for today's world is a kind of atomic balance, the decisive battle in the struggle against aggression may be fought not on battlefields but in the minds of men, and the area of decision may well be out there among the uncommitted peoples of Asia and of Africa who look and listen, and who must, in the main, judge us by what we say and do . . .

" We will be welcome to the sensitive people of Asia, more as engineers and doctors and agricultural experts, coming to build, to help, to heal, than as soldiers Point Four was an idea far more stirring, far more powerful than all of the empty slogans about ' liberation ' and ' retaliation ' and ' unleashing ' rolled together. So I say, let us present once more the true face of America—warm and modest and friendly, dedicated to the welfare of all mankind, and demanding nothing except a chance for all to live and let live, to grow and govern as they wish, free from interference, free from intimidation, free from fear.

" Let this be the American mission in the hydrogen age," Mr. Stevenson concluded " Let us stop slandering ourselves and appear before the world once more as we really are—as friends, not as masters ; as apostles of principle, not of power ; in humility, not in arrogance ; as champions of peace, not as harbingers of war. For our strength lies, not alone in our proving grounds and our stockpiles, but in our ideals, our goals, and their universal appeal to all men who are struggling to breathe free."

The U.S. Secretary of State, Mr. Dulles, commenting on Mr. Stevenson's speech on April 12, said that the only important difference between his own and Mr. Stevenson's ideas on the Formosa situation lay in the degree of solicitude which the U.S.A. should show towards Nationalist China. " Mr. Stevenson speaks feelingly about our ' allies,' " the Secretary of State said, " but he forgets one ally, namely the Republic of China. It is upon the loyalty and resources of that ally that the free world must primarily depend for the defence of Formosa. Yet Mr. Stevenson seems to assume that that ally can be ignored and rebuffed. Aside from this, Mr. Stevenson has in fact endorsed the main features of the Administration's programme in relation to Formosa."

B. AUSTRALIA. — Loan in Switzerland.

An Australian Government loan of 60,000,000 Swiss francs (£A6,000,000)—the second such loan—was floated in Switzerland by a syndicate of Swiss banks on Feb. 11-15 at 99½ per cent ; bearing interest at 3½ per cent, the loan was for 15 years with the option of repayment after 10 years. Its proceeds will be used for the Government's public works programme.—(Australian News and Information Bureau - Neue Zürcher Zeitung)

C. DANUBE NAVIGATION. — Austrian-Bulgarian Agreement.

The Danube navigation agreement between Austria and Bulgaria, giving the shipping from either country free access to the other, which had been initialled on Nov. 18, 1954, was signed in Sofia on March 10.—(Bulgarian Bulletin) **(13889 E.)**

APRIL 23—30, 1955

A. EGYPT - ISRAEL. — Fighting in Gaza Area. - Security Council Condemnation of Israeli Retaliatory Attack. - Council Support for General Burns's Proposals to prevent Border Incidents and Infiltration from Egyptian Territory. - Egyptian Acceptance of Proposals. - Israeli Partial Acceptance. - Armistice Commission's Condemnation of Egyptian Attack at Patish. - The "Bat Galim" Case. - Security Council's Call for Free Passage for All Shipping through Suez Canal. - Major Salem's Proposal for Israeli Cession of Negev to Jordan. - Israeli Rejection.

The most serious incident on the Israeli-Egyptian frontier since the signing of the armistice between the two countries in 1949 occurred on Feb. 28, when 38 Egyptians and eight Israelis were killed and 31 Egyptians and 13 Israelis wounded in fighting near Gaza. According to Egyptian statements, two fully equipped platoons of the Israeli Army advanced about two miles into Egyptian-controlled territory, attacked and demolished a military post and a water-pumping station, and threw grenades into the Gaza stationmaster's house, injuring his young son; another Israeli unit meanwhile crossed the armistice demarcation line farther to the south, and ambushed a military lorry bringing up reinforcements. Israeli Army headquarters, on the other hand, stated that an Egyptian unit had crossed the frontier and ambushed an Israeli patrol, and that a running fight had ensued, in which the Israelis had pursued the Egyptians some distance into their own territory.

The situation along the Israeli-Egyptian border had steadily deteriorated since September 1954, and an Israeli spokesman claimed on March 1 that during the previous six months 40 armed clashes, 27 Egyptian raids into Israeli territory resulting in the death of seven people and the wounding of 24, and several acts of sabotage (such as the blowing up of water pipelines) had taken place, there had been no Israeli incursions into Egyptian territory, and Egypt had been condemned by the Israeli-Egyptian Mixed Armistice Commission on 26 occasions in connexion with such incidents, about many of which the Commission had expressed grave concern.

Following the Gaza fighting on Feb. 28 Mr. Sharett, the Israeli Prime Minister, told the *Knesset* on March 2 that if Egypt continued to proclaim that she was at war with Israel she "must face the consequences," which included "bloody battles," and that the only alternative to the present state of affairs was to fulfil scrupulously the terms of the armistice agreement and to work towards peace. In this connexion he asserted that the Turkish-Iraqi Pact, which was the result of U.S. and British policy, strengthened the Arab States in their refusal to make peace with Israel, and said that, in taking the initiative in organizing the Middle Eastern region for purposes of defence, the U.S.A. and Britain "inevitably make themselves responsible for the effect of their activities upon the position of each State within the region." This therefore raised the question of an effective guarantee for Israel's frontiers and territorial integrity, and her defence against possible aggression from any quarter.

In Cairo, Colonel Nasser, the Egyptian Prime Minister, said on March 3, in reply to Mr. Sharett's statement, that the Egyptian Commander-in-Chief had been given instructions that "force is to be met by force," and that if war began "we will give Israel a lesson she will never forget." "We shall rely on our strength," he added, "and not on the Security Council and its decisions."

The acting Foreign Minister of Iraq, Mr. Bashayan, assured the Egyptian Government on March 2 of Iraq's full support and of her willingness to supply all aid which was desired, whilst similar assurances were given by Syria, Lebanon, and Jordan. On March 3, however, the Iraqi Government protested against allegations by Egyptian Ministers that Iraq had incited the Israeli attack at Gaza.

Rioting broke out on March 1 among the 200,000 Arab refugees living in the Gaza area, who attacked the U.N truce headquarters and burned U.N. vehicles. Further demonstrations took place on the following day at Gaza, where a number of the rioters were wounded by Egyptian police fire, and at Khanyounis (15 miles to the south), where mobs demanding arms burned down a U.N food store. Although no further riots occurred, the situation remained tense, and on March 5 the wives and children of U.N. officials were evacuated from the area as a safety measure.

The Egyptian Government asked the president of the Security Council on March 2 to summon an urgent meeting of the Council to consider Israel's "violent and premeditated aggression" of Feb. 28, whereupon Israel lodged a counter-complaint on March 3 that Egypt's "continuous violations" of the armistice agreement and the Council's resolutions were "endangering international peace and security." The Council considered the two complaints on March 4, but agreed to postpone its decision until it had heard a report from General Burns, the Chief of Staff of the Truce Supervisory Organization.

The Mixed Armistice Commission ruled on March 6, by the casting vote of the French chairman, Major-General Giacomaggi, that in the incident of Feb. 28 Israeli regular forces had carried out a "prearranged and planned attack, ordered by Israeli authorities," against Egypt; rejected Israel's counter-charge alleging Egyptian responsibility for the incident, on the ground of "lack of evidence"; condemned Israel's "brutal attack" as a violation of the armistice agreement; and noted "with grave concern the serious situation prevailing along the Gaza strip, resulting from this incident." An appeal by the Israeli Government against the Commission's decision was rejected on March 11 by the U.N. Special Truce Committee, headed by General Burns; the Committee added, however, that the Commission's inability to adopt the Israeli version in no way affected its attitude concerning Egypt's obligation to take steps to prevent incidents, as expressed in earlier resolutions.

A report on the Gaza incident, in which he also dealt with the general situation on the border and suggested measures for its improvement, was presented by General Burns to the Security Council on March 17.

After outlining the circumstances of the Gaza raid, **General Burns** condemned the raid as a violation of the armistice agreement by Israel but stated that infiltration from Egyptian-controlled territory, although not the only cause of the prevailing tension, had "undoubtedly been one of its main causes" Dealing with steps to prevent further incidents, he recalled his earlier suggestion that the two parties should meet informally to examine the possibility of agreeing on measures to reduce this tension, among the measures proposed by him were the institution of joint patrols and of barbed wire fences along certain sections of the line, the negotiation of a local commanders' agreement, and the manning of all outposts and patrols by regular Egyptian and Israeli troops He still believed that if an agreement were effected in this manner, and both parties honestly attempted to fulfil the agreement, "infiltration could be reduced to an occasional nuisance, a kind of thieving which Israel must probably regard as inevitable so long as there are vast numbers of poverty-stricken refugees on her borders" In conclusion, he recommended that the Egyptian authorities should take appropriate measures against theft and the sale of goods stolen by infiltrators from Israeli settlements, and should give publicity to punishments meted out for theft or illegal crossing of the line, as otherwise it was "understandable that, seeing no news of infiltrators being punished, the Israelis refuse to believe that a serious attempt is being made to prevent the depredations which eventually build up tension to a dangerous point."

M. Loutfi (Egypt) maintained that the question before the Council was what attitude it was to adopt to affirm its authority and to put an end to the "constant Israeli aggression" It was obvious in view of past experience that a mere condemnation would not suffice, and in view of the gravity of the situation Egypt expected the Council to apply the provisions of the Charter dealing with acts of aggression.

When the discussion was resumed on March 23, **Mr. Abba Eban** (Israel) cited numerous violations of the armistice agreement for which Egypt had been condemned by the Mixed Armistice Commission; alleged that "the centre from which the violence is organized and directed" was the Egyptian military headquarters at Gaza; and called for "a strong condemnation of this campaign organized in Gaza, to which Israel was subjected between the summer of 1954 and the end of February." Contending that "the connexion between these events and the Gaza episode is nothing less than the direct and compelling relationship of cause and effect," he said that clashes like that at Gaza did not "spring from the empty air," but arose from "morbid conditions of international relations" and showed "a profound weakness in the current operation of the armistice system" Until progress was made towards peace, it was therefore increasingly urgent to correct the imperfections of this system, the main breach in which was "the proclamation [by Egypt] of a state of belligerency and the application of that doctrine in acts of war by sea and land."

After emphasizing that Israel was "prepared to give an assurance that, if no hostile act is carried out by Egypt against Israel, then no hostile act of any kind will be carried out by Israel against Egypt," Mr. Eban proposed the adoption of a "code of Egyptian-Israeli relationships." This would include "the abolition of a state of war and of all actions and measures carried out on the basis of the existence of a state of war"; a joint declaration of readiness to carry out all obligations under the armistice agreement and all Security Council decisions relating to the agreement; and a declaration of fidelity to the provision of the agreement calling on the signatories to make a transition to permanent peace, and to the provisions of the U.N. Charter calling for the settlement of all disputes by peaceful means and the avoidance of the threat or use of force against the territorial integrity or political independence of any State. Although acceptance of such a code would not take either party beyond its existing commitments under the armistice agreement and the U.N Charter, he concluded, it was desirable because "under the burden of belligerent doctrines, the pacific obligations which we have undertaken have become lost to sight, and the insidious fallacy of a state of war has spread its contagion both to the theory and to the practice of our relationships."

M. Loutfi described Mr. Eban's speech as "full of omissions, inaccuracies, and slanderous observations," and said that "no one can deny that Israel has committed a brutal act of outright aggression, prepared and perpetrated with the assent of Israel's responsible leaders, and carried out by means of its regular armed forces." After criticizing General Burns's report, on the grounds that it "went far

beyond the urgent considerations relating to the aggression against Gaza," as well as beyond "the limits laid down for him by the Council," M. Loufti maintained that the incidents mentioned in the report, for which Egypt had been held responsible, "cannot even remotely justify this atrocious act of aggression against Gaza."

On March 29 the Security Council unanimously adopted a resolution introduced by Britain, France, and the U.S.A., which denounced the Gaza incident as a violation by Israel of her obligations under the general armistice agreement and the U.N. Charter; called upon Israel to take "all necessary measures to prevent such action"; and emphasized that "no progress towards the return of permanent peace in Palestine can be made unless the parties comply strictly with their obligations."

On the following day the Council unanimously adopted a second resolution, also introduced by the three Western Powers, which referred to those sections of General Burns's report dealing "with general conditions on the armistice demarcation line between the Gaza strip and Israel as the causes of the present tension." The resolution noted that General Burns had made certain proposals aimed at preserving security in the area within the framework of the general armistice agreement; called upon the Egyptian and Israeli Governments "to co-operate with the Chief of Staff in regard to these proposals, bearing in mind that, in the opinion of the Chief of Staff, infiltration can be reduced to an occasional nuisance if an agreement were effected between the parties on the lines he has proposed"; and requested General Burns to keep the Security Council informed of the progress of his discussions.

In the debate on March 29 Council members stressed that they could not condone a policy of organized retaliation by Israel, regardless of the repetition of incursions across the border by Arab infiltrators and similar acts. **Mr. Lodge** (U.S A.), who recalled the Israeli attack on the Jordanian village of Qibya three years ago, said that the recent Gaza attack was the fourth case of an Israeli retaliation and the "most serious because of its obvious premeditations." **M. Hoppenot** said that because of France's friendship with Israel he would cast his vote of condemnation with difficulty, but added that the resolution should serve as "a last warning" to Israel **Sir Pierson Dixon** (U K.) declared that, coming after the Qibya incident, the attack at Gaza was a "complete disregard" of the Council's earlier call to Israel to cease retaliation, but stressed that Britain also disapproved of Egypt's claim that she was still at war with Israel and could exercise "belligerent rights." He said that the U.K. shared Israel's hope that the armistice would be replaced in due course by a permanent peace, though he added: "Peace cannot be won at the point of a gun." **Sir Leslie Munro** (New Zealand) criticized Mr. Eban's statement about the "direct and compelling relationship of cause and effect," and said that the Israeli argument obscured the fact that the Gaza incident was a military operation which could only have occurred as a result of a deliberate decision on the part of the Israeli authorities; the assumption implied by Mr Eban's statement, however, that for Israel military retaliation was a justifiable policy could not be accepted.

During the debate on March 30 stress was laid on Egypt's special responsibility for ensuring that unstable elements had no access to arms and explosives, and for preventing infiltration and acts of violence from her territory, although it was also pointed out that effective measures against infiltration would require the co-operation of both parties.

Meanwhile, however, a serious incident had occurred on Israeli territory when during the night of March 24-25 two armed infiltrators threw grenades and fired into the yard of a farmhouse at Patish (a settlement 10 miles inside the Israeli border) where a wedding party was taking place, killing one woman and wounding 18 other guests. The Mixed Armistice Commission, meeting on March 27, denounced the attack as a "brutal and murderous act of aggression" and "a grave violation of the armistice agreement," attributed responsibility to Egypt, and called on the Egyptian authorities to take steps to arrest the perpetrators of the crime.

This was followed by a series of almost daily clashes between Egyptian and Israeli forces along the border. In the majority of these incidents Israeli patrol cars were blown up by mines laid inside Israeli territory, and this was followed by Egyptian rifle and mortar fire and Israeli counter-fire.

The most serious incident of this kind occurred on April 3 near the Israeli settlement of Nahal Oz when two Israeli soldiers were killed and 12 wounded, four of them seriously, through the blowing up of a patrol car; two Egyptians were killed and four wounded when the Israeli forces replied with artillery and mortar fire, whilst the Egyptians were said to have fired on the settlement itself. The Mixed Armistice Commission, meeting on April 10, condemned Egypt for this "unprovoked attack" and Israel for what was called "a technical violation" in firing back with heavy weapons.

In smaller clashes on March 28, March 30, April 1, and April 2 three Israeli patrol cars were blown up by Egyptian-laid mines inside Israeli territory, one Israeli officer being killed and seven soldiers wounded, whilst in the ensuing firing one Egyptian soldier was killed and one wounded. Responsibility for all these incidents, except one on April 1, was attributed by the Mixed Armistice Commission to Egypt.

After an interval of a few days, another Israeli patrol car was blown up on April 9, one Israeli soldier being killed and four injured; the Mixed Armistice Commission, meeting on April 17, blamed in the first instance the Egyptians, and in the second the Israelis for having subsequently fired on the Egyptian positions.

In view of these incidents Mr. Eban asked the Security Council on April 4 to convene for an urgent meeting, in order to consider Israeli charges of "repeated attacks" by Egypt from across the border on Israeli civilians and soldiers. In his letter to the Security Council Mr. Eban alleged that there had been a "mounting tide" of such attacks, and he listed 16 incidents which he said had been committed since March 26, either by Egyptian regular troops and irregulars, or by Arab marauders coming from the Egyptian side; the letter also referred to the Patish incident and charged that most of the other border attacks had been "well planned."

The Security Council met on April 6, and after a brief hearing decided to postpone discussion of the Israeli complaint until it had received General Burns's report on the findings of the Mixed Armistice Commission. On April 11, however, Israel lodged a further complaint, alleging that five more incidents had occurred since the Council's last meeting. When the Council met again on April 19 it eventually decided that no new action on its part was required, as its resolution of March 30 already covered the existing border situation and had requested both sides to co-operate in practical measures to reduce border tension between them.

Presenting Israel's case, **Mr. Eban** said that the latest report from General Burns had confirmed "without contradiction or reservation" every item of her complaint against Egypt. The report showed that the Mixed Armistice Commission had condemned Egypt ten times for armistice violations since Feb. 28; in the same period there had been six findings against Israel, but five of these had been described as technical violations or had been of a defensive character following a previous Egyptian attack at the same place. Mr. Eban therefore urged the Council to condemn Egypt for its "preponderant responsibility" in the increased border tension and added: "I cannot over-emphasize the importance . . . of these questions in the eyes of my Government and people We ask ourselves in deep anxiety and hope whether the Security Council will practise an absolute balanced impartiality. We hope that we have not reached a position where it is virtually impossible for Israel to secure a just verdict by resolution."

M. Loutfi maintained that the Israeli charges were an attempt to nullify the effects of the Council's resolution of March 29 condemning Israel for the Gaza attack; argued that the current tension had been provoked by that attack, and described the Israeli complaint as "propaganda aimed at representing Egypt as the aggressor" He recalled that Egypt had recently requested General Burns to post additional U.N. observers on the Egyptian side of the armistice line to determine which of the parties was guilty of firing first or of crossing the line, and said that since the arrival of these observers a week earlier the situation had greatly improved. He also stated that Egypt had meanwhile accepted all the four points of General Burns's proposals for easing border tension (see below).

M. Hoppenot, M. Sobolev (Soviet Union) and **Mr. Perry** (N.Z.) expressed the view that it would not be appropriate for the Council to draw up a "balance-sheet" of the incidents recorded in General Burns's report; Mr. Perry added that the Council, while lending its support to the efforts of the Chief of Staff to end the prevailing tension, should not in his opinion be used as "a kind of review authority to pass judgment on all decisions of the Mixed Armistice Commission." **Sir Pierson Dixon** and **Mr. Key** (U.S.A), although stressing that the latest clashes caused by Egypt could not be justified even if they had been an unofficial retaliation for the Gaza raid, agreed with the other Council members that in view of the Council's resolution of March 30 no further decision was required.

The Security Council's decision not to act on Israel's complaints, however, aroused deep resentment in that country, and a statement of the Israeli Foreign Ministry issued on April 21 described it as a "manifest and disconcerting instance of partiality," likely to encourage further acts of hostility against Israel. The statement added: "The Powers which determined the outcome of the Security Council debate have assumed a heavy responsibility for its baneful results."

As mentioned by M. Loutfi, the Egyptian Government had on April 11 accepted the four points of General Burns's proposals for easing the border tension, viz., (1) the setting up of joint Israeli-Egyptian border patrols along the Gaza strip; (2) the erection of barbed wire fences along certain "sensitive" parts of the armistice line; (3) a provision for the local commanders to conclude agreements on measures to prevent incidents; (4) the employment of only regular and disciplined forces along the frontier. The Israeli Government, in a Note handed to General Burns on April 20, also accepted points (2), (3), and (4), but rejected the proposal for joint border patrols.

The "Bat Galim" Incident.

Prior to these events, anti-Egyptian feeling in Israel had been intensified by the seizure of the first Israeli ship to attempt to pass through the Suez Canal, the freighter *Bat Galim*, which was detained by the Egyptian authorities on Sept. 28 while on her way from Eritrea to the Israeli port of Elath (on the Gulf of Akaba), the crew being imprisoned. The Egyptian authorities asserted that the crew had fired on fishing vessels south of Suez, sunk one of them, and killed two fishermen; this allegation, however, was completely denied by the Israeli Government, which lodged a strong protest with the Security Council on Sept. 29. Although the Mixed Armistice Commission adopted a resolution on Nov. 19 declaring that the passage of the *Bat Galim* through the canal was not a violation of the armistice agreement, and rejecting the charges brought against the crew, an Egyptian spokesman stated on the following day that Egypt would still refuse to allow Israeli ships to pass through the canal.

In view of Egypt's attitude Israel brought the matter before the Security Council, but on Dec. 6—the eve of the Council's debate—M. Loutfi informed the Council's President (then Sir Leslie Munro, New Zealand) that the Egyptian judicial authorities had, because of insufficient evidence, set aside the charges of murder, attempted murder, and unlawful carrying of weapons which had been brought against the crew of the *Bat Galim*; he also stated that the seamen would be released as soon as the necessary formalities had been completed, and that Egypt was prepared to release the ship's cargo immediately.

When the Council debate opened on Dec. 7 the Council had before it a report from General Burns, which stated that on Egypt's appeal the case had been considered by the Special Committee comprising General Burns himself and one member each of the Egyptian and Israeli delegations, and that the Committee had maintained the Commission's findings

During the Council's debate **M. Loutfi** stated that Egypt would continue to refuse passage through the Suez Canal to Israeli ships, argued that "aggressive Israeli acts" required this "legitimate defence", and asserted that to allow Israel to use the canal would involve the risk of saboteurs being smuggled into Egypt or of the canal being mined or blocked by Israeli "sabotage" He maintained that the Security Council's 1951 resolution on freedom of traffic through the Suez Canal had only "invited" Egypt to give free transit to neutral ships, and added that the Egyptian Government had accordingly adopted a tolerant policy towards the passage of neutral vessels going to Israel.

Mr. Eban, whilst expressing satisfaction at Egypt's readiness to release the crew and cargo of the *Bat Galim*, emphasized that "the only solution which Israel could accept is the unconditional release of the ship, together with her crew and cargo"; he demanded that the ship should be allowed to complete its journey through the canal, which, he maintained, Egypt had not the slightest right to interrupt Mr. Eban declared that the *Bat Galim* case was only "one episode" of a policy which had far-reaching consequences, involving the right of freedom of the seas and the concept that there should be no restrictions on the free passage of ships of all nations, including Israel, through an international waterway

The 10 Israeli sailors were released on Jan. 1 on the Israeli-Egyptian border near Gaza. Israel had refused to receive them officially at the frontier because of her contention that the release of the crew separately from the ship was contrary to the Security Council's resolution and to the Mixed Armistice Commission's ruling. U.N. observers from General Burns's Truce Supervision Organization were also absent, as the manner of release had not been approved by the Security Council or by the Armistice Commission. Earlier, on Dec. 23, Egypt had informed the Security Council that she was ready to release the *Bat Galim* to any foreign shipping company acting on Israel's behalf, on condition that the ship was not taken through the Suez Canal.

At Israel's request the Security Council resumed consideration of the case on Jan. 4.

M. Loutfi, announcing the release of the *Bat Galim's* crew, reaffirmed that Egypt was ready to release the cargo, and suggested that the ship's release might be arranged through a sub-committee of the Mixed Armistice Commission **Sir Pierson Dixon** stated that Britain attached the greatest importance to the principle of freedom of navigation through the Suez Canal, as set forth in the Constantinople Convention of 1888, and could not accept Egypt's view that the Convention gave her the right to impose restrictions on traffic with Israel through the canal He therefore expressed regret that Egypt had not agreed to let the *Bat Galim* proceed through the canal after the charges against her crew had been withdrawn, and recalled the 1951 resolution of the Security Council which had called upon Egypt to terminate the restriction on international commercial shipping and goods wherever bound, and to cease all interference with such shipping beyond that essential to the safety of shipping in the canal itself **Mr. Cabot Lodge** (U.S.A.) and **M. Hoppenot** (France) agreed with the British interpretation of the Constantinople Convention, and they, as well as **Senhor de Barros Gomes** (Brazil), called upon Egypt to give full effect to the Council's 1951 resolution, to allow the passage of the *Bat Galim* to Israel, and to cease interference with Israeli shipping and with neutral shipping carrying goods to and from Israel.

In the continued discussion on Jan. 13 **M. Loutfi** denied that Egypt had instituted a blockade of shipping through the canal, but maintained that the Constantinople Convention provided for exceptions to the right of free passage in the interests of Egypt's defence and security. **Mr Eban** told the Council that his Government would co-operate only in such procedures to release the *Bat Galim* and her cargo as would vindicate the 1951 resolution. After **Dr. Belaunde** (Peru) had suggested that General Burns, as representative of the U.N., might offer his good offices to the parties in arranging for the ship's release, **Sir Leslie Munro** expressed the hope that the incident would be settled without delay and that Egypt would in future carry out the 1951 resolution. The meeting was then adjourned without the Council taking formal action.

Major Salem, the Egyptian Minister of National Guidance, stated in a press interview on March 20 that Egypt had no territorial ambitions, but was anxious to have a direct land link with Jordan and the rest of the Arab world. He proposed therefore that the Egyptian-held Gaza strip and the southern triangle of Israel lying between Gaza, Beersheba, and Akaba, and comprising the Negev Desert, should be given to Jordan. In support of this plan, which he described as Egypt's "price" for co-operation with the Western Powers, he claimed that "in the event of an attack on Turkey the main Allied base in the Suez Canal Zone could operate more effectively over the direct overland Arab route," and that the Palestinian refugees could be resettled permanently in this area. An Israeli Government spokesman described the proposal on March 21 as "blackmail," and commented: "No part of Israel's territory is at the disposal of anyone to serve as a *quid pro quo* for political or military arrangements of any kind."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - U.N. Information Centre, London - United Nations Review, New York) **(Prev. rep. 13498 A.)**

A UNITED KINGDOM.—General Templer appointed Chief of Imperial General Staff. - General Oliver to be Vice-Chief of Staff. - Other Forces Appointments. - New British Commandant in Berlin.

The War Office announced on April 22 that the Queen had approved the appointment of General Sir Gerald Templer as Chief of the Imperial General Staff with effect from November 1955, in succession to Field-Marshal Sir John Harding. Earlier, on March 22, it had been announced that Major-General W. P. Oliver, British Commandant in Berlin, would become Vice-Chief of the Imperial General Staff, with the temporary rank of lieutenant-general, with effect from May 1955, in succession to Lieut-General Sir Harold Redman, who had been appointed Governor and C.-in-C., Gibraltar.

General Templer (56) was High Commissioner and Director of Operations in Malaya from February 1952 to May 1954, and had lately been conducting an inquiry into the organization and administration of Colonial and military forces, during which he also went to Cyprus and Uganda (See also biographical note in 11981 A—Volume VIII).

Major-General Oliver (53) became Chief of Staff, Eastern Command, in January 1951, and from 1953-54 was principal staff officer to the High Commissioner of Malaya, he had been G.O.C., British Sector in Berlin, since March 1954.

It was also announced on March 22 that General Oliver would be succeeded as British Commandant in Berlin by Major-General R. C. Cottrell-Hill, Director of Military Training at the War Office since 1953 and previously Chief of Staff in Malaya.

Other recent appointments and promotions in the armed forces were as follows

Royal Navy. Vice-Admiral F. R Parham, Fourth Sea Lord and Chief of Supplies and Transport, as C.-in-C., The Nore, in succession to Admiral Sir Geoffrey N Oliver (April 2, with effect from October).

Rear-Admiral R. D. Watson as Fourth Sea Lord (April 2, with effect from September).

On April 21 it was announced that Admiral Sir George E. Creasy (59), C.-in-C Portsmouth, Allied C.-in-C., Eastern Atlantic and Channel Command, had been promoted to the rank of Admiral of the Fleet; Vice-Admiral Sir Ralph Edwards (54), Third Sea Lord and Controller of the Navy, to the rank of Admiral; and Rear-Admiral L. N. Brownfield (53), Admiral Superintendent Devonport, to the rank of Vice-Admiral.

Sir George Creasy's promotion brought to 15 the number of Admirals of the Fleet

Army. Major-General B. C. H. Kimmins (Director, Territorial Army, Cadets and Home Guard, War Office) as G.O.C. Northern Command, with effect from July 1955.

Royal Air Force. The promotion of Air Marshal Sir Donald Hardman to the rank of Air Chief Marshal was announced on April 1.

A. EGYPT - INDIA - PAKISTAN. — Treaty of Friendship between Egypt and India. - Mr. Nehru's Visit to Cairo. - Colonel Nasser's Visit to Karachi and Delhi.

A treaty of friendship between Egypt and India was signed in Cairo on April 6 by Dr. Fawzi, the Egyptian Foreign Minister, and Nawab Ali Yavar Jung Bahadur, the Indian Ambassador, its provisions being as follows:

(1) Egypt and India would at all times strive to maintain and strengthen peace, friendship, and brotherly relations between themselves

(2) The parties would maintain diplomatic and consular relations in conformity with international law and practice, and would guarantee to each other's representatives the privileges and immunities normally accorded under international law.

(3) Commercial and industrial relations between the two countries, as well as those pertaining to Customs, navigation, civil aviation, cultural affairs, extradition, and other matters of mutual interest, would be conducted in accordance with such special agreements as were already in operation or might be concluded between them.

(4) The parties agreed to settle all disputes between themselves peacefully through diplomatic channels, failing which they would seek a solution by negotiation, inquiry, mediation, conciliation, arbitration, judicial settlement, or other peaceful means.

(5) Nationals of each country within the other's territory would enjoy on a reciprocal basis the right to acquire, possess, and dispose of movable and immovable property, appropriation of which was permitted to non-nationals, and to travel, reside, and engage in trade, industry, or other lawful pursuits in conformity with the other country's Constitution, laws, and regulations. They would also enjoy the same treatment as the other country accorded to its own nationals with respect to their persons and properties, and in regard to all judicial, administrative, and other legal proceedings.

(6) The parties agreed to strengthen and develop cultural ties between themselves, and to assist each other in industrial and agricultural progress.

(7) The treaty would come into force upon exchange of letters of ratification at New Delhi

The Indian Prime Minister, Mr. Nehru, had previously visited Cairo from Feb. 15-17, when returning from the Commonwealth Prime Ministers' conference in London, and had had discussions with the Egyptian Prime Minister, Colonel Nasser, and other members of the Egyptian Government.

A joint communiqué issued on Feb. 16 stated that the talks between the two Prime Ministers had covered "a wide range of subjects, political, economic and social, affecting generally problems of world peace and welfare and, more particularly, the situation in the Middle East, S.E. Asia, and the Far East," and that they had "indicated the existence of an identity of views on major international issues."

"In view of the tremendous developments of weapons of warfare," the communiqué went on, "war means today utter ruin for humanity. It cannot solve any problem. The Prime Ministers therefore believe that every attempt must be made to prevent war and develop a climate of peace International disputes should be settled peacefully by negotiations. Military alliances and Power entanglements which increase tension and rivalry in armaments do not add to the security of a country. The atomic and nuclear age has made it imperative to control weapons of mass destruction and to utilize atomic energy for peaceful purposes, more especially for the progress of underdeveloped areas Both Prime Ministers are in fullest sympathy with the aspirations and efforts for freedom of peoples of areas which are under colonial rule.

"The Prime Ministers reviewed tasks confronting their two Governments in the economic and social spheres. Both have as their objectives the attainment of social and economic justice and the raising of the standard of living of their peoples. Areas of co-operation in these spheres were explored, with particular reference to planned development."

Colonel Nasser, who was accompanied by Dr. Fawzi and Major Salem (Minister of National Guidance), visited Karachi on April 9-12 while on his way to the Asian-African conference at Bandung, and had a series of talks with Mr. Ghulam Mohammad, Governor-General of Pakistan, and Mr. Mohammed Ali, the Prime Minister. The subjects discussed were reported to have included Middle Eastern defence, with particular reference to the Turkish-Iraqi pact; the Palestine question (on which both Mr. Ghulam Mohammad and Mr. Mohammed Ali publicly assured Egypt of Pakistan's full support for the Arab cause in speeches on April 9 and 10); measures for the strengthening of cultural and economic unity between Moslem countries; and trade relations between Pakistan and Egypt.

At a press conference on April 10 Major Salem said that Egypt was opposed to joining military alliances sponsored by the West, which were contrary to her best interests, and was pursuing a policy of neutrality between world blocs; he added that what was good for Pakistan was not necessarily good for Egypt, and that both countries had their own problems, which necessitated a different approach to various issues.

On April 12 Colonel Nasser and his colleagues proceeded to Delhi, where the Egyptian Prime Minister held further talks with Mr. Nehru. In a speech to both Houses of the Indian Parliament on April 14 Colonel Nasser said that the Asian and African nations must stand "shoulder to shoulder," so that they could take their rightful place in the world and serve the cause of peace and security, and gave an assurance that Egypt would "collaborate with India and other nations to maintain peace."—(Indian and Pakistani High Commissioners' Offices, London - The Hindu, Madras - The Statesman, Calcutta)

B. SOVIET UNION. — Budget for 1955.

At its meeting in Moscow on Feb 3-9, the Supreme Soviet of the U.S.S.R. debated and approved the Budget for 1955 which had been presented by the Finance Minister, M. Zverev.

Revenue and expenditure estimates, with 1954 figures for comparison, were finally accepted as follows:

('000 million roubles)

	1955	Per cent	1954	Per cent
Estimated Revenue:				
Turnover tax	233.0	39.5	234.4	40.9
Profits tax	117.5	19.9	92.8	16.2
Direct taxes	48.4	8 2	45.7	8.0
State loans	30 5	5 2	16.4	2 9
Other	160 4	27.2	183.2	32.0
Total	590 2*	100.0	572.5	100.0
Estimated Expenditure:				
Grants to national economy	222 4	39.5	216.3	38 4
Social and cultural services	146 9	26.1	141.3	25 1
Defence	112.1	19.9	100.3	17.8
Administration and justice	12.6	2.2		
Other	69.5	12 3	104.9	18.6
Total	563.5*	100'0	562.8	100.0

* Revised.

Figures given for estimated expenditure on the national economy were as follows:

('000 million roubles)

	1955		1954	
	From Budget Funds	From Internal Reserves	From Budget Funds	From Internal Reserves
Heavy industry	101.2	62.4	79.7	53 5
Consumer goods	10 6	15.4	14.2	22.4
Agriculture	55.1	10.1	62.5	11.9
Transport	23.0	17.5	21 5	17.3
Other	33.2	6.8	38.5	1.5

It was pointed out in the British Press that the Budget—which was for the final year of the fifth Five-Year Plan—allocated considerably more to heavy industry and substantially less to consumer goods and agriculture than in 1954. Much of this increased expenditure, though not expressly shown as defence expenditure, would be for defence purposes, on which more would be spent than ever before in peace-time; at the same time, the proportion of the Soviet Budget directly allocated for defence would be lower than in all recent years except 1954. The 1954 expenditure on defence (in thousand million roubles), and the percentage of the Budget which this represented in various years, were as follows: 1.3 (3.4 per cent) in 1932; 56.7 (32.5 per cent) in 1940; 82.9 (20.1 per cent) in 1950; 108 6 (23.6 per cent) in 1952; 110.2 (20.8 per cent) in 1953; 100.3 (17.8 per cent) in 1954; and 112.1 (19.9 per cent) in 1955.—(Soviet Weekly - Financial Times - Economist)

C. TURKEY. — "Dumlupinar" Disaster. - New Court Decision.

The Chanak criminal court on April 12 found Commander Chelebioglu, commander of the Turkish submarine *Dumlupinar*, guilty of neglect of duty and erroneous manoeuvring resulting in the sinking of the submarine after a collision with the Swedish cargo steamer *Naboland* on April 4, 1953, with the loss of 81 lives. Commander Chelebioglu was sentenced to one year and eight months' imprisonment. The new trial was held after the quashing by the Supreme Court of the original verdict whereby the master of the *Naboland* had been found solely responsible for the collision and the commander of the submarine had been exonerated. The Chanak court's latest decision meant that responsibility for the collision was equally divided between the master of the *Naboland* and the commander of the *Dumlupinar*.

D. ITALY - LEBANON. — Legations raised to Embassy Level.

It was announced in Rome and Beirut on March 21 that Italy and Lebanon had agreed to raise their respective diplomatic missions from Legation to Embassy rank.

(Corriere della Sera, Milan - New York Times)

E. NEPAL. — Population.

The results of the first interim census compiled in Nepal, which were announced on April 15, showed that Nepal had a population of 8,431,537. (The Statesman, Calcutta)

A. INDO-CHINA. — U.S. Military and Economic Aid to Associated States. - Training of South Vietnamese Army by U.S. Military Mission. - General Collins appointed U.S. Special Representative in South Vietnam.

Following discussions in Washington between the French and U.S. Governments on the question of military and economic aid for the Associated States, the following agreement was concluded on Sept. 29, 1954:

(1) Forces of the French Expeditionary Corps would remain in Indo-China, "in agreement with the Governments concerned, within the limits permitted under the Geneva Agreements and to an extent to be determined."

(2) The United States would consider "the question of financial assistance for the Expeditionary Corps in these circumstances, in addition to support for the forces of each of the three Associated States"

(3) "The channel for French and U.S. economic aid, budgetary support, and other assistance to each of the Associated States" would be direct to that State, instead of through France as hitherto.

The French delegation to the talks was led by M. Guy La Chambre (then Minister for the Associated States) and General Ely (the French Commissioner-General in Indo-China), and the U.S. delegation by Mr. Bedell Smith (Under-Secretary of State.)

Military Aid to South Vietnam.

President Eisenhower officially informed M. Ngo Dinh-Diem, the South Vietnamese Premier, on Oct. 24, 1954, that in future U.S. aid would be supplied directly to his Government, but emphasized that the U.S. Government "expects this aid will be met by a performance on the part of the Government of Vietnam in undertaking needed reforms." The U.S Ambassador, the President's letter continued, had therefore been instructed to examine with M. Ngo Dinh-Diem how the U.S. aid programme could assist South Vietnam, "provided your Government is prepared to give assurances as to standards of the performance it would maintain in the event such aid is supplied;" it was hoped that "such aid, joined to your sustained efforts, will contribute to the building of an independent Vietnam, headed by a strong Government." Official sources in Washington stated on the same day that the main purpose of the President's letter was to make clear U.S. support for M. Ngo Dinh-Diem against his political opponents in the South Vietnamese Army and the various para-military organizations.

In a report to the U S Senate Foreign Relations Committee on a visit which he had made to Indo-China in September, Senator Mansfield (Democrat) recommended on Oct 14, 1954, that if M. Ngo Dinh-Diem's Government were overthrown "the U.S.A. should consider an immediate suspension of all aid to Vietnam and the French Union forces there, except that of a humanitarian nature, preliminary to a complete reappraisal of our present policies in free Vietnam." Describing the Government's opponents as "petty power groups" and "ill-disguised gangsters," he stated that any Government succeeding that of M. Ngo Dinh-Diem would "probably take the form of a military dictatorship," and would be no more popular than the Governments which had preceded the present Cabinet. In these circumstances continued U S aid would be "unwarranted and inexcusable," since U S. investments worth hundreds of millions of dollars would eventually have to be handed over to the Vietminh, as had already happened in North Vietnam. The U.S.A., the report continued, must share the responsibility for the reverse in Indo-China, which had been caused by "a consistent under-estimating of both the political and military strength of the Vietminh," and by "the distorted emphasis given to the capacity of military measures alone to bring about an end to the Communist advance" When he [Senator Mansfield] had previously visited Indo-China in 1953, the military manpower of the French Union forces had exceeded that of the Vietminh by five to three, and their equipment by 10 to one, however, two vital conditions had been required for victory, namely, "a rapid and clear-cut transfer of sovereignty from France to the three States," and "a capacity among the non-Communist Indo-Chinese (particularly of Vietnam) to put aside factional strife and excessive self-seeking," neither of which had been fulfilled in time.

General J Lawton Collins, the former U.S. Army Chief of Staff, was appointed President Eisenhower's special representative in South Vietnam on Nov. 3, with the task of co-ordinating the operations of all U.S. agencies in the country.

At a Press conference on Nov. 17 General Collins announced that the United States was discussing with French and South Vietnamese representatives a plan whereby a U S. military mission, under General Ely's supervision, would assume the main responsibility for training the South Vietnamese Army; the French instructors hitherto employed, he stated, would not be replaced immediately, but would "have to work closely with American instructors" As 90 per cent of the equipment to be used in the training programme would be American, the system to be adopted would be similar to that employed in training the South Korean, Greek, and Turkish armies, which had proved "very effective" "American aid goes to the Government, that is, the regular Government of Premier Ngo Dinh-Diem," he added. "Our aid would not be given to any army but the one faithful to its Government."

During the ensuing negotiations the U.S. representatives proposed that the South Vietnamese Army should be reduced from its existing strength of 217,000 men to a force of about 90,000 regulars, which. they believed, was the maximum that could be supported financially by the Government; that it should be intended primarily for security purposes; and that in the event of a renewal of war the SEATO Powers should help to defend South Vietnam. The South Vietnamese Government, on the other hand, contended that large-scale demobilization would counteract its programme of economic development, and that a small regular army, which would contain a large proportion of the politically unreliable Caodaist and Hoa-Hao forces, might be unable to cope with internal disorders. At the suggestion of M. Ho Thong-Minh (the Defence Minister), a compromise was ultimately reached on Jan. 20 whereby the Army would be reduced to 100,000 regulars by the end of 1955, and a mobile reserve of 150,000 men, serving for four to six months in the year, would be created, with the aim of maintaining 140,000 men permanently under arms.

General Collins left for Washington on Jan. 21, with a letter from M. Ngo Dinh-Diem requesting the U.S. Government to assume full responsibility for the organization and training of the South Vietnamese armed forces, under the authority of General Ely and in co-operation with the French military mission. The Prime Minister said on Jan. 20 that General Ely had given his full consent, "provided that such assistance is given in accordance with existing agreements"; this statement was believed to refer to the clause of the Geneva Agreement limiting the size of the U.S. military mission to the number of members present in South Vietnam on July 21, 1954.

Following General Collins's return from Washington on Feb. 9 with President Eisenhower's approval of the plan, Lieut.-General O'Daniel, head of the U.S. military mission, assumed charge of the organization and training of the South Vietnamese Army on Feb. 12; General Gazounod, who was in charge of the French military aid programme, became General Collins's deputy.

According to U S. sources the training mission, to be known as the Military Support Mission, would consist of 342 U.S. officers and 1,000 to 1,400 French officers and n c.o s A total of $200,000,000 was reported to have been allocated by the U S.A as military aid to South Vietnam.

Military Aid to Cambodia.

President Eisenhower officially informed King Norodom Sihanouk of Cambodia of the agreement of Sept. 29 in a letter of Oct. 2, and stated that the U.S.A. would be pleased to consider ways of co-operating with Cambodia against both military threats from without and possible internal subversion.

The U.S Foreign Operations Administration in Washington confirmed on Jan 5 that a provisional agreement had been concluded for the construction of a modern port on the Gulf of Siam, and that a credit of $50,000 had been granted to the Cambodian Government towards the cost of the necessary hydrographic and other surveys preliminary to the choosing of the site.

Military Aid to Laos.

The Laotian Prime Minister, M. Katay Sasorith, denied on March 2 reports that he had discussed the conclusion of a treaty for military and economic aid with Mr. Dulles, the U.S. Secretary of State, during the latter's visit to Vientiane on Feb. 27; what had been discussed, he stated, was the conclusion of an agreement which would allow Laos to plan its budget ahead, as U.S. aid had hitherto been granted on a monthly basis. Since January, he added, this aid had totalled over $3,000,000. all of which had been used for military purposes.

Economic and Technical Aid.

The Foreign Operations Administration announced on March 9 that it had approved a $100,000,000 programme of economic and technical aid to the Associated States for the fiscal year ending June 30, 1955, of which $45,000,000 would be used for the evacuation and resettlement of refugees from North Vietnam, and $55,000,000 for strengthening the economies of the three countries.—(New York Times - New York Herald Tribune - Le Monde, Paris) **(Prev. rep. 13741 A.)**

B. PANAMA. — Conviction of Ex-President Guizado.

Señor José Ramón Guizado, who succeeded to the Presidency of Panama on the assassination of President Remón, was found guilty of complicity in the assassination on March 29 by the National Assembly sitting as a special court. He was given the maximum sentence of 10 years' imprisonment, but this was immediately reduced to six years eight months because it was Señor Guizado's first offence. The Assembly also formally relieved him of the rank of President, thereby confirming President Espinosa in office until Oct. 1, 1956.

A. YUGOSLAVIA. — Continuation of British, French, and U.S. Aid. - Yugoslav Discussions in Washington and London. - U.S. Supply of Surplus Farm Commodities. - British Agreement to Extension of Yugoslav Repayment of Earlier British Credits. - M. Vukmanovich's Statements on Yugoslavia's Economic Position, Foreign Indebtedness, and Western Economic Aid.

A Yugoslav delegation headed by M. Vukmanovich (a vice-president of the Yugoslav Federal Executive Council) visited the United States from Nov. 10-17, 1954, for discussions with the U.S. authorities on economic relations between the two countries, including U.S. economic assistance and the possibility of an extension of Yugoslavia's repayment of earlier debts. During his stay in Washington M. Vukmanovich saw President Eisenhower, Mr. Dulles (the Secretary of State), Mr. Harold Stassen (Director of Foreign Operations), and other high U.S. officials. He also had discussions with Mr. Eugene Black, the President of the International Bank.

Before leaving the U S.A , M. Vukmanovich told the Press that, " as in difficult times in the past," they had found " help and understanding " on the part of the U S. Government Agreement had been reached to send U S wheat to Yugoslavia to meet the present gram shortage ; the U.S. Government had also agreed in principle to Yugoslavia deferring the repayment of her debts , and it was expected that in this and other respects " practical results " would be reached in the course of further discussions. M. Vukmanovich explained that the fundamental causes of Yugoslavia's present difficulties were the need for importing wheat because of the droughts , the accumulation of debts incurred during the economic blockade by the Soviet bloc ; debts incurred during the earlier droughts of 1950 and 1952 ; and heavy expenditure caused by the importation of military equipment. Yugoslavia, he added, was still not in a position to reduce her defence expenditure, which represented 22.3 per cent of her national income, compared with 11 6 per cent in France and 10 per cent in Britain , about 30 per cent of all Yugoslav imports were concerned with national defence requirements

For some years, M. Vukmanovich pointed out, Yugoslavia would have to find U S $50,000,000 annually for debt redemption under the present arrangements, but given the present defence expenditure and her economic potential she could only pay U S. $20,000,000 a year. In view of this it was necessary first to reach agreement with her creditors for the conversion of the medium-term debts into long-term ones, and secondly to negotiate a loan for the payment of her short-term debts In his talks with Mr. Black it had been agreed that the third quota of the loan already granted by the International Bank should be devoted to the development of Yugoslav agriculture, and that a mission from the Bank should visit Yugoslavia early in 1955 to examine the financing of a programme of agricultural development.

An agreement for the sale of U.S. surplus farm commodities to Yugoslavia was signed in Belgrade on Jan 5, 1955. The State Department in Washington announced on Jan. 8 that under the agreement Yugoslavia would receive 425,000 metric tons of wheat worth $28,100,000 and 50,000 bales of cotton worth $10,000,000, plus another $3,000,000 for transportation costs. It had also been agreed that the dinar counterpart funds paid by Yugoslavia to the U.S.A. for the wheat would be placed at the disposal of the Yugoslav Government for the financing of mutually agreed projects in Yugoslavia.

After their discussions with the U.S. Government the Yugoslav delegation went to London, where they had talks with officials of the British Treasury, Foreign Office, and Board of Trade on Nov. 25-26, 1954 M. Vukmanovich also saw Mr. Thorneycroft, the President of the Board of Trade.

In a press statement on Nov 26 M Vukmanovich said that the talks had dealt with a Yugoslav request for an extension of the medium-term loans from Britain into long-term ones , that the delegation had explained Yugoslavia's plans about the further development of her economy, with a view to finding a basis for broader economic co-operation between the two countries in the future ; and that they had also discussed the way in which British aid had been used and would be used in future, it being intended to use current aid for the construction of slaughterhouses, refrigeration plants, and other industrial developments

Following further talks in Belgrade it was officially announced in London on Dec. 24 that agreement had been reached on the revision of the repayment arrangements for the British credits, amounting to £17,000,000, which had been made available to Yugoslavia between 1949 and 1951.

These credits were due to be repaid between 1954-58 in annual instalments varying between £3,000,000 and £4,000,000. In order to assist Yugoslavia in her balance of payments difficulties, " occasioned partly by adverse climatic factors and partly by the coincidence of heavy debt repayments in the current year and the next few years," Britain agreed to extend the period of repayment to 1962, with the amounts due in the early years " very substantially " reduced and the rate of interest lowered.

M. Vukmanovich made a statement on British, U.S., and French aid to Yugoslavia during a discussion of the Yugoslav national development plan for 1955 in the Yugoslav National Assembly on Dec. 28.

Yugoslavia's foreign debts, M Vukmanovich said, totalled U.S $400,000,000, and whilst this amount did not exceed the country's economic capacity, difficulties had occurred over the dates of repayment in view of the fact that most of them were of medium- or short-term duration and that together they absorbed every year one-quarter of the total proceeds of her exports An extension of the repayment dates was therefore essential to help Yugoslavia to pay the debts without serious disturbance, and it was necessary to hold a conference of creditors He added, however . " We want no moratorium nor anything that will materially damage our creditors What we seek is the transformation of the debts into long-term debts, paying interest for the extended period "

Continuing, M Vukmanovich pointed out that U S , British, and French economic assistance to Yugoslavia between 1950 and 1954 had totalled U S $428,600,000, covering over half of Yugoslavia's payments deficit during these years On the other hand, however, Yugoslavia had been compelled to import substantial quantities of foodstuffs to overcome the consequences of the droughts , these imports had amounted to U.S $350,000,000 and had therefore actually absorbed over three-quarters of the financial aid received from the Western Powers Referring to his talks in Washington, he said that as a result of his visit the U S Government had granted 850,000 tons of wheat, and had promised further help if this turned out to be insufficient to tide Yugoslavia over until the next harvest. He had also found full understanding regarding the debt settlement and stockpiling, and had accepted the U S offer for the supply of $10,000,000 worth of cotton to be paid for by Yugoslav exports when the situation permitted

Britain, he went on, which would this year contribute £2,000,000 in aid, had for some years past been one of Yugoslavia's most important trade customers British economic assistance would be used for the purchase of equipment for the development of agriculture and the food industry, thereby accelerating not only Yugoslavia's agricultural development but also exports to Britain After referring to the new debt agreement with the U.K , he said that although it did not solve the debt problem in a long-term spirit it represented " concrete assistance and help for Yugoslavia "

The diplomatic representatives of Britain, France, and the U.S.A. informed the Yugoslav Government on Feb. 7 that the three Western Powers intended to continue to give economic assistance to Yugoslavia during the current year.—(Tanjug Agency, Belgrade - Times - Board of Trade Journal - Le Monde, Paris - New York Times - New York Herald Tribune)

B. UNITED KINGDOM. — Appointment of Select Committee on Nationalized Industries. - Membership and Terms of Reference.

A Government motion to set up a Select Committee on the nationalized industries was approved by the House of Commons on March 16. The setting up of such a committee had been recommended by another Select Committee, appointed in November 1952 under the chairmanship of Mr. Ralph Assheton (Con.), to consider the methods by which Parliament was informed of the administration of the five major industries nationalized since the war. The report of that committee had been issued on Aug. 12, 1953, and had been debated in the House in February 1954 ; in July of that year the Government had given an undertaking that a Select Committee on the lines recommended by the Assheton Committee would be set up.

However, in appointing the new committee, the Government did not accept all the recommendations of the Assheton committee. In particular, it rejected the suggestion that the new committee should be a permanent body, saying that for the time being it would be appointed on a sessional basis and that its work would be regarded as experimental. The Government also rejected the recommendation that the staff of the Select Committee should include an officer of the status of the Comptroller and Auditor General.

The terms of reference provided that the Select Committee should " examine the reports and accounts of the nationalized industries established by statute, whose controlling boards are wholly appointed by Ministers of the Crown and whose annual receipts are not wholly or mainly derived from moneys provided by Parliament or advanced by the Exchequer " The Select Committee should also " obtain further information as to so much of the current policy and practices of those industries as are not matters which (*a*) have been decided by or clearly engage the responsibility of any Ministers ; (*b*) concern wages and conditions of employment and other questions normally decided by collective bargaining arrangements , (*c*) fail to be considered through formal machinery established by the relevant statutes , or (*d*) are matters of day-to-day administration."

The 13 members proposed by the Government as members of the Select Committee were Lord Hinchingbrooke, Sir Ian Horobin, Miss Florence Horsbrugh, Mr. James Hutchison, Mr. Ramsden, and Sir Patrick Spens (Conservatives) ; Mr. Renton (National Liberal and Conservative) ; Mr. Albu, Mr. Ernest Davies, Mr. Noel-Baker, Mr. Palmer, and Mr. George Strauss (Labour) ; and Mr. Wade (Liberal). Sir Patrick Spens was subsequently elected chairman of the committee, which also decided that its meetings should be held in private.

(Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM. — Civil Estimates, 1955-56.

The Civil Estimates for the financial year 1955-56 were published on Feb 17, together with the Estimates for the Revenue Departments and the Ministry of Defence (civil expenditure). They showed an estimated total expenditure of £2,791,828,745, an increase of £35,856,509 over the total net Estimates (adjusted for transfers) for 1954-55.

The sums required for the various classes of expenditure, with the total net Estimates for 1954-55 given for comparison, were as follows :

	Total Civil Estimates 1955-56 £	1954-55† £
Central Government Services	21,344,422	21,278,158
Foreign and Colonial Offices, etc. .	97,319,150	111,495,183
Home Department, Law and Justice	81,741,105	86,415,390
Education and Broadcasting	372,360,034	344,806,431
Health, Housing, and Local Government	638,730,786	620,534,060
Board of Trade, Ministries of Labour and of Supply .	226,351,689	292,818,830
Ministry of Works, Public Buildings, Stationery and Printing, Ministry of Information .	65,302,385	69,269,776
Ministries of Agriculture, Food, etc.	385,624,914	334,090,996
Ministries of Transport & Civil Aviation and of Fuel & Power, Dept. of Scientific & Industrial Research	136,751,190	138,990,562
Ministry of Pensions and National Insurance, etc.	437,253,570	420,603,500
Total Civil Estimates .	2,462,779,245	2,440,302,886
Revenue Departments .		
Customs and Excise .	13,701,900	13,107,000
Inland Revenue ..	35,349,000	33,997,850
Post Office .	261,695,000	244,660,000
Total for Revenue Departments	310,745,900	291,764,850
Ministry of Defence* .	18,303,600	23,904,500
Grand Total .. .	2,791,828,745	2,755,972,236

* See also Defence Estimates † Adjusted for transfers.

Particulars of the more important items included in the Civil Estimates are given below, with comparative figures for 1954-55 (revised) in parentheses :

National Health Service. £463,370,255 (£439,215,485), of which £411,086,215 was for England and Wales and £52,284,040 for Scotland

Ministry of Food. £286,732,265 (£238,361,800), of which £264,139,265 was on the normal Vote and £22,593,000 for Strategic Reserves, the corresponding figures for 1954-55 being £227,827,800 and £10,534,000

Ministry of Education. England and Wales £271,286,636 (£254,545,078) and Scotland £38,221,090 (£35,708,037).

Housing. England and Wales £60,139,020 (£65,794,460), Scotland £12,845,500 (£14,569,500).

Ministry of Supply. £181,488,100 (£209,500,000)

Ministry of Agriculture and Fisheries (including Scotland). £85,299,407 (£83,971,901) Of the total, £48,174,730 was for farming grants and subsidies, £9,717,850 for agricultural services, and £6,544,665 for fishery grants and services.

Other Estimates included £206,338,000 for National Insurance and Family Allowances ; £124,709,000 for the National Assistance Board ; £89,326,000 for War Pensions ; £29,456,683 for Colonial Services ; £18,000,000 for Colonial Development and Welfare ; £32,253,300 for grants to Universities and Colleges ; £28,145,000 for Broadcasting ; £45,844,500 for Roads ; £26,253,000 for Public Buildings ; and £50,577,400 for Atomic Energy.—(1955-56 Votes on Account)

(Prev. rep. Budget, 14145 A ; 1954-55 Estimates, 13606 D.)

B. PETROLEUM. — New Iraqi Oil Agreement.

A new agreement between the Iraqi Government and the Iraq Petroleum Company and its associated companies was concluded in Baghdad on March 24. It retained the 50-50 profit sharing arrangement included in the 1951 agreement, but amended the formulae for calculating prices, the net result being an increase in the Iraqi Government's royalties by about 7s. a ton. The agreement also provided for Iraq's revenue from oil in 1954 to be increased from £57,000,000 to £67,500,000.

Dr. Pachachi, the Iraqi Minister of Economics, who signed the agreement on behalf of his Government, estimated that Iraq's oil revenue in 1955 would be £72,000,000, and that by 1958 revenue would exceed £100,000,000 a year, whilst oil exports might reach an annual total of 45,000,000 - 50,000,000 tons ; production in 1954, he said, had been nearly 30,000,000 tons.—(Financial Times) **(Prev. rep. 1951 Agreement, 12031 A ; I.P.C., 14139 C.)**

C. RHODESIA AND NYASALAND FEDERATION. — Expulsion of Mr. Van Eeden from Federal Party. - The Van Eeden Partition Plan. - New Assembly Member for African Interests.

The central executive of the Federal Party at Salisbury decided on Jan. 7 by an overwhelming majority to expel from the party Mr. G. C. Van Eeden, the member for Kafue in the Federal Parliament. Mr. Van Eeden, formerly one of the principal supporters of federation, had publicly advocated the partition of the Federation by the return of Barotseland, North-Eastern Rhodesia, and Nyasaland to the executive control of the Colonial Office, and the amalgamation of Southern Rhodesia and the south central part of Northern Rhodesia (including the copperbelt area) with a view to obtaining full self-government for this part of the Federation.

Mr. Van Eeden had rejected a suggestion put forward by several delegates, including Sir Godfrey Huggins, the Federal Prime Minister, that he should desist from campaigning publicly for support for his proposals and should submit them instead to the next meeting of the Federal Party's congress in 1956 He explained that he did not think that the protected Africans of Nyasaland and Barotseland would ever agree to Dominion status—the ultimate aim of the Federal Party—except on the basis of 50-50 representation in the Dominion Government, they would, however, support any scheme to divide the Federation and put them back under the full control of the British Government " If this is what they want," Mr. Van Eeden declared, " why should they not have it, particularly as it would give the Europeans the Dominion status they want ? " He considered, therefore, that negotiations with the British Government on his proposals should begin as soon as the Federal Constitution permitted a review

Sir Godfrey Huggins, opposing Mr Van Eeden's plan, said that his statements had had " a profound effect " and had created " a deep feeling of uncertainty ", if he [Sir Godfrey] had made them, the Federation would not have been able to raise the loans required in the next four years. He described the proposals themselves as " completely impracticable," since their effect, if carried out, would be to deprive those who had lent money to the Federation of part of their security Strong opposition to Mr Van Eeden's scheme was also expressed by Sir Roy Welensky, the Northern Rhodesian leader and Minister of Transport and Development, who declared that if the Federal Party were to entertain the proposals he would have to consider resigning from it

Mr. Van Eeden announced on Jan. 9 that he would form a new party with a policy based on his proposals, and meanwhile would sit in the House as an Independent. In a further statement on April 13 he said that he would resign his seat later in the year and contest a by-election in the name of the new party.

It had been announced on Dec. 24, 1954, that the Governor of Northern Rhodesia had appointed Mr. J. S. Moffat, a well-known authority on African affairs and customs, to succeed Dr. J. F. C. Haslam as representative of the interests of Northern Rhodesian Africans in the Federal Assembly.
(Federal Information Department, Salisbury - Times)

(Prev. rep. Federal Territories, 13250 C.)

D DENMARK - UNITED KINGDOM. — New Agreement on Faroe Islands Fishery Limits.

Mr. Harold Macmillan, the British Foreign Secretary, announced in a parliamentary written reply on April 25 that negotiations had been completed for a revision of the Anglo-Danish Fishery Convention of 1901 to provide for slight adjustments of the fishery limits around the Faroe Islands. He explained that the Danish Government had proposed an extension of the limits beyond three miles, but that during the negotiations this proposal had been modified to provide that the limit should remain at three miles from the coastline, with adjustments to preserve spawning grounds. The Danish Government had given an assurance that the new limits would be applied to the fishing vessels of all countries. The agreement, which would be firm for at least 12 years, would come into force on July 1.—(Times)

(Prev. rep. Iceland Dispute, 12760 A.)

E NEW ZEALAND. — Commonwealth Development Finance Company to invest in Murupara Scheme.

The Commonwealth Development Finance Company in London announced on April 1 that it had agreed to invest £3,000,000 in the Tasman Pulp and Paper Company, and would subscribe for £2,500,000 5¼ per cent 15-year debentures and 500,000 £1 Ordinary shares, in each case at par.

Production of newsprint, pulp, and timber at the new town under construction at Kawerau was expected to begin later in 1955.—(N.Z. Directorate of Information Services, Wellington)

(Prev. rep. 13341 C.)

A. SOUTH AFRICA. — Report of Inquiry Commission on Racial Segregation in Universities.

The Commission of Inquiry appointed by the South African Government in 1953 to investigate the practicability and financial implications of providing separate university training facilities for non-Europeans published its report on Feb. 2.

Present Position. The report stated that at present non-Europeans were not admitted to the Universities of Stellenbosch, Pretoria, the Orange Free State, and Potchefstroom, and at Rhodes were admitted only to certain post-graduate courses They were admitted to the Universities of Cape Town, Witwatersrand, and Natal, but at Natal they did not attend lectures with European students, whilst at Cape Town Africans were not admitted as medical students. In 1954 there were 1,182 non-Europeans at the universities, of whom 516 were Africans, 441 Asiatics, and 225 Coloured , 370 of these were at Fort Hare Native college, 327 at the University of Natal, and 214 at Witwatersrand In addition, 1,145 non-Europeans were registered at the "correspondence course" University of South Africa.

South African universities, the report pointed out, had the right to decide whom they would admit, provided this power was not restricted by their governing Acts, except that no university might exclude a student because of his religious beliefs. Although under these Acts university councils might prescribe that lectures for Europeans and non-Europeans should be given separately or together, there was a difference of opinion about the legal position, counsel's opinion, obtained by Cape Town and Witwatersrand, was that neither university could refuse admission to non-Europeans under the existing Acts The State, however, could attempt to impose *apartheid* on a university by indirect means through administrative action of the Treasury, and could enforce segregation or impose an absolute ban on the admission of non-Europeans by parliamentary enactment

Objections to Segregation. General objections put forward against segregation had related to the autonomy of the universities, academic freedom, and extra-curricular university activities As regards autonomy, the commission pointed out, however, that no organization established by the State might prescribe to the State what course of action it should take to fulfil its tasks. On the other hand, it said, the question was not whether the State had the power to impose restrictions on the universities' autonomy, but whether such restrictions were justifiable. Members of a university, the report said, should have the right to think freely, to seek the truth without restraint, and to express their findings freely, even if these were wrong, and whatever trammelled academic freedom hampered the universities in the execution of their task. Restrictions should therefore be introduced only with the utmost circumspection and in the most serious circumstances If, however, students who were denied entrance to certain universities retained substantially equal opportunities to study at other universities there would be no clashing with the fundamental concept of academic freedom.

As a further objection to segregation, the importance of extra-curricular contacts as a vital part of university education had been emphasized. At Cape Town and Witwatersrand there was segregation in the university residences and in sport, but not in the membership of student societies, although non-Europeans were not admitted to university dances It had been argued that contact enabled European and non-European students to understand each other better, and that segregation would provide a favourable breeding-ground for the development of racial antagonism.

Proposals submitted. The management of the *Kolege ya Bana Ba Afrika* (College for the Children of Africa), founded by the Dutch Reformed Church, the report pointed out, had proposed the establishment of a Bantu university in the Transvaal, and the Pretoria Municipality had promised the institution a site, but this had been withdrawn because "the College is a European company and may not have interests in a Bantu residential area" The attention of the Legislature, the Commission stated, should be drawn to the fact that the law placed obstacles in the way of Europeans who wanted to help the Bantu people.

The University of South Africa had suggested that the *Kolege ya Bana Ba Afrika* should be developed into a university institution, to be associated with the University of South Africa. The University of Pretoria had suggested (*a*) the development of a separate university for Africans in the north, allocated to the Sotho-Bantu group, Afrikaans in orientation, and under the guardianship of the University of Pretoria; (*b*) the establishment of an institution for Coloured students under the guardianship of the University of Stellenbosch, (*c*) the assignment of Fort Hare to the Nguni Bantu group, under the guardianship of Rhodes University, and (*d*) the allocation of the non-European section of the University of Natal to Indians.

The South African Bureau for Racial Affairs had proposed that separate institutions should be set up for particular groups of non-Europeans in the area where they lived. The Secretary for Native Affairs, Dr. W. W. M. Eiselen, had suggested that universities for the Bantu should be located in the Native Reserves, that identical university training should not be recommended; that medical training should also take place in Native Areas, and that all African institutions should be under the University of South Africa

Cape Town University was in principle definitely opposed to academic segregation based on racial differences.

Conclusions. The Commission found that because of the distribution of the limited number of non-European students at Cape Town and Witwatersrand Universities among the various departments, the creation of separate internal training facilities for them was not feasible for the present, although considerable capital costs for separate accommodation could be avoided if segregation were restricted to separate attendance at lectures, but with the use of the same lecture rooms at different times by Europeans and non-Europeans. On the other hand, the establishment of two separate institutions in the Western Cape and the Transvaal to take over the work now being done by Cape Town and Witwatersrand Universities would also be impracticable in the present circumstances

The main financial objection to the establishment *de novo* of a single large university for non-Europeans was that it would not make use of either of the existing institutions at the University of Natal (where the State had already spent £406,000 to erect a non-European faculty building for medicine) and at Fort Hare As these, however, could not absorb even the majority of the non-European students now at Cape Town and Witwatersrand, considerable capital costs would have to be incurred to accommodate them, estimated at £1,000 a student by the University of Natal, and at a higher figure by Fort Hare As there were about 340 non-European students, apart from medical students at Cape Town and Witwatersrand, the total sum required would be considerable.

The desirability of segregation being assumed, the Commission found that the most feasible scheme was the concentration of non-European students at the University of Natal and Fort Hare. It pointed out, however, that if non-Europeans were no longer to be allowed to study at Cape Town or Witwatersrand, substantial financial assistance to cover travelling costs would have to be granted, unless the State was content to make university study financially impossible for many non-Europeans who could at present enjoy it. Training facilities should in principle be created only in the directions in which prospects of careers with reasonable incomes existed for non-Europeans, but if non-European students were not to be deprived of post-graduate study it would often be necessary to admit them to other universities for that purpose

As regards Coloured students, the Commission pointed out that if those living in or near Cape Town were forced to go to Durban or Fore Hare for their studies they would incur additional costs, and in many cases would lose the part-time earnings which helped them to pay their way. It recommended therefore that they should be allowed to continue their non-separate studies at Cape Town University.

In conclusion, the report stressed that because non-Europeans were less able to contribute financially towards the cost of university facilities, the State would have to subsidize separate institutions for non-Europeans on a much more liberal scale than the mainly European universities, and suggested that in consequence there was a danger that the State subsidy for the latter might be seriously prejudiced

Mr. Strauss, Leader of the Opposition, stated on March 5 that the United Party supported the Inquiry Commission's main recommendations, and whilst recognizing that separate social facilities were necessary under South African conditions, believed that "knowledge should be sought irrespective of colour."—(State Information Department, Pretoria - Cape Times - Die Burger, Cape Town) **(Prev. rep. 13359 B.)**

B. MALTA. — Customs and Taxation Privileges for NATO Staff. - Maltese Protests.

The Governor of Malta, Sir Robert Laycock, issued on March 2 the Headquarters, Allied Forces, Mediterranean (Privileges) Ordinance, under which NATO staff stationed in Malta were exempted from certain Customs duties and taxes. When a draft of the ordinance was published on Oct. 26, 1954, objections were raised because the decision had been taken without consultation with the Maltese Government, and on Nov. 5 the former Legislative Assembly adopted a resolution denouncing the ordinance.

In a press notice issued on March 2 the Governor stated that he had been guided primarily by the advice of two successive Commanders-in-Chief that the privileges granted by the ordinance were essential defence requirements, which could no longer be postponed if Allied Headquarters was to work at full efficiency The question of consultation with the Government did not arise, as the question of privileges was a reserved matter, and there would be full opportunity to discuss the issue at the forthcoming all-party talks with the Colonial Secretary in London.

Dr. Borg Olivier, then Prime Minister, stated on March 2 that a protest had been sent to the Governor, and Mr. Mintoff, Dr. Olivier's successor as Prime Minister, told the new Assembly on March 24 that his Government had likewise protested against the ordinance, and had asked the British Government to enact legislation reimbursing Malta for the loss involved. For the present the two Governments had "agreed to disagree" over the ordinance, which would be discussed at the London talks. (Times - Daily Telegraph) **(Prev. rep. 14120 B.)**

C. POLAND. — Cabinet Change.

It was announced in Warsaw on April 17 that M. Franciszek Jozwiak-Witold had been relieved of his post as Minister of State Control and had been appointed a Deputy Premier, whilst M. Ramon Zambrowski had been appointed his successor at the Ministry of State Control. Both M. Jozwiak-Witold and M. Zambrowski are members of the politburo of the Polish United Workers' (Communist) Party.—(Le Monde, Paris) **(Prev. rep. 14064 C.)**

A. ITALY - YUGOSLAVIA. — Legations raised to Embassy Level. - Economic, Financial, Trade, and Traffic Agreements.

It was announced in Rome and Belgrade on Nov. 6, 1954, that the Italian and Yugoslav Governments had agreed to raise their respective diplomatic missions from Legation to Embassy level. The statement declared that this step had been taken "within the framework of the measures undertaken to create closer and better mutual relations and to establish the broadest co-operation between our two countries."

Italo-Yugoslav economic and financial discussions opened in Belgrade on Dec. 14 and resulted in an agreement being signed on Dec. 18 which regulated all economic and financial obligations arising out of the Italian Peace Treaty and laid down the broad framework for a number of economic agreements between the two countries.

A joint communiqué declared that "in their desire to promote trade and economic co-operation" both Governments had agreed to base the economic relations between Italy and Yugoslavia on the following agreements. (*a*) a general convention on trade and navigation; (*b*) a one-year trade and payments agreement: (*c*) an agreement on economic co-operation, which would include technical co-operation between the industries of both countries, the development of air, railway, road and sea transport, as well as postal, telephone, and telegraph communications, and the development of tourism. Both sides would also consider the possibility of developing border-area trade, would seek a settlement over the question of Adriatic fishing, and would resume the economic discussions in Rome in the second half of January.

The negotiations were accordingly resumed on Jan. 17, and on March 31 a number of economic and financial agreements between the two countries were signed in Rome by Signor Martinelli, the Italian Minister of Foreign Trade, and M. Karabelovich, a member of the Yugoslav Federal Executive Council. The agreements were as follows:

A Convention on Trade and Navigation laying down the general principles on which trade, transport, traffic, and Customs between the two countries are to be based. The convention, valid for five years, will be extended automatically unless notice of termination is given by either side.

A Trade Agreement for one year, replacing one expiring on March 31 and covering exchanges to an aggregate value of 60,000,000,000 lire (£34 560,000). The agreement, which may be automatically extended for further periods, provided for the complete liberalization of imports and exports in respect of a large number of goods, on the basis of agreed lists showing articles of "an indicative character" subject to such treatment. Yugoslavia was thus placed by Italy on the same footing as O E E.C. member-countries, with similar advantages granted by Yugoslavia to Italy. The only exceptions were the fixing of certain Italian import quotas for Yugoslav exports of soft timber products, cellulose wood, cellulose, lead, cattle, pigs, draught-horses, beef, canned meat, fresh and canned fish, leather, glass, fireproof materials, lubricants, chrome iron, coal, and cement. Yugoslavia, on the other hand, guaranteed minimum imports of certain goods of particular importance to the Italian export industries, and undertook to extend to Italy automatically any concession made for imports from other countries

The principal Italian export categories will include yarns, textiles and made-up clothing, dyes, industrial plants, machinery and equipment, office machinery, motor vehicles, motor-cycles and tractors, bicycles, electrical equipment, railway rolling stock, optical and photographic products, ceramics, electric bulbs, medical equipment, plastic materials, rubber tyres, rice, citrus fruits, etc.

The principal Yugoslav exports will—in addition to the above-mentioned products—include timber, bauxite and aluminium, wool, silk, vegetables, poultry, eggs, hops, bristles, medicinal herbs, essential oils, glycerine, and a number of chemical and pharmaceutical products, etc.

A joint commission will be set up to supervise the implementation of the agreement, and if necessary to take measures aiming at bringing about the largest possible volume of mutual trade exchanges.

Two Agreements on Frontier Traffic, one regulating trade between Trieste and the Kapor-Buje area (i.e., Zone B of the former Free Territory of Trieste), and the other dealing with frontier trade between the Gorizia and Udine region and the Yugoslav areas of Nova Gorica, Tolmin, and Sezana The first agreement fixed the total value of trade exchanges on each side at about 2,100,000,000 lire annually, and the second at 1,000,000,000 lire annually; both agreements contained lists of goods to be exchanged, and provided for certain Customs simplifications in order to promote frontier trade.

A Payments Agreement regulating the settlement of trade transactions, as well as certain other payments, on a clearing basis, and providing for the opening by each side of an interest-free credit of 6,000,000,000 lire to finance the clearing movement. A special procedure was agreed for payments in connexion with frontier traffic.

A Protocol on Air Traffic, valid for two years and replacing the provisional air transport agreement of 1950, which will form the basis for further detailed arrangements. It provided for the operation of a regular service between Milan, Venice, Zagreb, and Belgrade, and of a seasonal line between Rome, Dubrovnik, and Belgrade.

An Agreement on Road Traffic, valid for one year and regulating vehicular traffic between the two countries.

Agreement on Communications and Tourism. Notes were also exchanged embodying certain agreements reached regarding Italo-Yugoslav co-operation in providing railway facilities and in promoting tourism between the two countries.

All agreements were subject to ratification, but the two Governments decided to put the trade agreements, the payments agreement, and the agreements regarding frontier traffic into immediate effect. An additional protocol referred to negotiations for the conclusion of an agreement on economic, technical, and financial co-operation, and also mentioned the intention of both Governments to conclude an agreement on fisheries in the Adriatic within three months.

At the signing ceremony both Signor Martinelli and M. Karabelovich stressed the importance of the conclusion of these comprehensive economic agreements as a landmark in the development of a new relationship of friendly co-operation between Italy and Yugoslavia, and as a basis for the further widening of their economic exchanges.—(Corriere della Sera, Milan - Giornale d'Italia, Rome - Tanjug Agency, Belgrade - Yugoslav Economic Information Bulletin, Zagreb)

(Prev. rep. Trieste Agreement, 13821 A.)

B. UNITED KINGDOM. — Equal Pay for Women in the Non-industrial Civil Service and for Women Teachers.

In accordance with a suggestion put forward by Mr. Butler, the Chancellor of the Exchequer, on May 19, 1954, a negotiating committee of the Civil Service National Whitley Council drew up a scheme for the gradual introduction of equal pay for women in the non-industrial Civil Service and presented it to the Chancellor for his approval. On Jan. 25, 1955, Mr. Butler announced in the House of Commons that the Government had accepted the scheme and that, subject to final agreement by the staff side of the National Whitley Council which had to consult the various staff associations, the scheme would be put into operation with retrospective effect from Jan. 1, 1955. The staff side eventually endorsed the scheme on Feb. 18.

Announcing the Government's decision, Mr Butler said that under the scheme women's scales would be increased by seven equal annual instalments so that, on the payment of the seventh instalment, women's scales would become identical with men's scales. "For certain special grades, such as typists," he added, "a compromise is proposed, by which the new scales eventually to be applied to both sexes would be higher than the present women's scales, but somewhat lower than the scales at present in force for the relatively small number of men serving in these grades" There were certain other grades in which women had different conditions of service from men, and their treatment would be reserved for further consideration. "These proposals apply to the non-industrial Civil Service only," said Mr. Butler "For the industrial Civil Service the Government consider it essential to follow the fair wage principle, and to continue as at present to pay their women employees in accordance with the general practice in the trade concerned."

It was stated by the Treasury on the same date that, of the 210,000 women in the non-industrial Civil Service, 155,000 would be affected by the agreement, most of them being in the clerical, sub-clerical, executive, and typing grades. About 36,000 women—mostly Post Office telephonists and telegraphists—were in the grades reserved for further consideration. The other women excluded were 17,500 who did not do equal work, and 1,500 in grades composed only of women. It was estimated that in the first full year the cost to the Exchequer would be about £1,840,000, and by Jan. 1, 1961—when equal pay was in full operation—£12,850,000 a year. New entrants to the Civil Service would benefit from the increases according to the stage reached at the time of their entry, and Civil Service pensions (which are calculated on the pay received in the last three years of service) would become equal when a woman had served three years on full equal pay.

The Burnham Main Committee (for teachers' salaries in primary and secondary schools), the Burnham Technical Committee (covering technical, commercial, and art colleges), and the Farm Institutes' Salaries Committee agreed on March 4 to recommend that a scheme of equal pay for women, similar to that adopted by the Government for the Civil Service, should be applied to teachers from May 1, 1955, so that full equality of pay could operate from April 1, 1961, onwards. Sir David Eccles, the Minister of Education, stated in a written parliamentary reply on April 7 that he had approved the recommendations. A similar decision was taken by the Committee on salary scales for inspectors, organizers, and advisory officers of Local Education Authorities, whose decision did not require approval by the Ministry of Education. It was estimated that about 150,000 teachers would be affected and that the final annual cost to the education authorities would be about £17,000,000.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Mr. Butler on Equal Pay, 13557 A, p. 13560); Teachers' Salaries, 13589 A.)

A. UNITED KINGDOM. — Redistribution of Constituencies. - Reports of Parliamentary Boundary Commissions.

The reports of the Parliamentary Boundary Commissions for England, Wales, Scotland, and Northern Ireland, recommending changes in many constituencies (principally in England), were published on Nov. 19, 1954, and were laid before Parliament by the Home Secretary and the Secretary of State for Scotland. The detailed recommendations of the Boundary Commissions were then embodied in 52 draft Orders in Council which, after prolonged debates in the House of Commons, were finally approved on Jan. 27, 1955.

The Boundary Commission for England recommended the creation of 11 new constituencies, the abolition of six existing constituencies, extensive alterations in the boundaries of 152 constituencies, and minor adjustments in the boundaries of 30 others; no changes were made in the remaining 324 English constituencies. The Boundary Commission for Scotland recommended major alterations in the boundaries of 19 constituencies (mostly in Glasgow, where two old constituencies disappeared and two new ones were created), minor adjustments in eight others, and no changes in the remaining 44 Scottish constituencies. The Boundary Commission for Wales recommended minor changes in the boundaries of six Welsh constituencies and no changes in the 30 others. No alterations of any kind were proposed for the 12 Northern Irish constituencies.

The principal changes brought about by the recommendations of the Boundary Commissions were as follows:

(1) An increase in the membership of the House of Commons from 625 to 630, caused by an increase in the number of English constituencies from 506 to 511. (As stated above, 11 new constituencies were created in England and six former constituencies abolished—a net gain of five constituencies. The number of constituencies in Scotland, Wales, and Northern Ireland remained unchanged at 71, 36, and 12 respectively.)

(2) The creation of the following 11 new constituencies: Chigwell (Essex); South-East Essex; Feltham (Middlesex); Surbiton (Surrey); Erith and Crayford (Kent); Rye (East Sussex); Eastleigh (Hampshire); East Hertfordshire; Nantwich (Cheshire); Meriden (Warwickshire), and an additional constituency at Walsall, where the existing parliamentary borough was divided into two constituencies, Walsall North and Walsall South.

(3) The abolition of six constituencies, brought about as follows:

(i) The fusion of the constituencies of Blackburn North and Blackburn South into a single constituency, Blackburn.

(ii) The abolition of the borough constituency of Droylsden (Lancashire)

(iii) The abolition of the Neepsend division of Sheffield, thereby reducing that city's representation from seven to six members.

(iv) The abolition of two of the Leeds constituencies—Leeds Central and Leeds North—and the creation of the new division of Leeds East, the net effect being to reduce the representation of Leeds, like that of Sheffield, from seven members to six.

(v) The fusion of the constituencies of Reading North and Reading South into a single constituency, Reading.

(vi) The fusion of the London boroughs of Fulham and Hammersmith (which formerly returned a total of four members) to form three constituencies: Fulham (formed by merging the former separate constituencies of Fulham East and Fulham West); North Hammersmith (the existing constituency of the same name, but with altered boundaries); and Barons Court (a new constituency, replacing the former constituency of South Hammersmith).

The following Members of Parliament were affected by the abolition of the above-mentioned constituencies, their majorities at the general election of 1951 being shown in parentheses Mr Ralph Assheton (C.), Blackburn North (2,699), Mrs. Barbara Castle (Lab.), Blackburn South (2,632), Mr. W. R. Williams (Lab), Droylsden (1,870), Sir Frank Soskice (Lab.), Neepsend, Sheffield (18,225), Mr Osbert Peake (C)—Minister of National Insurance—Leeds North (13,041); Mr. George Porter (Lab.), Leeds Central (9,492); Mr. F M Bennett (C), Reading North (302), Mr Ian Mikardo (Lab.), Reading South (1,009), Mr. Michael Stewart (Lab.), Fulham East (2,473); Dr. Edith Summerskill (Lab.)—chairman of the Labour Party—Fulham West (2,583); Mr. W. T. Williams (Lab), Hammersmith South (3,235).

(4) Twelve of Glasgow's 15 constituencies were affected by boundary changes, owing to large movements of population in recent years from the congested central districts to areas of new housing development. The principal changes involved were (*a*) the abolition of the Camlachie division, part of which was transferred to the Bridgton division and the remainder formed into a new constituency named Provan; (*b*) the formation of the new constituency of Craigton, south of the Clyde; (*c*) the abolition of the Tradeston division, which was divided between the Gorbals and Govan constituencies. Outside Glasgow, the only important change in Scotland was the creation of the new constituency of Roxburgh, Selkirk, and Peebles, formed by detaching Peebles-shire from the former constituency of Midlothian and Peebles and attaching it to the constituency of Roxburgh and Selkirk.

The two Scottish M.P.s affected by the abolition of Glasgow constituencies were Mr. W. Reid (Lab), Camlachie, who had a majority of 1,025 over his Conservative opponent in 1951, and Mr J. Rankin (Lab.) Tradeston, whose majority was 11,195 in 1951.

The Boundary Commission for England aimed, so far as it was possible to do so, at an average electorate of about 57,000 for each constituency (an average of 57,122 was obtained by dividing the total English electorate, 28,904,108, by the number of seats in England, 506). The Commission published figures showing that 410 constituencies in England (over 80 per cent of the whole) had electorates of less than 65,000, whilst no English constituency had an electorate of fewer than 40,000. The eight largest English constituencies had electorates of 75,000-80,000. The average number of electors per constituency was much lower in Scotland and Wales than in England, the Scottish average figure being 48,011 and the Welsh, 50,364.

Under legislation passed in 1949—the House of Commons (Redistribution of Seats) Act—the Boundary Commissions were required to keep constituencies under constant review, to recommend such adjustments in boundaries as might be necessary in view of population movements, and to make general reviews at intervals of not less than three nor more than seven years after the date of the passing of the Representation of the People Act of 1948 (see 9837 A). The recommendations described above constituted the first such general review

The provisions of the 1949 Act required the Boundary Commissions to ensure, as far as practicable, (*a*) that constituency boundaries should coincide with local government areas, and (*b*) that "the electorate of any constituency shall be as near the electoral quota as possible" For the latter purpose an "electoral quota" of 55,570 was fixed as the average for Great Britain (57,122 for England, 50,364 for Wales, 48 011 for Scotland). The uneven distribution of population, however, made it difficult, if not impossible, for the Commissions to achieve the twin aims of equalizing electorates without disturbing local unities (e.g in sparsely populated rural areas the constituencies, if to be of manageable size, must necessarily have smaller electorates than in heavily populated urban areas). Other important factors militating against an exact mathematical equality of electorates were (*a*) the limitation on the number of constituencies laid down in the 1949 Act (which stipulates that the number of constituencies in Great Britain should not be substantially greater or fewer than 613, of which Scotland must have not fewer than 71 and Wales not fewer than 35 seats, and that Northern Ireland should have 12 seats) and (*b*) the greater density of population in England as compared with that in Scotland and Wales. (With an average electorate of 57,122 for England, 50,364 for Wales, and 48,011 for Scotland, England is under-represented in the House of Commons as compared with Scotland and Wales, in Northern Ireland, where different conditions apply because that country has its own Parliament, representation at Westminster is based on bigger constituencies and electorates than in Great Britain)

The English Boundary Commission stated in its report "Considerable comment has been made in the Press and elsewhere to the effect that the general review of constituencies now concluded, and the changes recommended as a result of that review, have come too soon after the very considerable changes brought about by the Representation of the People Act, 1948 It was clear from representations submitted to us that the changes recommended, even where they included proposals for additional representation, were not wholly welcome because of the disturbance they would inevitably cause to local political organizations, and also because of the feeling of unsettlement they would cause both to the electorate and to their representatives in Parliament The provisions of the Act of 1949 have left us no alternative but to proceed with the review and to make such recommendations as we considered necessary and desirable Nevertheless we have been impressed by the arguments put forward against reviews at comparatively short intervals, and we think that consideration should be given to lengthening the minimum and maximum period between reviews."

The Speaker of the House of Commons (Mr W S. Morrison) is *ex officio* chairman of all four Boundary Commissions The other members of the English Boundary Commission are Mr Erskine Simes, Q.C (appointed by the Home Secretary), Dr George North, the Registrar-General; Major-General J. C T. Willis, Director-General of the Ordnance Survey; and Sir John Maude, formerly Permanent Secretary of the Ministry of Health. The deputy chairmen of the Scottish, Welsh, and Northern Irish Boundary Commissions are respectively Lord Mackintosh, Sir Wynn Wheldon, and Mr A. T. Green

A Government motion "taking note" of the reports of the Boundary Commissions was moved in the House of Commons on Dec. 15, 1954, by the Home Secretary, Major Lloyd-George, and was adopted by 285 votes to 259.

Major Lloyd-George recalled that the last redistribution of seats, carried out under the Representation of the People Act of 1948, had been based on changes in the electorate since 1946, and had resulted in the creation of 17 new borough constituencies, in addition to other changes recommended by the Boundary Commissions at the time and accepted by Parliament. There had been further substantial changes in the electorate between 1946 and 1953—e.g., the electorate of Essex had risen by 70,000 and that of Lancashire had fallen by 72,000 However, the real basis for most of the present recommendations was not the changes in the electorate, but because the Commissions had had to review the entire country on the new basis caused by the creation of 17 additional borough constituencies in 1948. After recapitulating the proposed changes, Major Lloyd-George pointed out that the English Commission had striven to produce a better balance between urban and rural representation; to remove undue disparities in the electorate, and, with the aim of securing electorates based as nearly as possible on the national average of 57,000, to avoid creating constituencies of less than 40,000 or more than 80,000. The Home Secretary said that the Government believed the Commission's recommendations to be well founded, and added "It is of the highest importance to the health of our Parliamentary institutions that this matter should be kept above party politics. If successive Governments and Parliaments of different complexions were to disregard the findings of this impartial Commission, confidence in the justice of our electoral system, the essential foundation of democratic Government, would be undermined." He added that the changes, if approved by Parliament, would not take effect until the next general election, whilst the Orders affecting London would come into force for the L.C.C. elections in March, 1955.

Mr. Chuter Ede (Lab.)—Home Secretary at the time when the Representation of the People Act was passed in 1948—said that none of the Opposition's criticisms of the English Commission's report implied any challenge to the impartiality with which the Commissioners had carried out their duties as they had interpreted them. He maintained, however, that the Commission had wrongly taken upon itself the onus of deciding what the right proportion should be between borough and county constituencies—a task which, said Mr. Ede, properly appertained to Parliament and not to the Boundary Commissions. Moreover, the discretion to form constituencies consisting of part of a county borough and part of a county had been used too freely in an effort to secure a mathematical accuracy that no-one expected in these matters. For these reasons the Opposition felt that the duties laid on the Commissioners had not been adequately discharged, and would vote against the motion

In accordance with a decision of the Parliamentary Labour Party, the Opposition voted against 14 of the 52 draft Orders in Council (13 relating to constituency changes in England, and one to Scotland) when they were debated by the House of Commons in the ensuing weeks. In the case of several of the constituencies affected, both the Conservative and Labour members concerned united in opposing the changes; e.g., the two members for Reading—Mr. Bennett (C.) and Mr. Mikardo (Lab.)—both opposed the Order abolishing their constituencies and creating a single Reading constituency, whilst the two members for Blackburn—Mr. Assheton (C.) and Mrs. Castle (Lab.)—acted as tellers against the Government on a division which sought, unsuccessfully, to revoke the Order creating a single Blackburn constituency and abolishing the two former constituencies into which the borough had been divided.
(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Redistribution of Constituencies, 1948 Act, 9837 A.)**

A. SOVIET UNION. — New Arctic Ice Floe Station.

It was announced in Moscow on April 3 that a Soviet scientific expedition, led by M. N. A. Volkov, of the Soviet Arctic Research Institute, had left Leningrad that day to set up "Station North Pole 5" on an Arctic ice floe.

A recent article in *Pravda*, quoted by the *New York Times*, indicated that "North Pole 5" would replace "North Pole 3," which would probably be abandoned soon as the floe on which it was based was drifting towards the pack ice off northern Greenland and Ellesmere Island after having drifted some 1,200 miles since it was established 12 months earlier. The article also referred to "North Pole 4," which had drifted about 1,500 miles in a clockwise direction in 12 months (though only some 300 miles in a straight line), and to "North Pole 2," which had drifted on a somewhat similar route in 1950-51, but whose work had been kept secret at the time.

According to *Pravda*, the Soviet scientists were engaged in exploration and the collection of important meteorological, oceanographic, biological, and other data.
(Le Monde, Paris - New York Times)

B. EGYPT. — Diplomatic Appointments.

Important diplomatic appointments were announced in Cairo on April 21 as follows: Samy Abdul Fetouh (Under-Secretary in the Foreign Ministry) as Ambassador in London in succession to Abdul Rahman Hakki (retiring); Kamal Abdel Naby (director of the economic department of the Foreign Ministry) as Ambassador in Paris; and Mohamed Awad el Kouny (director of the political affairs department of the Ministry) as Ambassador in Moscow.—(Times) **(12676 D.)**

C. YEMEN. — Suppression of Military Revolt.

An unsuccessful attempt to depose the Imam (King) of Yemen, Seif el Islam Ahmad (61), was made on April 2 by a section of the Army, led by his younger brother and Foreign Minister, Seif el Islam Abdullah. After a clash with the Imam's bodyguard near Taez, about 600 soldiers marched on that town and besieged the Imam for several days in his palace. In reply to demands that he should abdicate in his brother's favour, the Imam offered to surrender his executive power, but not his position as Imam, and succeeded in winning over a number of the rebels. Fighting broke out later, however, and the people of Taez rallied to the support of the Imam, whose person is regarded as sacred under Moslem law.

Meanwhile, the Imam's eldest son Emir Seif el Islam Mohammed el Badr, had escaped to Hajja, in northern Yemen, where he rallied a force of 30,000 loyal troops and tribesmen. With these he marched on Taez, occupied the town on April 5, routed the rebels, and restored the Imam to the throne. Seif Abdullah, together with another brother (Seif el Islam Abbas) and a nephew of the Imam who had supported the revolt, was arrested on April 7 while attempting to flee the country; Abdullah and Abbas were subsequently tried for treason, sentenced to death, and executed on April 13, their bodies being publicly exposed before burial. Six other men were also reported to have been executed for their participation in the revolt, including Lieut.-Colonel Ahmed Thalayee, chief army instructor and the actual leader of the revolt, and Kadi el-Sayyali, a Moslem religious judge and leader of the *ulema* at Taez.

The Imam announced on April 7 that order had been completely restored, and that he had pardoned "all misguided soldiers" who had taken part in the rising. In recognition of Emir el Badr's services, and in order to end rivalry within the royal family over the succession, the Imam officially proclaimed him heir to the throne on April 10.

On the news of the revolt, an Egyptian mission led by Lieut.-Colonel Shafei (Minister of Social Affairs), as well as officials from Saudi Arabia, had flown to Taez on April 3 in an attempt to reconcile the two sides. Before the Egyptian mission returned to Cairo on April 10, the Imam was reported to have given an assurance that he would abandon his traditional policy of isolating the Yemen from the outside world, and would open his country in complete co-operation with Egypt and Saudi Arabia.—(Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune)

D. WESTERN GERMANY. — Opening of Lufthansa Services.

It was announced in Bonn on March 3 that the Allied High Commission had given permission to the German Lufthansa airline to begin regular passenger flights on internal German routes on April 1, on European services on May 15, and on trans-Atlantic services on June 1, and also to import four *Super-Constellation* aircraft which it had ordered from the U.S.A. for its trans-Atlantic flights. "Proving" flights inside Germany were sanctioned from March 1, between Western Germany and other European countries from April 15, and across the Atlantic from May 1.

Earlier, on Jan 12, it had been announced that the four U.S.-built *Convair* aircraft which would be used for the German internal and European routes would be captained by 10 British pilots seconded by B.E.A.C. for one year, with German co-pilots, until the German crews were fully trained On March 31 the Lufthansa announced that it had engaged 11 U.S. pilots under an agreement with Trans World Airlines to captain its trans-Atlantic services during the first year of their operation.

The first German airliner on a passenger-carrying flight since the war flew from Dusseldorf to Hamburg on March 21 on a "proving" run with a number of journalists, and the first regular service was inaugurated on April 1 on the line Hamburg-Dusseldorf-Wahn-Frankfurt-Munich. The last flight previously made by a plane of the old Lufthansa had taken place on April 21, 1945. The first German airliner since the war arrived in London on April 15, the opening day of a new service from Hamburg to London run in co-operation with B.E.A.—(Frankfurter Allgemeine Zeitung - Times - Daily Telegraph - New York Times) **(Prev. rep. 13877 E.)**

E. CANADA. — Liquidation of Soviet Debt for Mutual Aid.

The Canadian Finance Secretary, Mr. Kenneth Taylor, announced in his annual report to the House of Commons on Jan. 17 that the Soviet debt to Canada arising out of Canadian mutual aid given after Sept. 2, 1945, had been liquidated with a final payment of Can. $2,807,064 in 1954. (Montreal Star)

A. INTERNATIONAL BANK. — New Loans and Bond Issues. - Loan Repayments by Iraq and Netherlands. - Draft Charter of International Finance Corporation. - Economic Development Institute.

The following loans were made in recent months by the International Bank for Reconstruction and Development (dates of announcement in parentheses) :

Australia. $54,500,000 to the Australian Federal Government to finance imports of equipment for the development of agriculture, transport (including five aircraft for Qantas Empire Airways Ltd.), electric power generation and transmission, and the iron and steel, food processing, mining, and engineering industries. The Bank arranged to sell $10,400,000 of this loan, without its guarantee, to 11 private banks in the U.S.A. Terms : 3⅝ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 15 years beginning on March 15, 1958 (March 18, 1955).

British East Africa. $24,000,000 to the East Africa High Commission to help finance a modernization and development programme for railways, harbours, and road transport facilities in Kenya, Uganda, and Tanganyika. The loan, which was guaranteed by the U.K. Government and the three territories concerned, will be used by the East African Railways and Harbours Administration to build deep-water berths and other port facilities, to acquire lighters and tugs, to expand railway workshops, to improve the permanent way, and to buy new locomotives and road transport vehicles. Terms : 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 20 years starting on Jan. 15, 1958 (March 15, 1955).

Colombia. $4,500,000 to the *Central Hidroelectrica del Rio Anchicaya Limitada* (CHIDRAL), a publicly-owned corporation, for the purchase of equipment to increase power supplies to Cali, one of the principal industrial centres. The loan, which was guaranteed by the Colombian Government, was the ninth to be made by the Bank to Colombia and brought the total lent to that country to $78,800,000. Terms : 3¾ per cent p a. interest, plus 1 per cent p.a. commission, repayable within 20 years (March 25, 1955).

Finland. $12,000,000, mainly in European currencies, to the Bank of Finland, which will re-lend the money to companies engaged in expanding and modernizing the Finnish wood products industry (Finland's most valuable export industry) and in developing the supply of electric power. The loan was guaranteed by the Finnish Government. Two U.S. commercial banks—the Bank of America and the National City Bank of New York—participated in it without the International Bank's guarantee, to the extent of $1,144,000 each. Terms : 3⅝ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 15 years beginning on April 15, 1958 (March 25, 1955).

India. The agreement with the Indian Government for a loan of $10,000,000 to the Industrial Credit and Investment Corporation of India (see 13974 A) was signed on March 14.

Norway. A loan of $25,000,000 to Norway, to be used to buy capital equipment for Norwegian economic development, was announced on April 19. In addition, a further $15,000,000 was provided by the flotation of Norwegian bonds in the U.S market, making a total loan of $40,000,000.

The International Bank loan, half of which was expected to be made in pounds sterling and Dutch guilders, was for 20 years at 3¾ per cent interest p.a., plus 1 per cent p.a. commission. Of the total, $5,000,000 will be amortized on a half-yearly basis from November, 1960 to May, 1962, and the remaining $20,000,000 from November, 1965, i.e., shortly after the 10-year bonds of the public issue have reached final maturity

The bond issue, which was offered by an underwriting group of 30 investment firms and banks in the U.S.A., was divided by maturities as follows . $2,500,000 of 3-year 3⅝ per cent bonds; $2,500,000 of 4-year 3¾ per cent ; $2,500,000 of 5-year 3⅞ per cent; and $7,500,000 10-year Sinking Fund 4¼ per cent, due April 15, 1965.

Peru. $18,000,000 to the Peruvian Government to help finance the second stage of the Quiroz-Piura irrigation project, by which 125,000 acres of land will be brought into cultivation for the first time for the production of food crops and pasture for local consumption, and of long staple cotton for export. The Manufacturers Trust Company and the New York Trust Company participated in the loan, without the Bank's guarantee, to the extent of $496,000. Terms : 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 25 years beginning on Sept. 15, 1959 (April 5, 1955).

$2,500,000 to the *Compania Nacional de Cemento Portland del Norte, S.A.*, a private company, to help finance the construction of a cement plant at Pacasmayo in Northern Peru. The loan was guaranteed by the Peruvian Government; the Manufacturers Trust Company participated in the loan, without the International Bank's guarantee, to the extent of $310,000. Terms : 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 15 years starting on May 1, 1958 (April 20, 1955).

Loan repayments were as follows :

Iraq. The Iraqi Government announced on Jan. 3 that it had cancelled the unused balance ($6,500,000) of the 15-year loan of $12,800,000 made by the International Bank on June 15, 1950 (see 11593 A), while on March 25 the Bank announced that the Iraqi Government had repaid, more than 10 years in advance, the outstanding balance of $6,300,000. It was stated that Iraq's financial position had so improved since the time the loan was made that the Government was assuming the entire cost of the flood control system for which the loan had been intended.

Netherlands. The Netherlands Government informed the Bank on Jan. 20 that it would shortly redeem a further $50,472,000 and 12,017,500 Belgian francs of the outstanding balance of the $195,000,000 reconstruction loan received in 1947 ; the outstanding portion of the loan would thus be reduced to $85,517,000.

It was announced on March 21 that a syndicate of Canadian investment dealers and banks, headed by Wood, Gundy, and Co. Ltd., Dominion Securities Corp. Ltd., and A. E. Ames and Co. Ltd., were offering, on behalf of the International Bank, a new issue of Can. $15,000,000 3¼ per cent 10-year Canadian Dollar Bonds at 99 per cent; the bonds would mature on April 1, 1965, but the Bank would have the option of redeeming the bonds before maturity at premiums ranging up to 2 per cent. This was the Bank's third public issue of bonds in Canada.

The Charter of the proposed International Finance Corporation was sent to prospective member-Governments on April 15 for their consideration and legislative or other action if they decided to join Its main provisions are summarized below :

Purposes. The Corporation would encourage the growth of productive private enterprises, particularly in the less developed areas of the world, by investing in undertakings itself where sufficient private capital was not available on reasonable terms, by seeking to recruit private capital and to find experienced management, and by generally creating conditions which would stimulate the flow of investment.

Membership. The Corporation would be open to all members of the International Bank.

Capital. The authorized capital would be $100,000,000, paid in gold or U S. dollars and subscribed by members in amounts proportionate to their subscriptions to the capital of the International Bank The U.S.A. would be the largest subscriber, with $35,168,000, and the U K. the next largest, with $14,400,000.

Establishment. The Corporation would come into being when at least 30 Governments had subscribed at least $75,000,000 of its capital

Affiliation with the Bank. The Corporation would be affiliated with the International Bank in the following ways :

(*a*) membership in the Bank would be a prerequisite of membership in the Corporation ;

(*b*) each Governor of the Bank representing a Government which joined the Corporation would become a member of the Board of Governors of the new Corporation ;

(*c*) the Corporation's Board of Directors would be composed of those Executive Directors of the Bank who represented at least one Government which joined the Corporation.

(*d*) the President of the International Bank, who is chairman of the Bank's Executive Directors, would also be chairman of the Corporation's Board of Directors.

The Corporation would, however, be a separate entity ; its assets would be kept entirely separate from those of the Bank , and it would be prohibited from borrowing from the Bank.

Management. The Corporation would have its own President, who would be appointed by its Board of Directors on the nomination of the chairman and, subject to the policy direction of the Board and the chairman, would be responsible for the conduct of the Corporation's business. The Corporation, whose principal office would be in Washington, would be able to make use of the experience and personnel of the Bank, for whose services it would pay.

Method of Operation. The Corporation would make its investments without governmental guarantee. It would be authorized to make both fixed-interest loans and investments of other kinds, but would not be authorized to invest in capital stock or to assume responsibility for managing the enterprises in which it invested. Investments might be made in any kind of productive enterprise but the main emphasis was likely to be in the industrial sphere. In addition to its financing operations, the Corporation would serve as a clearing house to bring together investment opportunities, private capital, and experienced management

Sale of Securities. The Corporation would seek to revolve its funds by selling its investments to private investors whenever it could appropriately do so on satisfactory terms. It would be authorized to raise additional funds by selling its own obligations in the market, but it was not expected to do so in its early years.

Status of Investment Enterprises. Enterprises in which the Corporation invested would not, by reason of that investment, have any special status under domestic laws and regulations.

Transfer of Earnings. Although the Corporation would have substantially the same privileges and immunities as the International Bank. its Charter would not exempt it from applicable foreign exchange regulations on the transfer of earnings and on repayments of capital on its investments ; in this respect, therefore, it would be in the same position as private investors generally.

On March 11 the International Bank announced the setting-up of an Economic Development Institute, which would serve as a staff college where senior government officials from the Bank's member-countries could study the formulation and administration of development programmes. The cost of running the Institute during the two-year period beginning July 1, 1955, would be borne half by the Bank itself and half by the Rockefeller Foundation and Ford Foundation, each of whom had made available $85,000. The Director of the Institute would be Professor A. K. Cairncross, who had been granted leave of absence from his post as Director of the Department of Social and Economic Research at the University of Glasgow. (International Bank, Washington - Times - Financial Times)

APRIL 30—MAY 7, 1955

A. WESTERN GERMANY. — Parliamentary Ratification of Paris and Saar Agreements. - Social Democratic Opposition. - The Paulskirche Manifesto. - Free Democratic Opposition to Saar Agreement.

Western Germany completed the ratification of the Paris agreements providing for her entry into the Western European Union and NATO, and also the Franco-German agreement on the Saar, on March 24, when President Heuss signed the Bills authorizing ratification. The debates in the *Bundestag*, however, were marked by bitter hostility on the part of the Social Democrats, who argued that German ratification of the agreements and her rearmament at the present juncture would prejudice the prospects of her reunification, and who also attacked the Saar agreement as unconstitutional. There was equally strong opposition to the Saar agreement on the part of the Free Democrats, the majority of whom voted against it, leading to an internal dispute in that party and endangering Dr. Adenauer's coalition Government.

In all there were four Bills, covering (1) the convention for the ending of the occupation regime and the restoration of German sovereignty; (2) the convention for the future stationing of foreign armed forces on Federal territory; (3) the agreements on the Federal Republic's entry into the Western European Union and NATO; and (4) the Franco-German agreement on the Saar.

The Federal Government had approved the Bills on Nov. 19, 1954, but whereas the first three were endorsed by all Cabinet members, that covering the Saar agreement received only 15 votes, the four Ministers belonging to the Free Democrats (Dr. Blucher, the Vice-Chancellor; Dr. Neumayer, the Minister of Justice; Dr. Preusker, the Minister of Housing; and Dr. Herman Schäfer, Minister without Portfolio), as well as Herr Jakob Kaiser, the Christian Democratic Minister for All-German Affairs, voting against it. The two Ministers representing the All-German Bloc (the Refugee Party), Professor Oberlander and Herr Waldemar Kraft, voted with the majority, but expressed certain reservations.

A statement issued after the Cabinet meeting, with the approval of all Ministers, said that the Cabinet had proceeded with the Bill on the Saar agreement on the assumption that the other Powers represented on the Council of Ministers of the Western European Union would be "ready to accept the executive orders and regulations which the Federal Government considers necessary for the application of the agreement in practice."

In the preamble to the ratification Bills the Federal Government maintained that the Saar territory continued to belong legally to Germany as it had been within the German frontiers on Dec. 31, 1937, though it would be given a "temporary European status" under the present agreement. The latter, however, "only establishes certain principles, and therefore requires completion and detailed directives on the practical implementation of these principles."

First Reading in Bundestag.

The first reading of the Bills in the *Bundestag* took place on Dec. 15-16, 1954. An attempt by Dr. Adenauer on Dec. 13 to persuade Herr Ollenhauer, the Social Democratic leader, that it would be in the best interests of the country to conclude a truce before the first reading failed, Herr Ollenhauer having reaffirmed in a speech to the Social Democratic executive on the previous day that the party would use every means at its disposal to upset Dr. Adenauer's policy of bringing Germany into the Western alliance.

Dr. Adenauer, speaking during the debate, pointed out the advantages which the Paris agreements would bring to the Federal Republic, and claimed that in their present form they contained substantial improvements over the Bonn conventions of 1952 by giving the Federal Republic more sovereignty and putting the stationing of Allied forces on Federal territory on a free contractual basis. The decision to admit the Federal Republic into NATO, he said, was a decisive step on the road to Germany's reintegration into the community of free nations and involved important political consequences. "All the member-States," Dr. Adenauer continued, "have adopted the declaration made by the three Western Powers in which the Federal Republic is recognized as the only German Government freely and legitimately constituted, and therefore entitled to speak for Germany as the representative of the German nation in international affairs. In this declaration the achievement of a fully free and united Germany is proclaimed to be a fundamental goal of their policy. The Federal Government acknowledges this declaration with special gratitude. The most important group of States in the free world has now identified itself with the basic aim of German policy."

The Chancellor expressed his readiness for East-West negotiations, but gave it as his opinion that there could be no hope of their success until the Paris agreements had been ratified, so placing the Federal Republic within the Western community. He added that the Soviet Union was now "trying by overt and hidden methods to prevent the West from consolidating its newly-found unity," and that "until this unity has been fully established, we must expect new and perhaps dangerous stratagems."

On the Saar agreement Dr Adenauer declared that it was essential to resolve the Saar question, which, "like a mountain barrier, has blocked good Franco-German relations." He maintained that the agreement guaranteed fundamental political rights and liberties, and that this guarantee was not affected by the provision which forbade attempts to change the regime until the conclusion of a peace treaty. The proposed Saar statute, he declared, rested on a European foundation, in that it was linked with Western European Union and contained guarantees by the other European Powers, however, it did not create "a European territory in the sense of the Naters plan" and provided no new territorial attachment for the Saar, reserving this question instead to the peace treaty.

Continuing, he said that the Saar agreement still required to be completed and supplemented in many respects, and pointed out that his interpretation differed from that contained in the *exposé des motifs* of the French Government which accompanied the ratification Bill laid before the French Parliament. The French Government's interpretation, he contended, "in some important points not only departs from the text of the agreement, but also does not correspond to the general intentions and objectives of the two parties." In order to clarify "these obvious differences of opinion" quickly and effectively he thought it appropriate to get in touch with M. Mendès-France, but should this contact fail to produce an agreement he would propose to the French Prime Minister that they "request the American and British Governments to clarify the differences of opinion in joint discussions with the French and Federal Governments so that these differences will not block the implementation of the agreement." He added that "in these conversations it would also be expedient to discuss the functions of the Saar Commissioner, the arrangements for the referendum, the necessary arbitration procedure, and the safeguarding of the fundamental political rights of the Saar population."

Herr Ollenhauer accused the Chancellor of having put rearmament before reunification, and declared that the Social Democrats would accept no share of responsibility for the risk that once the treaties were ratified negotiations for reunification would become impossible. As regards the Saar agreement, Herr Ollenhauer said that the Social Democrats fully understood that any solution of the Saar question was bound to be a compromise, but asserted that the present arrangement was "not even that" and was "simply the price which the Federal Republic has to pay for French agreement to German membership of NATO." A Saar settlement was necessary, he declared, to remove an obstacle to good relations, but such a settlement must be based upon equality and the present agreement did not meet this condition.

Dr. Dehler, leader of the Free Democrats, supported Dr Adenauer's stand on the question of Germany's rearmament and entry into the Western alliance, and said that while talks with the Soviet Union for the reunification of Germany were essential, when and how they should be held was a tactical question for the Government. As regards the Saar agreement, however, Dr. Dehler maintained that his party was not able to vote for it in its present form, though they hoped that their objections to it would have been met by the time the agreements came up for second reading.

During the continued debate on Dec. 16 there were heated exchanges between Dr. Adenauer and two leading Social Democratic speakers, **Dr. Mommer** and **Professor Carlo Schmid,** who questioned him about the precise course which his discussions with M. Mendès-France had taken in October and about the precise nature of the pressure which, they alleged, the French Prime Minister had brought to obtain the Chancellor's signature to the Saar agreement. In reply, **Dr. Adenauer** denied that M. Mendès-France had used any threats or that the German signature to the Saar agreement had been demanded as a condition of French signature to the other treaties. M. Mendès-France, he said, had simply intimated that he would have difficulty in getting a majority for the other treaties without the Saar agreement. He admitted, in reply to further questioning, that the French Cabinet had put pressure on M. Mendès-France, but pointed out that this did not mean there there had been any pressure from M. Mendès-France on him. **Professor Schmid** (who during the Adenauer - Mendès-France negotiations was in Paris as one of the German party representatives—see 13845 A) then asked a series of further questions about the order of events there, in an attempt to embarrass the Chancellor, who eventually broke off the exchange.

Earlier, **Professor Baade** (Social Democrat) maintained that General Gruenther had stated that the task of German forces in the Western alliance would be "to shield the Allied troops in Europe," which meant that "German forces are destined to protect not their homeland but foreign troops." **Dr. Adenauer** later said that he had urgently telephoned General Gruenther and had established that the General had said something very different, namely, that the Allied air forces urgently needed strengthening, that their land forces were not yet strong enough to act as a shield behind which reserves could be mobilized, and that this was one of the reasons why a German contribution was needed. The Chancellor also replied to Social Democratic remarks about a "conflict of conscience" over rearmament, and said: "I also have conflicts of conscience. Do you think that I myself, who cannot be suspected of militarism, did not also suffer in having to introduce these measures. But I came to the conclusion that if a German contribution to defence were not made we fifty million Germans and the eighteen million Germans on the other side of the Iron Curtain would fall into slavery. If there

were war it would take place on our soil. Our men, women, and children would be annihilated and our cities, villages, and countryside turned into a desert as in Korea."

Dr. Becker, for the Free Democrats, strongly denounced the Saar agreement; he described the proposed referendum as "a trick," the political freedoms provided for by it as "scanty," and the term 'European' as "a misuse of words." **Herr Freiboth** (Refugee Party) also objected to the Saar agreement in its present form, especially to the proposed referendum, which, he argued, gave the Saar population no more than the opportunity to say "yes or no" to a "ready-made solution," though he indicated that his party was not unanimous in its rejection of the agreement.

At the end of the debate the *Bundestag* rejected by 236 votes to 153, with three abstentions, a Social Democratic motion demanding that consideration of the Paris agreements should be deferred until immediate negotiations had taken place between the Western Powers and the Soviet Union for the reunification of Germany; it was, however, remarked in the Press that 100 members of the coalition parties did not take part in the vote.

The *Bundestag* then passed the first reading of the Paris agreements and decided, against the votes of the Social Democrats, to pass them on to the appropriate committees for further study. It also referred to the committees two Social Democratic motions, (*a*) one to request the Government to establish more clearly the political liberties in the Saar under the Franco-German agreement, and to notify the French Government that any attempt to subject political parties and the Press to any political restrictions would be regarded as contravening the statute of the Council of Europe and the European Convention on Human Rights; (*b*) the other describing the peaceful reunification of Germany as the foremost task of German policy, and demanding early four-Power negotiations with the aim of holding free elections throughout Germany. The Social Democrats had proposed that these resolutions be adopted right away, and the decision to pass them on to the *Bundestag* committees was taken against their votes, and, in the case of the resolution on the Saar agreement, also against the votes of a number of Free Democrats led by Dr. Dehler.

Herr Ollenhauer's Letter to Dr. Adenauer. - The German Manifesto. - Trade Union Appeal.

A grave warning against the immediate ratification of the Paris agreements was sent by Herr Ollenhauer to Dr. Adenauer on Jan. 24, following the Soviet declaration on Germany issued on Jan. 15 in which the Soviet Government expressed its readiness to "normalize" its relations with the German Federal Republic on condition that the Paris agreements were not ratified (see 14027 A). Herr Ollenhauer's letter was worded as follows:

"The German people stand at a decisive point in post-war history. The vote in the Federal legislature on the Paris agreements, the main point of which is the raising of German forces within the framework of West European Union and NATO, is of fateful significance for the future of the whole German people. We are convinced that the acceptance of these agreements will lead to an ominous hardening of the division of Germany. The Federal Parliament, on the other hand, has repeatedly declared unanimously that the restoration of German unity is the most urgent task of German policy. The restoration of German unity is only possible through negotiations between the four occupation Powers.

The attitude of the Soviet Union makes it clear that after the ratification it will no longer be possible to negotiate on German unity. This means that the Federal Republic and the so-called 'German Democratic Republic' will exist side by side, against the will of the German people. At the same time tension between East and West will be sharpened, and this will bear most heavily on the whole German people on this side and the other side of the Iron Curtain.

Wide sections of the German people believe that this situation makes it imperative that the Federal Republic should make every possible effort to prevent such a development, for the sake of the unity, liberty, and peace of our people . . . The German problem cannot be solved by the Government of the Federal Republic alone. Nor can it be solved by means of negotiations between the Federal Republic and Pankow [the East German Govermnent]. German unity will not come as the result of promises made either by the West alone, or the East alone It can only be brought about if the Powers in the West and in the East agree on unity in liberty, and take without delay all practical measures to put this unification into effect . .

The Social Democratic Party is convinced that all possibilities have not yet been exhausted to make a serious attempt to restore German unity in liberty through four-Power negotiations before the Paris agreements have been ratified. The declaration made by the Soviet Government on Jan. 15, 1955, contains proposals about the elections to be held in all four zones of Germany and in Berlin which makes the prospects for negotiations on this point more hopeful than during the Berlin Conference. In addition, the Soviet Union agreed in its declaration for the first time to international control of the elections. . . . Whether the Soviet Union will stand by this offer, and whether agreement can be reached with the Soviet Union on an electoral law which would be free in our sense, cannot be judged in advance, but can only be clarified in the course of negotiations. The Soviet Union must now be taken at its word. In 1952 we failed to test the seriousness of the offer made by the Soviet Union. We could not answer for it to the German people if we committed the same sin of omission today

For this reason the Social Democratic Party of Germany addresses to you, Mr Chancellor, the urgent request to take the following steps immediately ·

(1) To request the Governments of the U S.A., Great Britain, and France to negotiate with the Government of the Soviet Union on the proposals made in the declaration of the Soviet Government of Jan. 15, 1955.

(2) To couple this request to the Governments with the wish that such negotiations should be begun before the ratification of the Paris agreements

If this attempt is successful, then the 18 million Germans now waiting behind the Iron Curtain will also be able to live as men in freedom and lawfulness A great part of the worry about the freedom and peace of the world would be lifted from us, and not only from the German people

You know as well as I do that millions of our people are watching with growing uneasiness the continuation of the division of Germany The German people will never accept this division. Millions of people are filled with horror at the prospect that rearmament will deepen personal conflicts of conscience and political divisions inside the Federal Republic. I believe that it is impossible for the Federal Republic to enter on the path of rearmament at a time when such deep divisions exist amongst our people. The defence and the security of a country must be based upon a community of will of the people This can only be achieved if at this critical hour we give priority to a serious attempt to restore the unity of our nation."

Dr. Adenauer replied to Herr Ollenhauer's letter on Jan. 29. In his reply he disclosed that the pledge of the Western Allies to work for the reunification of Germany was conditional on the ratification of the Paris agreements. He warned Herr Ollenhauer that if, in spite of this conditional pledge, the West German Government were to insist on negotiations it would be met with a categorical refusal. Such a *démarche*, the Chancellor added, would probably mean the end of the Paris agreements as well as the voiding of the commitment of the Western Allies to work for the reunification of Germany.

Dr. Adenauer said that there was nothing fundamentally new in the latest proposals of the Soviet Government to negotiate the reunification of Germany, and that the Soviet Government had undertaken no commitments towards the German people such as had been undertaken by the Western Powers. He affirmed that by working in co-operation with the Western Powers "we shall convince the Soviet leaders of our peaceful and constructive intentions so that the Soviet Union will be ready to negotiate after the ratification of the Paris agreements"

On the same date (Jan. 29) a "German Manifesto" was launched by leading Social Democrats and by representatives of the trade unions, the Protestant and Roman Catholic churches, the universities, and youth organizations, at a meeting at the Paulskirche (St. Paul's Church) in Frankfurt—a place heavy with historical associations for Germans as the seat of the abortive German National Assembly of 1848. The meeting, which was attended by about 1,000 people, was addressed by, among others, Professor Alfred Weber (the eminent sociologist and historian), Herr Ollenhauer, Herr Georg Reuter (deputy chairman of the German Trade Union Federation), and Dr. Heinemann (the former Federal Minister of the Interior and a leading advocate of a "neutralist" policy).

The "German Manifesto," which was adopted by the meeting, called upon all Germans for "firm resistance to the tendencies to a final division of our nation which are showing themselves ever more strongly." It said that "the formation of German armed forces in the Federal Republic and in the Soviet zone must extinguish the chances of reunification for an indefinite period and increase the tension between East and West," and gave a warning of the "immeasurable responsibility" of those who failed to see the danger that the ratification of the Paris treaties would close the door to German unity "We appeal to the *Bundestag* and to the Federal Government," the Manifesto concluded, "to make every possible effort in order that the four occupying Powers shall heed the will of our nation for unity An understanding on a four-Power agreement for reunification must take precedence over the formation of military blocs. Conditions acceptable to Germany and to her neighbours can and must be found, to assure through the unification of Germany that the nations of Europe can live peacefully together. The German people has a right to its reunification."

The meeting was followed by an intense campaign initiated by the Social Democratic Party to collect signatures in support of the manifesto, and during February the Social Democrats claimed to have obtained a large number of signatures in many towns and cities. In reply to this campaign, however, Dr. Adenauer held a number of public meetings in Frankfurt, Hanover, Hamburg, and other cities, at which he defended the Government's policy on the Paris agreements.

A similar appeal for a postponement of the ratification, until conditions of German reunification had been clarified by four-Power negotiations, was made by the national executive and the national committee of the German Trade Union Federation on Feb. 17, but was rejected by the Federal Government on Feb. 19. The Government's statement charged the trade unions with violating their duty of party neutrality, accused them of trespassing on the rights of Parliament, and denied that the Federation spoke for its entire membership in this question.

Bundestag Committee Decisions.

The foreign affairs committee of the *Bundestag* approved the Paris agreements on West Germany's entry into NATO and the Western European Union on Feb. 17 by 20 votes to 9 (Social Democrats). On the same day it approved the Franco-German Saar agreement by 16 votes to 13 (9 Social Democrats, 3 Free Democrats, and one deputy of the Refugee Party).

In its report the committee mentioned two proposals made by the European security committee of the *Bundestag* for changes in the NATO system of command, viz, (1) that the Federal Republic should be given a seat on the standing group of the NATO (at present consisting of representatives of Britain, France, and the U S A), "in view of the peculiarity of her obligations for the defence of the West", (2) that the European commands of NATO should be rearranged so that the whole of the Federal Republic came within one command instead of being divided as at present between the Central European and the Northern European commands.

Earlier, on Jan. 26, the legal committee of the *Bundestag* had also approved all the four agreements, that on the Saar by 15 votes (Christian Democrats) to 12 (9 Socialists and three Free Democrats), with the two members of the Refugee Party and the German Party abstaining. The economic committee had approved the agreements on Feb. 9 by 21 votes to 10, and by the same majority had passed a resolution declaring that rearmament could be carried out without damage to the German economy.

Second and Third Readings in Bundestag.

The second reading debate lasted from Feb. 24 until the early hours of Feb. 27, and later on Feb. 27 (a Sunday) the *Bundestag* completed the third reading, the voting in the two debates being as follows:

	Second reading		Third reading	
(1) Protocol on ending of occupation regime ..	For	327	For	324
	Against	151	Against	151
(2) Convention on stationing of foreign forces on German territory ..	For	323	For	321
	Against	151	Against	153
	Abstentions	4		
(3) Admission of the Federal Republic to W.E.U. and NATO .	For	315	For	314
	Against	153	Against	157
	Abstentions	9	Abstentions	2
(4) Saar agreement ..	For	264	For	264
	Against	204	Against	201
	Abstentions	9	Abstentions	9

Of the deputies from Berlin (who have no substantive vote), 11 voted for the first three Bills in the second reading, and 11 against them, whilst in the third reading 10 each voted for and against As regards the Saar agreement, the Berlin deputies cast in the second reading six votes for and 14 against, with two abstentions, and in the third reading five votes for and 13 against, with two abstentions

Of the Christian Democrats (including the Christian Social Union), most deputies voted in favour of all four Bills, though on the Saar agreement Herr Jakob Kaiser, the Federal Minister for All-German Affairs, and three other deputies abstained, two voted against, and one did not take part in the division.

The Free Democrats in general voted in favour of the first three Bills, but against the Saar agreement, Dr Blucher, the Vice-Chancellor, and six other deputies voted for it, however, and Dr Preusker and Dr Schäfer abstained

The Refugee Party voted for the first three Bills, except for one vote against and two abstentions on Germany's entry into W E U and NATO, but on the Saar agreement most voted against and only 11 for, the latter included Professor Oberländer and Herr Kraft.

Of the German Party, most deputies accepted all four Bills, although one voted against the Saar agreement in the second and third readings, whilst two did not take part in the divisions

The Social Democrats voted *in toto* against all four Bills at both second and third readings

In the voting on the Saar agreement there was thus a split in the Federal Government. Of the four Ministers representing the Free Democrats, Dr. Blucher supported the agreement in both readings; Dr. Neumayer voted against it on the second reading and was absent for official reasons on the third reading; and Dr. Preusker and Dr. Schäfer both abstained on the second and third readings. As mentioned above, Herr Kaiser (Christian Democrat) also abstained in both divisions.

Together with the ratification Bills the *Bundestag* also passed, by large majorities, three declaratory resolutions.

The first resolution stated that "to safeguard and achieve by peaceful means the unity of Germany as a State and her freedom remains the foremost task of German policy", recalled the undertakings of the Western Powers to pursue Germany's reunification; welcomed the resolution of the Council of Europe describing Germany's reunification as one of the most pressing problems of European security; and expressed the hope that the four Powers would make every effort to bring about this reunification. The resolution also expressed the view that "there can be no peaceful co-existence in the world as long as artificially split countries and nations are not reunited," and demanded early four-Power negotiations with the aim of electing an all-German Parliament, adoption of an all-German Constitution, and the formation of an all-German Government under international protection. Finally, it requested the earliest possible conclusion of a peace treaty and the setting-up of a standing commission consisting of a representative of each of the three Western Powers and of the Federal Government, "to discuss and consider all opportunities which offer themselves for the peaceful reunification of Germany, and to work out proposals in order to prepare negotiations with the prospect of success"

The second resolution stated that in the view of the *Bundestag* the Saar agreement did not affect the status of the Saar as a part of Germany within her 1937 frontiers, or of its population as a part of the German nation. It urged that, as envisaged in Art VI of the Saar agreement, full freedom of expression of political opinion should be established in the Saar, together with the unhindered political activity of individuals, parties, associations, and the Press, and that the provisions of the European Convention for the Protection of Human Rights and Basic Liberties should be applied in the Saar as binding principles.

The third resolution expressed the "deep disappointment" of the *Bundestag* that the provisions of the Bonn conventions of 1952 concerning former German property abroad had been taken over unchanged in the new treaties. It voiced the "expectation" that free bilateral negotiations would soon be started with the former Allied countries on the return of German property as far as it had not been liquidated, that there would be no further liquidation of such property abroad, that pre-war German patents and copyrights would be restored, and that former diplomatic and consular property of the Reich still held by other countries would be returned.

The second reading debate, which began with the rejection of a Social Democratic motion to remove the Bills from the agenda, was again marked by bitter Social Democratic opposition to all the agreements and by heated exchanges between the Free Democrats and the Chancellor over the Saar agreement.

Dr. Mommer, the Social Democratic spokesman, called the Saar agreement "opportunist" and its provisions for freedom "illusory." He asserted that the Baden-Baden talks between Dr Adenauer and M Mendes-France (see 14000 A) had not brought about a clarification of the differences in the German and French interpretations, i e., between the German view that the agreement should form the basis for a return of the Saar to Germany, and the French view that the proposed Saar statute was irrevocable. His party would therefore only agree to ratification of the Saar agreement if the *Bundestag* accepted an amendment providing for a contractual guarantee of complete freedom of expression and political activities in the Saar both before and after the plebiscite.

In reply, **Dr. Adenauer** denied that the agreement tended to put the separation of the Saar from Germany on a permanent basis; recalled that the French, at the talks in Paris last October, had demanded German agreement to a definitive settlement in the Saar, but that he had refused this, and maintained that the conditions which had eventually been incorporated in the agreement had been approved by the representatives of the parliamentary parties whom he had asked to come to Paris for consultation, including Dr. Mommer himself (This, however, was strongly denied by the Social Democrats) Dr Adenauer went on to say that in 1947 the U.S.A. and Britain had promised France that they would support her claim to the Saar when a peace treaty came to be negotiated One thing gained by the new Saar statute, however, was that, when it entered into force, those British and U.S. declarations would be regarded as disposed of and would fall to the ground

In conclusion the Chancellor emphasized that both the German and the French delegates at the Baden-Baden talks had been in full agreement on the fact that there should be complete freedom of expression and political activities both before the plebiscite and in the subsequent elections, and that this had formed the basis for the arrangements mentioned in the official communiqué, according to which the Saar Commissioner would be entrusted with the application of Art. VI of the Saar statute and would make his decisions in the spirit of the Convention for Human Rights and Basic Liberties.

The principal spokesman of the Free Democrats, **Dr. Becker,** repudiated the accusation levelled against his party that they were splitting the Government coalition by opposing the Saar agreement, and retorted that the split was being caused by those who had deserted the original coalition policy on the Saar—Dr. Adenauer and the Christian Democrats After criticizing various provisions of the Saar statute, Dr Becker maintained that it meant a separation of the Saar from Germany, accused Dr. Adenauer of abandoning German territory and German people, and gave a warning that the Saar agreement would mean years of continuing discord between Germany and France and would poison rather than solidify Franco-German relations. Declaring that the Free Democrats recognized that the war had been lost, he concluded "We are ready to pay for that in money and goods, but not in territory and citizens"

Dr. Adenauer immediately intervened expressing his "deep regret" at Dr. Becker's "nationalistic" speech and denouncing it as "the worst possible service that could have been rendered to German interests," speeches like Dr. Becker's, he added, were precisely the thing that would make it impossible ever to consolidate friendship between the French and the Germans. The Chancellor denied that he had abandoned his earlier policy on the Saar, and deprecated a remark by Dr Becker that the Saarlanders had no right under the proposed statute to vote in the plebiscite on whether they wanted to return to Germany, join France, or remain independent. That, Dr. Adenauer declared, had been done deliberately because it was most important to leave any territorial settlement to the peace treaty; otherwise the Russians might take advantage of this and say that if Germany now agreed to a final settlement concerning the Saar such a permanent settlement should also apply to the territories in the East taken over by Poland and the Soviet Union. He [the Chancellor] regretted the position that had arisen in the Saar at least as much as any other deputy, but nobody could deal with it merely by saying "if it is not done in my way I will not continue to play" The German desire was to see both M. Grandval [the French Ambassador] and Herr Hoffmann [the Saar Premier] removed from power, but it was necessary in this respect to trust the Saarlanders, who were Germans, to make use of their freedom, and mere nationalist speeches would produce no settlement

Professor Carlo Schmid (Social Democrat) interrupted the Chancellor to ask whether his earlier statement—that the U.S.A. and Britain were prepared to give up their support for the French claim on the Saar at the peace treaty negotiations—rested on firm assurances, or whether it was merely a deduction of the Chancellor's own **Dr. Adenauer** replied that it was an intimation he had received from a competent quarter; he had no documents setting it out, nor, when an intimation came from such a quarter, did he deem it proper to ask for it in writing.

Herr Erler (Social Democrat) declared that in the age of the hydrogen bomb it was no longer a question of organizing defence, but of preventing war altogether, and that it was wrong to start world disarmament by beginning to rearm the Federal Republic. He thought that the balance of power would remain unchanged, no matter whether the German military potential was being divided between the two Power blocs or whether it belonged to none of the blocs, and said that the only possible policy for a reunited Germany was to keep out of one-sided military alliances altogether. Germany's reunification was dependent on a relaxation of the present tension between the Great Powers, but it could only be achieved if a unified Germany became "neither a Soviet satellite nor an American training ground" Replying to Herr Erler, **Dr. Adenauer** declared that the Federal Government could work much more effectively for world disarmament after the Federal Republic had regained her sovereignty, and also reiterated that unless Western Germany was a member of NATO she would become a battlefield in the event of war.

During the third reading debate **Herr Ollenhauer** announced that the Opposition would refuse to co-operate with the Chancellor in his foreign policy even after the agreements were ratified. The debate also brought about a heated reply by **Dr. Dehler,** the leader of the Free Democrats, to Dr. Adenauer's intervention after Dr. Becker's speech during the second reading debate. Attacking Dr. Adenauer for his reproof of Dr. Becker, Dr. Dehler declared. "If a member is not to be allowed to express his honest convictions I will take no further part in politics. Rarely have a man and a cause been treated so unjustly as Dr. Becker in the cause of the German Saar. It almost appears that the United States insists on the view that Dr. Adenauer is the only paladin of democracy among the German people, and that when he is gone only a crowd of uncontrolled nationalists will remain This is not a basis for common work in the coalition." On the Saar agreement itself Dr Dehler reiterated that it amounted to the giving up of the Saar by Germany; that France had manoeuvred Germany into a corner; and that the proposed plebiscite was "a farce" which would never bring the Saar back to Germany.

Bundesrat Approval and Enactment.

The *Bundesrat* approved the Bill to restore German sovereignty on March 18. It also decided without a formal vote to accept the two Bills concerning the entry of Western Germany into W.E.U. and NATO, and the convention on the stationing of Allied troops on Federal territory, and rejected a proposal to hand the Bill on the Saar agreement over to the mediating committee of the two Houses of Parliament.

Herr Kaisen, President of the Bremen Senate, recommended in his capacity as *rapporteur* of the foreign affairs committee that both Bills be approved, though he mentioned "serious anxiety and doubts" felt about the Saar agreement. The case for the Opposition was put by **Dr. Zinn,** the Chief Minister of Hesse, who, proposing rejection of the Bills, expressed the view that the publication of the Yalta documents in the U.S.A. had shown that the Western Powers as well as the Soviet Union favoured the division of Germany, and declared: "We have the oppressive feeling that the aim of Yalta will now be realized." As regards the Saar agreement, he proposed handing this over to the mediating committee of the two Houses.

In the final voting, seven *Lander* (North Rhine-Westphalia, Bavaria, Baden-Wurttemberg, Schleswig-Holstein, Rhineland-Palatinate, Hamburg and Bremen) with a total of 29 votes were in favour of the Bill restoring sovereignty, against Lower Saxony and Hesse with nine.

The proposal to make over the Saar agreement to the mediating committee was opposed by five *Länder* (North Rhine-Westphalia, Baden-Wurttemberg, Schleswig-Holstein, Rhineland-Palatinate, and Hamburg) with 21 votes and supported by four (Lower Saxony, Bavaria, Hesse, and Bremen) with 17 votes, and was thus rejected.

Three declaratory resolutions similar to those approved by the *Bundestag* were also adopted.

The first one appealed for negotiations on the return of pre-war German assets abroad, whilst the second one looked forward to early four-Power negotiations on the reunification of Germany The third resolution referred to the Saar agreement in terms similar to the *Bundestag* resolution. It added, however, a demand that the people of the Saar should retain the right to support the return of the Saar to Germany at the peace treaty negotiations, and should not be subjected to further "police State methods"; that all parties in the Saar should be allowed a fair share of Press and radio facilities; and that the Saar taxpayers' money should not be used for political propaganda

Dr. Adenauer, who attended the debate of the *Bundesrat*, afterwards expressed his satisfaction over the conclusion of the parliamentary proceedings, and declared that Germany's approval of the Paris agreements had "laid the ghosts of Yalta and Potsdam."

Earlier, on March 9, the Social Democrats had announced that they would file a petition with the Federal Constitutional Court to challenge the validity of the Franco-German agreement on the Saar. Their petition was sent to the Court on March 18 immediately after the approval of the agreements by the *Bundesrat.*

President Heuss nevertheless signed the legislation ratifying all the agreements on March 24.

In view of his support for the Saar agreement, contrary to the official decision of his party to oppose it, Dr. Blucher submitted his resignation from the Government to Dr. Adenauer on Feb. 28, whilst the Free Democrat's attitude in this matter, and the bitter attacks made by Dr. Dehler on the Chancellor during the closing stages of the debate, caused a crisis within the Government coalition. However, at a meeting of the parliamentary party and the national executive of the Free Democrats on March 8-9 it was decided that the party should stay in the coalition, though Dr. Dehler's strong stand against the Saar agreement was fully approved. After talks on March 21, first with Dr. Dehler, and then with Dr. Blucher, Dr. Adenauer, who had earlier intimated that he was not prepared to drop Dr. Blucher from the Cabinet, informed him officially on April 4 that he had decided not to accept his resignation.—(Frankfurter Allgemeine Zeitung - Frankfurter Rundschau - Der Tagesspiegel, Berlin - Welt der Arbeit, Cologne) **(Prev. rep. 13861 A; 13869 A; 14126 C; 14027 A; 14000 A.)**

A. NORTH VIETNAM - INDIA - BURMA. — M. Pham Van-Dong's Visits to India and Burma.

M. Pham Van-Dong, Deputy Premier and Foreign Minister of North Vietnam, visited Delhi from April 8-11 before attending the Asian-African conference at Bandung, and had a series of talks with the Indian Prime Minister, Mr. Nehru.

A joint communiqué issued on April 10 expressed the firm resolve of the two Governments to respect and seek to implement the Geneva agreements; stated that they were agreed on the importance of free elections and the achievement of the unity of Vietnam; and reaffirmed their belief that "good neighbourly relations and respect and tolerance for one another between Vietnam, Cambodia, and Laos, in accordance with the principles of the Geneva agreements and *Panch Shila* (i.e the five principles of peaceful co-existence already subscribed to by India, Communist China, Burma, North Vietnam, and Yugoslavia) would serve to promote a political settlement in Indo-China and further the cause of peace in South-East Asia."

After leaving Delhi M. Pham Van-Dong visited Rangoon for talks with the Burmese Premier, U Nu. A communiqué issued on April 13 stated that they were agreed that more efforts should be made to promote the "five principles," and reaffirmed their support for the Geneva agreements.—(Indian High Commissioner's Office, London) **(14037 A; 13890 A.)**

B. YUGOSLAVIA. — New Members of Federal Executive Council. - New Chief of Staff of Armed Forces.

The Yugoslav National Assembly elected on April 24 three new members of the Federal Executive Council, viz., Colonel-General Peko Dapcevich (Chief of Staff), M. Milentije Popovich (chairman of the Assembly's economic committee) and M. Velimir Stojnich (Secretary of the Assembly).

On May 3 it was announced that President Tito had appointed Lieut.-General Ljubo Vuckovich, deputy Chief of Staff of the Armed Forces, to succeed Colonel-General Dapcevich as Chief of Staff.—(Tanjug Agency, Belgrade) **(12813 A; 12987 C.)**

A. UNITED STATES. — President Eisenhower's Message to Congress on Foreign Aid, 1955-56. - Proposed Asian Economic Development Fund. - Creation of International Co-operation Administration.

President Eisenhower sent to Congress on April 20 his foreign aid message for the year July 1955 - June 1956, in which he recommended allocations totalling $3,530,000,000, the bulk of which would be for Asian countries. The proposed division of the allocations was as follows :

Economic aid	$712,500,000*
Contingency fund	100,000,000
Defence support (especially Asia) ..	1,000,300,000
Military assistance	1,717,200,000†

* Comprising $200,000,000 for the establishment of a President's Fund for Asian Economic Development (see below); $175,500,000 for special programmes; $172 000,000 for technical assistance programmes; and $165,000,000 for development assistance † Including $500,000,000 to cover expected losses on present military assistance programmes.

In his message the President said that he considered the programme to be an indispensable part of a realistic and enlightened national policy. "The programme," he stated, "reflects the greatly improved conditions in Europe and provides for the critical needs of Asia. It encourages private overseas investment and private enterprise abroad, fosters an increase in co-operative effort, emphasizes loans rather than grants." Extracts from the message are given below.

Aid to Europe. No economic aid was proposed for the original Marshall Plan countries in Western Europe, the President said, as these countries were capable of meeting current defence targets without such support. In Spain and Yugoslavia, however, defence programmes could be successful only if their economic base was further strengthened, and new appropriations were needed to continue U.S. co-operation with them. The special circumstances of Berlin also required continued support.

Aid to Asia.- Proposed Economic Development Fund. The immediate threats to world security and stability were now centred in Asia, and the major part of the funds now requested would be used to meet the threat there. Now was the time, the message said, for accelerated development of the nations along "the vast arc of free Asia, which extends from the Republic of Korea and Japan to the Middle East" The major responsibility for this development must necessarily lie with the countries themselves and foreign capital and foreign aid could at best only launch or stimulate the process of creating dynamic economies. "In this light," the President declared, "the United States has the capacity, the desire, the concern to take the lead in friendly help for free Asia." It was clear that most of the nations of free Asia preferred to quicken their co-operative march towards these objectives through the Colombo Plan; the U S.A. welcomed this initiative, and as a member of the Colombo Plan would continue to work in strengthening its co-operative efforts

Announcing the proposed establishment of a President's Fund for Asian Economic Development, President Eisenhower suggested that "the maximum return" could be achieved if $200,000,000 were set aside for it, "with broad rules enacted by Congress for its use through loans and grants, and with adequate latitude to meet changing circumstances and to take advantage of constructive opportunities" "To help assure the most effective use of these funds," he added, "this appropriation should be available for use over a period of years. Wisdom and economy in their use cannot be achieved through speed. A small, firm, annual commitment may prove in many instances to be the most fruitful method"

With regard to military aid the President said that because of the continuing threat of aggression and subversion in Asia, a large part of the amounts requested under this heading was for building and maintaining the defences of America's allies there, including the "substantial costs" of maintaining and improving the defences of the Chinese Nationalist Government on Formosa, and the provision of military equipment and supplies for Korea

Middle East and Africa. The continuing tension between the Arab States and Israel handicapped all the countries in the Middle East. The U S A. should continue to work with the Governments and peoples of both sides to improve their economic status and accelerate their progress towards lasting peace between them. U.S co-operation was beginning to bring results, particularly in the development of water resources

In Africa the long-range effect of U.S. co-operation was "extremely significant" The continent and its resources, the progress of its people, and their relationship to the free world were of growing importance

Latin America. The U S technical aid programme in this area should be intensified The programmes had proved their high value in many of the republics, and no international programmes had ever had such widespread welcome and support

Co-operation with U.N. Agencies. The U S programmes were not in any manner a substitute for U.N. action in similar fields "Every instance of effective measures taken through the U N. on a human problem," the President declared, "improves the ultimate prospect of peace in the world. Therefore I strongly recommend that the U N Technical Assistance Programme .. be supported in a continuing and adequate manner The U.N Children's Fund has carried out an especially appealing and significant work. We have done our full share to make this work possible. We should continue to do so."

Surplus Agricultural Products. The President explained that, based on the past two years' experience, three-quarters of the appropriations requested would be immediately spent within the U.S A for commodities, services, machinery, and other items As far as feasible, the commodities would include food, cotton, coal, and other goods "for which our capacity or surplus supply most readily matches requirements." Some $350,000,000 of agricultural products were expected to be used in 1955-56, and this included "a significant export" of major surplus crops Shipments under the Mutual Security programme would be in addition to, but co-ordinated with, sales of surplus agricultural commodities for foreign currencies under the Agricultural Trade Development and Assistance Act.

Further details of the division of U.S. aid were given on May 3 by Senator Lyndon Johnson (Democrat), majority leader in the Senate, after a conference at the White House.

The largest allocations would be to South Korea ($460,000,000) and Vietnam ($425,000,000), in both cases almost exclusively for military assistance. Including economic aid, the figures mentioned for other Asian countries were : Nationalist China ($102,000,000), Pakistan ($92,000,000), India ($85,000,000), Siam ($45,500,000), the Philippines ($28,500,000) Indonesia ($8,000,000), Afghanistan ($2,000,000), Japan ($1,000,000). Aid to the Near East and Africa included $70,000,000 to Turkey, $45,000,000 to Persia, and $15,000,000 to Greece.

On April 16 the President had announced, in a letter to the Secretary of State, Mr. Dulles, that he intended to issue an Executive Order, effective from June 30, transferring the functions of the Foreign Operations Administration to a new semi-autonomous organization within the State Department, to be called the International Co-operation Administration. It was announced from the White House on April 30 that Mr. John Hollister, a lawyer from Cincinnatti, would be nominated by the President on July 1 as head of the I.C.A.—(New York Times - New York Herald Tribune) **(Prev. rep. 13786 B.)**

B. LITERATURE.—Book Selections, March and April.

Selected books published in Great Britain, the United States and France during March and April are given below :

Great Britain. Bacchelli, Riccardo—"Nothing New under the Sun." (The final volume of *The Mill on the Po.*) Translated from the Italian (Hutchinson, 15s)

Bowen, Elizabeth—"A World of Love." (Cape, 10s 6d.)

Brown, R. Douglas—"The Battle of Crichel Down" (Bodley Head, 12s. 6d)

"Called Up." The Personal Experiences of 16 National Servicemen told by themselves. (Allan Wingate, 10s. 6d.)

Chapman, Guy—"The Dreyfus Case : A Reassessment." (Rupert Hart-Davies, 25s)

Graves, Robert—"The Greek Myths" (Penguin Books, two volumes, 3s 6d. each)

Greave, Peter—"The Second Miracle : The True Story of a Leper." (Chatto & Windus, 12s. 6d.)

Kuhn, Herbert—"On the Track of Prehistoric Man" Translated from the German. (Hutchinson, 21s)

Macmillan, Gerald—"Honours for Sale : The Strange Case of Maundy Gregory." (Richards Press, 16s.)

Pear, T. H.—"English Social Differences." (Allen & Unwin, 18s.)

Phillips, Wendell—"Qataban and Sheba. Exploring Ancient Kingdoms on the Biblical Spice Routes of Arabia." (Victor Gollancz, 21s)

Sillitoe, Sir Percy—"Cloak without Dagger." The Memoirs of the former Director-General of M.I 5. (Cassell, 15s.)

Verney, John—"Going to the Wars." (Collins, 12s. 6d.)

United States. Bishop, Jim—"The Day Lincoln was Shot." (Harper, New York, $3.75)

Hallinan, Nancy—"Rough Winds of May." (Harper, New York, $3.95.)

C. SOVIET UNION. — New Ministries.

A new Ministry for the General Machinery Industry was set up by the Soviet Government on April 2 under M. Peter Goremykin, who was Minister of Agricultural Machinery until March 1951, when he was dismissed. A further new Ministry, that for Construction in the Coalmining Industry, was created on April 6 under M. Melnikov, former Soviet Ambassador in Rumania. Earlier, on March 30, it had been announced that M. K. M. Sokolov, chairman of the State Committee for Building, had been relieved of his post and been succeeded by M. V. A. Kucherenko, his deputy ; M. Sokolov had been head of Soviet building operations since 1949.—(Le Monde, Paris - Neue Zurcher Zeitung) **(Prev. rep. 14108 D.)**

A. UNITED KINGDOM. — Labour Party. - Withdrawal of Parliamentary Whip from Mr. Aneurin Bevan. - Subsequent Restoration.

Mr. Aneurin Bevan, a member of the former Labour Government, was deprived of his membership of the Parliamentary Labour Party on March 16 because of his recent attitude towards the party leaders and party decisions. Following assurances from Mr. Bevan regarding his future conduct, however, the National Executive Committee of the Labour Party, while expressing the opinion that the Parliamentary Party was "fully justified" in deciding to withhold the Labour whip from Mr. Bevan, decided on March 30 not to expel him from the Labour Party as a whole.

Since Mr Bevan's resignation from the Labour Government on April 22, 1951, disputes between him and the official leadership of the Parliamentary Labour Party had occurred on several occasions A number of these disputes had been caused by what were considered to be unwarranted attacks—in the Bevanite weekly *Tribune* and elsewhere—on certain Labour and trade union leaders, whilst matters of defence had been the other main cause of friction After the debate on the Government's Defence White Paper on March 5, 1952, Mr Bevan and over 50 other Labour M P.s had voted against the Government motion approving the White Paper, despite an Opposition three-line whip to the contrary, for many months before his resignation from the committee of the Parliamentary Labour Party (the "Shadow Cabinet") in 1954 Mr. Bevan had differed from the majority of the committee on the subject of German rearmament, and when he eventually resigned from the committee on April 14, 1954, he gave as one of his reasons the fact that he was "deeply shocked" at the failure of the Labour leaders to repudiate immediately Mr. Eden's acceptance of Mr. Dulles's proposals for a "Pacific NATO"

The most recent conflict of opinion became apparent when Mr. Bevan and 113 other Labour members (among them Mr Strachey, Mr Michael Stewart, and Mr George Strauss) put down a motion deploring the Government's decision not to take part in talks with the Soviet Union until the London and Paris agreements had been ratified. Thereupon the Parliamentary Labour Party, by 132 votes to 72, passed a resolution on Feb 24, 1955, "regretting" this action which, it said, was "in defiance of party decisions" taken on Feb. 10.

This was followed by the incidents during the defence debate in the House of Commons on March 1-2 when Mr Bevan questioned Mr. Attlee on the Opposition leaders' attitude towards the use of thermo-nuclear weapons, and eventually abstained from voting on the official Labour amendment, together with 61 other Labour members (see 14093 A) The political correspondent of *The Times* subsequently commented on the incident as follows "Opposition members generally regarded this questioning of Mr Attlee as to what the Opposition meant by their amendment as a humiliating public affront to the Leader of the Opposition It was thought to be the more unjustified in that Mr. Bevan had not attended the party meeting at which the draft of the Opposition amendment was discussed and agreed upon."

On March 7 the Labour "Shadow Cabinet" decided to recommend to the Parliamentary Labour Party that, because of Mr. Bevan's conduct in challenging the party leaders, the Labour whip should be withdrawn from him. This decision gave rise to a sharp controversy within the Labour and trade union movements.

The reasons for the "Shadow Cabinet's" decision were publicly explained by Mr. Gaitskell, the party treasurer, and by Mr. Shinwell, another of its members.

Mr. Gaitskell, speaking at Doncaster, said on March 13 · "We shall not be concerned at that meeting [of the Parliamentary Labour Party] with questions of policy We shall be concerned with the standards of loyalty to be expected from ourselves—the Labour members of Parliament—to party decisions, to the leader of the party, and to one another . . . In the House of Commons Mr. Attlee was subjected to a hostile interrogation in language which might have come from the leader of another party rather than from one of his own loyal supporters. There was even an implied threat that if his answers were unsatisfactory another lead would have to be provided. I do not see how this sort of thing can possibly be regarded as anything else but a direct challenge to the elected leader of our party and therefore an affront to the party itself which elected him."

Mr. Shinwell said on March 12: "Anybody can say anything he likes about policy, but persistent flouting of majority decisions and repeated challenges to the leadership can no longer be tolerated. It does not suit our democratic parliamentary system to have an Opposition torn asunder by internal strife. This has got to stop, and those of us who have worked long and hard to further the Labour policy are determined to stop it,even if it means shedding some people who seem to think they are more important than the party itself."

Support for the "Shadow Cabinet's" proposal was expressed by, among others, the National Union of General and Municipal Workers (one of the largest unions) and the Clerical and Administrative Workers' Union which, in a statement issued on March 13, deplored "actions which denigrate the Labour Party's leadership," emphasized "the need for unity," and asserted that the proposed withdrawal of the whip from Mr. Bevan "was inevitable in order to protect the authority of the party and its leadership and to regain its prospects"

Strong opposition, on the other hand, to any possible expulsion of Mr. Bevan from the Parliamentary Labour Party was expressed by many constituency Labour parties, among which Mr. Bevan has a considerable following, as well as by a number of M.P.s, some of whom are not generally regarded as being among his closest supporters.

A resolution of the Huyton constituency party described the proposed action as "malicious, short-sighted, and harmful in the extreme", one from the Hornsey party "begged" the Parliamentary Party "to reject a recommendation which can only lose us the next general election", a resolution from the Rotherham party asserted that "healthy controversy is essential in a virile democratic party", whilst Coventry Borough Labour Party passed a resolution advising its three M P s to vote against the "Shadow Cabinet's" proposal

Among trade unionists who expressed support for Mr. Bevan were delegates representing 20,000 miners in South Wales (the area which includes Mr. Bevan's constituency), and shop stewards representing 10,000 employees at the Hillington industrial estate, Glasgow. Members of Parliament critical of the "Shadow Cabinet's" recommendation included Mr Anthony Greenwood, who said on March 12 "To withdraw the whip from Mr Bevan would be a tragic blunder. The Labour Party is not so powerful that it can throw aside anyone with Mr Bevan's great qualities without seriously weakening itself. . Equally, the party desperately needs Mr. Attlee, with all his great experience and integrity The test of statesmanship—and of comradeship, too—will be whether a real effort is made .. to prevent Labour putting itself out of office for yet another Parliament"

Mr Bevan himself, who had been ill with influenza, issued a statement on March 11, in which he said. ". The Parliamentary Labour Party is the body that is entitled to my first full statement, but in the meantime I wish to make quite clear that what I have said or done is not a challenge to the personal authority and position of Mr Attlee as leader of the party Differences are on policy and only policy"

The meeting of the Parliamentary Labour Party to consider its committee's recommendation met under the chairmanship of Mr. Attlee on March 16, and after lengthy discussion decided by 141 votes to 112 to withhold the whip from Mr. Bevan.

According to press reports, the motion to withdraw the whip was moved by **Mr. Attlee,** who based the case against Mr. Bevan solely on the ground of disloyalty to party leaders and to party decisions, whilst **Mr. Bevan,** speaking in his own defence, reiterated that he had had no intention of challenging the personal authority of Mr. Attlee. As a compromise, **Mr. Fred Lee** moved the following amendment "That this Parliamentary Party deplores and censures Mr. Aneurin Bevan in challenging the authority of its leader in the House of Commons It calls upon the whole British Labour movement to unite behind the leader in a common effort to rid the nation of the present Tory Government" Before the vote was taken on this amendment (which would have avoided Mr Bevan's exclusion from the Parliamentary Party), Mr Attlee confirmed, in reply to a question from Miss Elaine Burton, that if the amendment were carried the whole "Shadow Cabinet" would have to consider its resignation; the amendment was thereupon defeated by 138 votes to 124, and Mr. Attlee's motion carried by 141 votes to 112.

The Parliamentary Party's decision led to further controversy within the Labour movement over Mr. Bevan's future.

Many constituency parties sent resolutions to the National Executive Committee of the Labour Party (which had to consider the Parliamentary Party's decision) urging it not to expel Mr Bevan from the Labour Party as a whole, whilst a number of M P.s, including Mr. Harold Wilson (one of Mr Bevan's closest supporters), Mr. Swingler, Mr Donnelly, and Mrs Jeger, gave warnings that to expel Mr. Bevan altogether would seriously affect the party throughout the country The chairman of the Labour Party (Dr. Edith Summerskill) and the chairman of the T U C. (Mr Geddes) defended the Parliamentary Party's action, Mr Geddes declaring that "when personal conscience interferes with the good of the party, then personal conscience must give way to the party" Of the trade unions themselves, the executives of the Amalgamated Engineering Union and of the National Union of Railwaymen both passed resolutions expressing their opposition to the expulsion of Mr. Bevan from the Labour Party, although the A E U. made it clear that it in no way condoned Mr Bevan's behaviour

The Bevanite weekly, *Tribune* (among whose editors is Miss Jennie Lee, Mr. Bevan's wife), denounced the Parliamentary Party's decision as "one of the most stupid and reckless decisions ever made by an adult political party." It alleged that "for years past a section of the leadership have taken one action after another which imperils the unity and vigour of the party," and concluded "The attempted expulsion of Aneurin Bevan marks the culmination of a Right-wing endeavour to crush the Left within the party. But it also marks not an end, but a beginning Now that the Right-wing aim is so clearly revealed, the revolt against their policies within the movement will be stronger than ever. Both in the constituencies and in the trade unions the fight to achieve a Socialist policy can go forward with a new momentum . "

Independent press comment on the Parliamentary Party's meeting was as follows.

The Times: "The smallness of the majority for withdrawal of the whip came as a jolt to the party leaders. They had confidently expected a majority of 50 or more in favour of the official recommendation. The size of the minority vote was a surprise to everyone."

The Manchester Guardian: "Bevanism has been a perilous distraction for four long years A great deal of the [Labour] Party's present weakness in the country must be laid at the door of the Bevanite disruptionists . . One can understand all the feelings that actuated the large minority . . . It is no small matter to turn out

one who has had such standing in the party Labour instincts are very loyal and tolerant—even if Labour rules and regulations are not. But they should reflect whether the party will not be better without Mr Bevan than with a persistent rebel inside the party, sapping and mining, gibing and defying."

The National Executive Committee of the Labour Party met on March 23 to consider the Parliamentary Party's decision to withdraw the whip from Mr. Bevan and to resolve whether or not to expel him from the Labour Party altogether. It was eventually decided by a majority of only one vote to delay the final decision until a special sub-committee appointed to "interview Mr. Bevan with a view to seeking assurances as to his future conduct as a member of the party" had reported back. Mr. Attlee, who recommended this course rather than expulsion, had had a private meeting with Mr. Bevan at the House of Commons on the previous evening

Press reports stated that, at the National Executive's meeting, a motion to expel Mr. Bevan from the Labour Party had been moved by **Mr. Knight** (National Union of Seamen) and seconded by **Mr. Cooper** (National Union of General and Municipal Workers), but that, after lengthy discussion, **Mr. Attlee** had proposed the amendment suggesting the appointment of a sub-committee to meet Mr Bevan and seek assurances from him regarding his future conduct This amendment was carried by 14 votes to 13, among those who voted against it being Mr. Herbert Morrison (deputy leader of the Parliamentary Party), Mr. Gaitskell, Mr Cooper, Mr. Knight, Mr Davies (Iron and Steel Trades Confederation), and Mr Sam Watson (National Union of Mineworkers); among those who supported Mr Attlee's amendment were Mrs. Barbara Castle, Mr. Richard Crossman, Mr. Driberg, Mr. Anthony Greenwood, Mr James Griffiths, Mr Mikardo, Mr. Harold Wilson, Mr Gooch (National Union of Agricultural Workers), Mr Haworth (Transport Salaried Staffs' Association), Mr Irwin (Electrical Trades Union), and Mr Stafford (National Union of Railwaymen) The chairman of the meeting, Dr Summerskill, known to be one of Mr Bevan's severest critics, did not vote

The sub-committee set up by the National Executive met Mr. Bevan on March 29; it consisted of Mr. Attlee, Mr. James Griffiths, Mrs. Castle, Mr. Gaitskell, Mr. Haworth, Mr Cooper, Mr. Knight, and Dr. Summerskill as chairman. On the previous evening Mr. Bevan and Mr. Attlee had had another short private meeting.

It was reported in the Press that **Mr. Bevan** had read the following statement to the sub-committee "Throughout this controversy it has been stated that no differences of policy are involved. Even if there were, there seems to be no good reason why they should not be resolved within the party, without personal recrimination, and in a way that would leave the essential unity of the party unimpaired In a great party such as ours there must always be argument about how to apply the principles of socialism to a particular situation The essence of democracy in a political party is to enable the argument to proceed while at the same time maintaining the effectiveness of the party in action It is not always easy to achieve this, but we must always strive for it, and I shall do my best to make it possible.

"The charge is that in what I have done, and also in the way I have done it, I have created difficulties for Mr. Attlee and caused him embarrassment in his position as the leader of the party. This was certainly never my intention. But if any action or speech could lend themselves to the interpretation that such was my motive, then I am sincerely sorry, and I apologize to Mr Attlee for any pain I may have caused him. I ask for nothing more than the opportunity to serve our party under his leadership. In doing so I claim no more privileges than, and accept all the obligations shared by, other members of the party"

The full National Executive Committee, meeting on March 30, considered Mr. Bevan's statement to the sub-committee and, after further lengthy discussion, approved the following resolution by 16 votes to 7:

"The National Executive Committee of the Labour Party, having considered the report of the Parliamentary Party on the withdrawal of the whip from Mr. Aneurin Bevan—

(1) Is satisfied that the decision of the Parliamentary Labour Party to withdraw the whip from Mr. Bevan was fully justified;

(2) Whilst noting the assurances given by Mr Bevan in his statement to the Executive on March 29, 1955, warns that it will take drastic action against future violations of party discipline,

(3) Expresses the hope that all sections of the movement will now unite in a determined endeavour to secure the return of a Labour Government at the next general election"

As a result, Mr. Bevan remained a member of the Labour Party, although not of the Parliamentary Labour Party, and therefore sat in the House of Commons as an Independent Labour member. Following the announcement of the forthcoming general election, however, a recommendation by the "Shadow Cabinet" that the whip should be restored to Mr. Bevan was accepted by the Parliamentary Party without opposition on April 28.

Of the other Labour M.P.s, who had earlier been excluded from the Parliamentary Labour Party for having defied party instructions in the debate on German rearmament on Nov. 17-18 (see 13917 A), six had the whip restored to them on Feb. 24 and the seventh (Mr. McGovern) on March 10.—(Times - Manchester Guardian - Daily Herald - Tribune) **(14093 A.)**

A. SUDAN. — National Unionist Party's Proposal for Complete Independence. - Breakdown of Negotiations with Egypt on Revision of Nile Waters Agreement.

The National Unionist Parliamentary Party adopted on March 31 a resolution in favour of complete independence and full sovereignty for the Sudan, which, it stated, should be an independent republic with its own President, Government, and Parliament. Relations with Egypt, it said, should be "defined in a way which must not prejudice or cut through Sudanese sovereignty," and should be governed by the Sudan's joining the Arab League. Sudanese foreign policy should be in conformity with the League's decisions, but should always be directed to the Sudan's interests, and should also be co-ordinated with other organizations and groups with which the Sudan had relations. The Parliamentary Party's resolution was confirmed by the National Unionist Party executive on April 9.

This decision marked an important development in the policy of the National Unionist Party, which in the past had advocated the retention of a close link, and some form of union, with Egypt. The change, however, had been foreshadowed by statements made by the Prime Minister, Mr. Azhari, following the 1953 general elections, in which he emphasized that the National Unionist Party had no commitment to unite the Sudan with Egypt, and expressed the belief that it should be completely independent, though having some link with Egypt (see 13303 A) He had reiterated this view in more recent statements advocating the independence of the Sudan, and proposing that there should be a "high council" at which the principal Ministers of both countries should meet once or twice a year to discuss matters of common interest, such as defence, foreign policy, and the division of the Nile waters Feeling against the Egyptian Government had increased in recent months, as a result of its attempts to influence Sudanese opinion by radio and press propaganda (which were resented as foreign interference in the country's affairs), the removal of President Neguib from office, and the controversy over the use of the Nile waters

Negotiations between the Sudanese and Egyptian Governments on the revision of the 1929 Nile waters agreement, which opened in Cairo on April 6, broke down on the following day. During preliminary discussions the Sudanese Government had sought Egyptian consent to the building of a storage dam on the Blue Nile at Roseires (near the Ethiopian border), which would increase the Sudan's water supply by 75 per cent. The Egyptian Government, however, had made its consent conditional on Sudanese consent to the building of a dam above Aswan (planned to be the highest in the world), which would increase Egypt's irrigated land by about one-third, but would also flood a large area in the Sudan 100 miles along both banks of the Nile upstream from the Egyptian border, leaving 50,000 Sudanese homeless. The Sudanese delegation found this unacceptable, and its leader, Mr. Hammad (the Minister of Irrigation) stated afterwards that the Sudan had "lost all confidence in the Egyptians' intentions," and that any agreement would have to be reached through arbitration.—(Times - Manchester Guardian) **(Prev. rep. Relations with Egypt, 13969 A; 13929 A; Nile Waters, 13650 A.)**

B. UNITED KINGDOM. — Exchange Control. - Tourists' Expenses Allowance increased.

The Treasury announced on March 17 that in future the amounts of sterling notes and foreign currency notes which travellers might take out of the United Kingdom would be increased from £5 and £10 to £10 and £25 respectively; the sterling notes, however, which were intended to enable travellers to meet their incidental expenses on British ships and aircraft and on landing in the U.K., could not be spent or exchanged abroad by U.K. travellers. Visitors to the U.K. would be able to take out foreign currency notes to the equivalent of £25 or the amount which they brought in with them, whichever was the greater. The basic travel allowance remained unchanged at £100 for adults and £70 for children under 12 years old. (Treasury Press Office) **(Prev. rep. 13827 C.)**

C. FRANCE. — Co-operation Agreement between Panhard and Citroën Companies.

The Panhard and Citroen motor car companies announced on April 6 that they intended to co-ordinate their production in order to bring about a better utilization of their resources. It was emphasized that the agreement between the two companies was not a merger, and that each would continue with its own production and commercial activities. Panhard, however, would produce the small two-cylinder Citroen trucks, and in exchange Citroen would take a large share of Panhard's capital.—(Le Monde, Paris) **(Prev. rep. 13685 D.)**

D. SWEDEN. — Increase in Bank Rate.

The Swedish bank rate was raised on April 18 from 2½ to 3½ per cent.—(Svenska Dagbladet, Stockholm) **(13265 B.)**

A. UNITED KINGDOM. — The Newspaper Strike.

A strike of about 700 maintenance engineers and electricians employed by the "national" newspapers took place from March 25 to April 20, resulting in a complete stoppage of all London morning, evening, and Sunday newspapers, together with their Manchester and Scottish editions. The strike followed the failure of wage negotiations between the Newspaper Proprietors' Association, representing the national newspapers, and the unions to which the strikers belonged—the Electrical Trades Union and the Amalgamated Engineering Union.

A statement issued by the N.P.A on March 24 explained that the E.T.U. and the A.E.U. had refused a wage increase "identical with that offered to all other unions in the London newspaper printing industry, and accepted by a majority of them," and had also refused the employers' offer to submit the matter to arbitration. A meeting between employers' and union representatives at the Ministry of Labour on March 26 proved fruitless, and on March 29 the N.P A. gave notice to terminate the employment of its non-editorial staffs as from April 15.

On March 31 the Association issued a further statement explaining that the strikers had demanded minimum increases of 58s 6d weekly, compared with the newspaper proprietors' offer of the equivalent of 9s. - 12s weekly, according to grade "The offer by the newspapers," the statement went on, "is equivalent to a minimum wage in London of £12 19s 6d per week for night workers for a 35-hour week and of £11. 1s. 6d. per week for day workers for a 40-hour week The average earnings of all skilled engineers and electricians employed in the London offices of the national newspapers in the week preceding the strike were £15. 2s. The offer refused by the engineers and electricians is equal to an hourly rate without overtime of 7s 5d for night workers and 5s. 7d. for day workers The overtime rate for night work is 10s 7d an hour and for day work 8s an hour. The N P.A repeats its offer to have this wage dispute with a comparatively small number of employees referred to arbitration, and to accept any award made"

The strike committee, however, in a "Strike Bulletin" distributed on the same day, gave the existing weekly base rates for day, night, and rotary-shift workers as £10. 4s. 6d , £12 0s. 6d., and £11 8s 6d respectively, plus 7s. cost-of-living bonus in each instance "This represents an increase of approximately 76 per cent over the 1939 figure," the Bulletin continued, "and must be seen as a serious lowering of the standard of life. We repeat our claim, which is for 125 per cent over the 1939 base line to bring us more in line with the wage position generally." The strike committee added that it had informed the Minister of Labour that the unions were not prepared to submit the dispute to arbitration at the present stage because they believed that the industry's negotiating machinery should be able to reach a settlement.

A further meeting on March 31 between N P A. and strikers' representatives at the Ministry of Labour was unsuccessful, and on the same day representatives of the T.U C. General Purposes Committee expressed to Sir Walter Monckton, the Minister of Labour, their concern at the effect of the stoppage on members of other unions in the newspaper printing industry. Concern was also expressed to the Minister by representatives of the Printing and Kindred Trades Federation, whilst the London *Daily Express* "chapel" of the National Union of Journalists passed a resolution condemning the strikers for "hazarding the livelihoods of workers on financially unstable newspapers and threatening an even greater and more undesirable concentration of newspaper ownership"

On April 2 Sir Walter Monckton announced that he proposed to set up a court of inquiry into the strike, and that its members would be: Sir John Forster, Q.C. (president of the Industrial Court) as chairman; Mr. S. M. Caffyn (past president, British Motor Trade Association); and Mr. J. S. Webber (general secretary, Transport Salaried Staffs' Association, and a member of the T.U.C. General Council). In view of this, Sir Walter asked the E.T.U. and A.E.U. executives on April 5 to urge the strikers to resume work until after the court had reported, but the two executives rejected this request and declared that the strike (which had not hitherto been recognized as official at national level) was now official and that strike benefits would be paid.

The court met on April 6-7, and on April 13 published its report, which is summarized under cross-headings below:

History of the Dispute. The report explained that for many years all non-editorial employees of national newspapers (numbering about 23,000) had been included within one wages structure, with no significant change in the relativities of the various jobs in newspaper production for at least 20 years. There was, however, no joint negotiating machinery, and any revision of wages involved discussions with 14 trade unions and the conclusion of 22 separate agreements covering over 100 different minimum wage rates. In order not to disturb the relativities within the wage structure, the N.P.A. had always refused to concede to any union better terms than those offered to all the others, and since 90 per cent of its employees belonged to unions affiliated to the Printing and Kindred Trades Federation, it had hitherto first discussed its proposals informally with that Federation. The P.K.T.F , however, seldom spoke fully for all its affiliated unions (each of which was autonomous and had its own agreement with the N.P A) and had no authority to enter into binding collective agreements on their behalf. The A.E.U and E.T.U had two agreements with the N P A , one for members employed in London offices, and one for Manchester, but these agreements had been negotiated, not by national officials (as was the case with the printing trade unions), but by district officials in London and Manchester.

In November, 1951, the report continued, the unions, including the E T U. and A.E U , had entered into new three-year agreements with the N.P A , providing for the stabilization of basic wages and the addition of a cost-of-living bonus of 1s per point in accordance with the changes in the retail price index These arrangements were due for revision in October, 1954, and in September A E U. and E T.U. officials in Manchester had put forward a claim for a "substantial" wage increase The N P A. had replied on Dec 1 setting out the terms of an offer already made to the P K.T F and representing "a general policy." This provided for (*a*) the consolidation into the basic rates of 16s. of the existing cost-of-living bonus , (*b*) the treatment of the balance of that bonus (7s), plus amounts varying from 9s. to 12s according to grade, as a "fixed bonus" not subject to fluctuation with the cost-of-living changes. This offer had been discussed with district officials of the two unions in Manchester on Dec. 22 and in London on Jan 14, 1955, but at the London meeting the union representatives had rejected it as "wholly unsatisfactory" and had demanded an increase of 58s. 6d weekly, to bring the day rate for skilled workers up to £13 10s This demand had been refused by the proprietors

On Jan. 17, however, in the light of the reactions of all the unions, the N P.A. had made an "improved and final" offer providing for (*a*) the ending of the 1951 agreement, with its stabilization and cost-of-living payments; (*b*) the consolidation into basic rates of a cost-of-living bonus of 23s weekly; and (*c*) a series of graded payments of 12s., 10s. 6d and 9s weekly as fixed bonuses, not subject to cost-of-living fluctuations, but also not to be included in basic rates for overtime calculations This offer had been accepted by four unions discussions with seven others were still proceeding , and one (the Typographical Association) had declared its readiness to go to arbitration On Feb 23 the N P.A. had informed the E T.U. and A.E.U that no better offer could be made, whereupon strike notices had been served by the two unions to take effect from March 25.

The Association had then notified the two unions that if the notices were withdrawn, it was prepared to meet their representatives once more. A meeting had accordingly taken place on March 21, at which the N P.A., while repeating its previous offer, had indicated that it would consider paying "merit advances" in individual cases. This proposal had been turned down by the unions

The Contentions of the Parties. (1) *The E T.U* In presenting the E.T.U.'s case, Mr Foulkes, its general president, had stressed the difficulties and delays encountered whenever the union had tried to secure the N.P.A.'s consideration of claims for improved pay or conditions. These difficulties, he contended, arose from the Association's insistence that claims in respect of maintenance men should await the outcome of negotiations with the printing unions, and that any offer to them should conform to the terms of settlement with these unions As the E.T.U 's attempts to become affiliated to the P K.T F., in order to secure speedier consideration of claims, had been unsuccessful because of the Federation's policy of admitting only unions catering solely for printing trade workers, no wage negotiations in the usual sense had taken place between the Association and the E.T.U. and A.E.U. since 1939, and dissatisfaction with this state of affairs had materially influenced the decision to strike.

Mr Foulkes had contended that the increase claimed (1) was justified by the improvements secured since 1939 by skilled electricians employed in other industries, as well as by the higher profits made by newspapers in 1954, which reflected the higher productivity of their employees; (2) was necessary for the maintenance of a standard of life comparable with that of 1939 , (3) was merited by the greater technical knowledge and skill demanded by the more complicated printing machinery introduced in recent years.

(2) *The A.E U.* Putting the case for the A E.U., Mr J R. Scott (a member of the union's executive council) had claimed that present rates for engineers in the newspaper printing industry were "much too low in relation to both the responsibilities and highly skilled nature of the work and to the earnings of other workers in the newspaper printing industry and of skilled engineering craftsmen elsewhere." Nearly all of them, he pointed out, had been recruited from the printing machinery section of the engineering industry, had served their apprenticeship there, and were "specialists in the exacting work of maintaining complicated machinery of ever-growing intricacy" Before the war they had been among the best-paid craftsmen in the country," but their pay had now fallen "well behind that of very many skilled engineering workers, both in London and throughout the country."

Mr. Scott stressed, however, that the men's main grievance, and the one which had led to the strike, was that in recent years they had "lost ground financially in comparison with other workers in the newspaper industry to such an extent that their wages are not only far below those of printing craftsmen, but in many cases are below those of semi-skilled men" In conclusion, Mr. Scott stressed that the A E U. was "concerned to exercise the right, hitherto denied to it, to negotiate with the N P A. rates of wages for its members employed in the newspaper printing industry, instead of having merely to accept the imposition on those members of the general terms of settlement negotiated by the other unions in the industry."

(3) *The N P A* Mr. Charles Russell, Q C., on behalf of the employers, had stressed that the N P A. considered (*a*) that the cause of the strike was "simply the employers' refusal to increase their wage offer"; (*b*) that strike action by about 700 employees out of 23,000 could not be justified, more especially since the N P.A had offered to submit the claim to arbitration Dealing with the unions' complaint that their members' wages had fallen below their 1939 standards, he pointed out that this had been "precisely the same" with skilled people throughout industry, and claimed that the A E.U. and E T.U. had received similar treatment to that accorded to the other craft unions in the newspaper industry Moreover, in comparing maintenance men's rates with those paid in 1939, it should be remembered that since then the newspaper industry had changed over from an 11-day fortnight to a 5-day week, involving a reduction in working hours to 35-40 weekly, which was reflected in "a substantial increase in the hourly rate of remuneration and in enhanced overtime rates."

Although the N P.A acknowledged the services of the maintenance workers and recognized their skill, Mr Russell continued, it did not consider that they were entitled to a higher status than they now enjoyed in the industry. At present their minimum rates were higher than those of the skilled members of all the printing trade unions with one exception. The N.P.A was not prepared to pay merit money on a general basis, but only to individuals whose work demanded exceptional skill. If the members of the A E U. and E.T.U. wished to be considered "out of context with the printing trade unions" the N P.A was prepared to consider their position in relation to the general engineering and electrical trades, although it did not think it would be to their advantage. If their wages were to remain within the newspaper wages structure the N P A could not alter their relativity unless a special case could be made In any event, if there were to be a re-assessment of the status in the industry of the members of any union, this would have to commend itself not only to the N P A , but to the members of all the other unions whose own members' status would be immediately affected

As regards the unions' complaint that they had been "trailed along behind the P.K T F. unions," and that the N P A had refused to negotiate with them, Mr Russell argued that the Association "could not do otherwise than treat the revision of wage settlements as a comprehensive job." He pointed out that no printing union had taken strike action; that the N.P A. had exceeded "by a considerable amount" its original estimate of "what was properly due by way of wage increases"; but that it had been unable to grant the demand for a 58s. 6d. increase because if it had done so "all the other unions would naturally have claimed a similar increase," and this the newspaper industry was "quite unable to face" The N P A admitted, however, that the present system of wage negotiation was "unsatisfactory," and had given the E T U. and the A.E U. assurances that it was "prepared to have a full and frank discussion upon the method and timing of all future negotiations of wages and conditions"

The Court's Findings. The report first pointed out that maintenance engineers and electricians had "long been regarded as an integral part of the newspaper industry," that this had "operated to their advantage," and that the unions had "never hitherto sought to alter the position" Notwithstanding the unions' contentions, the court held that a comparison of base rates in the engineering and newspaper industries did not "show to the disadvantage of the maintenance men," particularly when regard was had to "the reduced hours worked in the newspaper industry as compared with those which apply in general engineering."

Regarding Mr Foulkes's statement that dissatisfaction at the absence of any direct negotiations between the N.P.A. and the E.T U and A.E U since 1939 had "materially influenced the decision to strike," the court stressed that there was no evidence that either union had previously suggested any alternative to the traditional method of wage negotiation in the newspaper printing industry. In this connexion the report declared: "While we appreciate the feelings of the A.E.U and E T.U. membership that there had been no proper negotiations with their unions, due in their view to their being tied to a settlement arrived at in discussions to which they were not parties, we think that the precipitate action of local officials in calling an unofficial strike . . . was unjustified.

"The final offer of the N.P A. has not been accepted by the Typographical Association, but that union is prepared to submit its claim to arbitration. This course is in accordance with the spirit of agreements to which the A.E.U. and E.T.U. were parties . . and which contained a provision for arbitration before any stoppage of work. We think it most regrettable that these unions did not adopt a similar attitude before taking strike action, involving as it has done such serious and far-reaching consequences for their fellow-workers in the industry, a vast number of others dependent upon the industry for their livelihood, and the public at large.

"The rate of wages of engineers, electricians, and electricians' assistants should, in our view, continue to find their place within the wage structure of the newspaper printing and publishing industry in which they are engaged and of which they constitute so essential a part. Such rates must bear fair comparison with those applying in the general engineering industry, and a broad relationship on the basis of skill and importance with those of the other sections of craftsmen in the newspaper industry. In the light of the existing wage pattern in the newspaper printing and publishing industry, to which the wages of maintenance engineers, electricians, and electricians' assistants have hitherto conformed, the present claim for an additional 58s. 6d. a week is unrealistic.

"The wage pattern in the newspaper printing and publishing industry has existed for a long time. Within it the N.P.A. has hitherto found accommodation for all grades of its employees . . . But in our view, no method of negotiating general increases of wages in the industry is likely to be regarded as satisfactory by the maintenance men unless it provides for their being represented at all stages. Nor do we think that the general wage pattern of the industry can be satisfactorily settled unless all the other unions at present recognized by the N P.A. are similarly treated.

"We are therefore of the opinion that in this industry it has now become desirable in the interests of good industrial relations, that the 14 unions with whom the N.P A. customarily concludes agreements should co-operate to establish an appropriate central body, which should in future negotiate with the N P.A. on questions of common concern, including rates of pay, conditions of service, and the wage differentials applicable to the various grades of workers employed.

"Short of the course which we suggest, it would seem to us that the industry is faced either with a continuation of the present unsatisfactory method of negotiation or the possibility of a complete breakdown of the internal wage structure and the danger of spasmodic sectional disputes which may involve, as in this case, the majority of the workers in the industry.

"Pending the establishment by the unions of such a central negotiating body as we have proposed, and the examination by that body of the wage structure and general pattern of the industry, we are of the opinion that the engineers, electricians and electricians' assistants should return to work without prejudice on the basis of the employers' present offer"

The publication of the report was followed on April 14 by resumed talks at the Ministry of Labour between N.P.A., E.T.U., and A.E.U. representatives, with members of the P.K.T.F. executive in attendance. In spite of the employers' unreserved acceptance of the court's findings, however, the talks again broke down, and at midnight on April 15 the notices previously given to newspaper printing staff took effect, about 20,000 men being involved. Later the same day the T.U.C. General Purposes Committee met the P.K.T.F. executive, and the latter agreed to meet A.E.U. and E.T.U. representatives on April 18 under the chairmanship of Mr. Geddes, chairman of the T.U.C. At this meeting agreement was reached on a proposal for a joint approach to the N.P.A. "to explore the possibility of a settlement," and a further meeting between the Association and the E.T.U. and A.E.U. accordingly took place on April 19. It was then agreed that work would be resumed immediately on the following conditions: (*a*) that the offer previously made by the N.P.A. should be accepted by all the unions as an agreed settlement pending further negotiations; (*b*) that these should begin within eight weeks of resumption of work; (*c*) that the new agreement should operate from the expiry of the same period, and be subject to completion within three months.

Resumption of work accordingly took place on April 20, and the London morning and evening newspapers as well as the provincial papers affected reappeared on April 21.

The papers affected by the strike included *The Times, Daily Telegraph, Daily Express* (including Manchester and Glasgow editions), *Daily Mail, News Chronicle, Daily Herald, Daily Mirror, Daily Sketch, Financial Times, Evening News, Evening Standard, Star, Observer, Sunday Times, Sunday Express, Sunday Graphic, Sunday Pictorial, News of the World, People*, and *Reynolds News*. In addition, the *Daily Dispatch* (Manchester), *Daily Record* (Glasgow), *Empire News* (Manchester), *Sunday Chronicle* (Manchester), and *Sunday Record* (Glasgow), whose proprietors are members of the N.P.A., were not published. The *Manchester Guardian*, however, whose proprietors are not members of the Association, appeared as usual. whilst the *Daily Worker* (Communist), which had failed to appear on March 26 and subsequent dates, resumed publication on April 6, when it was explained that the interruption had resulted from a dispute with typographers which had now been settled

The cost of the stoppage was estimated by an N.P.A. spokesman at about £2,000,000.—(Cmd. 9439 - Times - Daily Telegraph - Manchester Guardian - Western Daily Press - Bath and Wilts Chronicle and Herald) **(Prev. rep. 14064 A.)**

A. UNITED STATES. — Increase in Bank Rate.

The Federal Reserve Bank of Kansas City raised its rediscount rate on April 13 from 1½ to 1¾ per cent, similar action being taken on the following day by the Reserve Banks of Boston, Cleveland, Dallas, Minneapolis, New York, Richmond, and St. Louis.

The Federal Reserve Board had announced earlier (Jan. 4) that, in order to restrain speculation on the stock market, purchasers of shares would in future be obliged to put down 60 per cent of the purchase price instead of 50 per cent as hitherto. As the boom conditions on the stock market nevertheless continued, the margin requirement was raised again on April 22 to 70 per cent. During 1954 prices on the New York Stock Exchange (as measured by the *New York Times'* combined average of 50 stocks) rose by 52 per cent, and in some cases reached levels exceeding those in 1929.—(New York Times - Federal Reserve Bulletin, Washington) **(13565 B.)**

A. AUSTRALIA. — Labour Party Split. - Criticism of Dr. Evatt's Leadership. - Dr. Evatt's Counter-charges against Right-wing Party Members. - Dismissal of Victorian Executive by Federal Executive. - Election of New Victorian Executive. - Defeat of Victorian Labour Government. - Dissolution of State Parliament. - Formation of Labour Party (Anti-Communist) in Federal Parliament. - Parliamentary Labour Party Vote of Confidence in Dr. Evatt.

A serious split developed in the Australian Labour Party in the latter half of 1954, arising from criticisms of Dr. Evatt as party leader and counter-charges by Dr. Evatt against certain right-wing members of the party. The subsequent controversy centred around the Labour Party in Victoria, where the State Executive Committee was criticized as being controlled by "outside interests" and was ordered by the Federal Executive on Dec. 3 to dissolve itself. Although a new Victorian Executive was elected in January, the old Executive refused to comply with the Federal Executive's order, and when the new Executive dismissed from the party all those who still continued to support the old Executive, those affected in the State Legislature formed a separate group and subsequently brought about the defeat of Mr. Cain's Labour Government. In the Federal Parliament, supporters of the old Victorian Executive decided to form a new party, and on the opening of Parliament on April 20 received formal recognition as the Australian Labour Party (Anti-communist). Dr. Evatt himself, however, received a vote of confidence from the remaining members of the Parliamentary Labour Party, and was confirmed as the party's leader on April 18.

The differences within the Labour Party, which had not been publicly expressed in the early months of 1954 as the party had wished to maintain a united front during the campaign for the general election in May of that year, were brought into the open after its defeat at the polls (see 13652 A). There was strong criticism of Dr. Evatt's conduct of the campaign, as well as criticism of his action some time earlier in appearing on behalf of Communist-led trade unions in his private capacity as a barrister (see 11417 D). Matters were brought to a head early in September, when the Royal Commission on Soviet Espionage in Australia—set up as a result of the defection of M. Vladimir Petrov from the Soviet Embassy (see 13585 C)—withdrew permission from Dr. Evatt to appear before it on the ground that his duties as Leader of the Opposition in the Federal Parliament conflicted with his obligations as counsel before the Commission.

Dr Evatt had been appearing before the Commission on behalf of two members of his secretariat accused of complicity in the disclosure of information to Soviet agents, in the course of his arguments before the Commission he had alleged that these charges were the result of a "deliberate conspiracy" to injure him as Leader of the Opposition. Earlier, he had alleged that the defection of Petrov had been organized by Mr. Menzies' Government in order to influence the public at the time of the election

On Sept. 8, at the first meeting of the Parliamentary Labour Party since his appearance before the Royal Commission, Dr. Evatt defended his action and refused to give assurances that he would seek the party's consent before appearing before the Commission again, and on Oct 5 he issued a statement in which he bitterly attacked "a tiny minority" who, he said, were trying to undermine the Labour movement. He expressed the belief that the activities of "this small group" were largely directed from outside the Labour movement; said that the Melbourne *News Weekly* appeared to act as their organ; and announced that he was bringing the matter up at the next meeting of the party's Federal Executive.

Although Dr Evatt mentioned no names in his statement, his reference to *News Weekly*, which is the organ of Catholic Action in Melbourne, made it clear that his attack was directed against the right-wing clerical group of the party in Victoria. The Canberra correspondent of *The Times*, in a despatch published on Oct. 9, explained that Catholic Action—a world-wide organization of the Roman Catholic Church whose objective is the training of Catholic youth in the principles and practices of the Catholic faith—had been enlisted by the Australian Roman Catholic hierarchy after the war in a campaign designed to eliminate Communist influence from the trade unions. For this purpose Catholic Action had formed within the unions secret industrial groups, known as "the movement," which by adopting Communist strategy and techniques—such as organizing cells and discussion groups, and packing meetings—had succeeded in breaking the hold of the Communists on a number of key unions *The Times* correspondent pointed out, however, that although this campaign had won the support of many non-Catholics, many Roman Catholics—including the late Mr. Chifley, the former Labour Prime Minister—had disliked "the movement's" direct intervention in political affairs, and had expressed misgivings about the possible consequences.

On Oct 12 a conference of 21 trade unions, representing 250,000 members, unanimously passed a resolution calling on the Federal Executive of the Labour Party to take action against the Victorian Executive. Referring to recent withdrawals by a number of unions of their affiliation with the Victorian branch of the Labour Party, the resolution expressed the view that these withdrawals had been due to dissatisfaction with the influence on industrial and political policy of a group "controlled from outside the party," which had attacked Dr. Evatt, and that Labour forces could be reunited only by disciplining this group. The resolution also declared that a decision of the Victorian Executive on Oct. 8 to support this group had violated majority opinion in the Labour Party.

The Federal Executive of the Labour Party, comprising two delegates from each State, met in Canberra on Oct. 27-28 under the chairmanship of Mr. E. E Reece (Tasmanian Minister for Lands and Mines), to consider the dispute within the party. It decided that the submissions by Dr. Evatt and the Victorian trade unions revealed a grave threat to the well-being of the Labour movement, and summoned a special meeting in Melbouren to examine the matter. It also expressed concern at the general lack of discipline in the Labour movement throughout Australia, and called on all members to refrain from public comment on actions relating to the present dispute

During the meeting the three right-wing members of the party who had attacked Dr Evatt—Mr. Mullens, Mr. Bourke, and Mr Keon, all Federal M P s representing Victorian constituencies—appeared before the Federal Executive to state their case against him. Mr Mullens accused Dr. Evatt of having raised a sectarian issue to split the Labour Party, of having assisted the Communist Party before the Royal Commission on Espionage; and of having violated the party rules by attacking members of the Parliamentary Party Mr Keon made similar charges and complained that Dr. Evatt had not consulted the Parliamentary Party before appearing before the Royal Commission The three M P s also accused Dr. Evatt of having formulated policies opposed to the party platform without consulting the party, notably in the last general election.

After conducting an investigation in Melbourne into the charges and counter-charges, the Federal Executive decided on Dec. 3 to disband the Victorian Executive and to order the election of a new Executive at a special conference of the Victorian branch of the party, to be held before the Federal party conference due to take place at Hobart early in 1955; the special conference would also ballot for the Victorian delegates to the Federal conference and both ballots would be supervised by the Federal Executive. The decision was reached by a narrow majority of seven votes to five, the delegates of South Australia, Western Australia, and Tasmania voting in favour, and those of New South Wales and Victoria against, with the vote of the Queensland delegation split

It had at first been proposed that the Victorian Executive should remain in office and the industrial groups be outlawed, but the leaders of the Australian Workers' Union—the largest and most important union in the country—had told the Federal Executive that, unless action were taken to reform the Victorian Executive, the A.W U would cancel its affiliation with the Labour Party in every State and would consider the possibility of forming a dissident Labour Party to be known as the Industrial Labour Party

Among its other decisions on Dec. 3, the Federal Executive ruled (*a*) that those trade unions which had cancelled their affiliation with the Victorian Labour Party during the past 12 months because of their dissatisfaction with its policy, might renew their affiliation before the Federal party conference, in order to secure representation, (*b*) that, from Dec. 31, the Victorian branch should refuse recognition to industrial groups within the unions. Complaints from a group of New South Wales unions that the N.S.W. branch of the party was dominated by the same forces which had captured control in Victoria—namely Catholic Action and industrial groups within the trade unions—were referred to the N S.W. Executive for a report.

With regard to the accusations against Dr. Evatt and his counter-accusations, the Federal Executive found that, on the one hand, no specific charges had been made by Dr. Evatt against Mr. Bourke, Mr. Keon, and Mr. Mullens, and that, on the other, their charges against Dr. Evatt of unsatisfactory leadership had not been sustained.

Dr. Evatt, in submitting his charges to the Federal Executive, had asserted that "the movement," a secret organization, was trying to commit the Labour Party solely or primarily to anti-Communist activities. He named Bartholomew Santamaria, national secretary of the Roman Catholic rural movement, as a prominent spokesman for "the movement," but pointed out that the latter was not identical with Catholic Action and had nothing to do with the lay apostolate of the Roman Catholic Church. "It is obvious," he added, "that if a faction is organized from without to gain control of the Labour movement solely on the basis of extreme anti-Communism, the fabric of the Labour Party will be subverted."

The special conference of the Victorian branch of the Labour Party met in Melbourne on Feb. 26-27 and elected a new 18-member Executive Committee, with Mr. J. V. Stout, secretary of the Melbourne Trades Hall Council, as president.

The old Executive, which had refused to dissolve itself, remained in occupation of the party office, its members declaring that they would resist all attempts by the new Executive to obtain possession. Previously, however (on Feb. 11), eight members of the old Executive had resigned after disagreeing with the Executive's decision not to attend the special conference. Those resigning were: Mr. John Cain, the Victorian Premier; Mr. W. Galvin, the Chief Secretary; Mr. P. J. Clarey, a member of the House of Representatives; Mr. R. A. Cameron, vice-president of the Victorian Labour Party, Mr. R. R. Broadby, secretary of the Australian Council of Trade Unions; Mr. D. Lovegrove, secretary of the Victorian Labour Party; Mr. A. Kyle, general secretary of the Storemen and Packers' Union; and Mr. R. Wilson, general secretary of the Vehicle Builders' Union. Four of these—Mr. Cain, Mr. Galvin, Mr. Broadby, and Mr. Clarey—were elected to the new Executive.

The split in the Victorian Labour Party was carried a stage further at the Federal party conference at Hobart in March. The opening of this conference, which was to have taken place on March 14, had to be postponed after a Victorian delegation representing the deposed Victorian Executive had blockaded the conference room in an effort to prevent the new Executive from participating The 36 delegates to the conference (six from each State) then divided on the question of the credentials of the Victorian delegation, and 17 of them decided to boycott the official conference and to hold a separate meeting in another hall. These 17, who included all six New South Wales delegates, five from Queensland (including the Premier, Mr Gair), four from Western Australia, and two from Tasmania, refused to attend the official conference unless they were assured that the decision on which Victorian delegates should be admitted would be made in the absence of both the rival delegations. On March 16 the minority conference issued a statement challenging the validity of the official conference on the ground that it was a minority meeting in which New South Wales was not represented, Queensland and Western Australia were represented by minority delegations, and Victoria by a delegation whose standing was disputed.

The official conference, which was held in the absence of the 17 defecting members, passed a resolution reminding members that it was contrary to policy to institute legal proceedings to determine the interpretation of the party constitution. (This arose out of the previous decision of the old Victorian Executive to challenge in the courts the right of the newly-elected Executive to take over the offices and funds of the party in the State) The conference also heard an appeal for party unity from the deputy leader of the Parliamentary Labour Party (Mr. Calwell), and directed the Federal Executive to investigate the charges made against the New South Wales branch by certain trade unions In another resolution the conference opposed the despatch of Australian troops to Malaya.

The new Victorian Executive, at its meeting on March 29, decided to expel Mr. Mullens from the party and to suspend 24 other party members for what it called a "deliberate and defiant challenge to this Executive." Those suspended were Mr. John J. Devlin (a Federal Senator); six members of the Federal House of Representatives—Mr. R. Joshua (Ballaarat), Mr. S. M. Keon (Richmond), Mr. T Andrews (Yarra), Mr. W. Bourke (Fawkner), Mr. J. Cremean (Hoddle), and Mr. W. Bryson (Wills); four Ministers in the State Government—Mr. Coleman (Transport), Mr. Barry (Health), Mr. Hayes (Housing), and Mr. Scully (an honorary Minister); and 13 other members of the Victorian Legislative Assembly. Mr. Devlin subsequently pledged his loyalty to the new Executive, but the other 23, together with another 81 supporters of the former Executive, were expelled from the party by the new Executive on April 5 for refusing to give a similar pledge. The new Executive also declared "bogus" 78 of the party's 320 branches in the State.

On March 30 Mr. Cain dismissed the four Ministers who had been suspended, by resigning the State Premiership and reforming his Government without them. On the following day the supporters of the old Executive in the Legislative Assembly formed a separate Parliamentary Labour Party led by two of the dismissed Ministers, Mr. Barry and Mr. Coleman, who called for an early election to clarify the present political situation. When the Assembly reassembled on April 20 after the recess Mr. Cain's Government was defeated, by 34 votes to 23, on a motion of no-confidence moved by the Opposition and supported by the dissident Labour members. Mr. Cain thereupon asked the Governor to dissolve the Assembly, and State elections were fixed for May 28.

Meanwhile, the seven supporters of the old Executive in the Federal Parliament who had been dismissed from the Labour Party, announced on April 17 that they had formed a new party led by Mr. Robert Joshua, to be called the Australian Labour Party (Anti-Communist).

At a meeting of the Federal Parliamentary Labour Party on April 18 a motion of confidence in Dr. Evatt's leadership was moved by Mr. Clarey (M.P. for Bendigo), and seconded by Senator McKenna, Leader of the Opposition in the Senate. During the subsequent debate Dr. Evatt gained a tactical surprise by suddenly announcing his resignation and calling for an immediate secret ballot for a new leader. In the ensuing voting he was re-elected by an overwhelming majority, receiving 52 votes, compared with 22 for Mr. Calwell and 5 for Mr. Burke. An earlier challenge to Dr. Evatt's leadership had been similarly unsuccessful. At a meeting of the Parliamentary Party on Oct. 13 he had refused to accept without notice a motion to declare all positions on the Federal Executive vacant, and on Oct. 20 the motion was defeated by 52 votes to 28; Mr. Calwell took no part in the debate, but voted against Dr. Evatt.—(Australian News and Information Bureau - Times - Manchester Guardian - Daily Telegraph) **(Prev. rep. 11535 B.)**

A. PAKISTAN. — Mr. Gurmani and Dr. Khan Saheb appointed Governor and Chief Minister of West Pakistan.

The Governor-General of Pakistan, Mr. Ghulam Mohammad, announced on April 4 that he had appointed Mr. M. A. Gurmani (Governor of the Punjab) as Governor of the new Province of West Pakistan, and Dr. Khan Saheb (Minister of Communications in the Central Government) as Chief Minister of the Province.

Both appointments were made under an Order issued by the Governor-General earlier on the same day, under which he had taken power to appoint by public notification a Governor and a Chief Minister of the new Province, as well as under "all other powers enabling him in that behalf." The West Pakistan (Appointments) Order also provided that "nothing in this Order affects the continuance of functions being performed by the Governor or Chief Minister in any other office he may be holding immediately before the date of notification."

On the same date the Council for the Administration of West Pakistan set up machinery for the selection and appointment of Commissioners, Secretaries to Government, heads of departments, and heads of regional organizations, and agreed that in selecting staff for the Secretariat and departments of the new Government all the Secretariats and departments of the existing units of West Pakistan should be given due representation, to ensure that there was no preponderance of the employees of any one Province or State. Mr. N. A. Faruqi (Secretary to the Central Ministry of the Interior) was appointed Chief Secretary to the Government of West Pakistan on April 5, the Secretaries to the leading Government departments, members of the Board of Revenue, and Divisional Commissioners being appointed during the three weeks following. (Pakistan High Commissioner's Office, London) **(14121 A.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves in April. - Surplus of $19,000,000.

The sterling area had a gold and dollar surplus in April of $19,000,000 after taking account of (*a*) the receipt of $17,000,000 in U.S. defence aid, (*b*) the receipt of $13,000,000 in gold or dollars from the European Payments Union in respect of the March settlement, and (*c*) the payment of $2,000,000 to creditors of the E.P.U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves rose to $2,686,000,000 on April 30.

Provisional figures for the E.P.U. April settlement showed that the U.K. had a surplus of $61,600,000 (£22,000,000), which will be settled in May half in gold or dollars and half by a reduction in the U.K. debt with the Union. (Treasury Press Office) **(Prev. rep. 14141 C.)**

C. EAST GERMANY. — Formation of Civil Air Service (Deutsche Lufthansa).

The East German Government Press office announced on April 27 the formation of a civil air service named the Deutsche Lufthansa. The statement said that an agreement had been signed by M. Pushkin, the Soviet High Commissioner, and the East German Minister of the Interior, allowing Eastern Germany to use Schonefeld airport on the outskirts of Berlin (which had hitherto been under Soviet control) for the new service.—(Der Tagesspiegel, Berlin) **(Prev. rep. West German Lufthansa, 14167 D.)**

D JAPAN. — War Criminals. - Pardon for Admiral Shimada.

Admiral Shimada (70), Japanese Navy Minister during the second World War, who had been sentenced to life imprisonment for war crimes, was released on parole on April 8 because of ill-health, with the consent of the Allied Governments concerned.—(New York Herald Tribune) **(Prev. rep. 13704 C.)**

A. UNITED KINGDOM. — Trade and Payments Agreements with Foreign Countries.

A new Anglo-Argentine trade and payments agreement, covering the period July 1, 1954 - June 30, 1956, was signed in Buenos Aires on March 31 after negotiations which had started in May 1954. During the first year of the agreement, which had only three months to run, it was proposed that goods to a value of £84,700,000 in each direction should be exchanged. The principal Argentine exports would be meat (£34,960,000), maize, wheat, oats, and barley (£20,000,000), oilcakes, etc. (£4,800,000), cotton fibre (£3,800,000), linseed, linseed oil, and other vegetable oils (£3,000,000), and wheat offals (£3,000,000). The chief items from the U.K. would be petroleum and petroleum products (£32,500,000), agricultural, mining, industrial, transport, and communications machinery and equipment to be purchased by the Argentine Government (£4,700,000), and raw materials and motors for manufacturers of agricultural machinery (£3,400,000). Other Argentine imports listed in the agreement covered a wide range of "essential" manufactured and semi-manufactured goods, and included also £16,675,000 for imports from sterling area countries other than the U K., the principal items of which were £8,000,000 for jute sacking and £3,500,000 for rubber.

Financial Remittances. Although no formal provision was made in the agreement itself for the resumption of financial remittances from Argentina to the U.K , the Argentine Foreign Minister (Señor Jeronimo Remorino) stated in an appended letter that his Government intended "to permit, during the period of this agreement, exceptionally and on a limited scale, financial remittances to residents of the Scheduled Territories" (i e the sterling area) The British Economic Secretary to the Treasury (then Mr Maudling) explained in the House of Commons on March 31 that it was expected that about £1,500,000 of arrears of interest, profits, dividends, and other income would be transferred by June 30, 1956, and that this figure included remittances in respect of pensions, which had been the subject of arrangements with the Argentine Government over the past three years outside the scope of the discussions on trade and payments The Argentine Government, he said, had also agreed to transfer before July 31 next the funds required for settlement of the sums due to sterling area holders of the 4½ per cent Province of Buenos Aires Loan of 1910

Trade Exchanges. The two Governments agreed to "use their best endeavours, within the limits of the powers which they normally exercise in these matters, to facilitate trade" in accordance with the agreed estimates for the various categories of goods, though this undertaking was subject, in the case of Argentina, to sterling being available. A new feature of the agreement concerned Argentine imports of British capital goods on deferred payment terms. It was estimated that, with the help of the normal facilities available to U.K. exporters, including those of the Export Credits Guarantee Department, orders up to a value of £25,000,000 might be placed during the term of the agreement, and that payments by Argentina for such goods during the first year would amount to £4,300,000. In an appended letter to the agreement, the British Ambassador stated that "there is every reason to expect that U.K. purchases of Argentine exports will continue to provide ample funds from which to meet such payments" after June 30, 1956.

Payments Arrangements. The agreement renewed the credit and dollar point facilities which had been available since 1951 under the supplementary protocols to the previous agreement (see 11474 C). As regards credit, this meant that whenever the Argentine sterling balance with the Bank of England was insufficient to meet Argentina's commitments to the sterling area, the Argentine Government could make drawings up to £20,000,000; any advances outstanding at June 30, 1956, were to be repaid by Dec 31, 1956.

Shipping. The agreement also contained a clause on shipping, under which the two Governments undertook to refrain from discrimination against each other's shipping in Anglo-Argentine trade.

An Anglo-Turkish financial agreement had been signed in London on Jan. 17, 1955, dealing with the settlement of accumulated Turkish sterling debts to U.K. exporters, estimated at £10,000,000 - £12,000,000. The main points of the agreement were:

(1) Turkey undertook to set aside for the liquidation of commercial debts 20 per cent of the sterling earnings derived from her exports of certain products to the U.K., and 50 per cent of her sterling earnings derived from certain other "supplementary" exports. The principal products in the first category were raisins (up to 8,000 tons a year), hazel-nuts (up to 4,000 tons a year) and dried figs, whilst those in the "supplementary" category included wheat, cotton, copper and chrome. Turkey also agreed to set aside for the liquidation of the arrears 50 per cent of the sterling earnings derived from exports of raisins in excess of 8,000 tons and of hazel-nuts in excess of 4,000 tons per year.

(2) If the sterling transfers mentioned above fell below certain levels, Turkey would set aside, as a minimum amount, £1,500,000 for each of the years 1955 and 1956 and £2,500,000 for each of the three succeeding years.

(3) Turkey agreed to take all possible steps to encourage the flow of Turkish exports to Britain at world prices. Although all Turkish products imported into Britain had already been restored to private trading and almost all freed from import restrictions, the British Government agreed to help in the expansion of such imports through commercial channels.

(4) Payments to U K. creditors would be made in chronological order of the registration by the Turkish Central Bank of applications by Turkish importers for authorization for the transfer of sterling (Under a separate exchange of letters, however, it was provided that British exporters who had been responsible for the promotion of substantial "supplementary" exports of Turkish products might be paid out of turn.)

(5) The agreement would remain in force until all outstanding transfers had been made. The two Governments would meanwhile consult if it appeared to them at any time that the agreement was not working in such a way as to result in the settlement of the outstanding transfers within five years of the date of signature.

Details of the principal trade and payments agreements concluded by Britain during 1954 are given below.

Western Germany. An agreement (in the form of an "agreed minute") on Anglo-German trade in goods still subject to quota restrictions was signed in Bonn on Dec 22. Although no details were published officially, it was reported in the Press that Germany had sought and obtained an increase of about £500,000 in the value of German exports to Britain subject to quota, covering principally optical (including photographic) equipment, chemicals, and electrical and fine mechanical goods

Hungary. Following negotiations in London, the Treasury announced on Aug. 19 that an Anglo-Hungarian trade agreement had been concluded covering the 12 months from Sept. 1, 1954. Quotas for U K. exports to Hungary (mainly wool tops, rayon yarns, pharmaceuticals, machinery, vehicles, tinplate, and electrical machinery and equipment) had been agreed to an approximate value of £5,000,000, whilst quotas for Hungarian exports to Britain (mainly tomato purée, rice, eggs, canned meat, bristles, and miscellaneous manufactured goods) would amount to approximately £5,500,000.

The Treasury also announced that the Hungarian Government had stated in an exchange of Notes that, owing to the low level of her sterling earnings, Hungary was not yet in a position to make any payment in respect of claims arising out of the nationalization and expropriation of British property in Hungary, or out of the Peace Treaty The Hungarian Government had, however, reaffirmed its intention to settle these claims, and had agreed to begin negotiations for their settlement on or before Sept 1.

Japan. As a result of a review of trade and payments between Japan and the sterling area, held in London in September, it was agreed that the Anglo-Japanese sterling payments agreement and the existing trade arrangements should be extended until March 31, 1955, and that further negotiations should be held before that date A Treasury statement of Oct 1 said that it was estimated that both trade and payments between the sterling area and Japan would achieve a rough balance over the year, though at a rather lower level than had been forecast.

Jordan. The Treasury announced on Dec. 22 that Jordan's balance of payments in 1955 had been considered during the recent Anglo-Jordanian financial discussions (see 14032 C), and that arrangements had been made for meeting her dollar requirements during the year

Poland. Agreement was reached in London on Dec. 22 on Anglo-Polish trade in 1955 (the second year covered by the agreement concluded in November—see 13930 B). Increased quotas were arranged for the importation of certain Polish goods, including wooden manufactures and manufactured foodstuffs, whilst Polish import quotas agreed to gave increased opportunities for the British engineering and motor-vehicle industry, and included new quotas for woollen piece-goods, dyestuffs and paints, domestic electrical appliances, radios, and sports equipment.

Spain. Discussions on Anglo-Spanish trade and payments arrangements for 1955 were held in Madrid from Nov. 29 to Dec. 22 and resulted in agreement on increased trade in both directions as compared with 1954. Spain agreed to maintain the same general arrangements regarding the import of U.K. goods, to continue existing arrangements regarding the transfer of current financial remittances from Spain, and to transfer some of the arrears of financial remittances

Yugoslavia. During discussions on Anglo-Yugoslav trading arrangements for 1954, which concluded on March 2, provision was made for the import from Yugoslavia of metals, miscellaneous goods and foodstuffs, and for the export from Britain of textiles, instruments and equipment in the scientific, medical and photographic fields, communications equipment, rubber manufactures (including tyres and tubes), chemicals and pharmaceuticals, vehicles and machinery of all types.

Anglo-Finnish talks on trade during 1955 were held in London on Jan. 4-14. It was estimated that Finnish exports to the U.K. would increase by about 10 per cent as compared with 1954 and reach in volume the highest level since the war. Import licences would be issued by Finland in 1955 for all goods traditionally imported from the U.K. at least as liberally as in 1954, without special quotas, and if Finland's sterling earnings continued to increase she would permit at least proportionate increases in imports of U.K. goods; it was "particularly likely" that Finland would be able to import more agricultural and other machinery, and tractors and other vehicles.

(Treasury Press Office - Board of Trade Journal - Financial Times - Bank of London and South America, Fortnightly Review) **(Prev. rep. 13930 B; 13471 A; 13427 A; 12882 B.)**

MAY 7—14, 1955

A. BANDUNG CONFERENCE. — Conference of Asian and African States. - Resolutions on Economic and Cultural Co-operation, Human Rights and Self-determination, Problems of Dependent Peoples, and World Peace. - Agreement on Status of Chinese Community in Indonesia. - Mr. Chou En-lai's Proposals for Negotiations on Formosa. - Agreement between North Vietnam and Laos.

The conference of Asian and African States organized by the five Colombo Powers opened at Bandung (Indonesia) on April 18, and was attended by representatives of all the 25 countries invited except the Central African Federation.

The leaders of the various delegations were *Afghanistan*, Sardar Mohammed Naim Khan (Deputy Premier and Foreign Minister), *Burma*, U Nu (Prime Minister); *Cambodia*, Prince Norodom Sihanouk (the ex-King), *Ceylon*, Sir John Kotelawala (Prime Minister), *China*, Mr Chou En-lai (Prime Minister), *Egypt*, Colonel Nasser (Prime Minister), *Ethiopia*, Mr Y Deressa (Ambassador in Washington); *Gold Coast*, Mr. Kojo Botsio (Minister of State), *India*, Mr Nehru (Prime Minister); *Indonesia*, Dr Sastroamidjojo (Prime Minister), *Iraq*, Dr. Jamali (the former Prime Minister), *Japan*, Mr Takasaki (Director-General of the Economic Deliberations Board), *Jordan*, Mr Wahid Salah (Foreign Minister); *Laos*, M Katay Sasorith (Prime Minister); *Lebanon*, M Sami Solh (Prime Minister), *Liberia*, Mr Dukuly (Secretary of State); *Libya*, Mahmud Bey Muntasser (Ambassador in London), *Nepal*, Major-General Thapa (Foreign Minister), *Pakistan*, Mr Mohammed Ali (Prime Minister), *Persia*, Dr Ali Amin (Finance Minister), *Philippines*, General Romulo (the former Foreign Minister, and an ex-President of the U N General Assembly); *Saudi Arabia*, Emir Feisal (Prime Minister); *Siam*, Prince Wan Waithayakon (Foreign Minister), *Sudan*, Mr Azhari (Prime Minister), *Syria*, M Khaled el-Azem (Foreign Minister), *Turkey*, M Fatin Rustu Zorlu (Deputy Premier), *North Vietnam*, M Pham Van-Dong (Foreign Minister), *South Vietnam*, M Nguyen Van-Thoai (Minister of Planning), *Yemen*, Emir Seif el-Islam el Hassan (Prime Minister) The South Vietnamese Premier, M Ngo Dinh-Diem, who had originally intended to be present, did not attend the conference in view of the political crisis in Saigon

Unofficial observers who attended the conference included Archbishop Makarios of Cyprus (leader of the *Enosis* movement); the ex-Mufti of Jerusalem; Mr. A. D. Powell (a Negro, and Democratic member for New York in the U.S. House of Representatives); and spokesmen for the African National Congress. In view of the large number of observers, it was decided that none of them should be allowed to address the conference.

Opening Statements.

The conference was opened on April 18 by President Sukarno of Indonesia, after which Dr. Sastroamidjojo was unanimously elected chairman. The first two days were devoted to general statements by the leaders of the delegations, the most important of which are summarized below.

President Sukarno observed in his opening speech that "this is the first inter-continental conference of the so-called coloured peoples in the history of mankind," and referred to the great diversity of religious and political systems represented, which he attributed to the fact that Africa and Asia were the birthplaces of religions and ideas which had spread throughout the world The nations participating, however, were united by more important things than their superficial divisions, and notably by a common detestation of colonialism. Declaring that Asians and Africans should not be deceived by the claim that colonialism was dead, President Sukarno continued. "Do not think of colonialism only in the classic form which we of Indonesia and our brothers in different parts of Asia and Africa know. Colonialism has also its modern dress, in the form of economic control, intellectual control, and actual physical control by a small but alien community within a nation. It is a skilful and determined enemy, and it appears in many guises. Wherever, whenever, and however it appears, colonialism is an evil thing, and one which must be eradicated from the earth." The conference, he pointed out, represented more than half the earth's population, and they had to demonstrate to the minority living in other continents that the majority worked for peace and not for war The part played by the Colombo Powers in negotiating the armistice in Indo-China, when "the people of Asia raised their voices and the world listened," had already shown their power, and the 1,400,000,000 people represented at the conference must "inject a voice of reason into world affairs, where others depend on power politics and jet bombers."

Dr. Sastroamidjojo (Indonesia) denied that the conference was intended "to create another source of tension by constituting an anti-Western and even an anti-White bloc," and said that the foremost reason for calling it was "the antagonizing tension from which the world is suffering today." When they said they wanted peace they did not mean "an uneasy balance of power used as a deterrent to war," "the cold war as the only alternative to a hot war," or "the state of affairs where one Power more formidable than all others would be able to dominate the rest of the world, thus imposing its will and dictating its own conception of peace." "We don't want any domination either by force or by ideology," he continued, "no matter from whatever quarter it may come . . . We have to give the world faith, in which alone humanity can prosper without fear or suspicion. The prerequisite of this is willingness and determination to live in neighbourly fashion together, irrespective of each other's political, social, or religious ideologies, on principles of mutual respect for each other's national sovereignty and territorial integrity, abhorrence of aggression, non-interference in each other's internal affairs equality, and mutual benefit"

After reiterating President Sukarno's denunciation of colonialism, and condemning all forms of racialism, colour bars, and *apartheid*, Dr. Sastroamidjojo referred to the low standard of living in practically all Asian and African countries, and emphasized the need for increased co-operation between them in both the economic and cultural fields. The civilizations of Asia and Africa, he suggested, had lost their impact on international affairs because they had concentrated on spiritual at the expense of material matters They had since learned the importance of technology, but they also wished to keep their valuable cultural heritage, and to give it new life and expression in conformity with the requirements of the modern world "We have to face the birth of an atomic age," he concluded, "with a new spirit, new ideologies, and a new universal morality, which should form the basis of peaceful and brotherly intercourse between nations all over the world"

Sir John Kotelawala (Ceylon) observed that none of the Asian and African countries manufactured nuclear weapons and that most of them were ill-equipped even with conventional weapons, whereas when the great Western Powers talked peace their chances of agreement were weakened by the fact that each suspected the other's strength He therefore urged that the nations represented at the conference, comprising some two-thirds of the world's population, should formally offer their services as mediators between "the giants of Communism and anti-Communism" He was confident that among them could be found a group acceptable to both parties, and capable as an impartial intermediary of working out a plan for peace and creating a suitable machinery to implement it, and that to such a group they could delegate the authority to speak on behalf of Afro-Asia as a whole. When in a few months' time the U N. Charter came up for revision, they should demand that the U N should be reconstructed so that it could be an effective instrument of peace, not merely a forum for the wrangling of opposed Power groups, and a fully representative organ of the peoples of the world in which all nations could meet on equal terms In particular, they should demand the abolition of the veto, and the conversion of the Security Council into a fully elected body responsible to the General Assembly

Colonel Nasser (Egypt) laid down two pre-requisites for world peace—non-interference in other nations' affairs, and the right of all nations to choose their own political and economic systems He criticized French policy in North Africa as not conducive to peace and international co-operation, and demanded that members of the U.N. should obey its Charter. **Dr. Jamali** (Iraq) denounced "Colonialism, Zionism, and Communism" as the three international forces disturbing world peace, called upon the conference to brand Israel as "an illegitimate State and an aggressor", and declared that Communism had "subjected races in Asia and Eastern Europe on a much larger scale than the colonial Powers."

Mr. Mohammed Ali (Pakistan) suggested seven principles as a basis for world peace: (1) respect for the sovereignty and territorial integrity of all nations; (2) recognition of the equality of all independent and sovereign nations; (3) abstention from interference in the internal affairs of one country by another, (4) non-aggression against the territorial integrity or political independence of any country; (5) the right of self-defence, exercised singly or collectively; (6) the right of self-determination of all peoples, and resistance to colonial exploitation in any form; (7) settlement of all disputes by peaceful means such as negotiation, mediation, or arbitration Supporting Sir John Kotelawala's appeal for organizational changes in the U N., he advocated the admission of all eligible independent countries which had applied for membership, and an increase in the number of non-permanent seats in the Security Council, so as to ensure proper representation for Asian and African countries.

General Romulo (Philippines), whilst criticizing the U.S.A. for lacking "consistency and vigour" in upholding the rights of non-self-governing peoples, emphasized that the U S A. had "fully and honourably" redeemed its pledge of independence for the Philippines. He went on to condemn both racialism and the unwillingness of the Western countries to go far enough in condemning racial discrimination in South Africa, and appealed to the conference not to promote prejudice against Whites as such but rather to combat racial and other prejudices among themselves In conclusion he attacked Communism as "inherently expansionist," declaring that the Afro-Asian countries should not "fight to regain our manhood from Western colonial rulers only to surrender it to rulers among ourselves who seize power to keep us enslaved."

M. Sami Solh (Lebanon) said that there were three obstacles impeding human brotherhood: fanaticism, excessive nationalism, and hatred of foreigners. **Mr. Takasaki** (Japan) claimed that the Japanese people were now "completely dedicated to peace," and that, as the only people who had experienced the horrors of atomic bombs, they had "no illusions whatever about the enormity of an an attempt to solve international disputes by force." Japan, he added, was anxious to contribute both to peace and to economic co-operation for the common prosperity of the Afro-Asian region, which needed the spread of modern science and technology. **Prince Wan Waithayakon** (Siam) asked what was China's attitude towards "the so-called persons of dual nationality in Siam," where there was a Chinese community of 3,000,000 in a total population of 8,000,000. He alleged that the former Siamese Premier, Nai Pridi Panomyong, was supervising the training of Thais and Thai-speaking Chinese in Yunnan (China) for eventual "infiltration and subversion" in Siam.

Mr. Chou En-lai (China), in a conciliatory speech which made a favourable impression on the conference, said that the Chinese delegation had come "to seek common ground and not to create divergence." Denying that China had any intention of subverting neighbouring countries, he said that, on the contrary, China was "suffering from subversive activities by the U.S.A.", quoting as an example the activities of Kuomintang troops on the Sino-Burmese border. Any of the delegates, he added, were welcome to visit China at any time to confirm this fact, as there was no "bamboo curtain" around his country. He accused the U.S.A. of being the sole country creating tension in the Formosa area, and said that although the liberation of Formosa was "entirely the internal affair of the Chinese people", his Government was ready to adopt the Soviet proposal for an international conference on the subject. China had not brought this question or that of her representation in the U.N. before the conference, he explained, because she did not wish to raise controversial matters.

Continuing, Chou En-lai said that the problem of dual nationality was "something left behind by the old China," and stated that his Government was willing to discuss the question with any of the countries concerned. As for the "autonomous Thai movement" to which Prince Wan had referred, he denied that this was a threat to neighbouring countries, and said that the 10,000,000 Thais in Yunnan were one of China's many races and had been granted autonomy like all other national minorities.

The courses which the peoples of Asia and Africa had taken in striving for freedom and independence might vary, Mr. Chou En-lai continued, but their will to win and preserve their freedom was the same, and it was necessary for most of them to eliminate the backwardness caused by colonial rule. Countries outside Asia and Africa were establishing more and more military bases in Asian and African countries, and were making preparations for atomic war. The peoples of Asia, who would never forget that the first atomic bomb had exploded on Asian soil and that the first man to die from an experimental hydrogen bomb explosion was an Asian, could not be indifferent to this threat. "Although our demand for political independence does not mean a policy of exclusion towards countries outside the Asian-African region," he concluded, "the days when the Western Powers controlled our destiny are past."

Mr. Zorlu (Turkey) emphasized the need for co-operation and unity among free nations in the face of the threat of aggression, and gave a warning against the danger of a "middle-of-the-road" policy. If Asian countries were to exercise influence upon others in the interests of peace, their first duty, in which they unfortunately lagged behind, was to keep their own continent free from violence and aggression.

Proceedings of Committees.

The conference adopted the following agenda on April 18: (1) economic co-operation; (2) cultural co-operation, (3) human rights and self-determination; (4) problems of dependent peoples; (5) promotion of world peace and international co-operation. In order to deal with this agenda, political, economic and cultural committees were formed, four days (April 20-23) being given up to their discussions. It was agreed that each committee's report would have to be approved unanimously, and not by a majority vote.

During the discussions in the committees, and especially in the political committee, a cleavage became apparent between the pro-Western and anti-Communist group, led by Turkey, Pakistan, and Iraq, and the neutralist and Communist group, led by India, China, and Egypt. The first group comprised Ceylon, the Gold Coast, Iraq, Japan, Jordan, Lebanon, Liberia, Libya, Pakistan, Persia, the Philippines, Siam, the Sudan, Turkey, and South Vietnam, whilst the second comprised Afghanistan, Burma, Cambodia, China, Egypt, Ethiopia, India, Indonesia, Laos, Nepal, Saudi Arabia, Syria, North Vietnam, and Yemen. Notable features of this division were (*a*) the split among the Colombo Powers, Pakistan and Ceylon supporting the pro-Western and India, Burma, and Indonesia the neutralist group; (*b*) a similar split among the Arab League countries, Iraq, Jordan, Lebanon, and Libya supporting the pro-Western and Egypt, Saudi Arabia, Syria, and Yemen the neutralist group; and (*c*) the unexpected adherence of Cambodia and Laos to the neutralist group, under the influence of Mr. Nehru and of assurances given by Mr. Chou En-lai.

Political Committee.

At the Political Committee's first meeting, it was unanimously decided to accept the statement of human rights set forth in the U.N. Charter as a basis for discussion. This decision was taken after some opposition by **Mr. Chou En-lai**, who pointed out that the Chinese People's Republic was not a member of the U.N., and by **Mr. Nehru**, who added that several of the countries represented were not members of the U.N. Organization. A resolution on Palestine moved by Pakistan and the Arab States received strong support from **Mr. Chou En-lai**; **Mr. Nehru**, however, whilst condemning Zionism as "an aggressive movement," appealed to the conference to try to understand the forces behind it, and suggested that "the question of negotiation should not be ruled out."

When discussion of the resolution was resumed on April 21 **Mr. Chou En-lai** compared the Palestine question to that of Formosa, and maintained that it could be settled when the outside factors responsible for the "Palestine tragedy" disappeared. The Arab resolution was approved, as were others on Western New Guinea, French North Africa, and racial discrimination (see below).

During the discussion on dependent peoples **Sir John Kotelawala** made a strong attack on "Soviet colonialism," referring to the "satellite States under Communist domination in Central and Eastern Europe," and demanding that the conference should declare its opposition "to Soviet colonialism as much as to Western imperialism." He also proposed that the conference should call upon all Powers with colonies to grant them autonomy within the next 10 years, except in very special circumstances. In a statement circulated to the Press on the same day, Sir John denounced local Communist parties as "agents of the great Communist Powers," demanded the dissolution of the Cominform, and proposed that as a "reassuring gesture" China should publicly call upon all Communist groups throughout Asia and Africa to disband. On April 22, however, Sir John withdrew his motion, stating that he did not wish to disturb the harmony of the conference.

Mr. Nehru observed that if they were to include Eastern Europe within the conference's purview, all forms of imperialism would have to be considered, thus the question of Guatemala might be raised, and they would have to discuss certain forms of coercion and pressure in Asian and African countries. **Mr. Mohammed Ali**, **Mr. Zorlu**, and **General Romulo**, however, insisted on introducing a resolution condemning "all types of colonialism, including international doctrines resorting to the methods of force, infiltration, and subversion." This resolution was supported by the delegates of Persia, Iraq, Liberia, Lebanon, Libya, and the Sudan.

Mr. Chou En-lai, in a brief reply to Sir John Kotelawala's speech, said that although the delegates had different views on the interpretation of the word "colonialism" they were all agreed on its generally accepted definition. He suggested that the colonial Powers should be asked to give their Asian and African colonies freedom within 15 years. If some countries wished their particular grievances to be included in the resolution, he added, China's grievances should also be incorporated, such as Formosa and "foreign attempts to subvert us." The resolution was finally referred to a sub-committee.

On the question of world peace several resolutions were submitted. **U Nu** proposed a resolution based on the five principles of peaceful co-existence, with the addition of clauses on human rights and the principles of the U.N. Charter; **Mr. Mohammed Ali** put forward the "seven pillars of peace" formulated in his speech of April 19; and **Mr. Nehru** submitted a resolution appealing to the great Powers not to test or use atomic or thermo-nuclear weapons and to stop producing them. **Sir John Kotelawala** proposed (1) a convention for controlling conventional armaments and banning the production, possession, and use of nuclear weapons, (2) pending such a convention, an immediate arms truce and an agreement to end nuclear test explosions, (3) the reorganization of the U.N., and the admission of all sovereign countries to membership.

After **Mr. Zorlu** had defended Turkey's participation in the NATO, which he described as "a bulwark of peace," on the ground that it was necessary for her survival, **Mr. Nehru** made his first major speech at the conference, which produced a deep impression. Mr. Zorlu, he said, had put one side of the case, but probably an equally good case could be put against NATO. India was not on the side of any Power bloc, and was neither Communist nor anti-Communist, she considered that both sides were wrong and that their policies would lead to war. Maintaining that every military pact added to the insecurity of the world, Mr. Nehru denounced the clause in Mr. Mohammed Ali's resolution on collective self-defence as "merely a cover of words to make military pacts acceptable," and declared that it was "an intolerable humiliation for an Afro-Asian country to degrade itself as a camp follower of one or the other side." NATO, he said, was in fact "one of the most powerful protectors of colonialism" and was showing "gross impertinence" in supporting Portugal over the question of Goa. The grave situation in the China Sea might lead to war, and it was within the power of the Asian and African peoples to tilt the balance in favour of peace. Advocating support for U Nu's resolution, he observed that it did not even contain the word "co-existence," and asked why some delegations should object to this word as propaganda when President Eisenhower himself had used it more than once.

Mr. Chou En-lai on April 23 submitted a resolution on world peace containing the following points: (1) respect for the sovereignty and territorial integrity of all countries; (2) abstention from aggression, military threats, and interference in other countries' internal affairs; (3) recognition of the equality of all nations and races; (4) respect for the right of peoples to choose freely their own way of life and their political and economic systems, (5) settlement of international disputes by peaceful means; (6) support for all efforts to promote peace; (7) an immediate arms truce among all countries. If there were objections to the use of the word "co-existence," he suggested, they could use the phrase of the U.N. Charter, "living together in peace." He invited representatives of Cambodia, Laos, Burma, Siam, and the Philippines to inspect China's frontiers and to see for themselves that neither aggression nor subversion was being planned against their countries. At the same time he gave Laos and Cambodia an assurance that China had no expansionist intentions against them. Mr. Chou En-lai also observed that Mr. Nehru had informed him that Sir Anthony Eden was agreeable to the five principles of peaceful co-existence, and said that if this were true he would be "happy to sign a common declaration with him."

Mr. Nehru denounced both SEATO and the Cominform as dangerous to peace, and said he was surprised at the timing of the Manila Pact, which he described as "an angry reaction" to the success of the Geneva Conference. The fact that at Geneva the great Powers had agreed that the Indo-Chinese States should not align themselves with any Power bloc showed that non-alignment was the way of

peace. He also criticized Sir Winston Churchill's phrase "peace through strength," which, he said, had resulted in strength being underlined but not peace

On the final day of the conference (April 24) a compromise was reached on the resolution on problems of dependent peoples, which condemned "colonialism in all its manifestations" A similar compromise was reached on the resolution on world peace, which approved collective defence agreements in conformity with the U.N Charter, provided that such agreements did not serve the particular interests of any of the big Powers and were not used as a means of pressure on other countries

Economic and Cultural Committees.

The proceedings of the Economic and Cultural Committees were of a less controversial nature. At the meeting of the former on April 20, however, an Indonesian resolution in favour of the lifting of the embargo on trade with China imposed during the Korean war was dropped as a result of opposition by Turkey, the Philippines, and Siam

Final Statements.

At the final plenary session on April 24 statements were made, among others, by Mr. Chou En-lai and Mr. Nehru.

Mr. Chou En-lai repeated his proposal of the previous day (see below) that "China and the United States should sit down and enter into negotiations to settle the question of relaxing tension in the Formosa area," adding that "this should not affect in the slightest degree the sovereign rights of the people of China in liberating Formosa" He also appealed for talks aimed at a permanent peace in Indo-China, and for a speedy and peaceful reunion of Korea by the parties concerned.

Mr. Nehru, after observing that the conference had achieved considerable success, said that "we want to be friends with Europe and America and co-operate with them, but they are in the habit of thinking that their quarrels are world quarrels, and that therefore the world must follow them this way or that. Why should we be dragged into their quarrels and wars?" he demanded "I hope we shall keep away" He would like Australia and New Zealand, which did not belong to Europe and much less to America, to come nearer to Asia He added that there was "nothing more terrible and horrible than the infinite tragedy of Africa," dating from the time of the slave trade, and that it was "up to Asia to help Africa to the best of her ability, because we are sister continents" "We have made some history here," he concluded, "and must live up to what the world expects of us."

Resolutions of the Bandung Conference.

The final communiqué issued by the conference was worded as follows:

Resolution on Economic Co-operation.

"(1) The conference recognized the urgency of promoting economic development in the Asian-African region There was general desire for economic co-operation among the participating countries on the basis of mutual interest and respect for national sovereignty The proposals with regard to economic co-operation within the participating countries do not preclude either the desirability or the need for co-operation with countries outside the region, including the investment of foreign capital It was further recognized that assistance being received by certain participating countries from outside the region through international or under bilateral arrangements had made a valuable contribution to the implementation of their development programmes

(2) The participating countries agree to provide technical assistance to one another, to the maximum extent practicable, in the form of experts, trainees, pilot projects, equipment for demonstration purposes, exchange of know-how, and the establishment of national and—where possible—regional training and research institutes for imparting technical knowledge and skills, in co-operation with the existing international agencies.

(3) The conference recommended: (*a*) the early establishment of a special U N fund for economic development; (*b*) the allocation by the International Bank of a greater part of its resources to Asian-African countries, (*c*) the early establishment of an International Finance Corporation, which should include in its activities the undertaking of equity investment, and (*d*) encouragement of the promotion of joint ventures among Asian-African countries in so far as this will promote their common interest

(4) The Asian-African conference recognized the vital need for stabilizing commodity trade in the region. The principle of enlarging the scope of multilateral trade and payments was accepted. However, it was recognized that some countries would have to take recourse to bilateral trade arrangements in view of their prevailing economic conditions.

(5) The conference recommended that collective action be taken by participating countries for stabilizing international prices of and demand for primary commodities through bilateral and multilateral arrangements, and that as far as practicable and desirable they should adopt a unified approach on the subject in U.N. and other international forums.

(6) The Asian-African conference further recommended that Asian-African countries should diversify their export trade by processing their raw materials whenever economically feasible before export; that intra-regional trade fairs should be promoted, and encouragement given to the exchange of trade delegations and groups of businessmen; that exchanges of information and of samples should be encouraged with a view to promoting intra-regional trade; and that normal facilities should be provided for the transit trade of landlocked countries.

(7) The conference attached considerable importance to shipping, and expressed concern that shipping lines reviewed from time to time their freight rates often to the detriment of participating countries It recommended a study of this problem and collective action thereafter to put pressure on the shipping lines to adopt a more reasonable attitude

(8) The conference agreed that encouragement should be given to the establishment of national and regional banks and insurance companies.

(9) The conference felt that exchange of information on matters relating to oil, such as remittance of profits and taxation, might finally lead to the formulation of a common policy

(10) The conference emphasized the particular significance of the development of nuclear energy for peaceful purposes for Asian-African countries It (*a*) welcomed the initiative of the Powers principally concerned in offering to make available information regarding the use of atomic energy for peaceful purposes; (*b*) urged the speedy establishment of an International Atomic Energy Agency which should provide for adequate representation of the Asian-African countries on the executive authority of the agency, and (*c*) recommended that Asian and African governments take full advantage of the training and other facilities in the peaceful uses of atomic energy offered by the countries sponsoring such programmes.

(11) The conference agreed to the appointment of liaison officers in participating countries, to be nominated by their respective national governments, for the exchange of information and matters of mutual interest It recommended that fuller use should be made of the existing international organizations, and that participating countries who were not members of such international organizations but were eligible should secure membership

(12) The conference recommended that there should be prior consultation of participating countries in international forums with a view, as far as possible, to furthering their mutual economic interest. It is, however, not intended to form a regional bloc."

Resolution on Cultural Co-operation

"(1) The conference was convinced that among the most powerful means of promoting understanding among nations is the development of cultural co-operation Asia and Africa have been the cradle of great religions and civilizations which have enriched other cultures and civilizations, while themselves being enriched in the process. Thus the cultures of Asia and Africa are based on spiritual and universal foundations Unfortunately, cultural contacts among Asian and African countries were interrupted during past centuries. The people of Asia and Africa are now animated by a sincere desire to renew their old cultural contacts and develop new ones in the context of the modern world All participating governments reiterated their declaration to work for closer cultural co-operation

(2) The conference took note of the fact that the existence of colonialism in many parts of Asia and Africa, in whatever form it may be, not only prevents cultural co-operation but also suppresses the national cultures of the peoples Some Colonial Powers have denied their dependent peoples basic rights in the sphere of education and culture, which hampers the development of their personality and also prevents cultural intercourse with other Asian and African peoples. This is particularly true in the case of Tunisia, Algeria and Morocco, where the basic right of the people to study their own language and culture has been suppressed Similar discrimination has been practised against African and Coloured people in some parts of the Continent of Africa The conference felt that these policies amount to a denial of the fundamental rights of man, impede cultural advancement in this region, and also hamper cultural co-operation on the wide international plane The conference condemned such a denial of fundamental rights in the sphere of education and culture in some parts of Asia and Africa by this and other forms of cultural suppression In particular, it condemned racialism as a means of cultural suppression.

(3) True to the age-old tradition of tolerance and universality, the conference believed that Asian and African cultural co-operation should be developed in the larger context of world co-operation. Side by side with the development of Asian-African cultural co-operation, the countries of Asia and Africa desire to develop cultural contacts with others. This would enrich their own culture and would also help in the promotion of world peace and understanding.

(4) There are many countries in Asia and Africa which have not yet been able to develop their educational, scientific and technical institutions. The conference recommended that countries in Asia and Africa which are more fortunately placed in this respect should give facilities for the admission of students and trainees from such countries to their institutions. Such facilities should also be made available to the Asian and African people in Africa, to whom opportunities for acquiring higher education are at present denied.

(5) The conference felt that the promotion of cultural co-operation among countries of Asia and Africa should be directed towards: (*a*) the acquisition of knowledge of each other's countries, (*b*) mutual cultural exchanges; and (*c*) exchange of information.

(6) The conference was of the opinion that at this stage the best results in cultural co-operation would be achieved by pursuing bilateral arrangements to implement its recommendations, and by each country taking action on its own wherever possible and feasible."

Resolution on Human Rights and Self-Determination.

"(1) The conference declared its full support of the fundamental principles of human rights as set forth in the U.N. Charter, and took note of the Universal Declaration of Human Rights as a common standard of achievement for all peoples and all nations. It declared its full support for the principle of self-determination of peoples and nations as set forth in the U N. Charter, and took note of the U.N. resolutions on the right of peoples and nations to self-determination.

(2) The conference deplored the policies and practices of racial segregation and discrimination which form the basis of government and human relations in large regions of Africa and in other parts of the world. Such conduct is not only a gross violation of human rights but also a denial of the fundamental values of civilization and the dignity of man The conference extended its warm sympathy and support for the courageous stand taken by the victims of racial discrimination, especially by the peoples of African Indian, and Pakistani origin in South Africa, applauded all those who sustained their cause, reaffirmed the determination of Asian-African peoples to eradicate every trace of racialism that might exist in their own countries, and pledged itself to use its full moral influence to guard against the danger of falling victims to the same evil in their struggle to eradicate it

(3) In view of the existing tension in the Middle East caused by the situation in Palestine, and of the danger of that tension to world peace, the conference declared its support of the rights of the Arab people of Palestine, and called for the implementation of the U N resolutions on Palestine and for the peaceful settlement of the Palestine question "

Resolution on Problems of Dependent Peoples.

" (1) The conference, in the context of its expressed attitude on the abolition of colonialism, supported the position of Indonesia in the case of West Irian (Dutch New Guinea) It urged the Netherlands Government to reopen negotiations as soon as possible to implement their obligations under the [Netherlands-Indonesian] agreements and expressed the earnest hope that the United Nations would assist the parties concerned in finding a peaceful solution to the dispute

(2) In view of the unsettled situation in North Africa and of the persistent denial to the peoples of North Africa of their right to self-determination, the conference declared its support of the rights of the people of Algeria, Morocco, and Tunisia to self-determination and independence, and urged the French Government to bring about a peaceful settlement of the issue without delay "

Resolution on World Peace and Co-operation.

" (1) The conference, taking note of the fact that several States have still not been admitted to the United Nations, considered that for effective co-operation for world peace, membership should be universal, and called on the Security Council to support the admission of all those States which are qualified for membership in terms of the Charter. In the opinion of the conference the following countries which were represented in it—Cambodia, Ceylon, Japan, Jordan, Laos, Libya, Nepal, and unified Vietnam—are so qualified.

The conference considered that the representation of the countries of the Asian-African region on the Security Council, in relation to the principle of equitable geographical distribution, was inadequate It expressed the view that, as regards the distribution of the non-permanent seats, the Asian-African countries which, under the arrangement arrived at in London in 1946, are precluded from being elected, should be enabled to serve on the Security Council so that they might make a more effective contribution to the maintenance of international peace and security

(2) The conference, having considered the dangerous situation of international tension existing, and the risks confronting the whole human race, from the outbreak of global war in which the destructive power of all types of armaments, including nuclear and thermo-nuclear weapons, would be employed, invited the attention of all nations to the terrible consequences that would follow if such a war were to break out. It considered that disarmament and the prohibition of the production, experimentation, and use of nuclear and thermo-nuclear weapons are imperative to save mankind from the fear and prospect of wholesale destruction. It considered that the nations of Asia and Africa have a duty towards humanity and civilization to proclaim their support for the prohibition of these weapons, and to appeal to the nations principally concerned and to world opinion to bring about such disarmament and prohibition

The conference considered that effective international control should be established and maintained to implement such prohibition, and that speedy and determined efforts should be made to this end. Pending the total prohibition of the manufacture of nuclear and thermo-nuclear weapons, this conference appealed to all the Powers concerned to reach agreement to suspend experiments wich such weapons.

The conference declared that universal disarmament is an absolute necessity for the preservation of peace; requested the United Nations to continue its efforts; and appealed to all concerned speedily to bring about the regulation, limitation, control and reduction of all armed forces and armaments, including the prohibition of the production, experimentation and use of all weapons of mass destruction, and to establish effective international control to this end

(3) The conference supported the position of the Yemen in the case of Aden and the southern parts of Yemen, known as the protectorates, and urged the parties concerned to arrive at a peaceful settlement of the dispute."

In addition to the four resolutions, the text of which is given above, the conference also adopted a Declaration on the Problems of Dependent Peoples and a Declaration on the Promotion of World Peace and Co-operation. These were as follows:

Declaration on Problems of Dependent Peoples.

" The conference discussed the problems of dependent peoples and colonialism and the evils arising therefrom, and agreed:

(1) In declaring that colonialism in all its manifestations is an evil which should speedily be brought to an end;

(2) In affirming that the subjection of peoples to alien subjugation, domination and exploitation constitutes a denial of fundamental human rights, is contrary to the U N. Charter, and is an impediment to the promotion of world peace and co-operation,

(3) In declaring its support of the cause of freedom and independence for all such peoples; and

(4) In calling upon the Powers concerned to grant freedom and independence to such peoples "

Declaration on World Peace and Co-operation.

" The conference gave anxious thought to the question of world peace and co-operation It viewed with deep concern the present state of international tension, with its danger of an atomic world war The problem of peace is correlative with the problem of international security. In this connexion all States should co-operate, especially through the U N, in bringing about the reduction of armaments and the elimination of nuclear weapons under effective international control In this way international peace can be promoted and nuclear energy used exclusively for peaceful purposes

Freedom and peace are inter-dependent. The right of self-determination must be enjoyed by all peoples, and freedom and independence must be granted with the least possible delay to those peoples who are still dependent All nations should have the right freely to choose their own political and economic systems and their own way of life, in conformity with the purposes and principles of the U N Charter

Free from distrust and fear, and with confidence and goodwill toward each other, nations should practise tolerance, live together in peace with one another as good neighbours, and develop friendly co-operation on the basis of the following principles.

(1) Respect for the fundamental human rights and for the purposes and principles of the U N Charter

(2) Respect for the sovereignty and territorial integrity of all nations

(3) Recognition of the equality of all races and nations, large and small

(4) Abstention from intervention or interference in the internal affairs of other countries

(5) Respect for the right of each nation to defend itself singly or collectively in conformity with the U N Charter

(6) Abstention from the use of arrangements of collective defence to serve the particular interests of any of the big Powers, and abstention by any country from exerting pressure on other countries

(7) Refraining from acts or threats of aggression or the use of force against the territorial integrity or political independence of any country

(8) Settlement of all international disputes by peaceful means such as negotiaton, conciliation, arbitration, or judicial settlement, as well as other peaceful means of the parties' own choice in conformity with the U.N. Charter.

(9) Promotion of mutual interest and co-operation.

(10) Respect for justice and international obligations

The Asian-African conference declared its conviction that friendly co-operation in accordance with these principles would effectively contribute to the maintenance and promotion of international peace and security, whilst co-operation in the economic, social and cultural fields would help bring about the common prosperity and well-being of all.

The conference recommended that the sponsoring countries should consider the next meeting of the conference in consultation with other countries concerned "

The conference provided an opportunity for many private meetings between the participating statesmen on problems of common interest. The most important of these concerned the dual nationality of Chinese living abroad (on which an agreement between China and Indonesia was signed on April 22), the status of Formosa, and the position in Indo-China.

Sino-Indonesian Agreement.

A treaty regulating the status of the Chinese living in Indonesia (estimated to number about 2,500,000) was signed on April 22 by Mr. Chou En-lai and the Indonesian Foreign Minister, Dr. Sunarjo, its provisions being as follows:

(1) All persons over 18, including married women, holding both Chinese and Indonesian citizenship were required to choose between them within two years. Any person failing to do so would automatically be registered as Indonesian or Chinese in accordance with his or her father's descent

(2) Children would acquire their father's citizenship, but would be allowed to choose for themselves on reaching the age of 18

(3) Nationality would not be affected by marriage, unless either party chose his or her spouse's citizenship at the time.

(4) Persons choosing Chinese citizenship would be liable to deportation if considered undesirable, whilst those choosing Indonesian citizenship would not be eligible for the Chinese Government's protection.

Mr. Chou En-lai stated on April 22 that he was aware of other countries' concern over the same problem, and expressed the hope that Chinese living overseas, after making their choice, would " increase their sense of responsibility towards the country whose nationality they have chosen." A joint statement issued on April 28 by Mr. Chou En-lai and Dr. Sastroamidjojo said that both countries accepted the " five principles " of peaceful co-existence, and were living peacefully together as good neighbours on the basis of those principles.

Discussions on Formosa. - Chinese and U.S. Statements.

Proposals for a settlement of the Formosan question were put forward during the conference by Sir John Kotelawala, but failed to win support. These would have provided for the immediate transfer of Matsu and Quemoy islands to China, the withdrawal of the U.S 7th Fleet from the Formosa Strait; the "honourable retirement" of General Chiang Kai-shek, the establishment of a trusteeship over Formosa for five years, under either the U.N. or the Colombo Powers; and the holding of a plebiscite at the end of that period to decide whether Formosa should remain Chinese territory or become independent.

After discussions with the Prime Ministers of the Colombo Powers, and the Siamese and Philippine representatives (Prince Wan Waithayakon and General Romulo), Mr. Chou En-lai issued the following statement on April 23: "The Chinese people are friendly to the American people. They do not want a war with the United States. The Chinese Government is willing to sit down and enter into negotiations with the U.S. Government to discuss the question of relaxing tension in the Far East, especially in the Formosa area."

The U.S. State Department issued the following reply on the same day:

"The United States always welcomes any efforts, if sincere, to bring peace to the world In the Formosa region we have an ally in the free Republic of China and, of course, the U S A would insist on free China participating as an equal in any discussion concerning the area. If Communist China is sincere, there are a number of obvious steps it could take to clear the air considerably and give evidence before the world of its good intentions One of these would be to place in effect in the area an immediate cease-fire. It could also immediately release the American airmen and others whom it unjustly holds Another could be the acceptance of the outstanding invitation by the U N Security Council to participate in discussions to end hostilities in the Formosa region"

The Chinese Nationalist Government subsequently announced that it was not prepared to take part in negotiations. At Bandung the State Department's statement was regarded as disappointing even by the representatives of pro-Western countries such as Turkey, Iraq, Pakistan, and Ceylon, Sir John Kotelawala said that it was "a pity that the United States should have replied to the Chinese offer without thinking," and expressed his confidence in Mr. Chou En-lai's sincerity.

After discussing the Formosan situation with Mr. Chou En-lai on April 25, Mr. Mohammed Ali told the Press that China was still prepared to negotiate, and that Mr. Chou En-lai had proposed a "reasonable" solution to the question of General Chiang Kai-shek's position. He [Mr. Ali] also believed that China would release the imprisoned U.S airmen if the U.S.A. showed herself anxious to bring about a peaceful settlement. Either the Colombo Powers or the members of SEATO, he suggested, should take up the Formosan question, and should discuss first the immediate problem of Quemoy and Matsu and then the admission of China to the U.N., after which the future of Formosa could be settled through the United Nations.

Mr. Dulles, the U.S. Secretary of State, issued the following statement on April 26:

"The Bandung conference, as we had hoped, seems to have exerted a restraint on the Chinese Communists. I have always felt that it would be salutary if the Chinese Communists were confronted with the opinion of the free nations of Asia That opinion was powerfully expressed in favour of peace and against direct and indirect aggression. There seems now a chance that the Communist Chinese may be deterred from pursuing the course of violence which has characterized their action in relation to Korea, to Tibet, to Indo-China, and, more recently, to the Formosa Straits

The Chinese Communists found no backing for their announced programme of seizing Formosa by force. On the contrary, they felt it useful in the last hours of the Bandung conference to propose to negotiate a peaceful settlement. Whether or not that was a sincere proposal remains to be seen Perhaps the Chinese Communists were merely playing a propaganda game But we intend to try to find out In doing so we shall not, of course, depart from the path of fidelity and honour toward our ally, the Republic of China."

Mr. Dulles told a press conference on the same day that the U.S. Government would be prepared to enter into bilateral discussions with the Chinese Communist Government, provided these were confined to the possibility of a cease-fire in the Formosa Strait, but that it would not negotiate on the rights of the Nationalist Government in the latter's absence. An essential question to be answered before discussions could begin was the meaning of Mr. Chou En-lai's statement that China would not renounce her right to "liberate" Formosa; if this meant that China renounced force but not her claim to the island, there could be grounds for a bilateral meeting. The State Department's statement, Mr. Dulles explained, had not put forward the release of the imprisoned airmen and the acceptance of the Security Council's invitation as conditions for the opening of negotiations, but merely as "suggestions."

Discussions on Indo-China.

A series of meetings took place between the Chinese, North Vietnamese, Laotian, and Cambodian representatives, as a result of which M. Pham Van-Dong and M. Katay Sasorith signed an agreement on April 28 whereby M. Sasorith affirmed Laos's adherence to the "five principles" of co-existence, and M. Pham Van-Dong gave an assurance that North Vietnam had no designs on the Laotian provinces controlled by the *Pathet Lao* movement Similar assurances of non-interference were given to Cambodia by M. Pham Van-Dong, and to Laos and Cambodia by Mr. Chou En-lai.—(The Statesman, Calcutta - The Hindu, Madras - Indonesian Embassy, London - Indian and Pakistani High Commissioners' Offices, London - Ceylonese and Burmese Government Information Departments - New York Times - Manchester Guardian) **(Prev. rep. 13977 A.)**

A. UNITED KINGDOM. — Wholesale and Retail Prices. - Movements in First Quarter of 1955.

The movement of wholesale and retail prices in the first quarter of 1955 is shown below:

Wholesale Prices (1930 = 100)	January	February	March
Intermediate products	372 0	374 1	373 9*
Iron and steel	373 4*	375 1*	376 3*
Food and tobacco	315 1	311 4	304 7*
All items	337 5	338 5*	336 0*
Retail Prices (Jan. 15, 1952 = 100)†			
Food	119 2	118 8	118 6
Rent and Rates	113 5	113 7	113 9
Clothing	95 6	96 3	96 3
Fuel and light	114 9	114 8	114 8
Household durable goods	95 3	95 4	95 4
Miscellaneous goods	99 4	99 7	99.7
Services	112.6	112 9	113 2
Alcoholic drink	102 5	102 5	102.5
Tobacco	100.3	100.3	100 3
All items	110 2	110 2	110 2
All items (June 1947 = 100)	146.0	146 0	146.0

* Provisional † At Jan. 18, Feb. 15, and March 15 respectively.

The Board of Trade Basic Materials index in the first quarter (June 1949 = 100) was 149 1 in January, 152.2 in February, and 150 9 in March.—(Board of Trade Journal - Ministry of Labour Gazette) **(Prev. rep. 14065 B.)**

B. UNITED STATES. — Tax Extension Act.

President Eisenhower signed a Bill on March 30 extending company and excise taxes at existing levels for a further year until March 31, 1956. During the Bill's passage through Congress there had been bitter debate over Democratic attempts to cut the personal income tax by $20 per person; a proposal to that effect had been adopted by the House Ways and Means Committee on Feb. 21 and included in the House Bill by the narrow majority of five votes on Feb. 25. In the Senate, however, attempts to include a similar provision were defeated, and the Bill was passed by 50 votes to 44 on March 15 without any amendment granting tax reductions; five Southern Democrats joined 45 Republicans in voting for the measure, 44 Democrats voting against. The House concurred in the Senate version (by 386 votes to 8) on March 30.

C. SPAIN. — U.S.-Spanish Agreement on Modernization of Spanish Fleet.

It was announced in Madrid on May 3 that the United States and Spain had signed an agreement on naval aid designed to give Spain a "substantial modern fleet." The agreement provided for the modernization of about 20 Spanish warships, including destroyers, gunboats, corvettes, and minesweepers, with new armaments, radar, and fire-control equipment. Some of the equipment will be supplied by the United States, whilst the rest will be manufactured in Spain and other European countries The agreement, concluded under the U.S.-Spanish mutual military defence assistance agreement of 1953, gave no estimate of the cost of the modernization programme.

A. UNITED KINGDOM. — Agriculture. - Farm Prices, 1955-56. - Special Additions to 1954-55 Prices. - Other Agricultural Developments.

A White Paper published on March 10 announced the new farm prices and levels of production grants for 1955-56, fixed as a result of the Annual Review in February, and providing for an increase of about £28,000,000 on payments to farmers, including an increase of about £11,500,000 in production grants. The new prices—effective from April 1, except those for cereals and rootcrops—are given below, with prices fixed at the 1954-55 Price Review shown in parentheses :

Livestock and Livestock Prices. *Milk* An average of 3s 1·95d a gallon (3s 1·2d) *Fat Cattle* Steers, heifers, and special young cows, 138s 8d a live cwt (133s 2d) *Fat Sheep and Lambs* 3s 0d an estimated lb deadweight (2s 10½d). *Fat Pigs* 51s. 4d a score deadweight (51s 3d) *Wool* An average of 4s 10½d. a lb , including marketing costs (4s 6d , plus marketing costs of about 4½d a lb)

The price for fat pigs is adjusted from time to time according to the price of feedingstuffs The 1955-56 price was based on a feed price of 32s 5d a cwt , whereas the 1954-55 price was related to a feed price of 29s 10d a cwt , the new price therefore represents a net reduction of 2s 6d a score deadweight.

Cereal and Other Crops (1956 harvest) *Wheat* An average of 29s 9d. a cwt (same) *Barley* 26s a cwt (24s 6d) *Oats* 24s 9d a cwt (23s). *Rye* 23s a cwt. (same) *Potatoes* 217s. a ton (212s 6d). *Sugar Beet* : 128s 1d (125s 7d)

Eggs. An average of 4s. 1½d a doz for hen eggs (4s 0d) ; price for duck eggs unchanged

Production Grants. The following increases were announced *Lime Subsidy* from 50 per cent to 60 per cent (summer grants from 60 per cent to 70) *Ploughing grants* · from £5 and £10 per acre to £7 and £12 *Calf Subsidy* from £5 to £7 10s.

Other Subsidies. A special subsidy of 5s would be paid for 1955 only for hill sheep, and there would also be new subsidy rates for nitrogenous and phosphatic fertilizers, involving additional payments amounting to £3,500,000 on the basis of 1954-55 consumption

After stressing that farming results in 1955-56 would largely depend on the industry's success in reducing its unit costs of production, the White Paper explained that the Government's aim had been to help it make good the effects of the past year's exceptional difficulties, and to continue its efficient development.

For 1954-55 it estimated farmers' income at about £280,000,000, compared with £320,500,000 in 1953-54, the reduction reflecting the adverse weather conditions last year, when output was estimated at only 53 per cent above pre-war, compared with 55 per cent in 1953-54 But for the weather net output would have been higher than in the previous year, as the increase in the output of pigs and cattle had more than offset a decline in the acreage under crops, whilst production of eggs and milk was also estimated to have increased slightly. When adjusted for weather conditions, (i e if normal weather had prevailed), estimated net farm income in 1954-55 would have been £312,000,000, the comparable figure for 1953-54 being £306,500,000.

For 1955-56 the White Paper estimated that the increase in farmers' production costs would amount to £25,000,000 for commodities covered by the review and £30,000,000 for all commodities It considered that, given normal weather, these increases could be offset by continued improvement in the industry's efficiency, but gave a warning that the effects of the past season's exceptionally bad weather must be expected to continue well into 1955-56.

As regards future policy, the White Paper stressed that the downward trend in some market prices in 1954-55 had meant that the cost of the support given to agriculture had continued to be high—approaching £250,000,000 The Government were particularly concerned about the high level of support required for pig production at current price levels, and would have to look for further reduction of Exchequer liability in the future. Their general production policy, however, remained unchanged, and they reaffirmed their view that in free market conditions it was neither practicable nor desirable to set precise production targets for individual commodities They continued to look to an increase in the industry's net output by means of more beef, mutton, and lamb , a further steady improvement in crop yields , and a saving of feedingstuff imports through more ley farming, improved management and use of grass, and skill and economy in the use of concentrated feedingstuffs.

On Feb. 12, 1955, the Minister of Food, Agriculture and Fisheries (Mr. Heathcoat-Amory) had announced the Government's decision to recoup farmers fully for the recent increase in agricultural wages (see 13985 A) by raising the payments made for farm produce. As a result of a special review asked for by the National Farmers' Unions, additions would be made uniformly throughout the United Kingdom to guarantee prices (*a*) for crops of the 1955 harvest, to take account of increased costs over a full year , (*b*) for livestock and livestock products, to cover the higher costs over the remainder of the current livestock year.

The agreed additions were announced as follows (new guaranteed prices in parentheses) :

Crops of the 1955 Harvest. *Wheat, Rye, and Oats* · 3d per cwt. (30s., 23s 3d 23s 3d. respectively) *Barley* · 2d per cwt (24s 8d) *Potatoes* 3s 4d. a ton (215s. 10s) *Sugar Beet* 2s per ton (127s 10d)

Livestock and Livestock Products. *Milk* £587,000 (equal to about 0.83d per gallon on estimated sales during March) would be paid to marketing authorities who would make payments to producers in respect of whatever quantities and periods they thought most appropriate *Eggs* For first quality hen and duck eggs sold through packing establishments, ½d per doz above average support prices. *Wool* : The British Wool Marketing Board would draw £51,000 from the special account for allocation to producers *Fatstock* : The following additions would be made (*a*) for the four weeks ending March 27 to existing standard prices, and (*b*) for the subsequent two four-weekly periods to the standard prices as determined after the annual price review (see above) . 1s 10½d a live cwt for fat cattle , 0·66d. a lb for fat sheep and lambs , and 2·66d a score for fat pigs.

Other recent developments in connexion with agriculture are summarized below .

Minimum Prices for Livestock Products, 1956-57 and 1957-58. Mr. Heathcoat-Amory announced on Dec 21, 1954, the minimum prices (below which farmers' remuneration would not be allowed to fall) for livestock products in the above two years These were ·

Commodity	1956-57 s.	1956-57 d	1957-58 s	1957-58 d
Milk, per gallon .	2	6	2	5
Fat cattle, per live cwt .	113	6	113	6
Fat sheep and lambs, per lb deadweight .	2	3	2	2
*Fat pigs, per score deadweight . .	41	0	38	0
*Hen eggs, per doz .. .	3	3	3	1
*Duck eggs, per doz	2	10	1	8
Wool per lb (greasy basis)	3	0	3	0

* Prices subject to a sliding scale related to feedingstuffs prices.

N.F.U.'s Voluntary Livestock Marketing Scheme. The three National Farmers' Unions (for England and Wales, Scotland, and Northern Ireland) announced on Oct 22, 1954, that after reviewing developments in fatstock marketing since the decontrol and derationing of meat, they had decided to withdraw their voluntary marketing schemes for fatstock

Pig and Bacon Marketing. Mr Heathcoat-Amory announced in the House of Commons on March 11, 1955, that, in conjunction with the Secretary of State for Scotland, he had decided to set up a commission to advise on future schemes of pig and bacon marketing.

Horticultural Marketing. The Parliamentary Secretary to the Ministry of Agriculture (Lord St. Aldwyn) announced in the House of Lords on March 30 that a Committee of Inquiry into horticultural marketing had been appointed with Lord Runciman of Doxford as chairman. Its terms of reference would be " to investigate the present facilities for and methods of marketing home produce and imported vegetables, fruit, and flowers ; to consider whether marketing distribution of such produce could be improved ; and to make recommendations."

Suspension of Farm Call-Up. The Parliamentary Secretary to the Ministry of Labour (Mr. Harold Watkinson) announced on March 8 that, in order to help farmers to overtake arrears of work caused by the recent bad weather, the call-up of farm workers for military service would be suspended until May 14.

A report published by the Ministry of Agriculture on Feb. 10 stated that the average net income from farms in England and Wales increased by 7 per cent in 1952-53, compared with 1951-52. The largest increase was shown by dairy and livestock farms ; mixed farms experienced little change, and in the arable group average income declined by 5 per cent. The number of farms operating at a loss totalled 7.2 per cent, compared with 8.5 per cent in 1951-52 and 9.5 per cent in 1950-51, whilst the proportion of farms with net incomes of £1,000 or over rose from 34.7 per cent in 1951-52 to 38.8 per cent The average rise in expenditure was about 7.5 per cent, labour costs rising by 6 per cent.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 1954-55 Price Review, 13520 A ; Two-Year Minimum Prices, 12848 A ; Wages, 13985 A ; N.F.U. Livestock Marketing Scheme, 13415 A.)**

B. CANADA. — Bank Merger.

An amalgamation between the Bank of Toronto and the Dominion Bank became effective on Feb. 1, 1955, when an Order-in-Council was signed after having been approved by the Cabinet. The new bank, to be known as the Toronto-Dominion Bank, has total assets of $1,182,000,000 and more than 450 branches throughout Canada.

The merger—the first since 1931—reduced the number of chartered banks in Canada from 11 to 10. (Montreal Star)

C. ISRAEL - JORDAN. — Agreement on P.O.W.'s.

An agreement was signed in Jerusalem on May 10 by the leaders of the Israel and Jordan delegations to the Mixed Armistice Commission, under which each signatory undertook to treat captured military or police personnel as prisoners of war, subject to the Geneva Convention.—(Times) **(14079 A.)**

A. INDIA. — Mr. Nehru's Review of Foreign Affairs.

Mr. Nehru, the Prime Minister of India, made an important statement on foreign affairs in the House of the People on March 31, during which he referred to the then forthcoming Afro-Asian Conference at Bandung (see 14181 A), the Manila Treaty, and India's attitude to the Formosa situation and Middle Eastern defence arrangements. Extracts from Mr. Nehru's speech are given below.

Afro-Asian Conference. After expressing the view that, although there was no danger of war in the near future, the world situation had "generally hardened" and that countries were "drifting away from the logical approach to world problems made at the Geneva Conference," Mr Nehru turned to the emergence of Asia as a major force in world affairs "As a final symbol of the emergence of Asia," he said, "we are having at Bandung an Asian-African conference to which all free nations of Asia and Africa have been invited This conference has historic importance. It is unique No such thing has happened before, and the fact that representatives of 1,400 million people will be there is a matter of utmost significance

"It has become a regular practice for the affairs of Asia to be determined by certain Great Powers in Europe, or sometimes in America . . But now some importance is attached to the views of Asian countries because they cannot be ignored. Nevertheless, it seems to be a high privilege of countries outside to carry the burden of Asia on their shoulders Decisions are made affecting Asia in which Asia has little say. But it is obvious that things have changed."

Mr. Nehru made it clear that the Afro-Asian Conference was not opposed to anyone—to Europe or America "It is merely a coming together of Asian and African countries," he said, "who aim at two things . peace and opportunity to progress . . There is a tremendous urge for peace all over the world, but more so in the countries of Asia and Africa There is a desire for freedom and peace, and that is a common bond for these countries The conference, I hope, will not line up with Great Power blocs because countries attending it hold different views in the matter."

Mr Nehru added "It has become almost impossible to consider any matter logically, reasonably, by itself. Everything is to be considered, we are told, from a Communist or an anti-Communist stand This has made it difficult to understand any question, much less to solve it. . This kind of approach would have been difficult enough at any time but, when we live as we now do on . . the threshold of the atomic age, it is a dangerously simple way of looking at things And we might, because of this simple thinking . . . suddenly find ourselves on the brink of disaster. We have endeavoured not to align ourselves with these Great Powers, and I speak of them with all respect I do not presume to tell them what is right and wrong I must confess that I feel very diffident about expressing any opinion in regard to other countries because the problems we have to face are very difficult . . but it passes my comprehension how any of the problems of today are going to be solved by the approaches that are being made by the Great Powers"

Manila Treaty. Turning next to the Manila Treaty, Mr Nehru continued. "Having achieved a measure of success at Geneva, the world has again drifted back to glaring at one another from a distance and, which seems to be very extraordinary, to laying great stress on all kinds of military alliances and pacts in South-East Asia, Western Asia, and elsewhere in the name of security and peace The situation in Indo-China after the Geneva Conference was hopeful and favourable. . . Then comes out of the blue an attempt as it was said, to secure security and peace in South-East Asia through some kind of military pact or alliance, the foundations of which were laid at Manila. . . . It is clear to me that the Manila Treaty and the Bangkok Conference have upset any idea of peace in that area that previously existed, or any idea of security"

The whole conception of the Geneva Conference was co-existence, Mr Nehru continued "The Indo-China States could not continue unless they recognized each other and unless the Great Powers recognized their freedom and came to an understanding not to interfere with their independence. It was on that basis that the Geneva Treaty was framed . . . The only solution, therefore, is that both parties should agree to leave the Indo-China States alone.

"The situation is more difficult today," Mr. Nehru said "Apart from civil war in South Vietnam, there are difficulties in Laos over the Geneva agreement, which is interpreted in various ways It was drafted in such a hurry. India has a responsibility in trying to resolve those difficulties. Because of certain developments in the Far East and South-East Asia, the whole atmosphere has changed there. It is hardening. The fear of war has come again to the front, and there is the fear of one gaining advantage over another."

Formosa. Mr. Nehru said that India could obviously have only one broad approach to the Formosa problem—that which flowed from the recognition of the Peking Government "But there has been a very wide agreement on the obvious fact that the islands of Matsu and Quemoy, off the mainland, are definitely part of the mainland, and that an enemy force there is a constant irritation and danger. Countries which are not friendly to the People's Government of China have recognized that at last. Yet occupation of these islands continues by other forces, and it is stated that if the Chinese Government attacks them a whole force of that mighty Power will be engaged in defending them because, it is stated, the security of that Great Power might be involved. That is a very extraordinary approach, I say with all respect. It is as certain as anything can be that these islands will go to the mainland of China by logic and reason unless you have great wars, and nobody knows the consequences of those wars "

India's Neutrality Policy. Referring to articles about himself in the foreign Press which said that he was "inclined towards this or that," Mr Nehru declared "I want to be friendly with all countries and I want to live in peace in my country. I am interested in the peace of the world. We have no intention of throwing ourselves into war even if the rest of the world goes to war. Let there be no doubt about it—we will not go to war But if there is war all over the world, we cannot escape the consequences of that war . . It will affect us ."

Middle East Defence. The Prime Minister then referred to the military alliances now being made in the Middle East, and said that these changed the world situation for the worse "These military pacts, far from being helpful, are doing a lot of harm; far from bringing security and assurance of peace, they actually tend in the opposite direction"

Referring in particular to the Turkish-Iraqi treaty, Mr Nehru said that it had weakened the Arab League and had caused great bitterness in the area Egypt, Syria, Saudi Arabia and the Yemen were all opposed to it, and as a result of the treaty the Middle East had been split into hostile camps It was even doubtful whether the agreement served the interests of the countries who had concluded it, when it broke up the homogeneity of the Middle East and created discord and trouble there Mr Nehru went on to say that the Yugoslav Government viewed with great concern developments in the Middle East because of these pacts and because of the pressure that was being exercised upon Syria and other Governments to join. These Governments, however, were resisting "I hope they will resist," he added "Far too much is done under pressure, under threats, and under other methods of coercion."

Summing up the situation in South-East Asia, the Far East, and Western Asia, Mr Nehru declared "It is not happy, it is a picture full of discord and conflict and pulling in different directions. On the one hand one sees Asia, resurgent Asia, awake. . It may take some time for her to grow to full stature, but she is undoubtedly growing. On the other hand, all these attempts are made—in the name of helping Asia, in the name of preserving peace in Asia—at promoting discord and conflict Obviously we cannot view this with any great satisfaction "

Four-Power Talks. - The Hydrogen Bomb. "There has been repeated mention," the Prime Minister continued, "of 'Big Five' and 'Big Four' talks, but insuperable difficulties have come in the way . People are not courageous enough to face each other and talk. They want to create before the talks what they call a 'position of strength,' forgetting of course that the other Power is also strengthening itself at the same time. So by the time that one has produced a position of strength, the other may have produced a position of greater strength When one deals with atomic and hydrogen bombs this talk of greater strength has very little meaning . The misfortune today is that we have got atomic energy, which is a mighty power and which depicts the advance of humanity and its control over nature's powers . But it is very doubtful how far the human mind has progressed to control them And one comes ultimately to the conclusion that atomic energy cannot be met by atomic energy the force of violence cannot be met by the force of violence We have arrived at a stage where the force will overwhelm both the person against whom it is used and the user of it."

The time was coming, said Mr Nehru, when the hydrogen bomb might be made with ease by even a small country, and it was therefore imperative that it should be controlled by some different methods—"call them moral, call them spiritual, call them civilized." He added. "The events of the last two wars have brutalized humanity We are now standing at the verge of destiny whether humanity is to revert to a phase of becoming brutish beasts, or to advance towards the stage of civilization. I see no other way but for countries and nations to realize that force is no remedy, that war is not only no remedy but is an ultimate evil today, and that violence is no good and does not pay."

The "Five Principles." With regard to the "five principles" of peaceful co-existence, first enunciated in the preamble to the treaty between India and China on Tibet in 1953 (see 13588 A), and reaffirmed in the communiqué issued at the end of Chou En-lai's visit to Delhi on his return from the Geneva Conference (see 13661 A), Mr Nehru said that they were "a challenge by Asia to the rest of the world" and that each country would have to give a direct answer to them "I hope that this question will be posed at the Afro-Asian conference in all its straightness," he said, "and that each country will be asked to say whether it stands for non-aggression and non-interference or not" The charge was made, and rightly too, that Communism interfered in other countries; but non-Communist countries also interfered Adherence to the "five principles" was a way out of this difficulty It might happen that some country adhering to them would not keep its word, but this could always happen whatever form of treaty or pledge one had.

South African Racial Policy. There was a good deal of talk about Communism and anti-Communism, Mr. Nehru went on, but whilst he did not wish to deny the importance of the question, things were happening in Africa and colonial territories which should not be forgotten. "What about the tragedy that is taking place in South Africa," he asked, "where hundreds and thousands of people are being lifted up bodily and taken away somewhere else? Why do we not hear the champions of freedom talk about this? Why are they so silent? They simply pass it over. They should realise that the people in Asia and Africa may not shout very much about it,

but they feel it more than Communism and anti-Communism It is a human problem for us This problem of racialism and racial segregation may become more dangerous than any other of the world's problems today "

Relations with Ceylon. " In Ceylon we have been, I think, co-operative and patient. We go some way to understand and to meet the difficulties of the Ceylonese Government and people But I must confess to a feeling of frustration that what we are aiming at is not realized " Giving details of the number of applications by persons of Indian descent in Ceylon for registration as Ceylonese citizens (see 13868 A), Mr Nehru said that in the nine months from December, 1953, to September, 1954, 45,236 applications had been rejected and only 7,505 accepted , in the following four months, to January, 1955, only 21 applications had been accepted and 36,260 had been rejected " It is obvious," he added, " that while previously not many were registered and a large number were rejected, now we have arrived at a stage when hardly anyone is accepted " In India, on the other hand, 5,600 of the 8,000 applications made during 1954 had been accepted and the remainder were under consideration At the last meeting of the Prime Ministers of India and Ceylon it had been agreed that Ceylon should prepare a list of all persons of Indian descent in Ceylon, but that list had not yet been drawn up Nevertheless, Mr Nehru appealed for a " co-operative and friendly approach " to Ceylon on this matter, without giving up any of the principles which India stood for

Goa. Mr Nehru referred to the " barbarous " treatment which, he said, a number of Indian *satyagrahis* (non-violent resisters) had recently received in Goa—some having been sentenced to 28 years' penal servitude and deported, others to varying terms of imprisonment " It is really extraordinary," he declared, " that any Government anywhere should behave in this way , much more so a Government which is allowed to remain in a corner of India . . I want the Portuguese Government to realize that they are there because we are patient and men of good will , not because we cannot deal with the situation, but because we do not wish to do anything, even in a small way, which may have bigger repercussions We are prepared to wait a little, because inevitably the end must be the one that we aim at. It is inconceivable and impossible . for Portugal to imagine that she can remain in Goa . "

In conclusion, Mr. Nehru spoke of India's relations with Pakistan and of his forthcoming meeting with the Pakistani Prime Minister. While it was true that the problems dividing the two countries had not become easier by the passage of time, he was convinced that there was " basic good will " among the two peoples and that everyone was anxious that the problems should be settled in a friendly manner —(Indian High Commissioner's Office, London - The Statesman, Calcutta - The Hindu, Madras) **(Prev. rep. Mr. Nehru, 14160 A ; 14141 A ; Statement on Quemoy and Matsu, 14117 A.)**

A. DENMARK. — Hans Andersen Commemoration.

The 150th anniversary of the birth of Hans Christian Andersen, the famous writer of children's stories and fairy tales, was celebrated on April 2 throughout Denmark and in more than 70 other countries The focus of the Danish celebrations was the town of Odense, where Andersen, the son of a poor cobbler, was born on April 2, 1805 ; from Andersen's birthplace in Odense (now a museum) King Frederick of Denmark broadcast a tribute which was relayed in many languages In commemoration of the 150th anniversary of Hans Andersen's birth, streets will be named after him in São Paulo (Brazil), Santiago (Chile), and Jerusalem ; statues will be erected to him in New York and in Bogotá, the capital of Colombia , and new editions of the *Fairy Tales* will be issued in 12 languages, including Chinese, Hebrew, and Indonesian.

B. UNITED KINGDOM. — Foreign Trade. - Figures for March and First Quarter of 1955.

Imports into the United Kingdom in March totalled £365,400,000, exports £260,300,000, and re-exports £12,600,000 the adverse balance for the month thus amounting to £92,500,000. During the first quarter as a whole imports totalled £1,007,200,000, exports £741,700,000, and re-exports £31,900,000 ; the adverse balance was thus £233,600,000, compared with £121,500,000 in the first quarter of 1954.

C. CANADA. — Gold and Dollar Reserves.

The Bank of Canada announced on Jan. 18 that Canada's official reserves of gold and U.S. dollars on Dec. 31, 1954, amounted to $1,942,600,000 (the highest figure ever reached), compared with $1,818,500,000 on Dec. 31, 1953. Gold holdings amounted to $1,072,700,000 ($986,100,000 at the end of 1953) and U.S. dollar holdings to $869,900,000 ($832,400,000).

D. AUSTRALIA.—Dock Strike. - Stevedoring Industry Act amended. - Appointment of Committee of Inquiry into Port Labour Conditions.

A strike of dockers broke out at Australian ports on Nov. 2, 1954, completely paralysing all movement of cargo and rendering about 200 ships idle. The strike, which affected about 26,000 port workers and lasted a fortnight, had been called by the Communist-led Waterside Workers' Federation in protest against the Government's announced intention of introducing legislation to amend the Stevedoring Industry Act so as to overcome the labour shortage which was alleged to be holding up the turn-round of ships at many ports.

The Government's Bill was introduced into the House of Representatives on Nov. 4, and provided for :

(1) The restoration to the port employers of the right to recruit additional dockers at ports where the labour force had fallen below the quotas fixed by the Stevedoring Industry Board

[Under the Stevedoring Industry Act the number of men required at each port had been fixed by the Government-appointed Stevedoring Industry Board, and the filling of vacancies had been the prerogative of the Waterside Workers' Federation It was explained in the Press that at a number of ports, notably Newcastle and Port Kembla, N S W , the W W F had failed to keep the labour force up to the quota, with subsequent serious delays to shipping.]

(2) The registration of men so recruited, subject to the W W F 's right of challenge, in which case the Federation's objections would be referred to the Stevedoring Industry Board for decision

(3) The holding of an immediate inquiry into port labour conditions, as a preliminary to a general review in 1956 of all legislation affecting the stevedoring industry

Mr Holt (the Minister of Labour and National Service), who moved the second reading of the Bill on Nov 4, declared that the W W F.'s monopoly of port labour recruitment, granted by the Labour Government in 1947, had failed, and denounced the strike as " a truculent and arrogant attempt " by the Federation to prevent the present Government from changing the system. In spite of charges by Dr. Evatt, the Opposition leader, that the Government had introduced the Bill " under pressure from overseas shipping combines," it was passed by the House on Nov. 10, after Mr Holt had refused to accept an Opposition amendment seeking to delay the operation of clause (1) until the proposed inquiry into stevedoring conditions had been held. The Bill was passed by the Senate on Nov. 11 by 26 votes to 21, together with a Government amendment empowering the proposed committee of inquiry to investigate shipping companies' profits. It received the Royal Assent on Nov. 12.

Mr. Menzies, in a broadcast on Nov. 7, had described the strike as " a challenge to Parliament and to the whole conception of Parliamentary democracy ", he stressed that no industrial issue was involved, and alleged that the Federation's sole object was " to frighten the Government and Parliament " into " a continuance of a monopoly of employment which no other trade union in Australia or any free country has ever sought " Dr. Evatt, however, broadcasting on Nov. 8, repeated his contention that the main fault lay with the shipping companies, and urged the Government to make no changes in the system of labour recruitment until the committee of inquiry had reported

Although the executive of the Australian Council of Trade Unions had endorsed the strike on Nov. 9, and had demanded the withdrawal of the Government's Bill, it unanimously adopted a resolution on Nov. 12 recommending the dockers to return to work on Nov. 16. This was approved by strikers' mass meetings at all the ports affected on Nov. 15.

Mr Holt announced on Nov 17 that the committee of Inquiry would consist of Mr James Tait, Q C., vice-president of the Law Council of Australia ; Mr F. J. R. Gibson, national secretary of the Australian Council of Employers' Federations ; and Mr. J Shortell, president of the N S W. Trades and Labour Council. Its terms of reference would include inquiry into (1) the general factors affecting the efficiency of the stevedoring industry , (2) the arrangements for regulating recruitment, settlement of disputes, and the maintenance of discipline , (3) the effect of stevedoring costs on freight rates since the Stevedoring Industry Act came into operation in 1947 ; (4) the profits of shipping and stevedoring companies

Notwithstanding the Government's action in November, the opposition of the W.W.F. continued, coming to a head in February, 1955, after a decision by the Stevedoring Industry Board to increase from 6,400 to 6,900 the quota of dockers at Sydney, where there had been serious undermanning for many months. In view of the Federation's refusal to allow its members to work beside men nominated by the employers, Mr. Holt called a special conference on Feb. 17 of representatives of the shipowners, the W.W.F., the A.C.T.U., and the Stevedoring Industry Board, at which it was agreed as an interim arrangement that the right to recruit labour for the waterfront should revert to the Federation pending a decision on the Government's long-term policy for the waterfront industry in the light of the committee of inquiry's report. A. WESTERN POWERS - SOVIET UNION. — Western Approach to U.S.S.R. for Four-Power Discussions. - Statements by Sir Winston Churchill, Sir Anthony Eden, President Eisenhower, Marshal Bulganin, and M. Faure. - Preparatory Three-Power Discussions in London. - Three-Power Invitation to U.S.S.R.

Statements indicating the possibility of a four-Power conference on international problems were made during March and April by governmental leaders in Britain, the United States, the Soviet Union, and France. Developments in the various countries during this period are described below under cross-headings.

British Labour Party's Call for East-West Talks. - Sir Winston Churchill's Statement.

A debate was held in the House of Commons on March 14 on the following Opposition motion, presented in the names of Mr. Attlee, Mr. Herbert Morrison, and other Labour members:

"That this House, believing that in a world war waged with weapons of mass destruction, such as the hydrogen bomb, there can be no victors but only the destruction of civilization, calls upon H M Government to approach immediately the Governments of the U S A and the U S S R to arrange a meeting between the Prime Minister and the heads of the other two Governments with a view to the lessening of world tension and the preparation for effective world disarmament through the U N Organization, it therefore reaffirms the House of Commons resolution of April 5, 1954 [see 13502 A] and deplores the Government's delay in implementing it"

Mr. Attlee spoke as follows in moving this motion:

"In the debate in April [1954] there was expressed a general anxiety with regard to the world situation, and in our motion we stressed urgency. We used the word 'immediate' and the Government, to some extent, demurred at the word. We did not suggest that action could be taken within a few days or weeks, but nearly a year has gone by and nothing effective has been done I freely acknowledge the efforts made by Sir Anthony Eden to relieve world tension in many areas of the world, but with every month the position gets worse and worse

I was rather disturbed by the statement made by the Prime Minister in the debate on March 1 [i e. the Defence debate—see 14093 A] He suggested that it may be a matter of three or four years before the Soviet Government might be in a position of equality with the West in respect of the H-bomb We have, at times, miscalculated the pace of scientific advance in the Soviet Union and that, perhaps, has tended to give some people an unwarrantable suggestion that delay was possible, that there were three or four years in which we could go on without worrying too much I am sure the Prime Minister did not mean that, but that would be a wide interpretation—that we could wait for four years. We do not think that any delay can be allowed Experiments are going on The advance in methods of destruction is terrifying, and I have seen a great number of very disturbing statements

. . We know how devastating the H-bomb will be, but we do not know the long-term effects due to radiation Would it not be worth while having an authoritative statement made by scientists drawn from both sides of the Iron Curtain? It would be of enormous advantage to the world if we could have some agreed statement by scientists drawn from as wide an area as possible for the purpose of convincing people in all countries of the danger the world stands in, not only of atomic warfare, but of the continued experimentation in these dangerous practices .

The matter we wish discussed is the possibility of co-existence between the two halves of the world Can a free world and a totalitarian world co-exist? Co-existence under the threat of annihilation is a grim prospect You cannot call it peace I recognize the difficulties in dealing with Russia, but the attempt should be made We ought not to be deterred by threats or strong language or by attempts to divide us from the United States We should seize any chance, however slight, and we should seek every possibility of personal contact Essentially, we should try to bring together the U S A and Russia, because there, I think, is the greatest danger in the world—the complete separation of these two great Powers, and the fact that the U.S S R fears the U.S.A and the U.S A fears the U S.S.R. Fear is a bad counsellor.

In this matter the Prime Minister of the United Kingdom can go forward with greater confidence than either the President of the United States or the most influential statesman in Russia. The Prime Minister can get—and last year did get—a mandate from this House. He can get the support of public opinion. Repeated efforts ought to be made, and there ought to be a greater sense of urgency. Agreement on a single point, such as the mutual cessation of nuclear-bomb experiments, might set the ball rolling, might make a start At present we seem to be bogged down. We have always to wait for something else to happen. I do not think we can afford to wait."

Sir Winston Churchill (then Prime Minister) described the Opposition's motion as "a vote of censure on the Government," and moved the following amendment:

"That this House, believing that in a world war waged with weapons of mass destruction, such as the hydrogen bomb, there can be no victors but only the destruction of civilization, welcomes the successful efforts which H.M. Government have made towards the reduction of world tension, supports their proposals for the limitation and control of armaments of all kinds, and recognizes that a high-level meeting with the Soviet Union should await the ratification of the London and Paris agreements by all the countries concerned"

During the course of his speech Sir Winston Churchill disclosed that he had sent a personal telegram to M. Molotov in July, 1954, suggesting that they should have a friendly meeting with no definite agenda or objective but with the aim of "living side by side in growing confidence, easement, and prosperity." He had received a very encouraging reply from M. Molotov, but the suggestion seemed to be superseded for the time being by the Soviet proposals for a formal conference on European unity. Sir Winston spoke as follows:

"The Leader of the Opposition calls for a three-Power conference It is quite true that the resolution of April 5, 1954, mentions only three Powers, but a busy year has passed since then in this clattering world Is it the up-to-date conclusion of the Opposition that only those Powers who possess the secrets of the hydrogen bomb should meet in attempts to decide the future of the world? I am sure that would be an unwise declaration It would encourage any ambitious State to qualify That would be the opposite of Mr. Attlee's declaration

We cannot agree that France and Germany should, at this time, be dissociated from the task of resolving the fears and disputes which beset Europe and the world. To mention only three Powers would give serious offence when, I am sure, none was intended, and give it at a time when France is taking, or is about to take, a decision important to her welfare and also to the policy which both sides of the House have supported. I am also unfavourably struck by the word 'immediately' in the vote of censure I agree that there should be no question of indefinite delay. But the French Council of the Republic is meeting on March 21 to decide this issue, and we shall know one way or the other by then

With that going on, I should have thought it was not possible to conceive a worse time than the immediate present to pass a resolution for immediate efforts to promote a three-Power conference With the debates on the ratification of the London and Paris agreements approaching their decisive point, the Soviet would certainly not agree to such a meeting except on the basis of the further postponement of ratification This we could in no circumstances consider, and I do not believe the Leader of the Opposition would wish us to

I was greatly disappointed when nearly two years ago I was prevented by illness from going to meet President Eisenhower at Bermuda I was most anxious to set before him the personal arguments I had used in my speech of May 11, 1953, shortly after Stalin's death, in favour of a top-level meeting with his successor, the new leader of the Soviet Government, Mr Malenkov. It is not true to suggest that the whole proposal was allowed to drop because of my falling out On the contrary, a conference was held at Washington in July, 1953, at which Lord Salisbury, who took my place and that of the Foreign Secretary, who was also ill, raised all the arguments I would have used in favour of a meeting of the heads of the Governments

The idea of a top-level, four-Power meeting, with a flexible agenda, was presented forcibly to the Americans and the French They could only be brought to agree to the invitation of the Russians for a meeting of the four Foreign Ministers to discuss specifically free elections in Germany, the reunification of Germany, and the conclusion of the Austrian treaty This was duly conveyed to the Soviet Government

From July 15, 1953, we entered a period of tripartite Notes, Soviet rejoinders, and counter-rejoinders. This period did not end until November. At the beginning of December, 1953, we were able to arrange a conference of the heads of the British, American, and French Governments at Bermuda, and the reply to the Russians was agreed.

It was to propose a four-Power meeting at Foreign Minister level to take place in January, 1954, in Berlin. This meeting lasted three weeks, and covered a wide field of differences between the Soviets and the Western Powers The discussions were certainly invaluable, and the contacts useful . . The most fruitful result was the birth of the Geneva conference in April, 1954, which eventually resulted in the armistice and settlement in Indo-China On this we are now living unrestfully

While all this was going on in June, 1954, I visited Washington with the Foreign Secretary, and we passed a busy week at the White House in the most fruitful and intimate conversation with the President. Anglo-American relations had been disrupted by the events at Geneva, and we were very glad that we were able to reach agreement on many points. But they did not include a meeting at top level with the Soviet Government, for which I continued to work. But there was no slamming of the door, no slamming down of the plan I felt it was one we should all consider

During the Defence debate I made an intervention in the speech of Mr Bevan. This intervention, though unstudied, was not incorrect. I would like to tell the story more fully so that it can be judged in its perspective and proportion.

On the homeward journey, in July last, I sent a personal and private telegram to Mr. Molotov, of which I informed the President. After referring to my speech in 1953 for a top-level conference, and the statements I had made from time to time in the House of Commons, that, if this were impossible, I would seek to make contact with the Soviet Government, I asked Mr. Molotov how they would feel about it I would be very glad if he would tell me if he would like the idea of a friendly meeting—no agenda, no objectives, but of living side by side in growing confidence, easement, and prosperity.

Although our meeting would only be simple and informal, and last only a few days, it might be, I said, the prelude to a wider reunion, where much may be settled I said, however, that I had no warrant to say this, beyond my own hopes. I ended by referring to our war comradeship I saw a lot of him during the war years, and he was sometimes very cordial and human

On July 5 I received a very encouraging reply from Mr Molotov, but we had in any case to wait until after the Geneva conference, to which the Foreign Secretary had returned, had concluded. It was not until July 26 that I was able to address Mr Molotov again I said that after discussion with my colleagues I was about to send him a further message to suggest a meeting at the end of August or in the first half of September, at some half-way house such as Berne, Stockholm, or Vienna

In the meanwhile, the Soviet Note of July 24 had been published, proposing a formal conference of European States and the U.S A to discuss again the proposal made some months before by the Soviet Government at Berlin on collective security in Europe This seemed obviously to supersede, for the time being, the small informal meeting I had suggested and which might, perhaps, have been a prelude to a four-Power meeting at top level I was proposing a two-Power informal meeting between myself and Sir Anthony Eden on the one hand and Mr Malenkov and Mr Molotov on the other, and anyone else they chose to bring, at some neutral place, where we could talk over things

I do not mind telling the House that I had it in mind to tell the Soviet that if they wanted to bring the U.S A along they would have to make some change in their general attitude I would have suggested the signature of the treaty with Austria, and also their joining the proposal which was made at this time by the President on the civil use of atomic power, which they have done since Those would be good topics which might make it possible to make it a three-Power—and evidently that would soon have become a four-Power and very likely a five-Power—conference But it never came off, because I never had the opportunity . . .

Mr Molotov replied that he did not see any reasons for considering that my proposals for an informal meeting had any bearing on the convocation of a conference on the question of guaranteeing security in Europe I answered that I had not changed from my original project, but that the unexpected revival of the Berlin proposal at this juncture had created a new situation, since it would not have been possible to have a large, formal, international conference going on at the same time as the unofficial, two-Power, top-level meeting I had suggested The British, American, and French Governments, who had been addressed officially by the Soviets, were already preparing their replies for the formal conference It was therefore necessary to wait until we knew what was going to happen about the four-Power conference before re-examining my project in the light of events.

Mr. Molotov apparently saw no reason why the conferences should not go on together. It is a matter of opinion. I am not complaining We thought it was impossible, as one would confuse or paralyse the other There the matter rested Meanwhile the Soviet proposal for a four-Power Foreign Ministers' conference had had the effect for which I cannot help feeling it was designed, namely, of dissuading France from ratifying the E.D.C treaty.

As I have been deeply interested in the cause of a united Europe for a good many years, I would remind the House of the sequence of events. Since the Russian Communist menace became apparent I have always endeavoured, in Opposition or in Government, to promote an alliance of the free world against it. I was the first in this House to state that there was no possibility of an effective defence against Soviet Russia without a German army. I have always thought that the forces of the West should be grouped on the principles of a Grand Alliance, but the French preferred to aim at a cosmopolitan army, thus avoiding the creation of a German army. There had been three years of lamentable delay before the French were able to perfect the complicated arrangements they had in mind. The strain of those three years upon Dr. Adenauer has been most grievous No one but that valiant patriot and idealist—for he is both—could have endured it

It is not a question of the NATO forces gaining an addition of 12 divisions that moves me personally. Even with that the Western front could not be guaranteed against the overpowering Russian strength in conventional weapons Twelve German divisions are to me a symbol rather than a physical factor What is of major consequence to the cause we serve is to range the mighty German race and nation with the free world, instead of allowing it, by infiltration or territorial bribery, by actual force or by our own tragic memories, to be amalgamated with the satellite States to carry the doctrine and control of Moscow into world supremacy.

Earnestly as I desire to come to a peaceful arrangement for co-existence with Russia, I should regard it as an act of insanity to drive the German people into the hands of the Kremlin and tilt into Communist tyranny the destiny of mankind. The only safe policy for us to pursue, as we have so often stated, is peace through strength Without unity there can be no strength. For the Western Powers to abandon E D.C. and have nothing to put in its place would have presented us, divided and in vacuity, before the mighty Communist oligarchy dictatorship and its satellites. Weakness makes no appeal to Moscow. . . . The sooner we get our united ratification settled, the sooner the top-level four-Power conference may come. It may be five-Power On the other hand, it might be that one retreat would lead to another, and far from assuaging differences, would stimulate further aggression from the East and slowly rouse the reluctant anger of the West We went through all this in the years before the war, and therefore we felt that we must on no account allow our earnest desire to bring about a top-level conference of great Powers expose us to the charge of having thrown doubt and disarray into the ranks of NATO We were convinced that the Government had no choice but to suspend for the time being the proposal I had made to Mr. Molotov

I am sure that the more this matter is considered by the House, and studied in detail, the more it will be seen that our efforts to act in accordance with the unanimous resolution of the House of April 5, 1954, have been sincere and untiring, and that we have in no way been disloyal to that resolution, lukewarm, or dithering in pursuing our purpose across one obstacle after another. Our policies throughout have been simple, earnest, straightforward , and we shall faithfully persevere in them

Several important changes have occurred in the situation since May, 1953, and since August last, when there was a visit to Moscow by some members of the Opposition. The Malenkov regime has gone , new forces rule, and the 'new look,' which I wished to explore in May, 1953, has been succeeded by another 'new look' Some members of the Opposition may no doubt contend that this change might have been averted if a meeting had taken place I doubt very much whether this assertion has any foundation at all.

In a press interview on Jan 1 this year, Mr Malenkov was asked if he would welcome diplomatic talks leading to four-Power talks He refused to give an affirmative reply, and said with emphasis that the efforts of the Western Powers to settle the German problem were not compatible with the proposal to hold a four-Power conference We have yet to ascertain the feelings and policy of his successor. So far the new 'new look' has not raised any extravagant hopes of improvement, but anyhow it is so easy to assume, as is done in some influential quarters, that all would have been well if Mr Malenkov had had due encouragement from us and the United States. This is all pure guesswork. .

I have given a factual account of what the Government have done to bring about a top-level two-, three-, four- or five-Power conference. None excludes the others Of course, it may be hoped that a small meeting would lead to a much larger one. I think that is reasonable I have tried very hard to set in motion this process of a conference at top level and to bring about actual results. Although I do not pretend to measure what the recent changes in the Soviet oligarchy imply, I do not feel that they should discourage us from further endeavours I must say very seriously that it is a mistake to suppose that to bring about such a meeting is an end in itself It is only a means to an end, and it is by no means certain that the end would be agreeable To have a conference at an ill-chosen moment or in unfavourable circumstances would only raise false hopes and, possibly, finish up by leaving things worse than before

One thing stands out in my mind above all others—the increasing friendship and understanding with our ally, the United States. . . The President's statement [of March 10, 1955 – see 14114 A] renews the pledges which the U S.A gave to the E D C These assurances are of particular importance to the United Kingdom, which has undertaken great obligations and risks—very serious when undertaken alone, but assuming an altogether different character when supported by undertakings of this kind from the United States

The pledge we gave last September made the Paris agreements possible Our commitment is most powerfully reinforced and our peril most importantly reduced by the President's new statement. My feeling is that the wish of America for peace grows stronger at the same pace as their capacity for war They give great consideration to our views. They show marked respect for our experience of the European scene, but this very attention which they pay to what we advise is accompanied by serious irritation of their public opinion at anything they take to be unfair criticism.

When there are criticisms that President Eisenhower has not come over here, or has not come to an international conference, it must be remembered that the President of the United States is not only Head of the State but has powers of action in an emergency which are far beyond those granted to any other individual in the modern world. At the same time he is morally and legally bound to other institutions of equal status in the long-established structure of the American Constitution. He cannot move about as freely as ordinary Heads of State move . No President has ever had the knowledge and experience of Europe, and of the very group of problems now confronting it, as is possessed by President Eisenhower. I hope that nothing will be said on this side of the Atlantic or in this House which will rouse new inhibitions in the American mind against the freedom of his personal movements.

I still believe that, vast and fearsome as the human scene has become, personal talks with the right people in the right place and at the right time may yet have a potent and valuable part to play in the cause of peace which is in all our hearts "

After debate, the Opposition motion was negatived by 298 votes to 268 and the amended motion was carried by 299 votes to 266—a Government majority of 33.

The full text of the confidential exchange of letters between Sir Winston Churchill and M. Molotov in 1954, to which Sir Winston referred in his speech, was published in Moscow on March 17. The letters—of which there were seven in all, and of which the Russian-language texts were given—contained Sir Winston's proposal for an informal meeting between himself and M. Malenkov preparatory to a wider meeting of several Powers. The Soviet Foreign Ministry, in issuing this correspondence, said that it was apparent that Sir Winston had " himself renounced the proposal which he had made."

Statements by President Eisenhower, Marshal Bulganin, and M. Faure.

Speaking at a press conference on March 23, President Eisenhower supported the idea of exploratory talks between the U.S.A., Britain, Russia, and France on all questions affecting world peace. He expressed the opinion that a conference of heads of governments should be preceded by a four-Power meeting of Foreign Ministers or officials; that exploratory discussions should be confined to the four Powers and should exclude Communist China and Germany; and that it might not be necessary to agree upon an agenda in advance. He emphasized that the U.S. Government desired to see positive results from a four-Power conference, and that it did not wish to participate in discussions which might result merely in useless bickering or in being turned into a propaganda forum. "I have said again and again," the President declared, "that there is no place on earth to which I would not travel, there is no chore I would not undertake, if I had the faintest hope that by doing so I would promote the cause of world peace."

Marshal Bulganin, the Soviet Prime Minister, was asked by a Tass correspondent on March 26 to comment on President Eisenhower's statement. He replied: "The Soviet Government, as in the past, regards with favour the idea of a conference of the Great Powers expressed by the U.S. President, if a conference is meant such as would facilitate a relaxation of international tensions. In this connexion it can be pointed out that the Soviet Government has already proposed the convening, in the very near future, of a conference of the four Powers at which the question of the Austrian State Treaty could be settled."

A U S State Department spokesman said on the same day: "We are carefully studying the implications of Premier Bulganin's statement In general we welcome it as a sign that the Soviet Government is receptive to President Eisenhower's views concerning the circumstances which could make it useful to hold future discussions."

M. Edgar Faure, the French Prime Minister, gave an interview to *Pravda* correspondents in Paris at the beginning of April. He described Marshal Bulganin's statement as "an important positive event," and added: "Relaxation of international tension depends mainly on joint efforts by all the Powers concerned, taking into account the legitimate requirements of the security of each of these Powers. I want negotiations to be concluded in this spirit, given observance of this condition, they may be fruitful. These talks would be facilitated by a relaxation of tension between the U S.A. and the U.S S.R. In view of this, I am pleased that Marshal Bulganin commented favourably on the statement made by President Eisenhower."

Further Statements by Sir Winston Churchill and Sir Anthony Eden.

Sir Winston Churchill was asked by Mr. Warbey (Lab.) on March 29 whether, "in view of the recent statements of President Eisenhower and the French Prime Minister," he would make "fresh proposals for a four-Power conference, including a suggested date for its convening." Sir Winston replied:

"Things certainly seem to have taken a friendly turn lately. I have never departed in any way from my view that a top-level meeting without agenda might be a hopeful manner of approaching the solution to these world problems It might be helpful to have the wish and the will expressed from the summit, and the agreements of heads of Governments recorded in broad and simple terms, if any can be reached. These can then be studied and implemented on the official level This procedure, like all others, may fail to reach an agreement, but there might be a better chance of success if the initiative came from the summit. So far, however, the heads of Governments have not agreed to this method"

On April 19, Sir Anthony Eden, who had meanwhile become Prime Minister in succession to Sir Winston Churchill (see 14120 A), was asked a similar question by Mr. Dodds (Lab.). He replied:

"As has often been made clear, H M. Government are anxious for negotiations with the Soviet Government as soon as possible after the ratification of the London and Paris agreements. We are already discussing methods and procedure with the Governments of France, the United States, the German Federal Republic, and other interested countries The House may rest assured that we shall do everything in our power to speed these consultations. . . ."

Three-Power Preparations for Four-Power Conference.—London Discussions.

Plans for a Western approach to the Soviet Union for a four-Power conference were announced in the following joint statement issued on April 25 in London, Washington and Paris:

"The Governments of the United States, France, and the United Kingdom have constantly given proof of their desire to seek by negotiation a just and peaceful settlement of questions which can endanger the maintenance of peace. Moved by the same desire, the three Ministers of Foreign Affairs will meet in Paris on May 8 in order to discuss concrete plans for holding a four-Power conference with the Soviet Government In accordance with their usual practice, they will also discuss the proposed conference with the German Federal Chancellor and with the Ministers of the other NATO Powers. Experts designated by the three Governments will meet in London on April 27 to make a preliminary study of these problems in preparation for the Ministers' discussions The three Governments earnestly hope that a four-Power conference can meet as soon as possible."

The preparatory conference of experts, referred to in the communiqué, was held in London from April 27 to May 5. The principal British, U.S., and French representatives—Sir Geoffrey Harrison (of the Foreign Office), Mr. Beam (of the State Department) and M. Seydoux (of the *Quai d'Orsay*)—were joined by Herr Blankenhorn, representing the German Federal Government, when matters affecting Germany were discussed.

Mr. Harold Macmillan, the new British Foreign Secretary, informed the House of Commons on April 25 (i) that it was expected that all instruments of ratification of the London and Paris agreements would be deposited by May 5, on which date the agreements would enter into force; (ii) that a meeting of the North Atlantic Council, at which the question of a four-Power conference with the Soviet Union would be among the subjects discussed, would open in Paris on May 9; (iii) that he hoped to have separate talks in Paris with Dr. Adenauer, Mr. Dulles, and M. Pinay. He added: "I am confident that these consultations will lead to agreement about an early approach to the Soviet Government. As the House knows, it is the earnest desire of H.M. Government that a four-Power conference should meet as soon as possible. H.M. Government will be glad to take part in talks at any level, whether of heads of Government or Foreign Ministers."

Three-Power Invitation to Soviet Union.

As announced by Mr. Macmillan, the Foreign Ministers of the Western Powers met in Paris on May 8. After discussions between Mr. Dulles, Mr. Macmillan and M. Pinay, it was agreed to invite the Soviet Union to a four-Power conference, and on May 10 the Ambassadors of the three Powers in Moscow presented Notes (the texts of which were identical) inviting the U.S.S.R. to a "two-stage" conference of heads of Government and Foreign Ministers. The wording of the invitations, which were in the form of personal letters to M. Molotov, was as follows:

"The Governments of France, the United Kingdom, and the United States believe that the time has now come for a new effort to resolve the great problems which confront us. We therefore invite the Soviet Government to join us in an effort to remove sources of conflict between us.

We recognize that the solution of these problems will take time and patience. They will not be solved at a single meeting nor in a hasty manner. Indeed, any effort to do so could set back real progress toward their settlement. Accordingly, we think it would be helpful to try a new procedure for dealing with these problems.

In view of their complexity and importance, our suggestion is that these problems be approached in two stages. We think it would be fruitful to begin with a meeting of the heads of Government, accompanied by their Foreign Ministers, for an exchange of views. In the limited time for which the heads of Government could meet, they would not undertake to agree upon substantive answers to the major difficulties facing the world Such a meeting could, however, provide a new impetus by establishing the basis for the detailed work which will be required. For this purpose the heads of Government could devote themselves to formulating the issues to be worked on and to agreeing on methods to be followed in exploring solutions.

We further propose that the Foreign Ministers, to assist the heads of Government in their task, should come together shortly in advance of the meeting of the heads of Government and at the same place.

This first stage would lay the foundation for the second stage, in which the problems would be examined in detail by such methods, organs, and participants as it appears will be most fruitful according to the nature of the issues. This work should be started as soon as practicable after the meeting of the heads of Government.

This procedure would facilitate the essential preparation and orderly negotiation most likely to bring about agreements by progressive stages. The important thing is to begin the process promptly and to pursue it with patience and determination. We hope that this proposal will commend itself to the Soviet Union as a useful basis for progress towards better relations between us.

If the Soviet Union agrees that an early meeting of heads of Government to explore such a programme would be useful, we suggest that our Foreign Ministers settle, through diplomatic channels or otherwise, upon a time and place for such a meeting. The forthcoming meeting of the Foreign Ministers at Vienna for the signing of the Austrian State Treaty might provide an opportunity for preliminary discussion of this proposal."

It was confirmed in Washington on the same day (May 10) that President Eisenhower had agreed to meet Marshal Bulganin at early four-Power conversations between heads of

Government. The President, in an address on that day to a meeting of women Republicans, said that he was "ready to do anything and meet with anyone anywhere" if there was "the slightest chance of furthering the cause of peace"; he added that his approach to a four-Power meeting would "not be bogged down by minor points of protocol." The White House had earlier stated that the President, who had been in direct touch with Mr. Dulles in Paris, was agreeable to a "feasible and useful" meeting of the heads of Governments, and that such a possibility had always been in the President's mind. It was understood that the three-Power invitation to the U.S.S.R. had been made after President Eisenhower had made known, through Mr. Dulles, his readiness to participate directly in top-level four-Power discussions as had been suggested by the British and French Governments, in preference to the earlier American view that there should first be a Foreign Ministers' meeting only.—(Times - Manchester Guardian - New York Times - Le Monde, Paris - Soviet Weekly)

A. SOVIET UNION. — Establishment of Permanent Commission on Interplanetary Communications. - "Artificial Satellite" Project.

It was officially announced in Moscow towards the end of April that a Permanent Commission on Interplanetary Communications had been set up in the Soviet Union by the Astronomical Council of the Academy of Sciences of the U.S.S.R. Staffed by leading Soviet scientists, under the direction of Academician L. I. Sedov, the commission was given the task of co-ordinating and directing "all work on problems of the conquest of space." A detailed statement on the aims of the commission was made by M. Karpenko, its scientific secretary.

M. Karpenko said that the problem of interplanetary communication was "one of the biggest tasks which mankind has to solve in the subordination of nature," and that its successful solution "will become possible only as a result of the active participation of numerous scientific and engineering technical groups." The commission would have the task of uniting and directing these collective efforts, and one of its first jobs would be to organize work for the setting-up of a space station—described by M Karpenko as "an automatic laboratory to conduct research in space."

After pointing out that this laboratory would revolve round the earth beyond the atmosphere as an artificial satellite, M Karpenko added: "From it, it will be possible to conduct observations of phenomena which are inaccessible to investigations in ordinary terrestial conditions. For instance, biologists will be able to study the conditions of life in an absence of the force of gravity. Astrophysicists will be able to observe the ultra-violet and roentgen spectra of solar and stellar radiation, and to learn a great deal about the processes taking place on these luminaries. For radio-physicists such a laboratory opens up the possibility of studying more fully the processes taking place in the ionosphere and deciding the most suitable conditions for the establishment of radio communications with future space ships. Geophysicists and geographers, photographing instantaneously the location of the ice in the Arctic and the clouds in the atmosphere, will be able to solve more precisely matters connected with weather forecasts and northern shipping. The establishment of a space laboratory will be the first stage in solving problems of interplanetary communications."

In a report to the U.S. Congress on Dec. 30, 1948, the late Mr. Forrestal, then Secretary of Defence, had disclosed that an "Earth Satellite Vehicle Programme" was being carried out in the United States (see Vol. VII, page 10098, first column). The Moscow announcement meant, therefore, that two countries—the United States and the Soviet Union—were engaged upon research into the construction of a "space station" or "artificial satellite." (Soviet Weekly - Ed. K.C.A.)

B. UNITED KINGDOM. — Lady Megan Lloyd-George joins Labour Party.

Lady Megan Lloyd-George, formerly Liberal M.P. for Anglesey for 22 years, and deputy leader of the Liberal Parliamentary Party from 1949-51, announced on April 25 that she had joined the Labour Party. In a letter to Mr. Attlee on that date, informing him of her decision, Lady Megan wrote *inter alia* that she had long felt out of sympathy with the policy of the official Liberal Party; that she was "convinced that, in the changed situation of today, it is only in the Labour Party that I can be true to the Radical tradition"; and that the Liberal Party seemed to her "to have lost all touch with the Radical tradition which inspired it."

Lady Megan Lloyd-George, daughter of the late Earl Lloyd-George and brother of Major Gwilym Lloyd-George (the Home Secretary), represented Anglesey without a break from 1929 to 1951, when she lost the seat to Labour in a contest in which there was also a Conservative candidate.

C. UNITED KINGDOM. — Labour Party Resolution on High-Level Talks. - Call for Abolition of Weapons of Mass Destruction. - Attitude to Hydrogen Bomb.

The National Executive Committee of the Labour Party issued a resolution on March 30 calling for high-level talks between Britain, America and Russia with the aim of bringing about world disarmament and outlawing weapons of mass destruction. At the same time the resolution pointed out that America and Russia were the only countries in the world to possess the hydrogen bomb, expressed the view that it was undesirable that Britain should be dependent on another country for this vital weapon; and declared, accordingly, that the Labour Party "support the production of the hydrogen bomb in this country." The resolution was worded as follows:

"The Labour Party has always sought to establish peace on sure foundations by getting rid of the causes of war and by fostering co-operation and justice between all nations This would render possible world disarmament enforced by international inspection and control. Formerly war, in spite of its destructiveness, was regarded as an instrument of policy Today it is realized that with the advent of the hydrogen bomb and other instruments of mass destruction there can be no victor in war. The survival of civilization is at stake. Mankind cannot afford another war. It is for this reason that the Labour Party has repeatedly pressed and will continue to press the Government to initiate talks on the highest level with the U S A and the U S S.R. . .

The fact that these terrible weapons exist on both sides of the Iron Curtain maintains an uneasy equilibrium under the threat of mutual destruction. We must seek to progress from mere co-existence through relaxation of tension to international co-operation, and so to an effective system of general disarmament. We are under no illusions as to the difficulties of such a course, but we must seize every opportunity.

Scientists point out the danger to the human race in the diffusion through the world of radio-active particles An agreement on the cessation or even the limitation of thermo-nuclear experiments would be an important step in the right direction. An authoritative pronouncement by a body of scientists from the Western countries and from Russia, stating clearly the danger threatening the world, might, if it were given wide publicity in all countries, aid in arousing all peoples to the danger in which the world stands.

Until world disarmament can be achieved, weapons of mass destruction in the hands of Britain and her allies in NATO form the most effective deterrent against aggression by a potential disturber of the peace possessing not only these weapons but also overwhelming force in what are called conventional weapons.

As long as this great disparity remains, unilateral disarmament is folly. It is equally foolish to suggest that these weapons will only be used if an aggressor uses them first It is the knowledge that in the last resort these terrible weapons will be used that makes them an effective deterrent, but they constitute only an ultimate sanction to prevent war They could not be used in the event of minor disturbances For this reason conventional forces must be maintained to deal with small-scale or localized disturbances Clearly a very drastic reshaping of our defence plans is needed to deal with a new situation

Hitherto only the U.S.A. and the U.S S R. have possessed the hydrogen bomb. Labour believes that it is undesirable that Britain should be dependent on another country for this vital weapon. If we were, our influence for peace would be lessened in the councils of the world. It was for that reason that the Labour Government decided on the manufacture of the atomic bomb and that we support the production of the hydrogen bomb in this country. While everyone ought to realize the great menace to civilization in the emergence of weapons of mass destruction, there is the hope that the idealists who long for peace and disarmament may now be reinforced by realists who know now that the choice today is between world co-operation for peace or annihilation in another war

Yet we must realize that time is short. With a world rearmament race proceeding, the existence of deterrents can at best only give a breathing-space which must be used to lay the foundations of a peace settlement. We call on the Government to take all possible steps to reduce tension and to foster international understanding with a view to achieving general disarmament and a secure peace."

(Daily Herald - Manchester Guardian) **(Prev. rep. 14093 A.)**

D. UNITED STATES - MEXICO. — Agreement on Restriction of Illegal Mexican Immigration.

A U.S.-Mexican agreement, designed to reduce the illegal entry of Mexican workers into the United States and to improve the arrangements for the temporary employment of Mexican workers in the U.S.A., was signed in Mexico City on April 14. It provided, among other things, for an increase in the strength of the border patrols of both countries and for their better co-ordination; for a continuation of the Mexican practice of transporting to the interior of Mexico illegal immigrants released by the U.S.A.; and for the joint development of an information programme. It also proposed U.S. legislation to deter employers from hiring illegal immigrants and to punish people engaged in their transportation.

(New York Times)

MAY 14—21, 1955

A. AUSTRIA. — Signing of State Treaty. - Provisions. - Austrian Neutrality Declaration.

The Austrian State Treaty, the provisions of which had been in dispute between the Western Powers and the Soviet Union since the end of the war, was signed at the Belvedere Palace in Vienna on May 15 by the Foreign Ministers of the four occupying Powers and by their Ambassadors in Vienna— M. Molotov and M. Ilyichev (Soviet Union); Mr. Macmillan and Sir Geoffrey Wallinger (Britain); Mr Dulles and Mr. Llewellyn R. Thompson (U.S.A.), and M. Pinay and M. Roger Lalouette (France). Dr. Figl, the Austrian Foreign Minister, signed on behalf of Austria. The treaty, when ratified, will end more than ten years of Allied occupation, which had been preceded by seven years of German occupation, and will re-establish Austria as a sovereign and independent State for the first time since 1938.

The signing of the treaty followed preliminary discussions on its final terms which were held in Vienna from May 2 to 11 between the Ambassadors of the four occupying Powers and Austrian representatives, after the Soviet Union had accepted the Western Powers' suggestion of April 22 for such a preparatory meeting. These discussions were followed by a meeting in Vienna on May 14 of the British, French, U.S., and Soviet Foreign Ministers themselves to give final consideration to the treaty.

During the Ambassadors' discussions agreement was rapidly reached on most of the 59 Articles of the draft treaty, and a number of others were dropped as it was agreed that they were now obsolete. There was, however, some delay over Soviet insistence that the clause in the preamble attributing a certain amount of war guilt to Austria should be retained, but M. Molotov eventually reversed his stand and agreed to its omission Other questions over which there was some disagreement related to German assets, the limitation of Austrian armed forces, and the prohibition of the manufacture of special weapons by Austria.

As regards former German assets in the Soviet Zone of occupation, the draft treaty provided for their retention by the Soviet Union, although this had been superseded by the Austro-Soviet agreement concluded in Moscow on April 15 under which the U S S.R. had agreed to the return of such assets to Austria The representatives of the Western Powers and of Austria therefore argued in the final negotiations that these provisions had become obsolete, but the Soviet representatives insisted that the clause should be retained as the concessions of April 15 were a purely bilateral Soviet-Austrian agreement. The other Powers finally concurred in this, with the proviso that a special annex to the treaty should emphasize that the relevant article (Art 22) had been modified by the agreement of April 15.

The treaty in its final form consisted of 38 Articles (21 less than the original draft treaty) and two annexes, one defining and listing war *matériel*, and the other relating to the German assets in Austria mentioned above. The text of the treaty was as follows:

Preamble.

The Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland, the United States of America, and France, hereinafter referred to as "the Allied and Associated Powers," of the one part, and Austria, of the other part;

Whereas on March 13, 1938, Hitlerite Germany annexed Austria by force and incorporated its territory into the German Reich,

Whereas in the Moscow Declaration published on Nov. 1, 1943, the Governments of the U.S S.R. the U.K., and the U S.A. declared that they regarded the annexation of Austria by Germany on March 13, 1938, as null and void and affirmed their wish to see Austria re-established as a free and independent state, and the French Committee of National Liberation made a similar declaration on Nov. 16, 1943;

Whereas as a result of the Allied victory Austria was liberated from the domination of Hitlerite Germany,

Whereas the Allied and Associated Powers, and Austria, taking into account the importance of the efforts which the Austrian people themselves have made and will have to continue to make for the restoration and democratic reconstruction of their country, desire to conclude a treaty re-establishing Austria as a free, independent, and democratic state, thus contributing to the restoration of peace in Europe;

Whereas the Allied and Associated Powers desire by means of the present treaty to settle in accordance with the principles of justice all questions which are still outstanding in connexion with the events referred to above, including the annexation of Austria by Hitlerite Germany and the participation of Austria in the war as an integral part of Germany; and

Whereas the Allied and Associated Powers and Austria are desirous for these purposes of concluding the present treaty to serve as the basis of friendly relations between them, thereby enabling the Allied and Associated Powers to support Austria's application for admission to the United Nations Organization;

Have therefore appointed their plenipotentiaries who, after presentation of their full powers, found in good and due form, have agreed on the following provisions:

Part I.—Political and Territorial Clauses.

Art. 1. Re-establishment of Austria as a Free and Independent State. The Allied and Associated Powers recognize that Austria is re-established as a sovereign, independent and democratic state.

Art. 2.—Maintenance of Austria's Independence. The Allied and Associated Powers declare that they will respect the independence and territorial integrity of Austria as established under the present treaty.

Art. 3.—Recognition by Germany of Austrian Independence. The Allied and Associated Powers will incorporate in the German peace treaty provisions for securing from Germany the recognition of Austria's sovereignty and independence and the renunciation by Germany of all territorial and political claims in respect of Austria and Austrian territory.

Art. 4.—Prohibition of Anschluss. (1) The Allied and Associated Powers declare that political or economic union between Austria and Germany is prohibited Austria fully recognizes its responsibilities in this matter and shall not enter into political or economic union with Germany in any form whatsoever.

(2) In order to prevent such union Austria shall not conclude any agreement with Germany, nor do any act, nor take any measures likely, directly or indirectly, to promote political or economic union with Germany, or to impair its territorial integrity or political or economic independence Austria further undertakes to prevent within its territory any act likely, directly or indirectly, to promote such union and shall prevent the existence, resurgence, and activities of any organizations having as their aim political or economic union with Germany and pan-German propaganda in favour of union with Germany

Art. 5.—Frontiers of Austria. The frontiers of Austria shall be those existing on January 1, 1938

Art. 6.—Human Rights. (1) Austria shall take all measures necessary to secure to all persons under Austrian jurisdiction, without distinction as to race, sex, language or religion, the enjoyment of human rights and of the fundamental freedoms, including freedom of expression, of Press and publication, of religious worship, of political opinion and of public meeting

(2) Austria further undertakes that the laws in force in Austria shall not, either in their content or in their application, discriminate or entail any discrimination between persons of Austrian nationality on the ground of their race, sex, language, or religion, whether in reference to their persons, property, business, professional or financial interests, status, political or civil rights, or any other matter.

Art. 7.—Rights of the Slovene and Croat Minorities. (1) Austrian nationals of the Slovene and Croat minorities in Carinthia, Burgenland, and Styria shall enjoy the same rights on equal terms as all other Austrian nationals, including the right to their own organizations, meetings, and Press in their own language

(2) They are entitled to elementary instruction in the Slovene or Croat language and to a proportional number of their own secondary schools, in this connexion school curricula shall be reviewed and a section of the Inspectorate of Education shall be established for Slovene and Croat schools

(3) In the administrative and judicial districts of Carinthia, Burgenland, and Styria, where there are Slovene, Croat or mixed populations, the Slovene or Croat language shall be accepted as an official language in addition to German. In such districts topographical terminology and inscriptions shall be in the Slovene or Croat language as well as in German

(4) Austrian nationals of the Slovene and Croat minorities in Carinthia, Burgenland, and Styria shall participate in the cultural, administrative and judicial systems in these territories on equal terms with other Austrian nationals.

(5) The activity of organizations whose aim is to deprive the Croat or Slovene populations of their minority character or rights shall be prohibited

Art. 8.—Democratic Institutions. Austria shall have a democratic government based on elections by secret ballot and shall guarantee to all citizens free, equal, and universal suffrage, as well as the right to be elected to public office without discrimination as to race, sex, language, religion, or political opinion.

Art. 9.—Dissolution of Nazi Organizations. (1) Austria shall complete the measures, already begun by the enactment of appropriate legislation approved by the Allied Commission for Austria, to destroy the National Socialist party and its affiliated and supervised organizations, including political, military, and para-military organizations, on Austrian territory Austria shall also continue the efforts to eliminate from Austrian political, economic, and cultural life all traces of Nazism, to ensure that the above-mentioned organizations are not revived in any form, and to prevent all Nazi and militarist activity and propaganda in Austria.

(2) Austria undertakes to dissolve all Fascist-type organizations existing on its territory, political, military, para-military, and likewise any other organizations carrying on activities hostile to any United Nation or which intend to deprive the people of their democratic rights.

(3) Austria undertakes not to permit, under threat of penal punishment which shall be immediately determined in accordance with procedures established by Austrian law, the existence and the activity on Austrian territory of the above-mentioned organizations.

Art. 10.—Special Clauses on Legislation. (1) Austria undertakes to maintain and continue to implement the principles contained in the laws and legal measures adopted by the Austrian Government and Parliament since May 1, 1945, and approved by the Allied Commission for Austria, aimed at the liquidation of the remnants of the Nazi regime and the re-establishment of the democratic system, and

to complete the legislative and administrative measures already taken or begun since May 1, 1945, to codify and give effect to the principles set out in Articles 6, 8, and 9 of the present treaty, and insofar as she has not yet done so, to repeal or amend all legislative and administrative measures adopted between March 5, 1933, and April 30, 1945, which conflict with the principles set forth in Articles 6, 8 and 9.

(2) Austria further undertakes to maintain the law of April 3, 1919, concerning the House of Habsburg-Lorraine [When the first Austrian Republic was formed after World War I, the members of the former reigning House of the Austro-Hungarian Empire were permanently barred from the country.]

Art. 11.—Recognition of Peace Treaties. Austria undertakes to recognize the full force of the peace treaties with Italy, Rumania, Bulgaria, Hungary, and Finland, and other agreements or arrangements which have been or will be reached by the Allied and Associated Powers in respect of Germany and Japan for the restoration of peace

Part II.—Military and Air Clauses.

Art. 12.—Prohibition of Service in the Austrian Armed Forces of Former Members of Nazi Organizations, etc. The following shall in no case be permitted to serve in the Austrian armed forces

(1) Persons not of Austrian nationality.

(2) Austrian nationals who had been German nationals at any time before March 13, 1938.

(3) Austrian nationals who served in the rank of colonel or in any higher rank in the German armed forces during the period from March 13, 1938, to May 8, 1945

(4) With the exception of any persons who shall have been exonerated by the appropriate body in accordance with Austrian law, Austrian nationals falling within any of the following categories :

(*a*) Persons who at any time belonged to the National Socialist party (N.S.D.A.P.), or the S.S., S.A., or S.D. organizations; the Secret State Police (Gestapo), the National Socialist Soldiers' Association, or the National Socialist Officers' Association.

(*b*) Officers in the National Socialist Fliers' Corps or the National Socialist Motor Corps of rank not lower than "*Untersturmführer*" or its equivalent

(*c*) Functionaries in any supervised or affiliated organizations of the N.S.D.A.P. of rank not lower than that equivalent to "*Ortsgruppenleiter.*"

(*d*) Authors of printed works or scenarios placed by the competent commissions set up by the Government of Austria in the category of prohibited works because of their Nazi character

(*e*) Leaders of industrial, commercial, and financial undertakings who, according to the official and authenticated reports of existing industrial, commercial and financial associations, trade unions and party organizations, are found by the competent commission to have co-operated actively in the achievement of the aims of the N.S.D.A.P. or of any of its affiliated organizations, supported the principles of National Socialism, or financed or spread propaganda for National Socialist organizations or their activities, and by any of the foregoing to have damaged the interests of an independent or democratic Austria.

Art. 13.—Prohibition of Special Weapons. (1) Austria shall not possess, construct or experiment with (*a*) any atomic weapons, (*b*) any other major weapon adaptable now or in the future to mass destruction and defined as such by the appropriate organ of the U.N., (*c*) any self-propelled or guided missiles or torpedoes, or apparatus connected with their discharge or control, (*d*) sea mines, (*e*) torpedoes capable of being manned, (*f*) submarines or other submersible craft, (*g*) motor torpedo-boats, (*h*) specialized types of assault craft, (*i*) guns with a range of more than 30 kilometres, (*j*) asphyxiating, vesicant, or poisonous materials or biological substances in quantities greater than, or of types other than, are required for legitimate civil purposes, or any apparatus designed to produce, project or spread such materials or substances for war purposes

(2) The Allied and Associated Powers reserve the right to add to this Article prohibitions of any weapons which may be evolved as a result of scientific development.

Art. 14.—Disposal of War Matériel of Allied and German Origin. (1) All war matériel of Allied origin in Austria shall be placed at the disposal of the Allied or Associated Power concerned, according to the instructions given by that Power. Austria shall renounce all rights to the above-mentioned war matériel.

(2) Within one year from the coming into force of the present treaty, Austria shall render unusable for any military purpose or destroy : all excess war matériel of German or other non-Allied origin ; in so far as they relate to modern war matériel, all German and Japanese drawings, including existing blueprints, prototypes, experimental models and plans, all war matériel prohibited by Art. 13 of the present treaty ; all specialized installations, including research and production equipment, prohibited by Art. 13 which are not convertible for authorized research, development or construction.

(3) Within six months from the coming into force of the present treaty Austria shall provide the Governments of the Soviet Union, the U.S.A., the U.K., and France with a list of the war matériel and installations enumerated in Paragraph 2.

(4) Austria shall not manufacture any war matériel of German design. Austria shall not acquire or possess, either publicly or privately, or by any other means, any war matériel of German manufacture, origin or design, except that the Austrian Government may utilize, for the creation of the Austrian armed forces, restricted quantities of war matériel of German manufacture, origin or design remaining in Austria after the Second World War.

(5) A definition and list of war matériel for the purposes of the present treaty are contained in Annex I

Art. 15.—Prevention of German Rearmament. (1) Austria shall co-operate fully with the Allied and Associated Powers in order to ensure that Germany is unable to take steps outside German territory toward rearmament

(2) Austria shall not employ or train in military or civil aviation or in the experimentation, design, production or maintenance of war matériel persons who are, or were at any time previous to March 13, 1938, nationals of Germany ; or Austrian nationals precluded from serving in the armed forces under Art 12, or persons who are not Austrian nationals

Art. 16.—Prohibition relating to Civil Aircraft of German and Japanese Design. Austria shall not acquire or manufacture civil aircraft which are of German or Japanese design or which embody major assemblies of German or Japanese manufacture or design

Art. 17.—Duration of Limitations Each of the military and air clauses of the present treaty shall remain in force until modified in whole or in part by agreement between the Allied and Associated Powers and Austria or, after Austria becomes a member of the United Nations, by agreement between the Security Council and Austria

Art. 18.—Prisoners of War. (1) Austrians who are now prisoners of war shall be repatriated as soon as possible, in accordance with arrangements to be agreed upon by the individual Powers detaining them and Austria

(2) All costs, including maintenance costs, incurred in moving Austrians who are now prisoners of war from their respective assembly points, as chosen by the Government of the Allied or Associated Power concerned, to the point of their entry into Austrian territory, shall be borne by Austria

Art. 19.—War Graves and Memorials. (1) Austria undertakes to respect, preserve and maintain the graves on Austrian territory of the soldiers, prisoners of war, and nationals forcibly brought to Austria, of the Allied Powers as well as of the other United Nations which were at war with Germany; the memorials and emblems on these graves; and the memorials to the military glory of the armies which fought on Austrian territory against Hitlerite Germany.

(2) The Government of Austria shall recognize any commission, delegation or other organization authorized by the State concerned to identify, list, maintain, or regulate the graves and edifices referred to in Paragraph 1, shall facilitate the work of such organizations, and shall conclude in respect of the above-mentioned graves and edifices such agreements as may prove necessary with the State concerned or with any commission, delegation or organization authorized by it. It likewise agrees to render, in conformity with reasonable sanitary precautions, every facility for the disinterment and despatch to their own country of the remains buried in the said graves, whether at the request of the official organizations of the State concerned or at the request of relatives of the persons interred

Part III.—Withdrawal of Allied Forces.

Art. 20.—(1) The agreement on the machinery of control in Austria of June 28, 1946, shall terminate on the coming into force of the present treaty.

(2) On the coming into force of the present treaty, the Inter-Allied Command established under Paragraph 4 of the agreement on zones of occupation in Austria and the administration of the City of Vienna of July 9, 1945, shall cease to exercise any functions with respect to the administration of the City of Vienna The agreement on zones of occupation in Austria shall terminate upon completion of the withdrawal from Austria of the forces of the Allied and Associated Powers in accordance with Paragraph 3 of this article.

(3) The forces of the Allied and Associated Powers and members of the Allied Commission for Austria shall be withdrawn from Austria within 90 days from the coming into force of the present treaty, and in so far as possible not later than Dec. 31, 1955.

(4) The Government of Austria shall accord to the forces of the Allied and Associated Powers and the members of the Allied Commission for Austria pending their withdrawal from Austria the same rights, immunities, and facilities as they enjoyed immediately before the coming into force of the present treaty

(5) The Allied and Associated Powers undertake to return to the Government of Austria after the coming into force of the present treaty, and within the period specified in Paragraph 3 of this article :

(*a*) All currency which was made available free of cost to them for the purpose of the occupation and which remains unexpended at the time of completion of withdrawal of the Allied forces ;

(*b*) All Austrian property requisitioned by the Allied forces or the Allied Commission, and which is still in their possession. The obligations under this sub-paragraph shall be applied without prejudice to the provisions of Art. 22 of the present treaty.

Part IV.—Claims arising out of the War.

Art. 21.—Reparation. No reparation shall be exacted from Austria arising out of the existence of a state of war in Europe after Sept. 1, 1939.

Art. 22.—German Assets in Austria. The Soviet Union, the U.K., the U.S.A., and France have the right to dispose of all German assets in Austria in accordance with the protocol of the Berlin Conference of August 2, 1945.

(1) The Soviet Union shall receive for a period of 30 years concessions to oilfields equivalent to 60 per cent of the extraction of oil in Austria for 1947, as well as property rights to all buildings, constructions, equipment, and other property belonging to these oilfields. . . .

(2) The Soviet Union shall receive concessions to 60 per cent of all exploration areas located in Eastern Austria that are German assets to which the Soviet Union is entitled in conformity with the Potsdam Agreement, and which are in its possession at the present time. . . . The Soviet Union shall have the right to carry out explora-

tions in the areas mentioned for eight years, and to the subsequent extraction of oil for a period of 25 years beginning from the moment of the discovery of oil.

(3) The Soviet Union shall receive oil refineries having a total annual production capacity of 420,000 tons of crude oil. . . .

(4) The Soviet Union shall receive those undertakings concerned in the distribution of oil products which are at its disposal . . .

(5) The Soviet Union shall receive the assets of the Danube Shipping Company (D.D.S.G.), located in Hungary, Rumania, and Bulgaria, and likewise . . 100 per cent of the assets of the Danube Shipping Company located in Eastern Austria.

(6) The Soviet Union shall transfer to Austria property, rights and interests held or claimed as German assets, together with existing equipment, and shall also transfer war industrial enterprises, together with existing equipment, houses and similar immovable property, including plots of land, located in Austria and held or claimed as war booty, with the exception of the assets mentioned in Paragraphs 1-5 of the present Article Austria for its part undertakes to pay the Soviet Union $150,000,000 in freely convertible currency within a period of six years

The said sum will be paid by Austria to the Soviet Union in equal three-monthly instalments of $6,250,000 in freely convertible currency The first payment will be made on the first day of the second month following the month of the entry into force of the present treaty Subsequent payments will be made on the first day of the appropriate month. The last three-monthly payment will be made on the last day of the six-year period after the entry into force of this treaty.

The basis for payments provided for in this article will be the U S dollar at its gold parity on Sept. 1, 1949, i.e $35 for one ounce of gold.

As security for the punctual payment of the above-mentioned sums due to the U.S S R., the Austrian National Bank shall issue to the State Bank of the U S.S.R , within two weeks of the coming into force of the present treaty, promissory notes to the total sum of $150,000,000, to become payable on the dates provided for in the present Article The promissory notes . will be non-interest-bearing The State Bank of the U S.S.R does not intend to discount these notes, provided that the Austrian Government and the Austrian National Bank carry out their obligations punctually and exactly

(7) Legal position of assets

(*a*) All former German assets which have become the property of the Soviet Union in accordance with Paragraphs 1-5 of the present Article shall, as a general rule, remain under Austrian jurisdiction, and Austrian legislation shall apply to them.

(*b*) Where duties and charges, commercial and industrial rights, and the levying of taxation are concerned, these assets shall be subject to conditions not less favourable than those which apply or will apply to undertakings belonging to Austria and its nationals, and also to other States and persons who are accorded most-favoured-nation treatment.

(*c*) All former German assets which have become the property of the U S S R. shall not be subject to expropriation without the consent of the U S S.R.

(*d*) Austria will not raise any difficulties in regard to the export of profits or other income (i e. rents) in the form of output, or of any freely convertible currency received.

(*e*) The rights, properties, and interests transferred to the Soviet Union, as well as the rights, properties and interests which the Soviet Union relinquishes to Austria shall be transferred without any charges or claims on the part of the Soviet Union or on the part of Austria Under the words "charges and claims" is understood not only creditor claims arising out of the exercise of Allied control of these properties, rights, and interests after May 8, 1945, but also all other claims, including claims in respect of taxes. The reciprocal waiver by the Soviet Union and Austria of charges and claims applies to all such charges and claims as exist on the date when Austria formalizes the rights of the Soviet Union to the former German assets transferred to it and on the date of the actual transfer to Austria of the assets relinquished by the Soviet Union.

(8) The transfer to Austria of all properties, rights, and interests provided for in Paragraph 6 of the present Article, and also the formalizing by Austria of the rights of the Soviet Union to the former German assets to be transferred, shall be effected within two months from the date of the entry into force of the present treaty.

(9) The Soviet Union shall likewise own the rights, property, and interests in respect of all assets, wherever they may be situated in Eastern Austria, created by Soviet organizations or acquired by them by purchase after May 8, 1945, for the operation of the [above-mentioned] properties. . . .

The provisions as set forth in sub-paragraphs (*a*), (*b*), (*c*) and (*d*) of Paragraph 7 of the present Article, shall correspondingly apply to these assets.

(10) Disputes which may arise in connexion with the application of the provisions of the present Article shall be settled by means of bilateral negotiations between the interested parties. In the event of failure to reach agreement . . . within three months, disputes shall be referred for settlement to an arbitration commission consisting of one representative of the Soviet Union and one representative of Austria, with the addition of a third member, a national of a third country, selected by mutual agreement between the two Governments.

(11) The U.K., the U.S A., and France hereby relinquish to Austria all property, rights, and interests held or claimed by or on behalf of any of them in Austria as former German assets or war booty. Property, rights, and interests transferred to Austria under this paragraph shall pass free from any charges or claims on the part of the U.K., the U.S.A., or France arising out of the exercise of their control of these properties, rights, or interests after May 8, 1945.

(12) After fulfilment by Austria of all obligations stipulated in the provisions of the present Article or derived from such provisions, the claims of the Allied and Associated Powers with respect to former German assets in Austria, based on the decisions of the Berlin Conference of Aug. 2, 1945, shall be considered as fully satisfied.

(13) Austria undertakes that, except in the case of educational, cultural, charitable, and religious property, none of the properties, rights, and interests transferred to it as former German assets shall be returned to ownership of German juridical persons or, where the value of the property, rights and interests exceeds 260,000 schillings [about £3,600], to the ownership of German natural persons Austria further undertakes not to pass to foreign ownership those rights and properties indicated in Lists 1 and 2 of this Article which will be transferred to Austria by the Soviet Union in accordance with the Austro-Soviet memorandum of April 15, 1955. [Lists 1 and 2 enumerated the oilfields and oil exploration rights held by the Soviet Union in the Soviet zone of Austria]

(14) The provisions of this Article shall be subject to the terms of Annex II of this treaty.

Art. 23.—Austrian Property in Germany and Renunciation of Claims by Austria on Germany. (1) From the date of the coming into force of the present treaty, the property in Germany of the Austrian Government or of Austrian nationals, including property forcibly removed from Austrian territory to Germany after March 12, 1938, shall be returned to its owners. This provision shall not apply to the property of war criminals or persons who have been subjected to the penalties of denazification measures; such property shall be placed at the disposal of the Austrian Government if it has not been subjected to blocking or confiscation in accordance with the laws or ordinances in force in Germany after May 8, 1945.

(2) The restoration of Austrian property rights in Germany shall be effected in accordance with measures which will be determined by the Powers in occupation of Germany in their zones of occupation.

(3) Without prejudice to these and to any other disposition in favour of Austria and Austrian nationals by the Powers occupying Germany, and without prejudice to the validity of settlements already reached, Austria waives on its own behalf and on behalf of Austrian nationals all claims against Germany and German nationals outstanding on May 8, 1945, except those arising out of contracts and other obligations entered into, and rights acquired, before March 13, 1938 This waiver shall be deemed to include all claims in respect of transactions effected by Germany during the period of the annexation of Austria and all claims in respect of loss or damage suffered during the said period, particularly in respect of the German public debt held by the Austrian Government or its nationals and of currency withdrawn at the time of the monetary conversion Such currency shall be destroyed upon the coming into force of the present treaty

Art. 24.—Renunciation by Austria of Claims Against the Allies. (1) Austria waives all claims of any description against the Allied and Associated Powers on behalf of the Austrian Government or Austrian nationals arising directly out of the war in Europe after Sept 1, 1939, or out of actions taken because of the existence of a state of war in Europe after that date, whether or not such Allied or Associated Power was at war with Germany at the time. This renunciation of claims includes the following:

(*a*) Claims for losses or damages sustained as a consequence of acts of armed forces or authorities of Allied or Associated Powers.

(*b*) Claims arising from the presence, operations, or actions of armed forces or authorities of Allied or Associated Powers in Austrian territory.

(*c*) Claims with respect to the decrees or orders of prize courts of Allied or Associated Powers, Austria agreeing to accept as valid and binding all decrees and orders of such prize courts on or after Sept. 1, 1939, concerning ships or goods belonging to Austrian nationals or concerning the payment of costs

(*d*) Claims arising out of the exercise or purported exercise of belligerent rights.

(2) The provisions of this Article shall bar, completely and finally, all claims of the nature referred to herein, which shall henceforward be extinguished, whoever may be the parties in interest. The Austrian Government agrees to make equitable compensation in schillings to persons who furnished supplies or services on requisition to the forces of Allied or Associated Powers in Austrian territory, and in satisfaction of non-combat damage claims against the forces of the Allied or Associated Powers arising in Austrian territory.

(3) Austria likewise waives all claims of the nature covered by Paragraph 1 of this Article on behalf of the Austrian Government or Austrian nationals against any of the United Nations whose diplomatic relations with Germany were broken off between Sept. 1, 1939, and Jan 1, 1945, and which took action in co-operation with the Allied and Associated Powers.

(4) The Government of Austria shall assume full responsibility for Allied military currency of denominations of 5 schillings and under issued in Austria by the Allied military authorities, including all such currency in circulation at the coming into force of the present treaty. Notes issued by the Allied military authorities of denominations higher than 5 schillings shall be destroyed, and no claims may be made in this connexion against any of the Allied or Associated Powers.

(5) The waiver of claims by Austria under Paragraph 1 of this Article includes any claims arising out of actions taken by any of the Allied or Associated Powers with respect to ships belonging to Austrian nationals between Sept. 1, 1939, and the coming into force of the present treaty, as well as any claims and debts arising out of the conventions on prisoners-of-war now in force.

Part V.—Property, Rights and Interests.

Art. 25.—United Nations Property in Austria. (1) In so far as Austria has not already done so, Austria shall restore all legal rights and interests in Austria of the United Nations and their nationals as they existed on the day hostilities commenced between Germany and the United Nation concerned, and shall return all property in Austria of the United Nations and their nationals as it now exists

(2) The Austrian Government undertakes that all property, rights and interests falling under this Article shall be restored free of all encumbrances and charges of any kind to which they may have become subject as a result of the war with Germany, and without the imposition of any charges by the Austrian Government in connexion with their return. The Austrian Government shall nullify all measures of seizure, sequestration, or control taken against United Nations property in Austria between the day of commencement of hostilities between Germany and the United Nations concerned and the coming into force of the present treaty.

In cases where the property has not been returned within six months from the coming into force of the present treaty, application for the return of property shall be made to the Austrian authorities not later than 12 months from the coming into force of the treaty, except in cases in which the claimant is able to show that he could not file his application within this period

(3) The Austrian Government shall invalidate transfers involving property, rights and interests of any description belonging to United Nations nationals, where such transfers resulted from force exerted by Axis Governments or their agencies between the beginning of hostilities between Germany and the United Nation concerned and May 8, 1945.

(4) (*a*) In cases in which the Austrian Government provides compensation for losses suffered by reason of injury or damage to property in Austria which occurred during the German occupation of Austria or during the war, United Nations nationals shall not receive less favourable treatment than that accorded to Austrian nationals, and in such cases United Nations nationals who hold, directly or indirectly, ownership interests in corporations or associations which are not United Nations nationals within the meaning of Paragraph 8(*a*) of this Article shall receive compensation based on the total loss or damage suffered by the corporations or associations and bearing the same proportion to such loss or damage as the beneficial interest of such nationals bears to the capital of the corporation or association.

(*b*) The Austrian Government shall accord to United Nations and their nationals the same treatment in the allocation of materials for the repair or rehabilitation of their property in Austria and in the allocation of foreign exchange for the importation of such materials as applies to Austrian nationals.

(5) All reasonable expenses incurred in Austria in establishing claims, including the assessment of loss or damage, shall be borne by the Austrian Government.

(6) United Nations nationals and their property shall be exempted from any exceptional taxes, levies or imposts imposed on their capital assets in Austria by the Austrian Government or any Austrian authority between the date of the surrender of the German armed forces and the coming into force of the present treaty for the specific purpose of meeting charges arising out of the war or of meeting the costs of occupying forces. Any sums which have been so paid shall be refunded.

(7) The owner of the property concerned and the Austrian Government may agree upon arrangements in lieu of the provisions of this Article.

(8) As used in this Article :

(*a*) "United Nations nationals" means individuals who are nationals of any of the United Nations, or corporations or associations organized under the laws of any of the United Nations, at the coming into force of the present treaty, provided that the said individuals, corporations or associations also had this status on May 8. 1945. The term "United Nations nationals" also includes all individuals, corporations or associations which, under the laws in force in Austria during the war, have been treated as enemy.

(*b*) "Owner" means one of the United Nations, or a national of one of the United Nations as defined in sub-paragraph (*a*) above, who is entitled to the property in question, and includes a successor of the owner, provided that the successor is also a United Nation or a United Nations national as defined in sub-paragraph (*a*). If the successor has purchased the property in its damaged state, the transferor shall retain his rights to compensation under this Article, without prejudice to obligations between the transferor and the purchaser under domestic law.

(*c*) "Property" means all movable or immovable property, whether tangible or intangible, including industrial, literary and artistic property, as well as all rights or interests of any kind in property.

(9) The provisions of this Article do not apply to transfers of property, rights or interests of United Nations or United Nations nationals in Austria made in accordance with laws and enactments which were in force as Austrian law on June 29, 1946.

(10) The Austrian Government recognizes that the Brioni agreement of Aug. 10, 1942, is null and void. It undertakes to participate with the other signatories of the Rome agreement of March 21, 1923, in any negotiations having the purpose of introducing into its provisions the modifications necessary to ensure the equitable settlement of the annuities which it provides [Under the Brioni agreement, Nazi Germany and Fascist Italy seized France's share in the Danube-Sava-Adriatic railway, the ownership of which had been vested in the victorious Powers of World War I under the Rome agreement of 1923.]

Art. 26.—Property, Rights, and Interests of Minority Groups in Austria. (1) In so far as such action has not already been taken, Austria undertakes that, in all cases where property, legal rights or interests in Austria have, since March 13, 1938, been the subject of forced transfer or measures of sequestration, confiscation or control on account of the racial origin or religion of the owner, the said property shall be returned and the said legal rights and interests shall be restored, together with their accessories Where return or restoration is impossible, compensation shall be granted for losses incurred by reason of such measures to the same extent as is, or may be, given to Austrian nationals generally in respect of war damage

(2) Austria agrees to take under its control all property, legal rights and interests in Austria of persons, organizations or communities which, individually or as members of groups, were the object of racial, religious, or other Nazi measures of persecution where, in the case of persons, such property, rights and interests remain heirless or unclaimed for six months after the coming into force of the present treaty, or where in the case of organizations and communities such organizations or communities have ceased to exist. Austria shall transfer such property, rights and interests to appropriate agencies or organizations to be designated by the four heads of mission in Vienna by agreement with the Austrian Government, to be used for the relief and rehabilitation of victims of persecution by the Axis Powers, it being understood that these provisions do not require Austria to make payments in foreign exchange or other transfers to foreign countries which could constitute a burden on the Austrian economy. Such transfer shall be effected within 18 months from the coming into force of the present treaty and shall include property, rights and interests required to be restored under Paragraph 1 of this Article

Art. 27.—Austrian Property in the Territory of the Allied and Associated Powers. (1) The Allied and Associated Powers declare their intention to return Austrian property, rights and interests as they now exist in their territories, or the proceeds arising out of the liquidation, disposal or realization of such property, rights, and interests, subject to accrued taxes, expenses of administration, creditor claims and other like charges. . The Allied and Associated Powers will be prepared to conclude agreements with the Austrian Government for this purpose

(2) Notwithstanding the foregoing provisions, the Federal People's Republic of Yugoslavia shall have the right to seize, retain or liquidate Austrian property, rights and interests within Yugoslav territory on the coming into force of the present treaty. The Government of Austria undertakes to compensate Austrian nationals whose property is taken under this paragraph. [The Yugoslav Government seized Austrian assets in Yugoslav territory after 1945. Austria and Yugoslavia are now negotiating a settlement on the matter]

Art. 28.—Debts. (1) The Allied and Associated Powers recognize that interest payments and similar charges on Austrian Government securities falling due after March 12, 1938, and before May 8, 1945, constitute a claim on Germany and not on Austria.

(2) The Allied and Associated Powers declare their intention not to avail themselves of the provisions of loan agreements made by Austria before March 13, 1938, in so far as those provisions granted to the creditors a right of control over the government finances of Austria.

(3) The existence of the state of war between the Allied and Associated Powers and Germany shall not, in itself, be regarded as affecting the obligation to pay pecuniary debts arising out of obligations and contracts that existed, and rights that were acquired before the existence of the state of war, which became payable prior to the coming into force of the present treaty, and which are due by the Government or nationals of Austria to the Government or nationals of one of the Allied and Associated Powers, or are due by the Government or nationals of one of the Allied and Associated Powers to the Government or nationals of Austria.

(4) Except as otherwise expressly provided in the present treaty, nothing therein shall be construed as impairing debtor-creditor relationships arising out of contracts concluded at any time prior to Sept. 1, 1939, by either the Government of Austria or persons who were nationals of Austria on March 12, 1938.

Part VI.—General Economic Relations.

Art. 29.—(1) Pending the conclusion of commercial treaties or agreements between individual United Nations and Austria, the Government of Austria shall, during a period of 18 months from the coming into force of the present treaty, grant the following treatment to each of the United Nations which, in fact, reciprocally grants similar treatment in like matters to Austria :

(*a*) In all that concerns duties and charges on importation or exportation, the internal taxation of imported goods, and all regulations pertaining thereto, the United Nations shall be granted unconditional most-favoured-nation treatment ;

(*b*) In all other respects, Austria shall make no arbitrary discrimination against goods originating in or destined for any territory of any of the United Nations as compared with like goods originating in or destined for any territory of any other of the United Nations, or of any other foreign country ;

(*c*) United Nations nationals, including juridical persons, shall be granted national and most-favoured-nation treatment in all matters pertaining to commerce, industry, shipping, and other forms of business activity within Austria. These provisions shall not apply to commercial aviation ;

(*d*) Austria shall grant no exclusive or preferential rights to any country with regard to the operation of commercial aircraft in international traffic ; shall afford all the United Nations equality of

opportunity in obtaining international commercial aviation rights in Austrian territory, including the right to land for refuelling and repair, and, with regard to the operation of commercial aircraft in international traffic, shall grant on a reciprocal and non-discriminatory basis to all United Nations the right to fly over Austrian territory without landing These provisions shall not affect the interests of the national defence of Austria.

(2) The foregoing undertaking by Austria shall be understood to be subject to the exceptions customarily included in commercial treaties concluded by Austria prior to March 13, 1938; and the provisions with respect to reciprocity granted by each of the United Nations shall be understood to be subject to the exceptions customarily included in the commercial treaties by that State.

Part VII.—Settlement of Disputes.

Art. 30.—(1) Any disputes which may arise in giving effect to Art 25 shall be referred to a conciliation commission . . . consisting of one representative of the United Nation concerned and one of Austria. If within three months . . . no agreement has been reached, either Government may ask for the addition to the commission of a third member selected by mutual agreement of the two Governments from nationals of a third country. Should the two Governments fail to agree within two months on the selection of a third member . . . either Government may request the heads of the diplomatic missions in Vienna of the Soviet Union, the U K, the U S A, and France to make the appointment. If the heads of mission are unable to agree within one month upon the appointment of the third member, the U N. Secretary-General may be requested by either party to make the appointment.

(2) When any conciliation commission is established under Paragraph 1 of this Article, it shall have jurisdiction over all disputes which may thereafter arise between the United Nation concerned and Austria in the application or interpretation of Article 25 . .

(3) Each conciliation commission shall determine its own procedure, adopting rules conforming to justice and equity.

(4) Each Government shall pay the salary of the member of the conciliation commission whom it appoints, and of any agent whom it may designate to represent it before the commission The salary of the third member shall be fixed by special agreement between the Governments concerned, and this salary, together with the common expenses of each commission, shall be paid in equal shares by the two Governments.

(5) The parties undertake that their authorities shall furnish directly to the conciliation commission all assistance which may be within their power.

(6) The decision of the majority of the members of the commission shall be . . . accepted by the parties as definitive and binding.

Part VIII.—Miscellaneous Economic Provisions.

Art. 31.—Provisions relating to the Danube. Navigation on the Danube shall be free and open for the nationals, vessels of commerce, and goods of all States, on a footing of equality in regard to port and navigation charges and conditions for merchant shipping The foregoing shall not apply to traffic between ports of the same State.

Art. 32.—Transit Facilities. (1) Austria shall facilitate as far as possible railway traffic in transit through its territory at reasonable rates, and shall be prepared to conclude with neighbouring States reciprocal agreements for this purpose.

(2) The Allied and Associated Powers undertake to support the inclusion in the settlement in relation to Germany of provisions to facilitate transit and communication without customs duties or charges between Salzburg and Lofer (Salzburg) across the Reichenhall-Steinpass, and between Scharnitz (Tirol) and Ehrwald (Tirol) *via* Garmisch-Partenkirchen.

Art. 33.—Scope of Application. Articles 25 and 29 shall apply to the Allied and Associated Powers and to those of the United Nations which had that status on May 8, 1945, and whose diplomatic relations with Germany had been broken off between September 1, 1939, and January 1, 1945.

Part IX.—Final Clauses.

Art. 34.—Heads of Mission. (1) For a period not to exceed 18 months from the coming into force of the present treaty, the heads of the diplomatic missions in Vienna of the Soviet Union, the U.K., the U.S.A., and France, acting in concert, will represent the Allied and Associated Powers in dealing with the Government of Austria in all matters concerning the execution and interpretation of the present treaty.

(2) The four heads of mission will give the Government of Austria such guidance, technical advice, and clarification as may be necessary to ensure the rapid and efficient execution of the present treaty both in letter and in spirit.

(3) The Government of Austria shall afford to the said four heads of mission all necessary information and any assistance which they may require in the fulfilment of their tasks devolving on them under the present treaty.

Art. 35.—Interpretation of the Treaty. (1) Except where another procedure is specifically provided for under any Article of the present treaty, any dispute concerning the interpretation or execution of the treaty which is not settled by direct diplomatic negotiations shall be referred to the four heads of mission acting under Art. 34, except that in this case the heads of mission will not be restricted by the time-limit provided in that Article. Any such dispute not resolved by them within a period of two months shall, unless the parties to the dispute mutually agree upon another means of settlement, be referred at the request of either party to a commission composed of one representative of each party and a third member selected by mutual agreement of the two parties from nationals of a third country. Should the two parties fail to agree within a period of one month upon the appointment of the third member, the U N. Secretary-General may be requested by either party to make the appointment.

(2) The decision of the majority of the members of the commission . shall be accepted by the parties as definitive and binding.

Art. 36.—Force of Annexes. The provisions of the Annexes shall have force and effect as integral parts of the present treaty.

Art. 37.—Accession to the Treaty. (1) Any member of the United Nations which on May 8, 1945, was at war with Germany and which then had the status of a United Nation, and is not a signatory to the present treaty, may accede to the treaty and upon accession shall be deemed to be an Associated Power for the purposes of the treaty.

(2) Instruments of accession shall be deposited with the Government of the U.S.S.R. and shall take effect upon deposit

Art. 38.—Ratification of the Treaty. (1) The treaty, of which the Russian, English, French, and German texts are authentic, shall be ratified. It shall come into force immediately upon deposit of instruments of ratification by the U S.S.R., the U K, the U S.A, and France on the one part, and by Austria on the other part. Instruments of ratification shall, in the shortest time possible, be deposited with the Government of the U.S S.R.

(2) With respect to each Allied and Associated Power whose instrument of ratification is thereafter deposited, the treaty shall come into force upon the date of deposit The present treaty shall be deposited in the archives of the Government of the U.S S R., which shall furnish certified copies to each of the signatory and acceding States.

Annex I.

This annex defined the term "war matériel" as used in the treaty as including "all arms, ammunition, and implements of war specially designed or adapted for use in war," and listed such matériel in eight categories: (1) armaments such as rifles, pistols, machine-guns, heavy guns, howitzers, mortars, rocket projectors, self-propelled missiles, grenades, bombs, torpedoes, mines, and depth-charges; (2) armoured fighting vehicles, armoured trains, and armour-plate more than three inches thick, (3) range-finding and fire-control equipment, gun and bomb sights, assault bridging and boats, and specialized personal war equipment, (4) all types of warships, landing craft, and naval vessels not intended for civilian use, (5) all types of aircraft and equipment designed for military use; (6) asphyxiating, vesicant, lethal, toxic or incapacitating substances intended for war purposes, (7) propellants, explosives, pyrotechnics or liquified gases destined for propulsion, explosion, charging or filling of war matériel, not capable of civilian use or manufactured in excess of civilian requirements; (8) factory and tool equipment specially designed for the production and maintenance of war matériel.

Annex II.

This was worded as follows: "Having regard to the arrangements made between the Soviet Union and Austria, and recorded in the memorandum signed at Moscow on April 15, 1955, Article 22 of the present treaty shall have effect subject to the following provisions:

(1) On the basis of the pertinent economic provisions of the April 15, 1955, arrangements between the Soviet Union and Austria, the Soviet Union will transfer to Austria within two months from the date of entry into force of the present treaty all property, rights and interests to be retained or received by the Soviet Union in accordance with Art. 22, except the Danube Shipping Company (D.D.S.G) assets in Hungary, Rumania and Bulgaria.

(2) It is agreed that, in respect of any property, right or interest transferred to Austria in accordance with this annex, Austria's rights shall be limited only in the manner set out in Paragraph 13 of Art. 22."

After the signing ceremony brief statements were made by the Foreign Ministers of the four occupying Powers, and also by Dr. Figl.

M. Molotov paid tribute to Austria's struggle for freedom, and declared that the signing of the treaty was "an event of the utmost world importance" which marked the beginning of a new development in international relations. "The Soviet Union," he said, "is anxious that the solution of the German problem should also not be postponed, but present circumstances have proved this impossible New obstacles have arisen seriously complicating the situation. The danger of the revival of an aggressive German militarism forces the peace-loving European States to new measures for safeguarding their security." He particularly welcomed Austria's decision to become a neutral country like Switzerland, and expressed the conviction that other countries would follow a similar course.

Mr. Macmillan, after paying a tribute to previous British Foreign Secretaries concerned with negotiating the treaty—Mr. Bevin, Mr. Morrison, and Sir Anthony Eden—said that the Austrian people over the past 10 years had shown "constancy and courage" and had achieved great progress. "Today's ceremony," he declared, "marks the beginning of a new epoch for Austria It is a happy day for all of us. But for Austria herself it is also a day of challenge. In meeting that challenge she will know that she can always rely on the warm and steady friendship of the British people."

Mr. Dulles, who expressed the view that the freedom and independence of Austria had been won by the Austrian people themselves, rather than having been conferred upon them, added. "Today we feel indebted to the Austrian people because through their patient endurance they have brought to Europe an application of what the U.N. Charter refers to as 'the respect for the principles of equal rights and self-determination of peoples'."

M. Pinay said that France had always regarded the restoration of Austrian liberty and sovereignty not only as an Austrian but as a European aim. "France does not doubt," he added, "that Austria will soon find her natural place in the community of nations, and take her rightful position in the United Nations."

Dr. Figl, speaking at the close of the ceremony, thanked the Foreign Ministers for having restored to Austria the independence of which she had been deprived for 17 years. He pledged active Austrian participation in all world organizations in order to contribute to international understanding and peace, and ended by declaring: "Austria is free!"

The signing of the treaty was enthusiastically acclaimed in Vienna and throughout Austria, all church bells in the country being rung for 15 minutes as a sign of national rejoicing. All buildings were bedecked with flags, large crowds thronged the main thoroughfares, and numerous street parties were held. After the signing ceremony the Foreign Ministers appeared together on the balcony of the Belvedere Palace and were loudly cheered by the vast throng below. They subsequently drove through the crowded streets to a luncheon given by Dr. Korner, the Austrian President, and in the evening attended a dinner given by the Federal Chancellor (Dr. Raab) at the Schonbrunn Palace, followed by a reception attended by the diplomatic corps and prominent personalities in Austrian public life.

Following the signature of the treaty, the Austrian Foreign Ministry published the same evening the text of a resolution on Austria's permanent neutrality to be placed before the *Nationalrat* (the Lower House of the Austrian Parliament). The significant paragraphs were as follows:

"(1) With the object of the lasting and perpetual maintenance of her independence from without and the inviolability of her territory, as well as in the interest of maintaining internal law and order, Austria declares of her own free will her perpetual neutrality, and is resolved to maintain and defend it with all means at her disposal.

(2) Austria, in order to secure these objectives, will join no military alliances and will not permit the establishment of military bases of foreign States on her territory. In this connexion, she declares her desire to observe at all times in her relations with other States the principles laid down in the U.N. Charter, and once again voices her willingness and ability to accede to and observe the obligations contained in the Charter."—(Wiener Zeitung - Neue Zurcher Zeitung - Times - New York Times - Le Monde, Paris) **(Prev. rep. 14154 A.)**

A. GAMBIA. — Constitutional Changes. - New Legislative Council. - Ministerial Appointments.

The first session of the Gambia Legislative Council, which was elected under the new Constitution in October last, was opened on Dec. 14, 1954, when a message from H.M. the Queen was read by the Governor, Sir Percy Wyn Harris.

In the elections in Bathurst and Kombo on Oct. 19, 1954, the four candidates returned were Mr. P. S. N'jie (United Party), the Rev. J. Faye (Democratic Party), Mr Garba-Jahumpa (Moslem Congress), and Mr H Madi (All-Village Party). In accordance with the Constitution, seven members were elected from the Protectorate, and the 11 representatives [i.e. those from Bathurst and Kombo and from the Protectorate] then selected three more members from a panel of nine names compiled by the Bathurst Town Council and the Rural Authority. The three members so chosen all belonged to the Moslem Congress party.

Subsequently the Executive Council was formed with an elected majority for the first time; it consists of the Governor, five official, and seven unofficial members. Ministerial appointments were later made as follows. Mr. P. S. N'jie, Education and Welfare; Rev. J. Faye, Communications and Works; Mr. Garba-Jahumpa, Agriculture and Natural Resources.

B. UNITED KINGDOM. — British Council. - Formation of Soviet Relations Committee.

The Foreign Office announced on May 11 that H.M. Government had asked the British Council to undertake the "promotion of closer cultural relations with the Soviet Union," and that the Council had accordingly set up a five-man Soviet Relations Committee "to encourage mutual understanding between the two countries, chiefly by sponsoring visits in both directions by small groups of people."

Members of the committee, it was stated, had already proposed to the Soviet Embassy reciprocal visits by groups of persons concerned with agriculture, arts and architecture, broadcasting, engineering, journalism, law, literature, local government, medicine, and the natural sciences. An exchange of theatrical companies had also been suggested. It was explained that particular emphasis was being laid on the possible long-term value of visits to Britain by leaders of Russian intellectual and artistic life.

The chairman of the Soviet Relations Committee will be Mr. Christopher Mayhew, Labour M.P. for Woolwich East in the last Parliament, and the vice-chairman Mr. C. E. Mott-Radclyffe, Conservative M.P. for Windsor. Both Mr. Mayhew and Mr. Mott-Radclyffe are members of the British Council's executive committee. (Times - Daily Telegraph)

C. SHIPPING. — World Construction Figures.

Lloyd's Register returns of merchant shipbuilding for the first quarter of 1955, published on April 27, gave the gross tonnage under construction throughout the world (excluding the U.S.S.R., Poland, and China, as well as vessels under 100 tons, barges, etc) as 5,963,187 tons, of which 35.96 per cent was building in the U.K. and 64.04 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 335 of 2,144,146 tons (steamers 1,282,525 tons, motorships 861,621 tons), including 2 steamers of over 30,000 tons, 22 steamers of 20,000-25,000 tons, and 15 steamers and 2 motorships of 15,000-20,000 tons. Of the total, 244 ships (1,388,074 tons) were building for Great Britain and N. Ireland, 27 (81,470 tons) for other British Commonwealth countries, 25 (326,968 tons) for Norway, 11 (169,880 tons) for Panama, 3 (63,000 tons) for the U.S.A., 5 (34,970 tons) for Greece, 3 (31,220 tons) for Liberia, 1 (6,500 tons) for Honduras, 10 (5,280 tons) for Burma, 3 (1,500 tons) for the U.S.S.R., 1 small vessel for Brazil, and 2 ships (34,700 tons) for unspecified countries. Principal shipbuilding centres were the Clyde (105 ships of 681,344 tons), the Tyne (39 ships of 399,330 tons), the Tees (22 ships of 236,934 tons), Sunderland (27 ships of 212,790 tons), Belfast (17 ships of 211,250 tons), Liverpool (20 ships of 150,768 tons), and Barrow (5 ships of 107,140 tons).

Ships building abroad numbered 941 of 3,819,041 tons (steamers 1,118,817 tons, motorships 2,400,224 tons), divided as follows: Germany 235 (665,429 tons), Netherlands 135 (545,325 tons), Japan 77 (535,513 tons), France 61 (415,105 tons), Sweden 72 (406,545 tons), Italy 56 (235,402 tons), Norway 52 (206,630 tons), Spain 59 (170,292 tons), Denmark 31 (138,304 tons), British Commonwealth countries 51 (129,640 tons), the U.S.A. 14 (113,760 tons), Belgium 20 (103,368 tons), Yugoslavia 22 (73,847 tons), Finland 27 (50,729 tons), Portugal 5 (17,582 tons), Turkey 12 (6,890 tons), Indonesia 9 (3,550 tons), the Irish Republic 1 (730 tons), and Iceland 2 (400 tons). The total included 1 steamer of over 30,000 tons in Japan, 3 steamers of 25,000-30,000 tons in Japan, and 1 motorship of this size in the Netherlands, 7 steamers each of 20,000-25,000 tons in France and Japan, 3 in Germany, 2 each in the Netherlands and the U.S.A., and 1 in Sweden, as well as 2 motorships of this size each in Denmark, France, Germany, and Spain.

Ships launched during the quarter included the tankers *World Grandeur* (38,500 tons deadweight) and *World Guardian* (32,500 tons), launched in March from the Howaldtswerke shipyards at Hamburg and Kiel respectively for Mr. Stavros Niarchos, the Greek shipowner, and the tanker *Vasum* (31,000 tons), launched by Crown Princess Beatrix on Jan. 16 from the Amsterdam yard of the Netherlands Shipbuilding Co for La Corona Petroleum Co (Royal Dutch-Shell group).

Ships ordered during the quarter included (*a*) a 22,000-ton liner (to be named *Sylvania*) ordered on March 18 by the Cunard line from John Brown and Co., Clydebank, for the Canadian service, (*b*) a 29,000-ton liner ordered on March 22 by the Union-Castle line from Harland and Wolff, Belfast, for the South African mail service. On March 11 it was announced that after lengthy negotiations the Dutch Government had agreed to assist the Holland-America line financially in building a 37,000-ton liner, intended as a sister-ship to the *Nieuw Amsterdam* on the Rotterdam - New York service.

Tankers building throughout the world numbered 242 of 3,103,257 tons, including 86 (1,104,368 tons) in the U.K., 27 (365,262 tons) in the Netherlands, 17 (326,600 tons) in Japan, 15 (277,887 tons) in France, 20 (265,519 tons) in Sweden, 21 (227,898 tons) in Germany, and 15 (149,250 tons) in Norway. (Lloyd's List and Shipping Gazette) **(Prev. rep. 14065 A.)**

D. UNITED KINGDOM. — Financial and Monetary Policy. - Defence Bonds Conversion Operation.

The Treasury announced on March 11 that holders of 3 per cent Defence Bonds purchased between May 7 and July 31, 1945, and maturing between May 7 and July 31, 1955, would be invited to continue their bonds until Aug. 1, 1955. Those accepting would then be paid a full six months' interest at 3 per cent and the maturity premium of £1 per cent, and their bonds would be exchanged into the same amount of 3½ per cent Defence Bonds (Second Conversion Issue). The terms of the latter would be the same as those of the 3½ per cent Defence Bonds currently on sale, except that interest would be payable on February 1 and August 1. (Treasury Press Office) **(Prev. rep. 13975 B.)**

E. SOUTH PACIFIC COMMISSION.—Appointment of New Secretary-General.

Dr. Ralph Clairon Bedell was sworn-in as secretary-general of the South Pacific Commission on March 1, in succession to Sir Brian Freeston. Dr. Bedell (51), a departmental head in the U.S. Department of Health, Education, and Welfare, had been responsible for recommending technical assistance programmes in education for many countries receiving U.S. aid. He had also taken an active part in the work of the Caribbean Commission and the West Indian Conference.
(South Pacific Commission, Nouméa) **(Prev. rep. 12955 A.)**

A. UNITED KINGDOM. — The General Election. - Dissolution of Parliament. - Nominations. - Conservative, Labour, and Liberal Party Manifestos.

Following the Prime Minister's announcement of April 15 that a general election would be held on May 26, Parliament was dissolved by Royal Proclamation on May 6 after it had been prorogued by H.M. the Queen. Party strengths at the dissolution (excluding the Speaker of the House of Commons) were: Conservatives and associates 319, Labour 293, Liberals 6, Irish Nationalists 2, Irish Labour 1, with three seats vacant. The dissolved Parliament had been elected on Oct. 25, 1951, and had thus had a lifetime of just over 3½ years. The 48 by-elections held during that period resulted in only one change in representation: a Conservative gain from Labour at Sunderland South.

The three vacancies at the dissolution were at Norwich South, the Pollok division of Glasgow, and Gravesend, the first two seats having been held by the Conservatives and the third by Labour. The vacancies at Norwich South and Pollok were caused by the conferment of baronies on their respective members, Mr Henry Strauss and Commander T. D. Galbraith, in the governmental reorganization which followed Sir Anthony Eden's assumption of the Premiership (see page 14132). The Gravesend vacancy was caused by Sir Richard Acland's resignation from the Labour Party on the issue of the hydrogen bomb (see 14153 B).

Owing to the redistribution of seats (see 14166 A) the new House of Commons will have 630 members, five more than the former House. Of the 630 members, 42 will be returned by the London Boroughs, 247 by the English Boroughs (excluding London), 222 by the English Counties, 10 by the Welsh Boroughs, 26 by the Welsh Counties and Monmouthshire, 32 by the Scottish Burghs, 39 by the Scottish Counties, and 12 by Northern Ireland.

In addition to the constituency changes described in 14166 A, the reorganization of constituency boundaries involved the following alterations (*a*) in Nottinghamshire, the creation of the new constituency of Ashfield and the abolition of the former Broxtowe division; (*b*) in Birmingham, the creation of the new constituencies of All Saints and Selly Oak and the abolition of the former Erdington and King's Norton divisions, (*c*) a readjustment of the three Croydon constituencies, now known as North-East, North-West, and South, (*d*) a reduction of the Hull constituencies from four to three; (*e*) in the East Riding of Yorkshire, the creation of the new divisions of Howden and Haltemprice (the last-named was formerly one of the Hull constituencies) and the abolition of the former Beverley division, (*f*) in Manchester, the creation of the new constituency of Openshaw and the abolition of the former Clayton division, (*g*) extensive readjustments of the four Nottingham divisions, (*h*) similar constituency readjustments in Bradford.

Nominations for the general election closed on May 16, when 1,409 candidates were presented for the 630 seats. Every constituency in the United Kingdom was contested, and, for the first time since 1832, there were no unopposed returns. Candidatures by party affiliations were as follows. 624 Conservatives (including 46 National Liberals and Conservative-Liberal candidates, and 12 Ulster Unionists in Northern Ireland); 620 Labour, of whom 38 were sponsored by the Co-operative movement and stood as Labour and Co-operative candidates; 110 Liberals; 17 Communists; and 38 others, including Independents, I.L.P., Scottish Nationalists, Welsh Nationalists, and (in Northern Ireland) 12 Sinn Fein nominees. There were 92 women candidates.

In five of the six constituencies which returned Liberal members in 1951—Bolton West, Huddersfield West, Cardiganshire, Carmarthenshire, and Montgomeryshire—the Conservatives put forward no candidates. (In the sixth constituency, Orkney and Shetland, each of the three parties presented candidates, as in 1951.) In Pembrokeshire, the sitting Labour member (Mr. Desmond Donnelly) was opposed only by an Independent, neither the Conservatives nor the Liberals putting forward a candidate. With these exceptions, the Conservatives (or associated parties such as the National Liberals) contested every seat in Great Britain, whilst the Ulster Unionists contested all 12 Northern Irish seats.

The Labour Party contested every seat in England, Scotland and Wales except the Speaker's constituency (Cirencester and Tewkesbury), where, however, an Independent Socialist presented his candidature. In the Exchange division of Liverpool, the sitting Labour member—Mrs. Elizabeth Braddock—was opposed by an Independent Labour candidate as well as by a Conservative, whilst at Gravesend the official Labour candidate, Mr. Victor Mishcon (lately chairman of the London County Council), was opposed by Sir Richard Acland (standing as an Independent opposed to the manufacture of the hydrogen bomb) and also by a Conservative.

Several prominent members of the Labour Party were affected by the redistribution of seats; e.g., Dr. Edith Summerskill, the party chairman, was adopted as candidate for Warrington following the disappearance of the West Fulham constituency, which she had formerly represented. Sir Frank Soskice (the former Attorney-General), whose constituency of Neepsend, Sheffield, was abolished under the redistribution, failed to obtain the nomination at Gorton (Manchester) and was consequently left without a constituency. The Gorton divisional party chose as its candidate Mr. K. Zilliacus (M.P. for Gateshead from 1945-50), who was expelled from the Labour Party in 1949 after attending a Communist-sponsored world peace conference in Paris, and was readmitted to party membership in 1952. Mr Woodrow Wyatt, formerly Labour M.P. for Aston (Birmingham), was nominated for Grantham (Lincolnshire), where the Conservatives had a majority of over 2,000 in 1951.

All 12 seats in Northern Ireland, including the two traditionally held by the Irish Nationalists (Mid-Ulster, and Fermanagh and South Tyrone), were contested by Sinn Fein candidates, eight of whom—all members of the illegal I.R.A.—were serving prison sentences of more than 12 months. Five of them (now in Belfast prison) had been sentenced for taking part in the raid on the Omagh military barracks (see 13975 A). The Irish Nationalist candidates—including the two former Nationalist M.P.s—withdrew in favour of the Sinn Fein nominations.

The Ulster Unionist Chief Whip (Mr. Topping) issued the following statement on May 16: "Ulster voters should take note that in certain constituencies disqualified persons are standing against Unionist candidates. A convicted felon serving a term of imprisonment in excess of 12 months is a disqualified person. Votes knowingly given to such a person are lost or thrown away. If they are elected an application will be made in court to unseat them and to declare the candidate with the next number of votes elected."

Over 60 members of the former House did not seek re-election. They included Mr. Ralph Assheton (Conservative), formerly member for Blackburn West, and a former Financial Secretary to the Treasury, Professor Sir Douglas Savory (76), Ulster Unionist member for South Antrim since 1950, and for ten years previously for Queen's University, Belfast; Mr Alfred Barnes (68), Minister of Transport in the last two Labour Governments—in which capacity he piloted through the House the Bills for the nationalization of road and rail transport—and member for East Ham South for nearly 30 years, Mr Tom Driberg a member of the National Executive Committee of the Labour Party, and formerly M.P. for Maldon, Essex; and Dr Mont Follick, formerly Labour M.P. for Loughborough.

The policy statements of the Conservative, Labour, and Liberal parties are given below, together with (*a*) summaries of separate Labour statements on agriculture, the cost of living, and the cotton industry, and (*b*) a separate Conservative statement on agriculture.

The Conservative Manifesto.

The Conservative and Unionist Party's election manifesto, issued under the title *United for Peace and Progress*, was published on April 29 and is reproduced below under cross-headings:

Introduction. "Two parties have governed in Great Britain in these post-war years. The effective choice at this election will lie between these two . . . We ask the British people to make this comparison. Which were better for themselves, for their families and their country? The years of Socialism or the years of Conservatism that have followed? Let us look at the record.

Socialists claimed that the political Left would be able to speak to the Soviets in comradeship. This proved an empty boast. They promised that their methods of 'planning' would make us masters of our economic destiny. Yet they allowed one financial crisis after another to rock our land. They pretended that their policy was bringing prosperity. In fact it opened up an endless vista of filling in forms, cutting out coupons, applying for permits, waiting on housing lists, and standing in queues. For six years their meddling and muddling made post-war problems harder and gravely injured our strength. The climax came in 1951, when chronic inflation at home cut more than 2s. off the value of every £ and the worst balance-of-payments crisis in our history brought the nation to the brink of bankruptcy.

Under Conservative administration we have broken away at long last from the regular cycle of crises. We have proved, by re-establishing confidence in our currency, by maintaining full employment, by restoring housewives' choice, and by smashing housing records, that Conservative freedom works. We in Britain are producing, building, selling, earning, and buying more today than ever before. Personal savings have more than trebled since 1951. Judging by this alone the nation has regained faith in its own future. Abroad, too, we have turned a more hopeful page. Imaginative diplomacy has awakened respect for British leadership. . . .

The successes of Conservatism have now made possible a fine and ambitious target. We believe that the British people have a real chance during the coming 25 years to double their standard of living. The future beckons to this generation with a golden finger. Peace can bring abundance for all, if we match the opportunity with the will to prosper.

Conservatives do not pretend that the way ahead is easy. There will be no lack of obstacles and dangers in our path. We shall need every ounce of individual effort and resourcefulness that we can muster. We shall need a spirit of partnership and a firm sense of duty to our country. We shall need a general readiness to save as well as to spend. We shall need a Government that will lead, and not hamper.

Socialists cannot be trusted to provide such a Government. They failed in their six years of office. Their appeal to the electorate in 1951 was founded, not on constructive policies, but on scares—that we were warmongers, that we would create mass unemployment, that we would slash the social services—which experience has proved were lies. They have spent most of their time in Opposition quarrelling with one another. On vital issues of State policy they cannot speak as a united party. In so far as they have a programme at all, it

consists of a mixture of more and more nationalization and a return to State restrictions and controls. . . . A vote for Socialism is a vote for the policy which was tried and which failed To vote Conservative is to invest in success.

Atomic Energy and Disarmament. Already research, medicine, and industry are making great and growing use of atomic material manufactured in Britain. Already our country leads the world in its programme of nuclear power stations for generating electricity We give our fullest support to President Eisenhower's initiative to develop atoms for peace through an international agency, and will readily contribute from our own resources.

Britain, like America and Russia, has the knowledge and capacity to make nuclear weapons. That we should use this knowledge is not in dispute between the parties The Socialist Government made the atomic bomb The Socialist Opposition has said it shares our view that the possession of the hydrogen bomb is necessary Why? Because to have the hydrogen bomb is today the best way of preventing war; the best and perhaps the only way to convince the Communists that they have nothing to gain, and indeed everything to lose, from aggression, whereas the whole world has everything to gain from peace and general disarmament.

The Conservative Government will continue to strive for world disarmament. To be real, such disarmament must be balanced, all-round, and effectively controlled. We cannot agree to one-sided disarmament. The issue is not simply whether to ban the hydrogen bomb. . . . Banning the bomb alone would make the risks of war not smaller but greater, as long as the Communists retained their superiority in all other arms and in manpower Therefore we say we must not only abolish nuclear weapons, but also reduce armies and armaments to a point where no one State can threaten the peace We say, too, that there must be effective international inspection and safeguards, applying both to nuclear and other weapons. We have made in the U.N far-reaching and constructive proposals to these ends. Up to now the Communist Powers have rejected these proposals. . . .

Defence Policy and National Service. Meanwhile our interest and duty is to make war less likely by building up, with our allies, the most powerful deterrent to aggression we can achieve. Our defence policy aims to bring each of the Services into line with the strategy of the nuclear age, to arm each with the most modern weapons, to improve conditions of life in the forces, and to re-shape home defence where the need for civilian services will remain vital.

The Conservative Party does not regard the current two-years period of whole-time National Service as necessarily having come to stay. Its object is twofold . to ensure that the active forces have enough men to carry out their commitments, and to build up trained reserves of skilled men for an emergency. National Service is thus an instrument of our foreign and Imperial policy. But it is not an end in itself. A Conservative Government will continue to suit its application, and the period of service, to the needs of the time.

Foreign Policy. With our Commonwealth and Atlantic partners this country serves the common cause of freedom and peace. We and other Commonwealth countries joined with the United Nations in resisting aggression in Korea. We play a leading part in the Atlantic Alliance. Britain too by her initiative has helped to create Western European Union, the hub of the alliance between the free peoples of the Continent.

In Western European Union we have undertaken an act of faith without precedent in British history, in that we are pledged to keep our forces on the Continent so long as they are needed by our European allies. This British pledge, following the French rejection of E.D.C., led to the London and Paris agreements. It has restored the basis of European unity. It has strengthened NATO by giving America and Canada added confidence in their European partners. It holds out the hope of a new and friendly relationship between France and Germany.

The Soviets began to rearm Eastern Germany seven years ago. In carrying forward the policy set on foot by the Labour Government of bringing the German Federal Republic into the Western defence system, we have erected a barrier to aggression, not to negotiation. . . .

We are determined to keep our Western Alliance defensive in character, to indulge in no provocation, to take advantage of every chance to settle disputes. In the changed Soviet attitude towards the signature of an Austrian Treaty, which we have repeatedly proposed, we may be seeing a first-fruit of the ratification of the London and Paris agreements. We hope that this new mood may extend to other outstanding problems. It is still our hope that the Soviet Government can be brought to agree to the unity of Germany on the basis of free elections. Now ratification is complete and the unity of the West assured, we shall welcome and work for any high-level meeting or conference with the Soviets which seems to be practicable and useful.

During this period of Conservative Government a fresh spirit of initiative and of refusal to accept stalemate has already been successfully brought to bear on many problems which once seemed insoluble. Not only was Western European Union due to a British initiative, but in the Korean armistice, in the Geneva settlement of the Indo-China war, which could so easily have become a world conflict, and in the ending of the Trieste dispute, our country played a leading part.

On taking office we faced difficult and dangerous situations in Persia and Egypt. Today there are agreements with both these countries. That with Egypt has enabled us to re-deploy our forces. That with Persia has meant that oil is flowing from Abadan once again. Our prestige throughout this area has been restored. Thus we have a better chance to continue helping the countries of the Middle East in their plans both for defence and for economic development, and also to work for a reconciliation between the Arab States and Israel.

In the Formosa Straits we should like to see a guarantee on both sides not to resort to force, and the withdrawal of Chinese Nationalist forces from the coastal islands. This could lead to the reconsideration at an appropriate moment both of Chinese representation in the United Nations and the future status of Formosa. The South-East Asia Treaty Organization, guaranteeing the Geneva settlement, is the first step towards collective security in this area. The basic necessity is strength in arms; but social and economic betterment can be a powerful reinforcement in less developed countries which might otherwise be undermined by Communist infiltration We shall make a real contribution to the raising of living standards both under the Colombo Plan and through the Agencies of the United Nations.

Commonwealth and Colonial Policy. It is of the first importance that machinery for consultation between the self-governing partner members of the Commonwealth, already so close, should be steadily improved and perfected . . . We are in constant touch on foreign affairs and defence As opportunity offers, we should like to see Commonwealth Ministers with responsibility for other aspects of public policy, such as the social services, meeting and consulting together.

We wish to strengthen the cohesion and influence of the Commonwealth. We uphold the principle of racial partnership, as exemplified in the new Federation of the Rhodesias and Nyasaland so auspiciously launched and increasingly enjoying the confidence of Europeans and Africans. We shall work to raise living standards and to guide Colonial peoples along the road to self-government within the framework of the Commonwealth and Empire. We shall do all we can to insulate these problems from the heat of party conflict.

Commonwealth partnership enabled us to stave off the economic perils that faced the whole Sterling Area at the time the Conservative Government took over. It offers the best hope of prosperity for the future. Conservative policy will stimulate the flow of private and public capital from London for sound Empire development. Last year alone the Government approved applications for new investment in the Commonwealth to a total of £160 million. In addition there was much private investment in the sterling Commonwealth which did not need Government approval. Great wealth-creating projects are under way in all the Commonwealth countries and in the Colonial territories too. . . .

Like all countries of advanced development and democratic tradition, we have responsibilities towards the less fortunate peoples of the world. We have a special responsibility for the welfare and happiness of the seventy millions who live in British Colonies, Protectorates, and Trust Territories. We must give them every help in their continuing assault on ignorance, want and disease. . . .

From Africa westwards to the Caribbean and eastwards to the Pacific Islands, the Colonies are thinking of their future They differ vastly in size, resources, and tradition. Each must be helped to solve its own problems. . . . So diverse are the circumstances that it would be unrealistic to lay down a cut and dried time-table for the evolution of political maturity. Our purpose and goodwill in achieving self-government for the Colonies are proclaimed by recent constitutional advances in many parts of the Empire, for example in West Africa. We believe that people in self-governing Colonies will find greater security, prosperity, and freedom by remaining part of the Commonwealth. . . . In multi-racial communities we believe that the way to progress must lie through a real racial partnership.

A Conservative Government would work to these ends throughout the Colonies, judging each problem individually and striving to solve it without prejudice. We shall maintain law and order wherever peaceful progress is threatened; doing all in our power to settle rival claims—whether political, religious, or racial—impartially, and with tolerance and humanity.

Economic Policy. The economic policy of the Conservative Party is to help create the conditions in which the British people can steadily improve their standard of living. As long as we conduct our affairs wisely and get on with the job of raising the national product year by year. the country can be twice as well off in 25 years' time as it is now. So we say: Let us strive to double our standard of living within this period. Let everyone have a firmer stake in the fortunes of his country. Let everyone have a fuller chance to earn more and to own more, to get on and to have more enjoyment as well. Given the boon of world peace, all this can be ours, if we will work for it and save for it and so deserve to have it. How, then, shall we invest in success?

(1) We must believe in it. We need throughout the nation an ever-growing sense of partnership and a lively spirit of venture. If we take pride in our work, have confidence in one another, and are ready to give up outworn attitudes and methods for new, then we are already half-way to success.

(2) We must devote more of our resources to increasing productivity; and this means saving as well as spending. First thought must go to investment in productive forms of capital - factory and farm buildings, plant and machinery, communications and power. This must be matched by far-sighted educational policies to augment our scientific and technical skills.

(3) We must invest in wealth-creating schemes overseas, and especially in the Commonwealth and Colonies.

(4) We must continue to sell more and earn more abroad. Only thus can we pay for the extra raw materials we shall need for rising production, and build up a trading surplus large enough to increase our investment overseas.

Trade Policy. We live by world trade: the more world trade there is, the better we shall live. We share in it, we ship it, we insure it, and we help finance it. We have been selling, and we shall have to go on selling, against fierce competition in the markets of the world.

The first object of our policy must be to enable British industry to do this in what is likely to remain a buyer's market Therefore, we have got rid of a vast range of manufacturing controls and we aim to stay rid of them. British industry must be adaptable, and ready not only to hold old markets but to jump into new ones with new ideas and new products. Freedom from control and a stable home economy are the true foundations of a successful export trade; both would be in peril under Socialism.

For our part, we intend to make our export trade a first charge upon our resources Without success in this field, neither defensive strength nor social welfare can be achieved, and it is our object to achieve them both. It is with this in mind that the Conservative Government has taken the lead in organizing a move towards a world-wide system of freer trade and freer payments. The two must march together We must re-establish sterling in a position so strong and respected that it can play its full part as a major international currency.

The solution of the complex problems involved will take time. It requires, in particular, a suitable response from the dollar world, such as the President of the United States has recommended. We in Britain have shown our goodwill and intentions. For example, we have relaxed restrictions on imports from Europe, and re-opened our international commodity markets.

Our aim being to expand trade, we must observe a system of trade rules which makes such an expansion possible. This policy is in harmony with our Commonwealth trade relations, and the Commonwealth countries themselves pursue it. More than half our trade consists of purchases from or sales to the Commonwealth and Empire. We have negotiated special arrangements under GATT in the interests of Colonial industries.

It will be our constant aim to safeguard the special interests of the cotton textile industry in the important interchanges taking place with other Governments particularly concerned.

We have announced our decision that trade relations with Japan should continue to be dealt with by mutually negotiated arrangements, and our desire for a long-term commercial treaty.

We propose to strengthen our defences against unfair trade practices The Government has taken a leading part in seeking to obtain the elimination or limitation of export subsidies in international trade Material injury can be caused to domestic industry through the use by other countries of these devices, and we propose to take powers to impose countervailing and anti-dumping duties in such cases and within the terms of our international agreements.

Any country pursuing a policy of economic expansion and full employment faces a constant danger of inflation. . . Here sound monetary and fiscal policies are powerful weapons. We propose to continue with their flexible use.

Employment. Under Conservative administration a working population of record peace-time size has been kept fully employed, without Socialist controls and without continual inflation. In the intensely competitive times ahead, continued full employment must mean, not only everyone in a job, but everyone doing their job to the full. Only with a high output - high earnings economy can we maintain and improve our trading position

The Government has sought, with an encouraging measure of success, to create the right climate of confidence and to foster the idea of a common interest and task Team-work is an essential driving force of a dynamic economy. There is really only one side in modern industry, and all of us are on it. As Conservatives we have always believed this.

We shall follow up our work for better human relations in industry by discussing with the joint advisory bodies of employers and Trade Unions, and with the British Productivity Council, how best they can increase their status and the scope of their work. We shall encourage such individual employers as are not already doing so to keep their workpeople regularly and frankly informed of the fortunes and problems of their firm. We wish to see proper rewards for extra skill, effort, and responsibility. Where they are suitable and desired, co-partnership and profit-sharing schemes should be encouraged

We intend to launch a vigorous drive to promote the health, welfare, and safety of the working population, with the aid of our new Mines and Quarries Act and of the recently established Industrial Health Advisory Committee. Legislation will be passed to promote a steady improvement of conditions for other workers, including those in transport and in farming, in offices and in shops. We shall also introduce new legislation to safeguard the employment of children.

Equal Pay. The Labour Party has been talking about equal pay for as long as anyone can remember; it has taken a Conservative Government to do something about it for its own employees. In fulfilment of our pledge at the last election, the principle of equal pay for equal work in the public service is now being applied by stages.

Competitive Enterprise. We reaffirm our belief in the system of free competitive enterprise The Conservative Party is strongly opposed to any further measure of nationalization. We are equally anxious that private enterprise should be free from any reproach of harmful restrictive practices. . . . The Monopolies Commission, first suggested and recently strengthened by the Conservatives, has started on the right path. Its recommendations have been acted upon. The Conservative Government has made a new approach by referring for examination certain practices which cover a wide range of industry. . . . Our policy is to obtain an impartial statement of the facts and their effect on the national interest, and then to take the action appropriate in each case.

Consumer Choice. Socialists, the makers of new monopolies, are posing now as the champions of the consumer. Multiply the Ministries and clamp on the controls is what, in effect, they say. But that was precisely their policy after the war. It led, despite heavy food subsidies, paid for out of taxation, to a 40 per cent rise in the cost of living in six years and to the perpetuation of shortages and queues, ration-books and black markets, snoopers and spivs. All these things will inevitably come back if the Socialists get their way They seem to think that the British housewife is incapable of deciding for herself; we are sure that it is the customer, and not 'the gentleman in Whitehall,' who knows best.

We warned the country at the last election that it would take time and immense efforts to stabilize the purchasing power of money. We claim to have made progress. The cost of living has risen less in the past *three* years than in the Socialists' last *single* year, and, what is more, the standard of living of the great mass of the people has steadily and substantially improved. Average industrial earnings and social security payments have gone ahead of price rises. Clothes and many household goods are cheaper. . . .

Taxation. In an armed Welfare State the demands on taxable resources cannot be light This makes it all the more necessary that government, central and local, should be run economically. There are today over 50,000 fewer civil servants and four fewer Ministries than when we took over Conservatives will persist in the drive for simpler and less expensive administration.

We have already succeeded in making substantial reductions in P.A.Y.E. and purchase tax, and have introduced new allowances to help factory and farm re-equipment. The 1955 Budget is one more proof of our determination to reduce where we can the burden of taxation on the individual, on the family and on industry. We hope to make further progress in the years ahead . . .

Transport. . . . We shall make it possible for the British Transport Commission to push on with its comprehensive plan of modernization and re-equipment, so that the railways may earn their own living and a good wage for those who work on them. . We have already started on the first big programme of road construction since the war. . . But we will not sacrifice safety to speed. Our programme also includes the elimination of hundreds of accident 'black spots.' . . Air transport gives us new highways. Experience has shown that a blend of public and private enterprise is best for this service. The Airways Corporations will continue to have an important role, we shall ensure that their relationships with independent operators are developed in the interests of traveller, trader, and taxpayer.

Fuel and Power. We shall continue to need all the coal we can get. But we must look to new sources of energy as well to meet the demands of an expanding economy. The peaceful uses of nuclear energy can make an incalculable contribution to the raising of living standards. A new industrial era may be ushered in when the atom has been harnessed to bring every day heat, light, and power to factory, farm, and home. . . . The Conservative Government has become the first in the world to launch a programme of nuclear power stations on a commercial scale This will be pressed ahead at the utmost speed. The National Coal Board has now been reorganized. The efficiency of nationalized electricity is also under independent examination We intend to increase capital investment in new pits and major reconstruction schemes to four times what it was when we took over in 1951. . .

Scientific and Technological Training. Our country's prosperity is bound up with her scientific knowledge and the extent to which her industrialists and farmers make use of it. We therefore place strong emphasis in our educational policy upon the expansion of scientific and technological training We shall continue to promote and encourage research both in private industry and State establishments. We regard the widest possible spread of scientific information as a major factor in modern progress. With this in mind we shall take early steps to expand the Patent Office Library into a National Reference Library of Science and Invention, and to develop a National Lending Library of Science and Technology whose facilities will be available to all British firms, large and small.

Agriculture. The Conservative Party gives a pledge to the farming community that so long as we are responsible there will be fair prices for good farming, orderly marketing of the main farm products, and no nationalization of the land By support prices, deficiency payments, and other means, we shall uphold the principle of the 1947 Agriculture Act. We have shown, for example with milk, potatoes and eggs, our firm belief in Producer Marketing Boards where these have majority support and safeguard consumers and taxpayers. Marketing arrangements should continue to put a premium on efficiency. . . .

We must, therefore, direct our main effort to the wide range of farm production where the overseas supplier has no natural advantage. We should save unnecessary imports of feeding-stuffs by concentrating on grass and ley farming. To encourage good husbandry and to help the small farmer in particular, the wide range of improvement and other production grants must be continued. We shall take care that credit facilities are adequate. There will be further development of the Government's research, education, and advisory services. . . .

Under Conservative Government, country workers are assured of better housing conditions, better schools for their children, and more village halls. Three out of every four farms and cottages will be linked to a main electricity supply on the completion of a major five-year programme which we have initiated. We have doubled the amount paid annually in grants for rural water supplies and sewerage; this progress will be kept up, and further funds made available. . . .

Social Policy. . All must be secure in the possession of a basic standard of life; and all must be free to rise above it as far as their industry and talents may take them We denounce the Labour Party's desire to use the social services, which we all helped to create, as an instrument for levelling down We regard social security, not as a substitute for family thrift, but as a necessary basis or supplement to it We think of the National Health Service as a means, not of preventing anyone from paying anything for any service, but of ensuring that proper attention and treatment are denied to no-one. We believe that equality of opportunity is to be achieved, not by sending every boy and girl to exactly the same sort of school, but by seeing that every child gets the schooling most suited to his or her aptitudes. We see a sensible housing policy in terms, not of one hopeless Council waiting list, but of adequate and appropriate provision both for letting and for sale

We wish to develop in our country the idea of a property-owning democracy. That means that people should be owners as well as earners Our theme is that property, power, and responsibility alike must not become absorbed into the State machine, but be widely spread throughout the whole of the community. To this end, we shall encourage home ownership We shall foster thrift. We shall stimulate a spirit of partnership in industry We shall maintain the independence of the small trader and landowner and of the professional man We shall cherish local democracy. We shall strengthen the rights of the individual . .

We are determined that, in exercising the normal powers of Government in a modern State, a just balance should be struck between the interests of the individual and those of the community. . . We consider that there is room for further improvement in the machinery of tribunals, of public inquiries, and of departmental decisions affecting individual interests and property. The public has a right to be assured on these matters. We shall therefore appoint a strong advisory Committee, representative of a wide range of public life and service, to give practical attention to these problems of administrative law and recommend action. We shall ask them to consider as a matter of particular urgency whether changes are needed in the present practice and procedure of compulsory acquisition.

Wherever possible we shall reduce the acreage of land now owned by the State, and shall press ahead with the de-requisitioning of Government-held buildings Local authorities must also restore requisitioned houses and flats to their owners as speedily as possible.

Housing. Our aim is to ensure that every family has a decent home to live in Our party's pledge to build 300,000 houses a year was derided by our opponents as impossible to fulfil. In fact nearly 350,000 were built last year, and at least as many are likely to be built this year. Already under Conservative Government a million new homes have been provided . . .

Now that the construction of new homes is going ahead so well, we shall be able to devote a larger part of our resources to the elimination of slums and the modernization of the older houses.

There has been only one full-scale slum clearance drive in British history, and that was when Conservatives were in office in the late 'thirties Now, under Conservative Government, there is going to be another. We shall root out the slums at an increasing pace, and aim to re-house at least 200,000 people a year from them. . .

Television. The new medium of television, which is becoming ever more important in our lives, must not be under monopoly control. Conservatives have ensured that alternative and competing television programmes will soon be available. Measures to improve reception of sound broadcasts where necessary must also go forward.

Education. The most urgent problem in education since the war has been to provide for the huge rise in the school roll. Under Conservative Government a record number of new schools has been completed and a record number of teachers recruited. We have kept pace with the growth in the school population. Now we can draw ahead, bring down the size of classes, improve existing buildings and equipment, and extend facilities for scientific and technical training.

In the next five years we shall provide at least another million new school places, mostly in secondary schools. In this period we intend to complete the reorganization of all-age classes in the rural areas and make good progress with reorganization in the towns We shall also tackle the problem of the slum schools . . .

Under the Conservatives the number of teachers has increased by 6,000 a year. In the next five years we aim at least to maintain this rate and so secure the reduction in the size of classes. We are anxious that the status and rewards of the teaching profession should continue to attract men and women of high attainment and character. We are working out with the teachers' representatives and local authorities an up-to-date pensions scheme.

What matters in education is the development of the child's talents and personality, not the forwarding of a political theory. To prepare for the increasing opportunities of the modern world we need all three kinds of secondary school, grammar, modern, and technical, and we must see that each provides a full and distinctive education. We shall not permit the grammar schools to be swallowed up in comprehensive schools. It is vital to build up secondary modern schools, and to develop in them special vocational courses, so that they and the technical schools offer a choice of education that matches the demands of our expanding economy. Parents should have the chance before the 11-plus examination to discuss with teachers and the local authority which school is likely to suit their child best. There must be proper provision for the later transfer of children from one type of school to another. . . .

Health. New hospital building was completely neglected by the Socialist Government. A start is now being made. Plans have been announced, and will be carried out over the next few years, for the building of new hospitals and for the extension and modernization of many existing hospitals We are making special arrangements to replace worn-out and obsolete hospital plant and equipment. We shall seek to open new beds where they are most needed, to recruit extra staff, and to provide better facilities. We desire to see steady progress in all forms of preventive work These are our priorities we rank them higher than free wigs or free aspirins.

We believe that private practice and contributory schemes have a part to play with the National Health Service and we shall therefore maintain the system of hospital amenity and hospital pay beds We have cut away restrictions on voluntary effort in the hospital service. We shall continue to give every encouragement to voluntary work .

The problems of the elderly must concern us all. In particular we shall encourage local health authorities to build up their home help services and to provide 'half-way houses' for the old. . .

Pensions. The nation has assumed very large obligations towards the pensioners of tomorrow, and tomorrow there will be very many more pensioners For every 10 people of working age there are now 2 of pensionable age, but within a quarter of a century there will be 3. If during this period Britain can increase her national wealth and resources, by the policy of investment and enterprise which we advocate, these obligations can be met But if wealth is dissipated, enterprise hampered, and severe inflation brought about again by Socialist short-sightedness, the whole of our National Insurance scheme would be undermined and ultimately destroyed

In its first year of office the Conservative Government increased virtually all social service payments This year it has again raised pensions and benefits, and fully restored the purchasing power that Parliament intended they should have when the main rates were fixed after the war. Insurance pensioners, war pensioners, and public service pensioners can be sure that a Conservative Government will continue to give constant attention to their interests and needs

It is our wish to avoid any change in the present minimum pension ages But these ages do not necessarily represent the limit of working life With the aid of its National Advisory Committee the Government will continue to encourage the employment, without regard to age, of all who can give effective service and wish to do so.

Scottish Affairs. It is our general theme that within the Union the responsibility for managing Scottish affairs shall be in the hands of Scotsmen. We have ensured that a senior member of the Government shall be constantly in Scotland, and have already transferred from Whitehall to Scotland a variety of additional responsibilities. Next year, in accordance with the recommendation of the Royal Commission on Scottish Affairs, the Secretary of State will take over the care of Scottish roads and bridges. Where further measures of this kind are shown to be in the best interests of Scotland, we shall not hesitate to adopt them . . .

As part of our policy for maintaining full employment, we aim to attract the widest variety of new industrial enterprise to the areas where it is most needed. . . . We shall see that Scotland continues to receive her fair share of defence and other contracts. Scottish needs will be fully assessed in framing our new programmes of road construction and railway modernization Approval has been given to the building of the Whiteinch-Linthouse Tunnel under the Clyde, and a start will be made within the next four years on the construction of a Forth Road Bridge or Tube.

The special requirements of farming on Scottish hill and marginal land will receive particular attention. . . . We are certain that the Crofting counties can make a growing contribution to the national wealth. Every practicable step will be taken to improve the prosperity and welfare of the Highlands. We are giving particular attention to the special importance of road works. We shall maintain, and where necessary extend, measures to modernize and increase the efficiency of the Scottish fishing fleets.

. . . We fully recognize the compelling seriousness of Scotland's housing problem. We are determined to root out the slums, re-develop the overcrowded and decayed areas in our towns and cities, and re-house the people in modern homes. . . . This policy, together with house-building throughout Scotland, will receive impetus from a reform of the Scottish rating system. . . .

Welsh Affairs. The appointment of a Minister for Welsh Affairs in the Conservative Government has ensured that Welsh interests and problems are represented at the highest level . . . At the same time a steady policy of administrative devolution has been followed. This policy should go on and, if possible, go further. The Council for Wales and Monmouthshire is engaged in a detailed examination of the arrangements for conducting Government business in Wales, and we shall consider, in the light of the Council's advice, such further changes as it may be practicable and advantageous to make in the present system.

We are sympathetic to all measures designed to preserve Welsh culture and educational tradition. We shall continue to give strong encouragement and support to the teaching of the Welsh language and to the use of Welsh as a medium of instruction in schools.

Unemployment under the Conservative Government has touched the lowest levels ever recorded in Wales in time of peace. We recognize the need for imaginative and tireless attention to the stubborn problems that remain. We shall do everything in our power to improve the competitive position of the Development area and the South Wales ports, and to attract suitable industry to North-West Wales. The Conservative Party is determined to promote a more stable economy and fuller development of resources in rural Wales. . . .

Northern Ireland. We renew the pledge of faith to Northern Ireland. We shall not allow her position as an integral part of the United Kingdom and of the Empire to be altered in the slightest degree without the consent of the Northern Ireland Parliament.

The House of Lords. It has long been the Conservative wish to reach a settlement regarding the reform of the House of Lords . . The Labour Party's refusal to take part in the conversations we have proposed on this subject must not be assumed to have postponed reform indefinitely. We shall continue to seek the co-operation of others in reaching a solution. We believe that any changes made now should be concerned solely with the composition of the House

The House of Commons. It will also be our aim to achieve all-party agreement to amend the rules governing the redistribution of Parliamentary constituencies. We hold the opinion that a longer interval between general reviews would be more appropriate, and that mathematical equality between electorates ought not to be an over-riding consideration."

Conservative Statement on Agriculture.

A separate Conservative statement on agriculture, published on April 29, claimed that the party's long-term agricultural policy was already being proved, that a sound foundation had been laid, and that the industry's primary need now was for the continuity of policy. Conservatives would continue to make any adaptations required in the light of experience. Replying to the Labour Party's expressed intention of " returning to a system of fixed guaranteed prices for the main commodities so that the farmer can plan ahead," and of abolishing " the costly system of private auctions and deficiency payments " [see Labour Manifesto below, page 14204, first column], the statement declared .

" Government purchase at fixed prices unrelated to the demand is impossible to administer without control of production, and rationing. The new system of price guarantees and the new marketing arrangements . . . have made it possible to maintain the producers' stability by guaranteed prices, while at the same time enabling the Government to get rid of State trading and rationing and restore consumer choice " A return to Socialism, it was contended, would mean " a return to more ' red tape,' more interference, and eventually to the undermining of the Agriculture Act."

The Labour Manifesto.

The Labour Party's election manifesto, *Forward with Labour*, was published on April 29. Its text was as follows (cross-headings inserted) :

" As we in Britain prepare to go to the poll, the Hydrogen Bomb looms over all mankind. What can we do to meet that menace ? The existence of this terrible weapon on both sides of the Iron Curtain maintains an uneasy balance under the threat of mutual destruction. But deterrents can at best only give us a breathing space We are faced with the choice between world co-operation and world annihilation. The time is short The Labour Party approaches the problem in no party spirit. In April, 1954, we moved a motion in the House of Commons asking for immediate high-level talks This was carried unanimously. Despite our steady pressure, those talks have not taken place Labour believes that the first task of a British Government is to end this delay.

International Policy. But to insist on high-level talks is not enough. The Prime Minister who takes part in them must stand for a positive peace policy. Labour's peace policy is threefold —

(1) *Disarmament.* Labour will ensure that Britain gives her full support to the United Nations as the world-wide organization for peace and security. Ultimately the menace of the H-bomb can only be removed by world disarmament, which covers all kinds of weapons We shall co-operate in any genuine plan for disarmament which provides for effective international control, even though it involves, as it must, sacrifices of national sovereignty. As a first step, we believe that Britain should propose the immediate cessation of H-bomb tests.

(2) *Relaxing World Tension.* If the great Powers are to disarm, the causes of world tension must be attacked In Europe the chief of them is a divided Germany. Labour believes that the time has now come to make another effort to achieve the reunification of Germany by means of genuinely free elections. In the Far East the war crisis centres on Formosa. Labour has constantly urged that this crisis can only be overcome by the evacuation of the off-shore islands, now held by Chiang Kai-shek's forces , by the long overdue admission of Communist China to the United Nations ; and by the neutralization of Formosa under the United Nations to enable its inhabitants to make their own choice

(3) *The Under-Developed Areas.* There can be no lasting peace until we have met the most profound challenge of our time—the gap between the highly developed industrial nations of the West and the peasant millions of Asia and Africa. The Labour Government responded to this challenge and earned the confidence of the Colonial peoples. For this reason alone no one is better fitted to represent Britain at high-level talks than Clement Attlee—the man who freed India, despite Conservative jeers of ' Socialist scuttle.'

Commonwealth Policy. Labour worked to transform the British Empire into a Commonwealth of free and equal peoples We helped India, Pakistan, Ceylon, and Burma to achieve their freedom ; we encouraged West Africa to move rapidly towards self-government ; and we began to tackle backwardness and poverty in S.E. Asia through the Colombo Plan We shall continue the transformation from Empire to Commonwealth as each Colonial people becomes ready for independence. Meanwhile, it is our responsibility to protect the weaker peoples from being exploited, and to develop communities free from racial and colour discrimination.

Defence Policy. Faced with actual aggression in Korea and the threat of it elsewhere, the Labour Government did not shirk the heavy burden of rearmament. It took the lead in building up the North Atlantic Alliance. We believe that in the absence of all-round disarmament, the democratic powers must be strong and united, and their defensive power sufficient to deter aggression But recently, after three years of Tory Government and despite heavy defence expenditure, grave deficiencies have been revealed both in the equipment of the R A F. and in the use of manpower in the Services.

A Labour Government will at once submit all problems of defence to a searching inquiry. In particular, it will review the period of National Service

The Cost of Living. The Tories' main claim is that the nation is more prosperous as the result of their decision to scrap Socialist planning and return to a free-for-all to suit big business What are the facts ? Industrial production—the key to prosperity—has gone up since they took office at only half the rate by which it rose while Labour was in power Exports have hardly increased at all since 1951. They went up in the last three years of the Labour Government ten times as fast as under the Tories Our gold and dollar reserves have been falling for the past nine months, and today they are £200,000,000 less than they were at the time of the last General Election.

Such improvements as there have been in the last three years have been mostly due to the movement of world prices in our favour, which has reduced the cost of our imports. Moreover, the gain has been precarious and most unfairly distributed. Dividends have gone up faster than wages or salaries. Speculators and investors, whose shares have risen in value 50 per cent in the last two years, have done best of all. Even the long overdue increase in pensions is being financed by making workers and employers pay a shilling a week more in contributions

It was the policy of the Labour Government to protect consumers from the full effect of rising world prices ; and up to 1951 the cost of living rose far less here than in other countries. The Tories fought last time on a pledge to bring prices down, and Mr Butler promised not to cut food subsidies In less than a year he broke this promise, and thus deliberately drove up the cost of living Although import prices are down by 3s in the pound, prices in the shops at home have continued to rise and food, in particular, costs 4s in the pound more than in 1951. This, of course, has hit hardest the old age pensioners and others living on small incomes.

Labour's policy is to keep the cost of living steady : (1) by long-term agreements with Commonwealth countries ; (2) by firm action against monopolies which, through price-fixing and restrictive practices, exploit the public ; (3) by cutting out waste in the present antiquated system of food distribution , and (4) by reimposing price controls on essential goods where necessary

The charge that a Labour Government would reintroduce rationing is a deliberate Tory lie.

Consumers' Protection. Labour will take powers to protect the public against shoddy goods and unscrupulous trade practices, and enforce clean food standards in shops and restaurants. We will encourage manufacturers to produce better goods by enforcing quality standards and accurate labelling. We shall establish a Consumers' Advisory Service.

Social Security. Labour believes that security should not be a privilege of the few but the right of all, and is determined to assure it to every family—security in the home, security against the burdens of old age and sickness, and an equal chance for every child at school.

(1) *Housing* Labour believes that housing is a social service and will therefore go on subsidizing the building of houses to let by local authorities It will also begin to tackle the vast problem of old, rent-restricted houses in private hands. The failure of the Tory Rents and Repairs Acts has proved that the landlords will not repair those houses without steeper increases of rent than even a Tory Government would dare to permit. Labour will therefore ask local authorities to submit schemes for gradually taking over and modernizing rent-controlled private property, subject to fair compensation. We shall help those who wish to do so to own their own homes We shall give lease-holders an opportunity of purchasing the freeholds of their houses.

(2) *Health and Old Age.* Through the National Health Service and National Insurance, the Labour Government began to abolish the fear of old age, sickness, and disablement which haunted working-class life before the war. We shall go forward with the job.

In order to restore a free Health Service, we shall abolish all charges, including those on teeth, spectacles, and prescriptions. We shall stop queue-jumping by ensuring that the need for treatment and not ability to pay shall be the test for obtaining a bed in National Health Service hospitals.

Now social security must be carried one stage further In order to remove the last taint of ' public assistance,' a Ministry of Social Welfare will be established to take over the work not only of the Ministry of Pensions and National Insurance, but also of the National Assistance Board To maintain the real purchasing power of these benefits, pensions and allowances, we shall institute an annual review, and in any year in which there has been an increase in the cost of living, the scale of payments will be increased accordingly.

One of the first acts of the next Labour Government will be to improve the rates of National Assistance fixed last February by the Tory Government, an increase which we regard as quite inadequate. We shall also deal with the anomalies of the National Insurance and Industrial Injuries schemes.

We welcome the growth of superannuation schemes in industry and commerce as valuable additions to National Insurance pensions. We shall consult with the T.U.C. and industry with a view to extending similar schemes on a voluntary basis to all kinds of employment and will seek, wherever possible, to arrange for pensions to be made transferable.

(3) *Education.* Labour is determined on a radical reform of our education service Our first objectives are · (*a*) to increase the number of teachers and to improve, especially in rural areas, the standard of our schools ; and (*b*) to remove from the primary schools the strain of the 11-plus examination. This cramps the free and happy life which should stimulate the children's early years. It penalizes the children who develop late and gives an inferior place in our education to the practical skills increasingly essential to our industrial efficiency. Local Authorities will be asked to submit schemes for abolishing the examination and, to realize the fulfilment of the Education Act of 1944, we shall encourage comprehensive secondary schooling. We shall insist on the inspection of all private schools.

To prevent children being removed from school or denied a University education for lack of means, a national scale of Maintenance Allowances will be established, and every student admitted to a University will be entitled, in case of need. to a State Scholarship.

For those who leave school at the age of 15, we shall begin to carry out those parts of the 1944 Education Act which make provision for part-time education

We shall provide more playing fields. We shall abolish the tax on sport and the living theatre.

Television is a growing influence for good or ill. Labour will establish an alternative public television service, free from advertising.

Taxation, Post-war Credits, and Equal Pay. The Tories have reduced taxes on profits and unearned income, and granted tax reliefs which give most help to those who need help least With their encouragement, higher dividends are being paid at the expense of the re-equipment of industry. Labour will once again use the Budget as an instrument for the twin purposes of remedying social inequality and increasing production. We shall review the working of the tax system to ensure that it is efficient and just We shall encourage those who earn their money by hard work and ability ; we shall assist National Savings and investment. But we shall deal firmly with tax-dodgers, and we shall see to it that a fairer share of the burden will be carried by those who get their money too easily through excessive profits, capital gains, and the inheritance of large fortunes.

We shall speed up the repayment of post-war credits which was inevitably delayed in the difficult years immediately after the war.

Labour reaffirms its belief in equal pay for equal work, and will immediately extend it to industrial workers in Government service and so give a lead to industry.

Planning and Public Ownership. In order to strengthen our Welfare State still further, and at the same time to play our part in assisting the under-developed areas of the world, our own production must rise every year Only a government prepared to plan the nation's resources can do this. Labour will ensure that the claims of investment and modernization come first, and will use taxation policy to help productive investment—thus providing more efficient plant and equipment for the workers. Even the Tories have had to praise the nationalized industries for their high rate of investment and advances in technical efficiency.

Public ownership of the steel and road haulage industries is essential to the nation's needs and we shall re-nationalize them We shall bring sections of the chemical and machine-tools industries into public ownership. Where necessary, we shall start new public enterprises.

The Labour Government brought new hope to the old distressed areas. The Tory Government have scrapped many of the essential controls. and now, once again, some areas face the danger of unemployment. Labour will use the Development Area powers to the full and, where necessary, extend them in order to provide new jobs

Atomic energy and other new inventions can bring dramatic increases in productivity and therefore in wealth and leisure They will also demand new skills. To meet this demand, Labour will enlist the help of scientists, trade unions. and progressive managements, and begin a real drive for better technical education. We will encourage schemes of industrial democracy and introduce long overdue legislation to improve working conditions in shops and offices.

Agriculture. Labour in power revitalized the countryside Britain needs a continuously expanding and efficient farming industry. The farmer must be able to produce in the confidence that he will find a market. This was Labour's policy under the 1947 Agriculture Act—a policy which the Tories are undermining. The housewife is paying more than she need for food because there are too many middlemen between her and the grower. Yet the grower, too, is threatened with insecurity again. Labour will return to a system of fixed guaranteed prices for the main commodities so that the farmer can plan ahead, and will abolish the costly system of private auctions and deficiency payments

We shall encourage the setting-up of producer marketing boards to organize distribution more efficiently in the interests of the consumer as well as the farmer. Advisory services and credit facilities for farmers will be improved. Labour will cheapen fruit and vegetables by opening more markets and thus bring the produce of our market gardens into the shops more quickly and efficiently.

There will be a square deal for the farm worker and his family, and the injustices of the tied cottage system will be brought to an end. Safety regulations will be applied to farms. Water supplies, still pitifully inadequate in the countryside, will be greatly extended and brought under public ownership. Labour's aim is to revive the best in country life and to bring the benefits of modern living to our hamlets and villages.

Scotland, Wales, and Northern Ireland. Under the Tories, there had been hunger and misery, idle pits and shipyards and bankrupt farms. Labour in power brought new life to Scotland and Wales. Thriving industry justified triumphantly Labour's system of controls and priorities. But unemployment in some parts of these countries remains high Labour will ensure full employment in Scotland and Wales, and will begin to overtake Tory neglect by bringing new industries to Northern Ireland We respect and will safeguard the distinctive national cultures of these countries.

Local Government. Labour believes in a vigorous local democracy. But at present local authorities do not have adequate revenue to do their job properly. Immediate relief will be provided by the repeal of the de-rating of industrial properties We shall review local government structure and finance, and consider the possibility of rating of site values.

Conclusion. In the dangerous world in which we live we must seek to unite all those who earnestly desire peace and disarmament and who recognize the need for a positive policy to remove the causes of war. Faith, vision, and enthusiasm are needed if civilization is not to be destroyed by man's many inventions A party that proudly claims for its inspiration the brotherhood of man is best fitted to grasp the opportunity of building a world of peace, freedom, and justice.

In Britain our goal is a society in which free and independent men and women work together as equals. The signposts along our road are Work for All, Abolition of Want, Fair Distribution of Income and Property, Better Education. The powers we ask for will be used in the interests of the whole nation, fully respecting the rights of human personality Our aim is to make men more truly free. In 1945, Britain started out along the path of social justice. Now is the time to go forward with Labour."

Labour Statement on Agriculture.

The principal proposals contained in the Labour Party's statement of agricultural policy (published on May 5) were : the reintroduction of fixed guaranteed prices and assured markets for the industry's main products ; improvement of marketing by grading and by the abolition of fatstock auctions ; and the creation of commissions to regulate home and imported supplies of meat and cereals and to improve the distribution of fruit and vegetables . The Party also proposed a five-year plan of agricultural expansion ; special credit facilities for farmers ; improvements in the annual price review machinery ; encouragement for producer co-operation ; and improvement in the working conditions of agricultural workers.

The statement claimed that fixed guaranteed prices and assured markets for the main farm products (although a deficiency payment scheme was proposed for coarse grains) would encourage confidence in the farming industry and result in increased efficiency. It added : " They can, and will, be operated on a basis of quality production without any allocations, rationing, or limitation of consumer choice in any way. Labour's aim is to widen consumer choice. Commodities will be sold to the trade and not allocated. Rationing and allocation were necessary only when food supplies were very scarce and rationing was the only way to secure fair shares. There will be no return to rationing."

Labour Statement on Cost of Living.

The Labour Party's proposals for combating the rising cost of living and dealing with monopolies and restrictive practices, outlined in the party's manifesto, were discussed in greater detail in a separate statement published on May 16. This said that the work of a strengthened Monopolies Commission would be supplemented by legislation prohibiting a range of restrictive practices, including the fixing of common or " ring " prices and restrictions on new entrants into both manufacture and distribution.

" Those measures, however, will not by themselves suffice," the pamphlet went on " The heart of the problem is the coercive power of trade associations. This power must be broken The weapons which trade associations now use to enforce fixed prices collective boycotts, exclusive dealings, stop lists, fines, and private judicial procedures—will, therefore, be made illegal. Discrimination against co-operative societies will be banned. Trade associations will further be required to register their constitutions, rules, agreements, and annual reports with the Board of Trade, and the Board will be instructed to keep a separate register of all agreements of a restrictive nature, which will be made available to the public. It will be further empowered to require public and private companies to supply information as to their subsidiaries, majority and minority holdings, firms which hold part of their capital, etc. This will enable the Government and the public to gain much-needed information as to the pattern of ownership and the ramifications of business connexions in British industry. Finally, in those cases where single-firm monopolies exist—the match industry is one example —prices will be closely scrutinized and, where necessary, controlled."

After asserting that the Conservative Government had allowed food prices to rise, and that the removal of subsidies and withdrawal of price controls had gone hand in hand with derationing, the statement continued : " Today we still have a form of rationing, but it is rationing by the purse. Fortunately, however, there has taken place during the last two years a very substantial increase in world food supplies. Although some people are not getting the diet they need, there is not at present, nor is there likely to be, any overall shortage of food. There is, therefore, no necessity for a return to rationing, and rationing will not play any part in the programme of the next Labour Government. . . .

" The price of food . . . must be our first concern. . . . If, in spite of all our efforts, it continues to rise, policies will have to be adopted to ensure that higher prices do not result in lower standards of life. . . . The Tories are spreading the myth that bulk-buying, price control and food subsidies can only work if food is rationed. This is nonsense, as experience shows. . . . This argument is, in fact, only an excuse by the Tories to cover up their own failure to control the cost of living."

Labour Policy for Cotton Industry.

The Labour Party issued a four-point policy for the Lancashire cotton industry on May 13 declaring that a Labour Government would (1) protect Lancashire against unfair competition; (2) re-establish the Raw Cotton Commission to revive the placing of long-term contracts among Commonwealth growers, (3) review the operation of the "D" scheme as it affected textile goods and clothing, with a view to assisting the export trade; and (4) encourage higher quality standards for textiles

The Labour Party contended that the Government were only "tinkering" with the problem, although Lancashire's home and export markets were threatened by a flood of cheap imports. Regarding their first proposal to protect Lancashire against unfair competition, the Party agreed that Lancashire must stand on its own feet and face the consequences of fair competition But (it was stressed) subsidies to foreign exporters, in whatever form they were made, clearly tilted the balance against the British industry A Labour Government would therefore immediately establish a trading commission which would purchase centrally all imported cotton yarns and piece-goods, with the power to restrict those goods which entered the U K. on a basis of unfair competition Having solved the immediate crisis, they would negotiate with the Indian Government and with GATT with a view to bringing about an agreed code of fair competitive practices in the world's textile trade

The re-establishment of the Raw Cotton Commission was regarded as essential to reduce Lancashire's heavy dependence on American cotton, and to ease the problems that American price policy had created

The Co-operative Party's election manifesto, *Together—We Live*, published on May 1, suggested—among other things—the setting-up of a Ministry of Consumers' Welfare It proposed that such a Ministry should, in conjunction with local authorities, establish bureaux (like the Citizens' Advice Bureaux) through which complaints against unscrupulous manufacturers or traders might be channelled and remedied. In addition, trade associations should be required to register with the Ministry all agreements concerning prices and trade restraints.

The Liberal Manifesto.

The Liberal Party manifesto, published under the title *Crisis Unresolved*, appeared on May 6. It was worded as follows (cross-headings inserted):

Introduction. "Just under four years ago, the Liberal manifesto opened with the statement that this country was 'facing a new crisis and one of the biggest in our history' It would be ungenerous not to admit that since the last general election we have gone some way to arrest the decay which set in with the second post-war Labour Government; the crisis was confronted but has not been resolved There are still great problems fraught with danger which cause much concern.

There are some who are so encouraged by the better face of our affairs as to think that halcyon days have come; there are some who feel that it does not greatly matter which party steers because the winds have abated and the sea is calm; there are some who can persuade themselves against all the evidence that the Conservative and Socialist parties are liberalized. These ideas are delusions The Liberal Party stands as a security against the fate that would befall a people whose future depends upon the outcome of a struggle between two class parties seeking power to be used in the service of their own particular clients. The independent mind, the small man, and the consumer are neglected by both the great parties

War, devastating and possibly final, is a continuing threat The fear of war enforces the use on a colossal scale of manpower and materials on purposes of defence The prosperity of Britain hangs in the balance Continued inflation endangers all the social progress of the last ten years, checks further progress, and may defeat our hopes of making full employment in a free society our normal economic condition. To face and overcome external and internal dangers, Liberal policies remain essential, and Liberal members of Parliament alone can effectively advocate them.

Foreign Affairs. There is fortunately broad agreement in this country both about the aims of British foreign policy and the means by which they are to be realized. The search for a foreign policy which shall be different from that of the Government of the day for the mere sake of opposition is futile and unpatriotic Liberals have supported European unity, close association with the Commonwealth and the United States, the integration of Germany into Western Europe, and all measures of defence essential to protect liberty. But we consider that greater effort should be made to bring home to other peoples the sincere devotion of the Western Powers to the cause of peace. Liberals have been constant in their support of the United Nations, but think that it is the duty of H.M. Government to put forward positive proposals for the reform of the Charter designed in particular to restrict the occasions when five-Power unanimity is required, and specially to provide that all sovereign States shall have a right to membership conditional upon their accepting the terms of the Charter.

The London and Paris agreements are a means and not an end. We needed strength for negotiation with Russia, and we must now negotiate for the establishment of European peace and the reunification of Germany. Liberals will work towards complete disarmament in all weapons, in all countries, under a system of international control which shall permanently ensure the free world and our children against aggression and the horrors of warfare. Liberals maintain that peace in the Far East cannot be achieved until the Chinese People's Republic is a member of the U N. They deplore the ungenerous attacks made upon the United States, which imperil that understanding and co-operation between our two countries on which freedom has twice depended and still depends At the same time they regret present ambiguities in American policy regarding Formosa, and will support all efforts made to remove a danger of conflict in Far Eastern countries

The Liberal Party has been, and will continue to be, critical of the timidity and hesitation which both Labour and Conservative Governments have shown about associating this country intimately with the movement to secure some measure of European unification. It advocated whole-hearted support for the European Defence Community and the Coal and Steel Community, and it rejects the insincere plea that our Commonwealth responsibilities are any bar to that closer association with Western Europe which is so highly desirable in the interests of both France and Germany and the settlement of their age-long quarrel. The concessions reluctantly made by our Government last autumn to secure the defence of Europe might well have sufficed to save the E D C. had they been made earlier. Liberals will continue to goad the Government when they feel that it is reluctant to play its proper role in the evolution of organs such as the Council of Europe and the Coal and Steel Community A sincere attempt must be made to establish an arms pool We must not be content to accept the Western European Union as concerned exclusively with problems of defence We must have positive and constructive policies for economic and social progress in Europe. In particular, it is in the interests of this country to encourage the establishment of a great free trade area in Europe.

Colonial Development. There is general agreement on the necessity of training the inhabitants of dependent territories to govern themselves. Liberals recognize that conditions vary from colony to colony and that there is no master plan which can be uniformly applied; there must be flexibility The noble experiment of establishing the principle of real partnership between races in the Colonies is imperilled because the indigenous population has lost confidence in the objective. In order to restore this confidence there should be no departure from the principle that development must contribute directly and primarily to the prosperity of, and to higher standards of life for, the resident local multi-racial population Liberals must set their faces like flint against all forms of racial discrimination in British territories. Particular attention is drawn to the Liberal Party's suggestion for the institution of a Consultative Colonial Assembly, meeting periodically, at which representative delegates from Colonial territories can confer upon developments within their territories, freely express their views thereon, and work out practical means for the fulfilment of their aspirations.

Economic Problems. By the inflationary policy of two Socialist Governments, continued in modified form by the Conservatives, pensioners and people living on small fixed incomes and the lowest wage-scales have been cruelly penalized A constantly and rapidly depreciating pound strikes at the root of social justice The Liberal Party, which made possible the Welfare Society by its early reforms, is maintaining its traditions by calling for a radical attack upon false economic policies which inevitably lead to ever-rising costs of living. Will either the Conservative of the Labour Party have the courage to stem the tide of rising prices, subsidies, and nominal wages?

Let us briefly consider what is required by our situation today—that of a debtor nation which must export much more than it imports or sink to the level of a second-rate Power on a low standard of living First we must be able to compete with foreign manufacturers. We must, therefore, systematically reduce and finally abolish tariffs which 'protect' our home markets, which encourage price rings and monopolies, and which must, for that is their whole object, increase our prices and, as a result, weaken our power to compete Conservatives want to protect employers who are economically inefficient against bankruptcy; Socialists want to protect workers against the loss of the particular jobs in which they happen to be working.

Monopolies. Both the big parties are vocal when out of office against monopolies, price rings, and restrictive practices Neither of them will make a fierce frontal attack when in power. Neither will so much as mention the necessity of a thorough examination of the place and functions of trade unions in a Britain which, in a generation, has industrially altered out of recognition We Liberals have long advocated a Royal Commission to examine specific reforms which have been suggested.

Productivity. The maintenance of full employment, the improvement of our standard of living, and our ability to avoid a further devaluation of sterling depend essentially on productivity—the power to produce more goods and services with the same amount of labour and without an increase of hours. To obtain greater productivity we must give to capital both the reward of risk and the incentive to save—accepted in principle by Labour but fiercely resisted in practice—and we must give to workers the assurance of being partners in industry, entitled to their share in the fruits of prosperity. The Liberal Party alone has been advocating the general introduction of co-ownership schemes, desirable not only as incentives but as the foundation of industrial peace.

Taxation and Expenditure. This country will never be prosperous so long as some 40 per cent of the national income is taken from the earner by the Government and local authorities. It has to be admitted that the scope for saving is limited; neither defence nor the social services must be whittled down at the expense of efficiency. That makes it all the more necessary that expenditure in other directions must be sharply scrutinized and waste avoided. Value for money must be the keynote

One category of spending merits particular mention. We are spending some £300 millions annually in subsidizing agriculture in one form or another—nearly three-quarters of what we were spending on all food subsidies a few years ago. In Liberal eyes that policy, as a long-term policy, can only be regarded as shortsighted The farmer desires to stand on his own feet. He cannot, however, be asked to sell in a free market and buy in a protected one The time has come when the farmers' costs should be lowered by removing the tariffs on the imports of those materials he must use by doing away with the monopolies and rings which raise the price of the equipment he needs When this is done subsidies will no longer be necessary. Until this is done the need for some form of Government aid is fully recognized.

Scottish and Welsh Devolution. If Parliament is to meet the external and internal challenges which face it, it must be relieved of the excessive burden of work which now falls upon it and stifles it. If there were no other reason than this, Liberals would again, as in 1951, emphasize the necessity of instituting separate Parliamentary Assemblies for Scotland and Wales, and that practical reason is immensely fortified by the claims of those two countries to manage their own local affairs and legislate for them Each of them, Scotland in the Highlands and Wales in its scattered rural communities, has special problems with which the rest of the country is not faced.

Individual Liberties. We exist as a party to defend the rights of the individual, his liberty to live his own life subject to respect for the rights of others, to hold and express his own views, to associate with others of his own choice, to be granted all possible freedom of opportunity, and to be subject to no penalty or discrimination by reason of his colour, race, or creed Liberals see no sign that these fundamental freedoms, constantly open to assault, will be adequately defended without them. The colour bar has been here and there in evidence in this country. Cinchel Down is of recent and odious memory. The powers of Government departments to invade a man's privacy, and even to interfere with his livelihood, can today be abused without redress or appeal The leaders of the two large parties can decide on their own that discussion on the air of matters of great moment shall be forbidden for 14 days before our masters in the House of Commons have told us what we ought to think and do. Trade unions, who came into existence to defend freedom of association, are using a giant's strength to limit the freedom of workers to benefit from effort, to make life miserable for those they victimize—even to deprive them of their right to remain in their occupations.

The Electoral System. If Liberalism is to play its part, it requires its proper representation in the House of Commons. There are millions of Liberals in this country effectively disfranchised by our electoral system, which could secure rough justice when there were only two parties, but has for many years distorted the results of every general election. The fate of a great country is entrusted to the chance result of what is one of the greatest of all gambles. If that democracy which we preach is to be a reality and not a farcical pretence, we must have a more truly representative electoral system in which no votes will be wasted, not even a Conservative vote in Durham nor a Socialist vote in Bournemouth. We ask that the whole question be thoroughly investigated by a Royal Commission.

Conclusion. Electors who believe in the need for a strengthened independent party to put forward Liberal policies will utterly waste their votes unless they support Liberal candidates where they have the opportunity. The excessive over-privilege and the excessive poverty of 50 years ago are happily things of the past. Today, the hardest working and the least vocal people are the vast middle-class who seek an opportunity to support a commonsense progressive policy, undeflected by any extremists exploiting or creating sectional interests."

By arrangement with the B.B.C., both the Conservative and Labour parties were allotted four party broadcasts and three television programmes, while the Liberal Party was allotted one party broadcast and one television programme. Conservative broadcasters on sound or television included Sir Anthony Eden (the Prime Minister), Mr. R. A. Butler (Chancellor of the Exchequer), Mr. Harold Macmillan (Foreign Secretary), Mr. Selwyn Lloyd (Minister of Defence), Sir Walter Monckton (Minister of Labour), Mr. Ian Macleod (Minister of Health), Mr. Walter Elliot and Miss Edith Pitt. For the Labour Party, sound or television broadcasts were made by Mr. Clement R. Attlee (the party leader), Mr. Herbert Morrison (deputy leader), Dr. Edith Summerskill (party chairman), Mr. Hugh Gaitskell, Mr. James Griffiths, Mr. Harold Wilson, Lady Megan Lloyd-George, Mr. James Callaghan, and Miss Margaret Herbison. Lord Samuel, Mr. Frank Byers, Mr. Philip Fothergill and Mr. John Arlott broadcast on behalf of the Liberal Party. (Times - Daily Telegraph - Manchester Guardian - Daily Herald - News Chronicle - Conservative, Labour, and Liberal Party Election Manifestos) **(Prev. rep. 14144 A.)**

A. PERSIA. — £30,000,000 Road Construction Contract awarded to British Firm.

It was announced in Teheran on May 11 that the London firm of John Mowlem & Co. had been awarded a £30,000,000 contract by the Persian seven-year plan organization for the reconstruction and extension of Persia's main road system, covering 3,750 miles. The contract was gained by Mowlem's in the face of strong American, French, and German competition. (Times) **(Prev. rep. Persian Contracts, 13660 C ; 13620 C.)**

B. UNITED KINGDOM. — Steel Industry. - Progress of Denationalization. - Denationalization of Whitehead Iron and Steel Co., Thos. Firth and John Brown, and English Steel Corporation, Ltd.

The first report of the Iron and Steel Holding and Realization Agency, covering the period July 13, 1953, to Sept. 30, 1954, was published on March 3, 1955. It stated that by Sept. 30 about one-third of the original publicly-owned sector of the industry (measured in terms of employment, steel production, and sales) had been denationalized, whilst subsequent further sales had brought the fraction to about three-fifths.

It was explained that the Agency had begun operations with a total of 302 subsidiaries, the securities of 71 of these having been vested in it directly, whilst it was the sole or majority holder of the capital of the remaining 231 By Sept. 30, 1954, 13 companies and their 126 subsidiaries had ceased to be subsidiaries of the Agency, seven companies having been sold entirely at a price exceeding their book value by £1,600,000. Six other companies had been partially sold, and the gross realization from the 13 companies had amounted so far to nearly £78,000,000.

The report added that the Agency had paid £63,100,000 to the Treasury, and had retained £14,900,000 for "investment and other purposes."

The following public offers of steel shares were made by the Agency in recent weeks :

(*a*) 1,250,000 £1 Ordinary shares in the Whitehead Iron and Steel Co., Ltd., offered on Feb. 10 at 55s. each, with preferential consideration for applications from former shareholders.

It was announced on Feb. 12 that about 175,000 applications had been received for a total of 35,000,000 shares, including about 1,100 applications for 6,000,000 shares from former shareholders ; these latter had been accepted in full up to 150 shares, whilst applicants for up to 3,500 shares had also been allotted 150 shares each, and applications for larger amounts had been accepted to the extent of about 4 per cent up to 50,000 shares and of about 3 per cent thereafter. Applications from the general public had been dealt with by ballot, and about 18,500 applicants had received 50 shares each, irrespective of the number applied for.

(*b*) The entire capital of Thos. Firth and John Brown Ltd., viz., 5,500,000 £1 Ordinary shares (at 25s. each) and £3,000,000 4½ per cent Debentures (at £97 10s.), offered on March 17.

It was announced on March 19 that about 42,000 applications for 15,000,000 Ordinary shares and 9,000 applications for £31,000,000 Debenture stock had been received, including 3,000 applications for 5,000,000 Ordinary shares from former shareholders and 52 applications for £3,500,000 Debenture stock from former debenture holders. Preferential allocations to former shareholders and debenture holders had been granted as follows : *Shares* : up to 200, in full ; 201-400 shares, 200 ; 401-3,000 shares, 300 ; over 3,000 shares, 34 per cent, with a maximum allotment of 17,500 shares. *Debenture stock* : in full up to £5,000, and 40 per cent of larger applications, with a maximum of £40,000. Non-priority applicants for Ordinary shares had received 100 shares each, and those for Debenture stock £100 each for applications up to £1,200, whilst larger applications had been met to the extent of about 7½ per cent, with a maximum allotment of about £3,750 stock.

(*c*) The balance of the capital of the English Steel Corporation, viz., £5,000,000 5½ per cent Cumulative Redeemable Preference shares of £1 each and £5,000,000 4½ per cent Debenture stock, offered at par on May 12

The Agency announced on May 13 that about 28,000 applications for 16,350,000 Preference shares and about 8,600 applications for £12,850,000 Debenture stock had been received. Applications for Preference shares had been granted in full up to 100 shares, and as to about 20 per cent beyond, whilst applications for Debenture stock had been granted in full up to £1,000 stock, and as to about 25 per cent beyond

It was stated on Feb. 24 that N. Hingley and Sons, Ltd., ironmasters, of Dudley (Worcs.) had bought back from the Agency the entire share capital of its former wholly-owned subsidiary, John Bagnall and Sons, re-rollers. The price paid was given as £200,000, the amount received by Messrs. Hingley when John Bagnall and Sons was nationalized.

The resignation of Sir John Green as a member of the Iron and Steel Holding and Realization Agency was announced on Feb. 24.—(Treasury Press Office - Financial Times) **(14003 A.)**

C. AUSTRALIA. — State Opera House planned for New South Wales.

It was announced on May 17 that the Government of New South Wales had decided to build a State Opera House at a site on Benelong Point, also known as Fort Macquarie, a prominent headland in Sydney Harbour. The N.S.W. Premier, Mr. Cahill, said that the public would be invited to subscribe towards the cost of the opera house, the design of which would be open to all architects The proposed opera house will have two halls, one with 3,500 seats and the other with 1,200, and will be used not only for opera but also for ballet, chamber music, and orchestral concerts. (Times)

A. SOUTH AFRICA.—The Appeal Court Quorum Act.

The Appeal Court Quorum Bill, introduced by the South African Government to raise the number of judges required to hear final appeals in constitutional cases, was finally approved by the Union Parliament on May 5 after the Opposition had contested the Bill throughout its parliamentary passage.

The Government's decision to introduce such legislation had been announced on March 25 by the Minister of Justice, Mr. Swart, who stated (*a*) that the number of judges in the Appellate Division of the Supreme Court would be raised from six to 11; (*b*) that, if the Bill were approved, a quorum of five would be required to hear all appeals except those involving the validity of an Act of Parliament, when the full bench of 11 judges would be required; (*c*) that the judgment of a majority of such quorums (three and six respectively) would in all cases be accepted as the judgment of the court.

The new judges, who will assume their new duties on Oct. 1, were named as follows: Mr. Justice E. M. de Beer (Judge-President of the Orange Free State Division of the Supreme Court); Mr. Justice F. Reynolds (Judge-President of the Eastern Cape Division of the Supreme Court); Mr. Justice H. de Villiers (formerly of the Transvaal Bench and now of the Eastern Cape Division of the Supreme Court), Mr Justice C. G. Hall (of the Cape Division of the Supreme Court), and Mr. Justice C. P. Brink (of the Orange Free State Division of the Supreme Court).

During the debate in Parliament, the Government's action in introducing such a Bill was attacked by all the Opposition parties, which regarded it as yet another attempt to remove the Cape Coloured voters from the electoral roll following the Appellate Division's two earlier rulings on this matter—namely, (*a*) the decision of March 20, 1952 (see 12409 A) that the rights of the Coloured voters were still "entrenched" and therefore lay outside Parliament's powers of constitutional amendment, and (*b*) the decision of Nov. 13, 1952 (see 12780 A) upholding the Cape Supreme Court's judgment that the High Court of Parliament Act was invalid.

Introducing the Bill in the House of Assembly on April 25, **Mr. Swart** said that since the abolition of appeals to the Privy Council in 1950 (see 10798 D) the Appellate Division had become the final court of appeal in South Africa. The doctrine of *stare decisis*—where a court regarded itself as absolutely bound by its previous decisions—had disappeared, and, if it thought fit, the Appellate Division could accordingly reject a decision previously made by it. This it had in fact done on March 20, 1952, in the *Harris and Others v Dönges* case, in which it had reversed the judgment given in 1937 in the *Ndlwana v. Hofmeyr* case. Moreover, a previous judgment arrived at by five judges could at present be overruled by three judges This state of affairs, said Mr. Swart, was "unsatisfactory" and the Bill was intended to remedy it.

The Leader of the Opposition, **Mr. Strauss** (United Party), moved an amendment to reject the Bill on the ground that, in view of the Government's previous attempts to circumvent the Entrenched Clauses of the South Africa Act, it was obviously designed to remove the Cape Coloured voters from the common electoral roll The amendment also declared that the Bill was an undeserved reflection on the integrity of the Appeal Court, "thus tending to bring the unquestioned reputation of the highest court of the land into disrepute."

Mr. Strauss stressed that the integrity and impartiality of the courts were one of the corner-stones of the South African way of life, and denounced the Bill because it looked like an attempt to "pack" the Appeal Court, and because it might simply be a prelude to the "packing" of the Senate. Before 1952, he said, the Supreme Court, and the Appellate Division in particular, had enjoyed the undivided confidence of every section of the community, including the Government and the whole of the Nationalist Party. But in 1952, when the unanimous decision of the Appeal Court had gone against the Government, members of the Cabinet had campaigned up and down the country to undermine public confidence in the Court. The testing right of the courts had been described at the time as "constitutional slavery," but now, instead of doing away with that right as it had said it would, the Government was putting forward a measure which, for the first time, expressly established the testing right. What was the reason for this change, Mr Strauss asked? Did it mean that the Government at last recognized the value of retaining the testing right, or was it simply the first step in a carefully calculated plan ultimately to destroy that right and to subvert the Constitution?

Mr. Strydom, the Prime Minister, declared that the Government wanted the courts to have the unquestioned respect of the public and to stand entirely apart from political controversy, but whilst it wanted them to interpret Acts of Parliament it did not want them to question their validity. Under the present system, Parliament was subject to control by the accidental membership of the Appeal Court, and he asked whether it was right that constitutional questions should continue to be decided by an Appeal Court which had already expressed itself on one side of the matter and consisted exclusively of judges who had shown themselves committed to a certain view.

Mr. Swart, replying to the debate, repeated his contention that at no stage of the recent constitutional controversies had the Government acted illegally; it had tried to achieve what it wanted but, when the Appeal Court had overruled its legislation, it had accepted that judgment. Nevertheless, the Government intended to take legislative steps to restore the sovereignty of Parliament and, if that legislation were tested, it would have to be tested by the full Appeal Court Bench of eleven judges as laid down in the Bill.

After the Opposition's amendment had been rejected, the Bill was given a second reading by the House of Assembly on April 29 by 78 votes to 50.

During the Committee stage (April 28) all the Opposition parties refused to take part in the debate except to call a division on each clause **Mr. Strauss** said that "nothing in the way of amendment could dispel or mitigate the harm the Government has done to South Africa," whilst the Labour Party leader, **Mr. Hepple,** denounced the legislation as "an immoral measure."

The Senate gave the Bill a second reading on May 3 by 26 votes to 17, and a third reading on May 5 by 26 votes to 15. During the second reading, Mr. Swart said that "the Government will not rest until Parliament is supreme and the courts have no right to test its legislation." He added that the Government wanted a strong court of 11 judges to decide the validity of the "other steps" which it intended to introduce. When asked by Senator Rubin whether the Government would accept the decision of the 11 judges even if it went against them, Mr. Swart replied. "If the steps we take are found to be illegal, we will take other steps—but we must have certainty." The Opposition leader (Senator Jackson) described the proceedings as "the final chapter of a tragic episode in the history of South Africa."

During the proceedings in the House of Assembly, the Johannesburg Bar Council issued a statement on April 22 declaring that the Bill "must cause grave misgiving to all concerned with the proper administration of justice." Mr. Strydom thereupon announced in the House on April 27 that no member of the Bar Council who had supported this "scandalous statement" need ever expect to receive a judicial appointment. The Council, in reply, declared that it would not be "deterred by threats of this nature from doing what it considers to be its duty."—(Cape Times - State Information Office, Pretoria) **(Prev. rep. Appeal Court, 13153 A.)**

B. UNITED STATES. — Agricultural Surpluses. - Sales under Mutual Security Programme.

The report of the Foreign Operations Administrations dated Jan. 31, 1955, showed that authorizations under the Government's programme of selling agricultural surpluses to friendly countries in return for their manufacturing an equivalent value of arms for the mutual defence programme totalled $245,146,000 up to Sept. 30, 1954.

The recipient countries were: United Kingdom, $72,250,000 (tobacco, cottonseed oil, lard, meat, fruit, and dairy products); Japan, $50,000,000 (wheat and barley); Yugoslavia, $34,997,000 (wheat, raw cotton, and lard); Italy, $18,500,000 (raw cotton, tallow, and tobacco), France, $15,850,000 (raw cotton and tobacco); Western Germany, $15,000,000 (tobacco, raw cotton, and soya beans); Spain, $14,800,000 (raw cotton); Formosa, $10,000,000 (wheat, coarse grains, and tobacco); Finland, $5,000,000 (tobacco and raw cotton); Norway, $2,335,000 (soya beans, coarse grains, wheat, and peanuts), Afghanistan, $1,215,000 (wheat and wheat flour); Israel, $1,200,000 (peanuts).

The value of the commodities sent was as follows: broad grains (wheat), $74,173,000; raw cotton, $52,670,000; tobacco, $38,450,000, fats and oils, $32,272,000, meat, $17,450,000, fruits, $10,000,000; coarse grains, $9,430,000, dairy products, $6,000,000. Shipping costs were $4,902,000

In London, the Economic Secretary to the Treasury (Sir Edward Boyle) announced on May 5 that agreement had been reached on the allocation to Britain of $73,900,000 in surplus agricultural products from U.S. appropriations for 1954-55. Of this total, $25,000,000 would be in cotton, $20,000,000 in maize, $14,900,000 in fruit (citrus fruit, apples, prunes, canned pears, etc.), and $11,000,000 in oils and fats. The sterling proceeds would be used mainly to assist the U.K. defence effort, but up to $13,700,000 would be used by the U.S.A. to buy military equipment in the United Kingdom for third countries.

The announcement also said that negotiations were in progress about an arrangement under which Britain would import $15,000,000 of U.S. tobacco and, in exchange, would provide houses for U.S. personnel in Britain at an equivalent cost; the houses would be let to the U.S. authorities at a nominal rent for so long as they were required, but would remain the property of the British Government.
(Foreign Operations Administration, Washington - Treasury Press Office, London) **(Prev. rep. 13636 B.)**

A. UNITED KINGDOM. — County and Borough Elections in England and Wales.

County Council elections held in the 62 English and Welsh counties between March 31 and April 6 resulted in the Labour Party losing control of five councils—Essex, Lancashire, Staffordshire, the West Riding of Yorkshire, and Carmarthenshire—to the Conservatives and Independents. Labour retained control in London (where they have been in power for 21 years) and also in Derbyshire, Durham, Glamorgan, Monmouthshire, Northumberland, and Nottinghamshire.

In addition to gaining control of the above-mentioned five counties, the Conservatives and Independents retained control in Anglesey, Bedfordshire, Berkshire, Brecon, Buckinghamshire, Caernarvonshire, Cambridgeshire, Cardiganshire, Cheshire, Cornwall, Cumberland, Denbighshire, Devonshire, Dorset, Gloucestershire, Hampshire, Herefordshire, Hertfordshire, Huntingdonshire, Isle of Ely, Isle of Wight, Kent, Leicestershire, Lincolnshire (Lindsey, Kesteven, and Holland), Merioneth, Middlesex, Montgomeryshire, Norfolk, Northamptonshire, Oxfordshire, Pembrokeshire, Soke of Peterborough, Radnorshire, Rutland, Shropshire, Somerset, Suffolk (East and West), Surrey, Sussex (East and West), Warwickshire, Westmorland, Wiltshire, Worcestershire, and the North and East Ridings of Yorkshire. The Liberals retained control in Flintshire.

In **Essex**, a former Labour majority of nine seats was converted into a Conservative and Independent majority of 24; owing to redistribution, the new council has 14 more seats than the old. In **Lancashire**, where the Conservatives gained 21 seats (18 from Labour and 3 from Progressives), a former Labour majority of eight was converted into a Conservative majority of 21, the new council having 71 Conservatives, 46 Labour members, and 4 Independents and Progressives. In **Staffordshire**, where Labour formerly had an overall majority of five, the anti-Labour parties (Conservatives and Independents) now have an overall majority of 10 seats. In the **West Riding of Yorkshire** a former Labour majority of 32 was converted into an anti-Labour majority of eight, the new Council having 52 Conservatives, Independents, Liberals and National Liberals and 44 Labour members. In **Carmarthenshire**, where the new council consists of 29 Labour members, 28 Independents, and 2 Welsh Nationalists, Labour lost its former overall majority.

In addition to gaining many seats from Labour in Essex, Lancashire, Staffordshire, and the West Riding, the Conservatives also gained 11 seats from Labour in **Hertfordshire**, 10 in **Kent**, 7 in **Surrey**, and 6 in **Middlesex**. Apart from the counties where it retained control, the Labour Party did best in **Kesteven** (Lincs), where it gained 5 seats from the Independents.

In the London County Council elections, Labour retained a substantial majority on the L.C.C. despite a Conservative gain of 15 seats. Results were as follows, showing comparison with the last (1952) elections, when the number of elected councillors was, however, five more than in 1955:

	1955 elections		1952 elections	
	Seats*	Votes	Seats*	Votes
Labour . .	72	1,143,948	92	1,684,387
Conservatives . .	52	1,076,670	37	1,344,328

* Excluding aldermanic appointments.

Only 32.4 per cent of the electorate voted in the L.C.C. election, Labour receiving 50.5 per cent of the votes and the Conservatives 47 per cent. No other party returned any candidates, the Liberals polling 27,615 votes and the Communists 11,473.

The L.C.C. constituencies (each of which returns three members) are identical with the London Parliamentary constituencies, taking into account the changes effected under the recent redistribution of seats (see 14166 A). The Conservative gains from Labour were made in Battersea South (3 seats), Dulwich (2 seats), Clapham (3 seats), Holborn and St. Pancras South (one seat), Wandsworth Central (3 seats), and Woolwich West (2 seats), whilst the Conservatives also gained a seat in the new Barons Court division.

Municipal elections were held on May 12 in 370 cities and towns in England and Wales, whilst in another 31 towns all vacancies were filled by unopposed returns. In the great majority of cases the elections were for one-third of the councils' membership, but completely new councils were elected at Stoke-on-Trent, Louth, and Dagenham, owing to boundary changes, and in six new boroughs—Enfield, Rhondda, Ellesmere Port, Uxbridge, Spenborough, and Castleford.

Complete returns showed that the Conservatives had recovered about three-fifths of the seats lost in 1952, when these seats had last been contested. The following compilation was published by the Press Association:

	Gains	Losses	New Seats
Conservatives . .	346	35	58
Labour	49	390	187
Liberals	16	8	1
Independents	75	51	51
Communists	nil	2	nil

Excluding new seats, the Conservatives therefore made a net gain of 311 seats, Independents of 24 seats, and the Liberals of eight seats, whilst the Labour Party suffered a net loss of 341 seats. The only two Communist borough councillors in England and Wales—at Rawtenstall (Lancs.)—were defeated by Conservatives. The returns showed that the Conservative Party had polled particularly well in Lancashire and Yorkshire.

The Labour Party lost control of 11 boroughs to the Conservatives or Independents—Bolton, York, Northampton, Reading, Ipswich, Nottingham, Dudley, Morley, Llandidoes (Montgomeryshire), Daventry, and Goole—and also lost their former overall control at Walsall, where the Labour and anti-Labour parties are now equal. On the other hand, Labour won 32 of the 33 seats in the new borough of Rhondda (the remaining seat going to an Independent) and 57 of the 72 seats at Stoke-on-Trent. The Liberals retained control at Mossley (the only town in England and Wales with an overall Liberal majority) and were returned as the largest party at Huddersfield, Halifax, and Glossop. Polling varied in different places, being in general higher than in London and averaging between 40 and 50 per cent. In the new borough of Rhondda the poll was over 50 per cent.

Urban and rural district council elections were also held throughout England and Wales during the first fortnight of May and resulted in considerable Conservative gains.—(Times - Daily Telegraph - Manchester Guardian - Daily Herald - News Chronicle) **(Prev. rep. County Council Elections, 12157 A; Municipal Elections, 13609 B.)**

B. HUNGARY. — M. Nagy dismissed from Premiership and Communist Party Posts. - M. Hegedüs elected Prime Minister.

M. Imre Nagy, the Hungarian Prime Minister, who had been condemned by the Communist Party's central committee in March for "right-wing deviationism," was dismissed from the Premiership on April 18 by a unanimous vote of the National Assembly. This decision was taken on the joint recommendation of the Government and the party's central committee on the grounds that M. Nagy had "not fulfilled his duties altogether satisfactorily." He was succeeded by M. Andras Hegedus, the first Deputy Premier, who had been acting Prime Minister since M. Nagy's reported illness in February.

At a meeting of the party's Central Committee on April 14, M. Nagy had been expelled from the Political Committee, the Central Committee, and all other party offices. General Mihaly Farkas, who was said to have "supported Nagy's incorrect points of view for a long time," was dismissed at the same time from the Political Committee and from the secretaryship of the Central Committee, and was transferred to other party work. M. Istvan Kovacs, secretary of the Budapest party committee, and M. Jozsef Mekis, president of the Central Council of Trade Unions, were elected members of the Political Committee, and M. Laszlo Piros, Minister of the Interior, was elected an alternate member of the latter committee.

The Central Committee's resolution of April 14 accused M. Nagy of representing "political points of view which stand in sharp contradiction to the general policy of our party and to the interests of the working class, the working peasantry, and the people's democracy"; of impeding the development of heavy industry and co-operative farming, and of trying to "push into the background and cloud over the leading role of the party." "These anti-Marxist, anti-Leninist, anti-party viewpoints of Comrade Nagy," the resolution declared, "were interconnected and spread to the most varied spheres of political, economic, and cultural life. Nagy's actions caused serious damage to our party, to our people's democracy, and to the whole of our socialist construction."

M. Hegedüs, outlining the Government's policy to the National Assembly on April 19, said that they would "take decisive steps to develop heavy industry," accelerate the development of the basic materials industries, and continue to increase electric power production. The Government would also "continue to help and support the individually working peasants," though he emphasized that "one of the most important tasks" was "to support the socialist sector of agriculture."

Budapest radio announced on April 14 that the Government had resumed its policy of dismissing Civil Servants so that they might be transferred to heavy industry or agriculture. Nearly 200,000 Civil Servants were reported by the Western Press to have been discharged without compensation in 1954 before the adoption of M. Nagy's "new course" economic policy had stopped the process.—(Hungarian News and Information Service, Budapest - Neue Zürcher Zeitung) **(Prev. rep. 14107 A; General Farkas, 13296 A.)**

A. TURKEY - YUGOSLAVIA. — Turkish Ministerial Visit to Belgrade. - Differences between Turkish and Yugoslav Approach to International Situation. - Statements by M. Menderes and M. Kardelj. - Yugoslavia ratifies Agreement on Balkan Constituent Assembly.

M. Menderes, the Turkish Prime Minister, accompanied by M. Zorlu (Deputy Prime Minister and Minister of State) and senior Turkish officials, arrived in Belgrade on May 4 on an official visit. During their stay in Yugoslavia, which lasted until May 9, the Turkish Ministers and officials had extensive discussions with President Tito, M. Kardelj (Vice-President of the Federal Executive Council), and M. Popovich (State Secretary for Foreign Affairs). M. Menderes also visited Zagreb, where he met Dr. Bakarich, the President of Croatia.

A communiqué issued in Belgrade on May 8 said that the talks "offered an opportunity for a frank exchange of views, both on the general international situation and on problems more directly concerning relations between the two countries" It continued. "Special consideration was given to the development of co-operation between Turkey, Greece, and Yugoslavia within the framework of the Ankara and Bled treaties It was observed with satisfaction that this co-operation was developing successfully in all fields, and that conditions exist for its further favourable development Stress was laid on the role played by the Balkan alliance, as well as on its future role as an instrument of peace and security in this region and therefore as a factor for peace in general.

"During the visit it was also confirmed that a mutual desire exists for future development of economic relations, which found concrete expression in the signing of a protocol supplementary to a five-year agreement for the supply of wheat and cotton, and a protocol on the mutual financing of trade exchanges"

Finally, the communiqué said that M Menderes had invited M Kardelj and M Popovich to pay an official visit to Turkey and the invitation had been accepted.

It was observed in the Western Press that differences had, apparently, developed recently between Yugoslavia and Turkey with regard to their attitude towards current international developments. On the one hand, Yugoslavia was seen as showing a certain reluctance to undertake any steps which might appear to give added significance to the Balkan Pact because of her view that international tension had been reduced, and that there was a better prospect for bringing about a settlement of the major issues between the Soviet Union and the Western countries. These tendencies had been evident in the communiqués published at the end of Marshal Tito's visit to India and Burma (see 14040 A) and in the statement made by M. Popovich after the first meeting of the Permanent Council of the Balkan Alliance Treaty (see 14120 A). Turkey, on the other hand, was regarded as adopting a more cautious attitude towards recent developments in Soviet policy, and was thought to lay particular emphasis on extending the close military co-ordination between her, Greece, and Yugoslavia under the Balkan alliance. These differences in emphasis were evident in statements made during the Belgrade meeting.

M. Menderes, in a press statement before leaving Belgrade, declared. "When we concluded the Balkan Pact we were aware that Yugoslavia did not wish to become a member of NATO. We appreciated the reasons for Yugoslavia's point of view, just as we respect the point of view itself. On the other hand, Yugoslavia found it possible to accept Greek and Turkish membership of NATO In this way complete agreement has been reached regarding the specific position of each contracting party

"What I have said about the specific views of Yugoslavia, Turkey, and Greece leads to two interesting results. First, in accordance with the specific position of each country, each of them has its own views on certain problems But this can in no way cause harm to the solidarity of our alliance, since this is something which was foreseen and since the alliance rests on joint fundamental principles. Secondly, the fact that Greece and Turkey are members of NATO, and that Yugoslavia, Greece, and Turkey are members of the Balkan Alliance, creates a brotherly connexion between these two organizations which, in practice, have the same aim; the preservation of peace and the independence and integrity of the countries concerned in view of this fact, there can be no opposition between the two organizations.

"During our conversations we were able to note with profound satisfaction that the aims and foundations on which our alliance is built remain absolutely the same as they were on the first day of our agreement. We have received assurances from the most responsible Yugoslav personalities and have given them our assurances in this matter. Perfect agreement has been reached on fundamentals; certain different diagnoses, different views of world events, are not important—they are of secondary consideration and cannot harm the solidity of the Balkan Pact.

"In conversations with our Yugoslav colleagues, we agreed that the Balkan Pact answers not only a present need for defence and stabilization, but that it should also play a long-term role and be ever more fruitful both to the interests of the countries concerned and to the world in general. This pact in the Balkan area constitutes brotherhood, stability, and security, and will continue to develop."

M. Kardelj, speaking at a luncheon in honour of M. Menderes, recalled that when the Balkan treaty was signed two years ago the world still had plenty of ground for fear that aggression would destroy peace, and that the three countries concerned had united in a determined decision to defend their independence But since those dark days things had changed, and hope in the possibility of a more lasting and secure peace was today more realistically based.

This did not mean, he went on, that the significance of the Balkan alliance had diminished, or that the Yugoslavs contemplated "demobilizing" their exertions to do all that was necessary to strengthen their defences But no effort could be superfluous or too arduous if it held out possibilities of a relaxation of international tension and of peaceful co-existence.

M. Menderes, in reply, agreed that increased co-operation within the Balkan Alliance would establish a useful example of a fruitful and lively community of interest among peoples As regards the Yugoslav appraisal of the international situation and of the new trends in Soviet policy, however, he believed that it would be easy to reach solutions "if the desire for peace really prevailed in the minds of those who had sown fear and were holding the world under threat" Since those persons had created the threat it was they who should remove it Otherwise the peace-loving nations had no alternative but to go on undertaking the necessary defence measures, and for that reason Turkey, while subscribing to the ideas of economic and cultural co-operation, saw the Balkan alliance first and foremost as an instrument not only of Balkan security but of the "wider community" with which Turkish security was associated. "If today nobody is isolated," M. Menderes said, "we owe it to the fact that —aware of neutralist illusions and alive to our national and international responsibilities—we have not failed to undertake individual and collective responsibilities, and to the fact that the countries devoted to the cause of peace have created a peaceful bloc, the NATO"

Discussions between representatives of the Greek, Turkish, and Yugoslav General Staffs on questions connected with the Balkan Alliance had previously taken place in Belgrade in April.

The agreement on the setting-up of a Balkan Constituent Assembly was ratified by the Yugoslav National Assembly on April 24.—(Tanjug Agency, Belgrade - Turkish Embassy, London - Le Monde, Paris) **(Prev. rep. 14126 C; 14120 A.)**

B. AUSTRIA. — Release of Austrians imprisoned in Soviet Union. - Relaxation of Soviet Controls in Austria.

Following the successful Austrian-Soviet negotiations in Moscow, and prior to the signing of the Austrian State Treaty, the Soviet Government informed the Austrian Government on April 24 that, as a token of its wish "to contribute to a further strengthening of friendship and co-operation between the Soviet and Austrian peoples," it would release 613 Austrian prisoners held in the U.S.S.R. A further 74 prisoners would be handed over to the Austrian authorities as "war criminals," whilst another 39 Austrians, who had been sentenced for "active espionage against Russia in the service of foreign intelligence services," would be handed over when the Soviet occupation forces left Austria. An appeal for the release of all Austrians imprisoned in the Soviet Union had been made by Dr. Raab, the Austrian Chancellor, during his visit to Moscow. The first 15 of the released prisoners arrived in Vienna on April 29.

A further conciliatory gesture to Austria was made by the Soviet Union on April 28, when it relaxed controls on Danubian shipping and on personal travel and goods traffic between the Soviet and Western occupation zones of Austria.
(Wiener Zeitung - Neue Zurcher Zeitung) **(14193 A; 14154 A.)**

C. UNITED STATES. — Appointment and Functions of Civil Defence Co-ordinating Board.

President Eisenhower ordered on April 9 the formation of a new board, known as the Civil Defence Co-ordinating Board, to co-ordinate civil defence activities of Federal agencies, and nominated Mr. Val Peterson, the U.S. Civil Defence Administrator, as its head. The President said that a request for the formation of such a board had been made by Mr. Peterson, and asked the Secretaries of Defence, Commerce, Treasury, Health, Education and Welfare, the Interior, and Agriculture, as well as the Postmaster-General and the Attorney-General, to designate top-ranking officials to serve on it. In addition, the Office of Defence Mobilization, the Federal Power Commission, the Veterans' Administration, the Atomic Energy Commission, and the General Services Administration will also be represented on the new board.—(New York Times)
(Prev. rep. Civil Defence, 13025 F; 13174 C.)

D. INDIA. — Opening of Kandla Port.

The new Indian port of Kandla, on the Gulf of Kutch, was officially opened on April 9. Expected to be completed by 1957 at a total cost of Rs.14 crores (about £10,500,000), the new port will serve a hinterland covering 257,000 square miles, with a population of about 45,000,000.—(Indian High Commissioner's Office, London) **(Prev. rep. 13012 C.)**

A. UNITED KINGDOM. — Non-Woollen Textile Industries. - Abolition of Purchase Tax on Household and Piece Goods. - Indian Reduction of Import Duties on British Cotton Textiles.

Sir Anthony Eden announced in the House of Commons on May 3 that, following a visit to India by a mission from the Lancashire textile industry, the Indian Government had agreed to reduce tariffs on imported cotton textiles from their existing level of from 60 to 80 per cent *ad valorem* to an average of 25 per cent. After carefully considering representations from the textile industry regarding the effect of purchase tax on the export of quality textiles, and in order to help the industry to take advantage of the new situation created by the Indian tariff decision, H.M. Government had decided to remove purchase tax altogether from those textile goods on which it had already been reduced from 50 to 25 per cent in the Budget. The combined cost of the two decisions, respectively reducing the tax and abolishing it altogether, would be about £6,000,000 in a full year.

The Prime Minister explained that in 1953 India had raised her tariff against British cotton textiles, whilst in addition retaining a very severe quota restriction. After representations by H.M. Government on both quota and tariffs, the quota restriction had been removed in November, 1954, but the tariff had been retained and had formed "an almost complete barrier to trade." After a visit to India by Mr. Low (Minister of State, Board of Trade) at the end of 1954, arrangements had been made for a visit by the mission from the textile industry, whose work had been backed up by further Government representations. In addition to the new import tariffs there would be a specific duty averaging 5 per cent, but Indian producers would also have to pay this, and the present "substantial and important preference" in favour of British exports, as compared with cotton textile exports from other countries to India, would be preserved.

Sir Anthony added that the Government had also considered the question of the level of imports of duty-free cloth from the Commonwealth, but would be reluctant to take action against imports from India, particularly if it would discriminate against India *vis-à-vis* other parts of the Commonwealth; moreover, special considerations of Colonial policy arose in the case of Hongkong. At the present time and in existing circumstances, therefore, the Government "were not prepared to depart from their long-established arrangements for duty-free entry from the Commonwealth."

The reduction in import duties on cotton textiles from the U.K. was announced in New Delhi by Sir Chintaman Deshmukh, the Indian Finance Minister, on the same day.

Sir Chintaman Deshmukh recalled that in her 1953 Budget, India had raised the import duties on cotton textiles "to a very high level" for revenue considerations. Since then the British Government had repeatedly represented to her that these duties were prohibitive, and that Indian textiles were subject to no import duty at all in the United Kingdom. The Indian Government had therefore examined the whole problem in close consultation with the leading mill owners' associations, and were satisfied that the reduced duties would "cause no damage to the domestic industry"—a view which the mill owners' associations had accepted.

It was stated in the British Press that Indian imports of British cotton textiles had fallen from about 6,000,000 yards in 1952, before the tariffs were raised, to about 3,250,000 yards in 1954, whilst a still further decline had taken place since January, 1955, when the quota system ended.

On March 12 the Indian Deputy Minister for Commerce and Industry stated in the House of the People in New Delhi that exports of cotton textiles to the United Kingdom had increased from 20,350,000 yards in 1953 to 125,190,000 yards in 1954.

Keen disappointment at the limited extent of the concessions announced by the Chancellor of the Exchequer in his Budget speech had previously been expressed by all sections of the British cotton industry.

Mr. W. T. Winterbottom, a member of the Cotton Board and a former past president of the Master Cotton Spinners' Association, complained on April 19 that the halving of purchase tax would affect "neither the irksome procedure of tax collection nor buyers' discrimination against textiles carrying tax," and called for the complete abolition of purchase tax or the scrapping of the "D" scheme. On the same day Mr. L. Wright, general secretary of the Weavers' Amalgamation, described the concessions as "a useless gesture which will do nothing to stimulate the production of better quality goods," and similar criticisms were voiced by the Council of the Cotton and Rayon Merchants' Association on April 20. Sir Raymond Streat, chairman of the Cotton Board, declared on April 25 that the Chancellor had "thrown the cotton industry a sop rather than a lifebelt," and stressed his conviction that "nothing less than cancellation of purchase tax will enable the industry to succeed in its struggle for the export trade." On the same day the National Chamber of Trade, at its annual conference at Scarborough, unanimously passed a resolution calling for "some measure of restriction on imports of Indian and Japanese textile goods," whilst on April 27 the representatives of 21 non-woollen textile organizations likewise strongly criticized the retention of purchase tax and the "D" scheme, as well as the Chancellor's failure to give any tax concession whatever on wearing apparel.

The Government's handling of the cotton situation had also been strongly criticized by Opposition members in the House of Commons on April 22, during the Budget debate.

Mr. Harold Wilson (Lab.), who described the Government's record concerning the cotton industry as "one of delay, confusion, and cynical and callous neglect," accused the Chancellor of the Exchequer of "hoping to buy off Lancashire with a derisory reduction of purchase tax on certain textile piece goods." He asserted that the total tax remission given in the Budget to I.C.I. and Unilever was "almost equal to the £2,500,000 conceded by the purchase tax remission" to the cotton industry; maintained that neither this concession nor the possible success of the tariff negotiations proceeding with India would solve Lancashire's problem, and declared that the basic reason for the cotton industry's misfortunes was "the large importation of Indian goods on conditions which amount to unfair and virtually subsidized competition."

Mr. Butler (Chancellor of the Exchequer) stated in reply that the Government fully recognized that "purchase tax is only one small part of the story," and that "the big problems of Lancashire are concerned with exports and with the imports from certain countries which have been such a threat." He pointed out, however, that at this stage he could not give final answers on these questions pending the conclusion of discussions then proceeding with India, since "any wrong action might result in retaliation against our goods." He promised that the Government would make a further announcement as soon as possible.

Sir Walter Monckton, the Minister of Labour, stated in a Parliamentary reply on April 21 that between Dec. 31, 1954, and Feb 28, 1955, there was a net reduction of 2,000 in employment in the cotton industry, whilst latest information on the cotton-spinning side indicated that there had been a further reduction of about 2,700 during March.—(Manchester Guardian - Times - Daily Telegraph - Treasury Press Office - The Statesman, Calcutta - Indian High Commissioner's Office, London)

(Prev. rep. 14145 A; 13801 B.)

B. JORDAN. — British Grant for National Guard. - Increased American Economic Aid.

It was announced in Amman on Feb. 9, and confirmed in London, that the British and Jordanian Governments had agreed that the time was not appropriate to consider the revision of the Anglo-Jordanian mutual assistance treaty, as had been suggested by Jordan and about which talks had taken place in London in December, 1954. At the same time it was announced that Britain had agreed to make an annual grant of £350,000 for five years (subject to Parliamentary approval) to help finance the Jordanian National Guard.

The Jordanian Prime Minister, Tewfik Abulhuda, said at a press conference on Feb. 9 that two other amendments to the treaty proposed by Jordan remained outstanding - namely, that Jordan should be supplied with fighter aircraft, and that payment of the Arab Legion subsidy of £7,500,000 a year should be made direct to the King of Jordan instead of into the Legion's account in London. It was pointed out in London that whilst the British Government had not agreed to a change in the general control of these funds from British to Jordanian hands, they had promised to consider giving the Jordanian Government greater influence over their specific application. It was also explained that the proposed new grant to the Jordanian National Guard had nothing to do with the Anglo-Jordanian treaty.

The Jordanian Minister of Economy announced on Dec. 22, 1954, that Jordan would receive further U.S. financial aid amounting to $7,200,000, which would be spent on the Yarmuk River hydro-electric and irrigation projects, industrial loans, and road construction. He added that the Government intended to build a petroleum refinery in co-operation with foreign companies.—(Times - New York Times) **(Prev. rep. British Aid, Treaty Revision, 14032 C; U.S. Aid, 13650 C.)**

C. AUSTRALIA. — Opening of Kwinana and Altona Oil Refineries.

The British Petroleum Company's Kwinana refinery, situated on Cockburn Sound, near Fremantle (Western Australia), began operations on Feb. 1, 1955. The refinery, the largest yet built in Australia, has a processing capacity of 3,000,000 tons of crude petroleum annually, and was built at a cost of £A40,000,000.

The Standard-Vacuum Oil Company's expanded refinery at Altona (Victoria) was opened by Mr. Menzies on April 4. The refinery, extended and remodelled at a cost of £A22,000,000, has an annual refining capacity of about 1,125,000 tons of crude oil, and a daily output of nearly 1,000,000 gallons of petroleum products.—(Australian News and Information Bureau)

(Prev. rep. 12314 A; 10614 A.)

A. AUSTRALIA - NEW ZEALAND. — Defence Policy. - Despatch of Air, Sea, and Land Forces to Malaya. - Criticism by Australian Labour Party. - Endorsement by N.Z. Labour Party. - Revision of N.Z. Defence Strategy.

Following their return from the Commonwealth Prime Ministers' Conference in London in February, the Prime Ministers of Australia and New Zealand (Mr. Menzies and Mr. Holland) both announced important changes in their countries' defence policies, involving principally the despatch of forces to Malaya. Mr. Menzies, who made his announcement on April 1, said that the Australian contribution would include an infantry battalion with supporting arms, backed by reinforcements in Australia, a fighter wing of two squadrons, a bomber wing of one squadron, and an airfield construction squadron; and two destroyers or frigates, an aircraft-carrier on an annual visit, and additional ships in an emergency.

The principal changes in New Zealand's defence policy, announced by Mr. Holland on March 24, were the cancellation of her strategic commitments in the Middle East and their replacement by similar obligations in South-East Asia; the acquisition from Britain of a *Royalist*-class cruiser (7,000 tons), which New Zealand would modernize; the despatch of two N.Z. frigates to Malaya, with a possible third should necessity arise, the transfer of a fighter squadron from Cyprus to Malaya and, in addition, the maintenance of half a transport squadron and half a maritime reconnaissance squadron, and the enlistment of a Special Air Service unit for service against the terrorists in Malaya.

Australian Defence Policy.

Mr. Menzies, in making his announcement, said that while the forces to be provided by Australia were not in themselves massive, they would, together with those to be provided by Britain and New Zealand, be "some proof of the seriousness with which we take the Communist threat" He added "They will serve as some guarantee to the people of Malaya that their present orderly progress towards democratic self-government, which enjoys the deep sympathetic interest of Australia, will not be impeded by Communist aggression"

A further statement on the subject was made by Mr Menzies on April 20 when opening a foreign affairs debate in the House of Representatives He announced that since his first statement the Cabinet had agreed that Australia, with Britain and New Zealand, must be ready in the event of war to contribute substantially greater forces to South-East Asia, that their strength had yet to be determined, but that it would probably be of the order of two divisions. Mr Menzies added that he had explained in London that Australian opinion would desire some adequate assurance from the U S Government that, in the event of war, British land forces would have U S support in naval and air power and in the provision of equipment Referring in this connexion to his U S. visit on his return from the Commonwealth conference, Mr Menzies said that he had had important discussions with President Eisenhower and Mr Dulles against this background. The result had been an agreed statement, made with the authority of the U S. President and the Secretary of State, which, he felt, strengthened Australia "enormously in respect of her commitments"

This statement, which Mr Menzies read to the House, contained the following passages. "Our discussions made it abundantly clear that, in the general task of preventing further Communist aggression, the U S A considered the defence of South-East Asia, of which Malaya is an integral part, to be of very great importance It is to be expected that the military arrangements put in train at the recent Bangkok meeting will provide all the Manila Pact member-Governments with more specific information regarding the best means for each country to contribute towards the defence of this area.

"I raised the question whether, in the event of Great Britain, Australia, and New Zealand undertaking to station substantial forces in Malaya, we could be assured that the United States would be prepared to give us effective co-operation I was informed that, though the tactical employment of forces was a matter which would have to be worked out in detail on the services level, the U S.A considered that such effective co-operation was implicit in the Manila Pact.

"I inquired further whether, because of the deficiencies in military equipment which have inevitably arisen from the very great pressure which exists upon our resources of money, men, and materials, we might hope to be able to look to the U.S.A. for military supply on some basis to be arranged. I was assured that, having regard to what the Americans knew so well about Australia's attitude and fighting capacity, they would be happy to take this matter up with our officials upon the basis of an accurate assessment of our deficiencies and consideration of the ways and means whereby the equipment position may be improved

"In brief, I feel assured of complete co-operation between our two nations in the defence of common security, and in resistance to any further acts of Communist aggression."

On foreign policy in general, Mr. Menzies said that Australia's main objectives were: (1) to seek peace with justice, (2) in case of war, to have "powerful and willing friends"; (3) to defend not only Australia's own rights but those of others; (4) to raise living standards of under-privileged nations; (5) to "live and let live" in internal affairs.

With regard to Formosa, the Australian view was that the problem should be resolved by peaceful means. The offshore islands presented a more difficult case, because their unconditional abandonment would not only intensify the truculence of the Communists, but could also impair the morale of the non-Communist Chinese in Formosa and South-East Asia and of free peoples throughout the area In these circumstances, he added, it was not surprising that U S policy should have been expressed in guarded, even ambiguous, terms

Dr. Evatt, the Leader of the Opposition, reiterated the Labour Party's opposition to the despatch of troops to Malaya, which had already been expressed by the Party's conference at Hobart (see 14178 A) Speaking in the resumed debate on April 27, he said that his party believed that the use of Australian armed forces in Malaya, whether for garrison duty or jungle fighting, would gravely impair Australia's relations with Malaya It would be 'an act of folly which could easily be misrepresented as an act of aggression," and would be "resented by the Malayan masses as an unwarrantable intrusion" He dismissed as "unconvincing" the argument that Malaya was an area in which Australia must engage militarily in wartime, saying that it was far better to train Australian troops for war in Australian territory—which extended to the Equator—and to transport them by air if war came

The establishment of a strategic reserve for Australia 2,000 miles from Australian shores, he went on, was certain to be regarded as a "provocative act," and he asked whether it would be right for Communist China to establish a strategic reserve in Indonesia to meet possible aggression from Australia The trouble about advance allocation of substantial military forces outside Australia was that other nations might follow Australia's example Dr Evatt also asserted that Mr Menzies had been "studiously vague" about the recruitment of the proposed two divisions for Malaya in the event of war, and asked whether the Government proposed to introduce compulsory military service or not

Mr. Casey, the Minister for External Affairs, rejected as "nonsense" the assertion that there would be resentment anywhere in Asia at the stationing of Australian troops in Malaya, and declared that there was a "red thread of isolationism" running through the fabric of the Labour Party's foreign policy programme. He stated that there would soon be a Malayan in the office of the U K. High Commissioner in Canberra, and that the Australian Government had decided to open an office in Kuala Lumpur to strengthen relations with Malaya **Mr. Joshua,** leader of the new anti-Communist Labour party (see 14178 A), agreed that the despatch of troops to Malaya was the logical course to follow

At the end of the debate on May 5 a Labour amendment rejecting the Government's proposal to send Australian troops to Malaya was defeated by 55 votes to 43 The Government was supported in the division by four members of the anti-Communist Labour party.

New Zealand Defence Policy.

Mr. Holland, in his statement, declared that "we as a country can no longer operate and function as though we were observers of a world situation, quite content to call our men up and train them once war has broken out, and in the meantime leaving a great deal of the burden of maintaining peace to the Mother Country" "Today," he said, "because of her exertions in the last war, Britain is hard pressed She has her forces spread around the world, and I believe we must lend a hand and play a part" The switching of New Zealand's commitments from the Middle East to the Pacific, which had been asked of her at the Commonwealth conference, was to be commended "from every point of view." This change would involve obligations, and whilst it would be unwise to go into them in detail, the Government had recommended raising one infantry division with accompanying armour, artillery and other ancillary units required.

With regard to the Navy, Mr. Holland argued that the danger of invasion of New Zealand was "negligible" and could be said to be "almost non-existent," but that the submarine risk in any future war would be "considerable" New Zealand at present had two cruisers, one of which was very old, and the Government had been considering whether to get another frigate or two to replace this old cruiser. At his talks with the Admiralty in London, however, he had been advised to have a completely reconditioned cruiser of the *Royalist* class with 5.25-in guns rather than the two frigates, and this is what he had recommended to the Government The ship was being given to New Zealand by Britain, but New Zealand would pay the cost of reconditioning, estimated at about £4,000,000. The sending of two N Z frigates to Malaya would give crews the opportunity for service in conditions which the Navy would be likely to meet if New Zealand were involved in war

Referring to the transfer of the N.Z. fighter squadron from Cyprus to Malaya, which he had first announced when he was in Malaya at the end of February, Mr. Holland said that it would actually be based on Singapore. It was equipped with *Vampires* and would serve alongside an R.A.F. squadron of the same type.

On the question of conscription, Mr. Holland declared: "I believe that we can carry out everything we are considering and everything we have been asked to do without any reduction by voluntary means, but I say as emphatically as I can that, if I felt that we ought to have conscription in peace-time to carry out our obligations to save our country, I would not hesitate for a fraction of a second to recommend the Government to take that step. Meanwhile, I believe we have sufficient volunteers to carry out the programme. . . As for the money, we cannot afford not to do those things. Our security is too important for us to consider cutting down because we cannot afford those things for the moment."

In conclusion, Mr. Holland announced that New Zealand would probably be asked to double her investment in the Wairakei heavy water project; that the Government had decided that N Z should have special representation in South-East Asia in view of the greatly increased importance of the area and the changed situation in international affairs; and that he had insisted, as a condition of undertaking the new commitments, that they should be automatically reviewed in two years' time

Mr. Walter Nash, the Leader of the Opposition, welcomed the proposal for New Zealand representation in South-East Asia, but thought that her representation in Japan ought to be on a higher level than a *Chargé d'Affaires* He did not disagree with the new defence commitments announced by Mr Holland, though he criticized the fact that the Labour Party had not been consulted first.

Mr. Macdonald, the Minister of Defence, giving further details of the Special Air Service Squadron, said that it would be formed from selected volunteers from the Regular Army and from new enlistments, but would be enlisted for the normal Regular engagement of five years or for a special engagement of three years One squadron would be formed in the first instance, which would involve recruiting 150-200 men. As training proceeded and enlistments were received, consideration would be given to the formation of a further squadron

It was announced in Wellington on March 28 that the New Zealand fighter squadron in Malaya would be equipped with the latest *Venom* jet aircraft by about the midle of 1956. A subsequent announcement about the Special Air Service Squadron said that over 600 men had already volunteered, at least half of whom had selected the longer period of five years.

The Government's decision to send military aid to Malaya as part of New Zealand's responsibilities in Commonwealth defence was unanimously endorsed by the annual conference of the N.Z Labour Party on May 18, the resolution adding as a condition that "steps are taken to give self-government to the people of Malaya as soon as possible, and that the wealth of Malaya be used to improve the living standards of the Malayan people." Mr. North, chairman of the party, said in his annual report to the conference that no objection could logically be raised to New Zealand helping Britain to remove Communist terrorist activity, which was the biggest stumbling-block to Malaya's progress towards self-government and development.—(Australian News and Information Bureau - Directorate of Information Services, Wellington - Times - Manchester Guardian) **(Prev. rep. 14038 A.)**

A. INTERNATIONAL LABOUR ORGANIZATION. — Venezuelan Withdrawal from I.L.O.

The Venezuelan Government announced on May 3 that it would withdraw from the International Labour Organization, and at the same time protested against the premature termination of the fifth session of the I.L.O. Petroleum Committee, which had opened in Caracas on April 25.

The incident arose out of a speech made on the opening day by Mr. Adrian Vermeulen (Netherlands), who represented the workers' group on the I.L O. Governing Body delegation to the Petroleum Committee This speech, in which Mr. Vermeulen criticized labour conditions in Venezuela and appealed to that country to allow trade unions to operate freely and to release imprisoned trade union officials, gave offence to the Venezuelan Government, which declared Mr. Vermeulen *persona non grata* and ordered his deportation to Curaçao. In spite of representations by the Director-General of the I.L.O. (Mr David A. Morse), who pointed out the repercussions which might follow from such treatment of a delegate to an international conference, President Jimenez of Venezuela insisted that his Government had acted in accordance with its rights and that Mr. Vermeulen could only be permitted to return subject to certain conditions In the circumstances the I.L.O. Governing Body decided on May 2 that the session be adjourned indefinitely, and announced that it would fix a date and place for resuming it later elsewhere.

Under the I.L.O.'s constitution, a withdrawal from the Organization becomes legally effective after two years.

(U.N. Information Centre, London - New York Times)

B. TANGANYIKA. — New Constitution.

Tanganyika's new Constitution came into effect on March 24, when special Gazette notices were published outlining the Constitutional amendments and giving the names of both official and unofficial members of the new Legislative Council.

The new House will consist of 61 members, of whom 31 will be on the Government side and 30 on the unofficial side The Government side will include 12 non-officials—four Europeans, four Africans, and four Asians—and the unofficial side will have parity representation of the three main communities · 10-10-10. Arab interests will be represented by the Asian members.

An interesting innovation was the appointment as an unofficial member by the Governor of Sir Eldred Hitchcock, who—with an Arab member and an African member also selected by the Governor—will represent the special interests of Tanganyika as a whole, as distinct from the other members on the unofficial side who will represent the eight separate Provincial constituencies and the municipality of Dar-es-Salaam.

(Times - New Commonwealth) **(Prev. rep. 14032 A.)**

C. INDIA. — The Untouchability (Offences) Act.

The Untouchability (Offences) Bill, which laid down penalties for discriminatory treatment on grounds of caste, received its third reading in the House of the People on April 28 and in the Council of States on May 2, the voting in both Houses being unanimous. Pandit Pant (the Home Minister), moving the Bill in the House of the People, pointed out that Indian criticism of racial segregation and discrimination abroad was weakened by the survival of untouchability at home, and that it was difficult for India to advocate racial equality in South Africa "when many of our own people in our own country are not treated with respect."

Under the Bill as finally adopted, the following offences were made punishable by imprisonment or a fine of Rs. 500 for a first offence, and by imprisonment for up to six months for a second offence: prevention of the right to enter places of worship or any shop, public restaurant, place of entertainment, or public conveyance, prevention of the right to practise any profession, refusal to admit persons to hospitals or to sell goods or render services; molestation or annoyance of persons on caste grounds; and the encouragement in any way of the practice of untouchability. The onus of proving innocence rested in each case with the accused person The House of the People adopted a number of amendments adding to the list of disabilities made punishable, among such disabilities being the enforcement of a custom whereby in certain areas "untouchable" women are not allowed to wear jewellery and personal ornaments

The adoption of such legislation had been recommended in the report for 1952 of the Commissioner for Scheduled Castes and Scheduled Tribes (Mr. L. M. Shrikant). This report stated that, in spite of the abolition of "untouchability" under the Indian Constitution, the measures against untouchability adopted by the State Governments had not proved very effective as the scheduled castes had neither the courage to report cases of discrimination to the police nor the money to take cases to the courts. The report gave the number of "untouchables" as 51,343,898, and noted that untouchability existed mainly in rural areas, where the people were illiterate and tradition-ridden. The only States free from untouchability were Assam, Manipur, and Tripura; in West Bengal the scheduled castes were "considered socially low," but untouchability was not practised as such.

In a subsequent report presented to Parliament on Sept. 2, 1954, Mr. Shrikant complained of lack of co-operation from many of the State Governments, only 16 of which had agreed to keep records of villages where untouchables suffered from social disabilities, whilst none of the States had adopted his proposal that free legal aid should be granted to untouchables in cases arising from denial of rights conferred upon them by the Constitution. Rejecting the contention of the Governments of Madhya Pradesh, West Bengal, Travancore-Cochin, Bilaspur, and Delhi that no cases of untouchability had occurred in their States, he pointed out that in the first three States cases had been reported to the police, and that a large number of unreported cases occurred practically every day.

The Government of Saurashtra launched an official campaign in 1954 for the eradication of untouchability, and on Oct. 11 announced that five grants of Rs. 1,000, to be used for the improvement of public services, would be awarded to the villages making the most valuable contribution towards the removal of the social disabilities of untouchables. The Bombay Government announced on Nov. 6 that it would grant Rs. 20 a month to any high-caste Hindu who undertook to keep one low-caste child as a member of his family.

In his report for 1954, presented to the Indian Parliament on May 4, 1955, Mr. Shrikant emphasized the remarkable progress which had been made in educating both the scheduled castes and the scheduled tribes, and stated that grants by the Centre to the State Governments for the welfare of both classes had proved very successful. Among new measures to promote the welfare of the scheduled castes, he proposed to submit a housing scheme involving expenditure by the Central Government of up to 50,000,000 rupees (£3,750,000) in the first instance.

(The Hindu, Madras - The Statesman, Calcutta) **(11120 D.)**

D. ARGENTINA - URUGUAY. — Resumption of Diplomatic Relations.

Diplomatic relations between Argentina and Uruguay, which had been broken off after the dispute between the two countries in 1953 over Argentine claims to the Falkland Islands (see 12664 C), were resumed on April 19, 1955, on which date the respective Ambassadors of the two countries took up their posts in Montevideo and Buenos Aires.

(Bank of London and South America, Fortnightly Review)

E. BURMA - JAPAN. — Peace Treaty in Force.

The peace treaty between the Union of Burma and Japan, signed in Rangoon on Nov. 5, 1954, came into force on April 16, when instruments of ratification were exchanged in Tokio.

(Burmese Government Information Department, Rangoon)

(Prev. rep. Peace Treaty, 13921 A.)

MAY 21—28, 1955

A. ITALY. — Election of President Gronchi.

The Italian Senate and Chamber of Deputies met in joint session on April 28 to elect a new President of Italy in succession to President Luigi Einaudi, whose seven-year term of office expired on May 11. The membership of the electoral Assembly totalled 843, divided by parties as follows. Christian Democrats, 377; Communists and Left-wing (Nenni) Socialists, 295; Monarchists, 54; Italian Social Movement (neo-Fascist), 37; Social Democrats, 23; Liberals, 17; Republicans, 7, others, 23; representatives of the autonomous Regions, 10.

The first three ballots, in which a two-thirds majority (i.e. 562 votes) was required for the successful candidate, were inconclusive. Only a fourth ballot on April 29, in which a simple majority (i.e. 422 votes) was sufficient, resulted in the election of Signor Giovanni Gronchi (Christian Democrat), the President of the Chamber of Deputies, as the new President of the Italian Republic.

Detailed voting figures in the four ballots (which were secret) were as follows:

	First ballot	Second ballot	Third ballot	Fourth ballot
Sig. Gronchi (Christian Democrat)	30	127	281	658
Sig. Merzagora (Independent)	228	225	245	—
Sig. Einaudi (Liberal)	120	80	61	70
Sig. Parri (Socialist)	308	—	—	—
Sig. Segni (Christian Democrat)	12	18	14	—
Sig. De Caro (Liberal)	—	—	12	—
Others	23	24	7	11
Invalid votes	5	2	2	2
Blank papers	89	332	195	92

The highest number of votes in the first ballot was thus cast for Signor Ferruccio Parri (one of the leaders of the Resistance movement during the war, and Prime Minister in 1946), who was the candidate of the Left-wing Socialists and was also supported by the Communists and Left-wing Independents. He withdrew his candidature, however, after the first ballot. Signor Cesare Merzagora (President of the Senate), who stood as an Independent, had been nominated by the Christian Democratic leadership but was opposed by the opposition group within the party known as the *Concentrazione*; for this reason he fell, in the first ballot, 149 votes short of the total voting strength of the Christian Democrats. The Social Democrats and Liberals voted throughout for Professor Einaudi, the outgoing President, who was also believed to have been supported in the first and second ballots by a number of the dissenting Christian Democrats.

The split in the Christian Democratic ranks continued in the second and third ballots, making it impossible for Signor Merzagora to obtain the required majority. Meanwhile, Signor Gronchi forged steadily ahead and in the third ballot emerged with the largest number of votes, although the Christian Democratic leadership under Signor Scelba (the Prime Minister) and Signor Fanfani (the party's general-secretary) had opposed his candidature from the beginning. After the third ballot the Christian Democratic leaders suggested to Signor Gronchi that he should withdraw his candidature to make possible Signor Merzagora's election; however, when it became clear that Signor Gronchi would continue to have the support not only of the Left-wing parties but of a large number of Christian Democrats, the party leadership decided on April 29 to adopt him as its official candidate. Signor Merzagora thereupon withdrew, thus making it possible for Signor Gronchi to obtain an overwhelming majority in the fourth and final ballot.

Signor Giovanni Gronchi (67), the second President of the Italian Republic, was born in Pisa, the son of a book-keeper. He studied at Pisa University, where he specialized in classical languages and in literature, played an active role in Roman Catholic youth and trade union organizations, and was a pioneer of the formation of Christian trade unions in Italy. After serving with distinction in the First World War, he was among the founders of the Italian Popular Party (Catholic) in 1919, collaborated closely with its leader, Don Sturzo, and in the same year was elected a deputy. He subsequently became secretary-general of the Confederation of Christian Workers, and was appointed Under-Secretary for Industry and Trade in the Cabinet formed by Mussolini in October, 1922, on the eve of the Fascist march on Rome. After the murder of Matteotti, Signor Gronchi was among those Opposition deputies who resigned their seats in Parliament in protest against Mussolini's dictatorship. Throughout the 20 years of the Fascist regime he devoted himself exclusively to business life, and played no part in politics.

During the Second World War he joined the Italian Resistance movement, and in 1943 became (with the late Signor De Gasperi) one of the two Christian Democrat representatives in the central committee of the Committee of National Liberation. He eluded capture by the Gestapo during the German occupation of Rome. After the liberation of Rome (June, 1944) he was a member of the two Bonomi Ministries and the Parri Ministry (1944-45), holding the portfolios of Industry, Commerce and Labour, and subsequently joined the first De Gasperi Cabinet (1945-46) as Minister of Industry and Commerce. Signor Gronchi was elected in 1946 to the Constituent Assembly, in which he became chairman of the Christian Democratic parliamentary group, and since 1948 had been a member of the Chamber of Deputies, representing the Tuscan constituency embracing Pisa and Leghorn. He had been President of the Chamber of Deputies since its formation in 1948, and is widely known in Italy as one of the country's leading political orators.

One of the founders of the Christian Democratic Party after the Second World War, Signor Gronchi realized the importance for the Christian Democrats of gaining the support of the Italian working-classes by a progressive social policy. Prior to his election as President of the Republic, he was the recognized leader of the party's extreme Left-wing. A practising Roman Catholic, he has always been strongly opposed to Communism, and was instrumental in bringing about the secession of the Christian trade unions from the *Confederazione Generale Italiana del Lavoro* after the general strike of July, 1948, because of the domination of the C.G.L.L. by the Communists. On the other hand, in contrast to the official party policy, Signor Gronchi has for many years advocated the inclusion of the Left-wing Socialists, led by Signor Nenni, in the Government coalition as the most effective means of ending their present political co-operation with the Communist Party.

Whilst opposing the E.D.C. Treaty, Signor Gronchi has always expressed himself in favour of European union and even of some sort of European federation, he supported Italy's adherence to the North Atlantic Treaty, but has always stressed that the sovereignty and independence of the members of NATO must be "totally preserved." He has advocated general disarmament and, on account of his independent views, has even been accused by his political opponents of pacifism and neutralism. Because of his strong opposition to the present party leadership headed by Signori Scelba and Fanfani, he had been excluded from the national council and the executive committee of the Christian Democratic Party at the last party congress held at Naples.

Signor Gronchi was sworn-in as President of Italy at a joint session of both Houses on May 11.

Addressing the joint session, President Gronchi placed principal emphasis on Italy's social policy, and stressed that the country's main task was to improve the living conditions of the Italian people. "The forces of labour must not be forgotten," he declared, "and there must be closer collaboration between the Government and these forces." The main problems, he said, were to reduce unemployment, to increase production, to strengthen the currency, to continue the development of Southern Italy, to adhere to the faithful application of the Constitution, and to realize social justice. Condemning the concentration of wealth and monopolies, he declared that private enterprise should remain but that it "must go hand in hand with justice and the freedom of man", at the same time, however, he gave a warning against any excessive extension of the economic power of the State, and declared that private and public initiative should be complementary. Finally, President Gronchi stressed Italy's adherence to the community of free peoples, and declared that she would faithfully carry out the international commitments into which she had entered.

On May 10 the Chamber of Deputies had elected Professor Giovanni Leone (Christian Democrat) as its new President in succession to Signor Gronchi.

Signor Leone (47), a professor of law and author of many legal works, had previously been the senior Vice-President of the Chamber. His election, which was on a first ballot and by a majority of 311 votes to 213, was supported by the Christian Democrats, the Liberals, the Monarchists, and the Italian Social Movement, whilst the Opposition candidate, Signor Targetti, had the support of the Nenni Socialists and the Communists; 26 Social Democrats and Republicans cast blank votes. The election of Professor Leone was regarded as another success for the *Concentrazione*, which had originally proposed his candidacy—a suggestion accepted by the party leadership.

Signor Scelba tendered the resignation of his Government to President Gronchi on May 12, but was asked by the President to continue in office. It had previously been stated that the Government had decided that its resignation would only be "a simple, formal, dutiful act of homage" to the new head of State; that no constitutional requirement existed imposing a "substantial" resignation (which would have necessitated negotiations for the formation of a new Government); and that the Cabinet had also taken note that the coalition parties had expressed themselves in favour of continuing their present collaboration. On the previous day the national executive of the Christian Democrats had appealed to the other two coalition parties (the Social Democrats and the Liberals) to remain in the Government coalition. Although the Social Democrats had earlier threatened to withdraw unless certain of their policy demands were accepted, the party's directorate decided on May 12 by 16 votes to four, with one abstention, to remain in the Government and to continue the policy of "democratic solidarity" with the other governmental parties.

(Giornale d'Italia, Rome - Corriere d'Informazione, Milan)

(Prev. rep. Presidential Election, 9295 A.)

A. UNITED STATES. — Atomic Weapon Tests in Nevada. - Appointments to Atomic Energy Commission.

A further series of atomic weapon tests was carried out by the U.S. Atomic Energy Commission at the proving grounds in the Nevada desert between Feb. 18 and May 15. A number of the later tests were attended by Sir William Penney, director of the British Atomic Weapons Research Establishment at Aldermaston, and other British and Canadian scientists and service officers, this being the first occasion for a number of years that British scientists had been invited to watch any such tests. The tests, of which there were 14, are described below.

(1) A nuclear device was dropped from a high-flying *B-36* bomber on Feb. 18 in a test involving about 35 major experiments concerned with weapons and civil defence. It produced a relatively small explosion and only a slight flash was seen at Las Vegas, 60 miles away. No noticeable shock effect was felt.

(2) The second explosion, described as "a standard size shot of medium explosive force," was set off from the top of a 300-ft. steel tower on Feb 22. Experts estimated that it had an explosive force of 15,000-20,000 tons of T.N T. (compared with 25,000 tons equivalent in the Hiroshima and Nagasaki bombs), but the flash was nevertheless seem more than 400 miles away in San Francisco and Oakland, California, and the blast was felt and heard in St George, Utah, some 135 miles from the test site. Troops were deployed in trenches some two miles from the explosion to get experience of possible warfare in atomic conditions, and aircraft were flown in simulated operations about the area after the explosion.

(3) Another atomic device of undisclosed type was detonated from a 300-ft. tower on March 1 After the explosion—the flash of which was seen nearly 500 miles away—troops who had been entrenched two miles away moved into the blast area to inspect vehicles, dummies, and weapons which had been exposed to its effects. Some 40 aircraft were also employed, most of them on technical or training missions

(4) The largest explosion of the series so far, equivalent to some 35,000 tons of T N T., was detonated from a 500-ft. tower on March 7, the flash being seen over 800 miles away. The A.E.C. announced that 40 experiments had been conducted in connexion with the test, including military, civil defence, and "diagnostic" or purely scientific studies. More than 100 aircraft took part in observing the test, but troops who were to have taken part in manoeuvres afterwards had to evacuate the area owing to the possibility of radio-active fall-out following a change in wind direction.

(5) A small atomic device, with a force equivalent to about 5,000 tons of T.N.T., was exploded from a 300-ft. tower on March 12 above a cloud of artificial smoke The experiment was designed to test the theory that the thermal radiation from an atomic explosion could be greatly reduced by laying an artificial smoke-screen, and mice were used in the area of the explosion No troops participated in the test.

(6) A small device, with an estimated force equivalent to 10,000 tons of T.N.T., was exploded from a 500-ft. tower on March 22. A military exercise simulating a beachhead landing was held in connexion with the explosion, 2,000 Marines who were in trenches about two miles away moving up to attack less than 10 minutes after the explosion. More than 100 aircraft took part in the operation

(7) The first underground explosion of the series was set off on March 23 to try out the newly-developed "satchel" charges. [With a force equivalent to 1,000 tons of T.N.T , the "satchel" charge can be carried by one man.] No details of the test were officially released.

(8) and (9). Two atomic devices were tested on March 29, the first time that more than one had been detonated in one day. The first device, a large one equal to that exploded on March 7, was detonated from a 500-ft. tower, while the second, a much smaller device, was dropped from a high-flying aircraft some five hours later and exploded at an undisclosed height. No details were released.

(10) The first test observed by British and Canadian officials took place on April 6, when an air-to-air guided missile was released by a *B-36* bomber. Its atomic warhead exploded at some 30,000 ft. into a pattern of smoke trails laid earlier by fighter planes to represent attacking enemy squadrons.

(11) A small atomic device, of undisclosed force, was detonated from a 300-ft. tower on April 9. No troops participated in the test, but a number of aircraft were employed in training crews and gathering data.

(12) A larger atomic device, with an estimated force equivalent to 25,000 tons of T.N.T., was exploded from the top of a 400 ft. tower on April 15. Three pilotless planes took part in the test, two flying directly into the fireball and one skirting around it. Some 40 other experiments were carried out at the same time, one of which tested the effects of blast on landing-strips.

(13) The largest and most comprehensive test of the series was carried out on May 5, when a large atomic device was detonated at the top of a 500-ft. tower. The test was planned jointly by the A.E.C., the Defence Department, and the Civil Defence Administration; troops and civil defence workers participated, and a large number of press correspondents were invited to witness the explosion. For the purpose of the test a dummy town, representing a typical American community, had been built on the test site, complete with cars, food, dummy figures in various types of clothing, and different types of shelters. The main objective was to determine how far from a nuclear burst critical damage ended, what materials and what methods of construction were most suitable, and how fast repairs could be carried out to maintain essential services.

Subsequent inspection of the area showed that although two two-storey houses (one brick and one timber), 4,700 feet from the tower, had been completely smashed and had collapsed into their cellars, their bomb-shelters—a built-in first floor type and a cellar wood-beam type—were unscathed. Two nearby one-storey houses at the same distance from the tower—one made of cinder blocks and the other of pre-cast concrete slab—remained standing after the explosion, and a radio station incorporated in one of them worked as soon as current was restored; nevertheless, all the windows were blown in and furniture was thrown about. Tins of food, fresh, canned and frozen, were in the buildings, but even in those closest to the explosion there seemed to be no damage from blast or radiation which would prevent their being eaten immediately.

Of three different types of one-storey metal industrial buildings placed 6,800 feet from the detonation, only one escaped with little damage On one, 0.026-inch-thick sheet aluminium was ripped from the steel frame like paper; another, made of ¼-inch steel panels without a frame, was completely destroyed; the third, made of ¼-inch steel in vertical fluted panels bolted together, withstood damage almost entirely. Three duplicate industrial buildings at a distance of 15,000 feet received only slight damage, and one-storey houses at a distance of two miles from the explosion, duplicating those on the forward line, suffered about the same amount of damage in broken windows and scattered furniture as the nearer ones. Three types of outdoor concrete shelters were tested at distances from 2,250 to 3,750 feet, but these could not be inspected by correspondents afterwards as they contained secret equipment. Dogs, mice, rats, rabbits, and guinea pigs were placed in the shelters and in other containers at various distances, primarily to test the effects of the explosion on organisms of different weights, but only one animal was reported to have been killed. The protective value of white or light clothes was demonstrated, coloured garments at some distance from the explosion being scorched and white ones undamaged A huge tank, tubular in shape, holding 15,000 gallons of highly inflammable liquefied petroleum gas, was hardly scratched although less than a mile from the explosion.

Apart from the civil defence aspects of the test, troops in "Patton" *M-48* tanks were deployed in the open less than two miles from the explosion, and advanced in a simulated attack four minutes after the detonation had taken place. The periscopes of the tanks were retracted and all vents sealed. Sixty aircraft, fighters and bombers, also took part, some being engaged in collecting data and others in mock bombing and strafing attacks.

Altogether, the test involved 72 major experiments, of which 46 concerned civil defence and the remainder military tactics and weapons development.

(14) The final test of the series (the 45th to be made at the Nevada testing site) was made on May 15 when a large atomic device, estimated to be at least equal in size to any of the series, was detonated from a 500-ft. tower. About 25 experiments were associated with the test, and supersonic planes participated for the first time No details were released.

The Defence Department announced on May 17 that a small atomic device had recently been detonated in the eastern Pacific Ocean by a small task force under the direction of Rear-Admiral Monsen. An earlier announcement of May 9 had stated that such a test would take place in the near future in order to obtain information essential to the development of defence against submarine attack.

Mr. Allen Whitfield, a Des Moines lawyer, was nominated by President Eisenhower as a member of the A.E.C. on March 16, and Brigadier-General Kenneth E. Fields as general manager of the Atomic Energy Commission in succession to Major-General Nichols on April 13.—(New York Times - New York Herald Tribune) **(Prev. rep. Tests, 13120 A; A.E.C. 13946 A.)**

B. COMMUNIST CHINA. — Trade Agreement with Japanese Businessmen.

A trade agreement between Communist China and a group of Japanese businessmen was signed in Tokio on May 4 by Lei Jen-min, Chinese Vice-Minister for Foreign Trade, and Mr Shozo Murata, chairman of the Japanese Council for the Promotion of International Trade. The agreement (which has no official or binding character since the Japanese Government—which does not recognize Communist China took no part in the negotiations) provided for exchanges of goods to the value of £30,000,000 in each direction. It was generally considered, however, by Japanese business circles outside those which had negotiated the agreement, that actual exchanges would be considerably less than envisaged, in view of the fact that a large proportion of the goods wanted by the Chinese were on the international list of embargoed strategic goods. Goods which China hoped to buy from Japan included steel plates for ships, railway equipment, heavy machinery, and generators (all on the embargoed list), fertilizers, chemical products, textile and printing machinery, vehicles, optical instruments, and electrical equipment. Japan's main imports from China, it was stated, would be salt, soya beans, rice, iron ore, and coal. (Times - New York Times)

A. SOUTH AFRICA. - INDIA - PAKISTAN. — Abandonment of Talks on Position of Indians in South Africa. - Mr. Strydom's Reply to Mr. Nehru's Condemnation of "Apartheid" Policy.

Mr. Louw, the South African Minister of External Affairs, announced on April 24 that, as a result of recent public statements by Mr. Nehru attacking the Union Government and its racial policy, the South African Government had been obliged to abandon an attempt to discuss with India and Pakistan existing differences on the question of the Indians living in South Africa.

The statements by Mr. Nehru to which the South African Government took exception were made in the foreign affairs debate in the Indian House of the People on March 31 (see 14187 A), and at a public meeting in New Delhi, when Mr. Nehru said: "Let the South African Government forget about Communism and anti-Communism and learn some decency . . . This fantastic skin policy is very dangerous in the present-day world."

The breakdown of the proposed talks was announced on the same date (April 24) in New Delhi. At the same time the Indian and South African Governments released the text of messages exchanged between them, and the South African Government also released the messages it had exchanged with the Government of Pakistan

The correspondence related to the resolution adopted by the ninth session of the U N General Assembly on the status of the Indian community in South Africa, which suggested (*a*) that India, Pakistan, and South Africa should try to solve this matter by direct negotiation, (*b*) that they should designate a Government agency or person to facilitate contacts between them and assist them in settling the dispute, and (*c*) that if no agreement had been reached on this suggestion within six months, the U N Secretary-General should designate a person for the above purposes (see page 13998).

Following the U N resolution, the South African Government informed the Governments of India and Pakistan on Dec. 17, 1954, that while it denied the right of any other Government to concern itself with the question of the Indians in South Africa, it remained willing—as in the past—to discuss the matter with India and Pakistan outside the United Nations "on the clear understanding that such a discussion will not affect South Africa's legal position," since South Africa regarded the question as one of solely domestic concern and outside the purview of the U N. Organization

The Government of India, replying on Jan 14, 1955, said that it had always been ready to discuss this problem "in a spirit of co-operation and friendliness," and agreed to the proposed discussions "without prejudice to the stand taken by either Government on the question of domestic jurisdiction" At the same time it reiterated its view that the problem was not one of purely domestic concern to South Africa, and that it also concerned India The Pakistani Government replied to South Africa in similar terms

The South African Government, on Feb. 4, contested the Indian stand on the question of domestic jurisdiction, and stated that, if India insisted on it, the South African Government would be unable to participate in the discussions To this, India replied on Feb 26 that if the South African Government insisted on its attitude, India could only conclude that it was "not serious about holding any discussion"

On April 7 the South African Government told the Government of India that after its (the South African) reply to the latest Indian Note had been drafted, its attention had been drawn to Mr. Nehru's speeches in which he had condemned racialism in South Africa; the South African Government therefore asked for an official confirmation of these declarations This was given by the Indian Government on April 11, whereupon the South African Government replied on April 21 that, from what had admittedly been said by Mr. Nehru, it concluded that the Government of India was "deliberately attempting to wreck the proposed discussions initiated by South Africa" and that, in the circumstances, it was "regretfully obliged to abandon the attempt to discuss the differences in an amicable spirit"

The South African Government accordingly informed the Governments of India and Pakistan on April 24 that it could not proceed with the proposed discussions. The communication to Pakistan stated that India bore sole responsibility for the breakdown of the talks

On April 18 the South African Prime Minister, Mr. Strydom, replied to Mr. Nehru's attacks on South Africa's *apartheid* policy, and in turn strongly denounced the Indian Prime Minister.

Mr. Strydom said that Mr. Nehru had used "language of the greatest hostility against South Africa," but that in his [Mr. Strydom's] view Mr. Nehru's attack was only "a small part of his eventual aims." He alleged that South Africa was "only one stage of Mr. Nehru's ambitions", that Mr. Nehru's objective was "to drive all Europeans out of Asia and also out of Africa"; and that he [Mr Nehru] regarded Africa as an area for the disposal of India's surplus population.

The White race in Southern Africa (Mr. Strydom continued) would have to act to protect its European civilization and make its maintenance in Africa possible. South Africa alone in isolation could not maintain White civilization, and if the White man was to remain in Africa it could only be as the result of co-operation with other African States "We must have the greatest understanding and co-operation between the different White communities in Southern Africa," Mr. Strydom went on, "and that is what we are working for, that is part of our Africa policy. At the moment there is not always the same point of view on these matters, but we are trying our best to maintain contact with the different European peoples in Africa If war were to break out between East and West, or between Western countries and Communist countries, it is obvious that the Mediterranean would immediately be closed All ships would have to travel round the Cape, and South Africa would find herself involved in the maelstrom whether we wished it or not. For this reason it is obvious that in matters of this kind we must always maintain the closest co-operation"

Mr. Strydom concluded "The idea of a partnership between Europeans and non-Europeans is a mirage Today the White man is the developed race with all the power in his hands, but if the non-Europeans develop—and they will develop, however long it takes—it is obvious that the day must come when the millions of non-Europeans will be the dominant race They will take the place of the White man in the partnership Therefore I say with emphasis that the only hope for the White man to maintain himself, while at the same time assuring fairness to the non-Europeans, lies in the policy of separate development It is in that direction that we in South Africa are going, and it is this policy which we should urge on neighbouring countries in Africa"

Replying on April 26 to the South African Government's latest message, the Government of India rejected any responsibility for the failure of the attempt to start discussions. The reply pointed out that India had "openly and persistently" criticized the treatment of non-Europeans in the Union for many years, and said that as the South African Government had not halted its "oppressive measures" pending the proposed talks it was "unreasonable" to expect the Government of India to refrain from criticism of these measures during the interim period. It added "The Government of India can therefore come to the only conclusion possible, namely, that South Africa does not wish to co-operate in the implementation of the U.N resolution."—(Cape Times - State Information Dept., Pretoria - Indian High Commissioner's Office, London) **(Prev. rep. U.N. Resolution, 13993 A; Mr. Nehru's Speech, 14187 A; Indo-South African Relations, 13656 B.)**

B. JAPAN. — Settlement of Japanese War Debt to Siam. - Reparations Agreement with Burma in Force.

It was announced in Tokio on April 9 that agreement had been reached with the Siamese Foreign Minister, Prince Wan Waithayakon, on Siamese claims against Japan in connexion with the issue of yen military scrip to the Japanese occupation forces in Siam during the Second World War.

Under orders of the Japanese occupation authorities, the yen military scrip had had to be exchanged for the Siamese baht on a one-for-one basis, and at the end of the war the Siamese Government was thus left with large amounts of yen scrip which became worthless after Japan's surrender Moreover, even a one-for-one repayment by Japan would not have fully compensated Siam because the yen itself had since been greatly devalued in relation to the baht, which now has an exchange rate of 20 to the dollar as compared with 360 yen to the dollar. Siam accordingly claimed $375,000,000 (U S) as compensation from Japan

Under the agreement Siam accepted $41,666,666 in final settlement of her claim. Of this amount, Japan agreed to pay the equivalent of $15,000,000 in £ sterling over a five-year period, and to supply Siam with capital goods, services, and credits up to 9,600,000,000 yen, or about $26,666,666.

The settlement with Siam represented the second important step in Japan's adjustment of her relations with countries occupied by her during the war, following her recent reparations agreement with Burma which came into force on April 16, simultaneously with the Burmese-Japanese peace treaty.

C. SCOTLAND. — Local Elections.

Municipal elections (in which one-third of the councils came up for re-election) took place on May 3 in 98 Scottish cities and burghs, the Labour Party suffering a net loss of 13 seats. Labour retained control in Glasgow (where there were five Progressive gains), Aberdeen, and Dundee, whilst the Moderates retained control in Edinburgh, where there was one Labour gain.

Scottish county council elections took place on May 12 with no changes in political control. Labour retained control in Midlothian, Lanarkshire, Ayrshire, Fife, West Lothian, and Stirlingshire, and anti-Labour parties (Moderates or Progressives) in the other Scottish counties.

A. OBITUARY. — Professor Albert Einstein.

Professor Albert Einstein, the greatest scientist of modern times and the originator of the "special" and "general" theories of relativity, died on April 18 at Princeton, New Jersey, U.S.A. He was 76 years of age

Albert Einstein, of German-Jewish parentage, was born at Ulm (Wurttemberg) on March 14, 1879, the son of a small manufacturer of electrical equipment Attracted from an early age to scientific studies, and in particular to theoretical physics, he studied at the Swiss Federal Polytechnic at Zurich, became a Swiss citizen in 1901, and in the following year obtained a post as technical assistant in the Swiss Patent Office in Berne In 1905, when only 26 years of age, he became famous in scientific circles throughout the world with the publication of his Special Theory of Relativity In this theory Einstein showed that a proportional relationship existed between matter and energy, and that one was convertible into the other under certain conditions The mass-energy equation subsequently became the basic law of atomic transformation and is of daily application in the field of nuclear physics; e g, the working of synchrotrons and other "atom-smashing" machines depends directly on its use In addition to the Special Theory of Relativity, Einstein published in the same year (1905) important speculations which were subsequently to exercise a decisive influence on the modern quantum theory of light

Einstein became a lecturer in the University of Berne in 1908, and from 1909 to 1913 held professorships in the Universities of Prague and Zurich. In the latter year he was appointed Director of the Kaiser Wilhelm Institute of Research Physics in Berlin, Professor of Physics in the University of Berlin, and a member of the Royal Prussian Academy of Science, posts which he continued to hold until 1933 In 1916 he published his General Theory of Relativity, a vast and complex theory, expressed in complicated mathematical formulae, dealing with such cosmological problems as gravitation, the nature of light, and the relationship between space and time These theories led to such new cosmological conceptions as the "bending" of light, the "curvature" of space, and the "expansion" of the universe The divergencies between the planetary theories based on Einstein's equations and those based on the classical theory of Newton are all extremely small, but in one case—the slow changes in the orbit of Mercury—Einstein's theory provided an explanation which had never been found by Newtonian principles. In 1919 Einstein's conception of the "bending" of light rays from distant stars was verified by the work of British astronomical expeditions.

Strongly anti-militarist, and for the greater part of his life a convinced pacifist, Einstein refused during the First World War to sign a manifesto in which 92 of Germany's leading scholars and intellectuals expressed their support for the policy and war aims of the Imperial German Government. During the inter-war years he travelled and lectured extensively in Europe, America, and the Far East; was awarded the Nobel Prize for Physics in 1922; and was honoured by many learned societies (including the Royal Society in London, which awarded Einstein its Copley Medal in 1925) and universities, including Oxford A supporter of Zionism and of the concept of the Jewish National Home, he collaborated with Dr. Weizmann (subsequently the first President of Israel) in establishing the Hebrew University of Jerusalem.

After the Nazis came to power in Germany in 1933, Einstein was dismissed from his academic posts in common with all other Jewish scholars and scientists His property was confiscated and his scientific works were burned in the notorious "book-burning" campaign organized by Goebbels' Propaganda Ministry. He lived for a few months in Belgium and Britain before going at the end of 1933 to the U.S A., where he had been invited to take up a professorship at the Institute of Advanced Studies at Princeton University. In 1940 he became a naturalized American citizen.

At the outbreak of the Second World War, advances in nuclear physics had already made the atomic bomb a theoretical possibility. In a letter to President Roosevelt in 1939, Professor Einstein and a number of eminent American physicists drew attention to this fact, gave a warning that Germany was believed to be carrying out experiments along these lines, and laid stress on the consequences for the world if Nazi Germany should succeed in perfecting an atomic weapon before the United States. These representations, among other considerations, led to the subsequent establishment of the secret atomic bomb project by the U.S. Government and to the eventual production of an atomic bomb as a result of the successful fission of the uranium atom—a discovery to which Einstein's mass-energy equation of 1905 pointed the way. Modifying his pacifist convictions after the outbreak of war, Einstein worked during the war years as "staff member extraordinary" of the U.S. Navy's Ordnance Bureau, carrying out research work on explosives.

After the war Einstein returned to the Institute of Advanced Studies at Princeton and was a member of its staff until his death. Strongly opposed to the post-war atom-bomb experiments at Bikini, he headed in 1947 an Emergency Committee of American Scientists (see 8345 A) which aimed at enlightening public opinion on the implications and dangers of atomic warfare, and which urged the international control of atomic energy and the abolition of atomic and all other forms of warfare. In 1952 he declined an invitation to become the second President of Israel following the death of President Weizmann (see 12665 A).

In 1949 Einstein published a Unified Field Theory, based on intricate mathematical equations, which attempted to explain the relationships of all physical laws, and in particular to find a mathematical link between gravitational effects on the one hand and those of electricity and magnetism on the other This theory still remains to be proved or disproved by experiment. In addition to his scientific works, Einstein was the author of books and essays on philosophy and on problems of the modern world Throughout his life he was prominently identified with many humanitarian causes, particularly on behalf of refugees from Nazi persecution He was twice married, first to a Serbian lady by whom he had two sons, the marriage being dissolved, and secondly to his cousin, Elsa Einstein, who died in 1938 and by whom he had two daughters.

The following tribute to the late Professor Einstein was issued from the White House in Washington on April 18 by President Eisenhower

"For 22 years the U S.A had been the freely chosen home of Albert Einstein For 15 years he had been a citizen of the United States Americans welcomed him here Americans were proud, too, that he sought and found here a climate of freedom in his search for knowledge and truth No other man contributed so much to the vast expansion of 20th-century knowledge. Yet no man was more modest. . To all who live in this nuclear age, Albert Einstein exemplified the mighty creative ability of the individual in a free society"

Similar tributes to the life and work of Albert Einstein were paid in many countries. In Britain, a broadcast tribute was paid by Bertrand Russell, the eminent philosopher; Lord Adrian, O M., President of the Royal Society, described Einstein as "one of the great men of our time" and "for many years the leading figure in the world of science"; Sir John Cockcroft said that the scientific world had lost one of its greatest personalities; and Sir William Penney declared that Einstein could be compared "with our own Sir Isaac Newton."

It was announced in London on May 14 that a 28-mile-wide crater on the moon would be named the Einstein Crater in honour of the famous physicist. The suggestion that one of the lunar craters should be named after Einstein had been made by the U.S Naval Observatory in Washington, which had asked Dr. H. Percy Wilkins, director of the Lunar Section of the British Astronomical Association, to choose the crater. Dr. Wilkins, an authority on selenography, had accordingly chosen a large lunar crater situated near the Newton Crater.

B. WESTERN GERMANY. — Federal Aid to West Berlin. - Four-year Reconstruction Plan.

Following discussions held in West Berlin on April 26-27 between the City Senate and the "Economic Cabinet" of the Federal Government headed by Dr. Adenauer, it was announced that agreement had been reached on Federal aid for a four-year reconstruction plan for West Berlin covering the years 1955-59.

The programme provided for an expenditure of 1,600,000,000 DM ($133,000,000) out of E.R.P. counterpart funds and from other Federal sources. It envisaged the creation of 100,000 new jobs to relieve unemployment (at present totalling 175,000), the building of 75,000 low-rent dwellings, measures for the preservation of existing housing, increased investment in Berlin's industries, and the development of the city's communications. The communiqué added that the Federal Government and the West Berlin Senate were determined to further and develop the city's cultural life "to enable it to fulfil its task of preserving and strengthening the spiritual unity of the German people and to maintain its cultural community with the other free peoples" For this purpose it had been decided to develop West Berlin's scientific, artistic, and educational institutions with the help of the Federal Government.

Dr. Suhr, the Chief Burgomaster, stated after the meeting (which was the first formal session of members of the Federal Government to be held in West Berlin) that the city continued to need economic aid because unemployment was four times as high as in Western Germany and productivity only half as high. Among its cultural needs were the restoration of its Opera House and the building of an assembly hall.

The financing of the four-year plan will be additional to the normal economic aid given to Berlin by the Federal Government, which has averaged about 600,000,000 DM. annually and is classified as a defence charge.

In the Paris agreements the Federal Government had reiterated the undertaking, given at the time of the signing of the Bonn conventions, in which it promised, *inter alia*, to aid the city in economic reconstruction and in the achievement of a balanced budget; to provide essential supplies and raw materials; to take all measures to maintain and improve Berlin's communications with the Federal Republic; and to help the city in meeting the exceptional burdens arising out of the influx of refugees from Eastern Germany.

A. PAKISTAN - AFGHANISTAN. — Afghan Protests against Incorporation of Pathan Areas in West Pakistan. - Demand for Free "Pakhtoonistan." - Attacks on Pakistani Embassy in Kabul and Afghan Consulate at Peshawar. - Closing of Pakistani Consulates in Afghanistan. - State of Emergency proclaimed by Afghan Government. - Acceptance of Egyptian, Saudi Arabian, Iraqi and Turkish Mediation Offers in Afghan-Pakistani Dispute.

The Prime Minister of Afghanistan (Sardar Mohammed Daud Khan), in a broadcast on March 29, protested against the Pakistani Government's proposal to incorporate the Pathan areas of the tribal territory and the North-West Frontier Province in the Province of West Pakistan, and gave a warning that such a step would lead to "grave consequences." A formal Note protesting against the proposed merger of territory of "occupied and free Pakhtoonistan" in the new Province was presented in Karachi on March 30 by the Afghan Minister in Karachi, Sardar Rafiq, but was rejected by the Pakistani Government on the ground that the unification of West Pakistan was a purely internal matter.

Large-scale demonstrations against the Pakistani Government's policy and in favour of the formation of an independent Pathan State (variously referred to as "Pakhtoonistan," "Pathanistan," and "Pushtunistan") occurred in Kabul on March 30, during which a crowd—largely composed of students—attacked the Pakistani Embassy, According to Kabul radio, the police intervened when the demonstrators tried to tear down the Pakistani flag, and fighting ensued in which 12 policemen and 35 demonstrators were injured, 20 of the latter being arrested, the Government subsequently banned all demonstrations and ordered the police to shoot at sight to maintain order. Pakistani official sources, on the other hand, alleged that the Embassy had been stoned for three hours without the police making any attempt to intervene, that the police had helped to pull down and tear up the Pakistani flag, that the rioters had broken into the Embassy and the Ambassador's residence, injured four members of the staff, wrecked office equipment and furniture, and looted property; and that the houses of two members of the Embassy staff had also been attacked and one of them ransacked. On March 31 the Pakistani Consulate at Kandahar was stoned by Afghan demonstrators, whilst on April 1 the Consulate at Jalalabad was attacked and two members of the staff injured.

The riots led to widespread protest demonstrations throughout Pakistan, during one of which the Afghan Consulate at Peshawar was attacked on April 1. The Afghan Embassy in Karachi alleged that demonstrators had been responsible for tearing down and burning the Afghan flag, burning official documents in the street, and carrying off large sums of money, but the Pakistani Government claimed that the police had prevented the demonstrators from approaching the Consulate, and that the raid had been the work of "12 Afghan nationals," all of whom had been arrested.

In a broadcast on April 1, the Pakistani Prime Minister (Mr. Mohammed Ali) declared that "the ruling junta in Afghanistan talks of the 'Pakhtoonistan' stunt in order to divert the Afghan people's attention from the autocratic nature of their own régime," and emphasized that Pakistan would "tolerate no interference by any country whatsoever in her domestic affairs." He added: "We shall not rest content until an *amende honorable* is made for the sacrilege committed against our national flag, and proper restitution made for the insult and damage caused to our honour and prestige."

Mr. Mohammed Ali rejected on April 1 an apology for the Kabul incident tendered by the Afghan Government, and demanded that the Pakistani flag should be hoisted and saluted at a military parade in Kabul. Notes of protest against the attacks on their respective Consulates were exchanged by the Pakistani and Afghan Governments on April 4, the Afghan protest, however, being rejected as "unwarranted" by the Pakistani Government on the ground that the Afghan charges had, on investigation, been found "imaginary, baseless and false." Protests against the attack on the Pakistani Embassy in Kabul, as a serious violation of diplomatic privilege, were also handed to the Afghan Government on April 4 by the British, U.S., and Turkish Governments, and on April 6 by the Turkish Ambassador, acting as *doyen* of the Diplomatic Corps in Kabul.

On April 12 the Pakistani Government rejected the Afghan reply to its protests as inadequate and unsatisfactory, and called on the Afghan Government to furnish the assurances and explanations requested. A second Note of the same date stated that Afghan tradesmen had been forbidden to serve members of the Pakistani Embassy staff, and that the Afghan Government had refused to renew the visas and licences of Pakistani tradesmen in Kabul, and demanded the immediate removal of these restrictions. In view of the "disturbed conditions" in Afghanistan, the Pakistani Government subsequently ordered the evacuation of the families of its diplomatic personnel; offered evacuation facilities to all Pakistani nationals who wished to leave the country; and announced its decision to close down its Consulate at Jalalabad.

The Afghan Government informed the Pakistani Government on April 29 of its willingness to offer an unqualified apology for the attacks on Pakistani diplomatic missions, to pay compensation for property looted or damaged, and to make amends for the insult offered to the Pakistani flag, on condition that similar amends were made for the insult offered to the Afghan flag at Peshawar. This offer was rejected by Pakistan, and Mr. Mohammed Ali announced in a broadcast on May 1 that because of the "unsatisfactory" Afghan reply, his Government had decided to close down both the Jalalabad and Kandahar Consulates, to demand the closing of all Afghan Consulates and trade agencies in Pakistan, and to expel their staffs from the country.

Following the delivery of a Pakistani ultimatum calling on Afghanistan to make "adequate amends" by May 15 or "face the consequences," the Afghan Government proclaimed a state of emergency on May 4 and ordered all men between 25 and 32 who had performed military service to report within 48 hours; after registration, however, they were allowed to return home to await further orders. It was also announced in Kabul that the Afghan Minister in Karachi was being recalled.

In a statement on May 11 after returning from a tour of the North-West Frontier areas, the Pakistani Minister for States and Frontier Regions (Major-General Mirza) accused the Afghan Government of "sabre-rattling," and declared "We regard the Afghan Government's claim to sponsor the 'Pakhtoonistan' stunt as an interference in Pakistan's internal affairs, and we shall fight for the maintenance of the Durand Line as our national boundary with Afghanistan There can be no compromise on this issue" Referring to the Afghan mobilization measures, he said "Mobilization is generally a prelude to war Are the rulers of Afghanistan so mad as to contemplete an attack on us? I say with all the emphasis at my command that Pakistan desires nothing but a happy, prosperous and strong Afghanistan We have no desire to shoot at our Afghan brothers, and it will be an unhappy day for us if we are compelled in self-defence to draw our sword."

Sardar Mohammed Daud Khan, in an interview with the *Sunday Times* correspondent in Kabul published on May 8, maintained that Pakistan's refusal to negotiate on the subject of "Pakhtoonistan" lay at the heart of the disagreements between the two countries, and stated that his Government would nevertheless "continue to support the lawful claims of the Pathans." Questioned as to the possible economic results of the closing of the Pakistani frontier, he observed "If we are in a room with only one outlet, and that outlet is closed, we will have to make ourselves another outlet by breaking a window" (i e Afghanistan would seek closer economic relations with the Soviet Union)

Mediation offers by Egypt, Saudi Arabia, Iraq, and Turkey, designed to help alleviate the acute tension between Pakistan and Afghanistan, were accepted between May 12 and 14 by the Pakistani Government. In accepting these offers, however, the Pakistani Government made the reservation that the use of those countries' good offices in finding "an honourable settlement acceptable to both sides" would relate only to the incidents in Afghanistan, which had resulted in "flagrant violation of the diplomatic immunities of Pakistani missions and insult and indignity to the Pakistan flag," and that Pakistan would not agree to the discussion of "any issues affecting her sovereignty or territorial integrity." The Iraqi and Saudi Arabian mediation offers were also accepted by Afghanistan, and Prince Saud bin-Abdur Rahman, an uncle of the King of Saudi Arabia, arrived in Kabul on May 14 for talks with King Zahir Shah, Sardar Mohammed Daud Khan, and Shah Mahmud Khan (a former Prime Minister and uncle of the King of Afghanistan) On May 16 Prince Saud bin-Abdur Rahman flew to Karachi, where he saw Mr. Ghulam Mohammad (the Governor-General of Pakistan), Mr. Mohammad Ali (the Finance Minister), and Dr. Khan Saheb (the Communications Minister). The Iraqi Government announced on May 15 that it had appointed as mediators Abdul Qadir Gailani, its Minister in Karachi, and Ibrahim al-Rawi, its Minister in Kabul.

A Commonwealth Relations Office spokesman stated in London on May 5 that, in the British Government's view, the tribal territory was part of Pakistan; that the Durand Line, which was agreed upon as the boundary between Afghanistan and British India in 1892, formed the boundary between Afghanistan and Pakistan, and that Pakistan had inherited the areas which were under British administration before 1947. (Pakistani High Commissioner's Office, London - Times - Sunday Times) **(Prev. rep. 14039 D; "Pakhtoonistan," 11077 A.)**

A. UNITED KINGDOM. — Increases in National Insurance Benefits and War Pensions. - The National Insurance Act. - Reports of Government Actuary and of Phillips Committee.

Increases in pensions and national insurance benefits came into effect between Feb. 15 and May 19. The increases, aimed at raising basic rates by at least 50 per cent above those prevailing in 1946, had been announced in the House of Commons by Mr. Osbert Peake, the Minister of Pensions and National Insurance, on Dec. 1, 1954, when he estimated the cost of the increases in national insurance benefits at about £120,000,000 in a full year, including £80,000,000 for higher retirement pensions Contribution rates in respect of employed persons, Mr. Peake stated, would be raised by 2s. weekly, of which 1s. would be payable by the employer and 1s. by the employee. Taking into account these higher contributions, the net annual cost to the Exchequer would be about £25,000,000 initially, but would increase rapidly thereafter. The increases in war pensions would cost about £15,000,000 in a full year. Details were as follows :

National Insurance Benefits.	New Weekly Rates	Old Rates
(1) Retirement pensions, unemployment and sickness benefits (single person)	40s. 0d	32s. 6d
(standard rates) (married couple)	65s 0d	54s. 0d
Widows' pensions .	40s. 0d.	32s 6d
Dependent child allowance (including family allowance, where payable)	11s 6d.	10s. 6d

Widows' allowances (first 13 weeks of widowhood) were raised to 55s. 0d., and allowances (where payable) for adult dependants to 25s 0d. Maternity and Home Confinement grants were raised to £10 and £4 respectively. Maternity allowance was increased to 40s. 0d. and Guardian's allowance to 18s. 0d

(2) Industrial Injury Benefit and 100 per cent Disablement Benefit :		
(a) Pensions (single person)	67s 6d	55s. 0d.
(married couple) .	92s 6d	76s. 6d
(b) Widows' pensions ..	45s. 0d	37s 0d.

Widows' allowances, dependent child allowances, and allowances to adult dependants were increased to the same level as N I. Benefits.

National Assistance.		
Scale rate for Married Couples .	63s. 0d.	59s. 0d.
Scale rate for Single Persons ..	37s. 6d.	35s. 0d.
War Pensions.		
100 per cent Disablement Pensions	67s 6d	55s. 0d.
Pensions for War Widows with Children and War Widows over 40 . ..	52s. 6d.	42s. 0d.

In addition (Mr. Peake explained) there would be increases in the special allowances paid to seriously disabled men ; proportionate increases in smaller disablement assessments ; and an increase in the " constant attendance " allowance from 25s to 30s. weekly, or from 50s to 60s. weekly in more serious cases. Men whose war disabilities prevented them from working would have their unemployment supplements increased from 35s to 45s. weekly, and, with their 100 per cent disablement pensions, would therefore receive at least £5 12s 6d. weekly instead of £4. 10s. as hitherto. After announcing that there would also be increases in the rates for war widows' children and for orphans, Mr Peake stated that the changes in war pension rates would not require legislation to bring them into operation, and would come into effect in February, 1955.

Reviewing the rates and amounts of benefit, the Minister stated that the increases in prices since 1946 would suggest increases in pension rates of about 5s for single persons and 6s. 6d. for married couples, bringing these rates up to 37s 6d and 60s. 6d However, as there was no scientific way of deciding what benefit rates it would be appropriate to provide under an insurance scheme, the selection of rates must in the last resort be a matter of judgment. In the circumstances, he had come to the conclusion that all benefit rates should be increased in approximately the same proportion and ought to provide some margin over the amounts strictly required to maintain the 1946 standard.

The National Insurance Bill, giving effect to the above-mentioned increases in National Insurance benefits, was given an unopposed second reading by the House of Commons on Dec. 9, 1954.

Mr. Peake, moving the second reading, explained that the Government had delayed bringing forward their proposals until the House had had an opportunity of considering the reports of the Government Actuary and the Phillips Committee (see below), whose work formed part of a wider non-statutory review of the National Insurance scheme which was now proceeding.

Dealing first with the " rather qualified recommendation " of the Phillips Committee that the pension ages should be raised, Mr. Peake announced that the Government had not accepted this proposal. He explained that after close study of the matter (which had first been raised by Mr. Gaitskell, then Chancellor of the Exchequer, in his 1951 Budget speech) he had become " more and more sceptical " about any saving to the fund, or gain to the economy, which might result. Indeed he was " pretty confident " that increased claims for sickness and unemployment benefit by elderly people would virtually—and might wholly—cancel any advantage claimed for such a step. " Let no whispering campaign begin that it is the secret intention of the Government to raise the age," he added " Such a campaign would only cause needless alarm and eventually rebound on the heads of those who started it "

Turning to the pensions proposals in detail, Mr Peake explained that in fixing new rates of benefit the Government had taken the 1946 level, added 50 per cent, and rounded the figure off in an upward direction , the increases thus arrived at compared with a rise of only 44 per cent in the cost of living figure since 1946 By contrast, when the Labour Government left office in 1951, benefits, with one single exception, remained the same as in 1946, although the cost of living index had already risen by 33 per cent Defending the proposed increases in contribution rates, he stressed that " no responsible person " advocated the abolition of the contributory principle, and that that principle had been endorsed by the Labour Party and the T.U C as well as by the Phillips Committee The Bill would increase the Exchequer supplement to the ordinary contribution from 1s 6d. to 1s 10d., or by a higher proportionate amount than the increases payable by employers and workers. In this connexion, Mr. Peake recalled that when the Labour Government introduced their National Insurance Bill in 1951 (see 11583 A), their original proposal was to reduce the Exchequer grant from one-fifth of the total contribution to one-sixteenth, but in view of strong parliamentary protests the existing rate of one-seventh had then been adopted as a compromise

Mr Peake concluded by giving the following figures to show how contributors would be affected by the proposed changes :

(1) Benefit rates would be 22-23 per cent above the present rates and 54 per cent above those for 1946, but contribution rates would be only 17 per cent above present rates and 33 per cent above 1946

(2) Under the Bill, contributions would represent only 3.2 per cent of the average worker's pay packet, compared with 3.9 per cent in 1946.

(3) The capital value of pensions under the Bill would be as follows : single man at 65, £1,050 ; married man at 65, £2,150 ; woman aged 60, £1,450.

(1) The most that anyone, even together with his employer's contribution, could have paid into the fund today was £140. In 20 years' time the most that anyone could have paid into the fund would be £700.

These figures, he claimed, showed " what a fine bargain " national insurance still was, and he did not believe that contributors would object to paying the extra 1s. imposed on both sides by the Bill. The British people remained deeply attached to a system which provided benefits as of right, rather than gifts and grants subject to a means test. With the new benefits provided for in the Bill, with growing numbers earning higher pensions by deferring their retirement, and with the growth of occupational insurance schemes, the country could look forward to a steady, progressive diminution in the numbers dependent on National Assistance subject to a means test.

Although the Opposition criticized certain aspects of the Bill, it accepted it as " an interim measure."

Dr. Edith Summerskill (Lab.), who called for a more comprehensive Bill in 1956 to deal with important structural changes in the National Insurance scheme, criticized the failure to restore the Exchequer contribution to its pre-1951 level of one fifth (which, she said, would have enabled the increase in workers' contributions to be fixed at " nearer 1d. than 1s."). She asserted that the net result of the present proposals would be that " the very poorest in the community will fare the worst," and urged the Minister to cut down the six months' delay in implementing the increases. **Mr. Douglas Jay** contended that the normal standard of living index did not apply to old-age pensioners, in whose weekly bills the cost of food (which had risen by 65 per cent since 1946) bulked larger than with most people. He also complained that the Bill went too far in putting the cost on the contributor rather than on the Exchequer ; that by raising workers' and employers' contributions far above the actuarial figure, the Minister was departing from the principles of the 1946 Act ; and that private pension schemes, which usually gave better benefits than the State scheme but benefited only a minority, were being virtually financed by rebates from direct taxation to the extent of £70,000,000 to £80,000,000 annually i.e., by almost as much as the Treasury would be contributing under the Bill for the much larger number of pensioners under the National Insurance scheme.

Mr. Aneurin Bevan advocated that the principle of the maintenance of the value of money should be built into the system of social security, and also thought that there should be a special price index for the old and sick because the narrow range of commodities consumed by them had risen more than the general range. Arguing that " the universality of social security completely destroys its insurance character," he maintained that the revenue for social security should be found " in the simplest, cheapest, and most equitable way : that is, by taxation." **Mr. James Griffiths** (a former Labour Minister of National Insurance) said that the Opposition were anxious that the Bill, which they regarded as a purely interim measure, should go on the Statute Book as soon as possible.

Mr. Iain Macleod (Minister of Health), winding up the debate, said that the Government recognized that the Bill would not solve all pensions problems, and agreed that many matters ought to be " discussed in a reasonable non-party manner " with a view to obtaining a measure of agreement on fundamental principles.

In the Committee stage (Dec. 13-14) the following Opposition amendments, among others, were defeated : (a) to drop the proposed increase in industrial injuries contributions ; (b) to provide that there should be no increase in contributions whatever, and that the gap between contributions and benefits should be closed by the Exchequer ; (c) to restore the Exchequer supplement to the National Insurance Fund to one-fifth ; (d) to ensure that employed married women should receive the same benefits as men and single women.

The Bill received a third reading on Dec. 14, and after passing through the House of Lords (second reading, Dec. 20) received the Royal Assent on Dec. 22, 1954.

As the increase in old-age pensions led to certain anomalies in the case of parents receiving dependants' war pensions because their sons had been killed in the Services, the Government announced on May 2 that the basic means standard applied to such parents would be raised from 50s to 60s where only one parent was living, and from 75s. to 90s. where both were living. Mr Peake explained that parents' war pensions, designed to replace the contribution which it was assumed that the serviceman could have made towards his parents' upkeep if he had survived, had been on a needs basis since 1922, and that the basic means standards, which were 40s (one parent living) and 60s (two parents living) in 1946, had been raised to 50s. and 75s respectively in 1952. The latest increase would affect about 4,000 pensioners, its cost could not be estimated accurately, but the 1952 increase had cost a little over £200,000 a year.

To remove another anomaly, the Financial Secretary to the Treasury (Mr. Henry Brooke) stated on May 5 that the Chancellor of the Exchequer was making arrangements to deal with all cases where the Pensions (Increases) Act (see 13769 B) might operate so as to bring about a reduction in pensions slightly greater than the improvement in national insurance benefits made by the latest National Insurance Act.

The first quinquennial review by the Government Actuary (Sir George Maddox) of the working of the National Insurance scheme, referred to by Mr. Peake, was published as a Blue Book on Dec. 1, 1954.

The report estimated that if the National Insurance scheme were to continue in its present form, and assuming that there was no material change in the birth, unemployment, and mortality rates, or in the average age of retirement, the annual outlay on the scheme would increase from £535,000,000 in 1954 to £667,000,000 in 1959, £740,000,000 in 1964, £812,000,000 in 1969, and £917,000,000 in 1979, £665,000,000 of the last-named amount being in respect of retirement pensions. On the other hand income from personal and employers' contributions would be virtually the same at the end of the 25 years, having in the meantime dropped from £184,000,000 in 1954 to £473,000,000 in 1959 and risen gradually thereafter to £483,000,000 in 1979. As a result, the cost to be borne by the Exchequer would rise steadily from £87,000,000 in 1956 to £325,000,000 in 1969 and £434,000,000 in 1979.

The report explained that these figures were based on the assumptions (*a*) that the number of contributors would not change greatly (over the full 25 years the number of women contributors might diminish by about 750,000 and the number of men contributors increase by about 1,000,000), (*b*) that the number of retirement pensioners would grow steadily from 4,320,000 (1,430,000 men, 2,890,000 women) in 1954 to 7,590,000 (2,710,000 men, 4,850,000 women) in 1979. Although the population over pensionable age would go up by only 40 per cent, the actual number of pensioners would increase by nearly 80 per cent, since classes hitherto excluded from insurance would qualify for pension from July 1958.

Reviewing the working of the scheme from July 1948 to March 1954, the Government Actuary stated that outlay had totalled £2,491,000,000 and income £3,004,000,000, compared with the 1946 estimates of £2,725,000,000 and £2,726,000,000 respectively The main reason for the difference had been the fact that unemployment had averaged only 1½ per cent instead of the 8½ per cent allowed for, resulting in a saving of £456,000,000 on benefits and an addition of £212,000,000 to contributions The balance in the National Insurance Fund had grown in the same period from £892,500,000 (£109,000,000 in the Fund itself and £783,000,000 in the reserve) to £1,405,000,000, but the rate of increase had slowed down considerably since the passing of the 1951 National Insurance Act The Blue Book explained that not only had the Acts of 1951, 1952, and 1953 resulted in an increase of about £200,000,000 in benefits and a reduction of about £120,000,000 in income, but they had also greatly increased future liabilities under the scheme As a result, the present excess of income over expenditure was only a temporary feature which would soon change to a deficit, this deficit was likely to increase to £190,000,000 by 1964-65 and to £364,000,000 by 1979-80.

A report by the Government Actuary on the Financial Provisions of the National Insurance Bill implementing the Government's pension increases was also published on Dec. 1.

It stated that the Government's proposals would add about £2,500,000,000 to the capital liability of the Exchequer to the N I scheme, about £700,000,000 of this being for persons already paid, representing about £160 per pensioner. The capital value of future pensions and other benefits would be increased by the proposals to about £29,000,000, against which the value of future contributions by insured persons and employers would be raised to £17,000,000,000, leaving a net liability on the Exchequer of £12,000,000,000 for benefits other than pensions at present being paid.

The report of the Phillips Committee on the Economic and Financial Problems of the Provision for Old Age, also referred to by Mr. Peake, was published on Dec. 3, 1954. This committee, composed of actuarial and financial experts under the chairmanship of Sir Thomas Phillips (formerly Permanent Secretary to the Ministry of Pensions), had been appointed by the Chancellor of the Exchequer in July, 1953. Its principal recommendation was the raising of the pension ages for men from 65 to 66, and for women from 60 to 61, after an interval of five years. The report is summarized below.

Stressing that the present cost of national pensions fell far short of the pension rights that would eventually have to be met, the report pointed out (*a*) that the cost of retirement pensions was expected to double by 1979, (*b*) that, at the existing rates of benefit, pension expenditure would rise 2½ times as fast as the number of elderly persons, and (*c*) that if the whole of the prospective deficit on national insurance fell on the Exchequer, the State would have to find not £70,000,000 as at present, but about £430,000,000 In 25 years' time the Exchequer would thus have to bear one-half of the total expenditure on national insurance benefits and a still higher proportion of the expenditure on retirement pensions alone If the tax revenue of the State still stood at the level of five to six per cent of the national income, at which it had stood at the turn of the century, there would be less difficulty in providing for large additional expenditure on the social services. But it was quite another thing to heap such expenditures on top of existing Budget liabilities when no less than 30 per cent of the national income already found its way to the Government in taxation.

After saying that the additional £430,000,000 which would ultimately have to be found to meet the deficit in the National Insurance Fund, if conditions and benefits remained as at present, represented "nearly as much in command over real resources as the entire national Budget in the years after the Boer War," the report continued "To mortgage this sum towards meeting additional pension liabilities would be to limit severely the scope of any other increase in Government expenditure that might have to be faced in future, or to reduce equally severely the chances of a reduction in taxation Yet if the deficit is not met from taxation it will have to be borne by the community in some other way"

The provision for pensions which it would be possible to make in future (the report continued) would depend largely on the nation's ability to increase its total production and so add to its total income. An increase in productivity of about 1½ per cent annually over the next 25 years (as might reasonably be looked for) would be "by far the most important factor tending to ease the burden of providing for old age" Admittedly, if the national income were to grow from £14,000,000,000 annually at present to, say, £20.000,000,000 annually by 1979, it would appear possible for the State to meet a pensions outlay rising to £665,000,000 a year as predicted in the Government Actuary's report (see above) This, however, was not the real problem as pensions were only one item in a large and expanding Budget, and as—particularly in considering changes of rates—regard must be paid to "the continuous and mounting load which pensions throw on the community."

The Phillips Committee's recommendations were as set out below:

Pension Ages. Legislation should be introduced immediately to provide for an increase of one year in the present retirement ages of 65 (men) and 60 (women) after an interval of at least five years

The report pointed out that the present pension ages "by no means represent the limit of working life," and that many people received pensions some time before reaching old age in the physical sense If the pension ages could have been raised at once to 68 and 63 respectively, the consequent reduction in the number of pensioners would bring about a net annual saving of perhaps £50,000,000 by 1979-80, but in order to avoid hardship it would, in fact, be necessary to allow an interval of some years before the increase could be brought into effect

Earnings. The existing rule making pensions below 70 (men) and 65 (women) conditional on retirement should be retained, but there should be no change in the rule allowing pensioners to earn up to £2 weekly without reduction of pension.

The report stated that if pensions were paid from the minimum pension ages to all persons, whether retired or not, there would be a net additional cost to the Fund of £55,000,000 in 1955-56, declining to about £20,000,000 in 1979-80.

Private Pension Schemes. Tax reliefs should be granted to occupational pension schemes only if these fulfilled conditions which suited the national interest

The report pointed out that about 3,000,000 persons were covered by superannuation schemes in the public services, with possibly over 5,000,000 covered in industry and commerce The committee regarded the development of such schemes as desirable, and did not consider that there was any serious risk of funds accumulated in pension schemes proving too large for the economy to absorb They felt, however, that private superannuation schemes should take account of variations in the rate of national pensions to ensure that the combined income from both sources did not exceed a certain level, e.g. two-thirds of the final salary, except in the case of workers whose final wages were low.

The committee also stressed that "a fixed age in private pensions schemes ought not to be regarded as the age at which individuals must necessarily retire"; that the minimum age should not be lower than 65 for men and 60 for women, that any increase in minimum ages under the National Insurance scheme should be accompanied by similar increases in the minima prescribed in occupational schemes; and that tax relief should not be granted in future to pension schemes which permitted retirement below 65 (men) and 60 (women).

After considering whether there should be any change in the present National Insurance system, under which part of the expenditure was covered by contributions and the "large and increasing deficits" were met by calls on the general taxpayer, the committee declared: "We think that the system under which the payment of contributions is one of the conditions of receipt should be retained. It provides an important measure of social discipline, since everyone is aware that the higher rates of pensions must be accompanied by higher contributions."

The Parliamentary Secretary, Ministry of Pensions and National Insurance (Mr. Marples), stated in a written reply on Dec. 9, 1954, that the number of old-age pensioners had increased from 3,775,000 at Dec. 31, 1946, to 4,650,000 at Dec. 31, 1953 The total amount paid to them, including supplementary pensions and National Assistance, had grown from £191,000,000 in 1946 to £396,000,000 in 1953

A. UNITED KINGDOM. — Government's Plans for Hospital Building in England, Wales and Scotland.

The Minister of Health (Mr. Macleod) announced in the House of Commons on Feb. 9 the Government's plans for the first programme of new hospital building in England and Wales since the war. It was proposed in 1956-57 and 1957-58 to start major building projects to a total value of £7,500,000 and £10,000,000 respectively, in addition to which £2,000,000 would be made available in the first year and £4,000,000 in the second for plant replacement and re-deployment. There would also be £9,000,000 in 1956-57 and £10,000,000 in 1957-58 for capital expenditure on other works. Mr. Macleod added that the actual expenditure in these two years on work financed from Exchequer funds was expected to be about £13,000,000 and £18,000,000 respectively, but that he hoped that a good deal of hospital building work would be financed from other sources.

The Minister explained that hospital boards had been asked to complete the planning of a first batch of major projects, to a total value of £7,000,000. These projects, which would almost certainly be among those to be started, included new general hospitals (or the first stages of them) at Welwyn, West Cumberland, Harlow, and Swindon, the development of the Glangwili Hospital, Carmarthen, a new mental hospital near Wolverhampton, major extensions at mental deficiency hospitals in the Newcastle, Sheffield, and Liverpool areas and in Wales, new out-patient departments at the Royal Victoria Infirmary, Newcastle, the Leeds General Infirmary, and the Lewisham and North Middlesex Hospitals, a new block at St. James' Hospital, Balham; and major extensions to the Peterborough Memorial Hospital. Considerable expenditure was also likely to be needed during the period for remedying structural defects at the Manchester Royal Infirmary

Many other projects (Mr. Macleod added) would need to be considered for inclusion in the light of further discussions with hospital boards and of the progress made with the preparation of plans. Examples of the projects which it was hoped to start within the next few years were the new Cardiff teaching hospital (which would have first priority), the rebuilding of Charing Cross Hospital at Harrow, a new ward block at Guy's Hospital, new general hospitals at Slough, Boston (Lincs.), Coventry, and Sheffield, and new mental hospitals in Lancashire and Yorkshire

The Under-Secretary of State for Scotland (then Cmdr. Galbraith) announced on the same day that the total provision for hospital building in Scotland would be increased from £1,900,000 in 1955-56 to £2,200,000 in 1956-57 and £2,500,000 in 1957-58. In 1955-56 a start would be made on a new maternity hospital at Bellshill, Lanarkshire, and on the reconstruction of a mental hospital in Dundee. Planning would be put in hand for other schemes to start in 1958-59 and succeeding years, including the provision of a new teaching hospital at Dundee.
(Times - Daily Telegraph - The Scotsman, Edinburgh)

B. SOVIET UNION. — Atomic Co-operation Agreements with China and Soviet-bloc Countries.

Moscow Radio announced on May 1 that, in implementation of the earlier announcement offering other Communist countries Soviet aid in atomic research for peaceful purposes, agreements to that effect had been signed between the Soviet Union on the one hand and the Chinese People's Republic, Poland, Czechoslovakia, Eastern Germany, and Rumania on the other. The announcement added that similar agreements would shortly be concluded with Hungary and Bulgaria

It was stated that the agreements provided for (1) the completion of the necessary preparatory work in 1955-56 and the supply of experimental atomic piles and accelerators; (2) the free supply of scientific and technical information required for the installation of this machinery, and the loan of Soviet specialists; (3) the supply of sufficient quantities of fissile material and radioactive isotopes until such time as the signatory countries were able to keep their atomic piles working without further Soviet aid; (4) the training of nationals of the signatory countries in nuclear physics.

Following the conclusion of these agreements, it was announced in Warsaw on May 5 that Poland would receive in 1956 a 2,000-kilowatt reactor and a modern cyclotron for nuclear research work, together with auxiliary apparatus, and that Polish scientists would also receive large quantities of radioactive isotopes for this purpose.—(Le Monde, Paris - Polish Embassy, London) **(Prev. rep. 14036 B.)**

C. UNITED KINGDOM.—The Liberal Assembly, 1955.

The annual Assembly of the Liberal Party was held at Llandudno on April 14-16 under the presidency of Lord Rea.

In his presidential address Lord Rea pointed out that the Assembly was meeting at a time when the Labour Party was "torn from top to bottom by open dissension," whilst the Conservatives were "weakened by the loss of their great leader" "Faced with a general election in which the Churchill personality is no longer an issue," he declared, "we revert to the three straight choices of basic Conservatism, tarnished Socialism, and our own progressive programme of Liberalism I believe that today it is the . responsibility of all open-minded, thoughtful, and politically conscientious people to support the Liberal Party as the true democratic alternative to reactionary Toryism, rather than allow that role any longer to be usurped by the Labour Party on the familiar Russian pattern of exploiting grievances and mistrust"

Resolutions adopted by the Liberal Assembly included the following:

Cost of Living. A resolution moved on behalf of the Executive which advocated the following measures to reduce living costs (*a*) a progressive attack on protective tariffs, (*b*) the stimulation of competition in the distributive trades by the removal of restrictions and by tax relief, (*c*) more publicity for Anglo-American productivity reports, and the abandonment of labour practices which hampered productivity, (*d*) the breaking-up of price rings, removal of restraints imposed by employers, trade associations, or trade unions, and the strengthening of anti-monopoly legislation, (*e*) a progressive reduction in purchase tax, with its eventual elimination An amendment pledging the party to resist the setting-up of compulsory marketing boards for selected foodstuffs was also adopted.

Agriculture. A resolution expressing "great misgivings" about the dependence of agriculture on Treasury grants, and urging the reduction of farmers' production costs to enable them to dispense with grants. It also advocated the breaking-up of "agricultural price rings," the abolition of duties and restrictions on the import of agricultural requisites, the development of rural electricity supplies, and measures to provide adequate slaughtering facilities and cheaper transport

Colonial and Racial Policy. A resolution which stressed that the principal objective of British policy must continue to be the "advance of all dependent territories to a status of full responsibility for their own affairs." It suggested that a Consultative Colonial Assembly should meet periodically to enable delegates from Colonial territories to confer on developments within their territories, and urged "the full implementation of the principle that there shall be no racial discrimination in services and institutions for which H.M. Government or any Colonial Government is responsible."

An emergency resolution (moved by Miss Manuela Sykes) was also adopted reaffirming the party's "fundamental opposition to the *apartheid* policy of the South African Government", calling upon the British Government to apply in African colonial territories "the principle of the paramountcy of African interests", and urging the application in Kenya of land reforms ensuring security of tenure for all races, and of "truly representative institutions giving full representation to Africans and Asians."

International Affairs. A composite resolution, moved on behalf of the Executive by Mr Donald Wade, M P, which (*a*) declared that agreements to ban the production of thermo-nuclear weapons would be useless unless the production of conventional armaments was also limited, and called upon the Government to support all efforts to achieve progressive disarmament; (*b*) criticized the U S Government's failure to indicate clearly its position with regard to the Chinese offshore islands, (*c*) urged H M Government to press for the reform of the U N. Charter so as to restrict the occasions when five-Power unity was required, and to give the right of membership to all sovereign States which accepted the terms of the Charter. The resolution also urged that the proposed coalition of national armies under the London and Paris agreements should be transformed into a European force with pooled production of armaments, and welcomed the efforts of the Liberal International to co-ordinate the policies of European Liberal parties in the Council of Europe Assembly at Strasbourg

Civil Liberties. A composite resolution, moved on behalf of the Executive, which (*a*) called for a right to appeal to the High Court against Ministerial decisions, (*b*) demanded that land compulsorily acquired by a Government department for a specific purpose should not be diverted within 12 years to another purpose without a public inquiry, (*c*) urged that no Government official should be allowed wider powers to enter or search a dwelling-house than those at present possessed by the police. This resolution was passed by 185 votes to 129, together with an amendment requiring the party's Executive to set up special machinery to keep a watch on infringements of civil liberties.

The Assembly was addressed on April 15 by Mr. J. B. Priestley, the playwright and author, who spoke in support of the composite resolution on civil liberties

D. ARGENTINA. — Cabinet Change.

Dr. Antonia F. Cafiero, Minister of Foreign Trade, resigned on April 13 and was succeeded by Dr. Julio Manuel Luis Palarea, previously General Manager of the *Banco Central.*
(New York Times) **(Prev. rep. Cabinet, 12281 B.)**

A. CYPRUS. — "Enosis" Agitation. - Nicosia and Limassol Riots. - Arms Smuggling Attempt. - The Paphos Trial. - Anti-British Demonstrations in Greece. - King Paul's Appeal for Calmness. - British Protests at Athens Broadcasts to Cyprus.

The refusal of the U.N. General Assembly, at its ninth session, to consider the Greek demand for *Enosis* (union between Greece and Cyprus)—see page 13996—was followed by serious disturbances in the island in December, 1954, and by recurrent Nationalist outbreaks in subsequent months. The anti-British demonstrations were, however, confined very largely to youths and adolescents, and caused no loss of life. The situation in the island during recent months is described below under cross-headings.

Rioting and Nationalist Agitation.

Rioting, the most serious of its kind to occur in Cyprus for many years, broke out in Nicosia and Limassol on Dec 18-19 after Nationalist and Communist organizations had called a 24-hour strike in protest against the U N.'s refusal to consider the grant of self-determination to Cyprus The strike call was generally obeyed by factory and shop workers, though essential services such as electricity and water supply continued to function normally. In Nicosia, where the demonstrators were almost exclusively students and schoolboys, the windows of British-owned shops and bars were stoned, those of the American Consulate broken, and cars driven by British civilians and officers showered with stones ; the police made repeated truncheon charges to disperse the crowds, and also used tear-gas, whilst the demonstrators pelted the police with bottles and stones Some 50 persons were arrested before the situation was brought under control In Limassol, where there were 23 casualties, students hoisted the Greek flag over the offices of the District Commissioner after hauling down the Union Jack, and a number of attacks were made on British premises and property. After stone-throwing crowds had defied repeated appeals to disperse, British troops in Limassol fired three shots, wounding two of the demonstrators, when the mob cut the hoses of fire-engines and overturned a lorry

The Governor of Cyprus, Sir Robert Armitage, emphasized in a broadcast on Dec 19 that he would take "all appropriate measures" to prevent a recurrence of violence He pointed out that the demonstrators were for the most part schoolboys who had become "the easy dupes of scheming men seeking to promote disorder," and said that he had received messages from responsible elements of all communities expressing their grief at the violence and giving assurances that they would use their influence to maintain law and order. Among measures taken by the Cyprus Government were a ban on meetings of more than five persons (this prohibition, however, was lifted after a few days) and on the carrying of any offensive weapon Many arrests were made in Nicosia and Limassol, and several of the older demonstrators were subsequently sentenced to three or four months' imprisonment.

For three successive nights, beginning on the night of March 31, a number of dynamite and grenade explosions occurred in Nicosia, Limassol, Larnaka, and Famagusta, all the attacks being directed against Government, police, and British military installations and buildings No casualties resulted, but considerable damage was done to the Cyprus wireless station (two miles outside Nicosia) and slighter damage at the Wolseley Barracks, the headquarters of General Sir Charles Keightley (C -in-C , British Middle East Land Forces) just outside Nicosia. It was reported from the island that the explosions had coincided with demands put forward by a secret pro-Greek organization—the EOKA—for the ending of British rule and for union with Greece. On April 4 Sir Robert Armitage warned Greek parents and teachers that copies of a secret oath, which was being administered to students and even to school-children, had been found during police searches , the first provision of this oath (the text of which was made public) was worded " I swear in the name of the Holy Trinity to work with all my power for the liberation of Cyprus from the British yoke, sacrificing even my life "

Arms Smuggling Attempt. - The Paphos Trial.

A Greek motorship, the *St George*, was intercepted off Paphos on the night of Jan 25-26 by the destroyer H M S *Comet*, after having been spotted by an R A F. aircraft Her cargo was found to consist of 27 cases of explosives, including over 10,000 sticks of dynamite, which, as shown by captured documents, were to have been landed at the village of Chlorakas (near Paphos) and to have been used by a secret revolutionary organization for an anti-British terrorist campaign aimed at the "liberation" of Cyprus and its eventual union with Greece Thirteen persons—six Greeks and seven Greek Cypriots—were taken into custody and subsequently placed on trial on charges of attempting to change the Government of Cyprus by force or of illegally importing explosives. (A third charge, that of promoting civil war, was originally included in the indictment but was later dropped) The 13 accused persons were Socrates Loizides, a Greek citizen who had taken a leading part in the *enosis* plebiscite in 1950 and in other nationalist activities, and who had been expelled from Cyprus ; Anargyros Melos, the owner of the *St. George* ; Evangelos Louca, the master of the vessel , several members of the crew ; and a number of villagers of Chlorakas. Documents were found in the possession of Loizides claiming that the revolutionary organization had the support of most Cyprus Government officials and priests, and giving a warning that " traitors " among Cypriot Greeks would be punished by death

The trial of the 13 accused took place at Paphos from May 2-6, the Court consisting of the Chief Justice of Cyprus, Sir Eric Hallinan, and two Greek Cypriot judges, Mr. Justice Evangelides and Mr. Justice Zannetides. Nine of the accused pleaded guilty to preparing to change the Government of Cyprus by force, and two to the illegal importation of explosives Loizides and other defendants declared that they had acted in accordance with their political convictions and with their belief in " freedom, democracy, and self-determination of peoples " Counsel for the defence pleaded, in mitigation, that Evangelos Louca had helped British servicemen to evade capture during the war, when he was skipper of a caique which made many dangerous trips into enemy-controlled waters ; that Loizides had fought in the war against the invaders and after the war against the Communists , and that Anargyros Karadimas, a member of the crew of the *St George*, had also fought on the British side and had been wounded and taken prisoner A document, signed by Field-Marshal Lord Alexander, was produced in court expressing gratitude to Louca for helping British servicemen to avoid capture during the war

The Attorney-General (Mr Tornaritis, Q C.), who prosecuted, described the case as one of extreme gravity and great public importance. He emphasized that the offences did not consist in the opinions or national aspirations of the accused, which were understood, but in seeking to promote their objectives by armed violence and resistance to lawful authority.

The following sentences were imposed · Loizides—12 years' imprisonment , Karadimas—six years , Melos—five years ; Louca—four years ; three villagers of Chlorakas—four years each ; two other villagers—two years each , two of the crew of the *St George*—one year each Two of the accused were acquitted In passing sentence on Loizides (whose 12-year term was the longest for a political offence in the history of British rule in Cyprus), Sir Eric Hallinan said : " No doubt the fanatical opinions you hold are sincere But you have tried by a carefully organized secret society, and by the importation of arms and dynamite, to introduce into the politics of this country armed force and violence Having regard to the seriousness of your offence and to our duty to prevent others from following your example, we must impose a serious sentence on you "

The refusal of the U.N. General Assembly to take further action over the Cyprus question also led to serious rioting in Greece, where the disturbances assumed not only an anti-British but also an anti-American character, because of the refusal of the U.S. Government to support the Greek appeal to the U.N. on Cyprus.

About 50 students and 25 policemen were injured in Athens on Dec. 14, 1954, when several thousand students attempted to march on the British and U S Embassies but were prevented from doing so by strong police cordons , stones and clubs were used against the police by crowds of students who took an oath at the Tomb of the Greek Unknown Soldier to " shed their blood for the liberation of Cyprus " In Salonika, 5,000 demonstrators publicly burned the Union Jack and the Stars and Stripes, smashed the windows of the British and U.S. Consulates, and destroyed equipment, books, and display cases at the offices of the U S. Information Service. All pro-Cyprus demonstrations were banned by the Greek Government on Dec 16, 1954

King Paul of the Hellenes made a broadcast on Dec. 20, 1954, expressing his support for " our Cypriot brethren," but at the same time calling upon the Greek people to remember their traditional friendship with Britain and America. He said :

" Our Cypriot brethren demand their freedom through the right of self-determination for which two great wars have been fought Greece, faced with the British refusal to discuss the subject directly, was compelled to bring the issue before the United Nations. . . . As long as the Cypriots proclaim their indomitable will to decide their own destiny, no power on earth can thwart the natural evolution of this desire . .

But temporary disappointment should not cause Greeks to forget the great problems of the present day, and the dangers which can be faced successfully only as a united family of nations Let us not forget that our friends who have disappointed us in the Cyprus affair are the same who today, in the past, and in the future, guarantee our security and that of the free world. I call upon all Greeks to maintain objectivity and calmness, and not to forget that our traditions impose good sense in our emotions and clarity in our judgment

Our friends know well what we have done for them in the past. It is engraved on the tombs of our soldiers in Greece, Crete, Alamein, and Korea. If our friends forget it momentarily, the best way of reminding them of it is by not forgetting their sacrifices for us. Such sacrifices are carved on the many British graves in Greece. Let us not forget, too that without the sacrifice and decision of the valiant American people it is doubtful whether Europe, with Greece and Cyprus, would still exist.

I appeal to my people at this difficult time to remain worthy of our high traditions and, with Hellenic nobility and pride, to remain faithful to our friends. Our faith will help them to recognize reality, and I am certain that this will contribute to bringing about a just and rapid solution of the claims of our Cypriot brethren."

Pro-*enosis* broadcasts from Athens radio to Cyprus, containing frequent and at times violent attacks on British policy in the island, led to three *démarches* to the Greek Government during March and April by the British Ambassador in Athens, Sir Charles Peake. In a statement to the House of Commons on May 3, Mr. Turton (Under-Secretary for Foreign Affairs) said that these broadcasts were " still most objectionable " and that at times they constituted " incitement to sedition

and violence." He added: "The Greek Government have assured us that they value, as much as we do, the old friendship between our two countries. I hope they will therefore recognize that these broadcasts are clearly inconsistent with our ties of friendship and alliance."

A debate on Cyprus took place in the House of Commons on May 5, shortly before the dissolution of Parliament.

Mrs. Lena Jeger (Lab.), who raised the matter, deplored the outbreaks of violence in the island, and asked what progress had been made in the discussions about the constitutional future of Cyprus. After expressing her conviction that "any useful discussion must start with the assumption that the Cypriots, apart from the Turkish minority, are Greeks," she declared: "I am sure that with the British genius for compromise we should be able to find some formula which will bring round the conference table the Governor and the Archbishop—who have never met—the six Mayors of Cyprus, and the trades union leaders, a formula by which we can talk about the future of the island instead of continuing in this harsh, silent way."

Mr. Henry Hopkinson (Minister of State, Colonial Office) said that recent terrorist activities in Cyprus, and the attempt to land arms on the island, had handicapped the Governor in his task of drawing up a Constitution. The broadcasts from Athens radio constituted another disturbing element. On the question of sovereignty, H.M. Government had made it clear that, in asking the Cypriot people to co-operate in a new Constitution, its aim and intention was to lead them to self-government. The general picture in Cyprus today, he emphasized, was one of a buoyant and expanding economy, and this, coupled with the flow of money coming in as a result of the great projects of the Service departments was likely to result in boom conditions in the island during the next few years.

"The prospects for Cyprus are good," Mr. Hopkinson declared. "Now everything depends on our success in convincing the people of Cyprus, of all races and parties, that it is not in their interest to allow themselves to be mesmerised by political aims which are unrealistic, and in persuading them to concentrate on immediate, practical possibilities. While H.M. Government fully understands and recognizes the emotional attraction of many Greek Cypriots towards Greece, it adheres to its view that British control must be maintained unimpaired during this period of world tension. It does not intend to be deflected by a campaign of violence from its object of bringing the island peacefully to a state of full self-government, with provision for continuing defence needs, and for the rights, security, and welfare of all law-abiding inhabitants of the island without distinction of race or creed."

The Greek delegation at the U.N. presented a letter to the Secretary-General (Dr. Hammarskjold), on May 10, for circulation among member-countries, accusing the Government of Cyprus of "a policy of brutal repression in order to stifle any expression of the will of the people." An accompanying letter from the Greek permanent delegate described the situation in Cyprus as "alarming," and declared *inter alia* that "the colonial regime is intensifying its high-handed action which brings it into opposition to the people and their rights guaranteed under the U.N. Charter."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 13775 A; 13993 A.)**

A. INDIA - UNITED KINGDOM. — Mr. Malcolm Macdonald appointed U.K. High Commissioner in Delhi.

The Commonwealth Relations Office announced on May 15 that Mr. Malcolm Macdonald, U.K. Commissioner-General in South-East Asia, had been appointed High Commissioner in India in succession to Sir Alexander Clutterbuck, consequent on the latter's appointment as Ambassador to the Republic of Ireland.

Mr. Malcolm Macdonald (54), a son of the late Mr. James Ramsay Macdonald, held the posts of Colonial and Dominions Secretary between 1935 and 1940, and in the latter year entered Mr. Churchill's National Government as Minister of Health. In 1941 he was appointed High Commissioner in Ottawa, and in 1946 became the first Governor-General of the Malayan Union and the new Colony of Singapore. In 1948, when the Malayan Union was replaced by a Federal form of government, he took over from Lord Killearn the responsibilities of Special Commissioner in South-East Asia, and became U.K. Commissioner-General for South-East Asia with the personal rank of ambassador.—(Times) **(Prev. rep. 9272 G.)**

B. AUSTRIA - RUMANIA. — Danube Agreement.

An agreement regulating Danube traffic between Austria and Rumania, on the lines of the agreements previously concluded between Austria and Hungary, Yugoslavia, Bulgaria, and Czechoslovakia, was signed in Bucharest on May 14. The agreement with Rumania thus opened the way to free navigation along the whole length of the Danube from the Austro-German border to the Black Sea, although Rumania imposed the condition that 60 per cent of all shipments between the two countries must be carried in Rumanian ships and only 40 per cent in Austrian vessels.
(Neue Zurcher Zeitung) **(Prev. rep. 14156 C.)**

C. UNITED KINGDOM. — Housing. - Construction Figures. - The Requisitioned Houses and Housing (Amendment) Act.

Figures published by the Ministry of Housing and Local Government on Feb. 3, 1955, showed that 91,495 houses were completed in Britain during the fourth quarter of 1954, compared with 92,916 in the same quarter of 1953, bringing the 1954 total to 347,605—the highest for any post-war year, and 28,826 more than in 1953. The number of permanent houses and flats completed since the end of the war was thus brought to 1,922,655, of which 1,464,527 were built by local authorities and 332,460 by private builders.

Completions during the first quarter of 1955 numbered 82,233, compared with 78,090 during the same quarter of 1954. This, according to a statement by the Minister of Housing and Local Government on May 3, brought the number of houses completed in England and Wales alone between October, 1951 (when the Conservative Government took office) and March, 1955, to 903,563.

The total number of houses and flats built in 1954 was 9 per cent higher than in 1953. Of the total, 90,626 were built for sale (an increase of 44 per cent over 1953) and 256,969 for letting (0.4 per cent more than in 1953). The number of permanent houses and flats under construction fell from 309,442 at the end of 1953 to 291,477 at the end of 1954; of this total, 215,724 were for letting (13.7 per cent less than at the end of 1953) and 75,753 for sale (27.1 per cent more).

The Requisitioned Houses and Housing (Amendment) Bill, under which the Government relinquished its house requisitioning powers, and which provided for the freeing of all requisitioned houses within five years, was enacted on May 6. It had been given a second reading in the House of Commons on Feb. 15 by 298 votes to 253, after the rejection of an Opposition motion which described the Bill as "unnecessary." The Bill was given a third reading on March 30 by 202 votes to 182, and was passed by the House of Lords on second reading on April 26.

Its provisions were as follows:

(1) Responsibility for requisitioned houses was formally transferred to local authorities, who had hitherto held these houses only as agents for the Government.

(2) Local authorities will retain this responsibility until March 31, 1960, when it will revert to the owners. A requisitioned house falling vacant before that date must be released to the owner at once, unless special permission to retain it is granted to the local authority by the Minister.

(3) The Exchequer will continue to meet the whole cost of rent, repairs, and management of requisitioned houses until April 1, 1956, after which local authorities will pay 25 per cent and the Exchequer the rest. If this adds an excessive burden to the rates, an Exchequer grant of more than 75 per cent can be made provided the Minister is satisfied that the local authority concerned has taken all reasonable steps to reduce the number of its requisitioned houses.

(4) Three methods will be used to enable families living in requisitioned houses to continue to live in them when they are de-requisitioned:

(*a*) Owners will be asked to accept the present occupants as tenants at controlled rents, and will be paid compensation for forgoing their right to vacant possession. Where rents are being subsidized, local authorities will be empowered to maintain these subsidies for 10 years and will pay the owner the difference between the controlled rent and the subsidized rent payable by the tenant. These payments will rank for a 75 per cent Exchequer grant.

(*b*) Alternatively, where other accommodation for the occupants cannot be found within five years, local authorities will be advised to try to obtain leases of requisitioned houses, or of other houses, for a term of about 10 years; three-quarters of the difference in cost between leasing such houses and letting them will be paid by the Exchequer for 10 years.

(*c*) As a last resort, if sufficient houses cannot be obtained by these means, local authorities will have to provide the balance required by buying a certain number of requisitioned houses, or other suitable houses instead. Compulsory purchase powers will not be used, and the price paid will be the market value, with vacant possession. The net cost will rank for a 75 per cent Exchequer grant for 20 years.

(5) Owners who wish to live in their houses may apply to the courts for vacant possession, and the application will be considered in the light of the relative hardship to the owner and the tenant.

(6) Where an owner suffers severe hardship through being unable to obtain vacant possession of his house or to realize its capital value, the Minister has the power to direct a local authority to release the house or to buy it at market price.

(7) An owner who wishes to modernize his house or to convert it into flats may get his house released if he accepts tenants nominated by the local authority.

The Parliamentary Secretary to the Ministry of Housing and Local Government, Mr. Deedes, stated on Feb. 15 that at the end of 1954 the number of houses still requisitioned was 62,000 (50,000 in the London area), occupied by about 90,000 families.—(Ministry of Housing and Local Government - Times - Daily Telegraph - Manchester Guardian) **(13913 B.)**

A. FRANCE - GERMANY. — Franco-German Agreement on the Saar, European Co-operation, etc. - The Adenauer-Pinay Discussions. - Agreement on Franco-German Consortium for Rochling Steelworks. - Compensation Payment for Rochling Family. - New Economic Convention between France and the Saar.

Following discussions in Bonn on April 29-30 between Dr. Adenauer, the Federal German Chancellor, and M. Pinay, the French Foreign Minister, complete agreement was reached on problems of mutual Franco-German concern, and in particular on the future of the Saar. This agreement was followed on May 3 by the signing in Paris of an economic convention between France and the Saar.

When the Bills for the ratification of the Paris agreements came before the French Council of the Republic, M. Faure (the French Prime Minister) declared on March 27 that two essential conditions would have to be fulfilled before France ratified the agreements —namely, that the Saar's continued economic and financial links with France should be assured by a Franco-Saar convention on economic co-operation; and that a solution satisfactory to France should be found in connexion with the ownership of the Rochling steel works in the Saar These two conditions were fulfilled in the Franco-Saar economic convention signed in Paris on May 3, and in the Adenauer - Pinay discussions held in Bonn at the end of April.

After two days of prolonged negotiations, a joint statement was issued in Bonn in the early hours of May 1 announcing that Dr. Adenauer and M. Pinay, in their discussions on April 29-30, had reached full agreement both on general principles and on detailed problems of Franco-German relations. The text of the communiqué (cross-headings inserted) was as follows:

"The conversations between Chancellor Adenauer and M. Pinay dealt with the general political situation, the furtherance of European political integration, and Franco-German relations in all their aspects. They resulted in complete agreement.

Relaxation of International Tension. As regards the political situation generally, the two Ministers were happy to note that the entry into force of the Paris agreements will efficaciously assure the cohesion of the Western world The agreements will permit the opening of East-West talks under the best possible conditions with the aim of reaching a real *détente* in international relations and a solution of problems still outstanding: notably the reunification of Germany in peace and freedom, the organization of security, and the building of peace on a durable basis

European Co-operation. The Ministers agreed that the time has come to give a new impulse to European co-operation They agreed that practical possibilities existed to this end in the fields of transport and aircraft construction and, in particular, in the peaceful development of atomic energy. They agreed, moreover, that close European co-operation in these fields would not only promote technical development but would greatly promote the solidarity of the European nations and the unification of Europe. It was proposed that exchanges of views on these various projects should take place as soon as possible with the partners of France and Germany.

The Saar. It was agreed that the two Governments would work out joint proposals on the Saar question which would be laid before the Council of Ministers of the Western European Union at its first meeting in Paris on May 8. These proposals will aim at implementing the European Statute of the Saar under the agreement of Oct 23, 1954 The Council will be asked to assume the responsibilities devolving upon it under that agreement Moreover, after consultation with the Saar Government, the Council of W E.U will be informed of the proposals agreed upon by the two Ministers [i e., Dr. Adenauer and M Pinay] with regard to the referendum, the powers, composition and functions of the Control Commission, and the powers of the European High Commissioner for the Saar.

The two Ministers have agreed upon a joint solution of the problems posed by the sequestration of the factories at Völklingen [i.e., the Röchling steel works in the Saar—see below]

Economic Relations. The Ministers gave particular attention to the development of Franco-German economic co-operation within the European framework. It was agreed that a Franco-German economic co-operation committee should be set up without delay which, under the joint responsibility of the two Governments, would aim at achieving maximum economic exchanges between the two countries. The two Governments agreed to examine the question of the canalization of the Moselle, and will have future discussions on this matter. They welcomed with satisfaction the recent creation of the Franco-German Chamber of Commerce, as well as the progress achieved in economic exchanges between France and Germany during the first quarter of 1955.

Cultural Relations. In order to intensify cultural relations between France and Germany it was decided that the Franco-German cultural agreement of Oct 23, 1954, should be ratified in the very near future, and the mixed committee envisaged under that agreement set up. The presidents of this committee will be, on the German side, Dr Wilhelm Hausenstein, Ambassador of the German Federal Republic in Paris, and, on the French side, M. André François-Poncet, Ambassador of France in Bonn. Dr. Hausenstein and M. François-Poncet will put forward their views on the organization and tasks of this committee."

Press statements were made by Dr. Adenauer and M. Pinay after the discussions had ended and before the French Foreign Minister returned to Paris.

M. Pinay said that his conference with Dr. Adenauer had "sealed the Franco-German *entente*"; that "a new era" had begun for the French and German peoples, based upon a close co-operation between the two countries which would serve the cause of European integration and world peace, and that the German Federal Republic, in full sovereignty, would "take its place on an equal footing and with equal responsibilities among the democratic nations." **Dr. Adenauer** declared that Franco-German co-operation was "the key to all efforts at European integration" and was essential to world peace; he added that the next few weeks would witness "truly historic developments" and that "we are living in an era which imposes very great responsibilities on those who are called upon to play a leading part in political life. every day, week, and month that passes must strengthen our will for peace" He assured M Pinay that he (the French Foreign Minister) was leaving behind him in Germany "friends who will remember with gratitude the work which we have done together."

The Rochling steel works at Volklingen, in the Saar, were sequestrated by the French Government after the war and operated under French direction. With an annual capacity of about 900,000 tons, they account for approximately one-third of the Saar's steel output. In view of the part played by the steelworks in the Nazi war machine, and of the support given by the Rochling family to the Hitlerite regime, the French Government had been insistent that the works should not be returned to their former ownership. Moreover, it was strongly felt in France that the maintenance of the Rochling interests would give the firm a dominant position in the Saar's relations with the six-nation European Coal and Steel Community. Whilst it was not suggested that the Rochling family should be dispossessed without compensation, the French Government insisted that they should not regain control over a concern the greater part of which had been awarded to France as reparations after the war.

Hermann Rochling, the head of the family, was sentenced by a French court in 1948 to seven years' imprisonment for having supported Nazi war aims, contributed funds to Nazi organizations, employed slave labour during the war, and illegally acquired iron and steel plants in France and other occupied countries. He was released in 1951 for reasons of health and for good conduct while in prison—see 11673 D, 9477 A.

The agreement arrived at between Dr. Adenauer and M. Pinay on the question of the Rochling steelworks was essentially a compromise. M. Pinay, on the one hand, accepted a settlement involving less than a French controlling interest in the concern, whilst Dr. Adenauer, on the other hand, agreed that the Rochling family should withdraw completely from the business, though with ample compensation. Although the formula agreed upon between the two Governments was not officially made public, it was subsequently stated by M. Pinay, after his return to Paris, that it would be based on the following principles:

(1) The Röchling family would be paid compensation amounting to 200,000,000 Swiss francs (over £16,000,000) for relinquishing their interests in the concern, half the sum being paid by France and half by the German Federal Republic.

(2) The French and Federal German Governments would each acquire 50 per cent of the shares and, in turn, would sell them to private French and German interests.

(3) These interests would set up a joint Franco-German consortium to run the Rochling concern, half the directors being French and half German.

(4) Shares in the Röchling concern (i e. those bought from the French and German Governments by private interests) would not be freely transferable by the new owners, and might only be sold with the consent of the new company's board of directors. Such consent would need a three-quarters majority.

(5) The consortium—*La société des usines de Völklingen*—would be a limited company operating under Saar law

(6) The first president of the new board of directors (*conseil de direction*) would be a French national, who would have a casting vote. The next president would be chosen by agreement of both sides (i.e. by the French and German directors), and would need a two-thirds majority for election Presidents of the *conseil de direction* would hold that office for a five-year term, and would be eligible for re-election.

(7) A Saar director would be in charge of labour relations and personnel management.

(8) Shareholders' meetings could amend the Statute of the new company by a three-quarters majority.

(9) If one Government lacked the funds to buy its share in the new company (100,000,000 Swiss francs), the other Government might lend it the money.

It was understood that the Rochling family had been consulted prior to the agreement, and that it had agreed to relinquish its interests in the concern against the above-mentioned compensation payment.

A Social Democratic motion to nationalize the Rochling steelworks was rejected by the Saar *Landtag* on May 9 by 28 votes to 16. Herr Hoffmann (the Saar Premier) declared that no responsible politician could "torpedo" the agreement reached at Bonn between Dr. Adenauer and M. Pinay, and that, as a solution to this problem had been reached between France and Germany, the alternative solution of nationalization could not now be brought forward. The 28 votes against nationalization came from the 26 Christian Democrats (Herr Hoffmann's party) and the two Communists, whilst the 16 votes in favour were cast by the Social Democrats.

Earlier, on March 21, a protocol had been signed in Paris by M. Pinay and Herr Hoffmann laying down the "heads of agreement" in respect of a new economic convention between France and the Saar, designed to conform with the Saar statute embodied in the Franco-German agreement of October, 1954. The protocol stated that the existing Franco-Saar customs and monetary union would be maintained, thereby preserving an economic union between the two countries, and that all French legislation applicable to the Saar in matters of currency, Customs, and indirect taxation (including turnover taxes), would come into force simultaneously in both countries. Other provisions were as follows:

Customs. French Customs regulations would remain in force in the Saar. France would continue, for the time being, to administer Customs in the Saar pending the formation of a Saar Customs administration which would operate under French supervision. The Saar Customs administration would be headed by a Frenchman, assisted by a Saarlander as deputy.

Taxation. French tax legislation, including indirect levies and business turnover taxes, would apply to the Saar except for special regulations actually in force, under special conditions the Saar Government might also issue special regulations in agreement with the French Government. French credit policies would apply to the Saar, under the direction of a joint Franco-Saar control commission.

Investments. The French Finance Ministry would have control of foreign investments in the Saar, but would consult the Saar Government before making any decisions.

Foreign Trade and Payments. Trade, monetary and Customs agreements concluded between France and third countries would be applicable to the Saar, whose Government, if it desired, could participate in negotiations for such treaties. In these negotiations the French Government would take into account the special interests of the Saar.

Whenever trade agreements were of particular interest to the Saar economy, the Saar's share in the import quotas to be negotiated would be fixed in advance, at the request of the Saar Government, by agreement between the French and Saar authorities.

Business Charges and Prices. The French and Saar Governments undertook to see to it that "the normal play of economic forces" would not operate to the disadvantage of the other country. In particular, the charges to be borne by economic enterprises in both countries should be identical, notably as regards social security charges, taxes, and basic salaries. Wherever prices were controlled, the Saar would harmonize its scales with those in force in France, and no discrimination against the goods and services of one country would be allowed in the other.

Judicial Provisions. Saar courts would have exclusive jurisdiction. Special arrangements would be provided for the judicial handling of questions arising out of the application of the new economic convention. A joint six-man commission would decide, by majority vote, any differences of interpretation or application which might arise. If this commission could not settle the dispute under consideration, either party could bring it before an arbitration tribunal.

Following the Pinay - Adenauer agreement, the new economic convention between France and the Saar, embodying the above-mentioned provisions, was signed in Paris on May 3 by M. Pinay and Herr Hoffmann.—(Le Monde, Paris - Le Figaro, Paris - Frankfurter Allgemeine Zeitung - Die Welt, Hamburg) **(Prev. rep. Saar Agrmt., German Ratification, 14169 A.)**

A. CZECHOSLOVAKIA. — Political Amnesty.

A far-reaching amnesty was announced in Prague on May 9 on the occasion of the tenth anniversary of Czechoslovakia's liberation from German occupation, the following categories of persons being immediately released: persons serving prison terms of under two years; all pregnant women and those with children under 14 who were serving terms of less than three years; and all male prisoners over 65 and female prisoners over 55. All other prison terms were reduced by one-third or at least two years, whilst prisoners serving life sentences had their terms reduced to 20 years. Persons facing trial for attempted escape from Czechoslovakia were included in the amnesty, but not persons who had been convicted of treason, espionage, and sabotage.—(Le Monde - Neue Zürcher Zeitung) **(Prev. rep. 12935 A.)**

B. UNITED KINGDOM. — April Trade Figures.

Imports into the United Kingdom in April totalled £318,000,000, exports were £244,800,000, and re-exports £8,300,000; the adverse balance thus amounted to £64,900,000, compared with £92,500,000 in March.
(Board of Trade Journal) **(Prev. rep. 14188 B.)**

C. GOLD AND DOLLAR RESERVES.—Changes, 1954.

There was a net outflow of $327,000,000 of gold from the United States in 1954, of which $83,000,000 was in the first six months and $244,000,000 in the second. The estimated changes in the gold and dollar reserves in 1954 of the principal countries other than the United States are shown below:

	Holdings on Dec 31, 1954		Holdings on Dec 31, 1953		Increase (+) or decrease (−) in 1954

Note. The figures include the reported and estimated gold reserves of central banks and governments, and official and private dollar holdings reported by banks in the U.S.A. Dollar holdings include principally deposits and short-term Government securities.

* Does not include U.K. dependencies or rest of sterling area and therefore differs from figures given in 13973 B. ‖ Estimated gold holdings of British Exchange Equalization Account. † Including dependencies. § Gold reserves of Bank of France and French dependencies only.

The total reserves of E.R.P. countries on Dec. 31, 1954 (excluding the United Kingdom, but including Finland, Spain, Yugoslavia, and the Bank for International Settlements in Basle) amounted to $6,556,000,000 in gold and $5,084,000,000 in dollars; those of the sterling area to $3,245,000,000 in gold and $1,000,000,000 in dollars; those of Latin American countries to $1,836,000,000 in gold and $1,849,000,000 in dollars; and those of Asian countries to $634,000,000 in gold and $1,592,000,000 in dollars. Holdings of the International Bank, the International Monetary Fund, and other international institutions (excluding the Bank for International Settlements) amounted to $1,740,000,000 in gold and $1,820,000,000 in dollars, and are not included in the above table.

U.S. holdings of gold on Dec. 31, 1954, totalled $21,800,000,000, compared with $22,100,000,000 on Dec. 31, 1953.—(Federal Reserve Bulletin, Washington) **(13524 A.)**

D. SCIENTIFIC RESEARCH. — Element 101.

The discovery of a new chemical element, No. 101 named mendelevium after the 19th-century Russian chemist Mendelyev—was announced on April 30 by the University of California, the discovery having been made by Dr. Glenn T. Seaborg (a Nobel prizewinner) and other research chemists. It was stated that Element 101 was the heaviest atomic element so far discovered and was intensely radioactive, but that it had "no practical place in atomic energy either for bombs or power." Like all the transuranic elements (i.e. all those after Element 92), Element 101 is a laboratory product and does not exist in nature. It was subsequently disclosed that it had been obtained from Element 99 (see 13415 B) by bombardment in a cyclotron.—(New York Times) **(Prev. rep. 13592 A.)**

E. UNITED STATES. — Shelving of Legislation on Statehood for Hawaii and Alaska.

A Bill designed to grant statehood to Hawaii and Alaska was in effect shelved by the House of Representatives on May 10, when the House voted by 218 to 170 to recommit the measure to committee without any recommendation for further action. Opponents of the measure argued that Hawaii had been dangerously infiltrated with Communists; that Alaska could not sustain the economic burdens of statehood; and that if the two territories were admitted to the Union they would control one-twenty-fifth of the voting power in the Senate with only one-242nd of the nation's population.
(New York Times) **(Prev. rep. 13840 D.)**

MAY 28—JUNE 4, 1955

A. UNITED KINGDOM. — The General Election. - Conservative Party returned with Increased Majority.

The general election held on May 26 resulted in the return to power of the Conservative Party with an overall majority of 59, as compared with the party's majority of only 17 at the general election of 1951. The 1955 election was the first for 90 years in which a Government increased its majority at the polls. [The last occasion was in 1865, when the Palmerston administration was returned with an increased majority.]

Party strengths in the new Parliament, the votes cast for the political parties, and the percentage of votes are shown below, comparison being given with 1951 ·

	1955 Election			1951 Election		
	Seats	Votes	Per-centage	Seats	Votes	Per-centage
Conservatives and associates	345	13,336,182	49.84	321	13,717,538	48.0
Labour	277	12,405,130	46.36	295	13,948,605	48.8
Liberals	6	722,400	2.7	6	730,556	2.5
Others*	2	295,772	1.1	3	198,969	0 7

* Two Sinn Fein candidates (neither of whom will take their seats at Westminster) were returned in Northern Ireland at the general election In 1951 two Irish Nationalists and an Irish Labour candidate were elected in Northern Ireland

Notes. (1) The new House of Commons has 630 members, five more than the former House

(2) " Conservatives and associates " includes National Liberals, Conservative-Liberal and Liberal-Conservative candidates, and Ulster Unionists. The Speaker is included in the Conservative total

(3) " Others " includes Communists (33,144 votes), Independents, Independent Labour Party, Welsh Nationalists, Scottish Nationalists, Irish Labour, N I Labour, and Sinn Fein

The number of votes cast in the election was 26,759,484, representing 76.8 per cent of the total electorate of 34,852,469. Polling was therefore lower than in 1951, when 82 6 per cent of the electors went to the polls (28,602,323 out of a total electorate of 34,553,197). Whereas, however, the Labour Party polled some 200,000 more votes than the Conservatives in 1951, the Conservative vote in 1955 was nearly 1,000,000 higher than that of the Labour Party. Moreover, the Conservative proportion of the total vote increased from 48.0 to 49 8, whilst the Labour proportion declined from 48 8 to 46.36. Although the Liberal vote showed little change from 1951, the Liberal Party's percentage increased slightly from 2.5 to 2.7

Owing to the extensive alterations of constituency boundaries and the creation of many new constituencies, a direct comparison of party gains and losses was possible only in about two-thirds of the constituencies. A *résumé* is given below in respect of (1) the 410 constituencies which remained unaltered; (2) the 177 constituencies whose boundaries were substantially altered, including the 35 new constituencies; and (3) the 43 constituencies in which only minor boundary changes were made:

(1) In the 410 unaltered constituencies, the Conservatives gained ten seats from Labour; the Labour Party gained one seat from the Conservatives; and the Ulster Unionists gained one seat from Irish Labour—a net Conservative and Ulster Unionist gain of ten seats. The seats won by the Conservatives from Labour were Carlisle, Ealing North, Halifax, Hornchurch, Maldon, Preston South, Walthamstow East, Wandsworth Central, Watford, and The Wrekin, whilst the Ulster Unionists won Belfast West from Irish Labour. The Labour gain from the Conservatives was in South-West Norfolk.

(2) In the 177 constituencies affected by major boundary alterations, including the new constituencies, the Conservatives (and supporters) obtained 91 seats, Labour 85 seats, and the Liberals one seat. Among former Labour seats gained by the Conservatives were Devonport, Gravesend, Gloucestershire South, Nottingham Central, Nottingham South, the Kirkdale division of Liverpool, and the Test division of Southampton. Former Conservative seats won by Labour were Bristol North-West, Romford, and the Govan division of Glasgow. The 35 new constituencies were almost equally divided between the two major parties, Labour winning 18 and the Conservatives 17.

(3) There was only one change in party representation in the 43 constituencies subject to minor boundary revisions—a Conservative gain from Labour in Central Ayrshire.

As indicated in the table above, there was a national " swing " of about 1.8 per cent to the Conservatives as compared with 1951, and a corresponding percentage decline in the aggregate Labour vote. This " swing " was reflected in (*a*) increased Conservative majorities in most constituencies as compared with 1951, and (*b*) the Conservative Party's success in winning most of the marginal seats—a success to which the party's electoral victory was primarily due. Although Conservative majorities tended to increase as compared with 1951, and Labour majorities to decline, there were nevertheless important exceptions to this trend in different parts of the country, for example in Norfolk South, a marginal agricultural constituency, where Mr. E. G. Gooch (Lab.) increased his majority from 279 to 1,242; at Lincoln, where Mr. Geoffrey de Freitas (Lab.) increased his majority by nearly 2,000; and at Rossendale, where Mr. Anthony Greenwood (Lab.) increased his majority by about 1,300.

The Conservative Party. All members of the Government were re-elected, in nearly all cases with increased majorities Sir Anthony Eden, the Prime Minister, was re-elected for Warwick and Leamington (which he has represented since 1923) with a majority 3,663 higher than in 1951, Mr R A Butler, Chancellor of the Exchequer, increased his majority at Saffron Walden by 1,279 votes in a three-cornered contest, and Mr Harold Macmillan, the Foreign Secretary added 1,014 votes to his already large majority at Bromley Sir Winston Churchill was re-elected for Woodford (the boundaries of which were subject to major revision) by a majority of 15,808.

New Conservative members included Mr Maurice Macmillan, son of the Foreign Secretary and director of the publishing firm of Macmillan's, who won Halifax from Labour, Mr Peter Kirk, diplomatic correspondent of Kemsley Newspapers Ltd, who won Gravesend (Mr Kirk polled 22,000 votes against 19,000 for Mr. Victor Mishcon, Labour, and 6,000 for Sir Richard Acland, Independent); Dr. Donald Johnson, a former Liberal, who won Carlisle from Labour, and who was formerly medical officer to the Grenfell Mission in Labrador, Miss Joan Vickers, a social welfare worker, who defeated Mr Michael Foot (Lab.) at Devonport by 100 votes, Wing-Commander Robert Grant-Ferris, who represented St Pancras North from 1937-45, and who was elected for the new constituency of Nantwich, Sir Henry d'Avigdor-Goldsmid (elected for Walsall South, a new constituency), member of the bullion broking firm of Mocatta & Goldsmid, and High Sheriff of Kent in 1953, Mr Brian Harrison, an Australian, who won Maldon (formerly represented by Mr Tom Driberg, Labour), and who rowed in the record-breaking Cambridge crew in 1948, Mr Anthony Kershaw, a barrister, who won Stroud after having unsuccessfully contested Gloucester in 1950 and 1951, Mr David Price, an economist and an ex-president of the Cambridge Union, who was elected for Eastleigh, a new constituency; Mr William Yates, formerly a legal officer for the Foreign Office in North Africa, who won The Wrekin division (Shropshire) from Labour, and Capt. F V. Corfield, a farmer, barrister, and former regular soldier, who was elected for South Gloucestershire

Sir Gurney Braithwaite, Parliamentary Secretary to the Ministry of Transport under Sir Winston Churchill, was defeated at Bristol North-West by Mr Christopher Boyd (Labour), whilst Mr. D. G. Bullard was unseated by Mr. Sidney Dye (Lab.) in South-West Norfolk.

The Labour Party. All members of the Labour " shadow Cabinet " were returned, in most cases with reduced majorities. Mr Attlee, the party leader, was re-elected for Walthamstow West, where his majority was reduced by over 2,000; Mr Herbert Morrison, the deputy leader, was re-elected for Lewisham South with a slightly reduced majority, and Dr Edith Summerskill, chairman of the Labour Party, had a 5,600 majority at Warrington.

Mr. Michael Foot and Mr Geoffrey Bing, Q.C., two of the most prominent supporters of Mr. Aneurin Bevan, lost their seats at Devonport and Hornchurch respectively. Other former Labour members to lose their seats were Wing-Commander Edward Shackleton, whose majority at Preston South in 1951 was the smallest in the country (16 votes), and who lost the constituency to the Conservatives, Mr. Maurice Webb, the former Labour Minister of Food, who was unsuccessful in the reorganized Bradford North division, Mr Anthony Crosland, who represented Gloucestershire South in the last Parliament, and who unsuccessfully contested the Test division of Southampton, Mr Woodrow Wyatt, formerly M P. for Aston (Birmingham), who was unsuccessful at Grantham; Mr Ian Winterbottom and Mr Norman Smith, who failed to secure re-election for the re-organized Nottingham Central and South divisions respectively; Mr. William Keenan, who lost the Kirkdale division of Liverpool; and Mr A. C. Manuel, who failed to secure re-election for Central Ayrshire,

New Labour members included Mr. Francis Noel-Baker (son of Mr Philip Noel-Baker, M P. for Derby South), who was returned for Swindon, and who had represented Brentford and Chiswick in 1945-50; Mr. Sidney Dye, a farmer, who represented South-West Norfolk in 1945-50 and who regained that seat from the Conservatives; Mr. K. Zilliacus, who represented Gateshead in 1945-50, and who was returned by a small majority (239 votes) for the Gorton division of Manchester; Mr. Christopher Boyd, formerly an Under-Secretary to the Government of India (1944-46) and a member of the Central Economic Planning Staff (1947-48), who won Bristol North-West from the Conservatives; and Mr. Ronald Ledger, a staff manager and a member of the Union of Shop, Distributive, and Allied Workers, who was elected for Romford.

Mr. Aneurin Bevan was returned for Ebbw Vale, where his majority was reduced by 2,293, whilst Miss Jennie Lee (Mrs. Aneurin Bevan) was re-elected for Cannock, where her majority was almost halved (from 16,338 to 8,298). Among prominent " Bevanites," Mr. Michael

Foot and Mr. Bing lost their seats, as stated above; Mr Ian Mikardo and Mrs Barbara Castle were returned by narrow majorities (235 and 489 votes respectively) in the new Reading and Blackburn constituencies, and Mr. Richard Crossman's majority at Coventry East was cut by half (from 12,671 to 6,104),

In a press interview on May 29, Mr Attlee said that "while the results are disappointing and we are now to have a Conservative Government with a working majority, it will be our business to keep them to the promises and professions that they have made." Asked whether he thought that the "Bevanite" controversy within the party had contributed to Labour's defeat, he replied. "It may well be that a certain amount of internal differences [in the party] had some effect on the marginal voters, but not on the party members as such." Mr Herbert Morrison admitted that the Labour Party had "lost the battle of the marginal seats," but emphasized that there had been no Conservative "landslide" He said that the Labour Party would have to "re-examine not the fundamental principles of the party but the exposition of party policies in the light of modern conditions" In particular, it was "profoundly important" that unity and coherence should be established, since the modern elector was "a responsible being who looked at the policy, coherence and unity of the party seeking his vote." Mr. Morgan Phillips, secretary of the party, believed that many Labour supporters had not gone to the polls, and expressed the opinion that "we could have won had we polled our full strength" He said that the Labour Party had been handicapped by "the maldistribution of our majorities," and that the redistribution of constituencies had favoured the Conservative Party to the extent of five to ten seats Pointing out that Labour had won seats against the apparent national "swing," Mr Morgan Phillips expressed the belief that the "swing" might be nothing more than "the failure to translate our strength effectively into votes."

Analyses of the reasons for the Labour Party's setback were made on June 2 by Mr Hugh Gaitskell (the former Labour Chancellor of the Exchequer), in a speech to the annual conference of the Amalgamated Society of Woodworkers, and by Mr Aneurin Bevan, in an article in *Tribune* Both Mr. Gaitskell and Mr Bevan agreed that the country's present economic prosperity was a primary reason for the Conservative success, and both attributed that prosperity to the foundations which had been laid by the Labour Governments between 1945 and 1951 Both agreed, also, that the Conservative Party's organization had proved itself superior to that of the Labour Party —a point which had also been made by Mr Attlee.

Mr. Gaitskell said that although the loss of 18 seats could not be described as a disaster for the party or even as a grave setback, the fall in the Labour vote "does contain for us a serious warning." The "first and most important reason" for the Conservative success, he said, was the immediate economic situation as it appeared to the ordinary voter. "Despite an inferior production record and a poor export performance, the Tories have been able to claim convincingly that things are better . . . We must not accept that Labour can only win elections when times are bad" Mr. Gaitskell's second reason for Labour's setback was the internal dissension in the party, in which connexion he declared. "It is useless to deny that our internal dissensions did prove a grave handicap. . . . Disunity is no recommendation to the electorate. Constant attacks from within on the official policy and leadership, however well intentioned and seriously meant, do undermine confidence They are a luxury we can hardly afford if we want to get back into power."

Mr. Bevan, after saying that memories of unemployment "were not sufficient in themselves to form the basis of mass appeal," expressed the opinion that the decisive cause of Labour's setback was its "inability to distinguish itself sufficiently from many of the Government's own policies, particularly in the field of foreign affairs." After pointing out that the party was deeply divided on the question of German rearmament, he wrote: "The argument inside the party was fierce and prolonged. The official leadership devoted an intensive campaign to the task of trying to win over the rank and file to its own point of view. It succeeded in obtaining a technical majority. The chief result, however, was to publicise throughout the country the fact that on such a crucial issue Labour was lined up behind Eden. This, in its turn, weakened Labour's case for a reduction in the period of National Service."

The Liberal Party. The Liberals retained the six seats which they held in the former Parliament and polled particularly well in the West Country, notably in Cornwall. Mr. Clement Davies, the party leader, was returned with a reduced majority for Montgomeryshire, but Sir Rhys Hopkin Morris, Q.C., increzed his majority at Carmarthen from 467 to over 3,000, whilst Mr. Joseph Grimond (the Liberal Chief Whip) increased his majority in Orkney and Shetland in a three-cornered contest against Conservative and Labour candidates Mr. John Bannerman failed by only 900 votes to secure election for Inverness-shire, whilst Mr. Edward Malindine, who polled over 15,000 votes in North Cornwall, also narrowly failed to secure election. In North Devon, despite a Conservative majority of 5,000, Mr. Jeremy Thorpe succeeded in increasing the Liberal poll from 7,000 to 11,000. The Liberal candidate at Hereford, Mr. Frank Owen, polled 8,600 votes in a constituency which had not been contested by the Liberals for ten years.

Mr. Frank Byers, the former Liberal Chief Whip, said that the Liberal Party was "tremendously encouraged" by the "remarkable increase" in its vote in many parts of the country; he added that "we have a foundation now in a lot of constituencies in which we can build up real strength to go forward." Lord Rea, who presided over the recent Liberal Assembly (see 14220 C), expressed the opinion that the Liberal Party, after having reached its lowest point in 1951, had "turned the corner" and was "on the way back."

Other aspects of the general election and of the new House of Commons are summarized below under cross-headings.

Large and Small Majorities. A feature of the elections was the number of close contests, involving the return of 43 members with majorities of under 1,000. The smallest majority in the country was that of Mr. Percy Wells (Lab.), who was returned for Faversham by 59 votes. Other members with majorities of under 1,000 are: Mr. W. J. Taylor (C, Bradford North), 69; Miss Joan Vickers (C, Devonport), 100, Mr W T. Williams (Lab, Barons Court), 125, Mr. Fred Blackburn (Lab, Stalybridge and Hyde), 155; Mr. D. L Spencer-Nairn (C., Central Ayrshire), 167, Mr. William Reid (Lab, Glasgow, Provan), 180, Mr Arthur Palmer (Lab.. Cleveland), 181, Mr. Sidney Dye (Lab., South-West Norfolk), 193, Mr. Nixon Browne (C, Glasgow, Craigton), 210; Mr C. W Gibson (Lab, Clapham), 225, Mr Ian Mikardo (Lab, Reading), 238, Mr. J. W Barter (C., Ealing North), 246; Mr. T Mitchell (Sinn Fein, Mid-Ulster), 260; Mr P. Clarke (Sinn Fein, Fermanagh and South Tyrone), 261, Mr. K. Zilliacus (Lab, Manchester, Gorton), 269, Dr. Donald Johnson (C, Carlisle), 370; Sir Ian Horobin (C., Oldham East), 380, Mr. James Hutchison (C., Glasgow, Scotstoun), 428, Mr. Alan Green (C, Preston South), 474, Mr. William Yates (C, The Wrekin), 478; Mrs Barbara Castle (Lab, Blackburn), 489, Mr. J. A. Sparks (Lab, Acton), 525, Mr David Price (C., Eastleigh), 545, Mr. Brian Harrison (C, Maldon), 550, Mr W R. Hudson (C., Hull North), 590; Mr. Maurice Orbach (Lab., Willesden East), 659; Mr Ernest Partridge (C., Battersea South), 679, Mr. M Turner-Samuels (Lab, Gloucester), 748, Lt.-Col. J. K Cordeaux (C., Nottingham Central), 758; Mr Charles Royle (Lab, Salford West), 859, Mr. Frank Beswick (Lab., Uxbridge), 876, Mr. William Coldrick (Lab., Bristol North-East), 876; Mr. J. H Harrison (C., Eye), 889; Mr. Anthony Fell (C., Yarmouth), 917; Mr. George Lindgren (Lab, Wellingborough), 926, Mrs. Lena Jeger (Lab., Holborn and St. Pancras South), 931, Mr. Thomas Oswald (Lab, Edinburgh Central), 939; Mr. C. J. Simmons (Lab., Brierley Hill), 949; Mr. Patrick Maitland (C., Lanark), 958; Mr. Martin Maddan (C., Hitchin), 965; Mr. Neil McLean (C., Inverness-shire), 966

The biggest majorities were gained by two Ulster Unionists—Mr. George Currie (Down North) and Mr. S. K. Cunningham (Antrim South), with 48,678 and 45,192 respectively against Sinn Fein opponents. The biggest majority in Great Britain was that of Mr. H. E. Holmes (Lab, Hemsworth), with 34,042.

Women Members. The new House of Commons will have 24 women members (nine Conservative, one Ulster Unionist 14 Labour) three more than in the last Parliament.

The Conservative women M.P.s are Lady Tweedsmuir, Miss Edith Pitt, Miss Patricia Hornsby-Smith, Viscountess Davidson, Dame Florence Horsbrugh, Mrs Evelyne Hill, Miss Irene Ward, Miss Evelyn Emmet, and Miss Joan Vickers, whilst Mrs. Patricia McLaughlin was returned for the Ulster Unionists. Mrs. Emmet (chairman of the National Union of Conservative and Unionist Associations), who was returned for East Grinstead, Miss Vickers, elected for Devonport, and Mrs. McLaughlin, who won Belfast West from the Irish Labour Party, entered the House for the first time.

The Labour women M.P.s are Mrs. Barbara Castle, Miss Jennie Lee (Mrs. Aneurin Bevan), Mrs. Jean Mann, Miss Elaine Burton, Mrs. Eirene White, Mrs. Alice Cullen, Mrs. Elizabeth Braddock, Mrs. Lena Jeger, Miss Margaret Herbison, Miss Alice Bacon, Mrs. Freda Corbet, Mrs. Harriet Slater, Dr. Edith Summerskill, and Mrs Joyce Barber (M.P. for Wood Green), a new member.

Forfeited Deposits. The number of forfeited deposits totalled 101, of which the Liberals forfeited 61 (five fewer than in 1951) out of 110 candidates presented. Fifteen of the 17 Communist candidates lost their deposits. Three Conservative deposits were lost (all in Wales) and one Labour deposit (in North Cornwall). The remaining 21 forfeited deposits were lost by Independent, I.L.P., Welsh Nationalist, Scottish Nationalist, and Sinn Fein candidates.

No official statement was issued on the election results by the Conservative Party, but Sir Anthony Eden warmly thanked the electorate for its confidence in the Government, and for returning it to office with an increased majority. (Times - Daily Telegraph - Manchester Guardian - Daily Herald)

Note. The detailed constituency results will be given in a subsequent issue. (Ed. K.C.A.)

A. CHINA. — Taking-over of Port Arthur.

It was announced by Peking Radio on May 24 that the Soviet authorities had completed the transfer of Port Arthur to China, in conformity with the Sino-Soviet agreement of Oct. 12, 1954. A further Peking broadcast on May 26 stated that all Soviet forces had left the base, five days before the time limit (May 31, 1955) laid down in the agreement.
(Times - Manchester Guardian) **(Prev. rep. 13855 A.)**

B. CANADA. — Merger of T.U. Organizations.

The Canadian affiliates of the American Federation of Labour and the Congress of Industrial Organizations the Trades and Labour Congress and the Canadian Congress of Labour respectively—agreed on May 9 to merge into a single organization under the name of the Canadian Congress of Labour. The new organization, which will have to be approved by conventions of the two merger groups, will have a membership of about 1,000,000.—(Montreal Star) **(Prev. rep. 14058 A.)**

A. LONDON AND PARIS AGREEMENTS. — Completion of Ratification Procedure by National Parliaments. - Agreements ratified by French Council of the Republic, U.S. Senate, and Belgian, Luxemburg, Netherlands, and Danish Parliaments.

The London and Paris agreements on the admission of the German Federal Republic to NATO, the rearming of Western Germany within the NATO framework, and the expansion of the Brussels Treaty Organization into the Western European Union, were ratified on March 27 by the French Council of the Republic and subsequently by the U.S. Senate and the Parliaments of Belgium, Luxemburg, the Netherlands, and Denmark, thereby completing the ratification process in all the national Parliaments concerned.

Ratification by French Council of the Republic.

The French Council of the Republic opened its debate on the Paris agreements on March 23. It had before it the four Bills already passed by the National Assembly (see 13965 A) relating respectively to (1) the protocol on the amendments to the Brussels Treaty and the setting-up of the Western European Union, involving the rearmament of the German Federal Republic and its entry into W.E.U.; (2) the ending of the occupation regime in Germany and the convention regulating the continued maintenance of Allied forces on German territory; (3) the admission of the German Federal Republic to NATO, (4) the Franco-German agreement on the Saar.

Prior to the Council's debate, the Bills had been examined by its various Commissions. those for Foreign Affairs, National Defence, Economic Affairs, Industrial Production, *France d'outre mer*, and Finance. All of these bodies, by varying majorities, had declared themselves in favour of ratification, although the Industrial Production Commission had attached two delaying amendments. Some of the other Commissions, whilst not adopting formal amendments, had passed "motions" expressing certain reservations to be brought to the Government's notice. These reservations related specifically to an agreement on the functions of the armaments production agency under the W.E.U., on which negotiations were then in progress in London (see 14000 A), and to the Saar agreement. As regards the latter, the differences in the interpretation of the proposed Saar Statute—as expressed in the respective Government memoranda accompanying the French and German ratification Bills, and in Dr. Adenauer's statements during the ratification debate in the *Bundestag* (see 14169 A)—had created widespread concern in France.

The **Foreign Affairs Commission** had supported the Saar agreement on March 16 by 21 votes to seven, with two abstentions, and the three other Bills by 20 votes to four, with six abstentions, but had asked for certain assurances from the Government (see below)

The **National Defence Commission** voted on March 16 for ratification by 14 to nine, with three abstentions and four members absent.

The **Economic Affairs Commission** had adopted the agreement on March 9 by 12 votes to four, with two abstentions It rejected (by 11 votes to six, with two abstentions) an amendment that ratification should be postponed until Franco-German disagreements over the Saar had been settled, but adopted a "simple resolution" affirming (1) that the Saar Statute unequivocably created the political autonomy of the territory, (2) that it ensured the maintenance of the monetary, customs and economic union between France and the Saar, and (3) that the instruments of ratification of the Saar agreement should only be exchanged after the question of the Rochling steel works (see 14223 A) had been settled

The **Finance Commission** had also approved the agreements, but had unanimously (save for its two Communist members) adopted a motion expressing the view that it was essential to supplement the agreements by satisfactory arrangements on the W E U armaments agency.

The **Industrial Production Commission,** though supporting the agreements. had added two important amendments On March 3 it voted that deposition of the ratification instruments in respect of the Saar agreement should be made dependent on the conclusion of the new economic co-operation convention between France and the Saar, then under negotiation. On March 9 the Commission, while approving the three other Bills, added an amendment stipulating that the instruments of ratification of the relevant protocols and conventions should not be deposited until a European standardization agency for armaments and for the distribution of U.S. aid had been established under the Western European Union.

During its earlier debates, the Foreign Affairs Commission had heard a statement from M. Pinay, the Foreign Minister, on March 9-11. In this statement, M. Pinay revealed that Sir Winston Churchill had sent a letter to M. Mendès-France (then Prime Minister) on Jan. 12, 1955, containing a warning to France against "leaving an empty chair at international conferences lest it be occupied by some other nation." The full text of the correspondence between Sir Winston and M. Mendès-France was released in Paris and London on March 21 and is reproduced below.

M. Mendès-France to Sir Winston Churchill.

Paris, Jan 3, 1955

"As I felt able to give you an assurance during the discussions in London, the National Assembly has approved the agreements on which the unity and cohesion of the Western Powers depend But, as I foretold to you, the debate has been a difficult one I am convinced that we should not have had a favourable vote if we had not been able to put forward the undertaking of your Government to maintain substantial forces on the Continent

All the difficulties are not yet over I must obtain the vote of the *Conseil de la Republique* Above all it is important that French public opinion should remain convinced that the treaties are necessary, and that their adoption and entry into force will not prevent the Western Powers from following with resolution and perseverance a policy of peace.

The West must unceasingly demonstrate its good will If those efforts, of which you have so often set the example, succeed, it will be for the good of the whole world If they unfortunately fail, we shall at least have proved to the peoples that their Governments have done their duty, and we shall have cemented still further, if that were necessary, the association of the countries of the free world. I think that that is also your belief

It is in this spirit that the attached note [see Memorandum below] which I submit for your consideration, has been drawn up. I am sending it also to President Eisenhower, Sir Anthony Eden, and Mr. Foster Dulles This note suggests two possible procedures by which we might propose a four-Power conference to the Soviet Union —a conference which might be summoned for an early date, for example in May, provided that careful preparations have been made on the diplomatic plane.

Your understanding, your lucid vision, and your friendship will be more indispensable than ever for the accomplishment of the grave tasks with which 1955 is going to confront us "

M. Mendès-France's Memorandum on Four-Power Talks.

"(1) The proposals I made at the United Nations (see 13910 A) have lent support to the arguments which I developed in the course of the debates in the National Assembly and which have greatly contributed to guiding the vote of a certain number of deputies in favour of the Paris agreements Speakers of widely differing political views have asked the Government to prepare for a new four-Power conference by diplomatic negotiations undertaken immediately. In these circumstances the French Government could not remain inactive

(2) The French Government thinks it necessary that a new *démarche* should be made to the Soviet Government as soon as possible Two procedures can be considered

(*a*) First, the French Government would seize the opportunity offered by the Soviet Note concerning the threat to denounce the Franco-Soviet Treaty, a Note which in any case could not remain unanswered After having refuted the Soviet Government's allegation that the Paris agreements have an aggressive character, the French Government could conclude by renewing its offer of diplomatic negotiations with a view to preparing for a four-Power conference in May, given that by this date France will have ratified the Paris agreements. The terms of the proposal thus made to the U S S R. would first be communicated to the American and British Governments, and that fact would be mentioned in the French Government's Note to the Soviet Government

(*b*) Another solution, which the French Government naturally prefers, would consist of making the offer of a four-Power conference to the Soviet Government by a joint Note from the three allied Governments This Note could be drawn up by the procedure which has been followed hitherto for the preparation of Western Notes addressed to the Soviet Government, always on condition that it did not lead to an unacceptable delay

(3) The French Government, in insisting on the importance which in its view attaches to the proposed *démarche*, is convinced that the Western Powers will only be able to retain the indispensable support of public opinion for their policy by continually taking the initiative in favour of a relaxation of international tension. The risks implied by a passive role in this respect would not only be great in France but equally so in Germany, as the latest Bundestag debate shows. By contrast, the U S.S R. could steal the limelight at the cost of empty declarations, assure itself the advantage of the initiative, and appear as the only party anxious to come to a settlement of outstanding questions.

(4) The French Government would be happy to learn the views of the British Government on these proposals as quickly as possible.'

Sir Winston Churchill to M. Mendès-France.

10, Downing Street, Whitehall,
Jan. 10, 1955

"Thank you very much for your letter. I renew my congratulations to you on your success in the Chamber. I feel that your difficulties in dealing with all the vehement and self-centred groups must be enormous. Your courage and vitality have given me an impression of French leadership which I had not sustained since the days of Clemenceau. Pray accept my earnest compliments.

I have for some time felt a strong desire to establish a direct personal contact with the new leaders of the Soviet Government such as might lead to a fruitful four-Power conference. But these thoughts of mine received a rude shock when the Soviets requested a four-Power meeting of the Foreign Secretaries, apparently with the object of stimulating opposition in the French Chamber to the ratification of the E.D.C.

After this came the London conference; and Sir Anthony Eden's initiative was there, and subsequently at Paris, crowned by the agreements which you by your determination and skill managed, though by a very small majority, to pass through the Chamber I am well aware that the treaty has also to pass the *Conseil de la République*, and of the many opportunities for uncertainty and delay which still remain.

I still hold most strongly to my conviction that a top-level meeting might be productive of real advantages if the time and circumstances were well chosen. This view was, as you know, expressed in a unanimous resolution by the House of Commons last year I cannot feel, however, that at this juncture any negotiation with the Soviets about a four-Power meeting, even though conditional on the agreements having been previously ratified, would help our common cause. Weakness makes no appeal to the Soviets. To mix up the process of ratification with what might well follow soon afterwards would very likely dilute both firmness and conciliation. The sooner we can get our united ratification, the sooner the top-level four-Power conference may come.

Although we have every sympathy with you in your difficulties and admiration for your exertions, the fact should be accepted that I and my colleagues are wholeheartedly resolved that there shall be no meeting or invitation in any circumstances which we can foresee between the four Powers, either on the Foreign Secretaries level or on that of the Heads of Governments, until the London-Paris agreements have been ratified by all the signatories In this we are in the closest accord with the United States. I cannot believe there is the slightest chance of any change of attitude on this point in either of our two countries Indeed, I fear that an indefinite process of delay may well lead to the adoption of other solutions which are certainly being studied on both sides of the Atlantic.

I, myself, am very much opposed to the withdrawal of all American and British troops from the Continent. You may count on me to oppose to the best of my ability the strategic conception known as 'peripheral.' On the other hand I should feel bound, whether as Prime Minister or as a private member, to support the policy known as 'the empty chair,' although this would involve large changes in the infra-structure of NATO, both military and political. I feel that the United States, with their immense superiority of nuclear weapons, and acting in association with Great Britain, the British Commonwealth, and the German Federal Republic, will be strong enough, at any rate during the next few years, to afford to the Benelux countries and our other allies, for whom we have a deep regard, and also the German Federal Republic, to whom we are bound in honour, a definite and substantial security based on physical and moral deterrent power.

In this breathing-space much may be achieved. But having ever since 1910 worked and fought with and for France, for whose people I have a deep affection, I should feel the utmost sorrow to see her isolated and losing her influence with the rest of the free world. I hope indeed that it will fall to you to save your country from this evil turn of fortune. . . ."

At the opening of the Council of the Republic's debate, M. Edgar Faure (the Prime Minister) stressed—in reply to a question put to him—that any statement made by any member of the Government would commit the Government as a whole, and that he would never agree to act on behalf of a divided Administration. The *rapporteurs* of the various Commissions then presented their reports, the most important of which were those of the Foreign Affairs, Defence, and Industrial Production commissions.

M. Michel Debré (Gaullist) gave three reasons for the majority decision of the Foreign Affairs Commission in favour of ratifying the Bills providing for German rearmament, the ending of the occupation regime, and Germany's membership of the W.E.U. and the NATO: (1) the recognition of German sovereignty was necessitated by the evolution of the international situation since the end of the war, and "confirms an existing state of affairs rather than creates a new one"; (2) Western Germany's adherence to the North Atlantic Treaty linked her with the Western world, (3) the W.E.U., which was founded on the basis of an association of European countries, including Great Britain, maintained the basis of the French Union and thereby linked French Africa with the destiny of the European countries.

"If a country has attained political stability as Germany has done," M. Debré said in his report, "and if within a few years it overcomes its misfortunes and miseries by an immense effort of industrial expansion, there can be no question of settling its political status without its consent. Germany can no longer be neutralized, and her fate can no longer be determined without the agreement of her people." German rearmament, M. Debré continued, certainly involved a danger, but Germany was "in a circle of countries so numerous and powerful that the risks of domination by her were very small." Those who argued that the links which bound Germany to the Atlantic community and the W.E U. were weaker than those under the E.D.C. Treaty forgot the power which Germany would have had in a small and restricted European political community.

The problem, however, was not only a military but also a diplomatic one, and negotiations with the Soviet Union were as important as the defence of the West against any future menace from the East. Military solidarity alone would not suffice unless it was the expression of a political solidarity, and European solidarity would lose much of its *raison d'être* if it did not lead to a solidarity of outlook with regard to the principal world problems. In this connexion M. Debré asserted that France, despite her membership of the Atlantic Pact, had "for years been isolated and misunderstood in Indo-China" and was "today isolated and misunderstood to a large extent in Africa." He therefore called for a common NATO policy in the interests of France and Western Europe alike, both in the Far East and in Africa

As regards the guarantees contained in the London and Paris agreements, M Debré said that great uncertainty still existed about their application, but that the best guarantee could be found in Atlantic solidarity. As the unity of the Atlantic alliance was one of the safest guarantees of Soviet concessions, it was France's duty to uphold the alliance in the interests of an agreement with the East

M. Debré concluded his report on a personal note which recapitulated French doubts and hesitations about the rearming of Germany, as well as his final conviction about the necessity of that step. "Doubts and criticisms spring up within me," he wrote. "No road seems to be sure, no solution seems to be ideal But having studied all that could be studied and heard all that could be heard, I have reached the conclusions laid down in this report. The sovereignty of Western Germany, her entry into the Atlantic alliance, and the organization of a Western European Union are measures imposed by the present state of the world, of our continent, and of France"

The doubts of the Foreign Affairs Commission, M Debré added, had been allayed by what M. Pinay and M. Faure had told them about the impossibility of France's seeking international negotiations if the Paris agreements were not passed. The Commission had therefore rejected all amendments and delays, but desired assurances from the Government on the following questions during the interval between the ratification of the treaties and the deposition of the instruments of ratification: the measures to be taken as regards the functions of the W.E.U. armaments agency; the new Franco-Saar economic convention; the fate of the Röchling steel works; the holding of a four-Power conference with the Soviet Union; and the widening of the NATO to cover a joint policy of its members outside Europe, especially as far as French North Africa and the Middle East were concerned.

M. Pinton (*Gauche Démocratique*), reporting on the Saar agreement, also expressed "serious anxieties," but questioned whether any better result could have been achieved. On the political side the new Saar Statute did not seem to be definitive because it would remain in force only until such time as a German peace treaty was signed. Moreover, those parties in the Saar which were hostile to the Statute were to be given full freedom. It must be recognized (M. Pinton emphasized) that France had accepted the principle that the Saarlanders should pronounce freely upon the Statute, which would be submitted to them. After discussing the discrepancies in the French and German interpretations of the Saar agreement, as shown by Dr. Adenauer's statements and the memoranda accompanying the German and French ratification Bills, M. Pinton called upon the Government to reaffirm the French thesis.

M. Armengaud (Ind. Republican), for the Industrial Production Commission, declared that all the good intentions contained in the treaty would be in vain without a European armaments pool. The Government had asked them to vote a motion rather than to table a formal amendment to the ratification Bills, but his experience had been that whenever Parliament had voted a motion it had always been without result Thus, at the time of the creation of the European Coal and Steel Community, precise undertakings had been given by the Government with regard to the canalization of the Moselle and the deconcentration of the Ruhr industry, but none of these undertakings had been kept. [Here **M. Pinay** intervened to protest against M. Armengaud's assertion, and to point out that the Government then in power had only been unable to implement its promises because it had been overthrown. He added that he had again raised the question of the Moselle with Dr. Adenauer and hoped rapidly to reach an agreement, and pointed out that any amendment suspending the application of the Paris agreements would make future discussions with France's allies exceedingly difficult.]

M. Armengaud, continuing, said that he was not suggesting that there was any alternative to an Atlantic policy, but stressed that such a policy should not result in "economic degradation" for France. He added: "The Atlantic club? All right! But on condition that the old members do not cheat, as they have done in favouring Germany before France. To *Rule Britannia* and *Deutschland erwache* we should reply, *France reveille-toi*!"

The resumed debate on March 24 was marked by a forceful intervention by M. Faure, following two speeches by Senators from Eastern France. **M. Kalb,** a Gaullist Senator representing the Haut-Rhin *département* (Alsace), declared himself in favour of ratifying the London and Paris agreements. Recalling that he spoke on behalf of a region which had twice suffered from German oppression, and that he and his friends had been totally opposed to the E.D.C. Treaty, he declared that whilst he could neither forget nor resign himself to the past, he was aware that the past conditioned neither the present nor the future. "We must have a wider vision," he declared, "and be able to break loose from our own sensitivity." He would therefore vote for the agreements, but would insist that the Government should bring about as soon as possible a four-Power conference leading towards peaceful co-existence.

M. Pinchard (Ind. Republican, Senator for the Meurthe-et-Moselle *département*), on the other hand, made an impassioned speech against ratification, expressing serious doubts about the treaties from the military point of view and declaring that the Prime Minister's "smooth and diabolic plea" to the Commissions had not convinced him. After declaring that "foreign blackmail" had not prevented the National Assembly from rejecting the E.D.C. treaty, M. Pinchard said that it was time that France's allies ceased exercising upon her a pressure that was completely contrary to the treaties

which they had signed He added . " Having gone from scuttle to scuttle and from renunciation to renunciation, are we now willing to yield everything to avoid isolation ? "

Refuting the Government's contention that the London and Paris agreements would link Western Germany more closely with the West, M. Pinchard said that he could not see why a rearmed Germany should be easier to keep within the Western camp than a disarmed Germany. The arming of Western Germany, he asserted, would only lead to an armaments race with Eastern Germany, into which the countries of a divided Europe would inevitably be drawn Moreover, a new war would inevitably be an atomic war, and in these circumstances the new German divisions were not indispensable After asking whether France could forget the experiences of the inter-war years and the difficulties of limiting German rearmament, M. Pinchard concluded with a strongly emotional warning of the irrevocable dangers of rearming the Germans, in which connexion he evoked the memories of France's wartime sufferings and the immutability of the German character.

M. Faure, intervening with an impromptu speech, rejected M. Pinchard's assertion that there had been any threats or blackmail on the part of the Allies. Had such threats been made, he would have been the last to accept them. But, he asked, was it surprising that the " constant hesitations and tergiversations of French policy " had upset France's allies ? " Let us not forget the past," M Faure declared. " Who asked for the Atlantic pact—not America, but Europe. We were afraid at the time that there would not be sufficient American forces on the Continent, or that they might arrive too late Since 1950 our policy has been an example of tergiversations They are explicable and honourable, but can one expect that they were understood 4,000 miles away as well as within our parliamentary precincts ? All French Governments have expressed their fear of [American] peripheric strategy. All have accepted the necessity of German rearmament. To make this rearmament acceptable, we demanded the guarantee of European integration Our allies accepted it, and as a result the E D.C. treaty was worked out Then, at the end of a dramatic debate, the treaty signed by the French Government was rejected by Parliament after two years of hesitation."

After reminding the Council of the Republic that the Soviet Union had rearmed Eastern Germany without being entitled to do so, M. Faure asked " Can we in the circumstances deny the same right to those countries with whom we are closely linked ? . . There comes a moment where things have got to reach a decision. . . We cannot always change our views after we have signed. M. Mendès-France strongly demanded, steadfastly sought, and with difficulty obtained, an agreement probably not as good as expected, but not as bad as some of you think But now we must come to a decision. If France now changes her mind, it will not be I who will tell the Americans."

Turning to Franco-German relations, the Prime Minister recalled his memories as a child at Verdun during World War I and his experiences as a member of the French prosecution at the Nuremberg trials after World War II He himself was therefore entitled to feel apprehensive. " But," he declared, " I have never thought that Germany was a nation of criminals. . . . Let us therefore seek co-existence. Times change. There was a time when England was our hereditary enemy. After that it was Germany. I believe that we have no more hereditary enemies and that the Franco-German dispute has no longer any world importance. There are far deeper shadows hanging over us now . . We are dealing now with a democratic German Government. Let us beware lest it be replaced tomorrow by another to which we could not refuse anything. Germany is rapidly developing, the more so as she does not have to bear any defence expenditure. Can you deny sovereignty to such a prosperous country ? But sovereignty implies the right to have an army Certainly I would have preferred to have seen Germany as the first country to be disarmed rather than the last country to be rearmed, but if we have reached the present stage, whose fault was that ? "

France had always been on the side of disarmament (M. Faure continued), but in the position as it had developed in the ten years since the end of the war, the only thing they could do now was to limit armaments equally. Yet it was impossible to impose such a limitation unilaterally, and the essential guarantees accompanying this process could only be on a contractual basis. Germany had accepted the obligation not to raise more than 12 divisions without French agreement. She had also agreed to limit her stock of fissile materials In conclusion, M Faure said that it was a question not of having confidence in Germany but in having confidence in themselves ; he called upon France to free herself from her " interiority complex," and expressed his profound conviction that French policy must be " clear, straight, and unequivocable."

When the debate was resumed on March 25, five amendments were put down to the Bill relating to the W.E U. . (1) an amendment by MM. Pinton and Restat (*Rassemblement des Gauches*) which proposed the conclusion before Aug 1, 1955, of a four-Power agreement on disarmament and on the German and Austrian problems, as well as an agreement in principle on the European armaments production agency ; (2) one by M. Armengaud (Ind. Republican), on behalf of the Industrial Production Commission, making the deposition of the ratification instruments dependent on the conclusion of an agreement on the Armaments Agency, as mentioned above ; (3) one by M Marcilhacy (Ind. Republican), likewise demanding the prior conclusion of an agreement on the armaments agency , (4) one by M. Chaintron (Communist) demanding, in the form of a " prejudicial question," the rejection of the Paris agreements ; and (5) one by M Le Guyon (*Rassemblement des Gauches*) and ten other Senators demanding a prior assurance that no war criminals would be given posts in the new German Army. In addition, M. Coudé du Foresto (M.R.P.), also on behalf of the Industrial Production Commission, put down an amendment to the Bill relating to the Saar agreement, making the deposition of the ratification instruments dependent on the conclusion of a new Franco-Saar convention on economic co-operation

The debate on March 25 was opened by **M. Laffargue** (*Gauche Democratique*), a strong advocate of ratification. He was followed by **M. Debu-Bridel** (Gaullist), one of the most determined opponents of the agreements, who warned France against giving Germany once again " a dose of militarism " which, he said would destroy " the tendencies of the present German youth to return to the tradition of Luther, Kant, Goethe, and Karl Marx "

M. Pinay, who followed, emphasized that they could not remain passive before the latent menace which the Communist *bloc* in Europe and Asia exercised by its weight on Western Europe It was essential to reinforce the Western world and assure its unity of action, which was " a prerequisite for co-existence " He added : " It is an error to imagine that France has to choose for or against German rearmament, because if this rearmament is not carried out with us it will be carried out without us, and perhaps even against us." In the Government's view, any delay in ratification and any suspensive conditions would, in the present international situation, be " equivalent to an outright rejection " France's allies now expected from her a clear decision—a " yes " or a " no." The time for " prejudicial questions " had passed, and any such move would be interpreted as " a device to mask our incapacity to take a decision."

Referring in particular to the demand for a prior agreement on a supranational armaments production agency, M Pinay pointed out that insistence on this would create the " same *impasse* which has hampered the negotiations in London " [i e in the four-Power sub-committee of the U.N. Disarmament Commission] He added, however, that he had received from Mr Dulles a promise of the closest possible U.S co-operation, not only with the armaments agency envisaged under the Paris agreements, but with any other agency or organ which might eventually be set up to deal with the control of armaments

As regards Franco-German relations, M. Pinay announced that he had received a communication from Dr. Adenauer offering bilateral discussions on waterways along the Franco-German frontier, which would include negotiations on the canalization of the Moselle. As to the Saar, M Pinay maintained that there was no point in continuing the discussions about the interpretation of the Franco-German agreement, since the main thing was to get the European institutions in the Saar going and to make them work. He confirmed, however, that, in the Government's view, the entry into force of the Saar agreement was dependent on the conclusion of a new economic convention with the Saar, as well as on a satisfactory settlement of the problems presented by the liquidation of the Rochling steel works, on which negotiations were still in progress.

Turning to the policy of the Soviet Union, M Pinay pointed out that had she wished to negotiate she could have done so. However, the U.S S R had made no move but had waited. " Why ? " he asked. " Because she believed that our alliance would be broken up And when, contrary to her expectation, this alliance was reaffirmed, Moscow resumed contact with us on the very same day the Paris agreements were signed. In actual fact, the Soviet Union is not going to accept negotiations until she has lost all hope of dividing us As far as we are concerned, we are ready to resume discussions and to take the necessary initiative to that effect We do not pretend to take up a ' position of strength ' ; for this we would have to wait too long. We only wish to eliminate a position of weakness and to replace it by a position of cohesion."

In conclusion, M. Pinay emphasized the fourfold guarantees offered by the Paris agreements : (1) juridical guarantees in the Western European Union and the armaments control agency ; (2) material guarantees by NATO control of supplies and communications ; (3) strategic guarantees in the shape of the Supreme Allied Command ; and (4) political guarantees by the solemn undertaking of the German Federal Government never to resort to force for national aims—guarantees which were backed by the presence of British and American forces on the Continent of Europe.

On March 27 M. Faure made a final declaration reiterating his earlier arguments in favour of unconditional and immediate ratification. To meet the various arguments and doubts expressed during the debates, he produced a written declaration of policy which had received the unanimous approval of the Cabinet earlier in the day. This declaration listed five essential undertakings on the part of the Government in connexion with the Paris agreements, as follows :

(1) The Government considered that the Franco-German agreement on the Saar should enter into force only after the conclusion of an economic agreement between the two countries on the basis recently agreed by them, including a satisfactory settlement of the question of the Röchling steel works.

(2) The Government intended that the Western European Union should be completed by an armaments production organization assuring the best possible utilization of the resources of member-countries. The Government's aim, the realization of which it would pursue " vigorously," was the creation of a " European agency financed by a common budget, and exercising real powers in matters of research, production, and the distribution of external aid."

With a view to achieving this objective the Government would propose to the other W.E.U. member-countries the immediate creation of " proper agencies for the development of the closest possible co-operation between them." It would set on foot negotiations to bring about the equalization of the economic and social

conditions affecting production in the various member-countries, and would work for the setting-up of "multilateral groups with real powers of decision," together with those member-countries willing to enter into such arrangements The Government considered that "a true European Armaments Community constitutes the first indispensable stage in the building of a united Europe, and will be the test of Atlantic unity as well as of the aims which have led to the creation of the Western European Union."

(3) The Government would seek a speedy definition by the Council of W E U of the proposed controls on weapons of mass destruction.

(4) The Government would, without delay, point out to the members of NATO the need for strengthening the links between them, in accordance with Article 2 of the North Atlantic Treaty The NATO should not be limited to military problems alone but should be a source of political, economic, and social solidarity between its members both inside and outside Europe, notably in the Mediterranean and Africa, "thus creating a true European community with proper respect for the rights and obligations of each member-country in the overseas territories under its control"

(5) The Government would seek the convening of a four-Power conference at the earliest possible date, and had already approached its allies with a view to the renewal of negotiations with the Soviet Government It would take any useful initiative in working out solutions which could obtain the agreement of the four participating Powers, and would spare no effort for the success of the London discussions on disarmament

After the "prejudicial motion" moved by M. Chaintron (Communist) had been rejected without a division, the Council also rejected M. Pinton's amendment, by 183 votes to 115, and M. Le Guyon's amendment, by 185 votes to 102. M. Armengaud and M. Coudé du Foresto withdrew their amendments in view of the undertakings contained in the Government's written declaration.

At the end of the debate the Council adopted, by a show of hands, the following resolution which had been proposed by the Foreign Affairs Commission in response of M. Faure's written undertakings:

"The Council of the Republic takes note of the Government's declarations, and especially of the written statement in which it has set out the principal foreign policy directives which it intends to pursue By this acceptance the Council considers that a true contract has been concluded between the Government and Parliament, which—in accordance with the undertakings given by the Prime Minister—will be kept informed of the steps to be undertaken by the Government without delay, and of the results of those steps."

The Council then adopted the four Bills by the following majorities.

(1) The protocol on the amendments to the Brussels Treaty and the setting-up of the Western European Union: by 184 votes to 110.

(2) The ending of the occupation regime and the convention regulating the continued maintenance of Allied forces on German territory: by 234 votes to 75.

(3) The admission of the German Federal Republic to NATO: by 200 votes to 114.

(4) The Franco-German agreement on the Saar: by 217 votes to 92.

In the vote on the Western European Union, which was the most controversial, the Government was supported by 47 Socialists (out of 58), 47 Independent Republicans (out of 60), 46 members of the *Rassemblement des Gauches* (out of 71), 17 M.R.P Senators (out of 26), 11 Gaullists (out of 47), 8 *Paysans* (out of 19), 5 Dissident Gaullists (out of 6), and 3 Overseas Independents (out of 14).

The 110 opposition votes comprised 30 Gaullists, 21 members of the *Rassemblement des Gauches*, the 16 Communists, 11 Overseas Independents, 10 Socialists, 9 Independent Republicans, 5 *Paysans*, 4 M R.P. Senators, 3 *non-inscrits*, and one dissident Gaullist. Sixteen Senators (including 5 Gaullists and 5 M.R.P.) abstained, and six did not take part in the vote.

The Bills were signed by President Coty on April 3 and were promulgated on April 8, the completion of the French ratification procedure being warmly welcomed in London, Washington, and Bonn.

The two conditions laid down by M. Faure for the entry into force of the Franco-German economic agreement on the Saar—a new Franco-Saar economic convention, and a settlement of the Röchling steel works question—had been satisfactorily achieved in the discussions between M Pinay and Dr. Adenauer in Bonn on April 29-30 and in the subsequent signing of a new economic convention between France and the Saar (see 14223 A).

Ratification by U.S. Senate.

The Paris agreements restoring full sovereignty to the German Federal Republic, ending the Allied occupation, admitting Western Germany to NATO, and authorizing the creation of West German armed forces within the NATO framework, were approved by the U.S. Senate on April 1 by 76 votes to two, and signed by President Eisenhower on April 7.

Before going to the full Senate, the agreements were approved by the Senate Foreign Relations Committee on March 31 by 14 votes to one (Senator Langer, Republican, North Dakota). During the Senate debate on April 1, **Senator Walter F. George** (Democrat, Georgia), chairman of the Foreign Relations Committee, expressed the conviction that they would improve the chances for the unification of Germany, and would also enhance the prospects of a "Big Four" or "Big Five" meeting that would "produce something more constructive and helpful than stalemate and propaganda" He believed that the treaties carried "practical workable safeguards" against what he described as the historically justified fear of a resurgence of German militarism **Senator Alexander Wiley** (Republican, Wisconsin), the former chairman of the Foreign Relations Committee, said that the treaties "mean greater security for America, improved prospects for world peace, and another opportunity to put into effect the law of self-preservation, we are seeking to build a security system, and that is all there is to it" **Senator Herbert H. Lehman** (Democrat, New York), who supported the treaties "with grave doubts and reservations," said that he was still unconvinced that Germany was yet "truly democratic" and that she might not revert to totalitarianism in future years, if Germany should once more become a military menace, he added, America would "never be forgiven by the peoples of the world"

The two dissenting votes were cast by Senators Langer and Malone (Rep, Nevada), both prominent isolationists

The documents signed by President Eisenhower fell into three categories: (1) the conventions granting sovereignty to the German Federal Republic and ending the Allied occupation; (2) the protocol on the admission of Federal Germany to NATO; (3) the convention with the Federal Republic providing for the continued stationing of British, French and U.S. forces in Western Germany.

Belgian and Luxemburg Ratification.

The Belgian Senate approved the Paris agreements on April 6 by 142 votes to two, with one abstention (an Independent Catholic) and 30 senators absent. The Social Christian (Catholic), Liberal, and Socialist senators voted in favour of the agreements, the two dissenting votes being cast by Communists. M. Paul Henri-Spaak (the Foreign Minister) declared that the agreements strengthened the NATO and would tend to prevent Germany from again becoming an aggressive power.

The Belgian Chamber of Deputies had approved the agreements on Jan. 20, 1955, by 181 votes to nine, with two abstentions—see 14101 A.

The unicameral Parliament of Luxemburg, meeting on the same day (April 6), approved the agreements by 48 votes to three (Communists)

Ratification by Denmark.

The Danish *Folketing* approved Western Germany's admission to the NATO under the Paris agreements on April 19, the voting being 145 to 24. The three largest parties -the Social Democrats, Conservatives, and Agrarians- voted for ratification, whilst the opposition consisted of the *Venstre* (Radicals), the Communists, and the *Retsforbund*, which asked that the Bill should be submitted to a referendum. The vote confirmed an earlier decision by the *Folketing* on Oct. 19, 1954, which had authorized the Government to sign the protocol on the admission of Western Germany to NATO.

Ratification by the Netherlands.

The Lower House of the Netherlands States-General approved the Paris agreements on March 30 by 71 votes to six, and the Upper House on April 28 by 32 votes to two, the dissenting votes in both Houses being cast by the Communists. There were no abstentions in the Lower House, but 16 in the Upper House. Holland, though the first country to ratify the defunct E.D.C. project, was the last of the 16 NATO countries to approve the Paris agreements, the States-General having postponed its debate until the agreements had been approved by the French and Federal German Parliaments.

The Foreign Minister, Mr Beyen, in statements in both Houses, said that the Government recognized the dangers inherent in a rearmed Germany, the threat of a revival of German militarism, and the possibility of "the provocation of a general conflict in connexion with the reunification of Germany." He felt, nevertheless, that the NATO and W E.U. arrangements gave full safeguards against any resurgence of German militarism, and that history had shown that the German problem could only be solved by admitting Germany into the community of Western nations on a footing of full equality.

The London and Paris agreements had earlier been ratified by the national Parliaments of the United Kingdom (see 13917 A), Canada (14106 A), Western Germany (14169 A), Italy (14116 C, 13974 D), Norway (13931 C), Portugal (14008 C), Greece (14001 B), Turkey (14126 C) and Iceland (13942 G), as well as by the French National Assembly (13965 A) and the Belgian Chamber of Deputies (14101 A). The action of the French Council of the Republic, the U.S. and Belgian Senates, and the Dutch, Danish, and Luxemburg Parliaments completed all the ratification processes.—(Le Monde, Paris - Le Figaro, Paris - New York Times - La Nation Belge, Brussels - Algemeen Handelsblad, Amsterdam - Politiken, Copenhagen)

A. INDIA. — Marriage and Divorce Legislation. - Abolition of Polygamy. - The Special Marriage Act and Hindu Marriage Act.

Two important measures reforming the Hindu marriage and divorce system were enacted by the Indian Parliament in recent months, and are described below. They were . (1) the Special Marriage Act (passed by the Indian Parliament on Sept. 23, 1954), which authorized divorce by mutual consent for persons who had been married in a civil ceremony ; and (2) the Hindu Marriage Act (passed on May 5, 1955), which abolished polygamy and granted the right of divorce to Hindu women.

The Special Marriage Act. This Act provided that Indian nationals and persons resident in India might be married by a civil ceremony irrespective of their religion, and that Indian diplomatic and consular officials might solemnize and register civil marriages between Indians resident abroad It permitted marriages between persons of different religions and castes , fixed the minimum age for civil marriage at 21 for men and 18 for women ; allowed persons already married by religious rites to register their marriages under the Act, and thus to qualify for a civil divorce , introduced mutual consent as a ground for divorce , and stipulated that a petition for divorce might not be presented within three years of marriage, and that divorced persons would not be able to remarry until at least one year after the divorce had been obtained

A clause providing that a petition for divorce might be presented by either party if the respondent had lived apart from the petitioner for a year, or if the parties had refused to live together and had agreed to dissolve the marriage by mutual consent, was introduced as an amendment in the Council of States, and passed by acclamation In the House of the People an amendment reducing the minimum marriage age for women from 21 to 18 was adopted by 118 votes to 106 In both Houses voting on the various clauses of the Bill did not follow party lines , e.g., the amendment reducing the minimum marriageable age for women was introduced by two Communists and supported by many Congress members, including some members of the Cabinet

The Bill was given a third reading in the House of the People on Sept, 17, only one member opposing In its amended form it was approved by the Council of States on Sept. 23, received President Prasad's assent on Oct 9, and came into operation as from January 1, 1955.

The Hindu Marriage Act This Act, which codified and reformed the law relating to Hindu marriages, made monogamy (already enforced in certain States) both general and compulsory. It fixed the minimum age for sacramental marriage at 18 for youths and 15 for girls , and authorized divorce at the instance of either party on the grounds of adultery, idiocy or lunacy, the obtaining of consent by force or fraud, or continued impotence

The Bill (originally designated the Hindu Marriage and Divorce Bill) was first introduced into Parliament on Dec 11, 1952, and after prolonged delays was referred to a joint select committee This body introduced numerous amendments, the most important of which provided for the payment of alimony by a wife possessed of independent means to a husband who had no independent source of income Despite opposition from a number of Communist and women members, who contended that it was unfair to exact alimony from women when they did not enjoy equal economic rights with men, the amendment was adopted by the Council of States, which approved the Bill unanimously on Dec 15, 1954.

When the Bill was introduced into the House of the People on April 27, 1955, it was strongly opposed by Mr. Deshpande (Hindu Mahasabha), on the grounds that it sought to destroy the age-old traditions and culture of Hindu society and the sacramental character of Hindu marriage In reply, Mr Nehru declared that it was not "sacramental" for two people who hated one another to be "tied to each other for life," and emphasized that Indian women must be given social as well as political and economic freedom. On the controversial clause granting husbands the right to claim alimony, the Government gave an assurance that it would be reviewed at the first suitable occasion. The Bill was passed by acclamation on May 5 (only Mr. Deshpande opposing), and received the Presidential assent on May 19.

The Hindu Marriage Bill was intended to be one of a series covering the whole field of Hindu law relating to marriage, inheritance, women's property rights, minority, guardianship, and adoption. The Hindu Code Bill, a comprehensive measure dealing with these questions, was originally drafted by the former Law Minister, Dr. Ambedkar, but met with strong opposition in the Constituent Assembly from a section of the Congress Party. After two years' discussion the Bill was accordingly dropped after only four of its clauses had been passed, and Dr. Ambedkar resigned from the Cabinet in 1951 in protest (see 11800 A). Mr. Nehru, however, made the Bill a leading issue in the 1951-52 general election campaign, and, after being returned to power, decided to re-submit it to Parliament in the form of several independent Bills, of which the Hindu Marriage Bill was the first to be adopted.

B. UNITED STATES. — Pulitzer Prize Awards.

The annual Pulitzer Prize awards (for 1954) were announced on May 2 by the trustees of Columbia University, New York, the recipients being as follows : (*a*) for literature—William Faulkner, for his novel *A Fable*, an allegory set on the Western front in the First World War ; (*b*) for drama—Tennessee Williams, for his play *Cat on a Hot Tin Roof*, dealing with life in the Mississippi delta ; (*c*) for history—Paul Horgan, for his historical work *Great River, the Rio Grande in North American History* ; (*d*) for biography—William S. White, for his book *The Taft Story*, a biography of the late Senator Robert A. Taft , (*e*) for music—Gian-Carlo Menotti, for his opera *The Saint of Bleecker Street*, set in New York's "Little Italy" ; (*f*) for poetry—Wallace Stevens, for his *Collected Poems*.

William Faulkner (57), born in Mississippi, was awarded the Nobel Prize for Literature in 1949 and is one of America's best-known novelists Tennessee Williams (41), also a Mississippian, is one of the leading American dramatists, and had been awarded the Pulitzer drama prize in 1947 for *A Streetcar named Desire*. Paul Horgan (52), born in Buffalo, was for 16 years librarian of the New Mexico Military Institute, and has written many books of historical research, fiction, essays and short stories William S White (48), born in Texas, has been on the staff of the *New York Times* since 1945. Gian-Carlo Menotti, the Italian-born composer and lyricist, received the Pulitzer music prize in 1950 for his opera *The Consul* Though resident in the U S.A for nearly 30 years, he is an Italian citizen Wallace Stevens (75), vice-president of a Hartford (Connecticut) insurance company, has written many poetical works

The annual award for meritorious public service by a newspaper (a gold medal) went to the Columbus (Ga.) *Ledger* and *Sunday Ledger-Enquirer* for exposing corruption in Phenix City, Alabama. The prize for national reporting was awarded to Anthony Lewis (28), a staff member of the *Washington Daily News*, for a series of articles which led to the reinstatement of Abraham Chasanow, who had been unjustly dismissed from the Navy Department as a security risk. The prize for international reporting went to Harrison E. Salisbury (47), of the *New York Times*, for a series of articles based on his six years as correspondent of that newspaper in the Soviet Union.

C. ISRAEL. — The Queen Elizabeth Forest.

In commemoration of the Coronation of Queen Elizabeth II of Great Britain, the nucleus of a forest of 250,000 pine trees, to be known as the Queen Elizabeth Forest, was planted on May 3 on 250 acres of a Galilean hillside overlooking the Valley of Jezreel. The inaugural ceremony took place in the presence of the Prime Minister of Israel (Mr. Sharett), the British Ambassador (Mr. Nicholls), the Canadian Ambassador (Mr. Macdermot), and the Australian Chargé d'Affaires (Mr. Bullock). The following message from H.M. Queen Elizabeth was read by Mr. Nicholls :

"Jewish subjects of the British Commonwealth have enjoyed freedom for their faith for many centuries Throughout the centuries their number grew, until today they number over 800,000, among them men and women in every walk of life. Their devotion to the Crown is only matched by their devotion to the faith of their forefathers May this forest flourish as a symbol of the friendship which links my people with the people of Israel."

President Ben-Zvi of Israel sent a message expressing the hope that the occasion would strengthen the traditional ties between the peoples of Israel and Britain, and of the British people with "the land of the Bible."

The Queen Elizabeth Forest—situated near the King George V Forest, planted many years ago and now flourishing—is a gift from the Jewish communities of the United Kingdom and the Commonwealth and Empire Lord Nathan, who represented British Jewry at the ceremony, pointed out that contributions, mostly in small amounts, had come from Jewish subjects of her Majesty throughout Britain, the Dominions, the Colonies and Protectorates. One section of the forest will be named after the Duke of Edinburgh, another after Prince Charles, and a third after Princess Anne.—(Times)

D. INDONESIA. — "De facto" Recognition of Indo-Chinese States.

It was announced in Jakarta on April 6 that the Indonesian Government had decided to accord *de facto* recognition to Cambodia, Laos, North Vietnam, and South Vietnam ; that Consulates would be established in the capitals of each of the four States ; and that the question of *de jure* recognition would be decided upon after the holding of the general elections in Vietnam as provided in the Geneva agreements.

(Indonesian Embassy, London)

A. PAKISTAN. — The Constitutional Crisis. - Dissolution of Constituent Assembly declared Valid by Federal Court. - Temporary Revalidation of Invalidated Laws by Governor-General. - Government's Proposals for Summoning of New Constituent Assembly. - Electoral Reform Commission.

The constitutional crisis in Pakistan arising from the dissolution of the Constituent Assembly by the Governor-General, Mr. Ghulam Mohammad, was resolved on May 10, when the Federal Court of Pakistan ruled that the Governor-General had power to dissolve the Assembly, to convene a new Constituent Assembly, and to validate Acts of the previous Assembly during the interim period before the new Assembly convened. The main developments in the constitutional crisis since March 27 are summarized below.

The Federal Court's ruling of March 21 that the Governor-General's assent was necessary to all legislation passed by the Central Legislature (see 14121 A) invalidated 44 Acts which had not received his assent, as well as numerous Orders and judicial decisions based upon those Acts. The most important constitutional and legal consequences of this ruling were subsequently outlined by Mr. H. S. Suhrawardy (the Law Minister), in a press statement on April 18, as follows :

(1) An Act which had extended to March 31, 1949, the Governor-General's powers to pass constitutional enactments by ordinance became invalid, as did all ordinances enacted during that period. In consequence, the insertion into the Government of India Act (1935) of Section 92 (A), which permits the establishment of Governor's rule in a Province, was invalidated, and all Acts made by the Governors of the Punjab, Sind, and East Bengal while those Provinces were under Governor's rule therefore became null and void

(2) As the Constituent Assembly had changed its composition in 1950 by laws which did not receive the Governor-General's assent, it could be maintained that it had become an illegal body, and that all Acts subsequently passed by it were invalid.

(3) The Constituent Assembly had amended the Government of India Act to introduce adult suffrage in Provincial elections, and to increase the number of seats in the Provincial Assemblies. As this had not received the Governor-General's assent, it could be maintained that all Acts passed by the Provincial Assemblies since that time were invalid

(4) The Act applying the criminal law and procedure of Pakistan to those parts of Baluchistan which were not part of British India, and all criminal proceedings taken under the Act automatically became invalid.

(5) The Act abolishing appeals to the Privy Council in London became invalid.

In order to meet this situation, Mr. Ghulam Mohammad proclaimed a state of emergency on March 27 and issued an Emergency Powers Ordinance which, *inter alia*, legalized retrospectively 35 of the 44 Acts invalidated by the Federal Court's decision, and empowered him to take all necessary steps for the purpose of framing a Constitution (see 14121 A). On April 12, however, the Federal Court ruled that only the Constituent Assembly could draw up a Constitution for Pakistan, and that the Governor-General had no authority to re-validate constitutional measures rendered void by lack of his assent, or to make a Constitution by ordinance.

This ruling, as a result of which the legal position with regard to constitutional measures [including Section 92(A)] reverted to that obtaining after the Court's previous judgment, was given in upholding an appeal by a certain Yusuf Patel against the validity of the Control of *Goondas* Act, passed by the Governor of Sind in 1952 while the Province was under Section 92(A) rule.

In conformity with the Federal Court's ruling, Mr. Ghulam Mohammad issued an Order on April 15 summoning a Constituent Convention to meet at Murree on May 10 in order to validate the measures in dispute and to draw up a Constitution for Pakistan.

The Order laid down that the Convention would consist of 60 members, 30 of whom would be elected by the East Bengal Assembly and 23 by the Punjab, Sind, and N.W. Frontier Province Assemblies ; the remaining seven members, representing the Tribal Areas, Baluchistan, the Baluchistan States Union, the Frontier States, Khairpur State, Bahawalpur State, and Karachi, would be nominated by the Governor-General. All Pakistani citizens over 21 (subject to certain conditions such as soundness of mind, etc.) would be eligible for membership of the Convention, which would be elected by secret ballot.

It was also provided that at the first meeting a person appointed by the Governor-General would preside until a President had been elected by the Convention from among its own members ; that its decisions would be taken on the basis of a majority of those present and voting ; and that, unless dissolved earlier, the Convention would stand dissolved on the expiry of a period of six months from its first meeting.

Mr. Mohammed Ali, the Prime Minister, announced on April 16 that elections to the Constituent Convention would be held on April 30. As a result of representations from minority and other groups, Mr. Ghulam Mohammad announced on April 21 that the elections would be by proportional representation with single transferable vote.

In order to " avoid a possible breakdown in the constitutional and administrative machinery of the country " during the interim period pending the meeting of the Constituent Convention, Mr. Ghulam Mohammad issued a proclamation on April 16 arrogating to himself the necessary powers to validate such invalid laws as were needed to preserve the State and to maintain the rule of law. At the same time he validated retrospectively the 35 laws mentioned in the schedule to the Emergency Powers Ordinance of March 27, and all Orders made under those laws, subject to the report of the Federal Court (see below) and until such time as the Constituent Convention enacted appropriate new legislation.

In addition, the Governor-General took two other steps. (1) he assented to all the laws of the former Constituent Assembly mentioned in the re-validating Ordinance ; (2) he issued two further Ordinances, one of which validated all Acts passed by the Governors of East Bengal, the Punjab, and Sind under Section 92(A) [necessitated by the invalidation of that Section itself], whilst the other precluded the courts from questioning the validity of any Act passed by a Provincial Assembly, or any Orders made under such Acts, on the ground that laws passed by the Constituent Assembly had not received the Governor-General's assent.

As a further step to avoid any action which might be deemed contrary to legal principles, or which might later be declared *ultra vires* by the Federal Court, Mr. Ghulam Mohammad applied on April 18 to the Federal Court (under Section 213 of the Government of India Act, 1935) requesting its advice on the following matters :

(1) " What are the powers and responsibilities of the Governor-General in respect of the government of the country before the new Constituent Convention passes necessary legislation ? "

(2) " The Federal Court having held in Yusuf Patel's case that the laws listed in the schedule to the Emergency Powers Ordinance could not be validated under Section 42 of the Government of India Act, 1935, nor retrospective effect given to them, and no Legislature competent to validate such laws being in existence, is there any provision in the Constitution or any rule of law applicable to the situation by which (*a*) the Governor-General can, by Order or otherwise, declare that all Orders made, decisions taken, or other acts done under those laws shall be valid or enforceable, and (*b*) those laws which cannot without danger to the State be removed from the existing legal system may be treated as part of the law of the land until the question of their validation is determined by the new Constituent Convention ? "

At the same time Mr. Ghulam Mohammad asked the Federal Court for an interim Order restraining all courts—until the Federal Court's report was received—from taking any action on the ground that any law mentioned in the schedule to the Emergency Powers Ordinance was invalid.

The Federal Court granted this Order on the same day, but suggested that the Governor-General should also refer to it for advice on the question of the legality of the dissolution of the Constituent Assembly and on the competence of the proposed Convention to exercise its powers. A second reference seeking the Court's advice on these points was accordingly filed on April 20.

The Court's Order of April 18 stated : " The reference assumes that the Constituent Convention has the authority to validate laws, but the correctness of this assumption may be challenged on the ground that the Convention is an illegal and unauthorized body, because the Constituent Assembly was not legally dissolved. We consider that the basic question in the situation that has arisen is whether the Constituent Assembly was rightly dissolved by the Governor-General, and whether the Constituent Convention has been rightly constituted to be the Legislature of the Dominion. Until this basic question is determined, the position will remain uncertain and will give rise to litigation of every sort. We therefore suggest that his Excellency should refer the following further questions for the opinion of this Court : (1) Whether the Constituent Assembly was rightly dissolved by the Governor-General, and (2) Whether the Constituent Convention proposed to be set up would be competent to exercise the powers of the Constituent Assembly under the Indian Independence Act." If these questions were not referred (the Order added), the reference already made might have to be returned unanswered " because of the futility of the replies, which must necessarily proceed on certain assumptions, the correctness of which may be called in question at any time by anyone."

The hearing of the Governor-General's references opened on April 25 before a full bench of the Federal Court and concluded on May 10, when the Court ruled that the Governor-General had legal authority to dissolve the Constituent Assembly, to summon a new Assembly, and to validate laws retrospectively during the interim period before it met, but not to nominate members to the new Assembly. Mr. Kenneth Diplock, Q.C., appeared for the Government and Mr. D. N. Pritt, Q.C., for the President of the Constituent Assembly, Mr. Tamizuddin Khan. The Court's rulings on the four points under consideration are summarized below.

(1) On the question of the Governor-General's powers and responsibilities before the new Convention passed the necessary legislation, Chief Justice Munir, Mr. Justice Akram, Mr. Justice Sharif, and Mr. Justice Rehman ruled that "this question is too general and cannot be answered." Mr Justice Cornelius held that the Governor-General's powers during the period in question were "those defined and delimited by the Indian Independence Act, 1947, as in force on Oct. 24, 1954."

(2) Chief Justice Munir, Mr Justice Akram, and Mr Justice Rehman held that "in the situation presented by the reference, the Governor-General has during the interim period the power of retrospectively validating the laws listed in the schedule to the Emergency Powers Ordinance, 1955, and all those laws, until the question of their validation is decided by the Constituent Assembly, are during the aforesaid period valid and enforceable as if they had been valid from the date on which they purported to come into force."

Mr Justice Cornelius held that there was no provision in the Constitution and no rule of law applicable to the situation by which the Governor-General could validate those laws, whether temporarily or permanently, and that, in view of the vagueness of the expression "laws which cannot without danger to the State be removed from the existing legal system," no answer could be offered to the second part of the question The Governor-General's powers were sufficient, however, to enable him to stay proceedings in courts other than the Federal Court pending such action as the proposed Constituent Convention might take

Mr Justice Sharif expressed the view that "the Governor-General has only the powers given to him under the Constitution Acts, and these do not extend to validating retrospectively, even for a short period, laws of a constitutional nature."

(3) Chief Justice Munir, Mr Justice Akram, Mr. Justice Sharif, and Mr. Justice Rehman agreed that "the Governor-General, under Section 5 of the Indian Independence Act, has legal authority to dissolve the Constituent Assembly" in view of the following facts stated in the reference "(i) that the Constituent Assembly, though it functioned for more than seven years, was unable to carry out the duty to frame a Constitution for Pakistan to replace the transitional Constitution provided by the Indian Independence Act, 1947, (ii) that in view of repeated representations from and resolutions passed by representative bodies throughout the country, the Constituent Assembly, in the opinion of the Governor-General, became in course of time wholly unrepresentative of the people of Pakistan and ceased to be responsible to them, (iii) that for all practical purposes the Constituent Assembly assumed the form of a perpetual Legislature, and (iv) that throughout the period of its existence the Constituent Assembly asserted that the provisions made by it for the Constitution of the Dominion under sub-section (1) of Section 8 of the Indian Independence Act were valid laws without the consent of the Governor-General."

Mr. Justice Cornelius, in a separate ruling, came to a similar conclusion. He pointed out that the Court had already decided that the Constituent Assembly as mentioned in the Indian Independence Act was the "Legislature of the Dominion" for the purposes of the Act, which also provided for the Governor-General to Act as the Queen's representative for the purposes of the government of the Dominion, and which invested him with all the royal prerogatives (except where barred by express words), including that of dissolving the Legislature Consequently, the Governor-General must be held to possess the prerogative of dissolving the Constituent Assembly The exercise of that prerogative, however, was not a justiciable matter, and the question whether the act of dissolution was "rightly" performed did not therefore come within the Court's jurisdiction

(4) Chief Justice Munir, Mr Justice Akram, Mr. Justice Sharif, and Mr. Justice Rehman held that "the new Assembly constituted under the Constituent Convention Order, 1955, as amended to date, would be competent to exercise all the powers conferred by the Indian Independence Act on the Constituent Assembly," subject to the following provisions "(i) that the correct name of the Constituent Convention is 'Constituent Assembly'; (ii) that the Governor-General's right to dissolve the Assembly can be derived only from the Indian Independence Act; (iii) that the arrangements for the representation of States or the Tribal Areas are . . . made only by the Constituent Assembly and not by the Governor-General, and (iv) that the Governor-General's duty being to bring into existence a representative legislative institution, he can only nominate the electorate and not members to the Constituent Assembly."

Mr Justice Cornelius expressed, in effect, a similar view. He said: "The powers conferred by Section 8 of the Indian Independence Act, 1947, on the Constituent Assembly can only be exercised by a successor-body of the same name, summoned by the Governor General in the discharge of his duty, which arises out of and is complementary to the Order dissolving the Constituent Assembly. The duty of summoning does not involve and could not include the exercise of any political initiative outside the constitutional instruments in force It must be performed in accordance with the basic principles which were expressly followed in the setting-up of the Constituent Assembly of 1947. . . . The new Assembly constituted under the Constituent Convention Order, 1955 . . . would be competent to exercise all the powers conferred by the Indian Independence Act on the Constituent Assembly."

Mr. Ghulam Mohammad, in a message to the nation which was broadcast on May 10 by the Prime Minister, Mr. Mohammed Ali, stated that the Federal Court's decision had cleared the way for the setting-up of a new Constituent Assembly, which would be convened "within the shortest possible time."

Claiming that all the promises and assurances contained in his proclamation of Oct 24 (see 13893 A) had been fulfilled, the Governor-General recalled that the Cabinet had been reconstituted on a broad national basis, irrespective of party affiliations, and that general elections would be held "as early as possible in order that all constitutional and other issues might be decided by representatives of the people." The message continued

"We have been passing through difficult times. They have occasionally necessitated drastic action on my part and on the part of my Government All changes, however, took place in a peaceful atmosphere. No force was used at any time, nor even a show of force. There was no disturbance of the peace. . . Our country owes a deep debt of gratitude to the manner in which its armed forces and the Civil Service have conducted themselves throughout these last seven years, and in particular during these recent anxious times. .

I profoundly trust that our country will continue to go forward in the constitutional and administrative fields as rapidly as it has done since the present Cabinet assumed supreme control of national affairs In particular, I hope that the new Constituent Assembly will apply itself to the task of Constitution-making with vigour and speed The country has waited for the new Constitution for nearly eight years, and must not be made to wait much longer I hope too that the representatives in the Constituent Assembly will be guided by the highest interests of the country as a whole, and will rise above parochial, Provincial or personal considerations in the discharge of the heavy responsibility laid upon them. . .

There are in our country certain people who must criticize, denounce, and find fault with everything that happens. They contend that the dissolution of the Constituent Assembly was an undemocratic act, whereas in fact the continuance in office of the same Assembly for seven years, and its claim to continue in perpetuity if it so chose, despite the fact that it had plainly forfeited public confidence, was a travesty of democracy. They maintain that the country is making no progress when it has in actual fact rapidly gone forward. In their eyes the country advances only to the extent to which their own personal interests are advanced. They loudly proclaim their faith in national unity, yet they seek to undermine it, to create schisms, and to encourage Provincial and political divisions whenever it suits them . If the mischief of these people is allowed free play, it will destroy everything dear to us, everything for which we have worked, fought and suffered. My Government are determined never to allow that to happen.

In dissolving the Constituent Assembly, and in every major action that I and my Government have since taken leading to the setting-up of the new Constituent Assembly, I claim that we have acted in the highest democratic tradition, and that we have faithfully interpreted the will of the people That this is in fact so has been unmistakably demonstrated by the popular support and the sense of general relief with which every act of mine and of my Government has been received throughout the country We have . . acted with scrupulous respect for the supremacy of the rule of law . I trust that all political leaders in the country will take a lesson from the manner in which we have acted, that they too will be prompted throughout by the supreme necessity of rendering selfless service in the cause of Pakistan."

The Governor-General had previously issued an Order on April 27 providing, in accordance with a suggestion of the Federal Court, that the Constituent Convention should also function as a Legislature. The Order also postponed the elections to the Convention from April 30 until May 7, and its first meeting until May 16, and increased the number of seats to 80, distributed as follows: East Bengal 40 (including nine non-Moslems), Punjab 21 (including one non-Moslem), Sind 5 (including one non-Moslem), N.W. Frontier Province 4, Tribal Areas 3, Bahawalpur 2, and Baluchistan, Baluchistan States Union, the Frontier States, Khairpur State, and Karachi one each—the last-mentioned 10 members being nominated by the Governor-General. As a result of representations from East Bengal (see below), a new Order was issued on May 1 again postponing the elections to the Constituent Convention until the Federal Court's report had been received.

On April 1 Mr. Mohammed Ali had announced the immediate setting-up of an Electoral Reform Commission which, he said, would tour the country and ensure that future elections to the Central Assembly were conducted in a fair and free manner, and all malpractices eliminated.

Mr. Suhrawardy, in his Press statement on April 18 (see above), deprecated the rumour that the Government intended to do without elections and to carry on "for the next five or ten years without a Legislature." "This idea," he declared, "is not only ill-informed but is mischievous. I wish to assure everyone that the Governor-General cannot be a party to any such move, and that his Cabinet is proud and privileged to carry through his policy and to establish democratic Legislatures at as early a date as is possible, having regard to the electoral machinery."

After saying that the composition of the Electoral Reform Commission would shortly be announced, Mr Suhrawardy pointed out that logically the Government should not compile the electoral rolls and take further steps in arranging for general elections until that Commission had made its report, and until the new Constitution had been framed and an Election Commissioner and his staff had been appointed However, "in order not to waste time, and in the belief that, whatever may be the electoral reforms and the delimitation of constituencies, the electoral rolls will be compiled on the basis of

universal adult suffrage for males and females, I shall take early steps to see that the machinery for the compilation of electoral rolls is set up so that work may be well advanced by the time the Constitution has been framed and the Reform Commission has reported." Explaining that hitherto the electoral rolls had been framed "most perfunctorily" because of the insufficient time allotted to ensure proper compilation, revision, and correction, Mr Suhrawardy pointed out that it would take at least a year to compile a satisfactory electoral roll with all the arrangements for proper identification and all the machinery to ensure a fair and free election

Other recent political developments in Pakistan arising out of the constitutional crisis are summarized below under cross-headings.

Release and Re-arrest of "Rawalpindi Prisoners." The Lahore High Court on March 24 ordered the release on bail of eight of the prisoners convicted in 1953 of complicity in the "Rawalpindi conspiracy" for the overthrow of the Government (see 12772 A), as the Rawalpindi Conspiracy Case Tribunal Act of 1951 [under which the accused persons had been tried] had been invalidated by the Federal Court's ruling of March 21 The eight men (Major-General Akbar Khan, the former Chief of Staff, Air Commodore Janjua, Brigadier Latif, Lieut-Colonel Ziauddin, Colonel Arbab, Major Ishaq Mohammad, Major Hassan Khan, and Mr. Faiz Ahmed Faiz, former editor of the *Pakistan Times*) were, however, re-arrested by the Government's orders on the same day, and the Act was re-validated by the ordinance of March 27. Following the Federal Court's ruling of April 12, however, the High Court again ordered their release on bail, pending the hearing of a *habeas corpus* petition against their detention. Two more of the prisoners, Brigadier Sadiq Khan and Mr. Sarjab Zaheer (both of whom had filed a *habeas corpus* petition) were released on bail by the Judicial Commissioner of Baluchistan on May 4, but were re-arrested later the same day.

Developments in East Bengal. The Government's proposal to summon a Constituent Convention met at first with widespread opposition in East Bengal, where the United Front, a section of the Awami League (which had broken away from the United Front in February), the Moslem League, and the Hindu members of the Legislature all demanded the election of a Constituent Assembly on the basis of adult suffrage and direct elections Discussions held in Karachi on April 16 between Mr. Fazlul Huq (the former Chief Minister, and leader of the United Front) and members of the Government produced no result, as Mr Fazlul Huq refused to commit the United Front to participation in the Convention without guarantees that parliamentary government would be restored in East Bengal before the Convention met.

Mr. Suhrawardy, (the Law Minister, and leader of the Awami League) and Major-General Mirza (the Home Minister) visited Dacca on April 19-21 for talks with the United Front leaders, but failed to secure their support for the Convention. The *Krishak Sramik* Party, which is led by Mr. Fazlul Huq, demanded on April 20 that new elections should be held immediately to reconstitute the Constituent Assembly in accordance with the provisions of the Indian Independence Act, whilst Maulana Bhasani (the president of the East Pakistani Awami League, who had been living in exile for 11 months) issued a statement in Calcutta on April 24 in which he denounced as "preposterous" the suggestion that the 45,000,000 people of East Bengal should have equal representation with some 30,000,000 people in West Pakistan. Mr. Suhrawardy replied to this argument by defending the principle of parity of representation on the grounds that regional autonomy was possible only if one wing was not dominated by the other, and that representation on a population basis was irreconciliable with a Federal form of government.

After consultations with the Government, Mr. Suhrawardy returned to Dacca on April 25 with Maulana Bhasani, who had joined him in Calcutta, and on April 27 the working committee of the Awami League, at a meeting at which both were present, decided to participate in the Convention, subject to the Federal Court's report Mr. Fazlul Huq's supporters also indicated that they would abide by the Court's decision, and in consequence Mr Ghulam Mohammad, as stated above, postponed elections to the Convention until this was known. Following the announcement of the Court's ruling, Mr. Suhrawardy stated on May 10 that all political parties and groups in East Bengal had decided to take part in the elections to the new Constituent Assembly.

Developments in the Punjab. The Governor of the Punjab (Mr. M. A. Gurmani) dismissed Mr. Firoz Khan Noon's Ministry on May 21, on the ground that it did not command the confidence of the Provincial Assembly. A new caretaker Government was formed on the same day by Sardar Abdul Hamid Khan Dasti, formerly Minister of Agriculture in Mr. Noon's Cabinet, with the following membership: Mohammed Khan Leghari, Hussain Shah Gilani, and Sheikh Masood Sadiq (members of the Noon Ministry) and Sufi Abdul Hamid and Sheikh Fazal Ilahir Tircha (nominees of the Daultana group). The Punjab Moslem League Parliamentary Party had been divided since March by disagreements between Mr. Noon's supporters and the followers of the former Chief Minister, Mr. Daultana, and these differences had been intensified by a conflict over the choice of candidates for the Constituent Convention, as a result of which the national party leadership had been asked to select the candidates.

On May 21 the Federal Court dismissed an application by the Government for an extension until Aug. 15 of the Court's Order of April 18 (which expired on May 22). It pointed out that, having tendered its advice to the Governor-General, it had no jurisdiction to make any Order staying further proceedings. At the same time, however, it stressed that the Governor-General's responsibility in the matter of the laws re-validated by him would cease with the meeting of the new Constituent Assembly, and that the further validation of these laws should be the Assembly's "first concern." The Federal Court ruled at the same time that the Privy Council (Abolition of Jurisdiction) Act [see above] had been properly validated by the Governor-General —(Pakistan High Commissioner's Office, London - Dawn, Karachi - Times - Manchester Guardian) **(Prev. rep. Constitutional Dispute, 14121 A; "Rawalpindi Case," 12772 A; East Bengal, 13746 A; Punjab, 12887 A.)**

A. UNITED STATES. — Armed Forces. - Military and Naval Appointments.

It was announced in Washington on May 13 that President Eisenhower had appointed General Maxwell Taylor as Army Chief of Staff in succession to General Ridgway, retiring on June 30. General Lyman Lemnitzer, Commander of the U.S. Eighth Army, succeeded General Taylor as C.-in-C. of the U.S. and United Nations Forces in the Far East

General Maxwell Taylor (57), who commanded the U.S. 101st Airborne Division in Normandy, Holland, and Germany in 1944-45, became Superintendent of the U.S. Military Academy at West Point after the war. He was U.S. Commandant in Berlin in 1949-51, was subsequently appointed Army Deputy Chief of Staff for operations and administration, and in 1953 succeeded General Van Fleet in command of the U.S. Eighth Army in Korea. As recently as March 8, 1955, he had been appointed U.S. and U.N. Commander-in-Chief in the Far East, but held that post for only a few weeks before his subsequent appointment as Army Chief of Staff.

The nomination of Rear-Admiral Arleigh Burke as Chief of Naval Operations in succession to Admiral Carney was announced in Washington on May 25. At the same time the President nominated Admiral Radford and General Twining for further two-year terms as chairman of the Joint Chiefs of Staff and Air Force Chief of Staff respectively.

Rear-Admiral Burke (53), a distinguished destroyer commander in the Second World War, commanded the destroyer force of the U.S. Atlantic Fleet at the time of his new appointment. He has also directed the strategic plans division at the Navy Department. His appointment, which he will take up in August, will carry the rank of full admiral.

On April 25 it had been announced that General Earle E. Partridge, Commander of the U.S. Far East Air Forces with headquarters in Tokio, had been nominated by President Eisenhower as head of the U.S. Continental Air Defence Command in succession to General Chidlaw (retiring), and that Lieut.-General Lawrence S. Kuter, head of the Air University at Maxwell Field, Montgomery (Alabama), would succeed General Partridge in the Far Eastern Command.

(Prev. rep. 14091 A; 13711 C; 12931 B; 12707 A.)

B. IRAQ. — Cabinet Reorganization.

A reshuffle of the Iraqi Cabinet took place on May 8 under which Musa Shabander, the Foreign Minister, returned to his former post of Ambassador in Washington and was succeeded by Burhanuddin Bashayan, hitherto Minister of State. Other changes were the appointment of Mohammed Ali Mahmud, the Minister of Justice, as acting Minister of Development (retaining the portfolio of Justice); of Abdul Majid Mahmud, the former Minister of Development, as a Minister without portfolio; and of a new Minister of Agriculture, Rushdi Chelabi. The former Foreign Minister, Musa Shabander, had been in ill-health for some time and was understood to have expressed the desire to return to Washington for health reasons.
(Times - Le Monde, Paris) **(Prev. rep. Cabinet, 13716 A.)**

C. JAPAN. — Final Compensation Payment to Allied Prisoners-of-War.

In conformity with the agreement initialled in Tokio on Nov. 30, 1954 (see 13934 B), the Japanese Government paid £4,500,000 to the International Committee of the Red Cross on May 25 for distribution among former Allied prisoners-of-war who had suffered undue hardship while in Japanese hands. Some 200,000 nationals of 18 Allied countries (of whom about 55,000 are British) will benefit from the agreement on a basis still to be determined. (Times) **(Prev. rep. 13934 B.)**

D. UNITED KINGDOM. — British Nationality withdrawn from Dr. Pontocorvo.

The Home Office announced on May 26 that the Home Secretary had made an Order, under Section 20 of the British Nationality Act, 1948, depriving Dr. Bruno Pontecorvo, the atomic scientist, of his British citizenship on the grounds that he had shown himself by act and speech to be disloyal or disaffected.—(Times) **(Prev. rep. 14099 C.)**

A. UNITED KINGDOM. — Balance of Payments in 1954. - Surplus of £160,000,000.

A White Paper (Cmd. 9430) published on April 5 showed that the U.K. had a surplus of £160,000,000 in its balance of payments during 1954, comprising a surplus of £172,000,000 in the first half of the year and a deficit of £12,000,000 in the second half. Excluding U.S. defence aid totalling £50,000,000, the surplus for the year was £110,000,000, compared with £115,000,000 in 1953 (excluding £102,000,000 in U.S. defence aid). Details are shown in the following table.

* Provisional

Of the "invisible" items shown in the above table, shipping receipts fell by £4,000,000 between the first and second halves of 1954, whilst payments rose by £18,000,000, giving a net worsening of £22,000,000, which was thought to be due to an increase in tramp shipping freight rates in the second half of the year. [On balance the U.K. stands to gain when liner rates go up, and stands to lose when tramp shipping freight rates go up.] However, comparing 1954 as a whole with 1953, receipts rose by £21,000,000 and payments by £13,000,000, giving a net improvement of £8,000,000; between 1952 and 1953 there had been a net worsening of £19,000,000.

For interest, profits and dividends, 1954 as a whole showed a net worsening of £24,000,000 compared with 1953, as a result of payments rising four times as much as receipts; between 1952 and 1953 there had been a net worsening of £28,000,000. The increase in payments was thought to be due to higher dividend payments by British companies to non-resident shareholders.

Payments on travel rose by three times as much as receipts between the first and second halves of 1954, and there was a net worsening of £14,000,000, over the year as a whole, however, the net worsening compared with 1953 was only £5,000,000. The travel allowance in 1954 was higher than in 1953, when there was a net improvement of £2,000,000 on 1952.

As a result of increased military expenditure and higher colonial grants there was also a net worsening on Government expenditure abroad of £14,000,000, as compared with 1953.

U.K. Regional Balance of Payments. The surplus of £160,000,000 was made up of a surplus of £269,000,000 with the rest of the sterling area and a deficit of £109,000,000 with the non-sterling areas (of which the dollar deficit accounted for £101,000,000). Compared with 1953, this represented a £96,000,000 increase in the U.K.'s surplus with sterling countries, and a deterioration of £153,000,000 in its balance with non-sterling countries (of which £93,000,000 was with the dollar area). These figures are given in greater detail in the following table:

	1952	1953	Jan.-June 1954	July-Dec. 1954 *
			(£ million)	
Dollar area†	−174	— 8	+ 19	−120
Other Western Hemisphere	+ 91	— 23	—	— 2
O E E C countries	— 27	+105	+ 44	— 13
Other non-sterling countries	— 4	— 16	+ 2	— 31
Rest of sterling area	+379	+173	+114	+155
Non-territorial organizations	— 6	— 14	— 7	— 1
Total	+259	+217	+172	— 12

* Provisional † After allowing for U S defence aid of $121,000,000 in 1952, $102,000,000 in 1953, $24,000,000 in Jan.-June, 1954, and $26,000,000 in July-Dec., 1954

As shown in the above table, the main cause of the worsening in the U.K. payments position in the second half of 1954 was the deterioration in the dollar payments position, where a surplus of £19,000,000 in the first six months of the year was turned into a deficit of £120,000,000 in the second. There were two main reasons for this: (a) dollar imports rose from £240,000,000 to £325,000,000 (including a rise of £40,000,000 in beverages and tobacco, and £22,000,000 in food and feeding-stuffs); and (b) "invisible" debit items increased by £45,000,000, though this was almost wholly accounted for by the annual interest payment of £38,000,000 on the U.S. and Canadian loans (see 13957 A).

The deterioration in the balance of current transactions with O.E.E.C. countries, from a surplus of £44,000,000 to a deficit of £13,000,000 between the two halves of 1954, was largely due to an increase of £36,000,000 in imports and of £15,000,000 in expenditure on travel. The improvement in the payments position with the rest of the sterling area resulted mainly from a fall of £60,000,000 in imports between the first and second halves of the year.

Sterling Area Gold and Dollar Accounts. In the last six months of 1954 the sterling area had a gold and dollar deficit of £92,000,000 ($255,000,000), which was wholly accounted for by transactions with non-dollar areas. Transactions with the dollar area were in balance, a deficit of £73,000,000 ($204,000,000) incurred by the U.K. being offset by a surplus of the same amount shown by the rest of the sterling area.

For 1954 as a whole the sterling area had a gold and dollar surplus of £87,000,000 ($244,000,000), compared with one of £240,000,000 ($672,000,000) in 1953; the 1954 surplus was made up of a surplus of £143,000,000 ($400,000,000) with the dollar area, less a deficit of £56,000,000 ($156,000,000) with non-dollar areas. The main credit item in the dollar surplus of the rest of the sterling area was £130,000,000 ($364,000,000) in gold sales to the United Kingdom.

Britain's Position in the E.P.U. The U.K. had a net surplus of £59,000,000 in the E.P.U. in 1954, of which £53,000,000 was earned in the first six months and £6,000,000 in the second. In 1953 the surplus had amounted to only £30,000,000.

U.K. Sterling Liabilities, etc. Total U.K. sterling liabilities (i.e. sterling balances held by other countries) on Dec. 31, 1954, amounted to £3,901,000,000, compared with £3,823,000,000 on June 30, 1954, and £3,706,000,000 on Dec. 31, 1953. The sterling balances held by British Colonial territories totalled £1,226,000,000 (an increase of £38,000,000 in six months), those held by other sterling area countries £1,823,000,000 (a decrease of £41,000,000), and those held by non-sterling countries £852,000,000 (a decrease of £19,000,000). Official U.K. holdings of non-dollar currencies fell from £18,000,000 on June 30, 1954, to £13,000,000 on Dec. 31, 1954, of which £10,000,000 represented currencies of O.E.E.C. countries and £3,000,000 currencies of other non-sterling countries.

(Cmd. Paper 9430) **(Prev. rep. 13888 A.)**

B. CANADA - UNITED STATES. — Defence Policy. - Agreement on Building of DEW Radar Line.

The Canadian Secretary of State for External Affairs (Mr. Lester Pearson) announced on May 20 that, under an agreement with the U.S.A. concluded on May 5, the U.S. Government would pay the full cost of the construction and operation of the new DEW (radar defence) line in the Canadian Far North. Canada would, however, have the right "on reasonable notice" to take over the operation and manning of any or all of the installations after full consultation with the U.S.A., in which event she would pay her share. Among other agreed conditions were preference for Canadian labour and electronic equipment manufactured in Canada, and a guarantee of Canadian sovereignty in the area covered by DEW line installations.

(Montreal Star - New York Times) **(Prev. rep. 13896 A.)**

A. BRITISH COLONIAL EMPIRE. — Colonial Development Corporation. - Report for 1954. - The Colonial Development and Welfare Act, 1955. - £80,000,000 Additional Expenditure authorized. - Allocation of Funds.

The report of the Colonial Development and Welfare Corporation for 1954, published on April 28, 1955, gave the total deficiency incurred during the year (after allowing for Colonial income taxes and interest on advances) as £511,108, compared with £1,303,661 in 1953. The net trading loss for 1954, however, was little more than one-fifth of the trading loss for 1953—£85,946, compared with £402,334—whilst the net income derived in 1954 from continuing projects and investments amounted to £117,775, compared with a loss of £164,088 in 1953. The Corporation's activities are summarized below:

Projects. During 1954 the Corporation invested funds in seven new projects now being developed "in association with experienced private enterprise," and at the end of the year was interested in 56 continuing projects and investigations. New possibilities of obtaining local and commercial participation in the Corporation's projects were continually being sought.

Trading. At Dec. 31, 1954, the Corporation was managing—either directly or through controlled companies—16 fully developed trading projects with an aggregate annual turnover of about £6,000,000. The 15 schemes which had reached the trading stage made a profit in 1954 of £350,000, compared with £280,000 in 1953. The commodities and services sold by the Corporation included beef and hides, rice, bananas, rubber, hemp, timber, cement, electric current, housing finance, and hotel accommodation.

Reorganization of Schemes. At the end of the year five schemes, representing about £4,000,000 capital and showing aggregate trading losses in 1954 of about £500,000, were being abandoned or reorganized, as follows:

The Falkland Islands Freezer. This plant would not be reopened in 1955, the estimated loss in 1954 (the first full season of operation) having been £42,000. The report explained that in addition to investing £240,000 in the operating company, the Corporation had written £200,000 off the cost of construction before transferring the freezer to it, and had incurred a liability of £45,000 for interest. In 1954, 17,000 sheep had been delivered to the Ministry of Food, but 5,000 of these had been rejected as "fit only for tallow". The freezer had been offered for sale or lease, without response.

British Guiana Timbers. A net loss of £114,676 had been incurred in 1954, the company having earned dollars, but at "monstrous cost" in sterling. The report added that there was "no chance of the company being out of the red in 1955."

British Honduras Ramie Grass Scheme. The British Honduras scheme for growing ramie grass, on which £186,468 had been spent, would probably be shut down, and most of the expenditure would probably have to be written off.

Bechuanaland Cattle Ranch. Trading losses on this project—for which 16,000 square miles had been leased in 1950—totalled £68,256, and losses could be expected for several years.

Swaziland Irrigation Scheme. The 1953-54 rice crop had proved "a shocking disappointment," bad management and supervision having cost the Corporation a net loss in 1954 of £48,353.

Achievements and Prospects. The report stressed that the "really significant development of 1954"—a change in emphasis, which had now "swung towards looking forward instead of looking backward"—was not shown by the financial and statistical tables. This change, it claimed, indicated that the Corporation's staff and organization had now "been brought to the point where they are capable, in association with authority and private enterprise, of contributing fully to the planning and execution of large development projects."

There were, however, certain limiting factors, classed under four main heads as follows:

(a) *Management.* The C.D.C. had "paid heavily for inefficient management and supervision," and experience suggested that there was "no complete alternative to the hard way of training up one's own staff."

(b) *Insufficient Co-ordination.* The report stressed that much money had been spent on projects which were "sterile until communications—in some cases promised but not forthcoming—are provided," and advocated closer co-operation between the C.D.C. and the Colonial Development and Welfare Fund.

(c) *Markets.* The Corporation was bound by its terms of reference to devote its main effort to expanding the production of foodstuffs and raw materials, which would normally have to be sold on world markets in competition with established producers. The report stressed, therefore, that if development of this kind was required by Governments for strategic or political reasons, the C.D.C. should be granted "some reasonable security for markets," as it would otherwise have to take "unreasonable trading risks."

(d) *The Accumulated Deficit.* Describing the C.D.C.'s accumulated deficit of about £9,700,000 as "a financial millstone," the report pointed out that about £6,000,000 of this amount represented money lost on projects begun before 1951 and later abandoned. The Government had not agreed to a write-off of the whole £6,000,000, and the Corporation, in turn, had not accepted the terms suggested for writing-off a portion; Parliament had, however, given permission for interest payments on about £4,000,000 to be waived.

An analysis of the Corporation's capital investments showed that £14,200,000, or about half of the total capital deployed, had been invested in 28 trading projects and loans; 15 per cent, or £4,300,000, had been invested in the five projects now being cut down or reorganized; and the remaining £9,900,000 had been spent on investigations and pilot schemes, or on projects still under development or in their initial trading stages. The report emphasized that the Corporation's operating results for 1955 would largely depend on the success of the measures taken to deal with projects to be reorganized or curtailed.

The Colonial Development and Welfare Bill, extending the life of the Colonial Development and Welfare Act until March 31, 1960, authorizing the expenditure of a further £80,000,000, and raising the limit of expenditure in any one year from £25,000,000 to £30,000,000, was given an unopposed second reading in the House of Commons on Feb. 3 and enacted on March 29, 1955.

Mr. Lennox-Boyd (Colonial Secretary), moving the second reading, stated that, together with the unexpended balance of £40,000,000 under the old Act, the Bill would make a total of £120,000,000 available for Colonial development and welfare over the next five years. Total Government investment during that period, however, including expenditure on the Central African Federation and some large schemes, might be as much as £300,000,000.

A White Paper published on May 2, which gave details of the allocation of funds provided under the new Act, stated that the largest individual sums would go to research and higher education—£7,976,000 and £6,853,000 respectively. A sum of £2,469,000 would be made available for higher technical education. Allocations to individual territories included the following:

Caribbean Area. A total of £18,179,000 (taking into account the estimated unspent portion of previous allocations), including £3,000,000 each for British Guiana and Jamaica.

West Africa. A new allocation of £14,480,000, making available a total of £22,372,000, by far the largest portion of which would be devoted to the Federal and Regional governments of Nigeria.

East Africa. An allocation under the new Act of £10,960,000 (including £5,000,000 to Kenya and £4,000,000 to Tanganyika), bringing the total available to £14,426,000.

Cyprus, Malta, and Gibraltar. A total allocation of £1,250,000—about the same as the unspent balance of previous allocations.

Far East. £4,000,000 to the Federation of Malaya, bringing the total amount available to £5,135,000.

In a foreword to the report, addressed to Colonial Governments, Mr. Lennox-Boyd emphasized that a proper place should be given in development plans to "those basic services which make a more direct contribution to the expansion of each territory's resources."

The report of the Colonial Research Council for 1953-54, published on Nov. 30, 1954, stated that grants totalling £728,510 had been approved during the year for new research schemes and 40 supplementary schemes. It also stated that grants allotted to Colonial development and research since 1940, and charged against funds provided under the Colonial Development and Welfare Act, had amounted to about £12,000,000; that actual disbursements since 1940 had totalled about £8,000,000, of which £1,287,972 had been spent in 1953-54; and that about one-third of the £12,000,000 had been for agricultural, animal health, and forestry schemes.

B. SOUTH AFRICA. — Suppression of Communism Act. - Mr. Kahn's Appeal upheld by Supreme Court.

The appeal by Mr. Sam Kahn, the former Natives' Representative in the House of Assembly, against his conviction in October last for contravening the Suppression of Communism Act by attending a prohibited meeting was allowed by the Appellate Division of the Supreme Court on May 9. Chief Justice Centlivres said that the Crown had been unsuccessful in establishing that the gathering was anything but what it purported to be—namely, a social gathering—and that it had therefore failed to prove that any of those present desired by concerted action to achieve any object. The charges against Mr. Brian Bunting and Mr. Wolf Kodesh, who had been arrested at the same meeting as Mr. Kahn, were withdrawn on May 11.

C. ITALY. — State Control of Atomic Energy.

The Italian Government approved a Bill on March 16 bringing the use of nuclear energy in all its forms under State control. The Minister for Industry and Commerce (Signor Aldisio) explained that the measure was necessary to enable Italy to take part in future international co-operation in the development of atomic energy on a common footing with other European countries, where all nuclear development was subject to State control. (Corriere della Sera, Milan)

JUNE 4—11, 1955

A. WESTERN EUROPE. — Entry into Force of London and Paris Agreements. - Attainment of Sovereignty by German Federal Republic. - Dissolution of Allied High Commission. - Ending of Occupation Regime. - Inaugural Meeting of Council of Western European Union. - Western Germany enters NATO. - Paris Meeting of North Atlantic Council.

The London and Paris agreements came officially into force on May 5, on which date the occupation regime in Western Germany was ended and the German Federal Republic attained full sovereignty and independence. At the same time the Federal Republic became a member of the North Atlantic Treaty Organization and also a member of the Western European Union (the expanded Brussels Treaty Organization), which came into being on May 5.

Following the completion of ratification procedures by the various national Parliaments (see 14227 A), all instruments of ratification of the London and Paris agreements were deposited by the Governments concerned in Bonn, Brussels, or Paris by May 5. The agreements and conventions which came into force on that date were:

(1) The conventions ending the occupation regime in Western Germany and permitting American, British, and French forces to remain on German territory after the occupation had ended. Instruments of ratification were deposited in Bonn by the U S and Federal German Governments on April 20, and by the British and French Governments on May 5.

(2) The protocols under which Italy and the German Federal Republic entered the Brussels Treaty Organization, renamed the Western European Union. Instruments of ratification were deposited in Brussels by the seven W.E.U. member-countries—France, Great Britain, Federal Germany, Italy, the Netherlands, Belgium, and Luxemburg

(3) The protocol to the North Atlantic Treaty under which the German Federal Republic entered NATO Instruments of ratification were deposited in Paris by all NATO member-countries, including the Federal Republic.

(4) The agreement between France and the German Federal Republic on the "Europeanization" of the Saar.

Attainment of Sovereignty by German Federal Republic. - Ending of Occupation Regime.

The three Western High Commissioners in Bonn (Dr. James Conant, Sir Frederick Hoyer Millar, and M. André François-Poncet) held their last meeting in the morning of May 5, the chair being taken by M. François-Poncet. As its final acts, the Allied High Commission promulgated two laws repealing all High Commission legislation still in force, and issued a proclamation revoking the Occupation Statute, abolishing the High Commission, and also abolishing the offices of the *Land* Commissioners.

At noon Sir Frederick Hoyer Millar and M. François-Poncet called upon Dr. Adenauer at the Palais Schaumburg and handed to him the British and French instruments of ratification of the Paris agreements ending the occupation regime. (As stated above, the U.S. and Federal German instruments had been deposited on April 20 by Dr. Conant and Dr. Adenauer.) At the same time M. François-Poncet deposited the ratification instruments of the Franco-German agreement on the Saar, and both he and Dr. Adenauer added their signatures to those of President Coty and President Heuss.

Sir Frederick Hoyer Millar handed Dr. Adenauer two messages, one from Sir Anthony Eden and the other from Mr. Harold Macmillan, welcoming the Federal Republic as an equal partner with the Western countries and paying tribute to the patience, courage, and statesmanship which Dr. Adenauer had displayed in overcoming the many difficulties with which he had been confronted. M François-Poncet also delivered a message to Dr. Adenauer from the French Foreign Minister, M Pinay, expressing the hope that the Paris agreements would herald a new era in Franco-German relations.

Dr Adenauer, in thanking the High Commissioners for their messages, said that May 5 was a "historic day" which would be "a source of joy and satisfaction to all Germans." After saying that the Federal Republic, having achieved sovereignty and independence, would work for the union of Germany in peace and freedom, he thanked the High Commissioners for the spirit of understanding which they had displayed towards the Federal Republic, and gave an assurance that Germany would be a loyal and active partner of the West.

During the afternoon an open-air ceremony was held in the grounds of the Palais Schaumburg at which Dr. Adenauer read the following proclamation:

"Today, nearly ten years after the military and political collapse of National Socialism, the occupation regime has ended in the Federal Republic. With profound satisfaction the Federal Government confirms that we are a free and independent State. What has long been in preparation on a basis of growing confidence has now become a legal reality. We are free among the free, joined in genuine partnership with the former occupying Powers.

Together with the Federal Government, 50,000,000 free citizens of the Federal Republic remember at this moment the millions of Germans who are forced to live separated from us, deprived of justice and the rule of law. We say to them 'You belong to us We belong to you Our joy at our regained freedom will be marred until that freedom is granted to you also You can always rely on us, for we and the free world will not relax our efforts until you, too, have regained your human rights and are able to live with us peacefully, reunited in a single State'

In this hour we recall the many Germans who still have to endure the hard lot of prisoners-of-war. We shall do all in our power to bring about the hour of their release.

Freedom carries with it responsibilities. At home there can be only one path for us—the path of a State based on the rule of law, democracy, and social justice In the world there is only one place for us—at the side of the free peoples. Our aim is a free and united Germany in a free and united Europe."

After reading the proclamation the Federal Chancellor formally hoisted the black, red and gold tricolour of the Federal Republic, which was simultaneously hoisted on all Government buildings in Bonn and throughout Western Germany. The ceremony concluded with the playing of the German national anthem, *Deutschland uber alles*. Owing to the fact that Germany was still divided, there were no national celebrations in connexion with the attainment of independence, and the ceremonies in different parts of the Federal Republic were of a restrained character.

The proclamation was also read to the West German Bundestag by the Speaker, Herr Gerstenmaier, and was warmly welcomed by spokesmen of all parties except the Social Democrats. Herr Ollenhauer (the Social Democratic leader) declared that the occasion was not one for rejoicing because Germany still remained divided, and said that there could be "no talk of German sovereignty until the country is reunited in freedom." He asserted that the Federal Republic's freedom under the Paris agreements was "severely limited" by its obligation to make a military contribution within the framework of the North Atlantic pact.

In a special radio broadcast to the people of Eastern Germany the same evening, Dr. Adenauer reiterated his pledge that the Federal Government would do all in its power to work for the reunification of the German people in peace and freedom

The German Federal Republic achieved its sovereignty and independence almost exactly ten years after the unconditional surrender of Nazi Germany to the Allies, which took place on May 7, 1945. Among the immediate effects of the attainment of independence were: (1) the right of Western Germany to rearm within the NATO framework, and the lifting of all prohibitions on armaments except those which the Federal Republic had voluntarily undertaken not to manufacture (i.e., atomic, biological, and chemical weapons, long-range bombers, warships over 3,000 tons, and submarines over 300 tons); (2) the right to build and operate commercial aircraft; (3) the right to enter into diplomatic relations with any country; (4) the removal of all remaining restrictions on West German industry; (5) the lifting of all Allied censorship and security measures.

One of the immediate results of the ending of the occupation regime was that the British, U.S., and French High Commissioners in Bonn, and the Federal German envoys in London, Paris, and Washington (respectively Herr von Herwarth, Dr. Krekeler, and Herr von Maltzan), assumed the status of Ambassadors. Sir Frederick Hoyer Millar and M. François-Poncet presented their credentials to President Heuss on May 5, whilst Dr. Conant had been nominated U.S. Ambassador to the German Federal Republic by President Eisenhower on April 28. Herr von Herwarth presented his credentials to Queen Elizabeth II on May 16, and Dr. Krekeler to President Eisenhower on May 6.

The Position in West Berlin.

Although the occupation regime was completely terminated in the Federal Republic, it continued in a modified form in West Berlin. Nevertheless, the Western Allied *Kommandatura* put into force on May 5 the declaration of May 26, 1952 (see 12225 A) which would have entered into force simultaneously with the E.D.C. treaty, but which had remained inoperative because of the French rejection of the E.D.C. project. In announcing this step, the British, U.S. and French Commandants said that although the protocol ending the occupation regime in Western Germany could not be extended to cover Berlin, the new relations between the Federal Republic and the Western Powers had made possible a number of relaxations of existing Allied controls in the city. The declaration of 1952 would accordingly come into force, and, under that declaration, the Allied authorities would "normally" exercise powers only in matters relating to (1) the security, interests, and immunity

of the Allied forces in Berlin; (2) disarmament and demilitarization; (3) Berlin's relations with foreign authorities; (4) occupation costs, which would be fixed at the minimum compatible with the security of Berlin and of the Allied forces; (5) authority over the Berlin police to the extent necessary to ensure the security of the city. The Western Commandants advised the Chief Burgomaster of West Berlin (Dr. Suhr) that they were ready to discuss a revision of the declaration of May 26, 1952.

Inauguration of the Western European Union.

The Council of the Western European Union, consisting of the Foreign Ministers of the seven W.E.U. member-countries—Mr. Harold Macmillan (Great Britain), M. Pinay (France), Dr. Adenauer (German Federal Republic), Professor Martino (Italy), Mr. Beyen (Netherlands), M. Spaak (Belgium) and M. Bech (Luxemburg)—held its first meeting in Paris on May 8. At the end of the meeting, which took place at the British Embassy under the chairmanship of Mr. Macmillan, a communiqué was issued announcing that the following decisions had been taken:

(1) M. Louis Goffin, Belgian Minister in Teheran, had been appointed Secretary-General of the W.E.U., with Mr. Peter Fraser (of the British Foreign Office) and Dr. Hasso von Etzdorf (of the Federal German Foreign Office) as Assistant Secretaries-General.

(2) Admiral Emilio Ferreri, Chief of the Italian Naval Staff, had been appointed Director of the W.E.U. Armaments Control Agency.

(3) It had been decided to set up within the W.E.U. a Standing Committee on Armaments composed of representatives of all member-countries and possessing an international secretariat. The communiqué said:

"The task of the Standing Armaments Committee will be to develop between the W E.U. nations the closest possible co-operation in the field of armaments, with a view to establishing on a concrete basis the best manner of utilizing the resources each of the member-nations has at its disposal for the equipment and supply of their armed forces, and to distribute their tasks in accordance with their best interests. The committee will work in close conjunction with NATO, avoiding all duplication of work already carried out by that organization To facilitate this liaison, the Standing Armaments Committee will have its headquarters in Paris"

(4) M. Charles Cristofini, of the French Foreign Office, had been appointed secretary of the new Standing Committee on Armaments.

(5) The W.E.U. Assembly would consist of the representatives of W.E.U. member-countries in the Consultative Assembly of the Council of Europe. It would hold its first meeting at the *Maison de l'Europe* in Strasbourg simultaneously with the next meeting of the Consultative Assembly.

In a subsequent press statement, Mr. Macmillan said that the first meeting of the Council of W.E.U. had been "of great historical importance" and "a great success." He added: "For the first time in European history, there has officially come into being a European Union. After so many starts, delays, and disappointments, we have now created something which is unique in the history of Europe."

Prior to the Paris meeting, the Interim Commission of the W.E.U. (comprising experts of the seven member-countries) had met in London on May 2 and had reached full agreement on the matters dealt with in the communiqué.

Entry of German Federal Republic into NATO.

The German Federal Republic formally entered NATO as its 15th member on May 9, on which date a three-day meeting of the North Atlantic Council opened at the Palais de Chaillot in Paris under the chairmanship of M. Stephanopoulos, Foreign Minister of Greece. The meeting was attended by the Foreign Ministers of all 15 NATO countries, the German Federal Republic being represented by Dr. Adenauer. The following communiqué was issued on May 12 after the three-day session had ended:

"(1) To welcome the accession of the Federal Republic of Germany to the North Atlantic Treaty, the Council held an opening public session. In speeches made on that occasion, Ministers stressed the significance they attach to the entry of the Federal Republic as a democratic and sovereign state into the North Atlantic Community. The Federal Chancellor, replying to the welcome extended him by his colleagues, emphasized the full harmony existing between the objectives of the North Atlantic Treaty and the ardent desire for peace, security, and freedom felt by the German people, including the 18,000,000 in Eastern Germany.

(2) The Council reaffirmed the purely defensive character of the Atlantic Alliance. It recorded its deep satisfaction at the entry into force of the agreements which establish Western European Union and which promote peace and provide specific safeguards, including the control of armaments. The Council also noted the valuable mutual support made possible by close collaboration between NATO and Western European Union in their respective fields of activity.

The Council welcomed declarations made by the Ministers of member-governments signatory to the Italian Peace Treaty recalling the active part taken by Italy in the progress of Atlantic and European co-operation, and reaffirming that various discriminatory aspects of that treaty were considered to be inconsistent with the position of Italy as an ally.

(3) The Ministers examined major aspects of the international situation within and beyond the NATO area. They discussed a report on the current negotiations regarding the Austrian State Treaty, and welcomed the indications that the Soviet Union may join in concluding such a treaty long sought by the Western Powers. They were resolved to continue the policies followed heretofore in building and maintaining the strength and unity of the West.

The Council welcomed the initiative of France, the United Kingdom, and the United States in proposing to the Soviet Union negotiations to find means for resolving outstanding issues. The Council hoped that this initiative would lead progressively to agreements which would remove sources of conflict and contribute to the security and liberty of all peoples. In particular, the Council hoped that such negotiations might help to bring about the peaceful unification of Germany in freedom, and promote progress towards the reduction, under effective safeguards, of armaments and armed forces. The Council emphasized that this process of negotiation required careful preparation, and must be pursued with patience and determination.

The Council also reviewed the situation in the Middle East and Far East. It received reports on the conclusion of various security pacts in these areas, including the Manila Pact and the Turco-Iraqi Pact The Council welcomed measures taken to strengthen the defence of the Middle East and Far East areas.

A report was made to the Council on the Bandung Conference. The Council expressed the hope that there would be a cessation of hostilities in the Far East and no further resort to force, since this would clearly endanger the peace of the world

(4) Ministers expressed their satisfaction that the procedures followed in the Council had enabled them to have frank and free discussions and a thorough exchange of views. These discussions constitute a most significant proof of the solidarity of the Alliance, and show the great value of the Council as a forum for political consultation on matters of common concern. They are resolved to continue to follow these procedures, which enable the member-governments to develop their policies on common principles."

As stated in the communiqué, speeches of welcome were made by the Foreign Ministers on the occasion of Western Germany's entry to NATO, to which Dr. Adenauer replied. Short extracts are given below.

Mr. Macmillan (Britain): "The entry of the German Federal Republic into NATO is indeed a historic event. . . . We count it a privilege . . . that the first representative of the Federal Republic should be a man of rare courage and understanding. It is a happy augury of the contribution that Germany can and will make in the years to come. Hereby we proclaim our faith in the German people, as they proclaim theirs in the aims and ideals of NATO. . . . We are closing a page of history with satisfaction: we begin a new one with hope."

Mr. Dulles (U.S.A.): "The entry of the free people of Germany into the Atlantic Association of Nations is an event of historic significance. We see here a demonstration of the capacity of the Atlantic peoples to submerge ancient differences in order the better to secure the values of Western civilization. . . . We rejoice that the defence of freedom is thus enlarged and strengthened."

M. Pinay (France): "Ten years after the collapse of a ruthless dictatorship, the German Federal Republic enters NATO as a great democratic nation, a free, responsible and sovereign state. . . . In welcoming the German Federal Republic among us, we mark our recognition of the wise guidance and firm resolve of its Chancellor, Dr. Konrad Adenauer, in restoring to Germany the basic values which constitute the common heritage of the democratic civilizations. If Federal Germany can now be received as a partner by the other free nations, it is because her attachment to these human values is as great as theirs."

Professor Martino (Italy): "This meeting marks the return of the German nation—or at least that part of it which is free to choose its fate—to its rightful place in the community of the free peoples of the West. It also marks the entry of the German people into the new association whereby the peoples of Western Europe, heirs to a common civilization, have replaced the divisions of the past by close and confident co-operation within the wider framework of the Atlantic Alliance."

M. Spaak (Belgium): "We are making history as well as performing a man-made act. Without repudiating any of our national glories or memories, we are solemnly setting the seal on our reconciliation. . . . We have learned the cruel lessons of experience: we know the dangers which would face our common civilization if we remained divided. . . . Now that Chancellor Adenauer is taking his seat among us, it is only justice to pay special tribute to his perspicacity and courage; to stress how fortunate it is for us that, on the morrow of such a terrible war, there should have arisen in Germany a statesman unable to conceive of the future of his country otherwise than as part of our Western world."

Mr. Beyen (Netherlands): "The solemn acceptance of the German Federal Republic as an equal partner in the community of North Atlantic nations . . . coincides with days of remembrance of the disastrous conflict which brought Europe to the verge of ruin. . . . The abdication of free men to the powers of oppression in their own country preceded—nay, caused—the aggression threatening freedom everywhere else. The task of NATO is to organize the material strength of the free world, the survival of which can only be secured

in unity. *L'union fait la force*, as the old device of the Lowlands tells us. . . . My Government welcomes the entry of the German Federal Republic into our circle, which it has favoured for many years."

Hr. Hansen (Denmark): "We have all of us followed the political trends in post-war Germany with the keenest interest, and have been encouraged to see democracy gaining ground in the German people Today we have in our midst one of the most prominent architects of modern German democracy. The ties between the Federal Republic and the Western world have now been formally sealed."

[The Danish Foreign Minister recalled that at the meeting of the North Atlantic Council in October, 1954, he had raised the question of the Danish minority in Southern Schleswig (see 13849 A). He added in this connexion "On the initiative of the Federal Chancellor, discussions have taken place since then, and one of the results is an understanding by the Government of Schleswig-Holstein to ensure the representation of the Danish minority in the Parliament in Kiel. I need not point out how much we on the Danish side welcomed this important German initiative"]

Dr. Lange (Norway): "The presence among us of the German Federal Republic marks a decisive turning-point in the history of our Continent How many bloodthirsty wars, throughout the ages, have set the nations of Western Europe at each other's throats! Today, ten years after the last and most terrible of those wars, these countries, together with the great North American democracies, find themselves united in a great democratic alliance whose supreme aims are to prevent war, to encourage ever closer co-operation for the organization of peace, and to guarantee the reign of international justice."

M. Bech (Luxemburg). "Many names should be listed among the authors of the Paris agreements. . . I do not believe any of them has had to face greater difficulties, internally and externally, than the Federal Chancellor. . . . His gifts as a statesman, and his loyalty and firmness, have won the day . . . I express my admiration for the work he has done, and offer the hope that for many years to come his majestic figure will continue to guide the German people along the lines he has so happily laid down"

Mr. Lester Pearson (Canada) "We warmly welcome Chancellor Adenauer as the first representative of Germany to our Council, and as a man who has proved his devotion to the ideals we share . This meeting marks a new phase in the development both of European unity and of the Atlantic Community France and Germany, not because they forget but because they remember the past, have come together in a Western European Union which includes also a Britain whose vision across the seas has not prevented the acceptance of a new and indispensable European role."

Speeches of welcome were also made by **M. Stephanopoulos** (Greece), **M. Zorlu** (Turkey), **Senhor Paulo da Cunha** (Portugal) and **Dr. Gudmundsson** (Iceland).

Dr. Adenauer replied as follows "I thank you from my heart for the welcome you have addressed to the Federal Government and to the whole German nation Your words reflect the importance of the hour and of the event. You will realize that this moment fills me with deep emotion.

"The NATO represents a community of free nations which have manifested their determination to defend the common heritage of Western civilization, founded on the principles of individual liberty and the rule of law . . . The objectives of NATO are . . . in full harmony with the natural interests of the German nation, which, after a dreadful experience in two World Wars, longs as ardently as any other nation in the world for security and peace.

"The German people have paid harshly for the horrors which were committed in their name by blind and evil leadership. These sufferings have transformed and purified the German nation. Today everywhere in Germany peace and freedom are felt to be the greatest treasures, as was the case in the best periods of her history.

"I see in the accession of the Federal Republic to NATO, and in the implication of the treaties which the German Federal Republic has entered into with the nations of the free world, the expression of the need to overcome the narrow-minded nationalism which, in the past decades, was the root of our disaster We must bring social progress into harmony with technical development, and integrate the powers released by this development into a well-organized system so as to deprive them of their destructive effect The organization of a common defence can therefore be but one of the aims of the North Atlantic Treaty.

"For these reasons I believe some of the most important provisions of the North Atlantic Treaty to be the Preamble and Article 2, in which the nations are called upon to co-operate in the economic and cultural spheres with a view to promoting their general well-being and safeguarding their common cultural heritage. It will be the foremost concern of the Federal Government to co-operate in these fields to the best of their ability.

"The Federal Government are determined to strive, together with the other member-states, for peace and freedom. I know that this is the way the German nation as a whole is feeling and thinking, as are those 18,000,000 of our brethren who are still denied the right of free speech and of deciding freely on their destiny.

"On behalf of the Federal Government and of the German people, I express our gratitude to the Powers represented in the North Atlantic Council for having guided Germany along the path leading her into the community of free nations, and for having made our aim of reuniting Germany in peace and freedom their own.

"Within the community of free nations Germany will be an able and reliable partner, and in this community we wish to employ all our efforts for the safeguarding of freedom and human dignity. These noble aims will guide Germany now that she is called upon, together with the other member-nations, to take her share of responsibility for the preservation of peace in the world."

Following the Federal Republic's formal admission to NATO, German military representatives made their official entry to Supreme Allied Headquarters, Europe, where they were received on May 9 by General Gruenther, the Supreme Allied Commander, and General Lehr, representing the French Ministry of Defence. The German representatives, who were in civilian clothes, were led by Major-General Hans Speidel, Chief of Staff to Field-Marshal Rommel during the war, and an adviser to Dr. Adenauer on defence matters. The flag of the German Federal Republic was formally hoisted at Supreme Allied Headquarters, side by side with the flags of the other NATO member-countries. It was understood that a certain number of German officers would shortly be joining the international staff at SHAPE, and that a German military delegation, equivalent to the delegations maintained by the other NATO countries, would be installed there.

It was reported on May 7 that Herr Herbert Blankenhorn, Director of Political Affairs in the Federal German Foreign Office, would serve as permanent German representative on the North Atlantic Council. A career diplomat since 1929, he spent most of the war years on the staff of the German Legation in Berne, and from 1946-48 was assistant secretary-general of the zonal administration in the British Zone. A prominent member of the Christian Democratic Party, and a close associate of Dr. Adenauer, he had been head of the Political Affairs department of the Federal Foreign Office since 1950. A. SOVIET UNION. — Abrogation of Anglo-Soviet and Franco-Soviet Treaties of Alliance.

The Presidium of the Supreme Soviet issued two decrees on May 7 abrogating the treaties of mutual assistance concluded between Britain and the U.S.S.R. on May 26, 1942, and between France and the U.S.S.R. on Dec. 10, 1944. The decrees said that both treaties had "lost their validity" as a result of the ratification of the London and Paris agreements by the British and French Governments.

The first decree (relating to the abrogation of the Anglo-Soviet treaty) accused the British Government of being "one of the principal inspirers and protagonists of the restoration of German militarism," and described the London and Paris agreements as "providing for the remilitarization of Western Germany, the formation of a West German army, and the integration of Western Germany into military groupings—the Western European Union and the North Atlantic bloc." After recalling that Britain and the U.S.S.R., under the treaty of 1942, had bound themselves "to take jointly all measures necessary to make a repetition of aggression by Germany impossible, and not to conclude any alliance or take part in any coalition directed against the other high contracting party," the decree said that Britain had "directly violated its commitments" under that treaty, which had therefore "lost its validity."

The second decree (relating to the abrogation of the Franco-Soviet treaty) was worded in similar terms. It accused France of having "directly violated" her commitments under the treaty of 1944, and of having "entered into a military alliance with Western Germany directed against the Soviet Union"

Prior to this development, and following the Anglo-French Notes of Jan. 26 (see 14027 A), the Soviet Government had sent further Notes to Britain on Feb. 28, and to France on March 18, reiterating its earlier warnings of Dec. 9 (see 14002 A) that ratification of the London and Paris agreements would involve the abrogation of the Anglo-Soviet and Franco-Soviet treaties concluded during the war. On April 23 the Foreign Affairs Commissions of the two Houses of the Soviet Parliament (the Soviet of the Union and the Soviet of Nationalities), meeting in joint session, approved a recommendation by the Soviet Council of Ministers that the treaties should be annulled, and decrees to this effect were accordingly promulgated by the Supreme Soviet on May 7.—(Soviet Weekly) **(Prev. rep. Note Exchanges, 14027 A; 14002 A; London and Paris Agreements, Entry in Force, 14237 A.)**

B. UNITED KINGDOM. — Royal Navy. - New Commander-in-Chief, Home Fleet.

The Admiralty announced on June 1 that Vice-Admiral Sir John Eccles (56) would succeed Admiral Sir Michael Denny as C.-in-C., Home Fleet (as from December, 1955) and would simultaneously become Allied C.-in-C., North Atlantic, under the NATO. Sir John Eccles, much of whose career has been concerned with naval aviation, commanded the aircraft carrier H.M.S. *Indomitable* in the war, and saw extensive service in the Pacific. Since the war he had held the posts of Chief of Staff to the C.-in-C., Portsmouth, Commodore of Chatham Barracks, Flag Officer, Royal Australian Navy, and Admiral Commanding Reserves.—(Times) **(Prev. rep. 13960 A.)**

A. UNITED KINGDOM. — The Rail Strike. - Proclamation of State of Emergency.

A state of national emergency was proclaimed from midnight on May 31 as a result of a strike of locomotive drivers and firemen which had come into effect at midnight on May 28. In its early stages the strike had gravely impeded Whitsuntide holiday traffic, whilst the curtailment of freight trains to under five per cent of those normally run, and the virtual cessation of all suburban passenger trains, had threatened the distribution of coal and industrial raw materials and had seriously disorganized the movement of people to and from their places of work. The stoppage followed the breakdown of lengthy negotiations between the British Transport Commission (B.T.C.) and the Amalgamated Society of Locomotive Engineers and Firemen (ASLEF) on the Society's demand for wage increases to restore to their members the pre-war differentials—as compared with other grades of railwaymen—which, it claimed, had been partially obliterated by flat-rate increases in railway wages conceded since 1939. The history of these negotiations, and of preceding wage negotiations since the interim agreement concluded on Feb. 1, 1954 (see 13419 B), is summarized below under cross-headings.

The Earlier Negotiations. Discussions between the B.T C. and the three railway unions (the National Union of Railwaymen, the ASLEF, and the Transport Salaried Staffs' Association) on a new wages and salaries structure to cover all railwaymen, began in February, 1954, immediately after the conclusion of the "interim agreement" After a temporary deadlock in June caused by the N.U.R.'s insistence on further increases for lower-paid railwaymen, talks were resumed on June 30, but again broke down on Aug 6 when the three unions rejected the Commission's offer (estimated to cost £6,000,000 annually) of 2s. 6d. weekly for the lowest-paid grades after 12 months' service, and of 4s. 6d. weekly for locomotive staff The N.U.R. thereupon submitted counter-proposals intended, together with the increases granted in December 1953 (see 13301 A), to cover the whole of the union's original claim for an all-round increase for its members of 15 per cent They included (*a*) a reduction in the number of wage grades from 66 to 24, (*b*) an increase of 10s 6d weekly for lower-paid grades, (*c*) pay scales rising by 2s 6d. weekly to a maximum of £9. 15s The N U.R. estimated that these proposals would cost £12,000,000, whereas the B T C put the annual cost at £18,000,000

After further meetings between the Commission and the unions, the ASLEF (which represents about 80 per cent of enginemen, and which had demanded increases of up to 22s 6d. weekly for 'top-link' drivers) announced on Aug. 17 that it would withdraw from the discussions and submit its case to arbitration. Although on Aug. 31 the Commission proposed to the three unions that negotiations should be resumed "without commitment on either side," this proposal was ignored entirely by the ASLEF, and was rejected by the N.U.R as "too vague" On Sept 10, however, the Commission again offered to resume negotiations, provided that the N U.R. accepted the offer already made for lower-paid workers, and on Sept. 13-14 all three unions agreed to renew discussions Both the N.U.R and the T.S.S.A. accepted the Commission's proposals on Sept. 17 "as a basis for discussion," but on Sept. 21 the ASLEF rejected the proposals for enginemen as "quite inadequate," and reaffirmed its intention of submitting its claim to arbitration.

The October, 1954, Settlement with the N.U.R. On Sept 29, Mr. Campbell, general secretary of the N U R, announced that his executive had decided to accept the Commission's proposals for most operating grades, but would again present its original claim for its enginemen members Agreement had thus been reached on a new wages structure for the grades solely represented by the N U R.—i.e., signalmen, porters, shunters, and permanent-way men—whereby the number of these grades would be reduced from 40 to 31, and the increases would range from 6d. to 8s. 6d. weekly Mr. Campbell added that his executive had agreed to accept the Commission's proposals for N.U.R. members in the salaried grades on the understanding that a completely new pay structure for these grades would be discussed later. On Oct. 5 the N U.R. announced that it would submit its claim for its enginemen members to arbitration, so as to be in line with ASLEF.

The new wages structure was ratified (but not signed) by the N.U R. executive on Oct. 8, representative increases being as follows (total increases since December, 1953, given in parentheses): *Porter*, 1st year 6d. (7s. 6d.), 2nd year 2s. 6d. (9s 6d); *Guard*, 1st year 5s (12s. 6d.); after 3 years 8s. 6d. (16s. 6d.), *Shunter*, 4s. 6d (12s), *Ticket Collector*, 2s. (10s.); *Signalman* (class 4), 4s. (12s), *Relief Signalman*, 6s. 6d. (16s.); *Permanent Way Labourer* (after 1st year), 2s. 6d. (9s. 6d.). The increases raised the weekly minima and maxima for operating grades outside London to £6. 5s and £8 17s. respectively, with London rates higher by 3s. in every instance Signalmen in important signalboxes continued to receive special allowances of 5s. weekly.

The Tribunal's Awards to Locomotive Staff. After considering the ASLEF's demands (see above), which were intended to restore the pre-war differentials between enginemen and 'unskilled' railwaymen, the Railway Staffs' National Tribunal on Nov. 16 awarded increases for locomotive staff as follows (former rates in parentheses): *Junior Engine Cleaner*, £3. 4s. - £4. 12s. (£2. 19s 6d. - £4. 5s); *Adult Engine Cleaner*, £6. 7s. - £6. 9s. (£6. 4s 6d. flat rate); *Fireman or Assistant Motorman*, £6. 18s. 6d. - £7. 18s. 6d. (£6. 1s. 6d. - £7. 11s. 6d.); *Driver or Motorman*, £8. 12s 6d -£9 12s 6d (£7 19s 6d -£8 18s. 6d) The increases for top-grade drivers compared with the ASLEF'S demand for £10 5s and the N U R.'s for £9 15s Discussions between the Commission and the two unions on the application of the awards began on Nov 24, 1954

The N.U.R.'s Repudiation of the "October Settlement." Meanwhile, on Nov 11, the N U R executive had informed the B T C that the settlement reached in October had proved "entirely unacceptable" to its members, and had asked for a resumption of discussions on the basis of the union's original application in July, 1953, for a general wage increase of 15 per cent A meeting between the Commission and N.U R representatives accordingly took place on Nov 18, at which the Commission stressed that it considered the agreement as binding and was not prepared to reopen discussions on the original claim of July, 1953 It therefore demanded that the N U R should sign the agreement, but promised, "without prior commitment," to consider any submission that the union might make On Nov. 24, however, the N U.R executive informed the Commission that it considered (*a*) that the agreement should not be signed "until at least an indication has been given that something tangible will be forthcoming in the shape of increases for the staff covered by it", (*b*) that the original claim for "a 15 per cent increase on pre-December 1953 rates" should be "maintained as N U R policy" The Commission thereupon repeated its statement of Nov 18, but added that it would be prepared to consider any fresh wages application "as a submission to be dealt with on its merits"

The N.U.R. Request for Government Assistance to B.T C. Finances. In view of the B T C.'s contention that the increases offered by it represented the utmost which its financial position would allow it to pay, the N U.R. executive decided on Dec. 6 to seek an interview with the Minister of Transport and Civil Aviation (Mr Boyd-Carpenter) and to urge the Government to "help the Commission's finances immediately by returning part of the £124,000,000 profit which the State made from the railways between 1940 and 1947" [During that period the Government took over the railways from their former owners at an annual rental of £43,000,000] At a meeting with the executive on Dec 13, however Mr Boyd-Carpenter declined to consider "anything in the nature of a subsidy to enable railway wages to be increased," but promised to consult his Cabinet colleagues on "any matters raised by the Commission itself regarding its financial position" Meanwhile he stressed that "the door to negotiation and arbitration is still open," and urged the N U.R to reopen discussions with the British Transport Commission

At a further meeting on Dec. 20, Mr Boyd-Carpenter told the N.U R executive that it must "take its wages claim through all stages of the negotiating machinery" before the Government could examine the Commission's financial difficulties He explained that although the Commission had declared itself ready to discuss with the N.U R the removal of any anomalies which had been created by the award of the Railway Staffs' Tribunal to enginemen (see above), it had found that the N U R claim "went very much further," and felt that "the only way to secure a firm settlement for all grades" was for this claim, as well as the ASLEF's claim, to be referred to the Tribunal

The N.U.R. Decision to Strike. In view of the Minister's refusal to intervene, the N U R. executive decided on Dec 21 to instruct the union's 390,000 members employed on British Railways, London Transport railways, and B T C docks and canals to cease work from midnight on Jan 9, 1955, unless the union's demands had meanwhile been met.

Mr Campbell explained that the executive had taken this decision "because it is clear we have exhausted all forms of negotiation" A B.T C. statement issued on Dec. 22, however, denied that all forms of negotiation had been exhausted, and reiterated that it was "open to the N.U R to put forward a fresh claim through the recognized channels" After stressing that the N U R 's ultimatum, if carried out, would "cause very grave damage to the country's economic position, widespread hardship to the public, and serious harm to the railway industry itself," the statement added "This would be the more tragic at this very time when the Commission's plans for the reconstruction and revival of the industry are coming to maturity."

The Court of Inquiry. After meetings on Dec 23 between General Sir Brian Robertson (chairman of the B T C.) and the Ministers of Labour and of Transport, Sir Walter Monckton (the Minister of Labour) informed the N.U R executive that he proposed to appoint a court of inquiry into the dispute, and appealed to the N U.R. to co-operate and to call off the strike. On Dec 24 he announced the membership of the Court as follows. Sir John Cameron, Q C., Dean of the Faculty of Advocates (chairman), Sir Colin Anderson, a vice-president of the British Employers' Confederation, and Mr Harry Douglass, general secretary of the Iron and Steel Trades Confederation, and a member of the T.U.C General Council. Although on Dec. 27 the N U.R executive rejected the Minister's appeal to call off the strike, it agreed to co-operate with the court, which held its first meeting on Dec. 29.

Mr. Campbell, presenting the N U R.'s case on Dec. 30, pointed out that there had been no national railway strike for 35 years, and stressed that the decision to call one "had not been taken lightly." He explained that when the terms of the 'October settlement' had become known, there had been "spontaneous and widespread revolt" amongst N.U R members, and that the "intense feeling" aroused had been exacerbated by the Tribunal's award to locomotive men, which had left the railway wages structure "one vast anomaly" After claiming that since 1947 railway wages had never kept pace with rises in the cost of living, and that they now averaged 22s. 4d.

a week less than average wages in manufacturing industry, Mr Campbell contended that security of employment, which before the war had provided "some compensation to railwaymen for scandalously low wages," had far less value in the present time of full employment As a result, hundreds of railwaymen were leaving for better-paid and more attractive jobs, and recruitment was suffering, if this exodus continued, the standard of railway efficiency was likely to degenerate. In conclusion, Mr Campbell contended that at present the railways were indirectly "financing industry" through cut-price freight rates, he emphasized that although the N U R. had never suggested that they should receive an annual subsidy, it did consider that the Commission ought to be relieved of some of the burdens placed upon it by Parliament, and that some outside help should be provided, if necessary, to enable better wages to be paid

After Mr J Baty, the general secretary of ASLEF, had explained that his union had applied to the Railway Staffs National Tribunal because it considered that "relativity of wage rates has been gravely distorted by recent flat-rate increases," Mr W. P Allen (the member of the B T C responsible for labour matters) put the Commission's case

Estimating the cost of the concessions granted in December, 1953, and of the subsequent award to locomotivemen, at over £22,000,000 annually, Mr Allen contended that the 15 per cent rise in the retail price index since 1947 had been "more than covered" by railway pay increases Railwaymen's pay, he maintained, "showed up quite favourably" when tested by the general index of industrial wages, and in April 1954 averaged £9 8s 2d weekly, compared with average industrial earnings of £9. 17s 8d Moreover, account should be taken of railwaymen's benefits and privileges, including free travel from home to work, free travel vouchers for railwaymen and their families, and free uniforms and protective clothing

Mr Allen then quoted the following figures of average rates, actual earnings, and hours of work of different grades of railway workers

	Average Rate £ s d	Average Earnings £ s d	Average Hours
Passenger Guard	7 6 9	9 2 10	49 4
Ticket Collector	7 0 5	8 16 10	49 6
Goods Porter	6 5 6	7 12 1	47 4
Checker	6 16 6	8 9 1	47 4

He explained that had it not been for the operational economies already introduced, such as the curtailment of unremunerative services and the closing down of certain branch lines and stations, the Commission would have been unable to pay even these rates, nevertheless, efforts to improve economy were sometimes resisted by railwaymen—e g. in a recent "lodging turns" dispute on the Western Region. Pointing out that the Transport Act required the B T.C to meet all the charges imposed on it, taking one year with another, he estimated that, after allowing for interest and other central charges, the Commission would have incurred a deficit of over £20,000,000 in 1954 The deficit for 1955 was estimated at between £10,000,000 and £35,000,000, but would be increased considerably if higher wages were granted "Whilst the Commission would be able to raise fares and charges in many directions," he went on, "it would not be proper to meet the cost of still further wage increases by attempting to pass them on to the public—unless, of course, it is decided that the existing wage level is unreasonably low."

Mr. Allen concluded by blaming the N.U R for repudiating the October settlement instead of standing by it and putting in a new claim. He warned the union that if railway wages were raised out of relation to wages paid elsewhere in the transport industry, there was "a real danger that the Commission's service would be priced out of the market and the role of the railways in our national economy be seriously diminished."

The Court's Interim Report. The Court's preliminary findings were contained in an interim report published as a White Paper on Jan. 5, 1955, and are summarized below

(1) In the negotiations preceding the October settlement, the B.T C had erred in maintaining that claims for wage increases, even if recognized as valid and desirable, could not be conceded because of a financial bar imposed by the Transport Act

(2) Having negotiated and ratified a wages agreement, the N U.R had acted improperly in rejecting it, particularly when it was already in operation.

(3) Having rejected a ratified agreement, the N.U.R. executive had erred still further in refusing to enter into fresh negotiations unless the B.T.C. agreed to regard these as a continuation of the original claim for a 15 per cent increase, and guaranteed beforehand that a substantial part of the claim would be granted. As, however, the N.U.R. now agreed that it was improper to require such a guarantee, this obstacle to the resumption of negotiations had been removed.

(4) The Commission's argument that it was "prevented by certain terms of its financial constitution from paying wage rates which it might agree to be proper" was "not only undesirable in this nationalized industry, but was unsound in the light of figures provided by the Commission, and should not be repeated."

(5) The award of the Railway Staffs National Tribunal to locomotive men on Nov. 15, 1954, had "introduced a new factor into the situation," and there was "a case for a critical examination of all wage-rates fixed by the October settlement."

(6) Negotiations should therefore be resumed at the earliest possible moment and "be conducted with a sense of urgency . . . at the same level at which they broke off." Resumption, however, was only possible "in an atmosphere free from the menace of strike action."

In regard to (2), the report pointed out that the N.U.R. executive had "full power under the union's constitution to enter into binding agreements, subject only to challenge or appeal at the union's annual conference" The Court therefore considered that "such a repudiation of a negotiated agreement by a body authorized and empowered to enter into it is unprecedented in the history of railway wage negotiations, and, if allowed to pass unchallenged, would strike at the root of industrial negotiations"

With regard to the breakdown of negotiations in December, 1954, the report commented "It is clear that the delay in reaching agreement, and the nature of the contentions made by the B T C . had caused a sense of exasperation and frustration in the minds of the negotiating members of the N.U R executive .. Throughout the negotiations, and indeed in the discussions before us, the B.T C. were maintaining two apparently contradictory positions First, that the offers made by them have represented fair and reasonable wage rates, and second, that they were not able to offer such wages as they would have desired because of the financial limitations placed on them by the terms of the Transport Act It is not surprising that, faced with arguments so mutually contradictory, negotiators on the other side of the table should have had little faith in either"

Discussing the Commission's refusal to accede to the N.U R.'s demands, the report declared

"The nation has provided by statute that there shall be a nationalized system of railway transport, which must therefore be regarded as a public utility of the first importance. Having willed the end, the nation must will the means This implies that employees . should receive a fair and adequate wage, and that, in broad terms, the railwayman should not be in worse off case than his colleague in comparable industry."

[This passage in the interim report aroused much criticism in the Press and elsewhere, and in its final report, published on Jan. 25, the Court explained that it had wished to stress "the danger of attempting to hold rates at figures other than those related to similar competitive industries" The report continued "It is implicit in all this that the wage must be properly earned and that to be fair it must be, not only no lower than it should be, but also no higher than it should be. The right to receive a fair and adequate wage is no more than this

"It is fundamental that the employer is entitled to expect, and the employee is bound to give, a fair day's work for a fair day's wage. It is further clear that in this case both employee and employer must be under a particular obligation to join in making effective all measures which are necessary and reasonable for the improvement of productivity and the promotion of efficiency It is implicit in any properly-run industry that it should not be called upon to carry redundant staff This applies particularly to the railways in their present financial position and with their obligations to the public to ensure efficiency and economy in working"

In view of the "present unhappy position" with regard to labour relations, the Court recommended "a searching and detailed inquiry into certain of the Commission's operations."]

Meanwhile the N.U.R executive had announced on Jan. 6 that, in view of the Court's findings as expressed in its interim report, it had decided to call off the strike, and that a full examination with the B T C of the wages of all grades involved would begin as soon as possible.

The January, 1955, Settlement with the N.U.R. Discussions between the Commission and the N.U R. on minimum rates for operating grades other than footplate men accordingly began immediately. On Jan. 7 Sir Brian Robertson announced that the union, which had demanded a weekly minimum of £6. 15s. for porters and other "starting grades," had accepted the Commission's offer of £6. 11s. a week in the first year, rising annually by 2s. a week to £6 15s in the third year. The increases, which would take effect from Jan 10, would benefit about 60,000 railwaymen and were estimated to cost the Commission over £1,000,000 a year. Sir Brian added that the N.U.R had reiterated its pledge (given in October, 1954) to do everything possible to raise rail productivity and efficiency, and that the increases had been granted in conformity with the Court's recommendations, which had been "accepted by the Commission for the purpose of resolving this particular dispute and not as a governing principle for the future" The new rates would be used as a base on which a new wages structure could be built, and machinery would be set up immediately to deal with other grades.

The B T.C. announced on Jan 19 that agreement had been reached with the N.U R on increases, ranging broadly from 7s. to 10s. weekly, for all other operating grades except footplate men. The increases, which would affect a further 260,000 men and operate from Jan 10, would amount broadly (when taken together with the increases already granted) to concession of the whole of the N.U.R.'s claim for rates 15 per cent above those in force in July, 1953. Representative maximum weekly rates outside London would thus be . guard, £8; signalman, £9. 10s ; shunter, £7. 8s ; ticket collector, £7. 9s. All operating grades in London would continue to be paid 3s. weekly more than elsewhere

On the same day the N.U R. stated that the Commission had also proposed the following further increases for footplate men : adult engine cleaner, 6s. ; firemen, 5s. 6d. - 6s. 6d., driver, 2s. 6d. The top rate for drivers would thus be brought up to £9 15s, the rate demanded by the N.U R, but although the N.U.R. was prepared to accept these further increases, no settlement could be reached without the ASLEF's concurrence.

The Commission announced on Jan. 20 new salary scales for clerical and supervisory grades (including clerks, stationmasters, and superintendents) providing for annual increases of from £20 to £100,

together with a reduction in the number of grades from eight to six. Most of the 100,000 employees affected belonged to the Transport Salaried Staffs' Association, but some N.U.R. members were included.

The Strike Threat by ASLEF. The ASLEF executive decided on Jan. 19 to reject the Commission's offer for footplate men on the ground that the increases were too small to restore the differentials which had been upset by the rises for lower-paid workers granted on Jan. 7. On Jan. 25 it announced that it would submit to the Transport Staffs' National Tribunal a claim for an all-round increase of 8s., but on April 16 the Tribunal rejected this claim and ruled that the rates offered by the Commission should obtain from Jan. 10. The ASLEF executive thereupon decided to call a strike as from midnight on May 1.

Repeated appeals by the B.T.C. to the Society to reconsider its decision were rejected, and on April 21 meetings took place between Sir Walter Monckton and the ASLEF leaders, and also between the latter and the T.U.C. General Council. These, however, proved fruitless, as did a warning by Sir Walter of the "grave consequences to the country's economy" and the "possibility of widespread unemployment" which a strike would entail.

Further talks between the Commission and the ASLEF executive took place at the Ministry of Labour on April 28, but were also unsuccessful. On the following day Sir Walter Monckton explained in the House of Commons that the executive had demanded an undertaking that discussions on its proposals should be concluded "by a definite and early date," and that they should take place between the Commission and the ASLEF alone, without the intervention of the N.U.R. The Commission had been unable to accept these demands because it considered (*a*) that acceptance of a time-limit for discussions would be "tantamount to conducting discussions under the threat of a suspended strike", (*b*) that negotiations on differentials could not be conducted without N.U.R. participation.

On the same day, however, the T.U.C. General Council, in an eleventh-hour effort to avert the stoppage, discussed with the Commission a new basis for settling the dispute, and on April 30 the ASLEF executive agreed to suspend the strike pending the result of renewed negotiations with the Commission, in which the N.U.R. would participate. A preliminary meeting between the Commission and ASLEF alone took place on May 2.

Breakdown of Negotiations. - Renewal of Decision to Strike. The renewed discussions between the Commission and the two unions began on May 6 and continued during the first half of the month. On May 19, however, both the ASLEF and the N.U.R. rejected new proposals put forward by the Commission, which were intended to adjust the rates of certain classes of drivers so as to relate their pay more closely to their skill and responsibility. These provided for (1) the division of train-working into two groups, according to importance; (2) the payment of an extra 5s. weekly to drivers and motormen working the more important trains and of an extra 2s. 6d. to those working the less important ones, with no payments, however, to shunting drivers or to firemen; (3) the introduction of new "mileage allowances" of 3d. (drivers and motormen) and 2½d. (other footplate men) for every 10 miles worked above 80 miles daily and up to 145 miles, beyond which the existing allowance of one hour's pay for every additional 15 miles worked would still apply. [With regard to (2), it was explained in the Press that about 30 per cent. of drivers were confined to shunting duties and would not benefit by the proposal, but that about 10 per cent. of drivers would receive the extra 5s., and the remaining 60 per cent. the extra 2s. 6d.]

Following the breakdown of the talks, the ASLEF executive informed the Commission on May 20 that it had instructed the Society's members to cease work at midnight on May 28 (the Saturday of the Whitsun week-end).

Efforts to Avert the Strike. The ASLEF decision to proceed with the strike was followed on May 20 by a meeting at 10, Downing Street, between the Prime Minister, the Minister of Labour, and members of the T.U.C. General Council, at which Sir Anthony Eden gave a warning that the stoppage, if it materialized, would "undoubtedly inflict hardship on the public, impair the country's chances of continued prosperity, and cause widespread unemployment." Urgent meetings during the next few days between Sir Walter Monckton and the B.T.C., and between the T.U.C.'s general purposes committee and the ASLEF executive, proved fruitless, and on May 25 ASLEF rejected the T.U.C.'s invitation to meet the N.U.R. executive (which had instructed its members not to participate in the strike) under its auspices. On May 27 ASLEF also rejected, as "coming too late," an offer by the Ministry of Labour to set up a conciliation board to assist in the discussions between the B.T.C., the ASLEF, and the N.U.R. At a subsequent press conference, Mr. Baty explained that in the Society's view the Commission had not adhered to the terms of the formula of April 30 (under which the proposed strike on May 1 had been averted), and had given no indication that it was willing to consider the ASLEF's proposals. Last-minute efforts on May 28 by the Government and the T.U.C. to avert the stoppage proved equally abortive, and the strike notices, affecting about 70,000 footplate men, accordingly took effect at midnight on that date.

The withdrawal of their labour by the ASLEF men brought normal rail services virtually to a standstill. Although skeleton services were operated in most areas with engine crews made up of N.U.R. men, only about 200 special passenger trains could be run on May 29 (compared with the normal weekday total of 24,000), whilst freight train working was almost entirely suspended. On the same day the B.T.C. estimated that out of 3,688 motive-power men who should have reported for duty during the first six hours of the strike, only 608, or 16.4 per cent, had actually done so.

The Prime Minister, in a broadcast from Chequers on May 29, reviewed the efforts made to avert the strike, indicated the difficulties which had stood in the way of a settlement, and gave a pledge that the Government would do everything possible to protect the nation from the worst effects of the stoppage.

Dealing first with the reasons underlying the failure of the normal machinery to effect a settlement, Sir Anthony Eden said: "You are entitled to know how this unhappy situation has come about, for it will affect every one of us. The Amalgamated Society [ASLEF] claim that changes made in the rates of pay on the railways since last November, although giving all-round increases, have made worse the position of the footplatemen, drivers, firemen, and engine-cleaners in relation to other grades of railway workers. They say the position should be restored to what it was in November by giving further rises in pay to the footplate grades.

"The British Transport Commission were unable to agree. They said that because the footplate grades have been given a lead of a certain amount over other grades last November, this could not imply that this same lead could always be maintained. They knew that if increases were given to footplatemen, the National Union of Railwaymen would insist upon corresponding advances being given immediately. There was no doubt about this, because the N.U.R. had confirmed the fact to the T.U.C. and the Minister of Labour.

"The British Transport Commission had to assume that if this concession was given, then the ASLEF would once more make a claim that the relative position of their members must be restored, and the Commission would have been confronted with an endless succession of pay rises for which industry and the travelling public would have had to find the money.

"The Minister of Labour and the T.U.C. have worked untiringly to try and end the strike. One of the major difficulties has been the absence of common ground between the unions. Without this the Commission could not know the full size of the bill which they and all their customers would be asked to meet. The Minister was unable to get the unions to establish a common front on which the Transport Commission could deal with them. Sir Walter Monckton suggested a board of conciliation should be set up. This would have helped, and might have created an atmosphere in which a settlement could have been reached. The ASLEF rejected this. Yesterday, again with the help of T.U.C. representatives, another series of attempts were made to find a way out. These failed.

"Although this is a dispute between ASLEF and the Transport Commission, the difficulties in the way of settling it have mainly been brought about by the differing points of view between the two unions involved. The prospects for peace in this great industry would be transformed if only these two unions would talk and work together.

"Today we know that all these efforts have come to nothing. Whatever happens now the country is going to be hurt, and many of you will suffer inconvenience and hardship. More serious still, the damage which must be caused will injure our country in a world which is becoming increasingly competitive. Supplies to factories will be affected at once. This must bring unemployment on a rapidly increasing scale to workers in no way involved in this dispute.

"Hardship and loss there must be, but we will do all we can to protect the nation from the worst effects of this strike. That is the Government's clear duty, and we intend to discharge it. We must ensure supplies of food for all, and sufficient fuel for the essential public services such as water, sewerage, and hospitals. The Government will not hesitate to obtain any further powers that may be necessary for this purpose. You can help us. We will tell you how. Plans have been prepared, and will now be put into operation. . . .

"The Government will, of course, do everything in its power to help to bring about a settlement of this dispute. The Minister of Labour and his officers will continue their efforts. We all hope that a way will soon be found to bring this strike to an end. But, after all, this business can only end when negotiations begin again, and the sooner we get there the better."

The Government statement referred to by Sir Anthony Eden, outlining the measures to be taken to maintain essential services and to assure "an adequate supply of food for all," was issued on the same day and is summarized below.

After pointing out that supplies to industry would "inevitably be curtailed," the statement said that although postal, telegraph, and telephone services would continue to operate, the postal services in particular would be "below the normal standard." It continued: "The postal services . . . depend largely for their operation on the railways. Where trains are not available, the mails must be carried by other means. In order to keep the essential postal services going, the Service Departments are assisting the G.P.O. by providing aircraft and up to 250 lorries to carry essential mails over the longer postal trunk routes. Even with this assistance there will be some delay in delivery of mails, but the G.P.O. are doing their best to reduce this to the minimum. No Servicemen are being employed anywhere on the railways."

The statement appealed to the public to be sparing in the use of fuel, light, and power; to use postal, telegraph, and telephone services as little as possible; and wherever practicable to give lifts in private cars. In this connexion it explained that the Minister of Transport and Civil Aviation had arranged with representatives of the insurance market (1) that any use of private cars, except use for hire, should be allowed under the owners' insurance policies; (2) that immediate cover should be given to owners of laid-up cars who wished to use them during the emergency. The Government

would also indemnify (where necessary) owners or users of private cars and goods vehicles against legal liability in respect of death or injury to passengers, provided that the vehicles displayed the notice "Free Lifts at Your Own Risk," and that the passenger's attention had been drawn to this notice

The statement added that ample stocks of food were available throughout the country, that it might be necessary later to introduce severe restrictions on the use of gas or electricity, and that, whilst trade and industry were generally expected to make their own arrangements for the carriage of goods and passengers, the Ministry of Transport would "do all that is physically possible to secure the movement of traffic necessary to maintain essential supplies and services"

The manpower situation showed a slight improvement on May 30, the B.T.C. announcing that about 18.5 per cent of the footplate men due to work had reported for duty, with the result that British Railways had been able to run about 1,200 passenger and 200 freight trains to deal with urgent traffic. The position further improved on May 31, over 2,000 passenger and some 850 freight trains being run on that date.

The Emergency Regulations approved by the Queen on May 31 (effective from June 1) numbered 25, and were as follows.

(1) A regulation permitting the Minister of Transport and Civil Aviation to authorize goods vehicles to be used without 'A,' 'B,' or 'C' carriers' licences, or outside the terms of existing licences.

(2) Allowing passenger vehicles to be used (by permission of the Minister) without a public service vehicle licence or without a road service licence.

(3) Allowing the Minister to permit unlicensed persons to act as drivers or conductors of road passenger vehicles, and to waive the limit on the number of persons carried.

(4) Allowing the Minister to authorize the use on the roads of vehicles normally operating within factories or on open-cast coal sites

(5) Permitting the Minister to authorize the use of vehicles without an Excise licence

(6) This regulation permitted the waiving of some formalities connected with third party insurance, but did not dispense with the necessity for such insurance

(7) This allowed the Minister of Transport to relieve the B T C. and the London Transport Executive of their statutory obligation to carry passengers and goods, and to permit them to refuse less urgent goods in favour of essentials.

(8) Permitting the Postmaster-General to refuse to take letters or parcels above a certain weight.

(9) This allowed the Ministry of Fuel and Power to relieve Gas and Electricity Boards of the statutory requirements to supply gas and electricity, or to vary the quality of the service supplied

(10) This allowed the Minister to restrict the consumption of electricity or gas

(11) This regulation permitted the Minister to control the distribution of petrol, diesel oil, paraffin, or other liquid fuel

(12) This allowed the Minister of Agriculture, Fisheries, and Food to regulate the distribution of food and animal feeding-stuffs.

[It was explained that Regulations (9), (10), (11), and (12) were not immediately necessary, but would be held in reserve if the strike proved to be prolonged.]

(13) Authorizing the requisitioning of "chattels," including road vehicles. It was explained, however, that no requisitioning was at present intended, as there were plenty of vehicles available and on offer

(14) This regulation (which was precautionary) penalized acts of sabotage against essential services It was held in reserve in case of breaches of public order.

(15) to (21). These regulations dealt with the preservation of public order, and prescribed penalties for offences against the regulations. The maximum penalty on summary conviction was fixed at three months' imprisonment, £100 fine, or both. It was specifically stated that participation in a strike, or peacefully persuading others to take part, was not an offence

Regulations (22) to (25) were purely formal, giving power to revoke or vary Orders by subsequent Orders, and dealing with the legal interpretation of terms.

The last occasion on which a state of emergency had been proclaimed was on June 29, 1948, when the Labour Government took such action as the result of a widespread strike in the London docks (see 9365 A). The Emergency Powers Act dates from 1920.—(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times) **(Prev. rep. 13419 B.)**

A. HIGH COMMISSION TERRITORIES. — Appeal Court for Basutoland, Bechuanaland and Swaziland.

An announcement from Maseru (Basutoland) on May 1 stated that an Appeal Court for the three British High Commission territories in South Africa had been established by Order-in-Council, with Sir Harold Willans (Chief Justice of the territories) as its president. The new court will hear appeals from High Courts in the territories (such appeals had formerly to be made to the Privy Council in London), thereby enabling civil and criminals cases to be dealt with more expeditiously.

B. WESTERN GERMANY. — Ministerial Appointments. - Dr. von Brentano appointed Foreign Minister. - Herr Blank becomes Minister of Defence.

The Federal Chancellor, Dr Adenauer, tendered his resignation as Foreign Minister to President Heuss on June 6, and recommended that the post should be taken over by Dr. Heinrich von Brentano. At the same time he recommended that Herr Theodor Blank, the Defence Commissioner, should become Minister of Defence in the Federal Government, and that Dr. Hans von Merkatz should enter the Government as Minister for Bundesrat Affairs in succession to Herr Hellwege, consequent upon the latter's recent appointment as *Land* Premier of Lower Saxony. Dr. von Brentano, Herr Blank, and Dr. von Merkatz were nominated to their new portfolios on the following day by President Heuss.

Dr. Heinrich von Brentano (51), a lawyer, was imprisoned by the Nazis in July, 1944, and after the war was one of the founders of the Christian Democratic Party in Hesse A Roman Catholic, and a close associate of Dr Adenauer, he has led the Christian Democratic Party in the Bundestag for nearly six years, and was a member of the committee which drafted the Federal Constitution Prominently associated with the movement for European integration, he has been a vice-president of the Consultative Assembly of the Council of Europe for the past five years

Herr Theodor Blank (49), a trade union official, and a former carpenter, became secretary of the Association of Christian Transport and Factory Workers at the age of 25 He refused to take any part in the nazification of the trade unions during the Hitler regime, and played no part in trade union or political life during that period He was taken prisoner on the Russian front during the war, in which he served as a lieutenant in an armoured unit After 1945 he attained a leading position in the German trade union movement, and was elected to the Bundestag as a Christian Democratic deputy. He had been Defence Commissioner since 1950

Dr von Merkatz (49), leader of the German Party in the Bundestag, is a member of the Consultative Assembly of the Council of Europe. He is descended from an old Prussian family.

Dr. von Brentano became the first Foreign Minister of the German Federal Republic other than Dr. Adenauer, who had held that post—concurrently with the Chancellorship—since the Federal Republic's inception Herr Blank, similarly, became the first Defence Minister of the Federal Republic.

C. AUSTRALIA. — New South Wales Flood Disaster.

The most serious natural disaster in Australia's history occurred in late February and early March, when prolonged torrential rains in northern New South Wales caused many rivers to flood and resulted in severe damage to a number of towns and the inundation of tens of thousands of square miles of land. Nearly 100 people lost their lives in the disaster. more than 50,000 were rendered homeless, extensive damage was done to property, and there were very heavy losses of sheep and cattle. The total damage was subsequently estimated at about £A15,000,000.

The first river to flood was the Hunter, where the town of Maitland suffered extensive damage and thousands of people had to be evacuated, the towns of Singleton and Muswellbrook also suffered heavy damage, and the main railway line from Newcastle to Brisbane was cut for three weeks. The greatest danger subsequently arose from the flooding of the rivers flowing westwards and northwards into the Darling—the Bogan, the Macquarie, the Castlereagh, the Namoi, the Gwydir, and the Barwon. The towns most seriously affected in this area were Narrabri and Wee Waa (on the Namoi), Warren and Dubbo (on the Macquarie), and Gilgandra and Gular (on the Castlereagh), several of which were completely surrounded by flood waters.

Extensive help was immediately provided for the stricken areas, both by the State and the Commonwealth Governments, and food, clothing, blankets, and medical supplies were flown in by R.A.A.F. planes Helicopters and Army amphibious vehicles were used to evacuate people, many of whom had spent hours in trees or on the roofs of submerged buildings Fodder was dropped to the few cattle which had not been swept away by the floods.

Flood relief funds were opened in all Australian States and also in Britain, and supplies of food and clothing or sums of money were contributed by Governments, firms, and individuals throughout the Commonwealth, as well as by a number of other countries. Altogether, over £A3,000,000 was contributed, of which more than £A1,000,000 was given by individuals in Australia, £250,000 was donated by the British Government, and over £75,000 was raised from private contributions in Britain. Among the principal contributions were £10,000 from the New Zealand Government, £10,000 from the Netherlands Government, and £5,000 from the Holy See.

A. UNITED STATES. — Prohibition of Segregation of Negro Children in Schools. - Supreme Court's Ruling on Implementation of Earlier Decision.

The U S. Supreme Court held hearings on April 11-14 on the question of how and when its decision of May 17, 1954, ruling that the segregation of Negro children in schools was unconstitutional (see 13593 A), could be implemented. Hearings were originally to have opened on Dec. 6, 1954, but had been postponed owing to the Senate's delay in confirming the appointment of Judge Harlan to the Court. The cases before the Court came from the States of Kansas, South Carolina, Virginia, and Delaware, and the District of Columbia. In addition, briefs were submitted as "friends of the court" by the States of Florida, Oklahoma, North Carolina, Arkansas, Texas, and Maryland, and also by the Department of Justice.

All the States concerned argued that it was impossible to break down local prejudices and customs by a Court order, and therefore urged that there should be delay in implementing the Court's decision. The Department of Justice also argued that the Supreme Court should give States and local communities a reasonable time to end segregation, though it emphasized that "popular hostility" was no legal justification for failure to end it. On the other hand, counsel for the National Association for the Advancement of Coloured People, representing Negro parents in four of the five original cases, contended that there was no reason for delay, they suggested that the unified system should be proclaimed and enforced not later than Sept 1, 1956, and that all local school districts which failed to comply with the unified system by Sept. 1, 1955, should explain the reason for the delay to the local courts.

Extracts are given below from the arguments put forward in the briefs and in oral argument before the court.

The **Virginia** brief declared that the State Government considered integration in its public schools to be "impossible at this time," and that it did not foresee a complete solution to the problem at any future time It said "Government still derives its foundation from the consent of the governed. The people of many sections of Virginia have stated forthrightly that they will not consent to compulsory integration of the races in the public schools. Neither court decree nor executive order can force on those sections a result so basically opposed by a united majority" The State's Attorney-General informed the Court that a commission had been appointed by the Governor of Virginia to formulate a legislative programme for a transition to the new system, and said that if this commission were permitted to seek an orderly solution, it might be possible for Virginia to work out "some method which would meet the full requirements of the Court and yet avoid raising practical problems which would defy solution in various parts of the State." In support of its argument that integration of schools should be proceeded with very slowly, the Virginian brief quoted statistics of intelligence quotient and reading tests, of the incidence of tuberculosis and venereal disease, and of the percentage of illegitimacy, which were designed to show the lower educational level of Negroes, their higher liability to contract infectious disease, and their allegedly lower level of parental morality.

The **South Carolina** case, which was presented on behalf of Clarendon County (the district where the case originated) and not by the State itself, similarly argued that de-segration should not be implemented too rapidly, as attitudes of mind would have to be changed. Any attempt by the Court to set up "criteria of de-segregation" would be an invasion of the legislative and administrative fields of Government, it was stated The Supreme Court had, however, equity powers to permit "effective gradual adjustments," and should remand the cases to district courts for the formulation of decrees.

For **North Carolina** it was argued that a Court order requiring immediate integration might provoke "racial tension and animosities unparallelled since those terrible days that gave rise to the Ku Klux Klan." Moreover, it was held that any attempt to compel the intermixture of races in the State's public schools "would result in such violent opposition as to endanger the continued existence of its schools." The Court should not attempt to formulate decrees but should allow the "greatest possible latitude" to district judges in conducting hearings and formulating final decrees "if the objectives sought by this Court's decision are to be attained"

Florida likewise pleaded for "time, tact, and wisdom" in implementing the Court's ruling, as the State was not ready for a programme of immediate integration; an order that set a "date certain" for an end to segregation would only hamper the efforts of people of goodwill to solve the problem, and might lead to violence. **Texas** also insisted that an attempt at immediate de-segregation would be "rash, imprudent, and unrealistic," and expressed the view that local school boards should be allowed to handle the adjustment to an integrated school system. In reply to a question from Chief Justice Warren on April 13, however, the Attorney-General of Texas admitted that the State had not as yet taken any specific action to bring about de-segregation.

Among the border and other States less affected by the question **Delaware** stated that there had been significant progress in abolishing segregation, but that anti-integration demonstrations had shown that "a significant percentage" of the people in parts of Delaware were not ready to accept integration. **Kansas** explained that segregation was not a State policy and that the localities in which it had prevailed had taken steps to end segregation by September, 1955 Segregation in **Maryland**, it was stated, had been "well on its way out" before the Supreme Court's decision, gradual adjustment should be permitted and, "if left alone to devise in good faith a timetable for the de-segregation of every school in Maryland, the local authorities will be best able to solve the problem with the fewest possible ill-effects" For **Arkansas** it was suggested that the Court might leave to Congress some of the detailed implementation of its decision, legislation providing penalties for denying Negro students admission to schools of their choice, it was thought, could well have a deterrent effect on efforts to evade the Court's ruling Counsel for the **District of Columbia** stated that an integrated school system would be in operation there by Sept. 1, 1955, and that no directive from the Court was therefore necessary

Counsel for the **National Association for the Advancement of Coloured People,** representing Negro parents in four of the five original cases, rejected all arguments in favour of delay in implementing the Court's decision, and declared that there was "no reason for supposing that delay can minimize whatever unpleasant consequences might follow from the eradication of this great evil" The argument that the Court should postpone constitutional rights had never been advanced before, and was only made when Negroes were involved The enforcement of constitutional rights should be uniform throughout the country and should not "mean one thing in one State and another thing in another State" Arguing that the Supreme Court itself could contribute to "an effective and decisive change in attitude by insisting that the present unlawful situation be changed forthwith," the brief suggested that the Court should fix September, 1956, as an "outside date" by which absolute compliance with the non-segregation ruling should become universal and mandatory

Referring particularly to the Virginian argument on the alleged educational inferiority and proneness to ill-health of the Negro, the brief stated "That the Negro is so disadvantaged educationally and culturally in the States where segregation is required is the strongest argument against its continuation for any period of time Those who use this argument as a basis for interminable delay in the elimination of segregation are in reality seeking to utilize the product of their own wrong-doing as a justification for continued malfeasance. State briefs seek to limit further the educational rights of Negro students by broad characterization of group intelligence, group morality, and health. The conditions they complain of can never be remedied as long as segregation in public schools is continued."

The **Department of Justice,** in a brief signed by the Attorney General (Mr Brownell) and the Solicitor General (Mr. Sobeloff), argued that the Court should not fix a deadline which all areas affected by the segregation ruling would be required to observe, but should give States and local communities reasonable time to end segregation in schools It also thought that specific decrees for ending segregation should be left to the lower courts under general rules to be laid down by the Supreme Court. "Racial segregation in public schools," it argued, "is unconstitutional and will have to be terminated as quickly as feasible, regardless of how much it may be favoured by some people in the community There can be no local option on this question, which has now been finally settled by the tribunal empowered under the Constitution to decide it." The Department said that whilst "popular hostility," where it was found to exist, was a problem that needed to be recognized and faced with understanding, "it can afford no legal justification for a failure to end segregation."

The Department suggested that the Supreme Court should issue the following "ground rules" to guide the lower courts in formulating their decrees:

(*a*) The [lower] court's decree should make clear that State laws in conflict with the Supreme Court's ruling of May 17, 1954, were invalid.

(*b*) The five pending cases should be remanded to the lower courts with instructions to request local authorities to submit within 90 days a plan to end segregation "as soon as feasible."

(*c*) If no satisfactory plan were offered, the courts should issue "appropriate orders" directing an end to segregation at the beginning of the next school term.

(*d*) When a plan was put forward, court hearings should be held to determine whether it provided for transition to an integrated school system as expeditiously as local conditions permitted. The judge would decide whether the plan was offered in good faith and would fix the earliest possible date for its completion.

(*e*) The District Courts should require progress reports from time to time to make sure that there was no unnecessary delay in the execution of the programme.

(*f*) The lower courts should be required to submit periodic reports to the Supreme Court, which would retain jurisdiction to issue any further orders it deemed necessary to carry out its decree.

"Where there are no solid obstacles to de-segregation," it was argued, "delay is not justified and should not be permitted. It is only where the lower court finds upon clear and convincing evidence that the defendants have met the burden of showing that its immediate [i.e. at the beginning of the next school term] completion of the programme is impractical, that any delay is justifiable. In such a situation the District Court should fix the shortest practical period for completing de-segregation."

The Solicitor General declared in his final statement before the Court that an order making clear that segregation laws were unconstitutional would strengthen the hands of the Federal district judges. On the other hand, he added, a "flexible" decree leaving details of enforcement to the discretion of the lower courts would not tie the hands of judges in their efforts to meet local conditions.

On May 31 the Supreme Court issued a unanimous opinion in which it directed the States to make a "prompt and reasonable" start towards implementing its ruling that segregation in schools was unconstitutional It accepted the argument that the local courts, because of local conditions, were best able to formulate the necessary decrees, and accordingly remanded the five cases to the courts which originally heard them.

After reiterating "the fundamental principle that racial discrimination in public education is unconstitutional," and that "all provisions of Federal, State or local law requiring or permitting such discrimination must yield to this principle," the opinion went on

"Full implementation of these constitutional principles may require solution of varied local school problems School authorities have the primary responsibility for elucidating, assessing, and solving these problems, courts will have to consider whether the action of school authorities constitutes good-faith implementation of the governing constitutional principles Because of their proximity to local conditions and the possible need for further hearings, the courts which originally heard these cases can best perform this judicial appraisal Accordingly, we believe it appropriate to remand the cases to those courts

"In fashioning and effectuating the decree, the courts will be guided by equitable principles Traditionally, equity has been characterized by a practical flexibility in shaping its remedies and by a facility for adjusting and reconciling public and private needs These cases call for the exercise of these traditional attributes of equity power

'At stake is the personal interest of the plaintiffs in admission to public schools as soon as practicable on a non-discriminatory basis To effectuate this interest may call for elimination of a variety of obstacles in making the transition to school systems operated in accordance with the constitutional principles set forth in our decision of May 17, 1954 Courts of equity may properly take into account the public interest in the elimination of such obstacles in a systematic and effective manner But it should go without saying that the vitality of these constitutional principles cannot be allowed to yield simply because of disagreement with them

"While giving weight to these public and private considerations, the courts will require that the defendants make a prompt and reasonable start toward full compliance with our ruling of May 17, 1954 Once such a start has been made, the courts may find that additional time is necessary to carry out the ruling in an effective manner. The burden rests upon the defendants to establish that such time is necessary in the public interest, and is consistent with good-faith compliance at the earliest practicable date. To that end, the courts may consider problems related to administration, arising from the physical condition of the school plant, the school transportation system, personnel, revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis, and revision of local laws and regulations which may be necessary in solving the foregoing problems They will also consider the adequacy of any plans the defendants may propose . . . to effectuate a transition to a racially non-discriminatory school system During this period of transition, the courts will retain jurisdiction of these cases

"The judgments [i e the original judgments of the lower courts], except that in the Delaware case, are accordingly reversed and remanded to the district courts to take such proceedings and enter such orders and decrees consistent with this opinion as are necessary and proper to admit to public schools on a racially non-discriminatory basis, with all deliberate speed, the parties to these cases The judgment in the Delaware case—ordering the immediate admission of the plaintiffs to schools previously attended only by White children —is affirmed on the basis of the principles stated in our opinion of May 17, 1954, but the case is remanded to the Supreme Court of Delaware for such further proceedings as that court may deem necessary in the light of this opinion"

The Supreme Court's ruling was generally well received in the southern States, though spokesmen in Georgia, South Carolina, Louisiana, and Mississippi expressed their intention of continuing with segregated schools.

Governor Griffin of Georgia declared: "We shall continue to operate our schools as we have always operated them", the Attorney General of South Carolina asserted that the Supreme Court was illegally attempting to amend the Constitution; State Senator William Rainach of Louisiana, head of the State's Joint Legislative Committee on Segregation, expressed the view that the Supreme Court's ruling "gives us room to continue our fight"; and the Attorney General of Mississippi declared: "The next move will be up to those who wish to destroy segregation in schools. We are ready for anything they may wish to come up with."

Following the Supreme Court's decision of May 17, 1954, that segregation in schools was unconstitutional, action had been taken in a number of States to implement the Court's ruling, though some States had sought to impede or nullify that decision. Broadly speaking, four States—Delaware, Maryland, Missouri, and West Virginia—and the District of Columbia had started the process of integration; four States —Georgia, Mississippi, Louisiana, and South Carolina—had remained strongly opposed to it; whilst the remaining nine States—Arkansas, Alabama, Florida, Kentucky, Oklahoma, North Carolina, Tennessee, Texas, Virginia—had awaited further action by the Supreme Court before taking any action themselves. In Delaware, Maryland, and the District of Columbia the opening of previously all-white classrooms to Negro students aroused a certain amount of local opposition. A summary of these events is given below.

In **Mississippi, Georgia,** and **South Carolina,** the State Legislatures approved amendments to the State Constitutions which gave the States authority to abolish the public school system and to subsidize private schools as a means of maintaining segregation. In addition, the Georgia Senate and House of Representatives passed a Bill forbidding the spending of State money on any school in which the races were mixed A subsequent measure was adopted in Georgia requiring all teachers to swear not to teach in 'mixed" classrooms

In **Louisiana,** an amendment to the State Constitution was adopted which provided that the State could use its inherent police power to continue segregation in the schools in order to maintain public health, morals, peace, and good order.

In **Florida,** the State Supreme Court (in an opinion on Nov 17) criticized the U S Supreme Court's ruling as "a great mistake" calculated to retard rather than to accelerate the removal of segregation from public schools. The court expressed the view that the question of segregation was a legislative rather than a judicial one.

As a result of mounting tension and threats of violence in Milford, **Delaware,** two public schools which had admitted a number of Negro students on Sept 7, at the beginning of the school year, were obliged to close about a fortnight later. They reopened again on Sept 27 with the Negro children in attendance, but were boycotted by about 70 per cent of the White pupils. The school board thereupon resigned and a new school board ordered a return to segregation in the school The right of the Negro children to attend the school was upheld in the Delaware Chancery Court on Oct 14, but this decision was reversed on Feb 8, 1955, by the State Supreme Court, which ruled that the Milford Board of Education had "no legal right" to admit Negro children to the previously all-white schools Agitation against racial integration in the Milford schools was largely directed by Mr Bryant W. Bowles, founder and president of a newly-formed "National Association for the Advancement of White People", he was arrested on Oct 10 and charged with conspiracy to interrupt the education of Delaware children, but the charges were dismissed on technical grounds on Dec 15

In **Maryland** and the **District of Columbia** there were protest marches, demonstrations, and absenteeism by White students in Baltimore and Washington at the beginning of October An appeal for a return to segregation in schools, made by White parents and by the "National Association for the Advancement of White People," was rejected by a Baltimore court on Oct. 6.

A report published on May 14 by the National Association for the Advancement of Coloured People stated that the abolition of segregation in schools had been started in the District of Columbia, Baltimore, 29 counties in West Virginia, 30 counties in Missouri, five towns in Delaware, six towns in Kansas, two towns in Arkansas, and in scattered communities in Arizona and New Mexico. It said that nearly 250,000 Negro and White children were attending classes peaceably together in 500 public elementary and secondary schools which, until 1954, had been for the exclusive use of one race or another—though it emphasized that this was admittedly only a tiny minority of the 9,821,000 White and 2,397,000 Negro children enrolled in schools in the "segregated" areas.

A. UNITED KINGDOM. — Gold and Dollar Reserves.

There were no changes in May in the sterling area's gold and dollar reserves, which on May 31 stood at $2,686,000,000, the same as on April 30. This figure was reached after (*a*) the receipt of $18,000,000 in U.S. defence aid, (*b*) the receipt of $31,000,000 from the European Payments Union, representing that part of the April settlement which was settled in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U.

Provisional figures for the E.P U. May settlement showed that the U.K. had a surplus of $22,400,000 (£8,000,000), which would be settled in June half in gold or dollars and half by a reduction in the U.K. debt to the Union.

B. DENMARK - UNITED KINGDOM. — Collaboration in Peaceful Development of Atomic Energy.

It was announced in London and Copenhagen on June 10 that the U.K. Atomic Energy Authority and the Danish Atomic Energy Commission had agreed on a joint ten-year programme of research and development in the peaceful application of atomic energy. It was disclosed that the U.K. Atomic Energy Authority would assist the Danish Atomic Energy Commission in designing and constructing a high-flux research reactor similar to one being built at Harwell, and would supply the necessary fuel elements for the Danish reactor. (Times - Berlingske Tidende, Copenhagen)

A. SOUTH AFRICA. — The Sophiatown Evictions.

The removal under the Natives Resettlement Act of the African population of Sophiatown (in the Western Areas of Johannesburg) to Meadowlands, a new Native township 11 miles away, began on Feb. 9, when about 130 families were moved. This operation had originally been scheduled to begin on Feb 12, but in order to forestall any attempt at organized resistance the date was advanced at the last moment by three days. The Minister of Justice, Mr. Swart, had previously issued a proclamation banning all public assemblies of more than 12 people, unless police permission had been obtained, for a period of 20 days within a 20-mile radius of Sophiatown. While the removals were in progress the entire route from Sophiatown to Meadowlands was guarded by European and Native police.

Defending his decision to impose a ban on public gatherings, Mr Swart alleged in the House of Assembly on Feb 9 that, according to police reports, groups of *tsotsis* (young Native hooligans) had been incited to use violence by certain persons, including Father Huddleston (of the Anglican Community of the Resurrection), chairman of the Western Areas Protest Committee He also alleged that the African National Congress had planned to arm Native youths and to attack European areas of Johannesburg, and that the Natives in Sophiatown were in possession of machine-guns, revolvers, hand-grenades, and home-made bombs He confirmed that police permission would be necessary to hold Church services, whilst Dr Verwoerd (Minister of Native Affairs) stated that such permission would be refused to Father Huddleston. On Feb. 11 Father Huddleston completely denied the allegations made against him, challenged Mr. Swart and Dr Verwoerd to repeat them outside Parliament, and stated that he would hold services as usual without applying for permission

Attempts by the African National Congress to organize a protest strike on Feb 12 collapsed after eight Native youths had been arrested, and on Feb. 15 a second batch of 150 families were removed under the guard of some 750 armed police. Mr. Swart announced on the latter date that the removal of the Africans was proceeding so peacefully that he had decided to lift the ban on meetings, although he would not hesitate to reimpose it if necessary. Five Africans who had been arrested for picketing during the strike were subsequently discharged, and 27 others involved in the agitation were sentenced to a fine of 10s or a week's imprisonment for being without passes.

Addressing a meeting at the Central Hall, Westminster, on Feb. 21, the Bishop of Johannesburg (the Rt. Rev. Ambrose Reeves) described the clearance of the Western Areas as "legalized theft" and as "morally indefensible." He pointed out that there were far worse slums around Johannesburg, such as Moroka, where 55,000 people were living in huts; Pimville, which had been condemned as long ago as 1913, and where 25,000 people were still living, and the Orlando shelters, where 34,000 people were living at an average of five to a room In the Western Areas, on the other hand, although slum conditions existed, there were many brick buildings which could provide good accommodation for many years Dr Reeves asserted that the Sophiatown evictions were being undertaken nominally as a "slum clearance" measure, but in reality as "a sop to the White voters" who objected to the proximity of Africans, and in order "to give effect to the determination of the authorities to prevent Africans in urban areas from continuing to have freehold rights."

It was emphasized in official statements that the primary object of the removals was to end the constant friction arising from the presence of an isolated Bantu housing area in the midst of White suburbs. Bantu freehold property owners in the Western Areas could opt to purchase freehold land in a released Bantu area, but such areas were almost entirely rural, and it would be a considerable time before suitable urban plots in the Bantu territories were available. In Bantu townships within the White areas, however, such as Meadowlands, Bantus would be given the right to purchase their houses, and would then receive long-term leasehold of the ground. Bantu freehold owners, it was argued, had proved incapable in the past of withstanding the temptation to sell their property to White and Indian speculators, who not only charged excessive rentals for the available housing, but also raised large bonds on the potential rent value of their plots and used the money to erect additional shanties on the same small area of ground, thus turning their property into overcrowded slum sites. It was also State policy that Bantus should live in White areas only as visiting or migratory workers, and should not be granted full ownership of land in those areas; in this connexion it was recalled that a similar ban on White freehold ownership had long existed in the Bantu territories.

About 10,000 Natives a year will be moved from the Western Areas, the clearance of which is expected to be completed in six to eight years. Rents for the various types of houses at Meadowlands will range from £2 to £4. 5s. a month, and will be assessed in accordance with the tenants' monthly earnings. The first of 12 schools to be erected on the site was opened on Feb 14, and it is planned to provide health centres, a cinema, crèches, a market, churches, and sports fields.

It was announced on March 10 that 40,000 Natives from the Apex squatters' camp at Benoni (near Johannesburg) would be moved to Daveytown, a new Native township in the Meadowlands area, over a period of two years beginning in April.

C. SUDAN. — Sudanization of Public Service.

The following official statement on the Sudanization of posts in the public services was issued by the Sudan Government on Jan. 12, 1955:

"The Sudanization Committee has completed the examination of all Government posts, and has decided that 598 posts held by British expatriates, out of 1,036, affect the free and neutral atmosphere requisite for self-determination. The Committee also decided that 11 posts are redundant and should be suppressed. The remaining posts—427—are non-influential. A high percentage of the posts held by Egyptian officials were decided to be influential, and must also be Sudanized. The Sudanization of all official posts should be completed by the end of this year."

The statement added that the Governor-General and the Council of Ministers had endorsed these decisions.

It was announced in London on the same day that a special agency, known as the Sudan Service Re-employment Bureau, had been set up by the Foreign Office to enable British officials who were leaving the Sudan as a result of the constitutional changes there to obtain re-employment.

It was reported from Khartoum on March 15 that five Indian and three Pakistani judges would shortly arrive in the Sudan to take the place of the British judges who had resigned a few months earlier as a result of the Sudanization measures taken by the Sudan Government.—(Times) **(Prev. rep. 13969 A.)**

A. KENYA. — Terrorist Activities and Security Operations, November 1954 to May 1955. - Breakdown of Further Surrender Negotiations. - Resignation of Colonel Young as Commissioner of Police. - Additional U.K. Financial Assistance for Kenya.

Terrorist activity in Kenya continued on a limited scale during the closing months of 1954 and the first five months of 1955, the terrorists being more and more confined to the Aberdare and Mount Kenya forest areas. Four Europeans were murdered in the seven months November to May: Mr. H. G. Shotton, a Quaker, known as a friend of the Kikuyu, was shot dead on his farm outside Nairobi on Dec. 28; two schoolboys, Christopher Twohey (13) and Geoffrey Danby (15), were stabbed to death near their home on the outskirts of Nairobi on April 21; and Mr. W. J. Weaver, a farmer, was fatally wounded on his farm 60 miles north of Nairobi on May 1.

Two major operations were carried out by troops and security forces in the forest areas. "Operation Hammer," the biggest single operation against the terrorists, was launched on Jan. 11 after intensive preparatory bombing of the forests, and ended on Feb. 12; ninety per cent of the total military forces were employed, and the total terrorist casualties were 99 killed, 32 captured and 30 surrendered.

A statement issued by G.H.Q., East Africa, on Feb 15, reviewing the results of the operation, said that it had had three main aims, to prove to terrorists that the forest was no longer a secure refuge, to kill or capture as many of them as possible, and to enable the security forces to carry on the offensive against Mau Mau in these areas. It claimed that all these objectives had been realized and pointed out, in explanation of the apparently meagre results in casualties inflicted, that a terrorist was an "elusive quarry" in thick forest. The statement said that among the more important results of the operation were the capture of a gang leader and the recovery of a large quantity of documents from Dedan Kimathi's headquarters.

A second major operation—"First Flute"—was conducted on the slopes of Mount Kenya and the forest areas at the end of February. This was preceded on Feb. 6 by a round-up of Mau Mau suspects in Nanyuki, which was believed to be the terrorists' main supply base for forest gangs in the Mount Kenya area, and which was surrounded at dawn by troops who carried out house-to-house searches for arms and ammunition. At the same time "hooded" ex-Mau Mau terrorists and Special Branch police screened 4,225 Africans who had been rounded up, of whom 1,091 were detained as definite suspects.

It was pointed out that the fact that the greater part of the military forces in Kenya had been used in "Hammer" and "First Flute" illustrated the success of General Erskine's policy of building up the Home Guard and police forces for security duty, and thereby releasing the troops for active operational duty. The success of the policy of restricting the terrorists to the mountain slopes and forest areas was also illustrated by the fact that the number of terrorist incidents had fallen by February to only one or two a week. Another problem with which the security forces began to be faced during this period was that of the *komerera*—small groups of terrorists who, after deserting from Mau Mau gangs, were living precariously between gang territory and the security forces, unable to go back for fear of gang vengeance, but afraid or unready to surrender. Although Mau Mau had ceased to mean much to such people as an object of loyalty, the *komerera* had been responsible for raids on farm workers' quarters and on flocks and herds in search for food.

New surrender terms for the terrorists, under which those who surrendered voluntarily would no longer—as hitherto—be prosecuted for past terrorist offences, were announced by the Governor, Sir Evelyn Baring, on Jan. 18.

It was nevertheless emphasized that they would be detained and that "irreconcilables" would not be allowed to return. At the same time the Governor announced that there would be no further prosecutions for offences committed before the previous day by members of the security forces in the course of their service, though he emphasized that "from this moment onwards any of you, or any other person, who commits any offence will be prosecuted with the full strength of the law." Pending cases [i.e., where an arrest had already been made] would, however, be proceeded with. The Governor also emphasized that the Government were determined to maintain intensified operations and to continue them until every terrorist had been captured or killed, or had given himself up.

Although the new surrender terms were accepted by the African and Asian communities in the colony as a possible means of expediting the end of the emergency, they aroused strong opposition from the White settlers.

The South Kinangop district association passed a resolution on Jan. 19, by 89 votes to two, condemning the surrender terms as "utterly shameful and foolish"; recording the association's lack of confidence in the War Council and the conviction that its membership should be changed; and declaring that "the exemption of murderers from prosecution must be terminated forthwith." At a public meeting at Limuru on Jan. 25, 250 constituents of Mr. Havelock (Minister of Local Government and Health) passed with fewer than 10 dissentients a resolution deploring the new surrender terms and strongly urging that they should be effective only until the end of January, "after which date a state of rebellion should be declared and all terrorists treated as outlaws waging war against the Queen." Another resolution at the same meeting, adopted by 115 votes to 72, condemned the War Council "for this and their past pathetic performance and recommend that they should resign." A meeting at Nanyuki on Jan 29 similarly passed a resolution condemning the new surrender proposals and calling for the removal from office of those responsible.

Mr. Michael Blundell, Minister without Portfolio, explained to the settlers' meeting on Jan. 19 the reasons why the War Council had issued the new surrender terms.

At some point of the campaign, he said, it seemed obvious that they would have to offer new surrender terms differing from the original "green branch" terms (see p 13453, second column), as it was known from intelligence reports that one of the biggest deterrents to Mau Mau surrenders was the fear of being hanged for past offences. The Council of Ministers had discussed all aspects of the question, including the criticisms being voiced at the present meeting, and had eventually decided to proceed with the plan. Mr. Blundell nevertheless said that it could be taken for certain that those terrorists who had committed murder would be detained for life, and rejected the view (put forward by one speaker) that if a Labour Government came to power in Britain it would reverse the punishments and allow notorious murderers to go free after serving a year or two of their sentences.

Mr. Humphrey Slade (member for the Kinangop constituency, and an opponent of Mr Blundell's policy of forming the United Country Party in support of the "Lyttelton plan" for Kenya constitutional development) said that the original "green branch" terms were reasonably fair because those who had committed murder would not escape punishment. The effect of the new terms on the African, however, would be to give him the impression of a weak Government that was "crawling on its knees" to end the emergency. After declaring that "we cannot run this country on the basis of 'peace at any price,'" he announced his intention of resigning from the local emergency committee.

Mr. Blundell announced in the Legislative Council on June 8 that the surrender offer to the Mau Mau would be withdrawn on July 10 unless the military situation should demand its earlier withdrawal. Those who failed to surrender by that date would be deprived of all their existing land and of rights to share and occupy clan lands. He stated that since the surrender offer of Jan. 18, a total of 650 terrorists had given themselves up, including 20 gang leaders, in addition to which the terrorists had suffered 1,499 casualties.

Mr. Lennox-Boyd, the Colonial Secretary, replying to questions in the British House of Commons on March 2, had said that police investigations were being made into the actions of European settlers in Kenya who had distributed leaflets warning members of Mau Mau of the consequences of accepting the amnesty terms. He stated that a new emergency regulation had been made which rendered it an offence punishable by up to two years' imprisonment, and/or a fine of £500, to communicate or attempt to communicate with the terrorists to the prejudice of the amnesty offer.

In an earlier statement on May 18, Mr. Blundell had announced that further talks had recently been held with Mau Mau leaders for mass surrenders of terrorists. Leaders from the Aberdares, he said, had made contact with the Government and a series of meetings had been held—based strictly on the Government's surrender offer of Jan. 18; it was clear that terrorists from a very wide area were concerned in the general desire to end the fighting.

Mr. Blundell stated that the operation would reach an important stage within the next few days, but the Government had made it clear to the terrorists that they were not prepared to accept further delays in coming to a decision. Unless tangible evidence was forthcoming of the genuine intention of the terrorists to make a mass surrender, military operations against them would be intensified. It was clear from terrorists who had surrendered (the Minister said) that many more were anxious to come in, but were afraid that they would be executed in spite of the Government's clear statement to the contrary. On the other hand, some diehard Mau Mau leaders were doing everything in their power to prevent their followers from giving themselves up. Mr. Blundell also revealed that before the latest surrender offer of Jan. 18 letters had been received from important terrorist leaders (including Dedan Kimathi, the reputed Mau Mau "commander-in-chief") indicating that they were anxious to bring the fighting to an end—a fact which had had some bearing on the timing of the surrender offer.

On May 20 the Kenya Government announced that the mass surrender talks with the Mau Mau leaders had broken down and that intensified military operations had consequently been launched. The following statement was issued by the War Council about the breakdown in the negotiations:

"Terrorist leaders with whom Government representatives have been having talks undertook that not later than today [May 20] they would give tangible evidence of their intention to make a mass surrender. The evidence was to take the form of a substantial token surrender at an agreed place. That token surrender has not taken place. As the terrorists have failed to carry out this essential condition, the Government has decided to launch intensified military operations against them . . . Operations have now begun, and will be continued according to plan."

Mr. Blundell gave a more detailed account of the breakdown in the negotiations to the Legislative Council on May 25. He said that the first approaches had come from the terrorists as early as February, the main contact being with the Mau Mau leader called Kahinga. Talks later took place in Nairobi itself, and the terrorists, who came from the Aberdares, had informed the Government that they wanted to make a mass surrender, including the gangs on Mount Kenya They helped to make contacts, but without much success. Early in May terrorist leaders had been brought to Nairobi, where they asked that arrangements be made for a general surrender. To achieve this, it had been agreed that a token surrender should take place on May 18, but on May 13 the terrorists had completely reversed the conditions laid down, without giving reasons. The War Council had thereupon issued an ultimatum that unless the token surrender took place as arranged, the talks would be discontinued and military operations intensified. The time-limit had been extended to 1 p.m. on May 20 because bad weather had impeded contacts, and a reply had been received in Nairobi at 12.50 p.m. asking for a further considerable postponement, but indicating no change of outlook It had therefore been decided to proceed with the military operations

Other recent developments in Kenya are summarized below under cross-headings :

Resignation of Colonel Young as Commissioner of Police. Colonel Young, who had been seconded to Kenya for 12 months in March, 1954, to reorganize the colony's police force, resigned on Dec 20 after differences with the Kenya Government over the future status of the police force. He was succeeded by Mr R Catling, the Deputy Commissioner. Colonel Young's resignation followed the publication by the Kenya Government (on Dec. 14, 1954) of a White Paper containing a statement of its policy with regard to the recommendations of the commission which had been set up to inquire into the Kenya police, and which had reported in the previous February.

The White Paper recalled that the commission had dealt mainly with the terms and conditions of the Colony's police service, and with the status of the force Some of the more urgent recommendations for improving conditions had already been carried out and some were being applied, but there were others which could not at present be given effect because it was impossible during the emergency to give them detailed consideration. The White Paper nevertheless remarked that " such recommendations will be a guide to the future development of the force."

One of the most important of the commission's proposals was that every police officer should be accorded the powers of a constable in common law, and that the force should be independent of any outside control, including control by the Administration. This proposal the Government had found themselves unable to accept, despite the strong arguments of Colonel Young, who thought it essential to the successful reorganization of the police force and to the improvement of its quality and efficiency

According to the White Paper, the Government had given the recommendations careful consideration and had also weighed the advice of the Commissioner that " constable " status should at present be accorded only to police officers of the rank of inspector and above. " The Government recognizes the fundamental principle that the police must be kept free from any partisan influence or control," it said, " but there can be no exact comparison between the U.K. and such countries as Kenya, administered through a system of provincial and district administrations directed by a Governor." The Government view was that the independence and impartiality of the police when exercising their function of detecting crime and bringing offenders to justice must be affirmed, but it did not consider that it would help this independence to be established in the eyes of the public if the expression " constable in common law " was introduced into the law of Kenya Nevertheless, while the Government did not propose to introduce legislation on the lines suggested by the commission, it considered it desirable to amend the police ordinance to ensure that the form of oath taken by members of the force " is in conformity with the obligation of police to act with impartiality in bringing offenders to justice."

[Press reports from Kenya stated that senior administrative and police officers who were more closely in touch with African opinion than anyone else were unanimously opposed to the proposal for " constable " status. Apart from the issue of final responsibility for law and order, it was considered that the majority of Africans would regard " constable " status as meaning that the police were a law unto themselves and would be fearful and suspicious if the administration's control over the police were ended. Mr Ohanga, the African Minister for Community Development, was reported as being particularly opposed to it.]

On Feb. 15 the Legislative Council adopted a motion by an African representative member, Mr. Eliud Mathu, regretting that Colonel Young had decided to resign and expressing the Council's gratitude for the " valuable work done during his tenure."

Sentences on Police Officers for Perjury. Derek Laurence Searle, a former District Commandant in the Kenya Police Reserve, was sentenced by the Nairobi Magistrates' court on Dec. 10 to four years' hard labour on a charge of perjury. The charge arose from evidence given at the trial in October of an African who was sentenced to death for possessing ammunition, but who was subsequently freed after appealing successfully. The Appeal Court on Jan. 21 refused to reverse the decision against Searle, but reduced his sentence to 18 months on the ground that four years' hard labour was " manifestly excessive." Inspector George Horsfall, of the Kenya police, was also sentenced to 18 months' hard labour on March 25 for perjury in the same case. Horsfall had left Kenya when on bail before his trial, and had been arrested on his arrival at Southampton on Dec. 15; he subsequently returned to Kenya.

Colonel Young's Defence of Police. A report by Colonel Young, published on Jan. 10 after his resignation, declared that there was no justification for inferring that the Kenya police were " a law unto themselves," as had been suggested by the East African Appeal Court on Aug 17 (see page 13901, second column) Colonel Young's report, made at the request of the Governor (Sir Evelyn Baring), pointed out that between March 16 and May 18, 1954, the police officer in the case (Inspector Dracup) had been responsible, with two assistants, for the investigation of 39 capital charges, involving 58 accused. " In other words," it declared, " this young man of less then eight years' police experience was, in the space of two months, responsible for the investigation of more capital crimes than occur in two years in Greater London—crimes which, in London, are investigated with all the skill and resources of Scotland Yard To apply these standards, the best in the world, to Kenya during the present emergency except as an essential ultimate aim, is incongruous in the extreme, and indicative of the ignorance of the critic rather than any shortcomings of the police." The report said that the conduct of Inspector Dracup, while blameworthy in some respects, had certainly not been such as to justify serious condemnation.

Mr Justice Holmes (of the Kenya Supreme Court), who joined Colonel Young in the inquiry, said that he agreed with all the facts set out therein. " In the course of the present inquiry," he stated, " I have seen no tendency at all in the police to attempt to become a law to themselves. On the contrary, I have found an intense desire to know what the law is and to keep within it."

Further U.K. Financial Aid to Kenya. The Colonial Secretary, Mr. Lennox-Boyd, announced in the House of Commons on Feb. 23 that H.M. Government were prepared to provide a further grant of £10,000,000 and a further interest-free loan of £4,000,000 to Kenya in the financial year 1955-56. This assistance would only be called upon to the extent that it proved to be needed, and the Kenya Government would be expected to continue to take every practical step to increase its own revenues in order to meet its commitments. Mr. Lennox-Boyd stated that, so far as could be seen, emergency expenditure in 1955-56 was likely to be in the region of £16,000,000, towards which Kenya would be able to provide only £2,000,000 from her own resources Even if it should prove possible to reduce the present scale of military operations during this period, a large part of the emergency expenditure would still continue.

The Kenya Finance Minister (Mr. Vasey), presenting the Colony's Budget to the Legislative Council on April 27, estimated the deficit for 1955-56 on the basis of present taxation at £14,700,000. However, the Budget proposed an increased duty on local tobacco and cigarettes, motor spirit, paraffin, certain articles of clothing, and motor and bicycle tyres, higher stamp and cheque duties; and a raising of the tax on Kikuyu, Embu, and Meru tribesmen. This would reduce the estimated deficit for 1955-56 to £13,388,762, which, together with the deficit of £6,259,357 for 1954-55, gave a total estimated deficit on Exchequer account of nearly £20,000,000. This sum would be reduced by £10,000,000 by the British Government's grant, and to meet the remainder the whole of the interest-free loans offered by Britain for the period up to March 31, 1956 would probably have to be called on In addition, it would be necessary to approach Britain before the end of the year for assistance for the April-June quarter of 1956.

European Political Parties' Constitutional Proposals. Detailed proposals for constitutional changes in Kenya were made on Feb 6 in the report of the standing committee set up by the " truce conference " of European political parties in October last (see page 13902, first column). The report proposed that there should be three stages :

(1) Before the next general election, or until June 30, 1956, whichever was the earlier, steps should be taken to introduce a cross-bench comprising the nominated members on the Government benches. They would be entitled to exercise a free vote except on a vote of confidence in the Government, as distinct from a vote of confidence in a particular Minister.

(2) During the second stage, which would be from 1956 to 1960 (with effect from the beginning of the new Legislature), the Executive Council should be abolished. The Asian representation on the Council of Ministers should be one Moslem and one non-Moslem, each without portfolio; if additional Arab or African Ministers were appointed, an equal number of European Ministers, with or without portfolios, should be added. Parliamentary secretaries should be limited to five. Unofficial Ministers should be elected in accordance with the procedure decided upon under the first stage before the 1956 elections.

(3) From 1960 onwards, steps should be taken towards federating the East African territories. Instead, however, of a federation including two or more territories as at present defined, for example Kenya and Tanganyika, the report said that " it would meet the views and aspirations of the various races and groups to a greater degree if it were possible to divide the present territories into several provinces or states." In order to move towards this third stage, and to minimize dislocation when it was reached, an examination should be made, in conjunction with other East African territories and in consultation with the Central African Federation, as to the desirability and possibility of readjusting the present territorial boundaries with a view to creating a number of provinces from those territories, and with the object of giving them greater autonomy.

General Sir George Erskine, who was succeeded as C.-in-C., East Africa, by Lieut.-General Lathbury (see 19748 F) on May 2, expressed the conviction on April 12 that the emergency was in its last phase. " I have no doubt," he declared, " that we can look forward to a situation being reached during 1955 which will not be very different from that existing before the emergency." (Times - Manchester Guardian - Daily Telegraph)

JUNE 11—18, 1955

A. EASTERN EUROPE. — The Warsaw Conference. - 20-Year Treaty of Mutual Assistance between U.S.S.R., Poland, Czechoslovakia, Eastern Germany, Hungary, Rumania, Bulgaria and Albania. - Unified Military Command under Marshal Koniev. - Marshal Bulganin's Support for Four-Power Talks. - New Soviet Proposals on Disarmament.

The eight countries which took part in the Moscow Conference of Nov. 29 - Dec. 2, 1954 (see 13936 A)—i.e. the Soviet Union, Poland, Czechoslovakia, Eastern Germany, Hungary, Rumania, Bulgaria, and Albania—held a three-day conference in Warsaw on May 11-13 which resulted in (1) the signing of a 20-year treaty of friendship, co-operation and mutual assistance between those countries, and (2) the creation of a unified military command for the armed forces of all those countries except Eastern Germany, whose participation (it was stated) would be "examined later." Marshal Ivan Koniev, of the Soviet Army, was appointed Commander-in-Chief of the joint armed forces.

The conference was attended by the Prime Ministers, Foreign Ministers, and Defence Ministers of the eight countries, and by an observer from the Chinese People's Republic. The principal delegates were :

Soviet Union. Marshal Nikolai Bulganin, Prime Minister, M. Vyacheslav Molotov, Foreign Minister, Marshal Zhukov, Minister of Defence; Marshal Koniev The Premiers of the Russian, Ukrainian, Byelorussian, Latvian, Lithuanian, and Estonian Soviet Republics were also present.

Poland. M Joseph Cyrankiewicz, Prime Minister; M Stanislaw Skrzeszewski, Foreign Minister, Marshal Konstantin Rokossovsky, Defence Minister.

Czechoslovakia. M. Vilem Siroky, Prime Minister, M Vaclav David, Foreign Minister; General Alexei Cepicka, Defence Minister.

German Democratic Republic (Eastern Germany). Herr Otto Grotewohl, Prime Minister, Herr Walter Ulbricht and Herr Otto Nuschke, Deputy Prime Ministers, Dr Lothar Bolz, Foreign Minister.

Hungary. M. Andras Hegedüs, Prime Minister, M Janos Boldocki, Foreign Minister; General Istvan Bata, Defence Minister

Rumania. M. Gheorghe Gheorgiu-Dej, Prime Minister, M Simon Bughici, Foreign Minister; General Emil Bodnaras, Minister for the Armed Forces

Bulgaria. M Vulko Chervenkov, Prime Minister; M. Mincho Neichev, Foreign Minister; General Panchevsky, Defence Minister

Albania. M Mehmet Shehu, Prime Minister, M. Benar Shtylla, Foreign Minister, Lieut.-General Bekir Balluku, Defence Minister.

China. General Peng Teh-huai, Minister of Defence, as an observer.

The Warsaw Conference, which met six days after the coming into force of the London and Paris agreements (see 14237 A), was addressed by the eight Prime Ministers, and also by the Chinese observer. The major speech was made by Marshal Bulganin, Prime Minister of the U.S.S.R., who strongly denounced the remilitarization of Western Germany under the London and Paris agreements, but at the same time dwelt on the necessity for peaceful co-existence and put forward a number of proposals for the relaxation of international tension, chiefly through the reduction of armaments. Extracts from his speech are given below under cross-headings.

The Paris Agreements and the Remilitarization of Western Germany. "At the Moscow Conference [of 1954] the governments of the countries represented here agreed to reconsider the situation in the event of the Paris agreements being ratified Now this necessity has arisen. The ratification of the Paris agreements has become a fact. . . . As a result, the West German militarists have been given the right to recruit a standing army and to supply it with all types of modern weapons. . . . Mass shipments of American arms to Western Germany are being prepared, while the militarization of West German industry is being speeded up.

"The Paris agreements, therefore, are putting means for new aggression into the hands of yesterday's aggressors. German militarism, which in the lifetime of one generation has unleashed two World Wars, is again re-emerging on the European and international scene. Ten years after the end of the Second World War, Western Germany, with the help of the United States, Britain, and France, is becoming the main seat of war danger in Europe. It is becoming a member of the aggressive North Atlantic bloc and also of the West European military union directed against the Soviet Union and the people's democracies."

After accusing Britain and France of allying themselves with "the West German militarists and revenge-seekers," and referring to the Soviet Government's abrogation of the Anglo-Soviet and Franco-Soviet treaties concluded during the war (see 14239 A), Marshal Bulganin continued : "The activization of the aggressive forces can be seen not only in Europe. A great deal of pressure is being brought to bear on Near and Middle Eastern States to force them to join the military blocs which are being set up as appendages to the North Atlantic alliance. Pressure is being exerted on Syria, Egypt, and other Arab states, and also on Afghanistan. Attempts are being made to draw Persia into aggressive blocs, although, under the Soviet-Persian Treaty of 1927, Persia undertook not to enter any political alliances or agreements directed against the Soviet Union. . . . Provocations are continuing against the People's Republic of China in the Formosa area . . A military bloc has been set up in South-East Asia, under the name of SEATO, which . . . aims at preserving and consolidating colonial regimes, suppressing national liberation movements, and interfering in the affairs of China and other Asian countries. It is not surprising that such Asian States as India, Burma, and Indonesia, which respect freedom and independence, have flatly refused to join this reactionary bloc. . . .

We have held the view—as we still do—that the remilitarization of Western Germany and her integration with NATO is the chief obstacle to the restoration of Germany's national unity along peaceful and democratic lines. . . . At the same time we have been, and remain, supporters of the restoration of a united Germany as a free, peaceful and democratic state. . . A *rapprochement* between Eastern and Western Germany, an easing of tension in their relations, could make an important contribution to the unification of Germany, as well as to the maintenance of peace in Europe . "

In spite of the ratification of the Paris agreements (Marshal Bulganin continued), the Soviet Government was willing in the future, as in the past, "to facilitate in every way the restoration of German unity and the conclusion of a peace treaty with Germany on an acceptable basis." It would also "support those countries and forces which are concerned with easing international tension and with maintaining and strengthening universal peace and security" In this connexion Marshal Bulganin said that the restoration of the independence of a neutral Austria was "a considerable contribution to the strengthening of peace in Europe."

Four-Power Talks on Relaxation of International Tension. "The Soviet Government firmly believes that, given good will by the States which bear the chief responsibility for maintaining peace, it would be possible to settle a number of major international problems. . . . A great deal has been said and written recently in the U.S.A., Britain, and France about the need for a Great Power conference at top level. . . . The Soviet Government takes a favourable attitude to the idea of such a conference . . . Yesterday [May 10] the Soviet Government received Notes from the Governments of the U S.A , Britain, and France proposing a meeting of Heads of Government of the four Powers, together with their Foreign Ministers. They are being carefully studied . . .

"The world has for many years been in a 'cold war' situation. . . . Radical measures are needed to ease international tension and to create the necessary trust in international relations, to eliminate the threat of a new war, and to create conditions for peace and tranquillity among the nations. How can this be achieved? First and foremost by ending the 'cold war.' The Soviet Government believes that the U.N. General Assembly must recommend all countries to take the necessary measures for the strict observance of its decision condemning any form of propaganda for a new war, the ending of all calls for war, and the incitement of enmity between the peoples through the Press, radio or cinema, as well as through public statements Failure to comply with this recommendation should be regarded as a violation by a State of its obligations to the United Nations.

"The Soviet Government believes that the easing of international tension would be promoted by the immediate withdrawal of their occupation forces from German territory by the Soviet Union, the U S A , Britain, and France, except for strictly limited contingents to be left temporarily on German territory pending the conclusion of an agreement for their complete withdrawal.

"The States which are permanent members of the Security Council must reach agreement on the dismantling of military bases in foreign territories . . The countries concerned must settle questions outstanding in the Far East in conformity with the principles of sovereignty and territorial integrity In their economic relations, States should eliminate every discrimination which hampers the development of broad economic co-operation between them, and they should expand international cultural relations"

"The carrying-out of these measures would help to establish that confidence among States which is the chief requirement for an effective, practical solution of the problem of disarmament. . . . We are emphatically in favour of transforming the problem of disarmament from one which is suspended in mid-air to one with a real basis, and of solving it."

Soviet Proposals for Disarmament. Marshal Bulganin then put forward the following Soviet proposals for the reduction of armaments and the prohibition of atomic weapons, to be carried out over two years in two stages, each of which would last a year :

In the first stage, covering the year 1956, the following measures would be taken .

(1) The U N. Disarmament Commission would draw up a draft convention, which would be submitted to the Security Council, for "the reduction of armaments and the prohibition of atomic, hydrogen, and other weapons of mass destruction." The States signing this convention would undertake, as a first step, not to increase their armed forces and armaments above the levels existing on Dec 31, 1954. Their appropriations for military purposes would also be kept at the 1954 levels.

(2) The armed forces of the five great Powers should not exceed the following levels : United States, 1,000,000 to 1,500,000 men; Soviet Union—1,000,000 to 1,500,000 men; China—1,000,000 to 1,500,000 men; Great Britain—650,000 men; France—650,000 men.

(3) The reduction of the armed forces and armaments of the five Powers to the established levels would be carried out in two equal stages—half in 1956 and the remaining half in 1957. The respective military appropriations of the five Powers would also be reduced accordingly.

(4) A world conference would be called, not later than the first half of 1956, with the object of putting the above-mentioned measures into effect, and also of determining the level of armaments and armed forces of those countries which were not permanent members of the Security Council [i.e. countries other than the "Big Five."] The armaments and armed forces of these latter countries should be "considerably lower" than the levels proposed for the U.S A., the U.S.S.R., China, Britain, and France.

(5) Simultaneously with the reduction of armaments and armed forces, the States concerned should end all tests of atomic and hydrogen weapons, and assume a solemn obligation not to use such weapons. Exceptions to this rule might be allowed "for the purposes of defence against aggression, when an appropriate decision has been taken by the Security Council."

(6) States possessing military, naval or air bases on the territory of other countries would undertake to dismantle part of those bases during 1956.

The second stage, to be carried out during 1957, would be marked by the following steps:

(1) The five great Powers would complete the reduction of their armaments and armed forces to the agreed levels—i.e., those obtaining on Dec 31, 1954.

(2) A complete prohibition on the use of atomic, hydrogen, and other weapons of mass destruction would enter into force after armed forces and conventional armaments had been reduced by three-quarters of the total reduction. The removal of these weapons from national armaments, and the reduction of armaments and armed forces by the remaining one-quarter, would begin simultaneously and would be completed during 1957.

(3) All States would undertake to promote international co-operation in the peaceful uses of atomic energy, with special attention to assisting under-developed countries.

(4) The measures for dismantling all military, naval and air bases on the territory of other States would be completed during 1957.

Control of Disarmament. "For almost nine years," Marshal Bulganin continued, "discussions in the U.N. have centred around the question of control, which has been the main issue of disagreement We believe that these disagreements are the result of an unrealistic approach to the question of control The Soviet Government is profoundly convinced that effective control over disarmament is possible. . . ." Marshal Bulganin then submitted the following new proposals of the Soviet Government for international control of disarmament:

"Modern war is inconceivable without the deployment and concentration of large military, naval and air forces. . . . Atomic weapons cannot be used without means of delivering them to the target. The Soviet proposals for control, therefore, are based on the need to create conditions in which the aggressive intentions of any State could be ascertained and thwarted in time We propose the establishment of such control as would give timely warning of a dangerous concentration of land, naval and air forces. With these ends in view it is necessary to have control posts at big ports, airfields, and railway junctions of strategic importance. The setting-up of such control would fully preclude sudden attacks by one State on another. The international control agency set up for this purpose would have the right to demand from States the necessary information on measures for carrying out the reduction of armaments and armed forces, and would have unhindered access to materials necessary for military purposes."

The Eight-Nation Treaty of Mutual Assistance. Turning to "the question of security in Europe," Marshal Bulganin expressed his regret that the Western Powers had preferred to adopt "the policy of re-establishing German militarism, with all its consequences," rather than accept the draft European collective security treaty proposed by the Soviet Union. "In these new conditions," he continued, "the peace-loving countries of Europe must see to the safeguarding of their security . . . on the basis mapped out by the eight States at the Moscow Conference. . . . Almost all our countries are bound by bilateral treaties of friendship and mutual assistance. . . . In the new situation, however, this is not enough. We have all agreed that the threat to the security of our countries, which has increased as a result of the aggressive actions of the Western Powers, calls for unification of our efforts and the taking of new measures to strengthen the defensive capacity of the peace-loving States. The treaty of friendship, co-operation and mutual assistance, which we have met here to sign, will serve these aims. . . . It can be joined by any country, regardless of its social and political system. . . . In the event of a general European system of collective security being set up, the eight-Power treaty would become invalid . . ."

Marshal Bulganin said in conclusion: "The 'positions of strength' policy cuts both ways. If one side builds up its forces, the other is compelled to do the same. As a result we have what is called an 'arms race,' fraught with the serious danger of war. We are not advocates of a 'positions of strength' policy. We do not yearn for war. We do not want an arms drive. We would prefer to spend those resources, which we now have to use for military purposes, on peaceful needs, on raising the material well-being of our peoples. But when military blocs are set up, when our countries are being surrounded by military bases and threatened with atomic war, we cannot remain idle. In these conditions we are compelled to take retaliatory measures. One of these measures is our conference, and the decisions we are taking here. In reply to the revival of German militarism . . . the countries represented here are resolved to unite their forces and to strengthen still further their friendship and co-operation. By concluding the treaty of friendship, co-operation and mutual assistance between the eight States, we will be laying an unshakable foundation of united action which will have the object of repelling the aggression being prepared, and of safeguarding peace and security in Europe."

Among other speakers, the Prime Minister of Poland (M. Joseph Cyrankiewicz) dwelt on the horrors of the German occupation of Poland in the Second World War; accused the Western Powers of re-arming "neo-Nazis," who, he alleged, were again planning to invade Poland; and declared that the eight-nation treaty would give Poland "a sense of security" and would guarantee the inviolability of the Oder-Neisse frontier. The Chinese Defence Minister, General Peng Teh-huai, declared that in the event of an attack by "imperialists" on the Eastern European countries, China would "jointly wage the fight against aggression until final victory."

M. Cyrankiewicz spoke, in part, as follows "Following the ratification of the Paris agreements, the threat of the revival of German militarism becomes real . . . The September tragedy [the German invasion of 1939] brought us losses which are still felt by each one of us. Who among us does not remember the dark years of the occupation, when the now-revived German Army lorded it on Polish soil? . . Those same forces which caused us so much suffering and destruction are today being revived by the Western Powers, are being given uniforms and armed with modern weapons. Again they are being told that their march leads eastwards.

"Can we forget that we lost 6,000,000 of our people? That there is not a family in Poland who did not lose someone near and dear at the hands of the Nazi butchers? That our museums and theatres, our schools and universities, our hospitals and factories, were destroyed? That the best of our creative intelligentsia were killed, as were immense numbers of defenceless people? Out of every 1,000 inhabitants, Poland lost 220

"Can a government responsible for the fate of the nation allow itself to look passively on at the development of events? Can it ignore the growing danger? No honest government in such a situation can remain inactive. . . The Polish Government seek effective security measures so that the dark years of the occupation will never return; so that there will be no more Oswiecim, Maidanek, or other death camps. . . The [eight-nation] treaty means that the Polish frontier on the Odra (Oder) and Nysa (Neisse), and the security and independence of our country, will be guaranteed not only by the Polish nation and its armed forces but also by the powerful Soviet Union. . That is why this treaty will give every Pole a sense of security. . . ."

General Peng Teh-huai declared that his Government were ready to resolve all international differences, including the situation in the Formosa Straits, by international negotiations. He added, however, that China would "support by all means at her disposal the decisions taken at this conference," and would assist her European allies "with all her strength" if they were attacked by the "enemies of peace."

The Eight-Nation Treaty.

The eight-nation treaty of friendship, co-operation, and mutual assistance, consisting of 11 Articles, was signed at the end of the conference by Marshal Bulganin, M. Cyrankiewicz, M. Siroky, Herr Grotewohl, M. Hegedüs, M. Gheorgiu-Dej, M. Chervenkov, and M. Mehmet Shehu. Its text was as follows:

Preamble. "The contracting parties:

Reaffirming their desire for the organization of a system of collective security in Europe with the participation of all European States, irrespective of their social and State systems;

Taking into consideration at the same time the situation obtaining in Europe as a result of the ratification of the Paris agreements, which provide for the formation of a new military grouping in the shape of the Western European Union together with a re-militarized Western Germany, and for the integration of Western Germany in the North Atlantic bloc, which increases the threat of another war and creates a menace to the national security of the peace-loving States;

Convinced that under these circumstances the peace-loving States of Europe should take the necessary measures for safeguarding their security;

Guided by the purposes and principles of the U.N. Charter;

In the interests of strengthening and promoting friendship, co-operation, and mutual assistance in accordance with the principles of respect for the independence and sovereignty of States, and also with the principle of non-interference in their internal affairs;

Have resolved to conclude this Treaty of Friendship, Co-operation and Mutual Assistance.

Article 1. The contracting parties undertake, in accordance with the U N. Charter, to refrain in their international relations from the threat or use of force, and to settle their international disputes by peaceful means so as not to endanger international peace and security.

Article 2. The contracting parties declare their readiness to take part, in a spirit of sincere co-operation, in all international undertakings designed to safeguard international peace and security, and to use all their energies for the realization of these aims. Moreover, they will work for the adoption, in agreement with other States desiring to co-operate in this matter, of effective measures towards a general reduction of armaments and the prohibition of atomic, hydrogen, and other weapons of mass destruction.

Article 3. The contracting parties will consult among themselves on all important international questions relating to their common interests. In the interests of organizing their joint defence, and of

upholding peace and security, the contracting parties will immediately consult together whenever, in the opinion of any of them, there has arisen the threat of an armed attack on one or several States that are signatories of the treaty

Article 4. In the event of an armed attack in Europe on one or several States that are signatories of the treaty by any State or group of States, each party to this treaty shall, in the exercise of the right to individual or collective self-defence in accordance with Article 51 of the U.N. Charter, render the State or States so attacked immediate assistance, individually and in agreement with other States that are parties to this treaty, by all the means it may consider necessary, including the use of armed force. The parties to this treaty shall immediately consult among themselves on the necessary joint measures to be adopted for the purpose of restoring and upholding international peace and security.

In accordance with the U.N Charter, the Security Council shall be advised of the measures taken on the basis of this Article These measures shall be stopped as soon as the Security Council has taken the necessary steps to restore and uphold international peace and security.

Article 5. The contracting parties have agreed to set up a joint command for their armed forces, which shall be placed under this command by agreement among the parties, and which shall function on the basis of jointly defined principles. They will also take other agreed measures to strengthen their defensive capacity, in order to safeguard the peaceful labour of their peoples, to guarantee the inviolability of their frontiers and territories, and to provide safeguards against possible aggression

Article 6. For the purpose of holding the consultations provided for in the treaty, and for considering problems arising out of the implementation of this treaty, a Political Consultative Committee shall be formed in which each State that is a party to this treaty shall be represented by a member of the government, or any other specially appointed representative. This committee may set up any auxiliary organs which may be necessary.

Article 7. The contracting parties undertake not to participate in any coalitions and alliances, and not to conclude any agreements, the purposes of which would be at variance with those of the present treaty. They declare that their obligations under existing international treaties are not at variance with the provisions of the present treaty.

Article 8. The contracting parties will act in a spirit of friendship and co-operation with the object of furthering and strengthening the economic and cultural relations between them, adhering to the principles of mutual respect for their independence and sovereignty, and of non-interference in their internal affairs.

Article 9. This treaty may be acceded to by other States—irrespective of their social and State systems—who declare their readiness to assist the efforts of the peace-loving States for the purpose of safeguarding the peace and security of nations.

Article 10. The treaty is subject to ratification, and the instruments of ratification will be deposited with the Government of the Polish People's Republic. It will take effect on the date on which the last instrument of ratification is deposited.

Article 11. The treaty will remain in force for 20 years Those States which do not give notice of abrogation one year before the treaty expires will remain bound by it for a further 10 years.

In the event of the organization of a system of collective security in Europe, and the conclusion of a general European treaty of collective security to that end, the present treaty shall cease to be effective on the date on which such a general European treaty comes into force."

The treaty was drawn up in the Russian, Polish, Czech, and German languages, the four texts having equal authenticity.

Formation of Unified Military Command.

A separate announcement stated that the eight nations had decided to form a joint command of their armed forces, and had taken the following decisions in this connexion :

(1) Questions relating to the strengthening of defensive capacity and to the organization of the joint armed forces would be examined by the Political Consultative Committee [see Article 6 above], which would take all appropriate decisions.

(2) Marshal Ivan Koniev, of the Soviet Army, had been appointed Commander-in-Chief of the joint armed forces contributed by the participating countries.

(3) The Ministers of Defence and other military leaders in the countries concerned would act as deputies of the C.-in-C., and would be vested with the command of the armed forces of each State allotted to the joint armed forces.

(4) The participation of the German Democratic Republic in the joint command would be examined later.

(5) A joint staff would be set up by Marshal Koniev which would include representatives of the General Staffs of all the participating countries.

(6) The headquarters of the joint staff would be in Moscow.

(7) Deployment of the joint armed forces on the territories of member-States would be carried out "in accordance with the requirements of mutual defence and by agreement between these States."

A report on "problems connected with the establishment of combined armed forces" was given to a closed session of the conference by General Antonov, of the Soviet Army.

Marshal Ivan Koniev (58), one of Russia's leading soldiers in World War II, commanded the Soviet armies which, after liberating the Ukraine, advanced through Poland and Eastern Germany to link up on the Elbe with the Anglo-American armies advancing from the West Forces under Marshal Koniev's command also took part in the battle of Berlin, captured Dresden, and liberated Prague. After serving for a short time as Soviet High Commissioner in Austria, Marshal Koniev returned to Moscow in 1946, to succeed Marshal Zhukov as C.-in-C. of the Soviet armed forces He was Inspector-General of the Army and Vice-Minister of Defence in 1950-52, and in 1953 presided over the tribunal which condemned Beria to death. He is a member of the Supreme Soviet, in which he sits as a deputy for Lvov.

The treaty was ratified by the Polish Sejm on May 19, by the East German Volkskammer on May 20, by the Czechoslovak National Assembly on May 24, and by the Presidium of the Supreme Soviet of the U.S.S.R. on May 26.—(Soviet Weekly - Polish Embassy, London) **(Prev. rep. Moscow Conference, 13936 A ; Paris Agreements, Entry into Force, 14237 A.)**

A. ITALY. — Sicilian Elections.

Elections for the Regional Parliament of Sicily (90 seats) were held on June 5 with the following result :

	Votes	Seats
Christian Democrats	895,318	37
Communists	481,975	20
Italian Socialist Party (Nenni Socialists)	225,944	10
National Monarchists	238,975	8
Dissident Monarchists	56,116	1
Italian Social Movement (M.S.I., neo-Fascist)	222,664	9
Liberals	91,739	3
Social Democrats and Republicans	72,365	2
Left Independents	19,054	—

The percentage of the electorate going to the polls was 86 9, out of a total electorate of about 2,700,000.

Party strengths after the last (1951) regional elections were : Christian Democrats, 30 , Communists and Nenni Socialists (joint list), 30 ; neo-Fascists (M.S.I.), 11 ; Liberals and Monarchists (joint list), 9 ; Social Democrats and Republicans, 3 ; minor parties and autonomist groups, 7.

The results constituted an important success for the Christian Democratic Party, which, in addition to gaining seven seats, increased its poll by nearly 230,000—mainly at the expense of the neo-Fascists, the Liberals, and the smaller parties. The Communists and Nenni Socialists (who, unlike 1951, did not present a joint list) returned together 30 members, as in the former Parliament, the combined vote of the two parties remaining much the same as in 1951. In the latter year, however, 22 Communists and eight Nenni Socialists were returned on the joint list, whereas in the new Parliament the Communists will have two fewer members, and the Nenni Socialists two more, than previously. As compared with 1951, the returns showed that the Nenni Socialists had gained some 50,000 votes, mainly at the expense of the Communists—a result attributed to the new programme of Socialist-Catholic collaboration on which the Nenni Socialists fought the elections.

Both the Monarchists and the neo-Fascists returned two fewer members than in 1951, the neo-Fascist vote falling by over 50,000. [Since 1951 the Monarchists had split into two parties, the "National" Monarchists headed by Signor Covelli and the "Dissident" Monarchists led by Signor Lauro.] The Liberal, Republican, and Social Democratic vote also fell considerably as compared with the last elections.

Despite the Christian Democrats' success, the party failed to secure an overall majority in the new regional Parliament and, as in the former House, will have to depend on an alliance with other parties. In the former Parliament the Christian Democrats were allied with the Monarchists and Liberals.

B. FRANCE. — Appointments to French Academy.

Three vacancies in the *Académie Française*, caused by the recent deaths of M. Jérôme Tharaud (the novelist), M. Edouard Le Roy (the philosopher), and M. Emile Mâle (the historian of religious art) were filled on March 3, when the following new members were elected : M. Jean Cocteau (65), the author, playwright, and film producer, for the *fauteuil* of the late M. Tharaud ; M. Henri Daniel-Rops (54), the author and Roman Catholic historian, for the seat formerly held by M. Le Roy ; and M. François Albert-Buisson (73), an eminent jurist, president of the *Académie des sciences morales et politiques* and chancellor of the *Institut de France*, in the place of the late M. Mâle.—(Le Figaro, Paris) **(Prev. rep. 12804 D.)**

A. UNITED KINGDOM. — The Birthday Honours.

The Birthday Honours List was published on June 9, the principal awards being set out below.

Barons. Mr. Ralph Assheton, lately M P. (Conservative) for Blackburn West (1950-55), and previously for the City of London (1945-50) and Rushcliffe (1934-45), for political and public services; Sir Geoffrey Heyworth, chairman of Unilever Ltd., for public services; Mr. Malcolm McCorquodale, lately M.P. (Conservative) for Epsom (1947-55) and previously for Sowerby (1931-45), for political and public services; Sir Arnold McNair, Q C., lately President of the International Court of Justice.

Privy Councillors Mr. Henry Brooke, M.P. (Conservative, Hampstead), Financial Secretary to the Treasury; Mr Robert Turton, M P. (Conservative, Thirsk and Malton), Joint Parliamentary Under-Secretary for Foreign Affairs

Companion of Honour. Mr. Henry Moore, the sculptor

Baronets. Sir Robert Cary, M P (Conservative, Manchester, Withington), for political and public services, Sir George Horatio Nelson, chairman and managing director, English Electric Co Ltd, Mr. William McN. Snadden, lately M P. (Conservative) for Kinross and West Perth; Judge George Clark Williams, Q.C., for public services in Carmarthenshire

Knights Bachelor. Mr. G H Banwell, secretary, Association of Municipal Corporations; Mr. Harold Bishop, Director of Technical Services, B.B C; Professor W M Calder, for services to Greek scholarship; Mr. W W Cocker, for political and public services in Lancashire; Mr J. M Craster, for political and public services in Northumberland; Mr G H. Curtis, Chief Land Registrar; Mr J. C. Denholm, president, Chamber of Shipping of the U K., Colonel T. C Dunlop, for political and public services in Ayrshire, Mr F. A. Enever, Deputy Treasury Solicitor; Mr R. C. K Ensor, the historian; Mr. B Ifor Evans, Provost of University College, London, Alderman F S Foster, for political and public services in Essex, Lieut -Colonel O. B. Giles, for political and public services in Lincolnshire; Mr Ronald Gould, general secretary, National Union of Teachers, Mr. H R. Granger, chairman and managing director, Duke's Grain Warehousing Co Ltd., Mr A W. Grant, chairman, Engineering and Allied Employers' West of England Association; Mr. A F Harrison, Solicitor, Ministry of Labour; Lieut -Colonel R. H. Haslam, for political and public services in Hertfordshire; Wing-Commander N. J. Hulbert, M P. (Conservative, Stockport North), for political and public services; Mr. G Langdon Keynes (a brother of the late Lord Keynes), consulting surgeon, St Bartholomew's Hospital, London; Mr. Ivison Macadam, Director-General, Royal Institute of International Affairs, Major Duncan McCallum, M.P. Lord Iveagh (81), head of the Guinness firm, formerly sat for many years in the House of Commons as Mr. Rupert Guinness. He has been Chancellor of the University of Dublin (Trinity College) since 1927.—(Times - Daily Telegraph) **(Prev. rep. 13976 A.)**

B. ITALY. — $70,000,000 International Bank Loan for Development in Southern Italy and Sicily.

The International Bank announced on June 1 that it had lent the equivalent of $70,000,000 in various currencies for the development of Southern Italy—the largest development loan ever made by the Bank in Europe.

The loan, which was guaranteed by the Italian Government, was made to the *Cassa per il Mezzogiorno*, the government agency for the administration of Italy's economic plan for the South, which had already received two previous loans from the International Bank (see 11809 A, 13306 A) Its terms were as follows. 4½ per cent p a. interest, plus 1 per cent p.a. commission, repayable in 35 half-yearly instalments beginning on July 15, 1958. The Bank of America (the largest private bank in the U.S.A., which was founded by the late Amadeo Giannini and still has strong Italian connexions) participated in the loan, without the International Bank's guarantee, to the extent of $5,000,000

It was stated by the International Bank that the loan would be divided almost equally between the mainland of Southern Italy and the island of Sicily. On the mainland it would help finance (*a*) a pulp and paper mill near Avezzano, the annual production of which would be about equal to Italy's present imports; (*b*) a woollen yarn mill near Frosinone, and (*c*) eight power projects, which would add about 224,300 kw. to installed capacity and increase annual generation by 740,000,000 kwh. In Sicily, the projects to receive financial assistance from the loan would be: (*a*) an irrigation project in the plain of Catania, which was expected to raise the annual value of farm production in the region, especially of citrus fruits, to three times its present value by 1967; (*b*) a cement plant, with a capacity of 130,000 tons a year, to be built near Palermo; (*c*) a fertilizer plant to be built at Catania and another to be built near Augusta; (*d*) a new factory near Palermo for pharmaceutical products and agricultural chemicals; and (*e*) a plant to be built at Catania which would concentrate and freeze citrus fruit, and which was expected to produce 800 tons of concentrated orange juice and 600 tons of concentrated lemon juice a year.

The International Bank pointed out that the new projects would provide employment for many more people, and that the public works programme of the *Cassa per il Mezzogiorno* had already created about 200,000 new full-time jobs, apart from 90,000 indirectly created through the stimulation of private industry. (Corriere della Sera, Milan - Giornale d'Italia, Rome - International Bank, Washington) **(Prev. rep. 14168 A.)**

C. AUSTRIA. — Ratification of State Treaty.

The Austrian State Treaty was unanimously approved by both Houses of the Austrian Parliament on June 7-8, the ratification Bill being signed by President Körner on the latter date. -(Wiener Zeitung) **(Prev. rep. 14193 A.)**

A. NORTH VIETNAM. — Political Developments since Geneva Agreement. - Evacuation of French Forces. - Vietminh Occupation of Hanoi and Haiphong. - Policy Statement by President Ho Chi-minh. - Chinese Aid in Restoration of Communications. - Agreements with France on Status of French Firms, Pasteur Institute, and Tongkingese Coalmines.

In accordance with the terms of the Geneva Agreement, the French Army evacuated Hanoi on Oct. 9, 1954, and Haiphong (the last town in North Vietnam under French control) on May 13, 1955. Both cities were occupied by Vietminh troops as the French garrisons withdrew, the transfer of sovereignty taking place without incident. Both before and after the occupation of Hanoi, the North Vietnamese Government issued a number of statements promising that private property would be respected, appealing to workers to co-operate with employers in the interests of increased production, and giving assurances that there would be no discrimination against foreign nationals or former officials and soldiers of the South Vietnamese Government.

In a speech on Sept. 3, 1954, President Ho Chi-minh stated that his Government would respect French and other foreign property, and was prepared to retain the services of "all police and officials who worked for the enemy, if they wish to serve the people." The Government's economic policy would be conducted in the joint interests of the State, employers, and workers, and would aim at increasing production, developing internal and external trade, and raising living standards He also gave an assurance that the co-operation of non-Vietminh nationalists, "irrespective of their class or of whether they have collaborated with the enemy," would be welcomed if they were "prepared to work for peace, national unity and independence, and democracy" On the occupation of Hanoi, President Ho sent a message to the citizens appealing to them to safeguard public and private property and to apply themselves to the task of rehabilitation, and assuring "our friends the foreign nationals" that they would receive help and protection from the North Vietnamese Government.

Among the immediate measures taken by the North Vietnamese Government after the occupation of Hanoi were the abolition of all national defence and security taxes, and of a number of special taxes; the abolition of press censorship, although newspapers were forbidden to disseminate propaganda against the Geneva Agreement or detrimental to the security and independence of Vietnam; the establishment in Hanoi of the National Bank of the Democratic Republic of Vietnam, and the fixing of the exchange rate at 30 North Vietnamese piastres to one South Vietnamese piastre—a rate described by French sources as "reasonable." South Vietnamese piastres ceased to be legal tender throughout North Vietnam on Oct. 30, 1954

M Pham Van-Bach, deputy Minister of the Interior, stated at a press conference on Feb. 5 that the North Vietnam Government regarded the restoration of normal relations with South Vietnam as "indispensable," and was prepared to grant facilities to the people of both zones for travel and correspondence between them, business activities, and co-operation in literary, artistic, scientific, and sporting activities. The Government subsequently announced that it was prepared to meet representatives of the South Vietnamese Government in order to discuss these questions, and that it was ready to facilitate contacts between businessmen in the two zones.

The first Soviet Ambassador to Vietnam, M. Lavritchev, arrived in Hanoi on Oct. 26. The U.S. State Department had previously announced that the U.S. Consulate in Hanoi would remain open, whilst emphasizing that this did not imply recognition of the North Vietnamese Government, as, in the U.S. Government's view, the Saigon Government—to which the Consulate was accredited—remained "the only legal Government of the State of Vietnam." The North Vietnamese Government subsequently announced on Oct. 28 that it did not recognize the U.S. Consulate, and criticized the U.S. attitude as "completely contrary to the Geneva Agreements;" no action, however, was taken against the Consulate.

Under an agreement signed in Peking on Dec. 24, 1954, the Chinese Government undertook to assist in the restoration of communications and water conservancy works in North Vietnam. The agreement provided (1) that Chinese experts and technicians would supervise the restoration of the railway from Hanoi to Dongdang, on the Chinese frontier; (2) that China would supply the necessary locomotives, coaches, etc.; (3) that China would supply road-building machines and instal tyre-repair and re-treading factories; (4) that China would provide equipment for the building of civil airports and meteorological stations; (5) that postal and telecommunications services between China and North Vietnam would come into operation from Jan. 1, 1955; (6) that China would supply the materials for the repair of five water conservancy works destroyed during the Indo-China war.

Relations between North Vietnam and France.

M. Jean Sainteny, who acted as French Commissioner for Tongking and North Annam from 1945-47, was appointed French "delegate-general" to North Vietnam on Aug. 7, 1954, although with no official status. On Oct. 18 he opened negotiations with the Government in Hanoi on the question of economic and cultural relations between France and North Vietnam, as a result of which provisional agreements were concluded in December on the status of French industrial and commercial enterprises in North Vietnam and on the future of the Pasteur Institute for cancer research in Hanoi. On the conclusion of the first stage of the negotiations, M. Sainteny was officially accredited on Dec. 16 as French delegate to President Ho Chi-minh—an appointment interpreted by the French Press as equivalent to *de facto* recognition of the North Vietnamese Government.

A joint communiqué issued on Dec. 10 by M Sainteny and M. Phan Anh (Minister of Commerce) announced that French firms, whether retaining their present form or operating on a joint basis with Vietnamese capital, would not be subjected to any discrimination, and would be granted facilities to purchase equipment and to export their profits to the franc area The recruitment of labour and the movement of personnel would be entirely free, as would the sale of manufactured goods on the home market
